Romani veteres regnari volēbant, libertatis dulcedine nondum experti, the old Romans willed that there should be kings, having not yet experienced the sweetness of freedom (since they had not yet experienced etc.). Liv. 1, 17. — *Flaminium Cælius religione neglectâ* cecidisse apud Trasimenum scribit, Cælius writes that Flamininus had fallen (in the battle) at lake Trasimene because he had neglected his religious duties. Cic. N. D. 2, 8.

CONDITIONAL CLAUSES take the conjunction *if*. They may be hypothetical clauses, or contain ordinary conditions, most generally referring to future events which must have happened before the principal action can take place. In this relation the perfect participle has the force of a FUTURE PERFECT, while in the hypothetical signification the perfect participle is employed with the force of a PLUPERFECT or IMPERFECT SUBJUNCTIVE (Ex. 5).

Hac oratione adducti inter se fidem dant, et regno occupato totius Gallie sese potiri posse sperant, induced by this address they pledged their word to each other, and hoped that they would be able to conquer the whole of Gaul if (after) they would have seized royal power. Cæs. B. G. 1, 3. — Si responderint se impunitate propositâ facturos quod expedit, facinorosos se fatentur, if they shall have answered that they would do what is expedient if *impenitently* should be (would have been secured to them), they acknowledge thereby that they had bad designs. Cic. Off. 3, 9.

If equivalent to CONCESSIVE CLAUSES, ablative absolutes are rendered by *although*, (Ex. 8) or *even if* (Ex. 7).

Tot millia latrocinantur morte propositâ, so many thousands practise robbery although death has been placed before them (is in store for them). Cic. N. D. 1, 86.

In connection with *nondum* or *vixdum* ablatives absolute are sometimes rendered by a temporal clause with '*before*', as

*Hieme nondum confectâ*, before winter was over (before the close of winter). Cæs. B. G. 6, 3.

Render the following sentences both by English absolute participles, and by finite clauses with the conjunctions required by the sense.

1. Ex decem captivis novem revertētur Carthaginem, re<sup>1</sup> a senātu non impetratâ. Cic. Off. 3, 23. — 2. Anaxagorâ<sup>2</sup> receptum est, neglectis die festo<sup>3</sup> custodiis urbis. Liv. 5, 13. — 3. Vos, dato<sup>4</sup> facillitâ<sup>5</sup>, vos consulite! Cæs. B. G. 7, 50. — 4. Cæsar hanc epistolam<sup>6</sup> Ciceroni conscripsit, litteris misit, ne interceptâ<sup>7</sup> epistolâ, nostra ab hostibus consilia cognoscere<sup>8</sup>nt. Cæs. B. G. 5, 18. — 5. Quam sollicitudo vexaret<sup>9</sup> impios subitâ<sup>10</sup>

<sup>1</sup> The object of their mission. — <sup>2</sup> soon. — <sup>3</sup> on a holy day. — <sup>4</sup> opportunity. — <sup>5</sup> written in. — <sup>6</sup> to intercept. — <sup>7</sup> cognoscere, to learn. — <sup>8</sup> anguish. — <sup>9</sup> torment. — <sup>10</sup> tollere, to remove.

suppliciorum<sup>1</sup> metu? Cic. Leg. 1, 14.— 6. *Concesso peccato*<sup>2</sup>, difficile est, ab eo qui peccati vindex<sup>3</sup> esse debet, ut ignoscat impetrare. Cic. Inv. 2, 34.— 7. Navis motum et cursum retinet suum, *intermisso*<sup>4</sup> impetu<sup>5</sup> pulsique<sup>6</sup> remorum<sup>7</sup>. Cic. Or. 1, 33.— 8. Romani, *superioribus locis occupatis*, praelium non commiserunt. Cæs. B. G. 1, 23.

*Rem. 225.* Instead of a clause prepositional expressions with participials in *ing* or other verbal nouns are frequently employed. The prepositions most generally used in rendering ablatives absolute with perfect participles are *after* (upon), *by*, *with*, *without* (in connection with a negative, see R. 236, obs.), *for* (on account of), and *under*, as:

Persuāsit eis ut oppidis vicisque exustis unā proficiscerentur, he persuaded them to join in the expedition *after burning* (having burned) their towns and hamlets. Cæs. B. G. 1, 5.—Nihil amittitur dato spatio, nothing is lost *by giving time*. Liv. 37, 36.—*Fide publicā interpositā*, upon pledging the public faith. Sall. Jug.—*Luminibus amissis*, after the loss of his eyes.—Thebani nonnihil et damnatis principibus et restitatis exsiliis encensēbant, the Thebans were somewhat angry *for* (on account of) the condemnation of their leaders and the reinstatement of the exiles. Liv. 42, 46.—*His exceptis*, with the exception of these. Cic. Off. 2, 3.—*Non expectato solis ortu* classe in Samum trajecerunt, *without expecting sunrise*, they crossed over to Samos. Liv. 37, 12.—*Nullam partem noctis itinere omisso*, *without interrupting their march* during any time of the night. Cæs. B. G. 1, 20.

*Obs.* Often the predicate-ablative itself has the force of a preposition, in the same manner as the participles *adductus*, *inductus*, *permotus* in the direct participial construction (R. 115). Thus a great number of idiomatic phrases are formed, as *diligentiā adhibita* with diligence or care (literally 'having employed diligence'), *interpositā morā*, after some delay (literally 'having placed a delay between'); *nullā interpositā morā*, without any delay. Cæs. B. C. 3, 75; *re bene gestā*, after a successful campaign (literally 'having carried out the thing successfully') Cic. Planc. 25, 61; *clamore sublato*, with shouts. Cæs. B. G. 6, 8; *clade acceptā*, by a defeat; *pecuniā acceptā*, for a consideration. Cic. Off. 3, 22. Here belongs Cæsar's favorite expression *intermisso (interjecto) tempore* or *spatio*, after some time (later). Other idiomatic expressions in the form of ablatives absolute with perfect participles have their origin either in technical usage, or in the peculiar brevity and conciseness by which this form invited the people to condense ideas through it, for which we must substitute different forms. To the former belongs the phrase *signis collatis pugnare*, to fight a pitched battle (for inst. Liv. 45, 1), *signa conferre* being used of the general attack, in which the standards (*signa*) of both armies met (*conferre*). To the latter kind belong for inst. the phrases *causā cognitā*, after a previous examination. Cæs. B. G. 1, 19; *equo admissio* or *citato*, at full gallop. Ib. 1, 22; *desperatā salute*, out of despair. Ib. 6, 5; *additā* or *adjectā aliquā re*, including a certain thing.

The ablatives absolute in the following sentences must be rendered by prepositional expressions.

1. Pompilius, equum nactus, *detractis insignibus*<sup>9</sup> imperatoris<sup>10</sup> decumānā<sup>11</sup> portā, se ex castris eiecit<sup>12</sup>, protinusque<sup>13</sup> equo citato Larissam contendit. Cæs. B. C. 3, 93.— 2. Quæ est tanta atrocitas<sup>14</sup> hujus causæ (case), quod omnibus forensibus<sup>15</sup> negotiis *intermissis*<sup>16</sup> unum hoc iudicium<sup>17</sup> exerceatur<sup>18</sup>. Cic. Cæl. 1, 1.— 3. Victor Tarentinus<sup>19</sup> in turbatam<sup>20</sup> duce amisso navem transgressus<sup>21</sup> est. Liv. 26, 39.— 4. Plus adipiscere re explicatā boni quam addubitātā<sup>22</sup> mali. Cic. Off. 1, 24.— 5. Pericles solis obscuratiōne<sup>23</sup> territos, *redditis*<sup>24</sup> ejus rei causis, metu liberavit. Qu. 1, 17.— 6. Quid est<sup>25</sup>, quum pauperes divitibus esse æquālis velimus, cur illos sumtu ad sacra<sup>26</sup> addito deorum aditu arceamus<sup>27</sup>? Cic. Leg. 2, 10.— 7. Consul, primā luce caduceatōre<sup>28</sup> datis<sup>29</sup> indutiis dimisso, frumentando<sup>30</sup> dies aliquot consumpsit. Liv. 31, 39.— 8. Prætor neutram impetratā re in provinciam redit. Liv. 42, 9.— 9. Alter prætor, consumptā æstate<sup>31</sup> recognoscendis<sup>32</sup> agris, ne visā quidem provinciam suā Romam rediit. Ib.—10. Legati, nullo in præ-

<sup>1</sup> Punishment.— <sup>2</sup> offence.— <sup>3</sup> avenger.— <sup>4</sup> to interrupt.— <sup>5</sup> force.— <sup>6</sup> moving power.— <sup>7</sup> oar.— <sup>8</sup> see § 482, R. 68.— <sup>9</sup> *insigne*, a badge.— <sup>10</sup> render by the adjective *imperatorial*.— <sup>11</sup> the decuman gate of the camp, the main entrance placed at the side farthest from the enemy.— <sup>12</sup> *se eiecit*, to rush out.— <sup>13</sup> *protinus*, forthwith.— <sup>14</sup> enormity. *Quæ tanta* is a peculiar combination of form-adjectives which cannot be literally rendered (literally: *What so great enormity*), transl. *What is there so enormous in etc.*— <sup>15</sup> judicial.— <sup>16</sup> to suspend; suspension.— <sup>17</sup> trial.— <sup>18</sup> to transact.— <sup>19</sup> Tarentian.— <sup>20</sup> to throw into confusion.— <sup>21</sup> *transgredi*, to step over.— <sup>22</sup> to doubt.— <sup>23</sup> eclipse.— <sup>24</sup> *causam reddere*, to explain a reason.— <sup>25</sup> *quid est cur*, what is the reason that.— <sup>26</sup> *sumtum ad sacra addere*, to tax religious worship.— <sup>27</sup> to keep from.— <sup>28</sup> a herald.— <sup>29</sup> to grant.— <sup>30</sup> to forage.— <sup>31</sup> summer.— <sup>32</sup> to examine.

*sentia responso dato*, eos se Chalcidem<sup>1</sup> sequi jussērunt. Liv. 42, 43.— 11. Spero te *diligentiā adhibita* firmiter fore. Cic. Fam. 16, 11.— 12. Panætium nos *correctiōne*<sup>2</sup> *quadam adhibita* potissimum secuti sumus. Cic. Off. 3, 2.— 13. L. Philippus tulit *sententiam*<sup>3</sup> ut civitates quas L. Sulla *pecuniā acceptā* liberavisset rursus essent vectigales<sup>4</sup>. Cic. Off. 3, 22.— 14. Amicitia haud scio an *exceptā sapientiā* quicquam melius sit homini a dis immortalibus datum. Cic. Am. 6, 20.— 15. Cæsar *triduo*<sup>5</sup> *intermisso* cum omnibus copiis Helvetios insequi<sup>6</sup> cepit. Cæs. B. G. 1, 26.

*Rem. 226.* When of two connected sentences the one has happened before the other, the English frequently ignores this fact, connecting the two sentences by a simple co-ordination. The Latin, in this instance, rarely employs the form of co-ordination, but gives to that predicate which is prior in time the form of a perfect participle. When both sentences have the same transitive objects, this participial construction is a direct one: else ablatives absolute are used, as 'SCIPIO TOOK THE CITY AND PLUNDERED IT', *Scipio urbem captam diripuit*.— 'SCIPIO TOOK THE CITY AND SOLD THE INHABITANTS AS SLAVES', *Scipio urbe captā civis sub corōnā vendidit*. Often a co-ordination is applied in addition to the participial construction, as: 'Scipio urbem cepit captamque diripuit'.

1. Legati venērunt Thessalorum ad Antiochum, orantes ut *remoto exercitu* per legatos secum disceptaret<sup>7</sup>. Liv. 36, 9.— 2. Cæsari in animo fuit (*Cæsar intended*), *conjuncto exercitu cum Domitio* per Illyricum<sup>8</sup> Italiæ subsidio<sup>9</sup> proficisci. Cæs. B. C. 3, 74.— 3. Triginta tyranni plurimorum civium *bona publicata*<sup>10</sup> inter se divisērunt. Nep. 8, 1.— 4. Manlius *Gallum* in conspectu duorum<sup>11</sup> exercituum *cæsum*<sup>12</sup>, torque<sup>13</sup> spoliavit. Liv. 6, 42.— 5. Romulus Cæninensium<sup>14</sup> exercitum *fudit*<sup>15</sup> fugatque, *fusum* persequitur. Liv. 1, 10.

§ 533. Ablatives absolute with PRESENT PARTICIPLES (both active and deponent) agree in respect to VOICE with their English equivalents, being always active in both languages. They are more rarely rendered by English absolute participial constructions than by FINITE CLAUSES and by verbal nouns with PREPOSITIONS.

*Rem. 227.* When ablatives absolute of this class are rendered by English absolute participial constructions, the participle is always active and present.\* When finite clauses are applied, their predicate is either in the present or past tense according to the tense of the principal predicate (R. 216, Obs. 1). The finite verb is very frequently in the progressive form in English.

*Rem. 228.* The CLAUSES by which ablatives absolute with present participles are rendered, are the same as those with perfect participles, except that the temporal clauses take the conjunctions *while* or *when*, which are most frequently applied in this construction. Next to 'while' and 'when', the conjunction 'since' is most frequently used, a purely conditional and concessive meaning being the rarest. Sometimes the present ablatives absolute may be rendered by modal clauses with 'so that'.

*Dumnorige licente*, nemo contra liceri audeat, while Dumnorix is bidding, nobody dares to bid against him. Cæs. B. G. 1, 18.— *Præeunte verba pontifice* id votum susceptum est, that vow was made, the pontiff repeating first the words, or 'while the pontiff was repeating the words'. Liv. 42, 28.— *Cedentibus neutris*, ex parte utraque primores ceciderunt, neither party retreating (since neither party retreated), the first in rank fell on each side. Liv. 42, 7.— *Animo sano ac valente*, oratio quoque robusta et virilis est, if the mind is sound and vigorous, language also is strong and manly. Sen. Ep. 114.— *Marius per omnis tribus tribūnus militum declaratus est*, *plerisque faciem ejus ignorantibus*, Marius was declared military tribune by all tribes, although most people did not know him by face. Sall. Jug. 63, 4.— In conspectu steterant, *dirimente anni*, they

<sup>1</sup> Nom. *Chalcis*.— <sup>2</sup> modification.— <sup>3</sup> *sententiam ferre*, to make a motion (in a debate).— <sup>4</sup> *rectigalem esse*, to pay taxes or tribute.— <sup>5</sup> *triduum*, a space of three days.— <sup>6</sup> to pursue.— <sup>7</sup> to transact, to settle the points in dispute.— <sup>8</sup> Illyria.— <sup>9</sup> abstract datives as accessory predicate; transl.: 'to carry help to Italy'.— <sup>10</sup> to confiscate.— <sup>11</sup> the two armies.— <sup>12</sup> *cedere*, to kill.— <sup>13</sup> *torques*, a neck-chain.— <sup>14</sup> the Cæninenses.— <sup>15</sup> to rout.

\* Sometimes, however, it is more idiomatic, to change even these constructions passively in English; and, vice versa, English present passive participles must be changed into Latin actives in order to be rendered by this form of ablatives absolute. But the instances where this happens cannot be reduced to a rule.

stood in sight (of each other), so that the stream separated them (the stream separating them). Liv. 42, 39.

Translate both by finite clauses and by absolute participial constructions, as far as the English idiom permits:

1. *Sallustio rigente*<sup>1</sup>, *amputatæ*<sup>2</sup> *sententiæ*<sup>3</sup> et *obscuræ*<sup>4</sup> *brevitas*<sup>5</sup> *finire*<sup>6</sup> pro<sup>7</sup> cultu. Sen. Ep. 114.— 2. *Nobis* rem publi<sup>8</sup> am *gerentibus*<sup>9</sup> nonne *toga*<sup>10</sup> arma *cesserunt*<sup>11</sup>? Cic. Off. 1, 22.— 3. Rex copias *admōvit*<sup>12</sup>, *plaustris*<sup>13</sup> cum aqua *sequentibus*. Liv. 42, 37.— 4. Minus *invaserat*<sup>14</sup> furor etiam eis qui boni habebantur, *me clamante* nihil esse bello civili miserius. Cic. Fam. 16, 12.— 5. Hicetas Syracusinus<sup>15</sup> dicit, quum terra circa axem se convertat eadem *effici*<sup>16</sup> quæ<sup>17</sup> si *stante*<sup>18</sup> *terrâ* celum *moveretur*. Cic. Acad. 2, 39.— 6. Ille vir utilitatem *sequi*<sup>19</sup> videbatur, sed ea nulla erat, *repugnante*<sup>20</sup> *honestate*<sup>21</sup>. Cic. Off. 3, 11.— 7. *Pompējo deprecante*<sup>22</sup> accepta lex non est. Cic. Off. 3, 30.— 8. *Ignorante*<sup>23</sup> *rege* uter esset Orestes, Pylades Orestem sese esse dixit. Cic. Am. 7, 24.— 9. Viri illi, *me defendente*<sup>24</sup>, capitis *iudiciis* sunt *liberati*<sup>25</sup>. Cic. Prov. Cons. 10, 24.— 10. Jam motus<sup>26</sup> esse ceperant, *discedentibus*<sup>27</sup> a societate<sup>28</sup> *Bætorum quibusdam populis*. Liv. 42, 43.— 11. Thebe in magno motu sunt, *aliis* ad regem *trahentibus* civitatem, *aliis* ad Romanos. Ib. 42, 44.— 12. Nihil potest evenire nisi<sup>29</sup> *causâ antecedente*<sup>30</sup>. Cic. Fato 34.

Rem. 229. In order to render ablatives absolute with present participles, prepositional expressions are far more frequently used than with ablatives absolute formed by perfect participles. The prepositions used are: *during*, *in*, *by*, *under*, *with*, *without* (with negations) *against* (with negations or with participles implying a negation), *although*, and sometimes *on*, *at*, *notwithstanding*. The participle is then rendered by a participial in *ing* or (more frequently) by an ordinary verbal substantive. The subject-ablative is generally turned into a possessive attribute, or into an objective case after *of*. If the subject-ablative is a pronoun or an equivalent demonstrative, an English possessive must be used, as: *Cicerōne suadente*, by Cicero's advice (by the advice of Cicero); *multibus scientibus*, with the knowledge of the soldiers; *eo illo imperante*, under his command; *me permittente*, with my permission; *quo progrediente*, in the course of which; *te dissuadente*, against thy advice; *multis minitantibus*, notwithstanding (in spite of) the threats of many. Here belong a great number of idiomatic phrases, as *ineunte ætate*, in early youth; *ineunte ætate*, in the beginning of summer; *me vidente*, within my sight; *illo audiente*, within his hearing; *repugnante naturâ*, contrary to nature; *anno vertente*, in the course of the year (Cic. N. D. 2, 20).

Defectio solis quæ *Astysge regnante* facta est, the solar eclipse which happened during the reign of Astyages. Cic. Div. 1, 49.— *Neminem nisi juvante deo* singularem virum fuisse credendum est, we must believe that no one has been a distinguished man without the help of God. Cic. N. D. 2, 66.

1. *Gerâmus dñs juvantibus* bellum. Liv. 42, 51.— 2. Athenienses, *Epimēvide suadente*, fecerunt *Contumelie* *lanium*<sup>31</sup> et *Impudentiæ*<sup>32</sup>. Cic. Leg. 2, 28.— 3. In bello nihil adversi<sup>33</sup> accidit, *non praedicente* *me*. Cic. Fam. 6, 6.— 4. Datur petenti<sup>34</sup> *venia dissuadente* primo *Vercingetorige*, postea *caesare*. Cæs. B. G. 7, 15.— 5. Hoc mihi *Pompējus multos audientibus* tribuit<sup>35</sup>. Cic. Off. 1, 22.— 6. *Perinde adolescentiâ* maxima est *imbecillitas*<sup>36</sup> *consilii*<sup>37</sup>. Cic. Off. 1, 32.— 7. In agenda<sup>38</sup> *pius* quam in scribendo opere ponimus, ut<sup>39</sup> *stante* *republicâ* facere solebamus. Cic. Off. 2, 1, 15.— 8. Natali expedit quod non decet, etiam<sup>40</sup> *id* *potes nullorefellente*<sup>41</sup> obtinere. Ib. 3, 19.— 9. Summa civis quos oderat ipse accendi jubebat, nullo *postulante*<sup>42</sup>. Cic. Lig. 4, 12.— 10. Pro se<sup>43</sup> quisque, *nec horlante*<sup>44</sup> *ullo*, *nec imperante*, ad munienda<sup>45</sup> castra versi sunt<sup>46</sup>. Liv. 9, 2.— 11. Erat in eo quidam fervor *ætatis*<sup>47</sup>, *qua progrediente* omnia sunt in dies<sup>48</sup> mitiora. Cic. Sen. 13, 45.— 12. *Ineunte vere* in vitibus<sup>49</sup> *gemma* quæ dicitur<sup>50</sup> sese ostendit. Ib. 15, 53.— 13. Qui fuit iste furor

<sup>1</sup> Vigere, to be in fashion.— <sup>2</sup> to cut short, to mutilate.— <sup>3</sup> sentence.— <sup>4</sup> obscure.— <sup>5</sup> brevity.— <sup>6</sup> esse pro, to be considered as.— <sup>7</sup> cultus, culture = elegant.— <sup>8</sup> rempublicam gerere, to be at the head of the republic.— <sup>9</sup> the toga, as emblem of civil power.— <sup>10</sup> to approach (actively).— <sup>11</sup> plaustrum, wagon.— <sup>12</sup> to seize.— <sup>13</sup> of Syracuse.— <sup>14</sup> to produce effects.— <sup>15</sup> which would be produced.— <sup>16</sup> stare, to stand still.— <sup>17</sup> to act on principles of expediency.— <sup>18</sup> repugnare, to be opposed to something, to be incompatible with something.— <sup>19</sup> morality.— <sup>20</sup> deprecari, to oppose, to protest.— <sup>21</sup> ignorare, not to know.— <sup>22</sup> defendere, to conduct the defence.— <sup>23</sup> literally: to be freed from the trials for their lives, i. e., to be acquitted of a capital crime.— <sup>24</sup> commotion, trouble.— <sup>25</sup> to secede.— <sup>26</sup> alliance with.— <sup>27</sup> except.— <sup>28</sup> to precede.— <sup>29</sup> a temple.— <sup>30</sup> impudens.— <sup>31</sup> reverse.— <sup>32</sup> the petitioners.— <sup>33</sup> to allow.— <sup>34</sup> infirmity, weakness.— <sup>35</sup> judgment.— <sup>36</sup> operam ponere in agenda, to apply one's self to practical life.— <sup>37</sup> the same as.— <sup>38</sup> even if.— <sup>39</sup> to find fault (supply: 'with it').— <sup>40</sup> Translate either by 'although' with a clause, or by 'without' with a participial.— <sup>41</sup> of his own accord.— <sup>42</sup> admonition.— <sup>43</sup> to fortify.— <sup>44</sup> parti ad aliquid, to apply one's self to something.— <sup>45</sup> a certain fervor (or ardor) of age, i. e., owing to his young years.— <sup>46</sup> from day to day.— <sup>47</sup> vines, a grape-vine.— <sup>48</sup> the so-called gem, or, what is called the gem, i. e., the bud in grape-vines).

ut cum Vettio colloqueretur<sup>1</sup>, *populo Româno vidente*<sup>2</sup>. Cic. Vat. 11, 26.— 14. Cælius non modo *permittente* *patre*, sed etiam *suadente* ab eo *semigravit*<sup>3</sup>. Cic. Cæl. 7, 18.— 15. Catulus suâ se manu *interfectum* fratrem suum *audiente* *senatû* dixit. Ib. 24, 60.— 16. Fortasse eis non probâro *causam*<sup>4</sup> qui meum inimicum *repugnante* *vestrâ auctoritatē* *texerunt*<sup>5</sup>. Cic. Prov. Cons. 20, 47.— 17. Municipia<sup>6</sup> illa iter mihi tutum *multis minitantibus* *præstitērunt*<sup>7</sup>. Cic. Planc. 41, 97.

§ 534. Predicate-ablatives in the form of perfect (passive) participles are used with the force of PRESENT PASSIVE PARTICIPLES when they may be resolved into the finite tenses of the PERIPHRASTIC conjugation of the participle (§ 506), as: *urbe replētâ militibus*, while the city was filled with soldiers.

Rem. 230. ABLATIVES ABSOLUTE with PERIPHRASTIC PARTICIPLES follow in their grammatical construction the rules for ablatives absolute with PERFECT participles; but in respect to the English equivalents, i. e. as to the tense, the conjunctions, and prepositions which must be used in rendering them, the rules for ablatives absolute with PRESENT participles must be observed. These periphrastic participles, like the finite tenses of the periphrastic conjugation, denote a past action as a STATE, or as continuing in its effects at the time spoken of, and in the same way as *miles vulneratus est* may mean 'the soldier is wounded', *militē vulnerato* may mean 'the soldier being wounded' or 'since the soldier is wounded (has wounds)'.

Est aliquid naturâ præclarum quod *spernā* et *contemnā* *voluptatē* optimus quisque *sequeretur*, there is something eminent in its nature which every good man should pursue *while spurning* and *despising* pleasure. Cic. Sen. 13, 43. [The acts of spurning and despising are represented as conditions and states, not as temporary acts; hence the periphrastic form is used. The Latin passive voice is changed into an English active construction, according to the rules for ablatives absolute with PERFECT participles (§ 531); but in the use of the conjunction (*while*) and in the TENSE (the present) the rules for ablatives abs. with PRESENT participles (§ 533) are observed.]—Si animus sanus est, ingenium quoque est sobrium, *illo vitiatō* hoc quoque adfiatur, if the former is corrupted, the latter also is tainted. Sen. Ep. 114.—Teutomātus rex, *vulnerato equo*, vix se e manibus prædantium militum eripuit, king Teutomatus, *his horse being wounded* (since his horse was wounded), disengaged himself with difficulty from the hands of the marauding soldiers. Cæs. B. G. 7, 46.

Obs. A number of idiomatic phrases take this form of the periphrastic ablative absolute several of those enumerated R. 225 among the ordinary perfect participles strictly belonging to this periphrastic form, as: *Hoc proposito* numquam eris dives, *on this condition* you will never be rich. Cic. Parad. 6, 1, 45. *Tantis periculis propositis*, when such dangers threaten. Cic. Planc. 36, 89. *Hoc sublato*, *hoc remoto*, by removing this, this being removed, excluded, or taken away, *without this*. *Adhibito discrimine*, strictly speaking.

1. Ex hoc debet intelligi, *talibus præmiis propositis*<sup>1</sup> numquam defutura bella civilia. Cic. Off. 2, 8.— 2. *Temeritatē*<sup>2</sup> *remotâ*<sup>3</sup> gratissima est libertas. Ib. 2, 18.— 3. Antiochus id bellum sine ullo impedimento se gesturum speravit, *occupatis Românis* in Macedonia bello. Liv. 42, 29.— 4. Inter medias hostium classts, *oppletis*<sup>4</sup> non solum *portibus*, sed etiam *litibus*, milites incolumes<sup>5</sup> transportati sunt. Cæs. B. C. 3, 73.— 5. Militibus, *impeditis*<sup>6</sup> *manibus*, simul et de navibus desiliendum<sup>7</sup>, et cum hostibus erat pugnandum. Cæs. B. G. 4, 24.— 6. Plura brevi tempore *eversâ*, quam multis annis *stante republicâ* scripsimus. Cic. Off. 3, 1.— 7. Quotusquisque reperitur qui, *impunitatē*<sup>8</sup> *propositâ*, ab-

<sup>1</sup> *Conspici*, to converse.— <sup>2</sup> move from, separate from.— <sup>3</sup> *causam probare* *alicui*, to convince somebody.— <sup>4</sup> *latus*, to shield.— <sup>5</sup> *municipium*, a community.— <sup>6</sup> *iter tutum præstare*, to guarantee a safe journey.— <sup>7</sup> to hold out.— <sup>8</sup> recklessness, license.— <sup>9</sup> *remotam esse*, to be wanting.— <sup>10</sup> *implere*, to crowd, to fill.— <sup>11</sup> safely.— <sup>12</sup> *impedire* *aliquem*, to engage somebody.— <sup>13</sup> *desilire*, to leap down.— <sup>14</sup> impunity.

stinēre<sup>1</sup> possit injuriā? Cic. Off. 3, 17.— 8. Jam ipse tecum, *nullā persōnā introductā*<sup>2</sup> loquor. Cic. Cael. 15, 35.— 9. Nuntii missi a Cicerōne, *obsessis omnibus viis*, interceptiuntur.<sup>3</sup> Cæs. B. G. 4, 40.

§ 535. When predicate-ablatives consist of NOUNS or ADJECTIVES, the ablative of the present participle of the copula *esse* must be supplied (§ 397). Such ablatives absolute are treated according to the rules of those with present participles. (§ 533), as:

Cæsar graviter accūsāt principes Æduōrum, quod *tam propinquis hostibus* ab eis non sublevētur, Cæsar seriously reproved the chiefs of the Ædui, because he was not relieved by them *while (although) the enemy was so near* (the enemy being so near). Cæs. B. G. 1, 16.

Obs. This class of ablatives absolute passes over into ordinary attributive phrases, consisting of a noun and an adjective in the ablative, which are generally interpreted by supplying a preposition (*cum* or *in*, see § 446, R. 56). Some of these expressions may be interpreted in both ways, as: Metellus *intento* atque *infesto exercitu* in Numidiam procedit (Sall. Jug. 46, 5), where some consider *intento* and *infesto* as predicate-ablatives (his army being full of zeal and ready to give battle), while others supply the preposition *cum* (with an army full of zeal and ready etc.). It is evident that in expressions like these both forms wholly coincide. See p. 259, obs. 3.

Rem. 231. All adjectives that may be used as predicate-nominatives may, with certain restrictions (see obs. 1), be employed as predicate-ablatives. Hence FORM-ADJECTIVES (see § 240) are not, generally, employed in this construction, except if they have the force of descriptive adjectives, as *tantus*, or, if their use as predicate-nominatives would be admissible, as *nullus*, *multus*, *talis*.

Quod populus Rōmānus *tantis vectigalibus*<sup>4</sup> jam vix potest, which (even) the Roman people can hardly afford now, *although its revenues are so great* (in spite of its large revenues). Cic. Par. 6, 45.— Summa erat, vasto atque aperto mari, magnis aestibus, raris ac prope *nullis portibus*, difficultas navigandi, there was the greatest difficulty of navigation, the sea being vast and open, the tides high, *harbors* being scarce and almost none. Cæs. B. G. 3, 13.

Obs. 1. Adjectives used in this connection are liable to obscure the meaning of the author, a twofold ellipsis being always involved in the construction, one in regard to the conjunction, and the other in regard to the copula, both of which must be supplied according to the requirements of the text. Hence this form is but sparingly applied with ordinary adjectives, being frequent only with certain adjectives which, from their habitual use as accessory predicates (§ 547, R. 2) are, as it were, impregnated with a participial meaning, as *integer*, *incolumis*, *salvus*, *invictus*, *inseius*, *consciis*, *præsens*, *absens*, *vivus*, or in set phrases which, by conventional usage, can have only this and no other meaning. Such phrases must be frequently rendered by prepositional expressions, or by circumlocutions, and, often, cannot be properly rendered at all, being based on specific Roman intuitions. To the latter belong the peculiar expressions *pinguis* (*crassa*) *Minervā*, *tenui* *Minervā*, which it requires a whole chapter in Roman mythology to explain. To the former belong the following phrases: *me conscio*, with my knowledge; *te ignāro* or *inseio*, without thy knowledge; *eo præseste*, in his presence; *nobis absentibus*, in our absence; *fratre vivo*, during the life-time of my (thy etc.) brother; *re integrā*, the state of affairs (or 'of the affair') being unchanged, or 'the matter being still untouched' (*res integra est* means 'there is nothing done, or changed in the matter'); *eo invito*, against his consent (he being unwilling); *invictā Minervā*, contrary to one's proclivities; *exercitu incolumi*, the army being uninjured (having suffered no loss); *salvā fide*, consistent with one's word or duties; *salvā republicā*, consistent

<sup>1</sup> To abstain.—<sup>2</sup> *persōnam* *introducere*, to assume a fictitious name. *Persōna* (from *per* and *sonāre*) is the mask which the Roman actors used on the stage; hence *persōnam agere*, to play (sustain) a part.—<sup>3</sup> to intercept.—<sup>4</sup> In a similar passage, Cæsar uses the preposition *in* with the ablative (if the reading is correct): Quod *in tanto imperio* populi Rōmāni turpissimum reipublicæ esse arbitrabatur, which he considered most disgraceful to the republic while the power of the Roman people was so great (considering the great power of the R. P.). Cæs. B. G. 1, 33.

with the safety of the republic; *salvis auspiciis*, by observing the auspices; *salvis legibus*, in accordance with the laws.

Obs. 2. Some ablative expressions with form-adjectives are wrongly considered as predicate-ablatives by the grammarians, for instance the phrase '*hoc senātus*' in the passage *Scipionem in senātum comitis nobis consulibus atque hoc senātu*? (Cic. L. Agr. 1, 1, 3). Here the demonstrative *hoc* is a subject-ablative, *hoc senātus* having the force of *his senatoribus* (these men being senators), which is evident from the opposition of the phrase to '*nobis consulibus*'. But if *hic* is used in the meaning of *talis*, it may be made a predicate-ablative: *Ea sunt tolerabilia hac juventute* (our young men being such). Cic. Att. 10, 11.

Rem. 232. Nouns are used as predicate-ablatives only when denoting PERSONS, either as doers of certain actions, or as holders of certain positions, as *testis*, *dux*, *consul*, etc. Such predicate-ablatives are either rendered by a CLAUSE with *when* or *while* (sometimes by *if* or *because*), or (more frequently) by prepositional expressions, in which case the Latin appellation of the person must be rendered by an abstract noun denoting ACTION or POSITION, instead of by a personal noun; as:

Cicerōne *prætorē*, while Cicero was prætor, or in the prætorship of Cicero; *duce Sempronio*, when Sempronius was leader, or under the command of Sempronius, under Sempronius; *imperatore Scipione*, under Scipio's chief-command; *eo deprecatore*, by his mediation; *me puero*, while I was a boy, or in my boyhood; *auctore Gabinio*, by the authority or instigation, or at the dictation of Gabinus; *teste Vatinius*, in the presence of Vatinius (he being a witness), or by the evidence of Vatinius.

With two co-ordinate subject-ablatives, the predicative-ablative, if a noun, is always placed in the plural, as *Cicerōne et Antonio consulibus*, in the consulship of Cicero and Antonius.

Obs. 1. The expression '*consulibus*' with two persons as subject-ablatives has a peculiar reference to the method of Roman chronology. The Romans did not use figures to designate the years as dates of their own history, except to lay a stress upon the number of years elapsed since the building of Rome. The years as mere chronological dates were indicated by the names of their consuls, in the form of ABLATIVES ABSOLUTE. These names were known to the people from the consular lists kept by the Pontifex Maximus (*fasti consulares* or *Capitolini*).

Rem. 233. Rarely adjectives are used IMPERSONALLY as predicate-ablatives, so that a subject-infinitive or a subject-clause performs the office of subject-ablative, as: *Conspicte sunt due quinquaginta, haud cuiquam dubio quin hostium essent* (it being doubtful to nobody that they belonged to the enemy). Liv. 28, 17.—Multi adnantes navibus, *incerto præ tenebris quid peterent*, federe perierunt, (it being uncertain towards what they were moving, i. e., the objects of which they might take hold, being invisible). Nouns as predicate-ablatives, on account of their personal nature, cannot assume an impersonal form. Such expressions as *comitiis ludis* (at the time of the election, at the time of the games), which the grammarians consider as impersonal predicate-ablatives are mere ablatives of time (§ 453). Resolved into finite predicative phrases, they would be the SUBJECTS (*ludi sunt*, the games are taking place), and not the predicate-nouns of the phrases.

1. Possum nominare<sup>1</sup> rusticos<sup>2</sup> Rōmānos, vicinos meos, *quibus absentibus* numquam fere ulla in agro<sup>3</sup> majora opera fiunt. Cic. Sen. 7, 24.— 2. Vix in ipsis tectis<sup>4</sup> et oppidis frigus infirmū<sup>5</sup> valetudine vitatur, nedum<sup>6</sup> in mari. Cic. Fam. 16, 8.— 3. Nihil te ad me scripsisse demoror<sup>7</sup>, præsertim tam novis<sup>8</sup> rebus. Cic. Fam. 7, 18.— 4. Jugurtha Boccho pollicitus est Numidiæ partem tertiam, si *integrīs suis finibus* bellum compositum<sup>9</sup> foret. Sall. Jug. 97, 2.— 5. Popillius non audēbat Rōmam reverti ne (lest) causam diceret<sup>11</sup> *adverso senātu*, *infestiorē populo*. Liv. 42, 22.— 6. His rebus perfectum est ut, *altissimis fluminibus* atque *impeditissimis*<sup>12</sup> itineribus nullum Cæsar acciperet<sup>14</sup> incommodum. Cæs. B. G. 3, 77.— 7. Philippus tum *te quibeto* totam molem<sup>16</sup> sustinēbat belli. Liv. 36, 7.— 8. Non tu, *vivo consule tuo*, castra intrabis. Liv. 10, 36.— 9. Relinquebatur una per Sequanos via, qua<sup>17</sup> Helvetii, *Sequanis invitis*, propter angustias<sup>18</sup> ire<sup>19</sup> non poterant. Cæs. B. G. 1, 9.— 10. Cæsar exercitum et provinciam

<sup>1</sup> To name.—<sup>2</sup> Roman farmers. (literally: rustic Romans.)—<sup>3</sup> *opera in agro*, field-work.—<sup>4</sup> under the very roofs of houses.—<sup>5</sup> weak.—<sup>6</sup> much less.—<sup>7</sup> I am astonished.—<sup>8</sup> Transl. by the noun *news*.—<sup>9</sup> without a reduction of his territory.—<sup>10</sup> to settle.—<sup>11</sup> *causam dicere*, to have one's trial, to be tried.—<sup>12</sup> opposed, inimical (to him).—<sup>13</sup> exceedingly difficult to pass.—<sup>14</sup> to suffer.—<sup>15</sup> brunt.—<sup>16</sup> by the conjunction *as long as*.—<sup>17</sup> where.—<sup>18</sup> on account of its narrowness.—<sup>19</sup> to march.

*invento sententia tenet.* Cic. Fam. 16, 11.— 11. Cæsar Divitiacum commonefacit<sup>1</sup>, quæ *ipso* *presente* in concilio Gallorum de fratre ejus sint dicta. Cæs. B. G. 1, 19.— 12. Cæsar omnibus<sup>2</sup> *insecis* neque<sup>3</sup> *suspiciantibus*, vigiliâ<sup>4</sup> *tertiâ* jubet omnes legiones ex castris educi. Hirt. B. Afr. 37.— 13. Rannius dixit insidias illas *plurimis consensu* comparari<sup>5</sup>. Liv. 42, 17.— 14. Hoc videmus esse consecuti ut ne quis agere cum populo<sup>6</sup> aut *salvis auspiciis* aut *salvis legibus* aut denique sine vi<sup>7</sup> possit. Cic. Fam. 1, 2.— 15. Utrumvis *salvo officio* se facere posse arbitrantur. Cic. Rosc. Am. 1.— 16. Ea dicam, vobis audientibus, amisso jam tempore, quæ ipsi soli, *re integrâ*, sæpe dixi. Cic. Mur. 21.— 17. Duilius delectabatur crebro funali et tibicine<sup>8</sup>, quæ sibi *nullo exemplo* privatus<sup>9</sup> sumpserat<sup>10</sup>. Cic. Sen. 13, 44.

18. Fabius Maximus *Cepione et Philippo* iterum<sup>11</sup> *consulibus* mortuus est. Cic. Sen. 5, 14.— 19. Hæc conditio fuit *iso prætoris* aratorum<sup>12</sup>. Cic. Verr. 2, 3, 29.— 20. Quod *deum teste* promiseris, id tenendum est. Cic. Off. 3, 29.— 21. Brutus colligam sibi creavit Valerium, *quo adiutore*<sup>13</sup> reges ejecerat. Liv. 2, 2.— 22. Dicit ille, omnem illam tempestatem<sup>14</sup> *Cæsare impulsore*<sup>15</sup> atque *adiutore* esse excitatam. Cic. Prov. Cons. 8, 18.— 23. Helvetii legatos ad Dumnorigem mittunt, ut *eo deprecatore* a Sequanis iter (*the permission of marching*) impetrarent. Cæs. B. G. 1, 9.— 24. Rhodii non favere<sup>16</sup> tantum sed adjuvare etiam bellum poterant, quadraginta navibus *auctore Ilegædocho* preparatis. Liv. 42, 45.— 25. Quid est turpius quam *auctore hoste* de summis<sup>17</sup> rebus capere consilium? Cæs. B. G. 5, 28.— 26. Voces sunt contumeliosæ<sup>18</sup> ab irato accusatore<sup>19</sup> *nullo auctore* emisse<sup>20</sup>. Cic. Ciel. 13, 30.— 27. Regulus in Africa captus est *duce Xanthippo*, imperatore autem patre Hannibalis *Hamilcare*. Cic. Off. 3, 26.— 28. Cæsar rex legiones ex Hispania et magna auxilia *Afranto et Petræo* ducibus habet a tergo<sup>21</sup>. Cic. Fam. 16, 12, 4.— 29. Mihi quidem, *pueris nobis*, M. Scaurus C. Mario cedere<sup>22</sup> non videbatur. Cic. Off. 1, 22.

§ 536. IMPERSONAL ABLATIVES ABSOLUTE consist of a mere predicate-ablative in the neuter singular of a perfect passive participle formed from an impersonal passive verb, as *debellato*, after the war had been finished; *explorato*, after an exploration had been made. This construction is of very rare occurrence.

Rem. 234. Impersonal ablatives absolute are of two kinds:

1. They are formed from impersonal passives of neuter verbs, the doers of the action being uncertain persons, and the verbs having the force of transitive objective phrases, for which, on account of their frequent occurrence in daily life, usage had substituted single verbs. Thus occur e.g. the predicate-ablatives *auspicato*, *augurato*, *litato* (inst. of *auspicis*, *auguris*, *sacriticis rite perfectis*), and *debellato* (inst. of *bello finito*). These have both the nature and form of adverbs (in o), most of which (see § 69) are evidently nothing but predicate-ablatives of impersonal passives, as *secreto* (from *secernere*), *cito* (from *ciere*), *falso* (from *fallere*), *necopinato* (from the ancient *opinare*), *tuto* (from *tueri*), *subito* (from *subire*). Thus occur *optato* (according to one's wishes), *consulto* (deliberately), *testato* (leaving a will); *sortito* (by lot. Cic. Verr. 2, 2, 51); *satisdato*, in '*aliquid satisdato debere*', to owe something on security (often in the jurists, also Cic. Att. 16, 6, 3; Ib. 16, 15, 2). Several of these expressions are compounds of impersonal ablatives, as: *intestato* (without leaving a will), *inconsulto* (unadvisedly; rare, instead of the classical *inconsulte*), *bipartito* and *tripartito* (in two, three divisions; the simple *partito* not occurring in classical language). All these expressions must be considered as conventional formulas, which cannot, by analogy, be extended and applied to other impersonal passives. Thus such participles as '*pugnato*', '*concurso*' (= *quum pugnatum* etc. *esset*) do not occur. But some writers (Livy, Tacitus, etc.) have occasionally coined solitary expressions of this kind.

<sup>1</sup> Repeats to.—<sup>2</sup> any one's.—<sup>3</sup> or.—<sup>4</sup> night-watch.—<sup>5</sup> to prepare.—<sup>6</sup> to address the people.—<sup>7</sup> violence.—<sup>8</sup> *crebro funali et tibicine*, literally: by a frequent torch and a flute-player; i. e. frequent illumination (of his house) with music.—<sup>9</sup> as a private person.—<sup>10</sup> to assume.—<sup>11</sup> for the second time.—<sup>12</sup> *arator*, a farmer.—<sup>13</sup> literally *helper*.—<sup>14</sup> storm.—<sup>15</sup> literally a *mover*, *abettor*.—<sup>16</sup> *favere* (supply *bello*), to give countenance to; *adiuvare bellum* to give assistance in the war.—<sup>17</sup> most important.—<sup>18</sup> abusive.—<sup>19</sup> accuser.—<sup>20</sup> *emittere*, to utter.—<sup>21</sup> § 445, R. 55.—<sup>22</sup> to be inferior, or second to.

\* Some grammarians quote a passage of Cicero (cui, *errato*, nulla venia, *recte facto* exigua laus proponitur, Leg. Agr. 2, 2), to prove that he uses *errato* and *recte facto* as impersonal predicate-ablatives. This reading would be far less defensible than even the alleged examples of Livy, since the doer of the impersonal action would be the logical subject of the sentence. It has long been corrected, being only supported by one single manuscript, the majority of the manuscripts reading *cujus* instead of *cui*, which makes *errato*

which, however, failed to be received into general use, as: *explorato* (after examination, Liv. 23, 42; see Ex. 3); *nondum palam facto* (the affair not having been made public yet, Liv. 32, 55).—*Summoto incesserunt*, they entered after room had been made (by the lictor). Ib. 28, 27 (*summovetur alicui*, a lictor clears the passage for a magistrate).

2. The second kind of impersonal predicate-ablatives corresponds to those impersonal passive predicates which have CLAUSES as subjects (interrogative, or That-clauses, see Book VI.). This form is extremely rare in classical prose, occurring only twice in Cicero: *Adjuncto vero ut eidem etiam prudentes haberentur*, nihil erat quod homines non posse consequi se arbitrantur (= '*postquam accessit ut*', after it was added that, i. e. 'after, in addition to this'). Cic. Off. 2, 12.—*Perfecto enim et concluso*, neque virtutibus, neque amicitia locum esse, si ad voluptatem omnia referantur, nihil præterea est dicendum (= '*Postquam perfectum est*' etc.; after establishing the principle that etc.). Ib. Fin. 2, 27. In Cic. Inv. 2, 10, 30 (hoc loco præterito, et *cur præteratur demonstrato*), '*demonstrato*' may be taken as an ordinary *personal* passive predicate-ablative (per ecthesis=hoc loco demonstrato cur præteratur; see p. 396, d). A few times this construction also occurs in Livy, who uses it as virtually equivalent to an *active* perfect participle, a usage which cannot be considered as generally adopted: Consul ad Pluinnam est progressus, *nondum comperto quam regionem hostis petisset*; 'it having not yet been ascertained (by him)' what route the enemy had taken. Liv. 31, 39. See Ex. 4, 6. In Cæs. B. G. 7, 52 (*exposito quid iniquitas loci posset*) the reading is doubtful, '*exposuit*' being probably the correct reading. In the writers of the silver age this construction occurs oftener.—Here belong also the predicate-ablatives formed from impersonal *predicate-adjectives* with clauses as subjects, as: *Haud cuiquam dubio* (= *quum haud dubium esset*), *quin hostium essent trirēnes*. Liv. 28, 17. See p. 185, R. 233.

1. Præfectus regius, prope jam ut *debellato*, Masinissam persecutus est. Liv. 29, 32.— 2. Scipio, velut jam *debellato*, quod ad Carthaginiensē attineret<sup>1</sup>, Uticæ oppugnandæ intentus erat. Ib. 30, 8.— 3. Amplius profectus est, neque *explorato* circa<sup>2</sup>, nec stationibus<sup>3</sup> satis firmis positus. Ib. 31, 2.— 4. Consul *explorato* antea utrum Leucadem<sup>4</sup> an sinum<sup>5</sup> Ambracium onerariæ<sup>6</sup> tenuissent, in vicem<sup>7</sup> cohortis<sup>8</sup> frumentatum<sup>9</sup> Ambraciam misit. Ib. 32, 15.— 5. Quinctius, *nondum comperto* quam in regionem venisset, milites per agros dimissos (R. 225) vallum cadere<sup>10</sup> jubet. Ib. 33, 5.— 6. Consul *edicto*<sup>11</sup> ut quicumque<sup>12</sup> ad vallum tenderet<sup>13</sup> pro hoste haberetur, obstitit<sup>14</sup> tendentibus suis in castra. Ib. 10, 36.

## F. REVERSED PHRASES AND GERUNDS GOVERNED BY PREPOSITIONS.

### 1, Prepositional Gerundials.

§ 537. Both reversed phrases and gerunds may be connected by means of PREPOSITIONS with their governing words, so as to form either prepositional objects or prepositional attributes. But only a few prepositions can thus be used with the accusative or ablative of GERUNDIALS. The most frequent prepositional connections with gerundials are those by *ad*, *in* (both with the accusative and ablative), *ab*, *de*, and (in certain connections) *ob*. Rarely are used *inter*, *ex*, and *pro*.

to and *recte facto* the datives of substantives. Still the old exploded reading is reiterated in so recent a publication as the 'English Public School Latin Grammar' whose author copies from Ruddiman the assertion that '*errato*' stands for '*si erratum erit a me*', and '*recte facto*' for '*si recte factum erit a me*'. p. 310.

<sup>1</sup> *Quod ad Carthaginiensē attineret*, as far as the Carthaginians were concerned.—<sup>2</sup> *circa*, round about, i. e., in the environs.—<sup>3</sup> *stationes ponere*, to establish stations or posts.—<sup>4</sup> *nox*, *Leucas*.—<sup>5</sup> gulf of Ambracia.—<sup>6</sup> the freight-ships.—<sup>7</sup> in turn.—<sup>8</sup> cohorts.—<sup>9</sup> *frumentari*, to forage.—<sup>10</sup> to cut the material for the rampart.—<sup>11</sup> to proclaim.—<sup>12</sup> whoever.—<sup>13</sup> to press.—<sup>14</sup> to oppose.

*Rem. 235.* Prepositional gerundials take either the form of a gerundive phrase, or that of a gerund absolute, according to the general rules on reversed phrases (§§ 517. 518); but they cannot take the form of a gerund with a transitive object:

*Ad conditiones faciendas*, to make conditions (not *ad faciendum conditiones*); *in libris legendis*, in reading books (not *in legendo libros*).<sup>\*</sup>

*Rem. 236.* Many prepositions are, by their MEANING, excluded from governing gerundials, as *ante*, *prae*, *super*, *lenus*, *sub*, *coram*; but others seem to be excluded from connecting gerundial objects by a mere caprice of the language. Hence many English prepositional expressions with the participial in *ing* cannot be rendered by Latin prepositions with gerundials. Some of these expressions may be rendered by participial reversed phrases; but many cannot even be rendered by these. Thus 'before the building of Rome' may be expressed by *ante Romam conditam*, but not by *ante Romam condendam*.† 'By or through suffering hardships' cannot be expressed by any reversed phrase with a preposition (not *per labores tolerandos*, nor *per labores toleratos*), but by an ablative gerundial or participle (*laboribus tolerandis* or *toleratis*). 'On account of' with a participial is never translated by *propter* with a gerundial, and only in certain connections by *ob*, but most generally by *causā* or *gratiā* with the genitive of a gerundial. 'Without with a participial' may be rendered by *sine* with a verbal noun (as *sine dubitatione*), but never with a gerundial or a participial phrase (not *sine dubitando*, nor *sine diligentia adhibita*, without applying diligence, but *nullā diligentia adhibita*).‡

*Obs.* In order to render the English 'without' with a participial, various combinations are at the disposition of the Latin language:

1. The NEGATION *non* (ne, ne-quidem), or negative form-adjectives (§ 408), or negative conjunctions (*neque*, *neve*, *nisi*), which are combined either with participles or gerundials in one of the following ways:

(a) With PARTICIPLES in the form of accessory predicates, as: *Dicam hoc non reverens assentandi suspicionem*, I shall maintain this without being afraid of the suspicion of flattery. *Cic. Or. 3, 122.*—*Romani non rogati* auxilium offerunt, the Romans offer their help without being asked for it. *Liv. 34, 23.*—*nosse liberalitate uti, non spoliantem se patrimonio*, pecuniae est fructus maximus, to be enabled to be liberal without depriving one's self of one's property, is the greatest blessing of money. *Cic. Off. 2, 18.*

(b) With participles in the form of PREDICATE-ABLATIVES, as *nullo recusante* regnum obtinere, to obtain the throne without any one objecting to it. *Nep. Tim. 3.* *Non expectato solis ortu* trajicere, to cross without expecting the rise of the sun. *Liv. 37, 12.* *Nec auspicio, nec litato* instruunt aciem, they draw up the line of battle without performing either auspices or sacrifices. *Liv. 5, 38.* See R. 225. 229.

(c) With the ablative of gerundials, as *nullis libris scribendis*, without writing any books; *Scipio annum integrum nihil gerundo in Hispania consumpsit*, Scipio spent a whole year in Spain without doing anything. *Liv. 37, 7.* See R. 214.

2. The NEGATIVE PREFIX *in-*, applied to participles, adjectives, or to verbal nouns.

(a) The participles with this prefix occur either in the form of accessory predicates, as *insciens hoc feci*, I have done this without knowing it; *invocatus adest*, he is present without being invited; *inauditum aliquem condemnare*, to condemn one without hearing him. *Just. 22, 3*; or in the form of ablatives absolute, as: *re infecta*, or *infecto negotio*, without accomplishing one's purpose. *Sall. Jug. 58, 7*; *indicta causā* aliquem condemn-

\* Formerly the editions of the classics presented a number of prepositional constructions with gerunds and transitive objects. These have been almost all corrected, being based on inferior readings of some codices. There are, now, only three passages left in which such constructions occur, 1) *Liv. 30, 13*: *in alloquendo victorem*; 2) *Liv. 28, 44*: *non ad defendendum modo Italiam*; 3) *Cic. Tusc. 3, 9*: *Verbū hoc (i. e., invidere) ductum est a nimis intendo fortunam alterius*. In this passage a gerundive construction could not be used at all; because *intuenda fortuna* would have implied that *invidere* was derived from the phrase 'intuenda fortuna', while Cicero meant to say that it was identical with *intueri* alone. Hence in this passage the gerund with a transitive object is a legitimate exception, which however cannot be extended beyond this rare connection.

† We read, indeed, in *Liv. Pref.* 'quae ante conditam condendamque urbem traduntur', 'what is reported of the time before the city was built or projected'. But in this passage *ante conditam urbem* has not the meaning 'before the building of the city', but pregnantly, by a bold antithesis to *ante conditam*, denotes a time in which the building of Rome was not even thought of. Only the antithesis makes this construction tolerable. Poetically *ante domandum* (inst. of *antequam domiti erunt*) occurs in *Virg. Georg. 3, 206*.

‡ *Cum* with an ablative gerund, and *circa* with an accusative gerund are, each once, found in Quintilian; *Cum loquendo juncta* (inst. of *cum usu loquendi juncta*) 1, 5; *circa movendum* valet (inst. of *ad movendum valet*). 4, 5, 6.

nare, to condemn one without hearing his defence, *Cic. Rab. 4*; *causā incognitā*, without having examined the case, *Cic. N. D. 2, 73*; *inscientibus ipis*, without their knowledge (their knowing it); *inauspiciato*, without (using) auspices; *inaugurato*, without (performing) auguries; *inexplorato*, without examining.

(b) The adjective-, with the prefix *in-*, if corresponding to 'without' with a participial, have the force of PARTICIPLES, as *me ignaro et inscio*, without my having any idea of it, *Cic. Planc. 16*: *inscios inopinantesque Menapios oppresserunt*, they surprised the Menapii without their being aware of it, *Caes. B. G. 4, 4*; *exercitu incruento* (*Sall. Jug. 97*) or *incruento praetio* (*Liv. 2, 56*), without shedding any blood.

(c) Verbal nouns with the prefix *in-*, corresponding to 'without' and a participial are placed in the ablative, as *inconsultu meo*, without consulting me; *injussu*, without having received an order, *Liv. 3, 63*; 4, 32 (*injussu suo, injussu imperatoris*, without his command, without the order of the chief-commander, *Caes. B. G. 1, 9*; *Cic. Sen. 20*).

3. FINITE SENTENCES, either co-ordinated by negative conjunctions (*neque*), or subordinated by *ut non* (so as not to), or by *quin* after negative predicates, as: *Panætius de hac re deinceps se scripsit dictum, nec exsolvit id quod promiserat*, *Panætius* wrote he would speak of this subject at the proper place, without, however, performing what he had promised. *Cic. Off. 3, 2.*—*Qui intra praesidia Pompeji fuissent, neque operam in re militari praestitissent*, who had been within the lines of Pompey, without lending their help in the operations of the army. *Caes. B. C. 3, 83.*—*Qui virtuti non studet, malet existimari bonus vir, ut non sit, quam esse, ut non putetur*, who is indifferent to virtue, would rather be taken for a good man, without being one, than be a good man without being considered so. *Cic. Fin. 2, 71.*—*In castello nemo fuit omnino militum quin vulneraretur*, in the fort there was not one soldier without being wounded. *Caes. B. C. 3, 53.*

4. Sometimes the construction of the sentence is recast by making the phrase with 'without' a principal predicate, in combination with a negative, transforming the English principal verb into an object, as: *Nulla profecto alia gens tantā mole cladis non obruta esset*, no other people, indeed, could have met with so overwhelming a disaster without being annihilated. *Liv. 22, 54.* (literally: no other people would have been not annihilated by such a load of disaster).

5. Sometimes a Latin VERBAL NOUN after *sine* may be employed to render the English 'without' with a participial, as: *Caesar hortatur Divitiacum ut sine ejus offensione animi de eo statuat*, *Caesar* admonishes *Divitiacus* to decide about him without feeling offended by it. *Caes. B. G. 1, 19.*

§ 538. The preposition *ad* with the accusative of a gerund or gerundive phrase denotes the AIM, or the PURPOSE of an action (§ 427, 2), and is dependent either as object on verbs, verbal phrases and adjectives, or (rarely) as attribute on verbal nouns, being generally translated by *to* or *for* with a participial in *ing*, or by an object-infinitive (with or without 'in order').

*Hieronymus legatos Carthaginem misit ad fœdus cum Hannibale faciendum*, *Hieronymus* sent ambassadors to Carthage (in order) to make a treaty with Hannibal. *Liv. 24, 6.*—*Ut impellerent hostis ad dedendam urbem*, that they might impel the enemy to surrender the city. *Liv. 25, 24.*—*Ad rebellandum* neque viris neque duces habebant, for revolting (to revolt) they had neither strength nor leaders. *Liv. 33, 29.*—*Silanus propraetor adiutor ad res gerendas datus est*, the propraetor *Silanus* was appointed an aid to administer the affairs (as an aid in his administration). *Liv. 26, 19.*—*Non tam idoneus ad celandam rem videbatur quam ad agendam erat*, he seemed not so much adapted to concealing a thing, as he was adapted to doing it. *Liv. 33, 28.*

*Rem. 237.* The GERUNDIAL DATIVE is to the PREPOSITIONAL GERUNDIAL after *ad*, in the relation of the exception to the rule; both being employed as objects of aim and purpose. The following are the chief differences of these constructions:

1. The gerundial dative is almost exclusively restricted to gerundive phrases, while the prepositional gerundial may assume the form of a gerund absolute (for verbs without transitive objects) or that of a gerundive phrase. We may say either *diem comitiis habendis dicere*, or *diem ad comitia habenda dicere*, but we cannot say *diem conveniendo dicere*, the form *diem ad conveniendum dicere* being the only correct one.

2. The gerundial dative alone is applicable if the principal verb is one which governs the dative of a substantive (R. 209). If the verb may be construed either with a dative or with *ad*, the two constructions have a different MEANING. Thus *desse alicui rei faciendae* means to be remiss in something (R. 209), while *desse ad rem faciendam* means

'to be wanting', as *Vires desunt ad expugnandam urbem* (not *expugnandæ urbī*), the means are wanting to capture the city.—*Adesse* (scribendo) means to be present at an act; *adesse ad aliquam rem faciendam* (Liv. 2, 19) means to be present for a future act.

3. If the gerundial is an ADVERBIAL object of purpose, the dative form is restricted to phrases containing a NOUN to which the purpose primarily refers (R. 211); but the prepositional gerundial may be applied whether it refers to such a noun or not. Hence it is very frequently connected with verbs denoting a motion in space, where the gerundial dative is excluded; as *Mittere legatos ad pacem faciendam*, but not *paci faciendæ*; *ire ad urbem oppugnandam*, not *urbi oppugnandæ*. On the other side the gerundial dative is the normal form to indicate the special purpose of offices, and with the word *comitia*. See R. 211, Obs. 2 (c).

4. When ADJECTIVES govern a gerundial, the prepositional form is far more usual than the gerundial dative (R. 210).

*Rem. 238.* The difference of the PARTICIPIAL gerundive (R. 177) from the prepositional gerundial (both expressing purpose), is determined by the relation of the gerundial to the transitive object, or to the passive subject of the principal predicate. The participial gerundive can only be employed 1) if the gerundial is a transitive verb, and 2) if its transitive object is the same with the transitive object or passive subject of the principal predicate. Hence a prepositional gerundial, not a participial gerundive, is used 1) if it is a neuter or intransitive verb; 2) if it is a transitive verb, but if its transitive object is not identical with the transitive object or the passive subject of the principal predicate, as (a) *Legionem unam in agros ad frumentandum mittit*; (b) *Legatos Athenas ad pacem faciendam mittit*. In neither of these two examples a PARTICIPIAL gerundive would be admissible. But even in such instances where a participial gerundive is correct, it may generally be replaced by a prepositional gerund after *ad*. In this case the transitive object, or the passive subject of the principal predicate loses its gerundive attribute which becomes an adverbial object in the form of a prepositional gerund after *ad*. The transitive object of this gerund must be always UNDERSTOOD, being conceived as a personal pronoun referring to the object or subject of the principal predicate. Thus the following sentence with a participial gerundive '*Instrumenta Athenas reficienda mittit*' might be changed into a sentence with a prepositional gerund '*Instrumenta Athenas ad reficiendum* (i.e. *ea*) mittit', both being rendered in the same way (he sends the instruments to Athens for repair (to be repaired)). It is, however, more usual to apply in such cases participial gerundives (see R. 180), and prepositional gerunds can never be employed when the whole gerundive phrase must be considered as a transitive object of the principal predicate (R. 193). Thus we can never say *pontem ad faciendum curavit*, or *opus ad faciendum locavit* inst. of *pontem faciendum curavit*, *opus faciendum locavit*.

*Rem. 239.* The verbs and verbal phrases with which prepositional gerundials after *ad* may be connected, are

1) Verbs in which the idea of a purpose or aim is contained, so that the gerundial only specifies the idea already implied in the verb; as

*destināre*, to destine, to allot, Liv. 5, 24; *se accommodāre*, to make one's self fit, Ex. 4; *incumbere* and *accedere*, to apply one's self, Cic. Sull. 29; Leg. 2, 18; *se transferre*, to devote one's self, Cic. Mur. 22, 46; *adhibere*, to apply, Liv. 21, 54; *inclinare*, to incline, Liv. 26, 38; *animum convertere*, or *advertere*, to direct one's attention, Liv. 26, 40; 24, 18; *niti* and *adniti*, to strive, Cæs. B. G. 7, 63; Liv. 27, 14; *excitare*, to excite, Ex. 6; *impellere*, to impel, Cic. Leg. 2, 4; *acere*, to stimulate, Liv. 27, 37; *accendere*, to inflame, Ib. 24, 35; *adducere*, to induce, Cic. Mur. 37, 78; *solicitare*, to solicit, Liv. 25, 15; *vocare*, to call, Ib.; *adhortari*, to exhort, Cic. Rab. 1, 1; *elicere*, to instigate, Liv. 25, 15; *invitare*, to invite, Cæs. B. C. 3, 76; *sufficere* and *suppelere*, to be sufficient, Ex. 5; Cic. Off. 1, 19; *pertinere*, to belong, Cic. Off. 1, 6;

and other verbs of similar import. The prepositional gerunds dependent on these verbs must be considered as COMPLETING OBJECTS, since the verbal idea would be incomplete without them. These gerundials are mostly rendered by English object-infinitives, which, in this connection, are neither equivalents of the Latin object-infinitive, nor of English phrases with 'in order to'.

2) Verbs of all kinds, not containing the idea of purpose, to which the gerundial after *ad* is added as an ADVERBIAL object of purpose. Such gerundials are equivalent to a finite clause with *ut*, and are rendered either by 'in order to', or by an object-infinitive equivalent to it, or by

for' with a participial. Here belong all verbs of motion (*ire, venire, proficisci, ducere, mittere*, etc.), and every transitive or neuter verb which may be conceived as an action for a purpose, as:

*Ad reliquas navis reficiendas ære utebatur*, for repairing, (in order to repair) the other ships, he employed brass. Cæs. B. G. 4, 31.—*Brutti multi interfecti a militibus sunt ad extinguendam proditiōis famam*, many Bruttians were killed by the soldiers (in order) to smother the tale of their treachery. Liv. 27, 16.

3) Verbal phrases, either predicative or objective, in which not the verb, but the NOUN is qualified or determined by an idea of aim or purpose, as

*Tempus dare* or *petere ad aliquam rem faciendam*, to give or ask time for doing something. Liv. 27, 24, 40; *diem dicere*, Liv. 22, 11; *signum dare*, Ib. 45, 34; *viam quærere*, Liv. 3, 55, 6; *vires desunt* or *desiunt ad aliquid faciendum*, strength is wanted to do something, Liv. 42, 49. Here belong some predicative expressions with predicate-nominatives, or predicate-datives, as: *Consules ad omnia quæ aspera sunt subeunda duces esse debent*, L. 26, 36. Thus are construed *opus est*, and the frequent phrases with the abstract datives *usui* and *impedimento* (*usui esse*, to be of use; *impedimento esse*, to be an obstacle to), as *Omnia deerant quæ ad reficiendas navis erant usui*, Cæs. B. G. 4, 29.

These expressions must be considered as virtual attributes of nouns, though they are grammatically made dependent on verbs. Hence they are often replaced by grammatical attributes in the genitive, as *signum proficiscendi dedit*, Liv. 22, 42.

*Obs.* It is unusual for gerundials after *ad* to be employed as grammatical attributes without being joined to a verb. But occasionally gerundial attributes with *ad* are found, as *Naves sexaginta tres expugnatae sunt, quaedam cum materiâ ad classem ædificandam*, some with materials for building a fleet, Liv. 26, 47.—*Ibi auditur P. Decii eventus, ingens hortamen ad omnia pro republicâ audenda*, there the affair of P. Decius was heard of, a strong incitement to venture everything for the republic. Liv. 10, 29.

1. Hoc vitium qui effugere volet adhibebit ad considerandas<sup>1</sup> res et tempus et diligentiam. Cic. Off. 1, 6.— 2. Helvetii constituerunt, ea quæ ad proficiscendum (to march) pertinerent, comparare. Cæs. B. G. 1, 3.— 3. Terræ cultum seigniorum<sup>2</sup> suspicor fore si ad eam utendum ferroque<sup>3</sup> subigendam superstitionis<sup>4</sup> aliquid accesserit. Cic. Leg. 2, 18.— 4. Fructuosior<sup>5</sup> hominum generi est vita eorum qui se ad rempublicam et ad magnas res gerendas accommodaverunt. Cic. Off. 1, 21.— 5. Sp. Lucretius, magno natu<sup>6</sup>, non sufficientibus jam viribus ad consularia<sup>7</sup> munera<sup>8</sup> obeunda<sup>9</sup>, intra paucos dies moritur. Liv. 2, 8, 4.— 6. Hoc omnis exercitavit ad arma capiendâ<sup>10</sup> opemque<sup>11</sup> jam prope captae urbi ferendam. Ib. 25, 24.— 7. Cives non dubitabant, hostem delictis exercitiis ad expugnandam Romam venturum. Ib. 22, 56.— 8. Cæsar Rutenos ad finis<sup>12</sup> Volcærum populandos mittit. Cæs. B. G. 7, 64.— 9. Expetuntur<sup>13</sup> divitiæ quum ad usus vitæ necessarios, tum ad perfrendas voluptates. Cic. Off. 1, 7.— 10. Adolescentes, sapientis viros consulentes, opinionem afferunt<sup>14</sup> populo, eorum se fore similes quos sibi ipsi delegerunt<sup>15</sup> ad invitandum. Cic. Off. 2, 13.— 11. Scipio, quod plurimum ad accendendos<sup>16</sup> militum animos intererat<sup>17</sup>, testis<sup>18</sup> spectatorque virtutis atque ignaviae<sup>19</sup> enjusque aderat. Liv. 26, 44.— 12. Ubii navium magnam copiam ad transportandum<sup>20</sup> exercitum pollicebantur. Cæs. B. G. 4, 16.— 13. Consul quum legionibus ad conveniendum<sup>21</sup> diem dixit, non auspicio templum intrasse arguebatur<sup>22</sup>. Liv. 4, 5, 12.— 14. Ab Celtiberis dies ad consultandum<sup>23</sup> petitu est<sup>24</sup>. Ib. 34, 19.— 15. Siculi ortâ luce contionem<sup>25</sup> habituri sunt ad criminandum me, ad concitandumque<sup>26</sup> in vos populum. Ib. 24, 38.— 16. Pompejus tibi gravissimus auctor ad instituendam<sup>27</sup> fidelissimus socius ad comparandam<sup>28</sup>, fortissimus adjutor ad rem<sup>29</sup> perficiendam<sup>30</sup> fuit. Cic. Dom. 12, 30.— 17. In tribunatu plus virum est ad vexandum senatum, quam ad resistendum improbis collegis. Liv. 4, 48, 14.— 18. Hoc mihi numquam impedimento ad rempublicam bene gerendam<sup>31</sup> fuit. Ib. 45, 39.— 19. Hoc nobis maximo usui ad conciliandos barbarorum animos erit. Ib. 26, 43.— 20. Ipsi scitis quanto exercitu ad Capuam obsidendam opus sit. Ib. 26, 8.

<sup>1</sup> To contemplate.— <sup>2</sup> slow.— <sup>3</sup> iron; here 'the plow.'— <sup>4</sup> superstition.— <sup>5</sup> beneficial.— <sup>6</sup> in his advanced age.— <sup>7</sup> consular.— <sup>8</sup> munus, duty.— <sup>9</sup> to perform.— <sup>10</sup> to take up.— <sup>11</sup> P. 1, p. 127.— <sup>12</sup> territory.— <sup>13</sup> expetere aliquid, to seek for something.— <sup>14</sup> to impart.— <sup>15</sup> to select.— <sup>16</sup> to fire.— <sup>17</sup> plurimum interest, it is most important.— <sup>18</sup> witness.— <sup>19</sup> cowardice.— <sup>20</sup> to convey.— <sup>21</sup> to assemble.— <sup>22</sup> to accuse.— <sup>23</sup> to deliberate.— <sup>24</sup> to request, to apply for.— <sup>25</sup> a meeting.— <sup>26</sup> to excite.— <sup>27</sup> to conceive.— <sup>28</sup> to prepare.— <sup>29</sup> your plans.— <sup>30</sup> to carry out.— <sup>31</sup> to administer.

2. In hunc locum armis protegendum quum Macedones concurrerent<sup>1</sup>, atrox<sup>2</sup> prœlium ortum est. Ib. 32, 23. — 3. Bojii *in agrum suum teludum* profecti. Insidres super armis<sup>3</sup> Mincii rivum considerant<sup>4</sup>. Ib. 32, 30. — 4. Eo<sup>5</sup> cum exortu Cæso missus *de armis*<sup>6</sup> Mincii rivum considerant<sup>7</sup>. Ib. 2, 48. — 5. Namtor pulch<sup>8</sup> *Alfapsidum*<sup>9</sup>. *Equorum agrum de populi arborumque teludum*<sup>10</sup> aperit<sup>11</sup>. Ib. 1, 6. — 6. Labores nam *in agrum presidio*<sup>12</sup> armisque *delinendum*<sup>13</sup> decessit<sup>14</sup>. Ib. 1, 59. — 7. Dubitatis, plebis, *in fossas claudisque teludum*<sup>15</sup> decessit<sup>16</sup>. Ib. 1, 59. — 8. Dubitatis, plebis, *in fossas claudisque teludum*<sup>17</sup> decessit<sup>18</sup>. Ib. 1, 59. — 9. Dubitatis, plebis, *in fossas claudisque teludum*<sup>19</sup> decessit<sup>20</sup>. Ib. 1, 59. — 10. Dubitatis, plebis, *in fossas claudisque teludum*<sup>21</sup> decessit<sup>22</sup>. Ib. 1, 59. — 11. Dubitatis, plebis, *in fossas claudisque teludum*<sup>23</sup> decessit<sup>24</sup>. Ib. 1, 59. — 12. Dubitatis, plebis, *in fossas claudisque teludum*<sup>25</sup> decessit<sup>26</sup>. Ib. 1, 59. — 13. Dubitatis, plebis, *in fossas claudisque teludum*<sup>27</sup> decessit<sup>28</sup>. Ib. 1, 59. — 14. Dubitatis, plebis, *in fossas claudisque teludum*<sup>29</sup> decessit<sup>30</sup>. Ib. 1, 59. — 15. Dubitatis, plebis, *in fossas claudisque teludum*<sup>31</sup> decessit<sup>32</sup>. Ib. 1, 59. — 16. Dubitatis, plebis, *in fossas claudisque teludum*<sup>33</sup> decessit<sup>34</sup>. Ib. 1, 59. — 17. Dubitatis, plebis, *in fossas claudisque teludum*<sup>35</sup> decessit<sup>36</sup>. Ib. 1, 59. — 18. Dubitatis, plebis, *in fossas claudisque teludum*<sup>37</sup> decessit<sup>38</sup>. Ib. 1, 59. — 19. Dubitatis, plebis, *in fossas claudisque teludum*<sup>39</sup> decessit<sup>40</sup>. Ib. 1, 59. — 20. Dubitatis, plebis, *in fossas claudisque teludum*<sup>41</sup> decessit<sup>42</sup>. Ib. 1, 59. — 21. Dubitatis, plebis, *in fossas claudisque teludum*<sup>43</sup> decessit<sup>44</sup>. Ib. 1, 59. — 22. Dubitatis, plebis, *in fossas claudisque teludum*<sup>45</sup> decessit<sup>46</sup>. Ib. 1, 59. — 23. Dubitatis, plebis, *in fossas claudisque teludum*<sup>47</sup> decessit<sup>48</sup>. Ib. 1, 59. — 24. Dubitatis, plebis, *in fossas claudisque teludum*<sup>49</sup> decessit<sup>50</sup>. Ib. 1, 59. — 25. Dubitatis, plebis, *in fossas claudisque teludum*<sup>51</sup> decessit<sup>52</sup>. Ib. 1, 59. — 26. Dubitatis, plebis, *in fossas claudisque teludum*<sup>53</sup> decessit<sup>54</sup>. Ib. 1, 59. — 27. Dubitatis, plebis, *in fossas claudisque teludum*<sup>55</sup> decessit<sup>56</sup>. Ib. 1, 59. — 28. Dubitatis, plebis, *in fossas claudisque teludum*<sup>57</sup> decessit<sup>58</sup>. Ib. 1, 59. — 29. Dubitatis, plebis, *in fossas claudisque teludum*<sup>59</sup> decessit<sup>60</sup>. Ib. 1, 59. — 30. Dubitatis, plebis, *in fossas claudisque teludum*<sup>61</sup> decessit<sup>62</sup>. Ib. 1, 59. — 31. Dubitatis, plebis, *in fossas claudisque teludum*<sup>63</sup> decessit<sup>64</sup>. Ib. 1, 59. — 32. Dubitatis, plebis, *in fossas claudisque teludum*<sup>65</sup> decessit<sup>66</sup>. Ib. 1, 59. — 33. Dubitatis, plebis, *in fossas claudisque teludum*<sup>67</sup> decessit<sup>68</sup>. Ib. 1, 59. — 34. Dubitatis, plebis, *in fossas claudisque teludum*<sup>69</sup> decessit<sup>70</sup>. Ib. 1, 59. — 35. Dubitatis, plebis, *in fossas claudisque teludum*<sup>71</sup> decessit<sup>72</sup>. Ib. 1, 59. — 36. Dubitatis, plebis, *in fossas claudisque teludum*<sup>73</sup> decessit<sup>74</sup>. Ib. 1, 59. — 37. Dubitatis, plebis, *in fossas claudisque teludum*<sup>75</sup> decessit<sup>76</sup>. Ib. 1, 59. — 38. Dubitatis, plebis, *in fossas claudisque teludum*<sup>77</sup> decessit<sup>78</sup>. Ib. 1, 59. — 39. Dubitatis, plebis, *in fossas claudisque teludum*<sup>79</sup> decessit<sup>80</sup>. Ib. 1, 59. — 40. Dubitatis, plebis, *in fossas claudisque teludum*<sup>81</sup> decessit<sup>82</sup>. Ib. 1, 59. — 41. Dubitatis, plebis, *in fossas claudisque teludum*<sup>83</sup> decessit<sup>84</sup>. Ib. 1, 59. — 42. Dubitatis, plebis, *in fossas claudisque teludum*<sup>85</sup> decessit<sup>86</sup>. Ib. 1, 59. — 43. Dubitatis, plebis, *in fossas claudisque teludum*<sup>87</sup> decessit<sup>88</sup>. Ib. 1, 59. — 44. Dubitatis, plebis, *in fossas claudisque teludum*<sup>89</sup> decessit<sup>90</sup>. Ib. 1, 59. — 45. Dubitatis, plebis, *in fossas claudisque teludum*<sup>91</sup> decessit<sup>92</sup>. Ib. 1, 59. — 46. Dubitatis, plebis, *in fossas claudisque teludum*<sup>93</sup> decessit<sup>94</sup>. Ib. 1, 59. — 47. Dubitatis, plebis, *in fossas claudisque teludum*<sup>95</sup> decessit<sup>96</sup>. Ib. 1, 59. — 48. Dubitatis, plebis, *in fossas claudisque teludum*<sup>97</sup> decessit<sup>98</sup>. Ib. 1, 59. — 49. Dubitatis, plebis, *in fossas claudisque teludum*<sup>99</sup> decessit<sup>100</sup>. Ib. 1, 59. — 50. Dubitatis, plebis, *in fossas claudisque teludum*<sup>101</sup> decessit<sup>102</sup>. Ib. 1, 59. — 51. Dubitatis, plebis, *in fossas claudisque teludum*<sup>103</sup> decessit<sup>104</sup>. Ib. 1, 59. — 52. Dubitatis, plebis, *in fossas claudisque teludum*<sup>105</sup> decessit<sup>106</sup>. Ib. 1, 59. — 53. Dubitatis, plebis, *in fossas claudisque teludum*<sup>107</sup> decessit<sup>108</sup>. Ib. 1, 59. — 54. Dubitatis, plebis, *in fossas claudisque teludum*<sup>109</sup> decessit<sup>110</sup>. Ib. 1, 59. — 55. Dubitatis, plebis, *in fossas claudisque teludum*<sup>111</sup> decessit<sup>112</sup>. Ib. 1, 59. — 56. Dubitatis, plebis, *in fossas claudisque teludum*<sup>113</sup> decessit<sup>114</sup>. Ib. 1, 59. — 57. Dubitatis, plebis, *in fossas claudisque teludum*<sup>115</sup> decessit<sup>116</sup>. Ib. 1, 59. — 58. Dubitatis, plebis, *in fossas claudisque teludum*<sup>117</sup> decessit<sup>118</sup>. Ib. 1, 59. — 59. Dubitatis, plebis, *in fossas claudisque teludum*<sup>119</sup> decessit<sup>120</sup>. Ib. 1, 59. — 60. Dubitatis, plebis, *in fossas claudisque teludum*<sup>121</sup> decessit<sup>122</sup>. Ib. 1, 59. — 61. Dubitatis, plebis, *in fossas claudisque teludum*<sup>123</sup> decessit<sup>124</sup>. Ib. 1, 59. — 62. Dubitatis, plebis, *in fossas claudisque teludum*<sup>125</sup> decessit<sup>126</sup>. Ib. 1, 59. — 63. Dubitatis, plebis, *in fossas claudisque teludum*<sup>127</sup> decessit<sup>128</sup>. Ib. 1, 59. — 64. Dubitatis, plebis, *in fossas claudisque teludum*<sup>129</sup> decessit<sup>130</sup>. Ib. 1, 59. — 65. Dubitatis, plebis, *in fossas claudisque teludum*<sup>131</sup> decessit<sup>132</sup>. Ib. 1, 59. — 66. Dubitatis, plebis, *in fossas claudisque teludum*<sup>133</sup> decessit<sup>134</sup>. Ib. 1, 59. — 67. Dubitatis, plebis, *in fossas claudisque teludum*<sup>135</sup> decessit<sup>136</sup>. Ib. 1, 59. — 68. Dubitatis, plebis, *in fossas claudisque teludum*<sup>137</sup> decessit<sup>138</sup>. Ib. 1, 59. — 69. Dubitatis, plebis, *in fossas claudisque teludum*<sup>139</sup> decessit<sup>140</sup>. Ib. 1, 59. — 70. Dubitatis, plebis, *in fossas claudisque teludum*<sup>141</sup> decessit<sup>142</sup>. Ib. 1, 59. — 71. Dubitatis, plebis, *in fossas claudisque teludum*<sup>143</sup> decessit<sup>144</sup>. Ib. 1, 59. — 72. Dubitatis, plebis, *in fossas claudisque teludum*<sup>145</sup> decessit<sup>146</sup>. Ib. 1, 59. — 73. Dubitatis, plebis, *in fossas claudisque teludum*<sup>147</sup> decessit<sup>148</sup>. Ib. 1, 59. — 74. Dubitatis, plebis, *in fossas claudisque teludum*<sup>149</sup> decessit<sup>150</sup>. Ib. 1, 59. — 75. Dubitatis, plebis, *in fossas claudisque teludum*<sup>151</sup> decessit<sup>152</sup>. Ib. 1, 59. — 76.

§ 510. The preposition *in* with a gerundial ABLATIVE (gerund or gerundive), is used 1) as the object of verbs with originally local meanings, which require prepositional objects with *in* and the ablative, as *esse, versāri, situm esse* (to be situated), *collocāre* (§ 453, R. 74); 2) as the object of ADJECTIVES, or the attribute of NOUNS restricted or determined in their meanings by the gerundial, as *tardus, celer, dignitas*; 3) to denote INDEPENDENT actions conceived as coincident with the principal predicate, being equivalent to a clause with *while* or *when*.

*In officio colendo sita viue et honestas omnis, all morality in life is contained (lies) in the observation of duty. Cic. Off. 1. 2. -Q. Mucius in praecl. repetenda parabatur*

<sup>1</sup>To hasten.—<sup>2</sup>furious.—<sup>3</sup>river.—<sup>4</sup>*considerare*, to take a position.—<sup>5</sup>*Rather*.—<sup>6</sup>to proceed.—<sup>7</sup>the young men of Alba; *pubes* being a collective noun.—<sup>8</sup>They were called to the interior of the castle.—<sup>9</sup>*prossido* quotation is an abstract native, while the co-ordinate *armis* is an ablativus a harsh connection (§ 469 R. 33–34); surely *sibi* i. e. *Namitōri*). —<sup>10</sup>to maintain.—<sup>11</sup>to call.—<sup>12</sup>to dig out.—<sup>13</sup>*dumtaxat*, to so narrowly.—<sup>14</sup>*hoc tantum boni*, so great a benefit as this.—<sup>15</sup>to magnify.—<sup>16</sup>*rem arduis fieri* to.—<sup>17</sup>regret something bitterly.—<sup>18</sup>separation.—<sup>19</sup>to effect, to bring about.—<sup>20</sup>from his military duties.—<sup>21</sup>to watch over. *In* is here pointedly used in opposition to *ex*. See § 150.—<sup>22</sup>your intentions.—<sup>23</sup>for others.—<sup>24</sup>*componere artis* i. e. *rhetoricas*, to write treatises about the theory of rhetoric.—<sup>25</sup>a sum.—<sup>26</sup>to spend, invest.—<sup>27</sup>*ad periculis suis addidit* would denote that the transaction had the purpose of winning the Etolians. But the author merely conveys the idea that the transactions led to the ruin of the Etolians, the latter being the principal movers in the resolutions referred to.—<sup>28</sup>too late.—<sup>29</sup>after the bad management of affairs, *i. e.* too late to remedy past misfortune.—<sup>30</sup>*cunctio* is used here as if a ruminative native were added.—<sup>31</sup>*causa expedita* for the deliberations concerning etc.). —<sup>32</sup>to conduct.—<sup>33</sup>*causa belli*, the rest of the war. § 372. R. 30.—<sup>34</sup>not a little.—<sup>35</sup>opportune, useful.—<sup>36</sup>to do i. e. Verbs of old usage are followed by *in* with the accusative of an ordinary substantive. § 451. R. 70.—<sup>37</sup>*in fine et opere bellum*, literally ‘to curk the war into’ and ‘to keep the war off’, *i. e.* to take the offensive and the defensive.—<sup>38</sup>See p. 141, foot note 2.—<sup>39</sup>*amicitia junctura*, to make a treaty of alliance.—<sup>40</sup>inhabitants of Furi.—<sup>41</sup>*abies*, pine.—<sup>42</sup>to build.—<sup>43</sup>resources.—<sup>44</sup>to bewail.—<sup>45</sup>their minds that had fallen into, had been moved to.—<sup>46</sup>present.—<sup>47</sup>deliberate.

*finisse regnator, Q. Mucius was believed to have been rather slow in administering public affairs. Cic. Dom. 34, 91.— In consilio capiendo omnem Galliam respiciamus, in taking a resolution (i. e., while, or when we take a resolution) let us consider the whole of Gaul. Cæs. B. G. 7, 77.*

1. *Galli, Cæs. B. G. 1. 1.*  
 2. *Omniis cogitatio*<sup>1</sup> *aut in consiliis capiendis*<sup>2</sup> de rebus honestis<sup>3</sup> et pertinentibus<sup>4</sup> ad bene beatęque vivendum, aut in studiis scientiis<sup>5</sup> cognitionisque<sup>6</sup> *versatus*<sup>7</sup>. Cic. Off. 1. 6.— 2. *Cn. Plancius totam suam quęstiram*<sup>8</sup> *in sustentando*<sup>9</sup> *et conservando collocat*<sup>10</sup>. Cic. P. R. S. 14, 35.— 3. Si respublica stetitset<sup>11</sup>, *in agendo plus quam in scribendo operę ponerę*<sup>12</sup>. Cic. Off. 2, 1.— 4. *Britanni dispersos*<sup>13</sup> *nostros milites in meliendi*<sup>14</sup> *occupatos subito adorti sunt*. Cæs. B. G. 4. 32.— 5. *Curius quum tardus in cogitando, tum in instruendo*<sup>15</sup> *dissipatus fuit*. Cic. Brut. 59, 216.— 6. *Testimonium dicit*<sup>16</sup> *natio minime in testimoniis dicendis religiosa*<sup>17</sup>. Cic. Flacc. 10, 23.— 7. *Perseverantia in omni genere militię*<sup>18</sup>, maxime tamen *in obsidendis urbibus necessaria* est. Liv. 5, 6, 9.— 8. *Omnia illa, dignitas in sententiis dicendis*<sup>19</sup>, *libertas in republicę capessendi*<sup>20</sup>, *en tota sublimia sunt*. Cic. Fam. 1, 8, 3.— 9. *Non illę sunt solę virtutę imperatoris*<sup>21</sup> *quę vulgo existimantur, labor in negotiis, industria in agendo, celeritas in configiendi, consilium*<sup>22</sup> *in providendo*. Cic. Leg. Man. 11, 29.— 10. *Legati in commemorandi*<sup>23</sup> *civitatis (sue) calamitate, ex sexcentis ad tris senatores sese deductos*<sup>24</sup> *esse dixerunt*. Cæs. B. G. 2, 28.— 11. *Maris pericula timere cepi in tantę pecunię regię in Italiam trajiciendę*<sup>25</sup> *et victorę*<sup>26</sup> *exercitū transportando*<sup>27</sup>. Liv. 45, 41.— 12. *Legati in pelendā*<sup>28</sup> *pace ejus rei culpam*<sup>29</sup> *in multitudinem contulerunt*<sup>30</sup>. Cæs. B. G. 4, 27.— 13. *Manus in demonstrandi*<sup>31</sup> *locis*<sup>32</sup> *ac personis*<sup>33</sup> *adverbiorum*<sup>34</sup> *atque pronominum*<sup>35</sup> *obtinent*<sup>36</sup> *vicem*. Quint. 11, 3, 87.

§ 541. The gerundial ablative after *ab* is used as the object of verbs denoting SEPARATION, and of verbs denoting ORIGIN (§ 441, R. 48).

Rem. 243. To the verbs admitting this construction belong *abstinere*, to abstain from, Liv. 39, 25; 2, 22; *detertere* and *absterrere*, to deter, Liv. 10, 11; 23, 1; Cic. Or. 1; Fin. 5, 18; *discedere* (Ex. 3); *decedere*, Cic. Cæc. 2, 5; *ruedere*, Cic. Off. 1, 44; *refugere*, Cic. Or. 2, 3; *excludere*, Cic. Ac. 2, 17, 53; *abstrahere*, Liv. 26, 12; Cic. Sen. 6; *vindicare*, to defend from, Liv. 26, 13; *abhorrere*, Liv. 4, 6, 7; *avertere* (Ex. 5); *avocare*, Cic. Sen. 5, 15; *amovere*, Cic. Pr. Cons. 1, 2; *oriri*, to originate in (Ex. 6), *cepsisse* (Ex. 7), as *detertere hostis a persurgendo*, to deter the enemy from pursuing; *abstinere a prædâ faciendâ*, to abstain from making booty; *avocari a voluptatibus perfruendis*, to be called away from the enjoyment of pleasures.

Obs. To the verbs of origin on which gerundials after *ab* may depend, belong those denoting the derivation of words from Latin verbs, as: *a scribendo fil* (is derived) *scriptor* (see R. 194, 4). Rarely gerundials after *ab* are used as ATTRIBUTES of nouns derived from the verbs mentioned above, as: *Arocatio a cogitandā molestiā*, a calling away (of the mind) from pondering on unpleasant events. Cic. Tusc. 3, 15.

the mind; from pondering on unpleasant events. Cic. *Tus.* 1. 28.

1. Legati *deterperunt* suos *ab auxilio* circumseſſe<sup>37</sup> urbi ferendo. Liv. 40. 47.—2. *Ab horum aetatibus, dignitatibusque, et honoribus violenter abſtinebatur.* Ib. 5. 25, 3.—3. In hoc uno sunt<sup>38</sup> cetera<sup>39</sup> ut homo nunquam *a se ipso inſtituendo*<sup>40</sup> *contemplandoque diſcedat*<sup>41</sup>. Cic. Rep. 2. 42.—4. In litteris ſcripſit Hannibal, profectionem<sup>42</sup> ſuam *abſtracturam*<sup>43</sup> ad defendendam Romam *ab oppugnandâ Capuâ* exercitus Romanos. Liv. 26. 7.—5. Seleucus facile Philippum *ab auxilio* Romanis *ferendo* ad ſua tuncda *avertit*<sup>44</sup>. Ib. 36. 7.—6. *A ſagunto* potiſſimum *oppugnando* bellum Punicum ſecundum *orſus eſt*. Ib. 26. 43.—7. *Discordia* inter plebem ac patres<sup>45</sup> *exorta*<sup>46</sup>, *ab duplicando*<sup>47</sup> *queſtorum*<sup>48</sup>

<sup>1</sup> Thinking.—<sup>2</sup> to take resolutions.—<sup>3</sup> moral subjects.—<sup>4</sup> pertaining.—<sup>5</sup> science.—  
<sup>6</sup> knowledge.—<sup>7</sup> consists in.—<sup>8</sup> quæstorship.—<sup>9</sup> to sustain.—<sup>10</sup> *collocāre in*, to apply to  
 (literally to place in).—<sup>11</sup> to last.—<sup>12</sup> *operam ponere in*, to devote one's labor to.—<sup>13</sup> dis-  
 persed.—<sup>14</sup> *metere*, to cut grain.—<sup>15</sup> *dispositus in instruendo*, prolix in his compositions.  
 —<sup>16</sup> to give evidence (a passive construction must be given to the English sentence).—  
<sup>17</sup> scrupulous.—<sup>18</sup> in military operations of all kinds.—<sup>19</sup> *sententias dicere*, to state the  
 reasons of one's votes in the senate, (to express one's opinions).—<sup>20</sup> *rempublicam capes-  
 sere*, to apply for public office.—<sup>21</sup> imperatorial.—<sup>22</sup> judgment.—<sup>23</sup> to state.—<sup>24</sup> *redi-  
 gere*, to reduce.—<sup>25</sup> to ship over.—<sup>26</sup> victorious.—<sup>27</sup> to convey.—<sup>28</sup> to sue for.—<sup>29</sup> the  
 responsibility for.—<sup>30</sup> to lay on.—<sup>31</sup> to point at.—<sup>32</sup> localities.—<sup>33</sup> *persōna*, person.—  
<sup>34</sup> *adverbium*, adverb.—<sup>35</sup> *pronōmen*, pronoun.—<sup>36</sup> *vicem obtinēre*, to take or supply the  
 place.—<sup>37</sup> to besiege.—<sup>38</sup> *esse*, to be contained.—<sup>39</sup> all other things.—<sup>40</sup> to instruct.—  
<sup>41</sup> to come back from.—<sup>42</sup> to leave off.—<sup>43</sup> march.—<sup>44</sup> *abstrahere*, to abstract, take away  
 from.—<sup>45</sup> to avert.—<sup>46</sup> *exoriri* = *oriri*.—<sup>47</sup> to double.—<sup>48</sup> a quæstor.

numero capta<sup>1</sup> est. Ib. 4, 43, 3.— 8. Consules appellati<sup>2</sup> sunt a consulendo, non a regnando atque dominando. Cic. in Aug. Civ. D. 5, 12.

§ 512. Gerundials after *de* are used, both as objects of verbs, and attributes of nouns, to denote the subject-matter of actions, especially of those expressed by verbs of thinking, saying, writing, and by nouns of similar import (§ 445), as:

*De contemnendâ gloriâ scribere*, to write *on* (about) the despising of glory. Cic. Tusc. 1, 34.—*Lex de tribûnis plebis reficiendis*, a law on the re-election of tribunes of the people.

*Rem.* 244. Hence the gerundial with *de* is also used to express the subject-matter of transactions, wars, strifes, missions, and similar acts, as *Prelia de occupando ponte crebra erant*, there were frequent fights about (for) the possession of the bridge. Liv. 7, 9.—*Legatos de pace faciendâ mittere*, to send envoys for the making of peace. This form of the gerundial is very frequently used in headings of books and chapters, without any governing word, as: *De Morie Contemnenda*, Of Despising Death (Cic. Tusc. I.); *De Homine Libero Exhibendo*, On Producing the Body of a Free Man (Tit. Dig. 43, 29).

1. *De inferendâ injuriâ* satis dictum est. Cic. Off. 1, 8.— 2. Videbamus vos *de immo-mutis*, non *de accipiendis legibus* cogitare. Cic. Phil. 12, 1, 1.— 3. Hac re potes-tissimis hominibus auctoribus, quorum sunt *de amicitiâ gerendis* praeclarissime scripti libri, genus hoc totum orationis tollere. Ib. Fam. 3, 8, 5.— 4. *Lex de pecuniis repetundis* sociorum atque amicorum populi Romani patrum est. Ib. Div. Cae. 20, 65.— 5. Versabor in re saepe quaerita, suffragia in magistratu mandando, *de reo judicando*, in lege aut rogatione sciscendâ, clam an palam ferre melius esset. Ib. Leg. 3, 15.— 6. Regulus captus a Pœnis *de captivis commutandis* Romam missus est. Ib. Off. 1, 14.— 7. Legati ad Vercingetorigem *de pace et amicitia conciliandâ* missi sunt. Cæs. B. G. 7, 55.

§ 513. A gerund or gerundive after *ob* is especially used of actions which the taker of a bribe is expected to perform in consideration of the bribe, as:

*Pecuniam ob dicendum testimonium* accipere, to take money *in order to give testimony* (for giving one's testimony).

*Rem.* 245. Aside from this specific meaning, *ob* sometimes, but rarely, occurs with a gerundial denoting the ulterior purpose of an act, with a force similar to *ad* (Ex. 6-9).

*Obs.* The phrase *pecuniam ob rem faciendam accipere* was frequently used in Sulla's criminal legislation (*leges Corneliae*), and in the laws of Augustus (*l. g. s. Juliae*). It often occurs in Cicero, and very frequently in the Jurists (Ex. 1, 2, 3). The phrase is distinguished from '*ad rem faciendam pecuniam accipere*', which means 'to accept money so that the money is to be applied to some purpose'.

1. *Lege Cornelia de falsis* tenentur qui *ob instruendas lites* pecuniam acceperunt. Ulp. Dig. 48, 10, 9.— 2. Si quis *ob testimonium dicendum vel non dicendum* pecuniam acceperit, poenâ legis Corneliae afficitur. Marc. Dig. 48, 10, 1.— 3. *Lege Julia repetun-*

<sup>1</sup> The passive form of the verb is used on account of its connection with a gerundive, which always is in the passive voice. (p. 104, 80.).— <sup>2</sup> The word consul is derived from.— <sup>3</sup> to inflict.— <sup>4</sup> to impose.— <sup>5</sup> to accept.— <sup>6</sup> *lex*, a condition.— <sup>7</sup> § 355, R. 1.— <sup>8</sup> Abl. absol.— <sup>9</sup> *sunt* does not belong to *scripta*, being used as an independent verb: to exist, to be extant.— <sup>10</sup> literally: 'about the carrying on of friend-ships', i. e., 'about the mutual rights and duties of friends'.— <sup>11</sup> *praeclarissime scripti libri*. See § 425, R. 3. We do not translate participles of this kind, but make the adverb (*praeclarissime*) the attribute of the noun (*libri*). In Latin there is a difference between *praeclarissimus liber* (a renowned book) and *praeclarissime scriptus liber* (an excellent book).— <sup>12</sup> this whole manner of talk.— <sup>13</sup> to suppress, to stop.— <sup>14</sup> *patrônus*, guardian.— <sup>15</sup> to engage.— <sup>16</sup> to discuss.— <sup>17</sup> inst. of *rogando*.— <sup>18</sup> to pass sentence on.— <sup>19</sup> propositions.— <sup>20</sup> *sciscere*, to pass resolutions on.— <sup>21</sup> publicly.— <sup>22</sup> *suffragia ferre*, to poll votes.— <sup>23</sup> to exchange.— <sup>24</sup> amity.— <sup>25</sup> making a treaty of.— <sup>26</sup> on forgery.— <sup>27</sup> *instruere lites* was a technical term denoting the 'instituting of a fraudulent action' by conspiracy, where one of the conspirators would appear as a witness, and the other as the complainant.

*dâram* tenetur qui, quum aliquam potestatem haberet, pecuniam *ob judicandum* vel *non judicandum decernendumve* acceperit. Macer. Dig. 48, 11, 3.— 4. Omitto pecunias *ob jus dicendum* a Verre acceptas. Cic. Ver. 2, 3, 88.— 5. Si illud flagitiosum est, *ob rem judicandam* pecuniam accipere, quanto illud flagitiosius, eum a quo pecuniam *ob absolvendum* acceperis, condemnare. Ib. 2, 2, 32.— 6. Eadem precor a diis immortalibus *ob* Murenae consulatum nâ cum salute *obtinendum*. Cic. Mur. 1, 6.— 7. Consul primo mediocria gerêbat, existimans Jugurthum *ob suos tulandos* in manus venturum. Sall. Jug. 89, 2.— 8. Bocchus dixit, se non hostili animo sed *ob regnum tulandum* arma cepisse. Ib. 102, 12.— 9. Clodius *ob expellendum* urbe Ciceronem plebejo homini in adoptionem se dedit. Suet. Tib. 2.

§ 544. The prepositions *ex* (of, from), *pro* (for), and *inter* (during, § 432, R. 26) rarely occur with gerundials, and have specific meanings in this connection.

*Obs.* None of these prepositions occur with gerundials in Cæsar; Cicero sometimes thus uses *ex* and *pro*; *inter* is used by Livy and the writers of the silver age.

*Rem.* 246. A gerundial after *ex*, in the few passages it occurs in Cicero, is mostly used as an object of the verb *constare*, to consist *in*, or *of*, as: *Virtus quæ ex hominibus tuendis constat*, that virtue which consists in the protection of men. Cic. Off. 1, 44. It is also used 1) as an object of verbs denoting 'to derive from', as *voluptatem capere ex re faciendâ*, to derive pleasure from doing something (Ex. 2); 2) of the derivation of words from verbs, like *ad* (R. 243, obs.). See Ex. 4; 3) as an object of verbs of taking away when the gerundive phrase has the force of a single noun, as: *Tollendum est ex rebus contrahendis* omne mendacium, Every falsehood should be kept out of contracts (res contrahendæ). Cic. Off. 3, 15.

*Rem.* 247. *Pro* with gerundives is (rarely) used in the meaning 'in behalf of', 'instead of', or 'as an equivalent of' (§ 448). See Ex. 5, 6, 7.

*Rem.* 248. In place of *inter* with the accusative of a gerundial, Cicero uses either *in* with an ablative gerundial, or clauses. Livy and the later authors use a gerundial after *inter* in the meaning of a clause with *while* and a predicate in the progressive form, or with the force of a verbal noun or participial after *during*, as: *Mores puerorum se inter ludendū simpliciū detegant*, the habits of boys are more easily discovered while they are playing during their plays. Quint. 1, 12, 12. Ex. 8, 9, 10.

1. *Temperantia* constat *ex prætermittendis voluptatibus* corporis. Cic. N. D. 3, 15, 38.— 2. *Pœna* divina constat *ex reverendis virorum animis* et ex famâ mortuorum. Ib. Leg. 2, 17.— 3. *Summa voluptas ex discendo* capitur. Ib. Fin. 5, 18.— 4. *Ex providendâ* est appellata prudentia. Ib. Leg. 1, 23.— 5. Quod ubi sensit Hasdrubal, *pro opè ferendâ* sociis, pergit ire ipse ad urbem oppugnandam. Liv. 23, 28.— 6. *Pro eâ obâ leguntur* et faciunt nemo dabit. Cato R. R. 144.— 7. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 8. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 9. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 10. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 11. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 12. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 13. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 14. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 15. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 16. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 17. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 18. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 19. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 20. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 21. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 22. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 23. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 24. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 25. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 26. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 27. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 28. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 29. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 30. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 31. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 32. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 33. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. R. 144.— 34. *Mais* est secundum naturam, *pro omni et facinorâ* nemo dabit. Cato R. supply *causandus*, to come to a hand to hand fight.— <sup>100</sup> *perperere* = to attack; supply *causandus*, to come to a hand to hand fight.—

## 2. Prepositions with participial phrases.

§ 545. Reversed participial phrases may be connected with their governing words by means of the prepositions *ante*, *post*, *ab*, *ad*, *ob*, *propter*, *pro*, *ex*, *de*, *inter* and *in* (with the ablative), as:

*Ante urbem conditam*, before the building of the city (Liv. Præf.); *sexennio post Vejios captos*, six years after the fall (the taking) of Veji, Cic. Div. 1, 44.

*Rem.* 249. Reversed participial phrases after prepositions, like ablatives absolute, must be considered, primarily, as PREDICATIVE PHRASES OF CLAUSES, the introducing prepositions having the force of corresponding conjunctions. Hence they must, very frequently, be rendered by clauses, especially when the predicate-participles have adjuncts, either in the form of objects or completing predicates, as *Post declaratos consules Albinum et Pisōnem*, after Albinus and Piso had been declared consuls, Liv. 40, 38. Prepositional participial phrases, like the ablatives absolute, may take predicate-nouns or adjectives, in lieu of a verb, in which instance the participle of the copula must be supplied, the same as with predicate-ablatives, as: *Ante me consulem*, before my consulship (before I was consul). See Ex. 3, 4, 11, 12.—Even impersonal participles are thus used, especially in silver Latinity, analogous to the gerund absolute, and to the impersonal ablatives absolute, as *Verba ante expectatum cadentia*, words closing up sooner than expected. Sen. Ep. 114. (Virg. Geo. 3, 348; Ov. Met. 4, 790). See R. 190, and p. 199, obs. 3, 4.

*Rem.* 250. When English prepositional expressions are employed in rendering this kind of phrases, the translation is made the same as in the analogous case of the ablatives absolute or prepositional gerundials, the participle being rendered by a verbal noun (either in *ing* or otherwise formed), or by participles absolute. The Latin prepositions are generally expressed by their ordinary English equivalents, as

*Post urbem captam*, after the capture (taking) of the city, or after taking the city.—*De Messēne receptā*, about the recapture (retaking) of Messene, or about retaking Messene.—*Propter petitam pacem*, on account of the proposal (proposing) of peace, or on account of proposing the peace.

Obs. 1. Participial phrases after *post* are employed: 1) in place of ablatives absolute, resolved by *after* (rarely by *since*), as: *Post illas datas litteras secuta est summa contentio de domo*, after the delivery of those papers followed (the delivery of those papers was followed by) an angry discussion about my house, Cic. Att. 4, 2, 2. But generally there is a slight difference in the two constructions, the prepositional form usually denoting events which are in no connection with those indicated by the principal predicate, while the ablatives absolute are always in a logical connection with the governing sentence. (Compare the analogous difference between *postquam* with a pluperfect, and *postquam* with a perfect. § 348.)

2. These phrases after *post* are also used as equivalents of phrases after *ab* (Obs. 2) with the force of the English 'ever since' with a verbal noun, especially in the expression '*post homines natos*' which means 'ever since the existence of the human race'. Ex. 9, 10, 13. Compare the similar meaning of *postquam*, p. 664.

In modern Latinity, *post* as well as *ante* is employed in chronology to denote the number of years, as dates: *Post Christum natum*, after the birth of Christ. The ancients thus used *ab* (Obs. 2) and *ante*, more rarely *post* (Cic. Fam. 9, 21).

Obs. 2. A reversed participial phrase after *ab* is used: 1) to denote an action or event marking the BEGINNING of a PERIOD, being rendered by *from*. The END of such a period (to or till) is expressed by *ad* with a participial phrase, as: *Regnatum Romæ ab conditâ urbe ad liberatam annos ducentos quadraginta quatuor*, kings reigned in Rome

from the building of the city to (until) its independence (literally 'to the freed one'), a period of 244 years.—It is 2) employed for computation in CHRONOLOGY (so many years counting from). In this connection it is rendered by *after* or *from*, Ex. 14, 15, 16.

Obs. 3. *Ob* and *propter* with participial phrases denote the CAUSE of an action (like *causâ* and *gratiâ*). But the specific office of *ob* (similar to that of *ob* with gerundials) is to represent the participle as an EQUIVALENT, in consideration of which, the principal action has been performed, as *Dare pecuniam ob rem factam*, to give money in consideration of an action performed, while *dare pecuniam ob rem faciendam* means 'to give a bribe, in consideration of an action to be performed'. See Ex. 17-20.

*Propter* is not used of 'equivalents', but corresponds to a clause with *because*. See Ex. 21, 22. After *propter* impersonal participles are used by Livy: *Libris Sibyllinis propter crebrius eo anno lapidatum inspectis*, after the Sibylline books had been inspected because it had frequently rained stones (on account of frequent stone-showers). Liv. 29, 10.

Obs. 4. *Pro* with a participial phrase occurs 1) with an impersonal participle (= *as* or *as if*), as: *Considium timore perterritum quod non vidisset pro viso renuntiase*, that Considius, from fear, had reported as seen by him what he had not seen (or 'what he had not seen, as if he had seen it'). Cæs. B. G. 1, 22. See Ex. 23.—2) In the phrase *pro re nata* (*quodnam esse* = to exist, which literally means 'in proportion to the existing affairs', *e. g.*, as matters stand, in the present circumstances, considering the situation. The phrase is generally dependent on '*non incommodus*' (not evil, not bad, quite well, satisfactory, as: *Antony colloquium cum heribus nostris pro re nata non incommodum fuit*, Antony's conference with our heroes was not bad (quite satisfactory) considering the situation of affairs. Cic. Att. 14, 6. See Ib. 7, 8. Ex. 24.

Obs. 5. *Ex* with a participial phrase represents the principal predicate as DERIVED from, or CONSEQUENT to the action expressed by the participle, and may often be replaced by ablatives absolute. It is rendered by *from*, *on account of*, or *for*: *Ira eadem in nos et in deos papæ*, the wrath of the heavenly gods against us for our breaking the treaty. Liv. 9, 1.—*Ex his rebus breviter disputatis* intelligi potest etc., from this brief discussion it may be seen etc. Cic. Off. 1, 45.—*Non erat minor laus ex contentuenda quam est ex conservanda priora*: No less praise would have arisen to me from declining the province, than has arisen to me from the fact that I have preserved it. Ib. Fam. 2, 12, 13. See Ex. 25-28.

Obs. 6. The use of *de* (Ex. 29) and *in* is analogous to that of *de* and *in* with gerundials: *Pacem esse judices non in armis positâ, sed in abjecto armorum et servitutis metu* (that peace does not exist in laying down arms, but in throwing off the fear of arms and servitude). Cic. Fam. 9, 6, 3.—*In in contractis ostenditur supercilis*, Anger shows in the contraction of the eyebrows, *e. g.*, when they are contracted. Quint. 11, 3, 79.—*Inter* rarely occurs with participial phrases, denoting the interval of time between two acts. Ex. 30.

1. *Peccatum*<sup>1</sup> in Camillum a majeribus nostris est ante receptam per eum a Gallis urbem. Liv. 45, 28.—2. M. Duilius tribunatum insignem<sup>2</sup> ante decemvros creatos gesserat. Liv. 3, 54.—3. Scipio anno ante ne consulem mortuus est. Cic. Sen. 6, 19.—4. P. Decius qui sequentibus ante eum consulat se pro republicâ devoverat<sup>4</sup>. Ib. 13, 43.—5. Thebe ante Epaminondam natum et post eius interitum perpetuo aliēno parerunt imperio. Nep. 15, 10.—6. Senatui post receptam Capream non Italiæ major quam Hispaniæ cura erat. Liv. 26, 18.—7. Post rem actam<sup>5</sup> silentium<sup>6</sup> subito ortum est. Ib. 26, 18.—8. Aratus ad Ptolemaum venit, qui tum regnabat alter (the second of his name) post Alexandriam conditam. Cic. Off. 2, 23.—9. Quæro ex te num quis post urbem conditam tribunos plebis appellavit ne causam diceret<sup>7</sup>. Ib. Vat. 14, 34.—10. Nego, umquam post sacra constituta<sup>8</sup> ullâ de re tam frequens collegium pontificum judicasse. Ib. Har. R. 7, 13.—11. Statuitur, ne post M. Brutum proconsulem sit Creta provincia. Ib. Phil. 2, 38.—12. Post Q. Fulvium et Q. Fabium consules, quibus consulibus<sup>10</sup> Capua devicta atque capta est, nihil est in illâ urbe contra hanc rempublicam factum. Ib. Leg. Agr. 2, 33.—13. Duo hæc capita<sup>11</sup> nata sunt post homines natos teterrima et spurcis simul<sup>12</sup>. Dolabella et Antonius. Ib. Phil. 11, 1.

14. Anno quingentesimo quinquagesimo secundo ab urbe conditâ bellum cum rege Philippo initum est, paucis mensibus post pacem Carthaginiensibus datam. Liv. 31, 5.

<sup>1</sup> *Peccare in aliquem* or *in aliquo*, to outrage somebody.—<sup>2</sup> instead of *insigniter gesserat* (which is unusual). *Insignem tribunatum gerere* must be recast, 'to distinguish one's self as a tribune', which would make very poor Latinity, if literally rendered.—<sup>3</sup> *quinquennium*, five years.—<sup>4</sup> *se devovere*, to sacrifice one's self (in order to atone for something by one's death).—<sup>5</sup> *res acta* = a transaction.—<sup>6</sup> silence.—<sup>7</sup> to appeal to the tribunes for quashing an indictment (literally 'that he may not plead his case').—<sup>8</sup> the foundation (establishment) of our religion (by Romulus).—<sup>9</sup> well attended.—<sup>10</sup> § 367, R. 26. Why can quibus consulibus not be a passive agent?—<sup>11</sup> A contemptuous expression for 'man', of the same force as our 'subject'.—<sup>12</sup> an abusive epithet, equivalent to our *nasty* or *dirty*.

— 15. *Ab incendio*<sup>1</sup> *Capitolio* hic est vicesimus annus. Sall. Cat. 47.— 16. Tres et sexaginta anni sunt a primo Punico ad secundum bellum finitum. Liv. 31, 1.— 17. Ei ob Sempronianae<sup>2</sup> cladis levitatem ignominiam ut ovans<sup>3</sup> urbem intraret concessum est. Ib. 4, 42.— 18. Senatus decrevit, ut quanta dona App. Claudio ob devictum Antiochum regem data ad omnia pulvinaria<sup>4</sup> essent, tanta praetores ad honorem deorum immortalium curarent danda. Ib. 25, 16.— 19. Apparet, imperatorem dis gratias agentem ob rempublicam bene gestam<sup>5</sup> redire. Ib. 45, 39.— 20. C. Sempronius Fulvius ob exercitum in Apulia amisum in contionibus<sup>6</sup> vexabat. Ib. 26, 2.— 21. Haud negaverim<sup>7</sup>, propter non nimis<sup>8</sup> sincere petitam aut expectatam nuper pacem, suspectam<sup>9</sup> esse vobis Punicam fidem. Ib. 30, 30.— 22. Decemviri libros Sibyllinos inspicere<sup>10</sup> iussi sunt, propter terribiles homines novis prodigiis. Ib. 22, 36.— 23. Hoc non placuit patribus, ne Marcus id ipsum<sup>11</sup> quod consultationi<sup>12</sup> reliquerant, pro praedicto<sup>13</sup> ferret. Ib. 26, 2.— 24. Mulieres nostrae, in quibus est tua soror, in praediis<sup>14</sup> illis pro re nata non incommode possunt esse. Cic. Att. 7, 14.

25. Invidiam<sup>15</sup> quae ex continuo<sup>16</sup> illo honore<sup>17</sup> impendebat<sup>18</sup> a te levitam<sup>19</sup> putabo. Liv. 3, 21.— 26. Magna illa communitas<sup>20</sup> est quae conficitur<sup>21</sup> ex beneficiis ultro et citro<sup>22</sup> datis acceptisque. Cic. Off. 1, 17.— 27. Major ex civibus amissis dolor quam letitia fuit hostibus fuit. Liv. 4, 17.— 28. Apud Romanos non maestitia<sup>24</sup> tantum ex male gestis, sed pavor<sup>25</sup> etiam erat, ne extemplo<sup>26</sup> castra hostis aggrederetur. Ib. 42, 60.— 29. Achaei de Messene recepta compositisque<sup>27</sup> ibi rebus exposuerunt<sup>28</sup>. Ib. 40, 20.— 30. Inter Lavinium<sup>29</sup> et Albam Longam deductam coloniam triginta fere interfuisse<sup>30</sup> anni. Ib. 1, 3, 4.

<sup>1</sup> Render by 'conflagration'. — <sup>2</sup> Clades Semproniana (see P. I, p. 350, R. 1), the defeat of Sempronius. — <sup>3</sup> by ovation. — <sup>4</sup> omnia pulvinaria (all cushions) means the feast of the larger lectisternia, in which cushions were prepared for the images of all the gods. — <sup>5</sup> rempublicam gerere is a term used of the administration of the curule magistrates, especially the consuls. Here the term is applied to the gods, as if they were the real administrators. Transl.: 'to govern well the republic'. — <sup>6</sup> popular meeting. — <sup>7</sup> Perf. subj. in the meaning of a qualified assertion: 'I would or shall not deny'. — <sup>8</sup> not quite. — <sup>9</sup> suspicious. — <sup>10</sup> to inspect. — <sup>11</sup> that very fact. — <sup>12</sup> for further deliberation. — <sup>13</sup> pro praedicto ferret = praedictum esse existimaret; praedictare, to decide beforehand. — <sup>14</sup> country-places. — <sup>15</sup> the odium. — <sup>16</sup> to prolong. — <sup>17</sup> office. — <sup>18</sup> would impend, would be liable to arise. — <sup>19</sup> to diminish. — <sup>20</sup> communion. — <sup>21</sup> to arise. — <sup>22</sup> mutually (literally: thither and hither). — <sup>23</sup> fundere, to rout. — <sup>24</sup> mourning. — <sup>25</sup> alarm. — <sup>26</sup> on the spot. — <sup>27</sup> componere, to settle, to arrange. — <sup>28</sup> to report. — <sup>29</sup> Lavinium and Albam Longam are accusatives of place dependent on deductam. — <sup>30</sup> translate by 'there were'.

## EXERCISES.

I. PERIPHRASTIC PARTICIPLE.— 1. Our voyage is neither quick nor smooth<sup>1</sup>, but we are almost drowned<sup>2</sup> by a number<sup>3</sup> of storms<sup>4</sup>.— 2. The whole (omnis) constitution (ratio) of the Senate, of the courts<sup>5</sup>, of the whole republic is changed.— 3. It is written in some passage<sup>6</sup> of (apud) Plato, that the whole character (mos) of the Lacedaemonians was inflamed<sup>7</sup> by eagerness<sup>8</sup> for (of) victory.— 4. I do not wonder that (infin. clause) Scaurus [should] be broken down<sup>9</sup> by<sup>10</sup> this disaster<sup>11</sup>.— 5. It happens very conveniently<sup>12</sup> that (quod) with his incredible boldness a remarkable<sup>13</sup> stupidity<sup>14</sup> is united<sup>15</sup>.— 6. It seemed<sup>16</sup> to every one that this whole hope was destroyed (tollere).— 7. We are very much embarrassed<sup>17</sup> in our domestic affairs<sup>18</sup>.— 8. When I was so much affected [in my] heart, I began to distrust<sup>19</sup> myself.— 9. When I arrived in Italy, the meadows were already clothed<sup>20</sup> with grass<sup>21</sup> and flowers.— 10. Towards (sub) the end of the battle the strength<sup>22</sup> of the soldiers was exhausted<sup>23</sup>, and their courage sank<sup>24</sup>.— 11. When this happened<sup>25</sup> to you, I was separated<sup>26</sup> from you by

<sup>1</sup> Transl. We sail *marigru* neither quickly *citra*, nor by a smooth sea *de impido*. — <sup>2</sup> to drown, *submergere*. — <sup>3</sup> aliquot. — <sup>4</sup> procelae. — <sup>5</sup> iudicium. — <sup>6</sup> locus. — <sup>7</sup> inflammare. — <sup>8</sup> cupiditas. — <sup>9</sup> percellere. — <sup>10</sup> transl. by the force *vis* of. — <sup>11</sup> calamitas. — <sup>12</sup> per commodum. — <sup>13</sup> singularis. — <sup>14</sup> stultitia. — <sup>15</sup> coniungere. — <sup>16</sup> Imperf. personal construct. — <sup>17</sup> perturbare. — <sup>18</sup> res familiaris, sing. — <sup>19</sup> diffidere. — <sup>20</sup> tegere. — <sup>21</sup> herba, pl. — <sup>22</sup> vis, pl. — <sup>23</sup> exhaustire. — <sup>24</sup> deficere. — <sup>25</sup> accidere. — <sup>26</sup> disjungere.

the sea.— 12. During four centuries<sup>27</sup> the Britons<sup>28</sup> were subjected<sup>29</sup> to the Romans, and after (abl. abs.) these were driven<sup>30</sup> out of the island, they were themselves expelled<sup>31</sup> by the Saxons<sup>32</sup>.— 13. The passage<sup>33</sup> over the Alps (*Alpes*) was twice within three months obstructed<sup>34</sup> by snow-storms<sup>35</sup>.— 14. In the same year the town, which had, before, been fortified with a rampart and a wall, was provided<sup>36</sup> with turrets<sup>37</sup> and castles<sup>38</sup>.— 15. Thou wilt soon be stripped<sup>39</sup> of all resources<sup>40</sup>, if thou continuest to squander<sup>41</sup> in that way<sup>42</sup> thy property<sup>43</sup>.— 16. When the rebellious<sup>44</sup> states will have been pacified<sup>45</sup>, the financial<sup>46</sup> distress<sup>47</sup> will be removed<sup>48</sup> in the shortest time.— 17. The life of the dead (*mortuus*) is contained (*placed, ponere*) in the remembrance (*memoria*) of the living (*vivus*).

II. PERIPHRASTIC FUTURE. PRESENT.— 1. Are the citizens going to warrant<sup>49</sup> to thee a safe journey through their territory<sup>50</sup>?— 2. I know the names of all those who are going to invest<sup>51</sup> money in that undertaking.— 3. Sempronius is about to be absent (*abesse*) from the city for (*acc.*) three days.— 4. What soldier can be of good cheer if he is about to fight with the enemy while<sup>52</sup> he is afraid of death?— 5. If you want me<sup>53</sup> to carry<sup>54</sup> this business out to the end, it will be necessary to assist me with your advice and work<sup>55</sup>.— 6. It is no favor<sup>56</sup> to give those [things] which are to hurt<sup>57</sup> those that ask<sup>58</sup> [for them].— 7. I cannot fulfil<sup>59</sup> this condition if thy favor is to benefit<sup>60</sup> me.— 8. I do not know by what reasons you are going to defend this opinion.— 9. I believe that those who are going to teach<sup>61</sup> some science should<sup>62</sup> not be ignorant<sup>63</sup> of the elements<sup>64</sup> of knowledge<sup>65</sup>.— 10. It is necessary (*oportet*) that thou shouldst love my [own] self if we are expected to be true friends.— 11. What I am expected to believe must be of a kind<sup>66</sup> that it could have happened<sup>67</sup>.

III. PERIPHRASTIC FUTURE. PAST AND FUTURE TENSES.— 1. If Cyrus lived thus (*sic*), who was never to be a private [citizen], how must thou live who art to return<sup>68</sup> to the people the power<sup>69</sup> thou hast?— 2. The consul was going to cross<sup>70</sup> as soon as<sup>71</sup> the first light<sup>72</sup> [of day] would show<sup>73</sup> a convenient<sup>74</sup> crossing<sup>75</sup>.— 3. The Roman foragers<sup>76</sup> were led into that part [of the country] where the conference<sup>77</sup> was to take place<sup>78</sup>.— 4. I asked<sup>79</sup> the decemvir among what [persons], and how<sup>80</sup> he was going to distribute<sup>81</sup> that land<sup>82</sup>.— 5. Metellus was asked<sup>83</sup> what he was to do on the next<sup>84</sup> day.— 6. Since you were about to accuse this man in a short time (*brevis*), you ought<sup>85</sup> to have preserved<sup>86</sup> that most important<sup>87</sup> witness<sup>88</sup>.— 7. It is announced<sup>89</sup> that the delegates<sup>90</sup> who were to assemble<sup>91</sup> yesterday have been summoned<sup>92</sup> for (*ad*) the third day before the Ides of April<sup>93</sup>.— 8. Caesar was going to march<sup>94</sup> through Illyria<sup>95</sup> if (in the event that) Pom-

<sup>27</sup> Saeculum. — <sup>28</sup> Britannus. — <sup>29</sup> subicere. — <sup>30</sup> ejicere. — <sup>31</sup> expellere. — <sup>32</sup> Saxo. — <sup>33</sup> iter. — <sup>34</sup> obstruere. — <sup>35</sup> nix, a snow-storm. — <sup>36</sup> instruere. — <sup>37</sup> turris. — <sup>38</sup> castellum. — <sup>39</sup> nudare. — <sup>40</sup> auxilium. — <sup>41</sup> dilapidare. — <sup>42</sup> ita. — <sup>43</sup> bona. — <sup>44</sup> seditiosus. — <sup>45</sup> pacare. — <sup>46</sup> nummarius. — <sup>47</sup> difficultas. — <sup>48</sup> extinguere. — <sup>49</sup> praestare. — <sup>50</sup> plur. of *finis*. — <sup>51</sup> collocare. — <sup>52</sup> by the participle of *timere*, agreeing with *mihi*. — <sup>53</sup> if I am to. — <sup>54</sup> to carry out. — <sup>55</sup> operari. — <sup>56</sup> beneficium. — <sup>57</sup> nocere. — <sup>58</sup> petere. — <sup>59</sup> Those that ask, by the participle. — <sup>60</sup> praestare. — <sup>61</sup> prodesse. — <sup>62</sup> to teach a science. — <sup>63</sup> *artis praeccepta tradere*. — <sup>64</sup> debere. — <sup>65</sup> rudis. — <sup>66</sup> elementum. — <sup>67</sup> littere. — <sup>68</sup> ejusmodi ut. — <sup>69</sup> to happen, *feri*. — <sup>70</sup> reddere. — <sup>71</sup> pote-tas. — <sup>72</sup> transire. — <sup>73</sup> as soon as, *ubi*. — <sup>74</sup> lux. — <sup>75</sup> ostendere; transl. by subjunct. pluperf., which has the force of a subjunctive of the future perfect. — <sup>76</sup> opportūnus. — <sup>77</sup> transitus. — <sup>78</sup> pabulator. — <sup>79</sup> colloquium. — <sup>80</sup> to take place, *esse*. — <sup>81</sup> querere ex. — <sup>82</sup> quemadmodum. — <sup>83</sup> to distribute among. — <sup>84</sup> *pariri* with dative. — <sup>85</sup> ager. — <sup>86</sup> to ask somebody. — <sup>87</sup> *querere ex aliquo*. — <sup>88</sup> proximus. — <sup>89</sup> debere. — <sup>90</sup> servare. — <sup>91</sup> gravis. — <sup>92</sup> testis. — <sup>93</sup> *nuntiare*, with an infin. clause. — <sup>94</sup> legatus. — <sup>95</sup> convenire. — <sup>96</sup> convocare. — <sup>97</sup> Aprilis. Translate: *Idus Aprilis*, see § 112, C; § 180, 4. — <sup>98</sup> proficisci. — <sup>99</sup> Illyricum.

pey would<sup>96</sup> cross over<sup>97</sup> to Italy.— 9. Flaminius would not even have kept quiet<sup>98</sup> if<sup>99</sup> the enemy had remained<sup>100</sup> quiet.— 10. Hannibal said that nobody could give a truer<sup>2</sup> advice than the one<sup>3</sup> who advised<sup>4</sup> the other [to do] that which he himself would have done if he were in the same situation (*locus*).— 11. This rule (*imperium*) seemed to the Lacedæmonians so (*adeo*) despotical (*superbus*) and worthless<sup>5</sup>, that (*ut*) they undoubtedly<sup>6</sup> would have taken up<sup>7</sup> arms on the spot<sup>8</sup>, if the fortune of the city (*civitas*) had been as of old (transl.: *had been the old*).— 12. If any of our allied cities<sup>9</sup> shall be (*have been*) about to treat<sup>10</sup> with the enemy, it will be visited<sup>11</sup> with the most serious<sup>12</sup> punishment.

IV. INFINITIVES OF THE PERIPHRASTIC FUTURE.— 1. I believe that thy brother will perish if he shall<sup>13</sup> persevere in this undertaking<sup>14</sup>.— 2. I hope that our republic will flourish<sup>15</sup>, and be powerful<sup>16</sup> for all time (*pl.*) to come<sup>17</sup>.— 3. The soldiers promised (*polliceri*) to obey Cæsar implicitly<sup>18</sup>.— 4. The tribunes threatened to arrest<sup>19</sup> the consul.— 5. I hope that Sempronius will be able (*posse*) to pay<sup>20</sup> all [his] debts<sup>21</sup>.— 6. Plato believed that states (*respublica*) would be happy<sup>22</sup> only<sup>23</sup> from the moment<sup>24</sup> that philosophers would rule them.— 7. Sempronius stated<sup>25</sup> that his brother would not need<sup>26</sup> any help.— 8. Cicero said that Hortensius would be worthy of the highest praise if he would be willing (*velle*) to sacrifice<sup>27</sup> his private dislikes<sup>28</sup> to the republic.— 9. Fulvius said that he would be willing<sup>29</sup> to suffer<sup>30</sup> the severest punishment if he would<sup>31</sup> ever change<sup>32</sup> his opinion.— 10. Cæsar said that he would now (*jam*) do immediately<sup>33</sup> what, otherwise<sup>34</sup>, he would have been willing (*R. 144*) to postpone<sup>35</sup> for some time.— 11. The fellow-citizens of Themistocles<sup>36</sup> had conceived the hope that he would once<sup>37</sup> be a distinguished<sup>38</sup> man.— 12. Gellius says that if Cicero had not been consul, the republic would have been totally<sup>39</sup> destroyed<sup>40</sup>.— 13. Hannibal believed that Antiochus in this way (*ita*) would have shut out the enemy from the sea<sup>41</sup>, and would have made [their] fleet useless<sup>42</sup>.— 14. It was evident<sup>43</sup> that, if<sup>44</sup> the Rhodians would have been relieved from this care, they would have made<sup>45</sup> those parts<sup>46</sup> of the sea perfectly safe.— 15. It seems (*videri*) that Anicius would have accomplished<sup>47</sup> this task (*negotium*) if it had not been for his sickness<sup>48</sup>.

V. CIRCUMLOCUTIONS OF THE PASSIVE, AND USE OF *forem*.— 1. Themistocles said to the Lacedæmonians that their ambassadors could not other-

<sup>96</sup> Subj. imp.— <sup>97</sup> trajicere.— <sup>98</sup> to keep quiet, *quiescere*.— <sup>99</sup> by ablatives absolute.— <sup>100</sup> *esse*, which is dropped in the construction.— <sup>1</sup> *quiētus*.— <sup>2</sup> *fidēlis*.— <sup>3</sup> *is*.— <sup>4</sup> *suadēre* with dat.— <sup>5</sup> *indignus*.— <sup>6</sup> *hand dubie*.— <sup>7</sup> *capere*.— <sup>8</sup> *extemplo*.— <sup>9</sup> Transl.: If any city (*civitas*) of (ex) our allies.— <sup>10</sup> *foedus facere*.— <sup>11</sup> *afficere*.— <sup>12</sup> *gravis*.— <sup>13</sup> perfect future.— <sup>14</sup> *conatus*, G. us.— <sup>15</sup> *florēre*.— <sup>16</sup> *vigēre*.— <sup>17</sup> *in omne tempus*.— <sup>18</sup> to obey implicitly, *dicto audientem esse*.— <sup>19</sup> *in vincula conjicere*.— <sup>20</sup> *solvere*.— <sup>21</sup> *res alienum*.— <sup>22</sup> *beatus*.— <sup>23</sup> *tum demum*.— <sup>24</sup> Transl.: If philosophers would have commenced (*pluperf. subj.*) to rule (*regere*) them.— <sup>25</sup> § 411.— <sup>26</sup> *indigēre*.— <sup>27</sup> *condonare aliquid alicui*.— <sup>28</sup> *simulas*.— <sup>29</sup> Transl.: That he would not refuse (*recusare*) that (*quod*) with subjunctive he would suffer.— <sup>30</sup> to suffer the severest punishment, *summa supplicia perire*.— <sup>31</sup> see § 347.— <sup>32</sup> to change one's opinion, *de sententiā dīcedere*.— <sup>33</sup> to do immediately, *repente*.— <sup>34</sup> *alioquin* has the force of an hypothetical clause.— <sup>35</sup> to postpone for some time, *in longiorē diem cedere*.— <sup>36</sup> Transl.: His fellow-citizens (*qui*) had conceived (*concepere*) the hope, that Themistocles etc.— <sup>37</sup> *aliquando*.— <sup>38</sup> *egregius*.— <sup>39</sup> *funditus*.— <sup>40</sup> to be destroyed, *interire*.— <sup>41</sup> Transl.: Would have taken (*adimere*) from the enemy the use of the sea.— <sup>42</sup> *inutilis*.— <sup>43</sup> *apparēbat*, with infinitive clause.— <sup>44</sup> Transl.: If this care had been taken (*demere*) from the Rhodians (*Rhodiis*).— <sup>45</sup> to make perfectly safe, *tutum præstare*.— <sup>46</sup> *regio*, in the singular.— <sup>47</sup> *conficere*.— <sup>48</sup> Transl.: unless (*nisi*) he had been hindered by sickness.

wise<sup>49</sup> return than if he himself would have been sent back<sup>50</sup>.— 2. The ambassadors said they would counsel peace<sup>51</sup> when (*cum*) the deserters would have been delivered up<sup>52</sup>, and the hostages would have been returned<sup>53</sup>.— 3. Labienus believed, that Cæsar would soon<sup>54</sup> (*brevi*) be deserted by all his troops.— 4. I would have kept silent<sup>55</sup>, had I known<sup>56</sup> that my opinion would have been rejected.— 5. I hardly<sup>57</sup> believe<sup>58</sup> that the President<sup>59</sup> will be re-elected<sup>60</sup>.— 6. Sempronius hopes to receive<sup>61</sup> the votes of all the electoral bodies.— 7. Titurius believes that the army will be cut off<sup>62</sup> from [its] supplies<sup>63</sup>, if they stay<sup>64</sup> at this place.— 8. I hope that your own person<sup>65</sup> will be respected<sup>66</sup> by the enemy (*plur.*).— 9. Ambiorix promised that the person of the general (*dux*) should not be violated (*nocere*) by his [soldiers].— 10. Alcibiades would never have gone with the fleet<sup>67</sup> to Sicily, if he had known beforehand<sup>68</sup> that he would soon be recalled by his citizens to defend himself<sup>69</sup> at Athens against the charge of sacrilege.— 11. The consul said that Fulvius would have been killed by the soldiers of his own legions<sup>70</sup> if he had led these men to death<sup>71</sup>.— 12. The accused (*reus*) stated (*proferre*), that if he had not<sup>72</sup> surrendered the city, the citizens would have been slaughtered, and the city itself sacked<sup>73</sup> and burned.

VI. PARTICIPLE OF THE PERIPHRASTIC FUTURE.— 1. Alexander took his clothes off<sup>74</sup> in order to throw himself<sup>75</sup> into the river.— 2. Darius had arrived at the village<sup>76</sup> of Arbēla (*pl. t.*) [which, *part.*] he was going to make renowned<sup>77</sup> by his defeat.— 3. Alexander commanded (*jubere*) that 30,000 young men<sup>78</sup> should be drafted<sup>79</sup> out of all provinces, in order to have at the same time (*simul*) hostages and soldiers.— 4. On the next<sup>80</sup> day [the] two most renowned<sup>81</sup> captains<sup>82</sup> of [the] two most powerful<sup>83</sup> nations proceeded<sup>84</sup> to battle, being about either to crown<sup>85</sup> on that day their manifold (*multus*) brilliant achievements<sup>86</sup>, or to wipe them out altogether<sup>87</sup>.— 5. After the consul had perceived<sup>88</sup> that the ambassadors had come to<sup>89</sup> ascertain<sup>90</sup> the plans of the war, he commanded them to leave<sup>91</sup> the camp forthwith (*extemplo*).— 6. These are riches more precious<sup>92</sup> than gold, [and] to<sup>93</sup> accompany<sup>94</sup> you into eternal life.

VII. PREDICATE-GERUNDIVES IN THE PRESENT.— 1. Children should be educated for a religious<sup>95</sup> and virtuous<sup>96</sup> life.— 2. Purity<sup>97</sup> of style<sup>98</sup> must be borrowed<sup>99</sup> from the ancients<sup>100</sup>.— 3. The bonds<sup>1</sup> of liberality<sup>2</sup> must not be overstepped<sup>3</sup>.— 4. The walls of the town and all its fortifications<sup>4</sup>

<sup>49</sup> Transl.: could not return unless (*nisi*).— <sup>50</sup> to send back, *remittere*.— <sup>51</sup> to counsel peace, *paris auctorem esse*.— <sup>52</sup> *tradere*.— <sup>53</sup> *reddere*.— <sup>54</sup> *soon* must be connected with the predicate-infinitive.— <sup>55</sup> *tacere* (plup. subj.).— <sup>56</sup> if I had known.— <sup>57</sup> *vix*.— <sup>58</sup> subj. perf.— <sup>59</sup> *princeps reipublicæ*.— <sup>60</sup> Transl.: that the power (*imperium*) will be prorogued (*prorogare*) to the President.— <sup>61</sup> Transl.: that his name will be reported (*referre*) by (*inere abl.*) all electoral bodies (*centuria*).— <sup>62</sup> *intercludere* with abl.— <sup>63</sup> *commeatus* G. us.— <sup>64</sup> *manere* (by the periph. future).— <sup>65</sup> your own person, *tu ipse*.— <sup>66</sup> Transl.: will not be violated (the negation being either connected with *spere* or with the predicate-infinitive).— <sup>67</sup> *classe proficisci*.— <sup>68</sup> *præscire*.— <sup>69</sup> Transl.: in order that (*ut*) he should defend himself (*causam dicere*, subj. imp.) concerning (*de*) sacrilege (*sacra violata*, the violated sacred things).— <sup>70</sup> the soldiers of his own legions, *sui legionarii*.— <sup>71</sup> ad sup. violated sacred things.— <sup>72</sup> if not, *nisi*.— <sup>73</sup> *diripere*.— <sup>74</sup> Transl.: he took (*destruere*) [his] garment (*vestis*) from [his] body.— <sup>75</sup> *se projicere*.— <sup>76</sup> *vicus*.— <sup>77</sup> *nobilis*.— <sup>78</sup> young men, *juniores*.— <sup>79</sup> *legere*.— <sup>80</sup> *posterus*.— <sup>81</sup> *longe clarissimus*.— <sup>82</sup> *dux*.— <sup>83</sup> *opulentus*.— <sup>84</sup> *procedere*.— <sup>85</sup> *cumulare*.— <sup>86</sup> *decus*; add: acquired before (*ante partus*).— <sup>87</sup> to wipe out altogether, *evertere*.— <sup>88</sup> *animadvertere*.— <sup>89</sup> in order to.— <sup>90</sup> *explorare*.— <sup>91</sup> *excedere* with abl.— <sup>92</sup> *pretiosus*.— <sup>93</sup> (which are) about to.— <sup>94</sup> *prosequi*.— <sup>95</sup> *sanctus*.— <sup>96</sup> *honestus*.— <sup>97</sup> *integritas*.— <sup>98</sup> *oratio*.— <sup>99</sup> *petere*.— <sup>100</sup> *vetus*.— <sup>1</sup> *modus* (*sing.*).— <sup>2</sup> *munificentia*.— <sup>3</sup> *transire*.— <sup>4</sup> *munitio*.

ought to be destroyed.— 5. It is necessary to abandon<sup>6</sup> the whole region to the barbarians.— 8. Our towns must, before all [other things] be protected<sup>7</sup> from plunder.— 9. Peace ought to be made by you as soon as possible.— 10. The worst<sup>8</sup> torments<sup>9</sup> must be endured by the captives.— 11. It is necessary to restrain<sup>10</sup> ambition<sup>11</sup>, but to encourage<sup>12</sup> rectitude<sup>13</sup> and integrity<sup>14</sup>.— 12. A speaker<sup>15</sup> must not fear<sup>16</sup> the murmuring<sup>17</sup> of popular assemblies<sup>18</sup>.— 13. We must not pass over<sup>19</sup> [in] silence<sup>20</sup> those most important<sup>21</sup> things, conception<sup>22</sup> and invention<sup>23</sup>.— 14. The consuls must cast lots<sup>24</sup> about [their] provinces, whenever<sup>25</sup> their names are reported<sup>26</sup> by the electoral bodies.— 15. The arrogance of these officials<sup>27</sup> cannot be endured at all.— 16. We cannot deny<sup>28</sup> the good faith of these ambassadors.— 17. I do not know whether this business ought to be postponed (*differre*) or not.

VIII. PREDICATE-GERUNDS IN THE PRESENT.— 1. A walk ought to be taken after dinner<sup>29</sup>.— 2. The meeting must be adjourned.— 3. A hard battle was fought [which lasted] till evening.— 4. It must be very much desired<sup>30</sup> that there should be no further<sup>31</sup> delay<sup>32</sup>.— 5. It must be acknowledged<sup>33</sup> by all of you that the enemy has fought bravely.— 6. Duties must never be forgotten.— 7. One must easily pardon friends.— 8. Soldiers must meet<sup>34</sup> dangers without shrinking<sup>35</sup>.— 9. This man does not listen to reason<sup>36</sup>.— 10. Nobody ought to be injured (*nocere*) without cause.— 11. These wretches<sup>37</sup> ought to be spared.— 12. It is often necessary to speak in the courts<sup>38</sup> *ex tempore*<sup>39</sup>, but still in (*by*) connected<sup>40</sup> and precise<sup>41</sup> language<sup>42</sup>.— 13. Boldness and recklessness (*temeritas*) ought to be opposed (*obviam ire*) rather late (*sero*) than never.— 14. Those that are accused of treason<sup>43</sup> must either enlist in the army<sup>44</sup> or suffer death<sup>45</sup>.— 15. We should enjoy<sup>46</sup> pleasures moderately<sup>47</sup>, and devote<sup>48</sup> only so much<sup>49</sup> time to exercises<sup>50</sup> of the body, as not to interfere<sup>51</sup> with our studies<sup>52</sup> or<sup>53</sup> duties<sup>54</sup>.— 16. The character<sup>55</sup> of this man is such<sup>56</sup> that<sup>57</sup> you must take great care<sup>58</sup> lest<sup>59</sup> you be deceived<sup>60</sup> by him.

IX. PREDICATE-GERUNDS AND GERUNDIVES IN THE PAST AND FUTURE TENSES.— 1. It was necessary to buy peace from the barbarians.— 2. The war ought either not to have been undertaken<sup>61</sup> at all, or to be conducted<sup>62</sup> according to (pro) the dignity<sup>63</sup> of the Roman people.— 3. Such (*eiusmodi*) terms<sup>64</sup> of peace ought to have been quickly<sup>65</sup> accepted by the king.— 4. The Roman commander had to cross a great many<sup>66</sup> rivers and to build a number of<sup>67</sup> bridges.— 5. A march of a hundred miles<sup>68</sup> had to be made by the consul within two days<sup>69</sup>.— 6. It had been necessary for Metellus to perform<sup>70</sup> an enormous task<sup>71</sup>; for he had to reorganize<sup>72</sup> an inefficient<sup>73</sup>

<sup>6</sup> Relinquere.— <sup>7</sup> tueri.— <sup>8</sup> raptum.— <sup>9</sup> summus.— <sup>10</sup> cruciatus.— <sup>11</sup> G. n. 4.— <sup>12</sup> eaccedere.— <sup>13</sup> gloria cupiditas.— <sup>14</sup> exultare atque firmare.— <sup>15</sup> probitas.— <sup>16</sup> integritas.— <sup>17</sup> orator.— <sup>18</sup> exasperare.— <sup>19</sup> fremitus.— <sup>20</sup> G. n. 8.— <sup>21</sup> popular assembly, *comitia*.— <sup>22</sup> transire.— <sup>23</sup> silentium.— <sup>24</sup> gravis.— <sup>25</sup> cogitatio.— <sup>26</sup> inventio.— <sup>27</sup> to cast lots about something, *sortiri aliquid*.— <sup>28</sup> cunprimus.— <sup>29</sup> referre (future perfect).— <sup>30</sup> magistratus.— <sup>31</sup> disputare.— <sup>32</sup> See § 460, R. 10.— <sup>33</sup> to desire very much, *cupere*.— <sup>34</sup> apparatus.— <sup>35</sup> there is delay, *mora interponitur*.— <sup>36</sup> confiteri.— <sup>37</sup> obviam ire.— <sup>38</sup> pavor.— <sup>39</sup> Transl.: This man cannot (*gerund*) be counselled (*gerundivum*).— <sup>40</sup> miser.— <sup>41</sup> to speak in the courts, *in foro dicere*.— <sup>42</sup> *ex tempore*, *subito*.— <sup>43</sup> continuous.— <sup>44</sup> coactum.— <sup>45</sup> ought to.— <sup>46</sup> proditio.— <sup>47</sup> to enlist in the army, *in armis*.— <sup>48</sup> mortem obire.— <sup>49</sup> perfici.— <sup>50</sup> modicum.— <sup>51</sup> tribuere.— <sup>52</sup> only so much, *tantum*.— <sup>53</sup> exercitatio.— <sup>54</sup> Transl.: that (*ut*) we take (*dehinc*) nothing (*quid*) from.— <sup>55</sup> littere.— <sup>56</sup> neque... neque.— <sup>57</sup> officia honestatis.— <sup>58</sup> mos (*plur.*).— <sup>59</sup> ejusmodi.— <sup>60</sup> ut.— <sup>61</sup> to take great care, *maxime cavere*.— <sup>62</sup> ne.— <sup>63</sup> circumvenire.— <sup>64</sup> suscipere.— <sup>65</sup> gerere.— <sup>66</sup> dignitas.— <sup>67</sup> lex.— <sup>68</sup> alacer.— <sup>69</sup> plurimus.— <sup>70</sup> aliquot.— <sup>71</sup> a mile, mille passus.— <sup>72</sup> two days, *biduum* (a space of two days).— <sup>73</sup> peragere.— <sup>74</sup> opus.— <sup>75</sup> ad disciplinam revocare.— <sup>76</sup> iners.

and almost dissolved<sup>74</sup> army.— 7. Mithridates had been obliged to comply with<sup>75</sup> all this, and moreover<sup>76</sup> to release<sup>77</sup> all captives without ransom<sup>78</sup>.— 8. Peace was granted<sup>79</sup> to the French<sup>80</sup>, but they had to cede<sup>81</sup> a not inconsiderable<sup>82</sup> part of their territory<sup>83</sup>, and to pay an enormous tribute<sup>84</sup>.— 9. All had to die who had left the camp with Titurius.— 10. All officers (*dux*) had to acknowledge (*confiteri*) that the most liberal<sup>85</sup> conditions had been granted to them.— 11. The road was so (*adeo*) narrow that<sup>86</sup>, breaking the ranks<sup>87</sup>, the soldiers had to march<sup>88</sup> in single files<sup>89</sup>.— 12. You ought to have treated (*tractare*) this point<sup>90</sup> with greater accuracy<sup>91</sup>.— 13. You ought to have resisted with greater energy<sup>92</sup> the unjust commands<sup>93</sup> of the tyrant.— 14. If the enemy had succeeded<sup>94</sup> in reaching the town a little earlier<sup>95</sup>, Cæsar would have been obliged to invest<sup>96</sup> the place by a tedious<sup>97</sup> siege<sup>98</sup>.— 15. So obstinate was the battle<sup>99</sup> that, if the enemy had resisted<sup>100</sup> the attack till evening, our [soldiers], since the road<sup>1</sup> to the water was not free<sup>2</sup>, would have been obliged to march back to<sup>3</sup> the places they had occupied the night before<sup>4</sup>.— It is the question<sup>5</sup> whether Alexander could<sup>6</sup> have obtained so great a glory if he had been obliged to fight in Italy instead of<sup>7</sup> in Asia.— 17. It will not be necessary for the nation (*gens*) of the Thracians (*Thrax*) to fear either<sup>8</sup> Perseus, engaged<sup>9</sup> in war with the Romans, or Perseus in peace.— 18. We shall be obliged to refute (*refellere*) this opinion, before we proceed<sup>10</sup> any farther<sup>11</sup>.

X. PREDICATE-GERUNDS AND GERUNDIVES IN THE INFINITIVE.— 1. The senate resolved (*decernere*) that the king be bound to account<sup>12</sup> first of all for the murder<sup>13</sup> of Aretaurus.— 2. The daughters of the king wrote that they had to endure<sup>14</sup> at that place all the evils of exile.— 3. Domitius Corbulo said that the enemy ought to be defeated by the spade<sup>15</sup> and the pick-axe<sup>16</sup>.— 4. Many Lacedæmonians were of the opinion (*existimare*) that Athens ought to be radically (*funditus*) destroyed and to be wiped<sup>17</sup> out from the earth<sup>18</sup>.— 5. The senate resolved (*censere*) that the consuls, without any delay<sup>19</sup>, should depart<sup>20</sup> for their provinces.— 6. It seemed (*videbatur*) to many that the siege of Capua ought to be raised<sup>21</sup>, and that the enemy ought to be met<sup>22</sup> at (*ad*) the gates of the city of Rome.— 7. Hannibal said that if Antiochus had followed his council, the Romans would have had to fight a great deal<sup>23</sup> nearer to the river Tiber.— 8. I think that this war ought not to have been commenced<sup>24</sup> at all.— 9. I believe that it will soon (*brevi tempore*) be necessary to repeal this law.

XI. PARTICIPIAL-GERUNDIVE.— 1. Nature assigned<sup>25</sup> to woman (*plur.*) the household-gods<sup>26</sup> to guard<sup>27</sup>.— 2. The ediles<sup>28</sup> gave on contract the house of the traitor<sup>29</sup> to be torn down<sup>30</sup> within two days.— 3. I am going to hand over<sup>31</sup> the republic to Muraena for upholding<sup>32</sup> and defending it.—

<sup>74</sup> Dissolutus.— <sup>75</sup> to comply with something, *facere aliquid*.— <sup>76</sup> præterea.— <sup>77</sup> liberare.— <sup>78</sup> pretium.— <sup>79</sup> concedere.— <sup>80</sup> Gallus.— <sup>81</sup> cedere with abl.— <sup>82</sup> aliquantus.— <sup>83</sup> plur. of *finis*.— <sup>84</sup> tributum.— <sup>85</sup> æquus.— <sup>86</sup> ut.— <sup>87</sup> Transl.: after the ranks (*agmen*, in the sing.) had been broken (*solvere*).— <sup>88</sup> *incedere*.— <sup>89</sup> *singuli*, agreeing with 'soldiers'.— <sup>90</sup> locus.— <sup>91</sup> diligentia.— <sup>92</sup> animus.— <sup>93</sup> imperium.— <sup>94</sup> Transl.: If it had been done that (*ut*) the enemy reached (*pervenire ad*).— <sup>95</sup> maturus.— <sup>96</sup> cingere.— <sup>97</sup> longinquus.— <sup>98</sup> obsidio.— <sup>99</sup> Transl.: so obstinately (*acriter*) was it fought.— <sup>100</sup> *sustinere*, subj. imp.— <sup>1</sup> iter.— <sup>2</sup> to be free, *patere*.— <sup>3</sup> regredi.— <sup>4</sup> Transl.: to the places of the camp of last (prior) night.— <sup>5</sup> queritur.— <sup>6</sup> subj. perf.— <sup>7</sup> instead of, *non*.— <sup>8</sup> not... either... nor, *neque, neque*.— <sup>9</sup> occupare.— <sup>10</sup> Perseus in peace, *Perseus quietus*.— <sup>11</sup> progredi, subj.— <sup>12</sup> any farther, *longius*.— <sup>13</sup> to account for something, *rationem aliquis rei reddere*.— <sup>14</sup> cades.— <sup>15</sup> subire.— <sup>16</sup> Transl.: by works (*opus*).— <sup>17</sup> dolabra (*pl.*).— <sup>18</sup> to wipe out, *extinguere*.— <sup>19</sup> orbis terrarum.— <sup>20</sup> mora.— <sup>21</sup> proficisci in.— <sup>22</sup> tollere.— <sup>23</sup> obviam ire.— <sup>24</sup> aliquanto.— <sup>25</sup> inferre.— <sup>26</sup> attribuere.— <sup>27</sup> Lares familiares.— <sup>28</sup> custodire.— <sup>29</sup> ædilis.— <sup>30</sup> proditor.— <sup>31</sup> demolire.— <sup>32</sup> tradere.— <sup>33</sup> sustinere.

4. Demetrius, son of Philip, was delivered (*dare*) to the ambassadors to be taken back<sup>32</sup> to [his] father.— 5. The Roman people assigned to<sup>33</sup> Pompey the enacting of the final scenes in the Mithridatic war.— 6. Sp. Licinius took the charge<sup>34</sup> of the war in order to hinder it.— 7. Does it (*hoc*) mean (*esse*) helping<sup>35</sup> a people, to abandon<sup>37</sup> it to the tender mercies<sup>38</sup> of the enemy?— 8. The transport to Rome<sup>39</sup> of [the image of] Juno, the queen [of goddesses], was assigned to young men (*juvenis*) selected from the whole army.— 9. The execution of these designs<sup>40</sup> was left to the consuls.— 10. The consul charged<sup>41</sup> Amynder with the task<sup>42</sup> of rousing<sup>43</sup> the Ætolians<sup>44</sup> to the war.— 11. Sempronius rented<sup>45</sup> to Gajus all the property he owned in Albany county.— 12. Sempronius contracted<sup>46</sup> with Gajus about providing with fences<sup>47</sup> and roads<sup>48</sup> all the lands (*prædium*) he owned in Albany county.— 13. The Senate ordered<sup>49</sup> the consul to see<sup>50</sup> that the confiscated<sup>51</sup> lands (*ager*) of the Ligurians were promptly<sup>52</sup> restored to them.— 14. Cæsar had (*curare*) all the old ships repaired<sup>53</sup>, and new ones built in Gaul.

#### XII. REVERSED PHRASES AS SUBJECTS AND TRANSITIVE OBJECTS.—

1. The exposure<sup>54</sup> of the king's fraud made the inhabitants<sup>55</sup> cautious.— 2. The capture (*capere*) of Heraclea broke at length (*tandem*) the spirits<sup>56</sup> of the Ætolians.— 3. Especially<sup>57</sup> the sinking<sup>58</sup> of the royal flagship<sup>59</sup> by a much smaller Rhodian<sup>60</sup> vessel, struck the enemy with dismay<sup>61</sup>.— 4. It seemed as if (*that*) the liberation<sup>62</sup> of Chalcis would bring the neighboring communities (*civitas*) over<sup>63</sup> to the alliance<sup>64</sup> with (*of*) the Romans.— 5. The king mourned<sup>65</sup> for the loss<sup>66</sup> of his friend more than for [that] of his crown<sup>67</sup>.— 6. Gajus has taken<sup>68</sup> Sempronius's farm (*prædium*) on shares.— 7. The Senate assigned (*attribuere*) to Scipio the pacification<sup>69</sup> of Spain.— 8. The public accuser (*accusator*) caused the punishment (*punire*) of all [persons] who had acted against<sup>70</sup> the usury (*usurius*) laws.

XIII. GENITIVE OF THE GERUND.— 1. Wisdom must be defined<sup>71</sup> [as] the art of living.— 2. God separated man from the other creatures<sup>72</sup> by nothing so much (*magis*) as by the faculty<sup>73</sup> of speech<sup>74</sup>.— 3. Who does not know<sup>75</sup> that the hope of impunity<sup>76</sup> is the greatest incentive<sup>77</sup> to sinning?— 4. The ediles were charged<sup>78</sup> with the care of paving<sup>79</sup> the streets

<sup>32</sup> Reducere.— <sup>33</sup> Transl.: assigned (*deferre*) to Pompey the end (*exitus*) of the Mithridatic (*Mithridaticus*) war to achieve (*conficere*).— <sup>34</sup> to take the charge of something, *suscipere aliquid*.— <sup>35</sup> *auxilium ferre*.— <sup>37</sup> *obijcere*.— <sup>38</sup> Transl. to abandon it to the enemy for being slaughtered (*trucidare*).— <sup>39</sup> Translate: Queen Juno was assigned (*assignare*) to be transported (*deportare*) to Rome.— <sup>40</sup> Transl.: These things to be done were left (*permittere*) to the consuls.— <sup>41</sup> to charge somebody with something, *attribuere alicui aliquid*.— <sup>42</sup> Transl.: attributed to Amynder the Ætolians to be roused.— <sup>43</sup> *concitare*.— <sup>44</sup> Ætoli.— <sup>45</sup> Transl.: S. rented (*locare*) to Gajus all the property (*prædia*) which he held (*habebat*) in Albany county (*ager Albanus*) to be used (*frui*). The addition 'to be used' shows that a *locatio rei*, not a *locatio operis* is meant.— <sup>46</sup> Translate: S. gave out on contract to Gajus all the lands etc. to be provided etc.— <sup>47</sup> to provide with fences, *sæpere*.— <sup>48</sup> to provide with roads, *sternere*.— <sup>49</sup> *mandare aliquid alicui*.— <sup>50</sup> Transl.: that (*ut*) he should care the confiscated lands to be promptly restored (*restituere*) to the Ligurians (*Ligures*).— <sup>51</sup> *adimere*.— <sup>52</sup> *sine mora*.— <sup>53</sup> *reficere*.— <sup>54</sup> Transl.: The detected (*detegere*) fraud (*fraus*) of the king.— <sup>55</sup> *cantus*.— <sup>56</sup> *animi*.— <sup>57</sup> *maxime*.— <sup>58</sup> *demergere*.— <sup>59</sup> *heptēris*.— <sup>60</sup> Rhodius.— <sup>61</sup> to strike with dismay, *percellere*.— <sup>62</sup> *liberare*.— <sup>63</sup> to bring over, *traducere*.— <sup>64</sup> *societas*.— <sup>65</sup> to mourn for something, *lugere aliquid*.— <sup>66</sup> *amittere*.— <sup>67</sup> *regnum*.— <sup>68</sup> Transl.: ha- taken (conducere) the farm of Sempronius to be cultivated (*colere*) on shares (*partiaro*).— <sup>69</sup> *pacare*.— <sup>70</sup> to act against a law, *in legem peccare*.— <sup>71</sup> *appellare*.— <sup>72</sup> *animal*.— <sup>73</sup> *facultas*.— <sup>74</sup> *dicere*.— <sup>75</sup> not to know, *ignorare*.— <sup>76</sup> *impunitas*.— <sup>77</sup> *illicēbra*.— <sup>78</sup> to charge somebody with something, *alicui aliquid mandare*.— <sup>79</sup> *sternere*.

(*via*) within (*in*) the city with pebblestone<sup>80</sup>, and [those] without the city with gravel<sup>81</sup>.— 5. Postumius went<sup>82</sup> to Præneste for the sake of offering a sacrifice<sup>83</sup> in the temple of Fortuna.— 6. I, on my part, have our ancestors<sup>84</sup> for an authority<sup>85</sup> and for [my] teachers in<sup>86</sup> the observance<sup>87</sup> of religious duties<sup>88</sup>.— 7. The multitude was standing<sup>89</sup> on the top of<sup>90</sup> the walls of the city, eager to see<sup>91</sup> Alexander.— 8. Neither of the generals (*dur*) thought (*memorem esse*) of sending help<sup>92</sup> to our hard pressed<sup>93</sup> [soldiers].— 9. The barbarians were powerless<sup>94</sup> to resist our armies.— 10. Neither of the officers (*dur*) had<sup>95</sup> any time for saving himself.— 11. I do not believe that Gajus has spoken thus (*ita*) for the sake of praising us.— 12. The Helvetians carried<sup>96</sup> all their carts to (*in*) one place for the sake of defending themselves.— 13. Cleopatra was desirous of excusing<sup>97</sup> herself to (*apud*) Cæsar.

XIV. GENITIVE OF GERUNDIVE AND PARTICIPIAL PHRASES.— 1. Antiochus did not cross over<sup>98</sup> to Europe for the sake of commencing<sup>99</sup> war, but [for the sake] of liberating Greece.— 2. By this error the general lost the opportunity (*locus*) of achieving a success<sup>100</sup>.— 3. The Senate gave<sup>1</sup> to the ediles authority to repair the porticoe of Æmilius.— 4. This answer<sup>2</sup> of the king furnished<sup>3</sup> to the ambassadors no material<sup>4</sup> for pleading<sup>5</sup> his cause before (*apud*) the Senate.— 5. Although (*cum*) after the Pharsalian<sup>6</sup> battle I always advocated<sup>7</sup>, not the laying down<sup>8</sup>, but the throwing down<sup>9</sup> of arms, I did not succeed<sup>10</sup> in bringing<sup>11</sup> the king over to my opinion<sup>12</sup>.— 6. The method (*ratio*) of choosing<sup>13</sup> and arranging<sup>14</sup> the words is easy.— 7. Many renounce<sup>15</sup> pleasures for the sake of obtaining (*adipisci*) greater pleasures.— 8. Demosthenes was zealous<sup>16</sup> in hearing Plato.— 9. Both took part<sup>17</sup> in suppressing<sup>18</sup> the Catilinarian conspiracy.— 10. It is reported<sup>19</sup> that Cæsar was desirous of acquiring<sup>20</sup> the royal title<sup>21</sup>.— 11. The glory of having successfully<sup>22</sup> conducted<sup>23</sup> and finished the Mithridatic war was conceded to Pompey.— 12. A shouting was heard, a sign<sup>24</sup> that (*genitive*) the town was taken.— 13. The consul was deeply affected<sup>25</sup> by the news<sup>26</sup> that [his] brother had been killed.— 14. The prisoners did not dare to deny the charge<sup>27</sup> of having entrapped<sup>28</sup> Roman horsemen by an ambuscade<sup>29</sup>.

XV. GERUNDIAL DATIVE.— 1. That man was in charge of<sup>30</sup> the department<sup>31</sup> for public works.— 2. The common council<sup>32</sup> gave to decemvirs the supervision<sup>33</sup> of the burial<sup>34</sup> of the dead<sup>35</sup>.— 3. The means<sup>36</sup> of the state were neither sufficient for arming nor for supporting<sup>37</sup> the army.— 4. Those men devoted their care not to governing<sup>38</sup> but to plundering<sup>39</sup> the city (*civitas*).— 5. Romulus selected<sup>40</sup> a place of<sup>41</sup> remarkable<sup>42</sup> adapt-

<sup>80</sup> *Silex*.— <sup>81</sup> *glarea*.— <sup>82</sup> *proficisci*.— <sup>83</sup> to offer a sacrifice, *sacra facere*.— <sup>84</sup> *maiores*.— <sup>85</sup> Transl.: I have our ancestors authors and teachers (agreeing with *maiores*).— <sup>86</sup> *Genitive*.— <sup>87</sup> *colere*.— <sup>88</sup> religious duties, *religiones*.— <sup>89</sup> *constare*.— <sup>90</sup> on top of, *in*.— <sup>91</sup> *cognoscere*.— <sup>92</sup> open ferre.— <sup>93</sup> hard pressed, *labrans*.— <sup>94</sup> *impotens*.— <sup>95</sup> by *esse*.— <sup>96</sup> *comportare*.— <sup>97</sup> *purgare*.— <sup>98</sup> *trajicere*.— <sup>99</sup> *inferre*.— <sup>100</sup> to achieve a success, *rem bene gerere*.— <sup>1</sup> *facere*.— <sup>2</sup> *responsum*.— <sup>3</sup> *præbere*.— <sup>4</sup> *materies*.— <sup>5</sup> *agere*.— <sup>6</sup> *Pharsalicus*.— <sup>7</sup> to advocate something, *auctorem alicujus rei esse*.— <sup>8</sup> *deponere*.— <sup>9</sup> *abjicere*.— <sup>10</sup> *non posse*.— <sup>11</sup> to bring over, *adducere ad*.— <sup>12</sup> *auctoritas*.— <sup>13</sup> *deligere*.— <sup>14</sup> *collocare*.— <sup>15</sup> *carere*.— <sup>16</sup> *studiosus*.— <sup>17</sup> to take part, *participem esse*.— <sup>18</sup> *opprimere*.— <sup>19</sup> *tradere*.— <sup>20</sup> *obtinere*.— <sup>21</sup> *nomen*.— <sup>22</sup> *bene*.— <sup>23</sup> *gerere*.— <sup>24</sup> *index*.— <sup>25</sup> to be deeply affected, *summo dolore affici*.— <sup>26</sup> *nuntius*.— <sup>27</sup> *crimen*.— <sup>28</sup> *circumvenire*.— <sup>29</sup> *insidiæ*.— <sup>30</sup> to be in charge of something, *præesse alicui rei*.— <sup>31</sup> Translate by *opera publica administrare*.— <sup>32</sup> *decuriones*.— <sup>33</sup> by *præficere*.— <sup>34</sup> *sepelire*.— <sup>35</sup> *mortuus*.— <sup>36</sup> *pecunie*.— <sup>37</sup> *alere*.— <sup>38</sup> *regere*.— <sup>39</sup> *diripere*.— <sup>40</sup> *deligere*.— <sup>41</sup> *ablat. of quality*.— <sup>42</sup> *singulâris*.

edness<sup>43</sup> for building the city.— 6. Tarquinius was bent on seizing<sup>44</sup> the city of Gabii by fraud, while (*cum*) he assumed the mask<sup>45</sup> of being engaged<sup>46</sup> in the business of his city.— 7. The Plebs demanded (*poscere*) that (*ut*) as soon as possible<sup>47</sup> an assembly for choosing consuls should be held<sup>48</sup>.— 8. Two commissions of triumvirs<sup>49</sup> were appointed (*creare*), the one (*plur.*) for receiving the gifts of the people, the other (*plur.*) for repairing the temples of Matūta and Fortūna.— 9. When the day for drafting the army had arrived, the most serious<sup>50</sup> disturbances<sup>51</sup> arose<sup>52</sup> in the city.

XVI. GERUNDIAL GENITIVES AND DATIVES AS PREDICATES.— 1. The Parisians<sup>53</sup> brought<sup>54</sup> everything to the city which they believed<sup>55</sup> might make<sup>56</sup> the siege tolerable.— 2. Such<sup>57</sup> harangues<sup>58</sup> [must] contribute to fan<sup>59</sup> and nourish<sup>60</sup> strife<sup>61</sup>.— 3. It does not seem that the decrees of the king are apt to preserve peace, but [that they are apt] to produce<sup>62</sup> war.— 4. Some [persons] believe that many books<sup>63</sup> on physical science have a tendency to dissolve and destroy religion (*plur.*).— 5. Daily<sup>64</sup> exercises<sup>65</sup> are conducive to the preservation of life and health.— 6. In the construction<sup>66</sup> of buildings<sup>67</sup> care should be especially taken<sup>68</sup>, that the walls are able to bear a [great] weight.— 7. In our country<sup>69</sup>, those that are<sup>70</sup> devoting themselves to political life<sup>71</sup>, should especially see that (*ut*) they are in a condition to bear the struggle.— 8. An action for fraud<sup>72</sup> lies<sup>73</sup> against those who, while (*cum*) they were insolvent, have induced<sup>74</sup> others<sup>75</sup>, to give<sup>76</sup> them goods<sup>77</sup> on credit.

XVII. GERUNDIAL ABLATIVE.— 1. Learning by heart<sup>78</sup> strengthens<sup>79</sup> the memory.— 2. The first ranks<sup>80</sup> of our [soldiers] were tired<sup>81</sup> by fighting.— 3. Scipio employed<sup>82</sup> the few days which<sup>83</sup> he had proposed<sup>84</sup> to spend at Carthage with drilling<sup>85</sup> his naval<sup>86</sup> and land-forces<sup>87</sup>.— 4. You can defend me best by punishing those who have grasped<sup>88</sup> the steel<sup>89</sup> for the sake of killing me.— 5. Hannibal, with the appearance of fleeing<sup>90</sup>, left the camp with all his troops, in order to (*ut*) surprise<sup>91</sup> the enemy [while] engaged<sup>92</sup> in plundering<sup>93</sup> the camp.— 6. The Numidians fought by running forward<sup>94</sup> and again (*rursus*) retreating (*se recipere*).— 7. Romulus taught our ancestors that they might (*posse*), by the cultivation<sup>95</sup> of the fields, have a plenty of<sup>96</sup> everything.— 8. Dost thou not feel that the judges, by my acquittal<sup>97</sup>, have condemned thee?— 9. The Romans, by throwing<sup>98</sup> grappling hooks<sup>99</sup> upon the ships of the enemy, made the naval battle similar to [a fight] on land<sup>100</sup>.— 10. Alcibiades, by showing<sup>1</sup> how great a damage<sup>2</sup> they would (*vere going to*) inflict<sup>3</sup> on the Lacedæmonians by the capture<sup>4</sup> of Syracuse, prevailed on<sup>5</sup> the Athenians to send a

<sup>43</sup> Opportunitas.— <sup>44</sup> capere.— <sup>45</sup> to assume the mask, *simulāre*, with an infinitive clause (that he was engaged).— <sup>46</sup> engaged in the business of the city. *operibus urbānis occupātum esse*.— <sup>47</sup> primo quoque tempore.— <sup>48</sup> habere.— <sup>49</sup> *duo triumviri* (two sets of triumvirs).— <sup>50</sup> gravis.— <sup>51</sup> commotiones.— <sup>52</sup> *offici*.— <sup>53</sup> Parisienses.— <sup>54</sup> *invehi in*.— <sup>55</sup> subjunctive.— <sup>56</sup> by *esse* with a predicate-gerundial.— <sup>57</sup> *eiusmodi*.— <sup>58</sup> oratio.— <sup>59</sup> inflammare.— <sup>60</sup> alere.— <sup>61</sup> certamen.— <sup>62</sup> incitare.— <sup>63</sup> libri de summā ratione naturæ conscripti.— <sup>64</sup> quotidianus.— <sup>65</sup> ambulatio.— <sup>66</sup> structūra.— <sup>67</sup> *edea*.— <sup>68</sup> to take care that, *videre ut*.— <sup>69</sup> apud nos.— <sup>70</sup> those that are, *participles*. See § 356.— <sup>71</sup> rempublicam capessere.— <sup>72</sup> actio doli.— <sup>73</sup> Translate: By the action for fraud are held (*tenere*) those who.— <sup>74</sup> *perducere*, with *ut*.— <sup>75</sup> *alter* (sing.).— <sup>76</sup> to give on credit, *credere*.— <sup>77</sup> merx (pl.).— <sup>78</sup> ediscere.— <sup>79</sup> confirmare.— <sup>80</sup> acies.— <sup>81</sup> fessus.— <sup>82</sup> absumere.— <sup>83</sup> to spend which, transl.: during which (*abl.*) to stay (*commorari*).— <sup>84</sup> statueret.— <sup>85</sup> exercere.— <sup>86</sup> navālis.— <sup>87</sup> *copiæ pedestres*.— <sup>88</sup> sumere.— <sup>89</sup> ferrum.— <sup>90</sup> fugæ specie.— <sup>91</sup> opprimere.— <sup>92</sup> *accipere*, with *abl.*— <sup>93</sup> diripere.— <sup>94</sup> procurare.— <sup>95</sup> colere.— <sup>96</sup> to have plenty, *abundare*.— <sup>97</sup> absolvere.— <sup>98</sup> *inijicere in*.— <sup>99</sup> grappling hook, *harpago*.— <sup>100</sup> a fight on land, *pugna pedestris*.— <sup>1</sup> docere.— <sup>2</sup> damnum.— <sup>3</sup> inferre alicui.— <sup>4</sup> Transl. by ablatives absolute: 'after they had captured' (*expugnare*).— <sup>5</sup> persuadere.

great fleet to Sicily.— 11. The accused escaped<sup>6</sup> punishment by feigning<sup>7</sup> insanity<sup>8</sup>.

XVIII. ABLATIVES ABSOLUTE (FIRST CLASS).— 1. Scipio, by the destruction<sup>9</sup> of two cities most inimical (*inimicus*) to this empire, not only has wiped out (*delere*) the present wars, but also those to come<sup>10</sup>.— 2. Philip hoped that, by taking<sup>11</sup> the cities of the Ætolians, he would be stronger<sup>12</sup> for the war.— 3. Cæsar resolved<sup>13</sup> to cross over<sup>14</sup> to Britain, by the subjection<sup>15</sup> of which he believed that the fear<sup>16</sup> of the Roman name would be increased among the barbarians.— 4. After the hostages and the arms had been surrendered by the inhabitants, Cæsar, after the lapse<sup>17</sup> of two days<sup>18</sup>, marched<sup>19</sup> into the territory of the Remi.— 5. After hearing the ambassadors, Cæsar answered that he would accept their surrender, if they would<sup>20</sup> deliver him their arms and the noblest of [their] state [as] hostages.— 6. After L. Mummius had taken Corinth he adorned with pictures and statues not Italy only, but also the provinces.— 7. When Fabricius by Pyrrhus's ambassador was offered<sup>21</sup> a large quantity<sup>22</sup> of gold, he did<sup>23</sup> not accept it, saying he wished rather to rule<sup>24</sup> those that<sup>25</sup> had it than have it himself.— 8. Cn. Scipio died in the greatest poverty, without leaving even so much<sup>26</sup> money as was sufficient<sup>27</sup> for the dowry<sup>28</sup> of his daughters.— 9. M. Salinator was condemned by the people because he had not divided the booty equally<sup>29</sup> among<sup>30</sup> his soldiers.— 10. When (*quum*) P. Valerius's soldiers had been routed<sup>31</sup>, the Senate resolved, that<sup>32</sup> he should receive no reinforcements before<sup>33</sup> he had defeated the enemy.— 11. The consul Hirtius sent to the besieged Mutinians<sup>34</sup> letters written on (*by*) lead, which<sup>35</sup> [some of his] soldiers carried swimming over the river, having fastened them to [their] arms (*sing.*).— 12. The consul, although he had defeated the enemy, nevertheless (*tamen*) retreated<sup>36</sup> to the camp, fearing<sup>37</sup> he might<sup>38</sup> fall into an ambushade.— 13. The inhabitants represented<sup>39</sup> that if [their] arms should have been taken<sup>40</sup> from them, they could not protect themselves against the neighboring communities [which were] most hostile to them.

XIX. ABLATIVES ABSOLUTE, DIRECT PARTICIPLES, OR FINITE CLAUSES. [Apply either ablatives absolute or direct participles according to the rules, finite clauses to be used only if neither of the two former constructions be admissible. Wherever either ablatives absolute or direct participles are allowed, translate in both ways.]— 1. The Spaniards<sup>41</sup>, after having hitched<sup>42</sup> oxen to vehicles<sup>43</sup>, placed<sup>44</sup> them in front<sup>45</sup>, and, the signal<sup>46</sup> being given for battle, fired<sup>47</sup> the vehicles [which were] full of pitch-wood<sup>48</sup> and sulphur<sup>49</sup>; then (*deinde*) they drove<sup>50</sup> the oxen against the enemy, threw<sup>51</sup> [their] line<sup>52</sup> in confusion<sup>53</sup> and broke through<sup>54</sup> [them].— 2. Pontius Cominius, after

<sup>6</sup> Transl.: was liberated from punishment.— <sup>7</sup> *simulāre*.— <sup>8</sup> Transl.: that he was insane (*furere*).— <sup>9</sup> evertere.— <sup>10</sup> those to come, by *futurus*.— <sup>11</sup> *expugnare*.— <sup>12</sup> *firmus*.— <sup>13</sup> statueret.— <sup>14</sup> *trajicere*.— <sup>15</sup> *subigere*.— <sup>16</sup> timor.— <sup>17</sup> by *intermittere*.— <sup>18</sup> *biduum*.— <sup>19</sup> *proficisci*.— <sup>20</sup> *pluperf. subj. of tradere*.— <sup>21</sup> Transl.: Fabricius, when Pyrrhus's ambassador offered to him.— <sup>22</sup> *poundus*.— <sup>23</sup> Transl.: after not having accepted it, said.— <sup>24</sup> *imperare*.— <sup>25</sup> *participles*.— <sup>26</sup> so much as, *is qui*.— <sup>27</sup> to be sufficient, *sufficere*.— <sup>28</sup> *dos*.— <sup>29</sup> *æqualis*, equal.— <sup>30</sup> *dative*.— <sup>31</sup> *fugare*.— <sup>32</sup> Transl.: that no (*ne*) reinforcements (*auxilia*) should be sent to him.— <sup>33</sup> *nisi*.— <sup>34</sup> *Mutinensis*.— <sup>35</sup> Transl.: after which had been fastened (*religare*) etc., the soldiers swam over (*tranare*) the river.— <sup>36</sup> *se recipere*.— <sup>37</sup> *veritus ne*.— <sup>38</sup> *subj. imperf. of incidere*, to fall.— <sup>39</sup> *exponere*.— <sup>40</sup> *adimere*.— <sup>41</sup> *Hispanus*.— <sup>42</sup> *adungere*.— <sup>43</sup> *vehiculum*.— <sup>44</sup> *constituere*.— <sup>45</sup> *prima fronte*.— <sup>46</sup> *signum*.— <sup>47</sup> *incedere*.— <sup>48</sup> *æda*.— <sup>49</sup> *sulphur*.— <sup>50</sup> *participial construction*.— <sup>51</sup> *participial construction*.— <sup>52</sup> *acies*.— <sup>53</sup> to throw in confusion, *consternare*.— <sup>54</sup> *perrumpere*.

he had been let down<sup>65</sup> over (§ 434, R. 32) the Tarpeian<sup>66</sup> rocks, [and] had swum<sup>67</sup> across the Tiber, came to Veji, accomplished<sup>68</sup> his mission<sup>69</sup> and returned in a similar way<sup>70</sup> to his [companions].— 3. The Campanians<sup>71</sup>, after they had been closely<sup>72</sup> invested<sup>73</sup> by the Romans, sent a man (*quidam*) disguised as<sup>74</sup> a deserter, who concealed<sup>75</sup> a letter under *abla* [his belt<sup>76</sup>], and, when he had found an opportunity of passing<sup>77</sup> the lines, carried<sup>78</sup> [it] to the Carthaginians.— 4. After Sulla had pardoned<sup>79</sup> Caesar, [his] friends complained<sup>80</sup> of his leniency<sup>81</sup> remarking<sup>82</sup> that there were many Marii in the one Cæsar.— 5. Hannibal, having been informed<sup>83</sup> that several of (*ex*) his soldiers had fled to the enemy, declared publicly<sup>84</sup> that he himself had sent them under the guise of deserters. When the Romans had heard<sup>85</sup> what he had declared, they sent back the deserters after having cut off<sup>86</sup> their hands.— 6. Cæsar, after he had pursued<sup>87</sup> the enemy for a while<sup>88</sup>, led his troops back<sup>89</sup> to the camp, deeming<sup>90</sup> [it] sufficient<sup>91</sup> for the present<sup>92</sup> that terror was struck<sup>93</sup> into the enemy.

XX. ABLATIVES ABSOLUTE OF THE SECOND CLASS. [*One or two sentences must be rendered by direct participial constructions.*]— 1. After Numa had died, Tullus Hostilius was made king.— 2. After the consuls had departed<sup>94</sup>, each for his [own] province, the Senate directed<sup>95</sup> [its] attention to settling<sup>96</sup> the difficulties in Spain.— 3. After the prætors had left (*egredi*) the city (*abl.*), they made<sup>97</sup> the drafting<sup>98</sup> of the army their first business.— 4. After the consul had returned (*regredi*) from the province, he demanded (*postulâre*) from the Senate the honor of a triumph<sup>99</sup>.— 5. When Alexander had crossed<sup>100</sup> the Hypasis, the army, exhausted<sup>101</sup> by hardships<sup>102</sup>, demanded<sup>103</sup> to be (*ut*) led<sup>104</sup> home.— 6. After day had dawned, the enemy made<sup>105</sup> a sally<sup>106</sup> from (*abl.*) all the gates and came near<sup>107</sup> the camp.

XXI. ABLATIVES ABSOLUTE OF THE THIRD CLASS.— 1. Manlius, when the army raised a mutiny<sup>108</sup> in his behalf<sup>109</sup> against his father, who had condemned him to death, persuaded the soldiers that they would suffer<sup>110</sup> him to be punished.— 2. A general is in a great danger, if (*si*) some reverse<sup>111</sup> happens under his command.— 3. If (*si*) Æteus or Minos should say such [things], it would seem unbecoming<sup>112</sup>, but (*at*) when Æteus says [it], applause<sup>113</sup> is raised.— 4. This ought not to have been made a charge<sup>114</sup> when these [men] are the judges<sup>115</sup>, or when we conduct the defence.— 5. A noise<sup>116</sup> was heard in the assembly<sup>117</sup>, the Æthai being indignant<sup>118</sup> that (*infin. clause*) they were treated<sup>119</sup> like the Messenians<sup>120</sup>.— 6. The Senate, since Sulpicius opposed<sup>121</sup> the petition<sup>122</sup>, resolved<sup>123</sup> (*consuere*) that the per-

<sup>65</sup> To let down, *demittere*.— <sup>66</sup> Tarpeianus.— <sup>67</sup> to swim across the Tiber, *Tiberim transire*.— <sup>68</sup> perpetrare (participial construction).— <sup>69</sup> legatio.— <sup>70</sup> similiter.— <sup>71</sup> Campani.— <sup>72</sup> diligentissime.— <sup>73</sup> circumcidere.— <sup>74</sup> subornatus pro.— <sup>75</sup> *per abla*, participial construction.— <sup>76</sup> balteus.— <sup>77</sup> to pass the lines, *per exoubias effugere*.— <sup>78</sup> perferre.— <sup>79</sup> ignoscere.— <sup>80</sup> queri de aliquâ re (partic. constr.).— <sup>81</sup> *indignitas*.— <sup>82</sup> dicere (finite verb).— <sup>83</sup> certiorum facere.— <sup>84</sup> *publice*.— <sup>85</sup> *ablat.*— <sup>86</sup> *præcidere*.— <sup>87</sup> *insequi*.— <sup>88</sup> paulisper.— <sup>89</sup> reducere.— <sup>90</sup> habere.— <sup>91</sup> satis.— <sup>92</sup> in present a.— <sup>93</sup> *insequi*.— <sup>94</sup> *proficisci*.— <sup>95</sup> *minum adicere* alieni rei.— <sup>96</sup> componere.— <sup>97</sup> Transl.: they put (*afferre*) their mind *animos* first to granting *relatios* the army.— <sup>98</sup> scribere.— <sup>99</sup> Transl.: that *ut* it should be allowed to him to triumph (*triumphare*).— <sup>100</sup> *transgredi*.— <sup>101</sup> *fatigare*.— <sup>102</sup> molestare.— <sup>103</sup> *colligare*.— <sup>104</sup> *reducere*.— <sup>105</sup> *partic. constr.*.— <sup>106</sup> *eruptio*.— <sup>107</sup> to come near the camp, *ad castra succedere*.— <sup>108</sup> *seditionem* *perferre*.— <sup>109</sup> in behalf, *pro*.— <sup>110</sup> pati.— <sup>111</sup> Transl.: some adverse *facti* *q*.— <sup>112</sup> *improbare*.— <sup>113</sup> *incedere*.— <sup>114</sup> *plausus*, G. *us* (partic.).— <sup>115</sup> *excitare*.— <sup>116</sup> to make something a charge, *aliquid excusare loco ponere*.— <sup>117</sup> to be the judge, *iudicare*.— <sup>118</sup> the two coordinate clauses must be connected by *neque ... neque*.— <sup>119</sup> to conduct the defence, *defensio*.— <sup>120</sup> *fremitus*.— <sup>121</sup> *con-*— <sup>122</sup> to be indignant, *indignari*.— <sup>123</sup> to treat somebody like another, *habere aliquem eodem loco quo alium*.— <sup>124</sup> Messenians.— <sup>125</sup> *refragari*.— <sup>126</sup> *supplicatio*.

mission<sup>127</sup> should not<sup>128</sup> be given.— 7. That man threatened within the hearing of the Senate that he would kill his adversary with his [own] hand.— 8. In the beginning (*inire*) of his youth Themistocles lived rather dissolutely<sup>129</sup>, so that (*partic. constr.*) his own father disinherited<sup>130</sup> him.— 9. The Senate assented<sup>131</sup> to [the view of] Fulvius against the opinion of Lentulus.— 10. We trust (*sperare*) that with the help of the immortal gods this conspiracy will be crushed<sup>132</sup>.— 11. The resolution was carried<sup>133</sup> unanimously<sup>134</sup> without any one's opposition<sup>135</sup>.— 12. While Capua was besieged by the Romans, Hannibal led his army to the river Anio, and took a position<sup>136</sup> within a little distance (*non longe*) from the city of Rome.— 13. Since Fulvius is engaged<sup>137</sup> in (*by*) important<sup>138</sup> work for the state, you had better<sup>139</sup> select<sup>140</sup> another help for<sup>141</sup> you.— 14. Who should not wish<sup>142</sup> to engage<sup>143</sup> in so great a science, so great rewards being held out!

XXII. ABLATIVES ABSOLUTE OF THE FOURTH CLASS.— 1. As long as my mind<sup>144</sup> is able<sup>145</sup>, and my strength<sup>146</sup> unabated<sup>147</sup>, I shall never cease<sup>148</sup> to oppose<sup>149</sup> this political system<sup>150</sup>.— 2. A conspiracy of the principal<sup>151</sup> communities<sup>152</sup> of Gaul was formed<sup>153</sup> in Cæsar's absence.— 3. Flaccus did not believe, that the Senate would grant<sup>154</sup> in his absence what it had denied<sup>155</sup> to him in his presence.— 4. Hieronymus broke<sup>156</sup> the friendship which, in the lifetime of his grandfather<sup>157</sup> Hiero, had existed<sup>158</sup> between the Roman people and the Syracusians<sup>159</sup>.— 5. This promise has been given by thee not only without my knowledge, but also against my will.— 6. Labienus said that he could not<sup>160</sup> support<sup>161</sup> Cæsar's undertaking in consistency with<sup>162</sup> his sworn duties<sup>163</sup>.— 7. Your plans are such<sup>164</sup> that (*ut*) they cannot be carried out<sup>165</sup> in conformity with<sup>166</sup> the laws.— 8. In the consulship of Manlius and Censorinus the third Punic war began (*oriri*).— 9. In the battle of Cannæ<sup>167</sup> almost the whole Roman army, under the command of Varro and Æmilius, was either killed<sup>168</sup> or captured.— 10. A great dispute<sup>169</sup> arose whether the laws that were enacted<sup>170</sup> under the influence<sup>171</sup> of Cæsar, should be abolished<sup>172</sup> or confirmed.— 11. If thou art [his] witness and endorser<sup>173</sup>, I shall readily<sup>174</sup> consent<sup>175</sup> that the republic be entrusted<sup>176</sup> to Pompey's faith.— 12. Numa is said to have formed<sup>177</sup> the religious institutions with the help<sup>178</sup> of the goddess Egeria.— 13. If (*si*) a people has prudent and shrewd<sup>179</sup> leaders, there is nothing, in their opinion<sup>180</sup>, that they cannot reach under their auspices<sup>181</sup>.— 14. This happened in my senior-year<sup>182</sup>.— 15. Antiochus alone will be able, with the help of the gods, and by the co-operation<sup>183</sup> of the Ætolians, to restore Greece to [its] former<sup>184</sup> dignity.

<sup>127</sup> *Veniâ dare*.— <sup>128</sup> connect the negation with the governing verb.— <sup>129</sup> *liberius*.— <sup>130</sup> *exheredare*.— <sup>131</sup> *assentiri*.— <sup>132</sup> *opprimere*.— <sup>133</sup> *sententiam ferre*.— <sup>134</sup> Transl.: *by all votes* (*suffragium*).— <sup>135</sup> *repugnare*.— <sup>136</sup> *castra ponere*.— <sup>137</sup> *occupare*.— <sup>138</sup> *summa rei-publicæ negotia*.— <sup>139</sup> Transl. by the future of the predicate-gerundive.— <sup>140</sup> select for you, *tibi sumere*.— <sup>141</sup> *adjutor*, transl.: some other *alius quis*.— <sup>142</sup> *perf. subj.*.— <sup>143</sup> *se con-*— <sup>144</sup> *ferre ad disciplinam*.— <sup>145</sup> *ingenium*.— <sup>146</sup> *integer*.— <sup>147</sup> *vires*.— <sup>148</sup> *illibatus*.— <sup>149</sup> *int.*— <sup>150</sup> *obstare*.— <sup>151</sup> *system (ration)* of administering (*gerere*) the republic.— <sup>152</sup> *prin-*— <sup>153</sup> *esse*.— <sup>154</sup> *Syracusius*.— <sup>155</sup> to be connected with the governing verb.— <sup>156</sup> *suffragari*.— <sup>157</sup> *salvus*.— <sup>158</sup> *jasjaramum et fides*.— <sup>159</sup> *is, ea, id*.— <sup>160</sup> *exsequi*.— Notice that 'cannot' is not to be rendered by *non posse* or *negare*, which would give to the deponent-infinitive a passive meaning.— <sup>161</sup> *salvus*.— <sup>162</sup> *Cannensis*.— <sup>163</sup> *cadere*.— <sup>164</sup> *certamen*.— <sup>165</sup> *per-*— <sup>166</sup> *ferre*.— <sup>167</sup> *auctor*.— <sup>168</sup> *tollere*.— <sup>169</sup> *sponsor*.— <sup>170</sup> *facilis*.— <sup>171</sup> *assentiri*.— <sup>172</sup> *mandare*.— <sup>173</sup> to form the religious institutions, *sacra constituere*.— <sup>174</sup> a helper, *adjutor*.— <sup>175</sup> *callidus*.— <sup>176</sup> Transl.: that they do not believe (*subj.*) that they can reach (*consequi*).— <sup>177</sup> not by auspices, but by *auctor*.— <sup>178</sup> senior-year, by the personal noun *senior*.— <sup>179</sup> *socius*.— <sup>180</sup> *pristinus*.

XXIII. PREPOSITIONAL GERUNDIALS AFTER *ad*, *in* (with accusative), AND *ob*.— 1. The defender most conscientiously<sup>76</sup> made use of all arguments that were available<sup>76</sup> for the protection<sup>77</sup> of an accused person.— 2. How few are there now who are nominated<sup>78</sup> for high public offices<sup>79</sup>, unless<sup>80</sup> [their] means<sup>81</sup> are sufficient<sup>82</sup> for bribing<sup>83</sup> [the electors].— 3. The agents of Perseus inveigled<sup>84</sup> the communities of the Achæi to take up arms against the Romans.— 4. Thou wilt have to select braver men for so great a venture<sup>85</sup>.— 5. The consul, after having sent his brother Manlius to collect<sup>86</sup> from the Bœotians the rest of the money which<sup>87</sup> they had promised, and having appointed<sup>88</sup> a day for a conference with the envoys<sup>89</sup>, led his army back to Apamœa.— 6. The troopers<sup>90</sup> of Mago with<sup>91</sup> whom he roamed through<sup>92</sup> this part of the country<sup>93</sup>, were neither (*non modo*) strong<sup>94</sup> enough to operate<sup>95</sup> against the enemy, nor even (*sed ne quidem*) to protect the fields against (*ab*) foragers<sup>96</sup>.— 7. The tenth legion gave the assurance (*confirmare*) that it was fully prepared<sup>97</sup> to meet (*obrium ire*) the enemy.— 8. By this letter of the king, Pausanias was made bolder to carry out (*perficere*) what he had promised.— 9. It is by no means<sup>98</sup> expedient that<sup>99</sup> the office<sup>100</sup> of our Presidents should be extended<sup>1</sup> to another (*alter*) term<sup>2</sup>, lest any one<sup>3</sup> by a long lease<sup>4</sup> of power should be<sup>5</sup> either more reluctant<sup>6</sup> to lay down<sup>7</sup> [his] office, or more strengthened<sup>8</sup> to obtain it again<sup>9</sup>.— 10. The Senate ordered the consul to take along<sup>10</sup> everything that might be useful for the siege<sup>11</sup> or defence of cities.— 11. Several things (*res*) were in the way (*impedimento*) of quickly conducting (*gerere*) the war.— 12. Hannibal sent a strong body of troops<sup>12</sup> into the district of Puteoli<sup>13</sup> to lay it waste by fire and sword (*ferro et igni*).— 13. Gajus has deposited<sup>14</sup> with me a large sum<sup>15</sup> of money [as a contribution] for the building of an orphan-house<sup>16</sup>.— 14. [Every person] who shall have either given, or offered, or accepted money [as an inducement] for voting<sup>17</sup> is punishable<sup>18</sup> under our laws.

XXIV. GERUNDIALS AFTER *in* (with abl.), *ab*, *de*, *pro*, *ex*, and *inter*.— 1. In the distribution<sup>19</sup> of public offices<sup>20</sup> the rulers<sup>21</sup> of the republic should especially (*imprimis*) see [to] what is most useful to the people, not [what is useful] to the applicants<sup>22</sup>.— 2. When dangers are impending<sup>23</sup>, the custom of physicians ought to be imitated, who cure<sup>24</sup> slight<sup>25</sup> cases by gentle<sup>26</sup> remedies, but to more serious<sup>27</sup> diseases are obliged (*cogere*) to

<sup>76</sup> Religiosus. — <sup>76</sup> to be available, *pertinere*. — <sup>77</sup> tueri. — <sup>78</sup> proponere (*subj.*). — <sup>79</sup> Transl.: for conducting (*gerere*) the republic. — <sup>80</sup> nisi. — <sup>81</sup> copia. — <sup>82</sup> suppetere (*subj.*). — <sup>83</sup> largiri. — <sup>84</sup> concitare. — <sup>85</sup> Transl.: for venturing (*audere*) so great a thing. — <sup>86</sup> exigere. — <sup>87</sup> Transl.: out of that which they had promised. If literally translated, the relative 'which,' in Latin, would refer to the rest, and not to the whole of the money. — <sup>88</sup> dicere. — <sup>89</sup> Transl.: having said to the envoys a day for conferring (*colloqui*). — <sup>90</sup> equitatus (*sing.*). — <sup>91</sup> Transl.: the troopers who under the command (*dux*) of Mago roamed etc. — <sup>92</sup> *pervagari* with accusative. — <sup>93</sup> Translate: this region. — <sup>94</sup> validus. — <sup>95</sup> to operate against somebody, *laccere aliquem*. — <sup>96</sup> pabulator. — <sup>97</sup> superlative of *paratus*. — <sup>98</sup> minime. — <sup>99</sup> infinitive clause. — <sup>100</sup> The office of a high magistrate, if military power is contained in it, is rendered by *imperium*. — <sup>1</sup> prorogare in. — <sup>2</sup> Transl.: term of four years, *quadriennium*. — <sup>3</sup> ne quis. — <sup>4</sup> Transl.: after (*abl. abs.*) the power (*potestas*) has been made old (*inveterascere*, to make old). — <sup>5</sup> subjunctive of *esse*. — <sup>6</sup> tardus. — <sup>7</sup> deponere. — <sup>8</sup> munus. — <sup>9</sup> rursus. — <sup>10</sup> secum portare. — <sup>11</sup> obsidere. — <sup>12</sup> body of troops, *agmen*. — <sup>13</sup> Puteolanus. — <sup>14</sup> deponere. — <sup>15</sup> magna pecunia. — <sup>16</sup> *orphnotrophæum* (late and modern Latin, derived from the Greek). — <sup>17</sup> suffragia ferre. — <sup>18</sup> nostris legibus teneri. — <sup>19</sup> deferre. — <sup>20</sup> public office, *munus*. — <sup>21</sup> those who rule (*gerere*) the republic. — <sup>22</sup> part. of *petere*. — <sup>23</sup> Transl.: in dangers to be approached (*adire*). — <sup>24</sup> curare. — <sup>25</sup> Transl.: those that are (*partic.*) slightly (*leviter*) sick (*agrotare*). — <sup>26</sup> Transl.: gently (by *lenis*). — <sup>27</sup> gravis.

apply dangerous cures<sup>28</sup>.— 3. Prestige<sup>29</sup> is one of the greatest aids<sup>30</sup> in the management<sup>31</sup> of the more important<sup>32</sup> affairs.— 4. In defending yourself against<sup>33</sup> so serious charges, you ought to have been<sup>34</sup> a little more careful.— 5. This man had<sup>35</sup> all [the qualities] which are most important<sup>36</sup> for winning<sup>37</sup> popularity, ease<sup>38</sup> in speaking, liberality<sup>39</sup> in giving, [and] leniency<sup>40</sup> in forgiving.— 6. The sight<sup>41</sup> of the walls (*mœnia*) deterred the Carthaginians from attacking (*oppugnare*) the city.— 7. I shall never cease<sup>42</sup> from promoting<sup>43</sup>, to the best of my abilities<sup>44</sup>, the interests<sup>45</sup> of my fellow-citizens.— 8. The third book of Cicero's Tusculan<sup>46</sup> disputations is written on alleviating<sup>47</sup> sorrow<sup>48</sup>.— 9. An agreement was made<sup>49</sup> by both (*utroque*) leaders, that (*ut*) ambassadors should be sent from (*ex*) all states to (*de*) draft a treaty<sup>50</sup> of peace.— 10. How wretched is the condition of those who are ignorant (*expers*) of the pleasure which is derived from seeing<sup>51</sup> and hearing!— 11. This law, instead of diminishing vices, holds out rewards for committing crimes.— 12. It is reported<sup>52</sup> that Brennus, while weighing<sup>53</sup> the gold given by the Romans, was surprised<sup>54</sup> and cut down<sup>55</sup> by Camillus.

XXV. PARTICIPIAL PHRASES AFTER PREPOSITIONS.— 1. Cæsar forbade the soldiers to rest<sup>57</sup> before the end<sup>58</sup> of the march.— 2. Fulvius drafted<sup>59</sup> [his] will<sup>60</sup>, but before signing and sealing<sup>61</sup> the paper<sup>62</sup> he regretted<sup>63</sup> [his] purpose.— 3. This happened a few months (*abl.*) before I became a consul.— 4. After Albinus and Piso had been declared consuls, Flaccus, the unsuccessful<sup>64</sup> candidate, was taunted<sup>65</sup> by his own mother.— 5. Six years<sup>66</sup> after the fall<sup>67</sup> of Veji, the city of Rome was taken by the Gauls.— 6. That day when<sup>68</sup> the news<sup>69</sup> of the loss<sup>70</sup> of the Cannæan<sup>71</sup> battle came<sup>72</sup> to the city, was far the most gloomy<sup>73</sup> ever since the building<sup>74</sup> of the city.— 7. Among these orators Servilius Glaucia was far the most wicked<sup>75</sup> since the existence of mankind, but very acute and shrewd and especially full of fun<sup>76</sup>.— 8. Cæsar was consul in the year 694 after the building of Rome.— 10. To all generals who had commanded (*præesse*) armies in the war, great rewards were given for their successful conduct of the war.— 11. After the expulsion<sup>77</sup> of the Gauls it was proposed by many, that all the citizens should move<sup>78</sup> to Veji on account of the destruction<sup>79</sup> by fire of the city of Rome.— 12. After (*postquam*) the report<sup>80</sup> on the failure<sup>81</sup> in capturing the city has been made by you, let us speak (*agere*) now<sup>82</sup> on the means<sup>83</sup> to capture it.— 13. I have prevailed upon him<sup>84</sup> to go to the country<sup>85</sup> for a few days, which unquestionably<sup>86</sup> was the best<sup>87</sup> [he could do] under the circumstances.

<sup>28</sup> Curatio. — <sup>29</sup> gloria. — <sup>30</sup> Transl.: *plurimum adjuvare*. — <sup>31</sup> administrare. — <sup>32</sup> magnus. — <sup>33</sup> Transl.: in excusing so great charges (*crimen*). — <sup>34</sup> Transl.: greater diligence ought to have been used (*uti*). — <sup>35</sup> by *esse*. — <sup>36</sup> to be most important, *maximi momenti esse ad*. — <sup>37</sup> gratiam conciliare. — <sup>38</sup> facilitas. — <sup>39</sup> munificentia. — <sup>40</sup> clementia. — <sup>41</sup> by *conspicere*. — <sup>42</sup> to cease from, *recedere ab*. — <sup>43</sup> augere. — <sup>44</sup> quantum optime potero. — <sup>45</sup> utilitates. — <sup>46</sup> Tusculanus. — <sup>47</sup> lenire. — <sup>48</sup> ægritudo. — <sup>49</sup> an agreement is made by, *convenit* (impers.) *inter*. — <sup>50</sup> to draft a treaty of peace, *pacem jungere*. — <sup>51</sup> spectare. — <sup>52</sup> tradere. — <sup>53</sup> pendere. — <sup>54</sup> opprimere. — <sup>55</sup> cadere. — <sup>56</sup> conquiescere. — <sup>57</sup> by *conficere*. — <sup>58</sup> conscribere. — <sup>59</sup> testamentum. — <sup>60</sup> to sign and seal, *obsignare*. — <sup>61</sup> tabulæ. — <sup>62</sup> pœnitere. — <sup>63</sup> Transl.: who had suffered (*ferre*) a repulse (*repulsa*). — <sup>64</sup> to taunt somebody, *exprobrare alicui*. — <sup>65</sup> sexennium (*abl.*) — <sup>66</sup> by *capere*. — <sup>67</sup> quo. — <sup>68</sup> nuntius. — <sup>69</sup> by *amittere*. — <sup>70</sup> Cannensis. — <sup>71</sup> pervenire. — <sup>72</sup> funestus. — <sup>73</sup> condere. — <sup>74</sup> improbus. — <sup>75</sup> full of fun, *ridiculus*. — <sup>76</sup> expellere. — <sup>77</sup> migrare. — <sup>78</sup> destruction by fire, *incendere ac diruere*. — <sup>79</sup> to make a report on something, *referre de aliquâ re*. — <sup>80</sup> Transl.: on not capturing the city. — <sup>81</sup> jam. — <sup>82</sup> by the gerundive of *capere*. — <sup>83</sup> to prevail on somebody, *auctorem esse alicui, ut*. — <sup>84</sup> rus. — <sup>85</sup> haud dubie. — <sup>86</sup> commodissimus.

## BOOK FIFTH.

ADVERBIAL RELATIONS.—USE OF THE TENSES.—  
USE OF THE MOODS.

## CHAPTER FIRST.

## ADVERBIAL RELATIONS.

## I. ADVERBIAL RELATIONS IN GENERAL.

§ 546. INCIDENTAL (ADVERBIAL) relations or 'CIRCUMSTANCES' are the different relations of PLACE, TIME, or MODALITY in their combination with the predicate or other members of the sentence. The language generally does not express these relations by describing them through words and phrases, but by peculiar grammatical forms to which usage has assigned the meanings of descriptive words. Such forms are applied to all phrases, predicative, objective, and attributive.\*

EXAMPLES. 1. OBJECTIVE RELATIONS OF PLACE: *Cæsar in Galliâ bellum gerit* (in denoting the PLACE of the action). *Unde profectus es?* Whence (from what PLACE) did you depart? *Longe abest*, he is far (a long WAY) distant.—ATTRIBUTIVE RELATIONS: *Pugna Cannensis*, the battle of Cannæ (being fought AT A PLACE near Cannæ). *Bellum Hispaniense*, the war in Spain (distinguished from a war against the Spaniards, which might not be carried on in Spain). Here the attributive ending *ensis* denotes local relations.—PREDICATIVE RELATIONS: *Gajus rusticatur*, Gajus lives in the country.

2. OBJECTIVE RELATIONS OF TIME: *Post diem sextum venit* (post denoting 'AT A TIME').—*Diu moratus est*, he tarried a LONG TIME.—ATTRIBUTIVE RELATIONS: *Opus crastinum*, the work of to-morrow; *labor quotidianus*, every day's work.—PREDICATIVE RELATIONS: *Veniet*, he will come; *venit*, he has come; etc.

3. OBJECTIVE RELATIONS OF MODALITY: *Diligenter laborat*, he works diligently (in a diligent MANNER). *Quanti hoc aestimas*, At what price do you value this?—ATTRIBUTIVE RELATIONS: *Bellum ferox*, a war performed in a brutal MANNER. (Here the mere form of an agreeing adjective expresses the relation of manner.) *Homo diligentior*, a man diligent in a higher degree.—PREDICATIVE RELATIONS: *Gajus lacrimans abiit*, Gajus left weeping (the participle, as accessory predicate, expressing an action coincident with his leaving, being one of the relations of modality).

§ 547. The adverbial relations are expressed by the following grammatical forms: 1) adverbs; 2) prepositional combinations; 3) the cases of the substantive, taken in an adverbial or prepositional sense; 4) the form of an accessory predicate, consisting of a participle expressed or understood, agreeing with its logical subject; 5) adjectives derived from nouns or adverbs denoting time, place, or manner; 6) the tenses of the principal predicate; 7) by clauses.

Of these forms only the ADVERBS, the cases of SUBSTANTIVES, and the ACCESSORY PREDICATES are to be considered here, the other forms being assigned to different chapters. The prepositional expressions are likewise considered here so far as they belong to the subjects treated.

\* Thus for inst. the English expressions 'in the way of', 'in the form of' are indicated by the mere ending *tim* in a great number of substantive adverbs. The ideas of CAUSE, MEANS, PRICE may be expressed by descriptive words (*causa*, *instrumentum*, *pretium*), but they are most generally indicated by mere inflectional endings, to which usage, in certain connections, has assigned these, and no other, meanings.

Rem. 1. ADVERBS are condensations of speech, combining three different elements in one word, namely 1) the RADICAL IDEA, being either an adjective, noun, verb, or preposition, which must always be expressed, and cannot be understood, \* as *amanter*, whose radical is the stem of the verb *amare*; *hinc*, whose radical is the demonstrative idea, expressed by the form-adjective *hic*; 2) the GENERAL idea of an ADVERBIAL relation (place, time, modality), which is always understood in the same way as the governing nouns of the absolute adjectives; 3) the special manner or PREPOSITIONAL RELATION specifying the general ideas of place, time, or modality, either as direction *to*, or *from* a place, or as manner *in* which, cause *for* which, or time *at* which the action is performed. These special relations are indicated by INFLECTIONAL ENDINGS (*bi*, *de*, *ter*, *e*, *o*, *tim*, and some others).

Rem. 2. The form of the accessory predicate is always a PRESENT PARTICIPLE expressed or understood, and agreeing with the noun indicating the doer of its action. This form always belongs to the relation of MODALITY, as '*Gajum cœnantem vidi*' (the same as *in cœnâ*). When the participle of the copula is to be used as accessory predicate, it is always understood, and the predicate-adjective or predicate-noun belonging to it takes its inflection, the same as in the absolutes, as: *Gajum incolumem dimisit*, he dismissed Gajus unhurt (so that he *was* unhurt; similar to the adverb '*impune*').—*Sempronius Hispaniam proconsul profectus est*, Sempronius went as proconsul to Spain, i. e. being a proconsul, in the quality of a proconsul, which we might imagine to have the force of a (not existing) adverb '*proconsuliter*'.

## II. RELATION OF PLACE.

§ 548. The relation of PLACE is expressed 1) by prepositions with substantives (B. IV., Ch. I.); 2) by the locative form-adverbs; 3) by some adverbs formed from nouns, adjectives and prepositions; 4) by the accusative and ablative cases of nouns.

Rem. 3. LOCATIVE FORM-ADVERBS are the adverbs formed from the roots of most determinative form-adjectives (§ 242 foll.) by attaching to them certain endings which, in all respects, have the nature of case-endings. Thus FOUR CASES are formed, called the first, second, third, and fourth locative cases. They denote either LOCAL DIRECTIONS (*to*, *from*, or *through*), or the BEING at a place, the place being indicated by the same pronominal expressions, as the form-adjectives from whose roots they are derived. The locative form-adverbs, like the determinative form-adjectives, are divided into adverbs of the INTERROGATIVE, DEFINITE, INDEFINITE, and RELATIVE forms (§ 241).

Rem. 4. The FIRST LOCATIVE CASE has the force of the preposition *in* with the ABLATIVE of *locus*, accompanied by that form-adjective from whose root it is derived. It expresses the place *at* or *in* which something is done, and is formed by the ending *bi*, which is attached to the root of the determinatives in the same way as the case endings of the corresponding adjectives. Thus *is* (root *i*) forms *ibi*, which means *in eo loco* AT THAT PLACE, or THERE.—The SECOND LOCATIVE CASE has the force of the preposition *ex* or *ab* (with *loco*), and is formed by attaching the ending *nde* to the root of the determinatives, as *inde* (*ex* or *ab eo loco*), thence (from that place).—The THIRD LOCATIVE CASE takes the place of the preposition *ad* or *in* with the ACCUSATIVE of *locus*, denoting direction *to*

\* The radical part of the adverb is often obscured by corruptions, which the root has suffered in the course of time, and the etymology of some of the adverbs is difficult to trace as *inde*, *unde*. But modern science has proved that ALL adverbs are derived words. Many adverbs are adapted in their forms with prepositions (*prope*, *ante*, *post*, *contra*, *circa* etc.), or are derived from them, as *extra*, *infra*, *postea*, *interea* etc. The view of some grammarians that all prepositions were originally adverbs, is erroneous.

1 See Cic. Cæc. 30, 87: *Unde utrumque declarat, et ex quo loco, et a quo loco* (i. e. from the interior or from the exterior of a place).

a place. It has the same form as the ablative neuter<sup>1</sup> of the determinative adjectives, as *eo* (*ad eum locum*), thither (to that place).—The **FOURTH LOCATIVE CASE** has the form of the ablative feminine of the adjectives, and represents the preposition *per*, or the ablative *viā*, denoting direction through, or by way of some place.

## SYNOPSIS OF THE LOCATIVE FORM-ADVERBS.

## 1) Interrogative and Relative Forms.

| ADJECTIVES.                              | LOCAL ADVERBS.  |   |  |                            |
|--|---|---|--|----------------------------|
|  | FIRST CASE.   | SECOND CASE.  | THIRD CASE.                                      | FOURTH CASE.               |
| Quis, who, which<br>Uter, which (of two) | ubi, where<br>utrobi, <sup>2</sup> in which of the two places | unde, whence<br>utrinde, from which of the two places | quo, whither<br>utro, to which of the two places | quā, which way             |
| Quicunque, whoever or whichever          | ubicunque, wherever   | undecunque, whencesoever                              | quocunque, whithersoever                         | quācunque, what way soever |
| Quisquis, whoever or whichever           | ubiqui, wherever  | undecunde, whencesoever                               | quoquo, whithersoever                            | quāquā, what way soever.   |

## 2) Definite Form.

|                |                           |                              |                          |                         |
|----------------|---------------------------|------------------------------|--------------------------|-------------------------|
| Is, that, he   | ibi, there                | inde, thence                 | eo, thither              | eā, by that way         |
| Hic, this      | hic, here                 | hinc, hence                  | huc, hither              | hāc, by this way        |
| Ille, that     | ille, <sup>3</sup> yonder | illinc, from yonder          | illuc, to yonder         | illāc, by yonder way    |
| Iste, that     | iste, yonder              | istinc, der place            | istuc, place             | istāc, way              |
| Idem, the same | ibidem, at the same place | indidem, from the same place | eodem, to the same place | eādem, by the same way. |

## 3) Indefinite Form.

|                                     |                                  |                           |                                 |                                  |
|-------------------------------------|----------------------------------|---------------------------|---------------------------------|----------------------------------|
| Quis, some                          | enbi, <sup>4</sup> some          | cunde, from some          | quo, to some                    | quā, by some                     |
| Aliquis, some                       | alicubi, where                   | alicunde, place           | aliquo, place                   | aliquā, way                      |
| Quispiam, some                      | uspiam, some-where               | —                         | — <sup>5</sup>                  | —                                |
| Quisquam, any                       | usquam, <sup>6</sup> any-where   | —                         | quoquam, to any place           | quāquam, by any way              |
| Quisque, each                       | ubique, <sup>7</sup> every-where | undique, from every place | —                               | quāque (usque quāque), every way |
| Quivis, <sup>8</sup> every possible | ubivis, in every possible place  | —                         | quovis, to every possible place | quāvis, by every possible way    |
| Uterque, both, each of two          | utrobique, in both places        | utrimque, from both sides | utroque, to both sides          | —                                |
| Alius, another                      | alibi (alias) elsewhere          | aliunde, from elsewhere   | alio, to another place          | aliā (rare) by another way.      |

<sup>1</sup> There is no doubt that this case was not an ablative originally. It had most probably the same form as the dative ending of nouns (*ibi*), which probably had originally a locative meaning, and the final *i* of which was dropped in the course of time.—<sup>2</sup> or *utrobi*. The locative cases of *uter* are either anteclassical, or postclassical; but *utrobi* was used in the official language of the Pretorian edict.—<sup>3</sup> the four adverbial cases of *ille* and *iste* (*ille*, *illinc* etc.) are chiefly anteclassical.—<sup>4</sup> The forms *cubi* and *cunde* are only used after *si* or *ne*, being written in one word with these conjunctions (*sicubi*, *necunde*).—<sup>5</sup> *quicquam* is anteclassical.—<sup>6</sup> Out of *usquam* the negative *usquāquam*, nowhere, is formed, which replaces the first locative case of *ubique*.—<sup>7</sup> another form of the first locative case of *quisque* is *usque* (throughout), which generally is used to define the prepositions *ad* or *in*, and in connection with other locative adverbs. See Obs. 8.—<sup>8</sup> The locative cases of *quilibet*, and *uterlibet* are extremely rare; of *utervis* no locative cases are in use.

## REMARKS ON THE SYNOPSIS.

Obs. 1. According to the common theory the local adverbs of the first and second cases are considered as compounds of *ibi*, *ubi*, *inde* and *unde*. But it is evident that *bi* and *nde* are locative endings, added in the same way to the stem of the demonstrative *is*, as to those of all the other determinatives.

Obs. 2. Those determinatives which are formed by suffixes (*idem*, *quicunque*, *quisque* etc.) take the locative case-endings before the suffix, the same as the regular case-endings in the corresponding adjectives, as: *ibidem* (from *idem*), *ubique* (instead of *cubique*, from *quisque*).

Obs. 3. The interrogative root *cu* drops the *c* in the first and second locative cases (*ubi*, *unde*, *ubique* instead of *cubi*, *cunde*, *cubique*), but not in *aliquis* and its collateral form *quis* (some), which make *alicubi*, *alicunde*, *cubi*, *cunde*.

Obs. 4. In the definite form *hic* (instead of *hi-ce*) forms its first and second locative cases *hic* and *hinc* (contracted, probably, from *hibi-ce* and *hinde-ce*); the third locative case being *hūc* (which corresponds to the dative *huic* in the same way as *eo* to the assumed dative *eōi*). Thus are formed the locative cases of *ille* and *iste* which, in anteclassical language had the collateral forms *illic* and *istic*.

Obs. 5. *Quisquam* forms not *ubiquam*, but *usquam* which, probably, is corrupted from *ubiquam*, by dropping the *i*, and changing *b* into *s*, according to the analogy of *asportāre* and *ostendere* (inst. of *asportāre*, *ostendere*).

Obs. 6. The adverbs formed with suffixes generally change the ending *nde* of the second case into *ndi*, as *undique*, *indidem* (instead of *undecque*, *indedem*). *Alius*, in the second case, makes *aliunde* (inst. of *aliunde*) according to the analogy of *audiunt*, in place of *audint*.

Obs. 7. It is probable that the locative ending *i* attached to the name of cities, and a few other nouns (*domi*, *ruri*, *humī*), is nothing but the ending *bi* of the first locative case. After dropping *b*, the *i*, in names of cities of the first declension, has been contracted with the characteristic *a* in the same manner as the genitive-ending *i*, and both forms became thus identical.

Obs. 8. Several prepositions (*ad*, *inter*, *præter*, *propter*, *circa*, *post*, *ante*, *tenus*, *versus*), and the semi-preposition *usque*, enter compositions with the third or fourth locative cases, which are either prefixed or suffixed to them. The locative cases, in this connection, partly retain their locative meaning, partly express the relations of time, modality, and cause. Thus are formed the conjunction and adverb *quoad* (as far), and the adverbs *hucusque*, *eousque*, *hactenus*, *eatennis* (thus far), *aliquatenus* (in some degree), *quousque* and *quatenus* (how far), *quocirca* and *quapropter* (from what reason), *præterea* (besides), *interea* (meanwhile), *propterea* (therefore), *postea* and *posthac* (afterwards), *antea* and *antehac* (before this time), *quorsum* (for what purpose; inst. of *quoversum*), *alorsum* and *horsum* (both antec.), *quoquoversus* (in whatever direction).

Rem. 5. In regard to the syntactical use of the locative form-adverbs the following rules should be noticed:

1. The locative cases of *quis* are used both in INTERROGATIVE sentences (§ 421), and in relative clauses. The cases of *quicunque* and *quisquis* belong exclusively to the RELATIVE from (see p. 497, foll.). The cases of *uter* are confined to anteclassical language.

2. In regard to the RELATIVE use of the local adverbs, the rules for relative ADJECTIVES (§§ 367, 368, 369) must be applied as far as they are applicable to adverbs. If they have a local adverb of the definite form (*ibi*, *unde*, *eo*, *ea*) for an antecedent, their cases need not agree with each other, but the relative takes the case required by the construction of its own clause, the same as in relative adjectives (§ 368), as: *Dejectus nullo modo esse potest inde ubi non fuit*, he can by no means have been ejected from a place (thence) where he has not been. Cic. *Cac.* 12 (see Ex. 1-6).

3. In the DEFINITE form the cases of *ille* and *iste* are mostly anteclassical, rarely occurring in classical language, and never if restricted by a relative adverb, as: *Eo redierunt unde profecti erant* (not *illuc* or *istuc*), they returned to the place (thither) whence they had come.

4. The use of the four locative cases follows in every respect the rules on those prepositions whose place they take. This usage often differs from the English idiom:

(a) We often use the equivalents of the FIRST locative case where the Latin uses those of the SECOND. This is especially the case when, according to § 443, No. 3, the action is represented as occurring at a place, but with an outward direction. Wherever, in this instance, the Latin must use *ex* with the ablative of a noun as an equivalent of the English *on* or *at*, the SECOND locative case must be used if the place is indicated by an adverb, as: *Unde potissimum ordiar?* Where had I better begin? Cic. *Rosc. Am.* 1, 1.—*Sicilia undique cincta periculis est*, Sicily is surrounded everywhere with dangers. Cic. *Leg. Man.* 11 (d. e. dangers threaten from all points).—*Multis utrimque interfectis*, many having been killed on both sides (the killing being an action done at a place, but with outward direction). Cæs. B. G. 7, 42. (Ex. 7-11).

(b) Verbs which require the preposition *ad* or *in* with the accusative, must be construed with the THIRD locative case, although we use in English the equivalents of the FIRST (§ 427, R. 11; § 450, R. 67). Here belong the verbs *pertinere* (to belong), *accedere*, *advenire*, *pervenire* (to arrive), *infringere*, *incurrere* (to enter), *speculare* (to look at), *convenire* (to assemble in), *imponere* and *injicere* (to place in), as: *Hæc eo (huc) non pertinent*, this does not belong there (here)—*Cum eo (not ibi) advenirent*, when they arrived there.—*Eo principes conveniunt*, there the chiefs assembled.—*Deprehensis navibus, atque eo militibus injectis*, after he had seized the ships, and had placed the soldiers there. Cæs. B. G. 7, 58.—*Hoc longe alio spectabat*, this aimed at something very different. Nep. 2, 6 (Ex. 12-15).—Instead of the lacking third case of *nullus*, the first case *nusquam* is used, mostly with *discedere* and *dimittere*: *Theophani facile persuasi, nihil esse melius quam illum nusquam discedere* (not to depart for any place). Cic. Att. 5, 11, 3.—*Quum Pompæjus nusquam dimittatur* (is not allowed to go anywhere). Ib. 5, 21, 3. So '*nec usquam discedebam*', instead of '*nec quouquam*'. Cic. Phil. 1, 1.

(c) The Latin uses the FOURTH CASE instead of the English first case (*quā* etc., in the meaning '*where*') if the place is not conceived as a definite and constant point, but as varying, or as an line or space: Ut ei licet vagari *quā* (not *ubi*) velit (to roam *where* he likes), Cic. Or. I. 16.—Spatium *quā* flumen intermittit (the space *where* the river does not run), Cæs. B. G. I. 38. Hence the north (south etc.) side of a house = domus *quā* (not *ubi*) ad septentrionem vergit (literally: the house on which side it faces the north), Comp. p. 221, Oms. S. Ex. 16. 47. 18.

(c) The local adverbs, like the prepositions whose exponents they are, very frequently occur in the relations of time and modality, and even as completing objects of verbs, as: *Huc eo credidi* etc. to this (thing), subject etc. It must be added that: — *Nescio quo hinc perierim*, I do not know *where* this belongs (what you are driving at). The third case of *is* and *quod* has especially often the meaning of a conceived act, point, or of DEGREE and INTENSITY, in which instance it takes a Taut.-clause with *ut*, and sometimes a PARTITIVE GENITIVE (§ 312, as: *Res publica eo iam crevit ut* magnitude laboret sua, the republic has now grown to a *point* (degree) that it has to struggle with its own greatness. Liv. pref. — *Eo insolentiae furorisque processit ut* . . . he proceeded to such a *d-ops* of insolence and fury that etc. Plin. Pan. 16. See Ex. 19. 20)

(c) The third locative case of the form-adverbs must be carefully distinguished from the ablative neuter of absolutely used form-adjectives. Often the connection alone can show in which sense these forms are to be taken. Thus *eo* frequently has the meaning *in eo loco*, or *in ea conditione*, in connections where an ablative is required. It must, then, not be taken for a locative adverb, as: *Ros erat nostra eo iam facti ut* etc. Our affairs were already in such a state that etc. (Cic. *Sest.*, 15, 68). In the same manner the locative *eo* must be distinguished from *eo* used as ablative of difference (*eo magis* etc. See p. 751, 5), and from *eo* used as ablative of means, as *Eo rejicebantur, by this (thereby)* they were repulsed. Liv. 8, 8, 1. See § 553, obs. 2.

1. Paesopolis fuit haud procul *inde ubi* nunc Neapolis sita est. Liv. 8. 42. — 2. Neque enim *inde* venit Brutus *unde* malens, neque diu abierat. Cic. Att. 13. 30. — 3. Dedit Pompejus, non recusare se<sup>4</sup> quin nullus usu<sup>5</sup> imperator existimaretur, si sine maximo detrimento legiones Caesaris esse recepissent<sup>6</sup> *inde quo* temere<sup>7</sup> essent progressae. Cas. B. C. 45. — 4. Nemo est quin<sup>8</sup> *ubique* esset *ubi ubi* est esse malit. Cic. Fam. 6. 1. — 5. *Rem. 6.* The other adverbs applied to relations of place are :

1) Some adverbs derived from, or compounded with, nouns, as

|  |      |                              |                               |
|--|------|------------------------------|-------------------------------|
| caelitus, (instead of <i>de caelo</i> ), | from | foras and foris,†            | out of doors, out of heaven.* |
| funditus, from the bottom, thoroughly.   |      | obviam,‡                     | on the way.                   |
| radicitus, from the root, thoroughly,    |      | peregre (from <i>ager</i> ), | abroad.                       |
| utterly.                                 |      |                              |                               |

2) Local prepositions, used with the force of adverbs, as:

|  |  |
|--|--|
| adversus (adversum) <i>opposite</i> (rare).                      | infra, <i>below</i> (rare).                            |
| ante, <i>before, in front</i> (rare).                            | intra, <i>within</i> (rare).                           |
| circa, circum and circiter, <i>around, all round</i> .           | juxta, <i>alongside, near by</i> (rare).               |
| citra, <i>on this side</i> .                                     | pone, <i>behind</i> (rare).                            |
| contra, <i>opposite</i> (figuratively: <i>on the contrary</i> ). | prope, <i>near, not far</i> .                          |
| coram, <i>in his</i> (my, thy etc.) <i>presence</i> .            | subter, <i>beneath</i> (rare).                         |
| extra, <i>without</i> (outside).                                 | supra, <i>on the upper side, on top, above</i> (rare). |
|  | ultra, <i>beyond, further</i> .                        |

3) A number of adverbs, derived from prepositional, verbal or obsolete roots which are comprised under the name of **ADVERBIAL PARTICLES**:

|   |  |
|---|--|
| <p> <i>citro, on this side.</i><br/> <i>desuper, from above.</i><br/> <i>exadversum, over against, opposite.</i><br/> <i>extrinsecus, from without.</i><br/> <i>insuper, on top (besides).</i><br/> <i>intrinsecus, from within (rare).</i><br/> <i>intro, inside.</i><br/> <i>introrsum, inward, to the inside.</i> </p> | <p> <i>intus, within.</i><br/> <i>porro, forward, further on.</i><br/> <i>procul, far, at a distance.</i><br/> <i>protenus, onward, forthwith.</i><br/> <i>seorsum, separate, apart.</i><br/> <i>sursum, upward.</i><br/> <i>ultra, beyond.</i> </p> |
|---|--|

*Rem. 7.* For the AMOUNT of the DIMENSIONS of objects (*i.e.* the distance in space, or the measure in length etc.), the following grammatical forms are used:

1. If the amount of the measure depends on one of the nouns or adjectives expressing dimensions (*longitudo* etc., *longus* etc.), the rules given for the construction of these nouns or adjectives must be applied (see § 498).

2. If the amount of the measure refers to the idea of DISTANCE, it is expressed either (a) in the form of an ATTRIBUTE made dependent on one of the general nouns expressing distance, as *intervallum*, *spatium*, *iter* (length of a journey, march or road), or (b) in the form of an OBJECT directly dependent on the governing verb. In the former instance the nouns denoting the distance (*intervallum* etc.), and in the latter instance

<sup>1</sup> To intend to go, to be bound for a place.—<sup>2</sup> early.—<sup>3</sup> *quā* is used instead of *ut* ed.; hence it is followed by the subjunctive.—<sup>4</sup> accessory predicate: *singly*.—<sup>5</sup> *carrus*, a cart.—<sup>6</sup> *duci*, to be driven.—<sup>7</sup> they (people) report that.—<sup>8</sup> was likely to pursue.—<sup>9</sup> booty.—<sup>10</sup> the acropolis.—<sup>11</sup> south.—<sup>12</sup> to carry.—<sup>13</sup> prophecy.

\* The termination *itus* of substantive adverbs is originally the perfect participle of *ire*.

† *Foras* and *foris* are the dative and accusative plural of the obsolete noun *fora*. *Foras* is used when the construction would require the name of a city in the accusative; else *foris* is used.

† *Obvium* in classical prose occurs only in combination with verbs of motion.

the measures themselves are placed either in the ACCUSATIVE or in the ABLATIVE case, as:

*Castra mille passuum spatia (or spatium) ab oppido absunt*, the camp is at a distance of thousand paces (miles) from the town.—*Silva ab oppido tribus milibus (or tria milia) passuum ab oppido distat*, the forest is three thousand paces (miles) distant from the town.

If the distance is not determined by definite numeral expressions, the attributive phrase (in the first case) is an ADJECTIVE phrase, and the objective phrase (in the second case) is formed by an ADVERB or one of the QUANTITATIVE form-adjectives. See OBS. 7.

The measure of distance may also assume the form of a SUBJECT. See OBS. 6.

OBS. 1. The measure-units employed here are those enumerated § 493, R. 101, to which we must add for the measurement of larger distances the 'day' (*diēs*), as a measure-unit of the length of a road (day's journey), generally in connection with *iter*, as *iter diū*, one day's journey; *bidui (tridui) iter*, a two days' (three days' journey); *decem diūrum iter*, a ten days' journey. The measure-unit aside from the expression *mille passus* is also designated by the expression *stadium* or *stadion*, as *Procul a Roma stadium*, a Roman stadium, which is twenty miles from Rome by the Salarian road (*diariter*); at the twenty-fourth milestone, Varro R. R. 3, 2.—*Intra vicesimum lapidem*, within twenty miles. Liv. 5, 4.—*Quum pedites prope ripam Anienis ad bellum militarum castris*, when the Pedites were encamping near the bank of the Anio, three miles (from the city). Cic. Brut. 14.

OBS. 2. In the use of the ACCUSATIVE or ABLATIVE of distance a distinction must be made (a) whether the distance is conceived as a SIMPLE EXTENT or length, as for inst. the length of a journey, or of a road; or (b) as the distance of two points from each other, or as the distance of an action from a given point. In the former case we use always the ACCUSATIVE; in the last case either the ABLATIVE or the ACCUSATIVE may be employed. The ACCUSATIVE of distance must be considered as a COMPLETING object of the idea of extent UNDERSTOOD (being nearest related to the completing accusative after *longus, latus*, etc. § 498). The nature of the ABLATIVE of distance is that of an ablativus of DIFFERENCE between the two points. This ablativus in this, as in any other, relation is originally an exponent of the preposition 'by'. See § 311.

OBS. 3. The ACCUSATIVE of distance is especially used as object of the verbs of MOTION (*proficisci, procedere, ambulare*, etc.) and of the verbs denoting EXTENT, as *patere, pertinere* (to extend), as: *Ex die decem milia passuum (or decem millium passuum spatium) profecti sumus*, On that day we travelled ten miles.—*Ora Germaniae circa octingenta milia passuum patet (or pertinet)* the coast of Germany extends about 800 miles. See Ex. 1 5.

OBS. 4. Either the ACCUSATIVE or the ABLATIVE is used as object of the verbs expressing distance or situation, especially of *abesse, distare, esse* (with *ab, inter, ultra, citra*, denoting the point of distance; see § 440): *Roma sedecim milibus (or millia) passuum a mari abest (distat, est)*, Rome is sixteen miles distant from the sea. See Ex. 6-11.—In this construction the distance is sometimes placed in the GENITIVE which case must be considered as an attribute dependent on the idea of *spatium, intercalum, or iter* understood, as: *Nos in castra properabimus quae aberant bidui (i. e. iter)*, we hurried to the camp which was at the distance of a two days' journey. Cic. Att. 5, 16. See Cic. Att. 3, 17.

OBS. 5. When the governing verb contains an ACTION which is represented to occur at a distance from some point, the object expressing the distance is generally in the ABLATIVE, less frequently in the ACCUSATIVE, as: *Oppidum condiderunt quinque milibus passuum (or quinque millium passuum intervallo)*; or, less frequently, *quinque milia passuum ab Aquileia*, they built a town (at a distance of) five miles from Aquileia. See Ex. 12-17. If in this instance the point of distance is not added, the ablativus of distance is sometimes replaced by a prepositional object with *ab* (Ex. 18). See § 440, R. 47.

OBS. 6. The distance may also be expressed in the form of a SUBJECT-NOMINATIVE, with *esse* or *interesse* as predicate, the points of distance being designated by the prepositions *ab...a*, or by *inter*, as *Vicies centum milia stadiorum sunt a turbido (caelo) ad lunam*, there are two millions of stadia from the atmosphere (of the earth) to the moon. Plin. H. N. 2, 21. See Ex. 19.

OBS. 7. When the amount of distance is expressed indefinitely, the following forms are used:

1) ADVERBS OF PLACE, as *procul, longe, prope* with the preposition *ab* or local adverbs of the second locative case, as *Postero die procul a castris hostes in collibus considerunt*, on

the next day the enemy took position on the hills, far from the camp. Cæs. B. G. 5, 17.—*Procul alicunde*, far from any place. Cic. Verr. 2, 2, 20.—*Quam longe est hinc in saltum Gallicanum*, how far is it from here to the Gallican forest? Cic. Quinct. 25.—*Quum esset bellum tam prope a Sicilia*, when there was a war at such a little distance from Sicily. Cic. Verr. 2, 5, 2.—The adverb *longe* sometimes, but rarely, is used with the force of *spatio* or *intervallo*, followed by a definite measure in the accusative, as: *Vercingetorix locum castris delegit ab Avarico longe milia passuum sedecim*, V. selected a point sixteen miles distant from Avaricum for a camp. Cæs. B. G. 7, 16.

2) QUANTITATIVE FORM-ADJECTIVES (almost always in the accusative), as *tantum, quantum, tantundem, multum* (rarely *multo*): *Veteres nescierunt quantum a terrâ sol abesset*, the ancients did not know how much the sun is distant from the earth (did not know the distance of, etc.). See Ex. 17, 20.

3) The ABLATIVE (less frequently the accusative) of ATTRIBUTIVE adjective phrases denoting a comparative measure, as: *Hic locus aequo fere spatio ab utrisque castris aberat*, this place was about at an equal distance (equidistant) from both camps. Cæs. B. G. 1, 43. See Ex. 20, 21.—If the measure is a proportional one (by *pars* with an ordinal), the phrase must always be in the ablativus, as *Mercurius quartâ parte celi a sole abest*, Mercury is from the sun at a distance of one fourth of the heavens. Plin. H. N. 2, 6.

OBS. 8. To the local relation belongs the phrase 'to border on', and the phrases expressing direction towards the points of the compass (south side, northern aspect, etc.). 'To border on' is generally expressed by *attingere* with an accusative, or by *adjacere* with a dative or the preposition *ad*; also by *contineri*, when the borders on all sides of a country are given. In regard to nations the phrases '*finitimum, confinem, vicinum esse*' are employed. See Ex. 23-25. If a locality is designated by its direction towards the points of the compass, objective phrases are used with the verb *speculare* or *vergere*, construed with an accusative after *in* or *ad*, as: *Ora Germaniae in (ad) septentrionem spectat (or vergit)*, the coast of Germany faces the north. *Mons quâ ad occidentem solem vergit*, the western slope of a mountain. Ex. 25, 26.

1. Nemo potest biduo septingenta milia passuum ambulare. Cic. Quinct. 25.—2. Ei obviam proce-seram<sup>1</sup> milia passuum centum. Cic. Phil. 7 9.—3. Hercyniae<sup>2</sup> silvæ latitudo novem diērum iter patet. Cæs. B. G. 6, 24.—4. Hoc latus insulae pertinet circiter milia passuum quingenta. Cæs. B. G. 5, 13.—5. Castra hostium amplius millibus passuum octo in latitudinem patēbant. Cæs. B. G. 2, 7.—6. Zuma quinque diērum iter ab Carthagine abest. Liv. 30, 39.—7. Ventidius bidui spatio ab Antonio abest. Planc. Cic. Fam. 9, 17.—8. Is locus est citra Lencadem stadia<sup>3</sup> centum viginti. Cic. Fam. 16, 2.—9. Teanum abest a Larino xviii milia passuum. Cic. Clu. 9.—10. Æsculapii templum V millibus passuum ab Epidauro distat. Liv. 45, 28.—11. Cassivellauni fluis a maritimis civitatibus flumen dividit, quod appellatur Tamesis<sup>4</sup>, a mari circiter milia<sup>5</sup> passuum octoginta. Cæs. B. G. 5, 11.—12. Ariovistus eodem castra promovit<sup>6</sup>, et millibus passuum sexa Caesaris castris sub monte consedit<sup>7</sup>. Cæs. B. G. 1, 48.—13. Caesar millibus passuum duobus ultra eum castra fecit. Ib.—14. Juba sex millium passuum intervallo consedit. Cæs. B. G. 2, 38.—15. Hannibal quind-cim fere millium spatio castra ab Tarento posuit. Liv. 25, 9.—16. Quinctius quinque milia<sup>8</sup> ab Thebis posuit castra. Liv. 33, 1.—17. Lacetani oppidum longum, (scilicet) in latitudinem haudquaquam<sup>9</sup> tantundem patens habebant. Quadringentos inde fere passus constituit (to place) signa (the standards). Ib. 34, 20.—18. Hostes ad castra Caesaris contendērunt<sup>10</sup>, et ab millibus passuum minus (§ 312, R. 14) duobus castra posuerunt. Cæs. B. G. 2, 7.—19. Inter novissimum<sup>11</sup> agmen et nostrum primum<sup>12</sup> non amplius quinque aut senis millibus passuum intererat<sup>13</sup>. Ib. 1, 15.—20. Caesar fossam<sup>14</sup> pedum viginti directis lateribus<sup>15</sup> duxit<sup>16</sup>, ut ejus fossæ solum<sup>17</sup> tantundem patēret quantum<sup>18</sup> summæ fossæ<sup>19</sup> labra<sup>20</sup> distarent. Ib. 7, 72.—21. Perfacile fuit, cum relique legiones magnum spatium abessent, primam legionem eub sarcinis<sup>21</sup> adorfri. Ib. 2, 17.—22. Prima acies hastati<sup>22</sup> erant, manipuli<sup>23</sup> quinde-cim, distantes inter se modicum spatium. Liv. 8, 8.—23. Caesar Labienum cum legionibus tribus in eas parīs quæ Menapios<sup>24</sup> adtingunt proficisci jubet. Cæs. B. G. 6, 33.—24. Totâ regione quâ Tuscan<sup>25</sup> ager Romano adjacet, tuta omnia fuere. Liv. 2, 49.—25. Hæc gens jacet supra Ciliciam, confinis Cappadociae. Nep. Dat. 4, 1.—26. Britan-

<sup>1</sup> To travel (proceed).—<sup>2</sup> the Hercynian forest.—<sup>3</sup> a stadium was 125 Roman feet.—<sup>4</sup> the Thames.—<sup>5</sup> the accusative is dependent on *dividit*: 'separates at a distance of'.—<sup>6</sup> to remove.—<sup>7</sup> *considerare*, to take position.—<sup>8</sup> supply *passuum*, which is frequently understood.—<sup>9</sup> *haudquaquam tantundem*, by no means as much (i. e. considerably less).—<sup>10</sup> to march.—<sup>11</sup> *novissimum agmen*, the rear-guard.—<sup>12</sup> van-guard, supply *agmen*.—<sup>13</sup> *non amplius* is the subject of *intererat*: There was no more distance between...than.—<sup>14</sup> the top of the canal, § 372, R. 31.—<sup>15</sup> *labrum*, lip (here edge).—<sup>16</sup> marching with their baggage.—<sup>17</sup> the hastati, the first division in every legion.—<sup>18</sup> squads.—<sup>19</sup> the country of the Menapii. See § 453, R. 76.—<sup>20</sup> Tuscan.

nix alter angulus<sup>1</sup> qui est ad Cantium<sup>2</sup>, ad orientem solem<sup>3</sup>, inferior ad meridiem<sup>4</sup> spectat; alter vergit ad Hispaniam atque occidentem solem<sup>5</sup>. Cæs. B. G. 5, 13.—27. Aquitania spectat inter occasum solis<sup>6</sup> et septentriones. Ib. 1, 1.

### III. RELATION OF TIME.

§ 549. The relation of TIME is expressed 1) by prepositions (§ 424, R. 1. 2); 2) by adverbs of time; 3) by substantives or attributive phrases in the accusative or ablative; 4) by clauses introduced by relatives or by conjunctions (see B. VI.).

Rem. 8. The adverbs of time are 1) temporal form-adverbs, *i. e.* such as correspond in form to the form-adjectives and locative form-adverbs (R. 3); 2) adverbs derived from substantives, or adjectives; 3) adverbs of various formation, comprised under the name of adverbial Time-particles.

Obs. The temporal form-adverbs are more irregular in their forms than the local form-adverbs (R. 4), being either borrowed from these (as *hinc, inde*), or having a peculiar form of their own, preserving, however, the roots of the form-adjectives from which they are derived. They mostly correspond to the first locative case, answering the question 'when' (analogous to 'where'). But a few have the formation of the other cases (*quoad, quousque, eousque, quatenus, hactenus*).

Rem. 9. To the interrogative form of the determinatives, numerals, and quantitatives (§§ 258, 261) belong:

*quando*, when; *quoad, quousque* and *quatenus*, up to what time; *quoties*, how often; *quandiu*, how long. There is no form analogous to the second locative case, which is expressed prepositionally (ex quo tempore, from or since which time).

To the relative form belong:

*quandocumque*, whenever; *quoad*, as far as; *quoties* and *quandiu*, used as correlatives in the meaning 'as' (see § 369).

To the definite form belong:

1) corresponding to the first locative case of *hic, is*, and *idem*, but without showing the demonstrative roots: *Nunc*, now\* (corresponding to *hic*); *tum* (or *tunc*), then (corresponding to *ibi*); *simul*, at the same time (corresponding to *ibidem*); 2) with the form of the second locative case of *hic* and *is*: *hinc*, then (silver Latinity); *deinde* and *inde* (*dein*), then, after this, later; *abhinc*, ago; *dehinc*, henceforth; 3) according to the formation of the third locative case of *hic* and *is*: *adhuc*, up to this time, still, as yet; *huc* (rare) up to this time; *hucusque* (post-classical), up to this time; *eousque*, up to that time; 4) with the form of the fourth locative case; *hactenus*, thus far, and *undē*, at the same time (with the meaning of *simul*); 5) the numeral *toties* (so often), and all the cardinal and ordinal adverbs; 6) the quantitative *tandiu*, so long.

To the indefinite form belong:

1) corresponding to the first locative case of *quis, aliquis, quidam, quisquam, quisque*, and *alius*; *Quando*, *aliquando*, and *quondam*, at some time, formerly, once; *unquam*, ever, and *nunquam*, never (*nonnunquam*, sometimes; *nunquam non*, always); *usque* (rare), all the time [semper, always]; *alias* (rare), at another time; 2) the numerals and quantitatives *aliquoties*, several times; *plerumque*, mostly, generally; *aliquandiu*, for some time; *postremo*, at last. Here belong, according to their sense: *sæpe*, often, and *identidem* (from the demonstrative *idem*), repeatedly.

Obs. 1. The English interrogative 'when' is expressed by *quando* both in interrogative sentences, and in interrogative clauses (§ 422), as *Quando me ista curasse aut cogitasse arbitramini?* When do you believe me to have cared for, or to have thought of, these things? Cic. Or. 1, 22, 102.—*Non intelligitur quando obrepit senectus*, it is not noticed when (at what time) old age creeps upon us. Cic. Sen. 11. As a pure relative, the English

<sup>1</sup> angle.—<sup>2</sup> the modern Kent.—<sup>3</sup> *oriens sol*, east.—<sup>4</sup> south.—<sup>5</sup> *occidens sol*, west.—<sup>6</sup> *inter occasum solis et septentriones*, the north-west.

\* Just now = *nunc ipsum* (Cic. Att. 10, 4, 10; 12, 16; 12, 40, 8) = *modo* (p. 225, R. 11) if the time is just past. For *jam* = *nunc*, see p. 224, Obs. 2. *Nunc* often refers to past time (= *tum*).—† *Ibi*, sometimes = *tum* (Liv. 37, 14).—§ 'Still', referring to present time, is also expressed by *etiamnunc* (*etiamnum*, Cic. Fam. 10, 10); if referring to past time, by *etiamtum* (p. 316, Obs. 1). 'Still' before comparatives = *etiam* (still larger, *etiam maior*); as adversative adverb = *tamen*.—‡ *Quando*, denoting 'at some time', is used after *ne, si*, etc. instead of *aliquando*. See P. I., p. 259, R. 4.

'when' is rendered by the ablative of the relative adjective, or by the conjunction *quum*, as *Fuit tempus, quum* (or *quo*) *Germanos Galli virtute superarent*, there was a time when the Gauls exceeded the Germans in bravery. Cæs. B. G. 6, 24.\*

Obs. 2. *Aliquando* and *quondam* both correspond to the English 'once', meaning 'at some time'. The English 'once' is rendered 1) by the numeral adverb *semel* if it means 'one' (*i. e.* a single) time, as *Non semel, sed sæpe*, not once, but often. Cic. Att. 1, 19, 7.—2) It is rendered by the temporal adverb *olim* when it means either 'once upon a time', or 'in former times', 'of old' (used of an indefinite period of time past), as *Ut olim fieri solēbat*, as it was once (formerly) the custom. Cic. Fam. 9, 16, 16.—3) *Quondam* is used either as synonym of *olim*, or of single acts that happened at a former CERTAIN, but not specified time, as *Populus Romanus quondam* (the same as *olim*) *in hostis lenissimus existimabatur*, the R. P. was once thought to be most lenient toward foes. Cic. Rosc. Am. 53.—*Rediēre quondam* (not *olim*) *remissi a Pyrrho sine pretio capti*, once (at a certain former time) those that were captured by Pyrrhus returned, being sent back without ransom. Liv. 22, 59.—4) *Aliquando* is used of a time merely supposed, or entirely uncertain, future, present or past, and may be rendered according to the connection by *once, at one time, or another, at some time, sometimes* (as synonym of *interdum*) or by *occasionally*: *Ille cessat aliquando in ille dies*, that day will once break. Cic. Mil. 26, 69.—*Quis illi ait aliquando* *Athenienses abstraxisset aliquando*, I asked whether he had heard these things at some time (once) from some Athenian. Cic. Ac. 2, 4, 11.—*Si homines possis docendo aliquando* *meliores facere, cur non?* if you could make men better by sometimes (occasionally) teaching them something, why would you not? Cic. Or. 42, 144. In none of these examples either *quondam* or *olim* could be used. Sometimes, indeed, *aliquando* and *quondam* are used with the force of *olim*, and *olim* is used of a future time. But such usages are rare, or belong to poetry, or to non-classical literature.

Obs. 3. *Tum* (*tunc*), *deinde*, *inde*, may all three be rendered by 'then'. *Tum* is used 1) of events that occurred at some former time specified, being opposite to *nunc*, as: *qui tum eos agros incolēbant*, those who then (at that time) inhabited those lands, Cic. Rep. 2, 2; 2) it connects two past actions with each other in regard to the time of their occurrence. The action introduced may be conceived as coincident with the one referred to by *tum*, or as immediately subsequent upon it: 'then, thereupon, at that moment', as *Ila conflixerunt ut aliquandiu in neutram partem inclinarent acies*, They fought so that for some time the ranks yielded on neither side. Then (thereupon, at that moment) the consul ordered an advance of the cavalry in order to (conatur) throw the foremost troops of the enemy into disorder. Liv. 7, 33. *Deinde* always denotes an action which follows another, and can never replace *tum* in the case No. 1. But in the second meaning the two adverbs may interchange, except if *tum*, on account of its double meaning would make the sense doubtful, as: *Gabinium, horum scelerum machinatorum, statim ad me vocari*; *deinde* (not *tum*) *arcessitur Statilius*, I immediately called Gabinius the mover of these crimes, to my house; then (afterwards) Statilius was summoned. Cic. Cat. 3, 3. Frequently the two adverbs vary with each other, as *Tum Scipio dixit...*, *deinde Tiberius*. Cic. Rep. 9, 10.—Both *inde* and *hic* are sometimes (but rarely) used in the place of *deinde*.—*Inde* is also used in the place of 'ex eo tempore', often opposed to *ad*, as: *Inde tres menses ad Idus Martias sunt*, from that time there are three months to the Ides of March. Liv. 39, 52. For the connection of *inde* with *ad* see § 442.†

Obs. 4. *Abhinc* and *dehinc* (the latter not occurring in Cicero or Cæsar), have opposite significations, *abhinc* meaning 'ago' (from the time of the speaker backward), and *dehinc* 'hence', 'henceforth' (from the time of the speaker forward). *Abhinc* is always used in connection with a numeral expression of time in the accusative or ablative; while *dehinc* refers to an indefinite terminus and stands without any other object, as: *Horum pater abhinc duo et viginti annos est mortuus*, the father of these died 22 years ago (has been dead these 22 years). Cic. Verr. 2, 9.—*Dehinc erit verax tibi*, henceforth (in the future) he will be truthful to thee. Plaut. Pæn. 1, 2, 161. *Abhinc* must be distinguished from the temporal adverb *ante* which may refer both to the time of the speaker, and to the time spoken of. See R. 13, obs. 1, 2.

Obs. 5. The English adverbs *lastly, at last, at length, finally* are expressed by *postremo, denique, or tandem*. *Tandem* denotes that a state of long duration is ended by some event (at length, at last); *denique* (lastly, finally) expresses the last in a series of events. *Postremo* has the force of either, but is distinguished from *tandem*, by always requiring the previous state which is represented as ended, to be expressly mentioned: *Tandem* (not *denique* or *postremo*) *coquasti qui sim*, at length you know who I am. Ter. Andr. 3, 4, 7.—*Pompejus primum vos docuit meis consiliis rempublicam esse servatam; tum posuit, me*

\* For *quando* as temporal and causal conjunction, see p. 636, Obs. 4; p. 687, Obs. 13.—† *Tum* (similarly to *hic*) sometimes refers to a time expressed in the subsequent sentence (Cæs. B. C. 1, 80).

a senātu etc. rogārī; denique ipse vos pro salute (meā) rogāvit. Pompējus first showed you that by my counsels the republic has been saved; then he put it that I was wanted by the Senate etc.; lastly (finally) he asked you himself for the happiness of my life. Cic. P. R. Qu. 7, 16.—Cum ad regem pervenissent legātī, per multos dies conveniendi ejus potestas non est facta; postrēmo cum jam profecti essent, ex itinere convocātī sunt, when the envoys had come to the king, they for many days did not receive the permission to see him; at length (lastly at last, finally) when they had already departed, they were called back from their journey. Liv. 42, 25.—Denique is also used beyond the relation of time, to connect the last link in the enumeration of facts or points, without any regard to their time. It is also employed with the force of an affirmative particle (§ 403), equivalent to *denum*, or to our expression 'in short', 'in a word'.—Tandem is also used as an exclamatory or emphatical particle, corresponding to our 'in the world', as *Quid tandem veremini?* What in the world are you afraid of? Cæs. B. G. 1, 40.

Obs. 6. To the temporal form-adverbs belong the numeral adverbs, both cardinal and ordinal. In regard to the ordinals, two forms are distinguished, those in *um* and *o* (§ 261, R. 18), in the use of which there is much uncertainty. Tiro (Cicero's amanuensis), in Gell. 10, 1, reports that the most learned Romans had been doubtful whether *Pompējus tertium*, or *tertio consul* was correct. They consulted Cicero who declined to decide, advising them to use the abbreviation *tert. consul*. Cicero, however, always says *tertium*, *quartum* etc. *consul* (meaning either in his third etc. consulship, or 'who was three (four etc.) times consul'). In enumerations, the form *primo* etc. is more frequent, *primum*, if used in enumeration, generally implying a real precedence in regard to time. The next links of enumeration are rarely added as in English, by *secundo*, *tertio* etc., but by *tum*, *deinde*, *denique*. Even aside from enumerations, the forms *secundo* and *secundum* very rarely occur, their place being taken by *iterum* (the second time). *Iterum* may also be rendered 'again'; but 'again' cannot always be expressed by *iterum*. It is expressed by *iterum* when the same action is repeated for the second time. In this meaning *denno* is sometimes used in its place: *Etruriā denno* (more usually *iterum*) *rebellante*, Etruria rebelling again (the second time). Liv. 10, 31. When 'again' is used without reference to the number of repetitions, *rursus* (sometimes also *denno*), but not *iterum* is employed, as *rursus plebem in Aventinum convocare*, to make the plebs again secede to mount Aventinus. Cic. Mur. 7, 15. If by 'again' not a repetition of the same act, but a restoration or an 'undoing' is understood, it is to be rendered by *rursus*, never by *iterum* (*denno* occurring even in this meaning, but extremely seldom), as *quem Medea dicitur fecisse rursus ex sene adolescentulum*. Plaut. Men. 4, 2, 61.

Rem. 10. To the adverbial particles of time belong

1, PREPOSITIONAL EXPRESSIONS with *ante*, *post* (both being used with the force of temporal adverbs), *inter*, and *pro*:

*ante*, *anteā* (before); *post*, *postea* (after, afterwards); *antehuc*, before this time; *posthuc*, after this time, in the future; *interea* or *interim*, meanwhile; *interdum*, sometimes; *protenus*, forthwith; *porro* (inst. of *proro*) farther.

2, PARTICLES with the appearance of PRIMITIVES, but demonstrably derived from lost (partly still existing) roots, as

*heri* (or *here*), yesterday; *cras*, to-morrow; *jam* with its compounds (*jamjam*, *jamdiu*, *jamdudum*, *jampridem*); *dum* (in compounds, as *nondum*, *viadum*, *nihildum* etc. see § 408); *mox*, soon; *pridem*, some time ago; *sepe*, often; *semper*, always.

Obs. 1. In the combination of *ante* etc. the terminations *eū* and *hūc* are the fourth locative cases of *is* and *hic*. About the use of *ante* and *post* as adverbs see R. 13.

Obs. 2. *Jam*, already, is often used with the force of *nunc*, as *Sed jam ad instituta pergāmus*, but let us come now to the subject. Cic. Off. 2, 2, 8.—*Jam* aside from its various and complicated uses with the force of modal particles of very different meanings, is employed, with respect to TIME, of a state conceived to have been in continued existence for some time up to the time spoken of. In this instance it is, generally, not separately rendered, its force being included in the English present-perfect tense, as: *Mithridātes ab illo tempore annū jam tertium et octiduum regit*. Mithridates has ruled (has continued to rule) [already] for 23 years from that time. Cic. Leg. Man. 3, 7.—*Hinc hostem jam prope triginta annos vincimus*, we have been defeating this enemy (already) for the last 30 years. Liv. 9, 3.—In the same manner the compositions *jamdiu*, *jampridem*, *jamdudum* are used, in all of which the adverb *jam* is redundant for the English idiom, as: *Jampridem cupio Alexandriam visere*, I have long wished to see Alexandria. Cic. Att. 2, 5.—*Quod populus Romānus jamdiu flagitat*, what the Roman people have been demanding long (for a time). Cic. Div. in Cæs. 8.—*Et quam jamdudum tractāmus stabilitas amicitiae*, that stability of friendship of which we have been speaking for a long while (all this time). Cic. Am. 22. (p. 229, 319).

Obs. 3. The English 'soon' is expressed 1) by *mox*; 2) by *brevi tempore* (spatio) or by

*brevi* alone; 3) by *matūre*. *Mox* is used 1) interrogatively in connection with *quam* (how), as *Quam mox coctum est prandium?* How soon will lunch be ready (have been cooked)? Plaut. Rud. 2, 3, 12.—*Especto quam mox Chærea hac oratione utātur*, I wonder (expect) how soon Chærea will use this language. Cic. Rosc. Com. 1, 1.—In connection with *tam*, not *mox* but *brevi* is used, as *Miranur tam brevi rem Romānam crevisse*, they wonder that Rome has grown so soon (so rapidly, in so short a time). Liv. 1, 9, 4. In place of *mox* or *brevi* in this meaning often the adverb *cito* is used. Cic. Fam. 8, 7.

2) *Mox* is used, as an equivalent of 'presently', of actions the immediate doing of which is contemplated, either directly, or after another action has first been performed, as: *Præterit villam meam Curio, jussitque mihi nuntiari mox se venturum*, Curio passed my villa, and sent me word he would soon (presently) come. Cic. Att. 10, 4.—*Discēdo parumper a somnīs, ad quæ mox revertar*, I leave for a little while the subject of dreams, to which I shall come back soon (presently). Cic. Div. 1, 23, 47.—The ablative *brevi*, *brevi tempore*, or the adverb *cito*, is used without reference to an action that must be ended before the other begins. These expressions have a more general force than *mox*, being used both if the action is directly imminent, and if it is to happen after the lapse of some time: *Res publica per vos brevi tempore jus suum recuperabit*, the republic, through you, will soon recover its right. Cic. Fam. 12, 2.—*Quos si statim aggredieretur brevi universos oppressurum*, if he would attack them immediately, he would soon, (in a short time) crush the whole of them. Nep. Them. 4, 3.

3) *Mox* is also sometimes used with the force of *deinde* to connect successive events, as: *Extemplo fusi, fugati, mox intra valum compulsi; postrēmo exiuntur castris*, they were directly routed and driven; soon (then) they were forced within the rampart, and, at last, they lost (are stripped of) their camp. Liv. 41, 48, 6.

4) When 'soon' means early, at an early day, it is expressed by *matūre*, or *propediem* (see R. 10) as *Ita ut matūre Romam esse venturum*, you say that Balbus is going to come to Rome soon at an early day. Cic. Qu. Fr. 3, 1, 4. In this meaning it may be generally replaced by *brevi*; but in the comparative, only *matūrius* (sometimes *citius*) can be used, as *Cæsar matūrius quam consuevit ad exercitum proficiscitur*, Cæsar departed sooner (earlier) than usually (than he was wont) to the army. Cæs. B. G. 4, 6.

Rem. 11. From substantives are derived 1) the different derivatives of *dies*; 2) some locative and ablative cases, and prepositional combinations. A few temporal adverbs are derived from adjectives and participles.

1. DERIVATIVES OF *dies*: *diu* (long) and its compounds *jamdiu*, *quamdiu*, *tamdiu*, *jamdudum* (= *jam diu dum*); *interdiu*, by day; *pridie*, day before; *postridie*, next day; *perendie*, day after to-morrow; *hodie*, to-day; *propediem*, at an early day; *quotidie*, daily.—*Pridie* and *postridie* take a clause with *quam* (p. 764), or an ACCUSATIVE (*pridie ejus diēi*, Cic. Phil. 11, 5; *postridie ludos*, Cic. Att. 16, 4, 1), or a GENITIVE (*pridie ejus diēi*, Cic. Fam. 1, 4, 1).—Here belongs *nudius*, with the nominative masculine of ordinals, = 'so many days ago' (*nudius tertius*, three days ago; corrupted from *nunc dius tertius* etc.).—2. LOCATIVES, besides *diu*; *noctu*\*, by night; *vesperi*, at evening, this evening; *temporē* or *temperi*, timely; *luci* (*lucu* anteclassical), by daylight (Cic. Phil. 12, 10; frequently in Plautus).—3. ABLATIVES: *mane*, early in the morning (all other cases obsolete); *homo*, this year (anteclassical; *homoimnis*, Cic. Verr. 2, 3, 18); *modo*, just now; and the compositions with *quot*, in the meaning 'at every'; *quot-annis*, yearly; *quotidie* (= *quot-diebus*); *quot-mensibus*, every month (anteclassical); *quot-elemtis*, on the first of every month (Plaut. Stich. 1, 2, 2). To these must be added prepositional combinations *antepridie*, on the spot just of *ex tempore*, diminutive form of *tempus*, and *interdiu* (inst. of *in loco*), forthwith. 4. Of descriptive adjectives or form-adjectives are derived: *antiquitus*, in old times; *nuper*, from the root of *natus*, recently, the other day; *denno* (inst. of *de nunc*, see R. 9, obs. 6); *statim*, directly from the participle *statim*; *confestim*, without delay from some ancient participle of doubtful derivation; *atitum*, instantly (extremely rare in classical language, probably derived from the participle of an ancient verb *atitum*); *deinceps*, successively (formerly an adjective, formed like *participles*; *parumper* and *prædisper*, for a short time; *tantis-per*, for so long a time referring either to a following clause with *dum* (as), or to previous statements without any comparative complement).

Here belong several adverbs, derived from descriptive adjectives by means of the regular adverbial terminations applied to the adverbs of manner, as *matūre* (R. 10, obs. 3, 4), *sero*, late, too late; *celeriter* and *cito*, quickly (in a very short time); *lente*, slowly (after a long time); *longe*, for a long time; *repente* and *subito*, suddenly.

\* From *noctu* must be distinguished the ablative *nocte*, which refers to a certain night in the night, as *Ne nocte in this night ex oppido profugerent*. Cæs. B. G. 7, 11. *Nocte* corresponds to *die*, while *noctu* corresponds to *interdiu*, as: *Ne aut nocte hostium multitudo ad munitiones adveneret, aut interdiu tela in nostros conjicere posset*. Cæs. B. G. 7, 72. Sometimes, but rarely, *nocte* is used with the force of *noctu*.

expressing the time be conceived as time-points, or as time-periods *within* which the act takes place,\* as

*Eo tempore anni*, at that time of the year, Cæs. B. G. 7, 8; *altero die*, on the second day, Ib. 7, 11; *postero die*, on the next day, Ib. 7, 18 (also expressed by *postridie ejus diei*); *horâ secundâ*, at two o'clock (meaning the second hour after sunrise), Liv. 45, 2; *tertiâ vigiliâ*, in the third night-watch (meaning the fifth and sixth hours after sunset), Cæs. B. G. 7, 58; *ludorum Romanorum secundo die*, on the second day of the Roman games, Liv. 45, 1; *tuli tempore*, in such a time, Cæs. B. G. 7, 40; *alio tempore*, at another time, Ib. 37; *hoc ipso tempore*, just at that time, Ib. 6, 37; *primâ luce*, at daybreak, Ib. 7, 36.—So of time-periods within which the event has happened: *Eo anno* ædiles curules tritici decies centum millia populo descripscrunt, *in that year* (at some time of the year) the curule ædiles distributed a million measures of wheat among the people, Liv. 33, 42.—Neque *Troicis temporibus* tantum laudis in dicendo Ulixi tribuisset, Homerus, nor would Homer, *in Trojan times*, have attached so much praise for speaking to Ulysses, Cic. Brut. 10, 40.

Obs. 1. The ablative may be used to indicate that an act lasts through a whole period, as *Cum milites toto tempore frigore et assiduâ imbribus tardarentur*, when the soldiers were delayed *during* (or *in*) the whole time, or 'the whole time' by cold and continued showers, Cæs. B. G. 7, 24. Often, however, *per* is used in this sense, as *Per hos annos mare clausum fuit*, the sea was closed during these years, Cic. Leg. Man. 12, 32.—*Per eos dies Cn. Servilius Consul in Siciliam trajecit*, In (during) those days the Consul Cn. S. crossed over to Sicily, Liv. 30, 24. Frequently other forms than that of nouns are used to express this relation, especially the ablatives absolute with present participles, or predicate-nouns (§ 533, R. 229, 231, 232.), as *inente ætate*, in early youth; *oriens sole*, at sunrise; *me puero, te consule* etc. For the use of the preposition *in* in these relations see § 453, R. 78.

Obs. 2. The DATES (in the form described above, § 550, obs. 2), if they answer to the question 'when', are placed in the ABLATIVE or in the PREPOSITIONAL form with *ante diem*, or (the dates immediately preceding the computing days) in the ADVERBIAL form (*pridie*). The ablative is always used if the date is one of the computing days (of course always in the plural, the computing days being pluralia tantum). These ablatives of the computing days are frequently accompanied by *ipsis*, as 'on the Ides of March', *Idibus Martiis*, or *Ipsis Idibus Martiis*. The other dates (even those with *pridie*) more frequently take the form with *ante diem*, but are also (less frequently) expressed in the form of an ablative, as *Quinto (ante) Kal. Martias*, on the 25th of February (more frequently *a. d. V. Kal. Mart.*). When the date is accompanied by an apposition, the noun in apposition is always placed in the ablative, even if the date itself is expressed in the prepositional form, as: *Ante diem quintum decimum Kalendas Octobris, ludorum Romanorum secundo die*, Licinio consuli laureatæ litteræ afferuntur, *On the 16th of September, the second day of the Roman games*, a dispatch wreathed with laurel was handed to the consul L. Liv. 45, 1.

Obs. 3. The time to which an action refers, including the dates, is sometimes expressed by *ad* with an accusative, chiefly denoting 'till' (p. 13, 3), as: *Ero Laodiceæ ad Idus Majas*; I shall remain at Laodicea till the Ides, Cic. Att. 6, 1, 24. But *ad* is also used to denote the time at which an action ought or was to be performed, or a time fixed for an action. So in the general expressions 'ad tempus', 'ad diem' = 'punctually': *Civitas frumentum ad diem dedit*, Cic. Verr. 2, 2, 5. *Ad constitutam diem decedere*, Cic. Fam. 2, 11, 2. Comp. Ib. 16, 10, 4. *Ad tempus venire*, Sall. Jug. 70, 5. So: *Te Laodiceæ fore ad meum adventum (at my arrival)*, Cic. Fam. 3, 5, 3. *Quam ad diem* legioni deberi frumentum sciabat, Cæs. B. G. 6, 33. Thus *ad* is used before DATES (in place of an ablative) if the day was or is appointed for the action: *Ut erat dictum a consulibus*, veni Capuam *ad Nonas Februarias*, Cic. Att. 8, 11, B. 2.—*Ego ad Nonas (i. e. veniam) quemadmodum dixi*, Ib. 13, 16.—*Pollex, ut dixerat, ad Idus Sertiles (i. e. præsto fuit)*, Ib. 13, 46.—*Ad Kal. Jan. in Pansa spes?* (i. e. on the day appointed for the meeting of the Senate), Ib. 16, 1, 4.

Obs. 4. In the DATE of LETTERS, the PLACE of the date is conceived as the place of an action with 'outward tendency' (according to p. 31, 3), and hence requires the preposition *ex* (so always '*ex castris*'), instead of which also the preposition *ab* (conceived as direction 'from') is used. See Ex. 21, 23. Hence the name of the city where the letter is dated, being conceived as 'place from', must (according to p. 47, 3) be placed in the ABLATIVE (not in the genitive), instead of which, in the context of letters also the preposition *ab* occurs; as: *Dat. a. d. III. Non. Octobr., Thessalonica*; Given at Thessalonica on the fifth of October, Cic. Fam. 14, 2.—*Pridie Kal. Maj. Brundisio*, Ib. 14, 4.—*V. Kal. Sextil. Rhegio*; Rhegium, July the 20th, Ib. 7, 19. Comp. Ib. 7, 20; 10, 31; 10, 3, 2; 10, 35; 11, 10; 11, 19; 11, 20; 11, 23; and often.—In a few letters *ad Atticum* (3, 20; 3, 7), the Cod.

\* In English 'in' is generally used to denote TIME-PERIODS (in the night, in the year), and 'at' or 'on', when the time is conceived as a TIME-POINT (at the moment, on the day). In Latin both relations are expressed by the ABLATIVE.

Med. exhibits the *Genitive of the place* (*Brundisii, Thessalonica*), which the recent editions (probably correctly) have changed into the Ablative.

1. *Hac die*, inquit Scipio, tribuni plebis, vosque Quirites, cum Hannibale et Carthaginiensibus signis collatis in Africa bene ac feliciter<sup>1</sup> pugnâvi<sup>2</sup>, Liv. 38, 51.—2. Quum scies Romæ intercalatum sit nec ne, velim ad me scribas, quo die mysteria<sup>3</sup> futura sint, Cic. Att. 5, 21, 14.—3. Pugnatur uno<sup>4</sup> tempore omnibus locis, atque omnia tentantur, Cæs. B. G. 7, 84.—4. Cæsar animadvertit, collem qui ab hostibus tenebatur nudatum (esse) hominibus, qui superioribus diebus vix præ multitudine cerni<sup>5</sup> poterat, Ib. 7, 41.—5. Hoc ipso tempore Germani equites interveniunt<sup>6</sup>, protensusque ab decumana portâ in castra irrumpere conantur, Ib. 7, 37.—6. Mons Cevenna durissimo tempore anni altissimâ nive iter impediēbat, Ib. 7, 8.—7. Cæsar veritus ne hostes nocte ex oppido profugerent, duas legiones in armis excubare<sup>7</sup> jubet, Ib. 7, 11.—8. *Exitus fere anni* lit erit a T. Quinctio Flaminio veniunt, se signis collatis cum rege Philippo in Thessaliâ pugnasse, Liv. 33, 24.—9. Exercitus vestri nunquam a Brundisio nisi hieme summâ<sup>8</sup> transmisērunt<sup>9</sup>, Cic. Leg. Man. 12, 32.—10. Antiochus rex initio veris navibus ab Epheso profectus Hellespontum petit<sup>11</sup>, Liv. 33, 38.—11. Pompejus tantum bellum extrēmâ<sup>12</sup> hieme apparavit<sup>13</sup>, ineunte vere suscepit<sup>14</sup>, mediâ ætate confecit, Cic. Leg. Man. 12, 35.—12. Triumphare<sup>15</sup> mense Januario statuerat consul, Liv. 39, 5.—13. Placuit senatui Pomponium prætorem triduo proximo in provinciam proficisci, Ib. 29, 20.—14. Sex prætores illo anno primum creati sunt, Ib. 32, 37.—15. Hannibalem hoc anno (183, B. C.)<sup>16</sup> decessisset<sup>17</sup> Antias Valerius est auctor, Ib. 39, 56.—16. (In arte dicendi) Pisis-tratum proximo sæculo Themistocles insecutus est<sup>18</sup>, Cic. Brut. 10, 41.—17. Hoc toto prælio, quum<sup>19</sup> ab hora septimâ ad vespertum pugnamusset, aversum hostem<sup>20</sup> videre nemo potuit, Cæs. B. G. 1, 26.—18. Totâ ætate Nilus (the Nile) Ægyptum obrutam (covered over) tenet, Cic. N. D. 2, 52.—19. Quæ Genâbi<sup>21</sup> oriente sole gesta sunt, antè primam confectam vigiliam in finibus Arvernorum audita sunt, Ib. 7, 3.—20. Taurus propter nivis ante mensem Junium transiri non potest, Cic. Att. 5, 21, 14.—21. Recen-tissimas<sup>22</sup> a Cybistris<sup>23</sup> te meas litteras habere ais a. d. X. Kal. Octobr. datas, Ib. 6, 1, 1.—22. M. Fulvius triumphavit a. d. decimum Kal. Jan. de Etolis et de Cephalen-sis, Liv. 39, 5.—23. E Pompejano<sup>24</sup> navi advectus<sup>25</sup> sum in Luculli nostri hospitium<sup>26</sup>, VI Idus (Junius), horâ fere III; egressus autem e navi accēpi tuas litteras quas tuus tabellarius<sup>27</sup> in Cumânum<sup>28</sup> attulisse dicebatur, Nonis Maj. datas. A Lucullo postridie eadem ferè horâ veni in Puteolanum<sup>29</sup>, Ib. accēpi duas epistolas, alteram Nonis, alteram VII Idus Lunivio datas, Cic. Att. 14, 20.

Rem. 13. When the time of an action (answering to the question 'when') is determined by MEASURING its DISTANCE from ANOTHER time, or from the time of another action, the nouns expressing the time-measure (measure-units of time § 550, obs. 1) are generally placed in the ABLATIVE, being combined with those objects of time which denote the ideas 'before' and 'after'. This is called the ABLATIVE of TIME-MEASURE, while the ablative of the time at or in which an event occurs is designated as ABLATIVE of TIME SIMPLE. The ablative of time-measure is employed according to the following rules:

1. The nouns denoting the measure-units must have NUMERALS as attributes, which, according to the sense of this construction, should be CARDINALS (interrogative, definite, or indefinite, as *quot, duo, multi, pauci, aliquot*). But by a peculiar Latin idiom frequently ORDINALS are used in

<sup>1</sup> Bene ac feliciter, successfully.—<sup>2</sup> This predicate has two completing objects, and five adverbial objects, two being temporal, two modal, and one local. Which of the objects belong to each of these categories?—<sup>3</sup> The 'mysteria' or the festival of the Great Goddess (Cybele) are meant.—<sup>4</sup> unus has here the force of *idem*.—<sup>5</sup> to see.—<sup>6</sup> arrive at the battle-field.—<sup>7</sup> to sleep under arms.—<sup>8</sup> end.—<sup>9</sup> the highest (point) of winter, i. e. midwinter. See § 372, R. 31.—<sup>10</sup> to cross over.—<sup>11</sup> to sail towards.—<sup>12</sup> to prepare.—<sup>13</sup> to begin.—<sup>14</sup> to celebrate one's triumph.—<sup>15</sup> Translate this expression into Latin by years from the building of Rome (in the year 753 B.C.).—<sup>16</sup> to die.—<sup>17</sup> to follow. The sentence must be passively expressed in English.—<sup>18</sup> although.—<sup>19</sup> literally 'a foe turned off', i. e. the back of any one among the enemy.—<sup>20</sup> Genâbum, the present city of Orleans on the Loire.—<sup>21</sup> the latest. *Recens* or *novus* are the only words by which what is latest in time can be expressed.—<sup>22</sup> A small town in Asia Minor.—<sup>23</sup> the Pompejanum, a villa of Cicero, near Pompeii.—<sup>24</sup> to land.—<sup>25</sup> literally into the hospitality; supply 'and found immediately the shelter of the hospitable roof'.—<sup>26</sup> carrier.—<sup>27</sup> A villa of Cicero.—<sup>28</sup> Another villa of Cicero.

this construction with the force of cardinals, as *Post decimum diem rediit* (inst. of *post decem dies*), he returned after ten days. See OBS. 4. Frequently the numeral attributes coalesce with the nouns expressing the measure-units of time into one word (*biennium*, *triduum* etc.).

2. If the general word *tempus* is used as time-measure, it has always the meaning of *spatium* (space of time), which is frequently used as its substitute, and must take either QUANTITATIVE adjectives as attributes (*quantus*, *tantus*, *aliquantus* etc.), or such adjectives which have the force of these (*brevis*, *longus*, *cognitus* etc.). The word *tempus* may be understood, in which instance the quantitatives have the force of ABSOLUTE adjectives, as *paulo post*, *multo post*, *brevis post* (Liv. 33, 24).

3. The TIME-OBJECTS denoting 'before' and 'after' are (a) the time-adverbs *ante*, *post*, *abhinc*, as *tribus diebus post*, three days later (afterwards); *biduo ante*, two days before; *decem abhinc annis*, ten years ago. (b) PREPOSITIONAL objects with the prepositions *post* and *ante*, as *biennio post pugnam Cannensem*, two years after the battle of Cannae. (c) The adverbs *ante* and *post* in connection with comparative clauses introduced by *quam*, as *tribus post annis* (or *tribus annis post*) *quam in Siciliam profectus est*, three years after he went to Sicily. Both *ante* and *post* may coalesce with *quam* into one word '*antequam*', '*postquam*', which words are considered as conjunctions (§ 328). But they are generally separated if connected with the ablative of time-measure, being even in this instance rendered as conjunctions, as *quinquennio ante*, *quonia Augustus ceciderat*, five years before Augustus died. Suet. Vesp. 2.

4. Instead of using the ablative of time-measure in connection with the adverbs *ante* and *post*, the latter words may be connected as governing PREPOSITIONS with the accusatives of the noun denoting the measure-unit. Instead of *tribus annis post* we may say *post tris annos*. But this form is very rare with *ante*, and still more rarely occurs with the quantitatives *paulum*, *multum*, *quidam* etc. We may say *paulo post* (after a little), but hardly *post paulum*. Instead of both *ante* and *post*, sometimes *intra* is used, meaning 'no more than' in the sense of *ante*, and 'not later than' in the sense of *post*. See R. 14, OBS. 6 (c).

OBS. 1. The ablative with *abhinc* refers to the time of the speaker, counting the time backward, corresponding to the English adverb 'ago' after the objective case. The nouns used as measure-units are always accompanied by CARDINALS, or coalesce with them into one word (*biennium* etc.), as *Criminatio tua est, Roscium cum Fidio pro societate decidisse. Quo tempore? Abhinc annis XV*, 'Thy charge is that Roscius compromised with Fidio in behalf of the partnership. At what time? Fifteen years ago. Cic. Rosc. Com. 13, 37. The time-measure connected with *abhinc* is also used in the accusative, as: Si Cn. Pompeius *abhinc annos quatuordecim* esset, if Cn. Pompey had lived 50 years ago. Cic. Balb. 6, 16.\* The time backward from the speaker may also be expressed:

\* In one passage (Cic. Verr. 2, 52, 140) *abhinc* is used in the meaning '*thence*', referring to the time spoken of, not to that of the speaker. Some assert that *abhinc* is also used of 'FUTURE TIME', referring to the words '*It prope est ut abhinc triennium*', Cic. Rosc. Com. 13, 37. But whether in this passage *triennium* refers to the future counted from the time of a compromise made by some parties, or to the time backward from the speaker's time, is not cleared up by the connection. Hence it fails to prove the assertion.

† The grammarians consider this as the regular construction of *abhinc*, and the ablative with *abhinc* as exceptional. But both constructions are equally frequent and regular in all periods of the language. Cicero, aside from the passages quoted, uses the ablative Verr. 2, 52, 130, and Att. 12, 17. The accusative construction occurs Phil. 2, 46, 119; Verr. 1, 12, 34; 2, 9, 25; Div. 2, 57, 118. In other writers both constructions are equally frequent. The ablative of the time-measure has the nature of an ADJECTIVE OF DIFFERENCE between two time-points, while the accusative of time is 'the accusative of LENGTH', having the same properties as the local accusative dependent on *longus*, *latus*,

1) by *ab hoc tempore* (inst. of *abhinc*) with an ablative, as: Et deinceps retro usque ad Romulum qui *ab hoc tempore anno sexcentesimo* rex erat. And thus successively backward to Romulus, who was king 600 years ago. Cic. Rep. 1, 37, 58.—2) by a MERE ABLATIVE of the time-measure in connection with the demonstrative *hic*, as: Ergo *hic quadringentesimo annis* Roma rex erat. Hence there was a king in (over) Rome 400 years ago (within these 400 years) Cic. Rep. 1, 37. *Hoc triduum, hoc quadriduum*, three, four days ago. (Cic. Phil. 11, 6. When the author introduces another speaker in oblique oration (see Cic. Phil. 11, 6. 11) *hic* is changed into *ille*, as: Diodorus scribit ad propinquum suum ut responderet, illud argentum se *paucis illis diebus* misisse Lilybaeum. Diodorus writes to his relative to answer that he had sent that silver a few days ago (within a few days) to Lilybaeum, Cic. Verr. 1, 18, 39.—3) by the preposition *ante* with the time-measure in the accusative, likewise in connection with *hic*, as: *Ante hos sex mensis* malecixisti mihi. *Six months ago* thou didst abuse me, Phaedr. 1, 1.\*—4) By the preposition *intra*.—5) In regard to INDEFINITE time, by the ADVERB *ante* with the ablative of the quantitative adjectives (as *paulo ante*, a little while ago), or with nouns and indefinite numerals in the ablative, as: Bene Caesar *paulo ante* de vita et morte disseruit. Sall. Cat. 52, 13.—Ut *paulo ante* dixi. Cic. Am. 21 (Comp. Ib. Off. 3, 10, 44; Phil. 6, 3; 12, 1).—Docet se *paucis ante diebus* a Gabinio accepit. Cic. Fam. 1, 9. More rarely, and chiefly in connection with epistolary tenses (p. 356), 'a definite time ago' is expressed by the adverb *ante* and the ablative of nouns with *definite* numerals, as: Dederam *triduo ante* (i.e. 'quam haec scriberem') litteras ad te. Cic. Fam. 6, 20. Comp. Cic. Tusc. 1, 5, 9.

OBS. 2. If time-measure is determined by the number of years, days etc. elapsed BEFORE a time not that of the speaker, the ABLATIVE of the time-measure is the regular, and almost exclusive form, which cannot be replaced by an 'accusative of length', nor generally† by a prepositional expression after *ante*. If the time before which the event happened is to be specified, the specification is added either in the form of the preposition *ante* with a noun or (more generally) in the form of a comparative clause after the adverb *ante*. If the time is not specified, the adverb *ante* is added to the ablative of the time-measure, without any other addition, as *Multis ante diebus* Lælius Roman venit, *Many days before* Lælius came to Rome. Liv. 30, 17.—*Annis ante quadraginta* pax cum Carthaginiensibus postrmo facta erat, *forty years earlier* (before that time) the last peace had been made with the Carthaginians. Ib. 30, 44.—*Adversarios a quibus paulo ante* erat ejectus, expellit ex civitate, he drives from the state his antagonists by whom he had been ejected a little time before. Cæs. B. G. 7, 4.—*Qui legem agrariam aliquot annis ante secundum Punicum bellum* tulit, who had proposed an agrarian law several years before the second Punic war. Cic. Acad. 2, 5, 13.—*Paulo ante meridiem noctem*, a little before midnight. Cæs. B. G. 7, 11.—*Ducentis annis ante* quum urbem Romam cepit in Italiam Galli transire, *two hundred years before* they captured the city of Rome the Gauls had come over the mountains to Italy. Liv. 5, 33, 5.

‡ The time-adverbs *ante* and *post* are placed either after the whole ablative phrase or between the preceding attribute and the noun. Rarely they are placed before the whole ablative phrase, or between the noun preceding and the attribute. *Ante annis octo* occurs Liv. 40, 57; *ante annis septendecim*, Liv. 38, 52. Generally however the arrangement is either '*duobus ante annis*', or '*annis duobus ante*', or '*duobus annis ante*'.

*altus*, and *crassus*. Hence there is no reason why the one of the two constructions should be considered as the rule, and the other as the exception.

\* In strictly classical prose, *ante*, as PREPOSITION, is hardly ever used in the meaning 'ago', without the addition of 'time'. But the writers of the silver age sometimes use the preposition *ante* with the accusative of the time specified, and cardinal or ordinal numerals, in the meaning 'ago', as: Homerus *ante annos nongentos* floruit. Vellej. 1, 5.—Hoc *ante paucos annos* didicimus. Sen. Qu. N. 7, 25.—*Tertium ante diem* scitote hanc solum decerptam Carthagine. Plin. H. N. 15, 20.—*Hæc scripta ante aliquot annos* recitata sunt. Suet. Tib. 61.—It is rather remarkable that our grammarians assert that the form *ante tris annos* is the regular form to express our 'three years ago', all other forms being exceptional. Some go so far as to make out a distinction between '*tribus ante annis*', and '*ante tris annos*' (Hand Turs. 1, p. 370, 371; Stallb. to Ruddiman 2, p. 291). Bremi to Nep. Dat. 11 considers the use of '*ante tris annos*', in the meaning 'three years ago' as perfectly settled, stating that Cicero always uses it so. But there is no passage in Cicero proving the use of this form in the meaning mentioned.

† Time-measure in the form of the preposition *ante* is extremely rare, as for inst.: *Hic Mithridates ante aliquot dies* venit, here came Mithridates several days before. Nep. Dat. 11, 2.—*Eadem negligentia erat quæ Chalcidem dies ante paucos* perdiderat. Liv. 31, 24.

‡ Hand (Turs. 1, 373) doubts that the last arrangement occurs. But compare Liv. 33, 44: *annis post uno et viginti*.

Obs. 3. If time is determined by the number of years elapsed AFTER A CERTAIN EVENT, or which will elapse AFTER the time of the SPEAKER, the same constructions are employed as with *ante*, but with the following modifications:

(a) The adverb or preposition *post* takes the place of *ante* or *abhinc*, as: *Bellum initum est annis post tribus et viginti*, the war commenced twenty three years later. Liv. 30, 44.—Is dictātor factus est *annis post Romam conditam quadringentis quindecim*, He was chosen dictator 415 years after the building of Rome. Cic. Fam. 9, 21, 2.—*Heri, non multo post quam tu discessisti*, Yesterday, not much later than you left. Cic. Att. 12, 49.

(b) The ablative of the noun denoting the time-measure generally takes an ORDINAL attribute, if the numerals are definite, and are not expressed by numeral nouns (*biennium*, *biduum* etc.). For the meaning of this construction with ordinals see obs. 4.—*Undecimo die post quam a te discesseram*, ten days (literally 'on the eleventh day') after I had left thee (instead of *decem diebus post*). Cic. Att. 12, 1.

(c) The prepositional form of the time-measure with *post* is far more frequent than the same form with *ante*. If the numerals are definite, and cannot be expressed by numeral compounds (*biennium* etc.), they are almost always ORDINALS, as: *Ablāto post undecimum annum a plebe consulatu*, ten years after the taking away of the Consulate from the Plebs (i. e. the right of electing Plebeians as consuls). Liv. 7, 18, 1. Some grammarians take the preposition *post* in this connection for an ADVERB, explaining the accusative 'as an accusative of the length of time'. This opinion is erroneous since the 'accusative of length' refers to the whole period, while the accusative of the ordinal would refer only to the length of one term of the period (*annus, dies* etc.). Nor will this view account for the fact that '*post*' with an accusative of the time-measure is never placed at the end of the phrase, which is very frequently the case with the ADVERB *post* after an ablative. If we take *post* as a preposition, and the accusative as the regular case governed by it, this fact will need no explanation.

(d) The adverb *post* is often UNDERSTOOD after an ablative of time-measure if the time referred to is either expressed by a clause, or else must be supplied from the text, as: *Dedisse id deos tandem sexto decimo demum anno*, that the gods had granted this at last after fifteen years (inst. of *sexto decimo anno post*). Liv. 30, 21.—*Acceptus est Hannibal Carthaginem sexto ac tricesimo anno quam puer inde profectus erat*, Hannibal was summoned from Italy to Carthage thirty-five years after he had departed from there as a boy (inst. of *post quam profectus erat*). Liv. 30, 35.

(e) If the time after which an event is to happen refers to the SPEAKER'S time, it is expressed 1) by the mere ablative of time-measure without the addition of the adverb *post*, as: *Quicquid est, biduo scimus*, whatever it may be, we shall know it after (in) two days. Cic. Att. 9, 14.—*Dixerunt, Cæsarem statuere, triduo exercitum deducere*, they said, Cæsar had resolved to withdraw his army after (in) three days. Cæs. B. G. 7, 20. Sometimes the demonstrative *hic* is added, the same as in the case of '*ago*'. The relations '*after*' and '*before*' can, in this instance, be only distinguished by the TENSE of the predicate, as: *Hanc urbem hoc biennio exertes*, thou wilt destroy this city in two years. Cic. Rep. 6, 11.—2) By the preposition *post* (sometimes *ad* = *post*) with a cardinal or ordinal: *Cur doleret si hæc post trecentos annos* (after 300 years) *eventura putaret?* Cic. Tusc. 1, 37.—*Stultus est qui flet quod post annos mille non vivet*. Sen. Ep. 64.—*Post diem septimum* (after six days) *esse reversurum confirmat*. Cæs. B. G. 6, 33.—*Cur doleam si ad (= post) decem millia annorum gentem aliquam urbe potitram putem?* Cic. Tusc. 1, 37.

(f) The CLAUSES used after the ablative of time-measure are generally COMPARATIVE clauses with *quam*, which may coalesce with the preceding adverb *post* (*postquam*), as *sexto anno post quam in Galliam venerat*, five years after he had come to Gaul. Rarely such clauses are used after prepositional expressions with *post*, as: *Post diem quintum quam barbari male pugnauerant*, legati a Boccho veniunt, Four days after the barbarians had been beaten, envoys came from Bocchus. Sall. Jug. 102. Instead of comparative clauses, time-clauses with *quum*, and relative clauses are sometimes used, when the adverb *post* must be always omitted. The relative adjective, in this instance, takes the noun of the time-measure as an antecedent, being likewise placed in the ablative, as: *Diebus circiter quindecim quibus in hiberna ventum est*, initium tumultus ortum est ab Ambiorix, About fifteen days after the occupation of winter quarters, the rebellion was inaugurated by Ambiorix (literally: the beginning of the rebellion arose from Ambiorix). Cæs. B. G. 5, 21. Here *quibus* has the force of *post quos*, being an ablative of time-measure like its antecedent. Clauses with *quum* occur more rarely than relative clauses, as: *Sexto die quum ad flumen ventum est*, maxima vis utrius efficta, Five days after they had come to the river, the greatest part of the air-bags was done. Sall. Jug. 91, 1.

(g) The phrases by which the English indefinite time-measure 'after some time' is expressed, are very numerous. Aside from the ablatives absolute (*brevis spatii intermisso* etc., R. 225, obs.), the following expressions are some of the most usual: *haud (non) multo post*, *paulo post*, *post paulo*, *post aliquanto*, *post non multo* (Nep.), *post haud multo* (Plaut.), *post neque ita multo* (Nep.), *haud ita multo post*, not very much later (Liv. 37, 53).

(h) Instead of an ablative of time-measure with *post*, rarely an ACCUSATIVE of TIME-MEASURE is used, as: *Fulvius ædem Fortunæ, quam proconsul in Hispaniâ voverat, annos sex postquam voverat dedicavit*, Fulvius dedicated the temple of Fortuna which he had vowed as proconsul in Spain, six years after he had vowed it. Liv. 42, 10. Extremely seldom such an accusative is used with *ante*, as: *Triduum ante dedicationem*, three days before the dedication. Such phrases as *postridie Idus Quintilis*, on the morrow after the Quintilian Ides, i. e. on the sixteenth of July (Liv. 6, 1, 12), may be considered as formed after the analogy of DATES. Such exceptional uses of accusatives of the time-measure, in place of the regular ablatives, must be well distinguished from the REGULAR accusative of time (R. 14) which may also be used in connection with *ante* and *post*, not however for marking the distance between two time-points, but to denote that the action continues through the whole period, as: *Aliquot annos continuos ante legem Gabiniam populus Romanus magnâ parte imperii caruit*, A number of years in succession before the (passing of the) Gabinian law, the Roman people was without a large portion of its possessions. Cic. Leg. Man. 18.

Obs. 4. In regard to the construction of TIME-MEASURE with ORDINALS in place of CARDINALS, there are two points of difference from the English to be noticed:

1. If the Latin uses CARDINAL numerals for this purpose, the English and Latin idioms wholly coincide, but they differ when ORDINALS are applied. When an event happens on the first day of a month, and somebody performs an action (for instance 'arrives') on the third of the month, we say in English either 'he arrived two days after the event', or 'he arrived on the second day after the event'. But the Latin says either *biduo post* *advēit* (the same as in English), or *tertio die post* *advēit* (different from the English). The Latin, when applying ordinals, counts every day, including the day of the event, and the day of the subsequent action.\*

2. Instead of '*tertio die post*' the Latin also says *post tertium diem*. These two expressions are according to their strict grammatical meaning entirely different, the first apparently indicating that something happened on the third day, and the latter denoting that it happened after the third day. Nevertheless nothing is better established in the rules of the Latin language, than that both forms of expression have absolutely the same meaning. Although we cannot, now, trace the causes which have led to this remarkable deviation from the logical value of grammatical forms, we have to acknowledge the FACT, and will find a complete identity in the peculiar form for DATES (§ 550, obs. 2, 4), with this form of time-measure for events happening after a time. As we use the form *ante diem quartum Calendas* with the meaning of *die quarto ante Calendas*, in the same way we use the form *post diem quartum advēit* with the meaning of *die quarto advēit*. Thus Livy says (30, 21) that Hannibal left Italy '*sexto decimo anno*' (post adventum), and in another passage (30, 28) that he left Italy '*post sextum decimum annum*'. Now Hannibal arrived in Italy in the year 218 B.C., and left it in the year 203 B.C., i. e. fifteen years (or in the fifteenth year) after his arrival. Thus *triduo* (*tribus diebus*) *post* (Liv. 21, 32) is the same as *quarto die post*, and both are the same as *post quartum diem*. Qui *biduo ante* *venerat* (Liv. 40, 40), is the same as *tertio die ante*, or *ante diem tertium*. Hence the following rule must be observed in rendering Latin ORDINALS with time-units, expressing distance in time: Subtract one unit from the ordinal number and render either by a cardinal or by an ordinal, both in respect to 'AFTER' and in respect to 'BEFORE'.

1. *Comitia jam abhinc triginta diebus habita sunt*. Cic. Verr. 2, 52, 130.—2. *Mulier quædam abhinc triennium ex Andro commigravit huc*. Ter. Andr. 1, 1, 42.—3. *Venienti Fulvio Ti. Sempronius prætor, qui biduo ante venerat, obviam processit*. Liv. 40, 40.—4. *Voverat eam ædem annis undecim ante L. Æmilium Regillum navali prælio adversus præfectos regis Antiochi*. Ib. 40, 41.—5. *Cæsar Viennæ equitatum, quem multis ante diebus eo premiserat, nactus est*. Cæs. B. G. 7, 9.—6. *Socrates supremo vitæ die de immortalitate animi multa disseruit, et paucis ante diebus, quum facile posset, eddici e custodiâ noluit*. Cic. Tusc. 1, 29.—7. *Paulo ante tertiam vigiliam animadversum est fumare aggerem*. Cæs. B. G. 7, 24.—8. *Vidi etiam senem Livium qui cum sex annis ante quam ego natus essem, fabulam docuisset*, Centōne

\* The passage Cic. Phil. 1, 13, 32: *Proximo, altero, tertio, denique reliquis consecutis diebus*, which seemed to prove that the ordinals in regard to the computation of time, were sometimes used with the same force as in English, is now read without a comma between *proximo* and *altero*, *proximo altero* meaning 'at the very next day'.

<sup>1</sup> *Nom.* Andros.—<sup>2</sup> to move over.—<sup>3</sup> *vovēre*, to vow.—<sup>4</sup> to send in advance.—<sup>5</sup> *nancisci*, to reach.—<sup>6</sup> last.—<sup>7</sup> *multa disserere de aliquâ re*, to discuss many points pertaining to.—<sup>8</sup> although.—<sup>9</sup> to be delivered.—<sup>10</sup> prison.—<sup>11</sup> to notice.—<sup>12</sup> to smoke.—<sup>13</sup> the rampart.—<sup>14</sup> as an old man.—<sup>15</sup> Livius Andronicus, the dramatic poet, is meant.—<sup>16</sup> *fabulam docere*, to have one's own dramatic poem performed.

Tuditanusque consilibus usque ad adolescentiam meam processit attulit. Cic. Sen. 14, 50. — 9. Biduum deinde silentium fuit, neutris transgressum esse apparet. *Tertio post die* Romani simul omnes transgressi sunt. Liv. 37, 38. — 10. Ita recepisti me *biennio post* non modo exercitatus, sed prope mutatus. Cic. Brut. 91. — 11. Hoc ostentum habuit hanc viam ut Dionysius *paucis post diebus* regnare coepit. Cic. Div. 1, 33. — 12. Aditiles *multis annis post decessum* hunc sunt. Cic. Att. 6, 1, 8. — 13. Caesar *post paulo* silentio egressus, cum tribus legionibus cum locum petiit quo navis apud illi posset. Cæs. B. G. 7, 60. — 14. Eodem et ab Scymbræ L. Cornelius, et ex Thracia *paucis post dies* Antiochus conveniunt. Liv. 33, 39. — 15. Rex prope toto itinere *post diem octiduum* rediit ad Bucchum. — 16. Venerem quendam dixisse fore ut brevi a Gallis Roma caperetur, quod quidem *per octiduum post* Veris capitis esse factum videmus. Cic. Div. 1, 44. — 17. Audi-tis Clodium dixisse perituros Mithridatem triduo. *Post diem tertium* gesta res est, *quoniam* dixerat. Cic. Mil. 16, 44. — 18. Tu rex Sulum *post diem tertium* redire jubet: se nihil etiamnum decessisse, sed illa die respondit. Sal. Jug. 109. — 19. Humilem, quam in Italia bellum inferret in Africa, *non tunc post quatuor dies Hispaniam* revertit, in prelio pugnavit adversus Veroneses. Nep. Hann. 1, 2. — 20. Pono-jas in Britannia profectus est, *ante quatuordecim dies* tamen ad imperium populi Romani Cilicium a-tinxit. Cic. Leg. Man. 12, 35. — 21. Quam si per in Flamini exercitu signum non posset movere loco, et Familias cum reueneret, *tribus horis* consensit exercitus atque ipse claxi in effectus est. Cic. Div. 1, 35. — 22. *Di quadraginta quarto* *quoniam* ex silvis delectata *in diebus* erant, naves in aquam deducere sunt. Liv. 28, 45. — 23. Opidum *paucis diebus* quibus eo ventum erat, expugnatum. Cæs. B. G. 3, 23. — 24. Ipse, ut spero, *ante diebus* quibus has litteras scribam. — 25. Mors Sexti Rosci *quod triduo* quo is occisus erat, Chrysog. non nuntiatur. Cic. Rose. Am. 36. — 26. Conde-ri *triduo* quam has dabam litteras, expectabam. Planc. Cic. Fam. 10, 23, 8.

Rem. 14. When by the time-measure not the time of another event, but merely the length of the period itself is determined, the nouns denoting the measure are placed in the ACCUSATIVE. This time-measure in the accusative answers to the question 'how long', the numerals defining the measure being CARDINALS, except in the case mentioned OBS. 2, (d), as: De his insulis nonnulli scripserunt *dies continuos triginta* sub brumæ esse noctem. Of these islands some have written that their night about the winter-solstice lasts *thirty days* in succession. Cæs. B. G. 5, 13.

INDEFINITE time-measure, in this relation, is expressed 1) by the nouns denoting the measure-units with INDEFINITE CARDINAL NUMERALS (§ 257), as *Paucos ibi dies* morati sunt, they staid there *a few days*. Cæs. B. G. 7, 5. — 2) by the time-adverbs *longe*, *diu*, and its compounds (*quamdiu*, *tamdiu*\*, *aliquamdiu*, *jamdiu* etc.), *tantisper*\*\*, *paulisper*, *parumper*.

All these forms are rendered either by a mere objective, or by the prepositions *for* or *during* (sometimes *in*).

OBS. 1. The nouns by which the length of periods is measured must be MEASURE-UNITS (*annus*, *mensis* etc.), and must be accompanied by CARDINAL numerals (interrogative, definite, or indefinite) as attributes. If the length of periods is expressed either by other nouns than measure-units (as *tempus*, *prelium*, *hiems*, *ver*, *adolescentia* etc.), or if the regular measure-units have no CARDINAL numerals as attributes, the relation of time is not to be considered as a MEASURE of its length, and cannot be expressed by the ACCUSATIVE. Periods thus qualified are conceived as TIME-POINTS, and are expressed either by prepositions (*per* or *in* with the ablative), or by the 'ABLATIVE OF TIME SIMPLE', accord-

<sup>1</sup> *ætate procedere*, to live (literally: to advance in age). — <sup>2</sup> to cross. — <sup>3</sup> stream. — <sup>4</sup> *se recipere*, to return. — <sup>5</sup> *exercitare*, to exercise. — <sup>6</sup> miracle. — <sup>7</sup> to introduce. — <sup>8</sup> silently. — <sup>9</sup> to march towards. — <sup>10</sup> *appelli*, to land. — <sup>11</sup> to carry. — <sup>12</sup> *adungere ad*, to annex to, to unite with. — <sup>13</sup> *concidere*, to cut down. — <sup>14</sup> to take. — <sup>15</sup> the timber. — <sup>16</sup> *in aquam adducere*, to launch. — <sup>17</sup> supply est. — <sup>18</sup> The writer of a letter frequently uses an imperfect, in place of a present, writing, as if reporting at the time when the letter would be read by the receiver.

\* The relative clause following *tamdiu*, which in English is introduced by *as*, begins in Latin with the correlative *quamdiu* (compare § 361), or by *quoad*, which, as a correlative, is rendered by *as*. More rarely it is followed by a mere *quam* or by *dum*. — \*\* *Tantisper* is generally followed by a clause with *dum*, which conjunction is either rendered by *till* or by *as*, having in this case the force of a relative clause.

ing to R. 11; as: *Stipendium quod per bellum* non tulerint (or *in bello*, but not 'bellum'), the pay which they did not draw during the war. Liv. 33, 72. — *Per eosdem dies* (not *eosdem dies* without *per*, the ablative *eisdem diebus* being likewise correct) C. Claudius augur lectus est. *During (in) those days* C. Claudius was elected augur. Liv. 33, 44. — *Hæc per hiemem* acta sunt (not *hiemem* without *per*), this was done during the winter. Liv. 33, 27. — *Totis persto noctibus* (not *totas noctes*), I am standing for whole nights. Phædr. Fab. Nov. 1, 18, 9. — *Totâ æstâte*\* (not *totam æstâtem*) Nilus Ægyptum obrutam tenet, the whole summer the Nile is holding Egypt under water. Cic. N. D. 2, 52. — *Toto hoc prælio*, during this whole battle. Cæs. B. G. 1, 16.

OBS. 2. EXCEPTIONS TO THE RULE IN OBS. 1. (a) Sometimes nouns denoting seasons of the day or the year, as *nox*, *æstas*, *hiems*, and similar nouns, are used as measure-units for defining the length of periods, being accompanied by cardinal numbers. They are, in this instance, placed in the ACCUSATIVE, the same as the regular measure-units, as: *Urbs Veji decem æstâtes hiemesque* continuas circumsessa est, the city of Veji was besieged *during ten summers and winters* in succession. Liv. 5, 22. Here *æstâtes hiemesque* has the force of *annos*, indicating that the siege was not interrupted in the winter, a fact quite unusual in those times. — (b) Frequently the numeral *unus* is omitted, the same as in English, where it is often replaced by the indefinite article, as: C. Sempronius cum *plus annum* æger fuisset, mortuum esse, that C. Sempronius, after he had been sick *for more than a year*, had died. Liv. 40, 2. — (c) Indefinite cardinals are understood in the frequent phrase *dies noctisque* (sometimes in the singular *diem noctemque*), *day and night*, just of *multos dies noctisque*, indicating the uninterrupted continuance of the action during an indefinite number of days, as: *Vagabatur dies noctisque*, he roamed about *day and night*. Liv. 27, 31. Aside from this phrase, cardinal numbers cannot be omitted. The English phrases 'for years', 'for months' etc. cannot be expressed by 'annos' or 'mensis', but by 'multos', *aliquot per annos*. — (d) ORDINAL numerals are used for the measure of time-periods, to designate a period which has lasted up to the time spoken of. In this instance only the last term of the period is mentioned, being placed in the accusative, and having an ORDINAL as attribute. The predicate, in this connection, is either in the PRESENT (in place of the English present-perfect), or in the IMPERFECT, in place of the English pluperfect), as:

Mithridates ab illo tempore *annum jam tertium et vigesimum regnat*, Mithridates *has been* reigning (already) *for twenty-three years* from that time. Cic. Leg. Man. 8. — *Pestilentia jam tertium annum* urbem Romanam atque Italiam *vastabat*, A pestilence *had been* desolating the city of Rome and Italy (already) *for three years*. Liv. 40, 36.

OBS. 3. The measure of the length of time cannot be expressed by the accusative, unless the GOVERNING VERB itself designates the action whose duration is measured, and unless this action is going on uninterruptedly during the whole period. From this principle the following rules are derived:

(a) When the time-measure refers to actions which by their nature cannot occupy the whole time, but must cease at some part of the time, and then be taken up again, the time is expressed by the preposition *per*, or *in*, or by an ABLATIVE, rarely by the accusative, as: His disceptationibus *per dies aliquot* (not the mere accusative *dies aliquot*) habitis, these discussions having been continued *for several days*. Liv. 33, 41. — *Ludi per biduum* instaurati sunt, games were performed *for two days*. Liv. 32, 42. So especially in negative sentences: *Provincia sex mensibus* imperii nullas meas acceperat litteras, the province had received *during six months* of my government no orders of mine. Cic. Att. 5, 21, 7. In all sentences of this kind the predicate as such has no duration at all, and, if expressed affirmatively the action of 'receiving' would only be a momentary one. Hence the accusative *sex mensis* would be improper. If the periods during which actions thus qualified have happened, are represented as lasting up to the SPEAKER'S time, the ablative is likewise used, but with the addition of 'his', as: *Cui viginti his annis* supplicatio decreta est, ut non imperator appellaretur? For whom *has a supplication been decreed within the last twenty years* without calling him 'imperator'? Cic. Phil. 14, 4. — On the other hand, such actions which are lasting by their nature, as 'to reign', 'to stay', 'to be', 'to live', require the measure of the duration to be in the ACCUSATIVE. Later writers use even for such actions indiscriminately the accusative or ablative,

\* Madvig considers the ablative in this passage a rare exception, requiring the accusative, this being the regular form. He evidently mistook the relation expressed in this passage. The accusative would be improper, and an example of such an accusative could hardly be produced from any classical prose-writer.

† Livy (40, 29) says: *Sex mensis* numquam pluvisse memorie traditum est, it is reported that it had never rained during six months. This accusative (instead of *sex mensibus*, or *per sex mensis*) is harsh. The sentence, according to correct grammar, would have to be rendered: It has never been reported that it had (at any time) rained for six months in succession. But this idea Livy did not mean to convey.

as: *Vixit annis viginti novem, imperavit triennio et decem mensibus diebusque ceto*, Suet. Calig. 59. 1. — *Octoginta annis vixit*, Sen. Ep. 93. But in the classical writers adjectives of this kind are extremely rare, as *Quinque horis* praetium sustinuerunt, they maintained the fight for five hours, Caes. B. G. 1, 17\*. More frequently the preposition *per* is used where a mere accusative would be the regular form. Thus while Caesar (B. G. 1.40), in the sentence *Quam multos mensis castris se tenuisset*, uses the regular accusative of time, Livy with the same predicate employs the preposition *per*: *Stativus per dies aliquot se tenuit*, he kept himself for several days in the stationary camp, Liv. 23. 36. The use of the accusative, in place of the preposition *per*, is extremely rare in good prose, as: *Ludi Romani biennio instituti* (inst. of *per biennio*), the Roman games were performed for two days, Liv. 29. 38.

(b) When the action whose duration is measured, being different from that of the predicate, is represented as applied to, or required for, accomplishing the action of the predicate, the time-measure is not expressed by the accusative, but by the ABLATIVE. This ablative must be conceived as an ablative of MEANS, as: *Caesar diebus XV* (not *das XV*) *ad finis Belgarum pervenit*, Caesar arrived in (within, after) ten days at the Belgian border, Caes. B. G. 2. 2. [It is not the action of arriving which lasted during the period, but the act of travelling which was applied to or required for the act of arriving.] — *Agamemnon vix decem annis* unum cepit urbem, Agamemnon took scarcely one city in ten years, Nep. Ep. 5. But: *Decem quondam annis* urbs oppugnata est ab universa Graecia, for ten years a city was besieged by the whole of Greece, Liv. 5. 4. In the last sentence the predicate *urbs oppugnata est* continues during ten years, and hence the time-measure is in the accusative. In the previous example the predicate *finis* is only the final act of the period, to the accomplishing of which the time was applied, Liv. 22. 26.

Here belongs the frequent military phrase *castris pernoctare*, in connection with an ORDINAL, as: *Consul tertio castris* Ancyran pernoctavit, the consul arrived in three days (after three camps had been made) at Ancyra, Liv. 38. 24. Every day's march was marked by the making of a camp during the night. Hence the number of camps marked the number of days on a march.

Obs. 4. If the time is measured by definite numerals, but within certain limits, the form of the COMPARATIVE FOR LIMITATION (§ 312) is employed, the length of time being expressed by the comparative number accusative, *plus, minus, citius, tardius, brevius, citius, citius*, either with an accusative or ablative of measure, and first of *quam* with an accusative, as: *Daturam operam ne longius tibi ab castris absit*, that he would try to be no longer than three days absent from the camp, Caes. B. G. 7. 9. See the Ex. in obs. 2. (b). A similar force has the preposition *intra*. See obs. 6.

Obs. 5. The age of men is generally expressed by the accusative dependent on *natus* (§ 498, 2). It may also be expressed by a PREDICATE-GENITIVE (with *ut natus*), or by an accusative with an ordinal dependent on *agere*, as: *Erat tuum quindecim fere annorum*, he was then just fifteen years old, Liv. 24. 4 (or *quintum et decimum egit annum*). If *old*, in this sense, is used attributively, it is expressed by a participial construction, either by *natus*, or by *agens*, or by the predicate-gerundive with the participle of the copula understood, as: *He came, three years old*, to Rome, *Roman venit triennio annis puer*, or *trix annis agens*, or *trix annis agens*, Ex. 29. 33. The age may also be expressed by an ablative of time simple with an ordinal, as *tertio castris anno* Roman venit, Ex. 1. 'Older' is expressed by *maior*, with the age in the ablative, if conceived as an excess over the age of another, as *biennio maior* quam frater, two years older than his brother, Ex. 29. If the age is expressed within limits, without reference to the age of another, the forms given § 312, R. 15 are employed.

Obs. 6. If measured periods of time refer to the FUTURE, they are expressed by *in* with the accusative of the time-measure, § 452, as *in diebus XV*, in fifteen days, an armistice was granted for three months, Liv. 30. 38. But when an action is to be performed at or before the end of a certain period, the ablative (according to R. 13) or the preposition *intra*, both either with cardinals or ordinals are employed, as *Rex Antio precipit diebus decem* Numidia excederet, the king ordered Antioch to leave Numidia within ten days, Sud. Jug. 38. — *Licinius consul Perses legatos intra menses decem* de Italia excedere iussit, the consul Licinius directed the envoys of Perses to leave Italy within ten days, the eleventh day, according to Roman computation, Liv. 42. 36. *Adel* is also used, without reference to the future, with the force of an ablative of time-measure (R. 13), (a) instead of a comparative of limitation, as: *Hoc tumulo intra paucos dies* concito et compresso, This revolt having been raised and suppressed within a few days, i. e. in no longer time than a few days, Liv. 29. 31. (b) with the force of *per* in connection with a

\* Ablatives of time-measure occur, Cic. Off. 3. 2; Caes. B. G. 1.45; Liv. 9. 19; 24. 15.

† Sometimes, in place of these comparatives the adverb *ultra* (further, longer) is used, preceded by an accusative of time, and followed by a comparative clause, as: *Triennium et sex mensis ultra quam licet*, censuram geram, Liv. 9. 31.

comparative clause, as *Intra decimum diem* quam Pheras venerat, within nine days after he had come to Phæra, Liv. 35. 10; (c) with the force of *abine*: *Nuper intra decem annos* C. Mænius dictator dictatura se abdicavit, in modern times within ten years (from now) the dictator C. Mænius resigned his dictatorship, Liv. 9. 34.

Obs. 7. If measured periods are made the ATTRIBUTES of nouns, they are generally placed in the GENITIVE, as *Quinque et quadraginta dierum cibaria*, provisions for 45 days, Liv. 29. 25. But if the noun to which the time-measure properly belongs is connected with a verb, either in the form of a predicative or of an objective phrase, the time-measure may be added to the noun in the form of an ACCUSATIVE, or of a PREPOSITIONAL attribute (with *in* or *per* or of a GENITIVE. Thus the phrase 'a thanksgiving for a number of days' is expressed in the following forms: 1) *Diem XX supplicatio* (a senatus) redditur, a thanksgiving for 20 days is granted by the Senate, Caes. B. G. 7. 99; 2) *Dies quind-cim supplicatio* decreta est, a thanksgiving for 15 days was decreed, Liv. 2. 35; 3) *Supplicatio in triduum* decreta est, a thanksgiving for three days was decreed, Liv. 33. 37; 4) *Supplicatio* ex decemvirore decreto *per triduum* fuit, there was a thanksgiving for (during three days) according to the decree of the decemvirs, Liv. 38. 44.

1. Attalus mortuus est altero et septuagesimo anno cum quatuor et quadraginta annos regnasset, Liv. 33. 21. — 2. Scipio cum quadraginta dies obsidisset Uticam, abcessit inde, irrito incepto, Ib. 29. 35. — 3. Quidam auctores sunt, Fabium Maximum duos et septuaginta annos regnum fuisse, Ib. 30. 26. — 4. Hannibal, cum pactorum Carthagini esset, promulgavit ut in singulos annos iudices legerentur, non quis haemium continuus iudex esset, Ib. 33. 46. — 5. Caesar, biennium in his locis moratus, per causam equitatus erigendi ab exercitu discessit, Caes. B. G. 7. 9. — 6. Ti. Gracchus regnum occupare conatus est, vel regnavit is quidem, paucos annos, Cic. Am. 12. 40. — 7. Dum paucos dies Caesar ad Vesontionem moratur, magnus subito timor omnem exercitum occupavit, Caes. B. G. 1. 39. — 8. Milites sed se complures annos morasse dixērunt ut nusquam incepta res discederet, Caes. B. G. 7. 17. — 9. Huius pater regnum in Sequanis multos annos obtinuerat, Caes. B. G. 1. 3. — 10. Conon in vincula coniectus est, in quibus aliquandiu fuit, Nep. Con. 5. 3. — 11. Disces tua principe huius ætatis philosophorum, aliquid proficere, Cic. Off. 1. 1. — 12. Latendum est tantisper dum audiamus quemadmodum negotium confectum sit, Cic. Fam. 9. 1. 4. — 13. Vou-eus milites certiores facit paulisper intermitterent prolium, Caes. B. G. 3. 5. — 14. Matronæ annum, ut parentum, L. Junium Brutum luxerunt, Liv. 2. 7. — 15. Hostes hos quos fide data ex opido eduxerant, in itinere adorti sunt; repugnanti diem noctemque obsident, Caes. B. G. 7. 42. — 16. Frater, ex quo ab Roma redii, dies noctemque mihi insidiatur, Liv. 40. 12. — 17. Tribuni accūsant nobilitatem, fraude eorum fieri ut Hannibal decimum jam annum Italiam provinciam habeat, Ib. 27. 21. — 18. Eumenes mirari se ait, quare jam tertium diem in vinculis teneretur, Nep. Eum. 11. 3. — 19. Per dies aliquot quæstiones majores casus sunt, Liv. 27. 23. — 20. Ad Ambraciam circa muros supra sub-hectæ majores casus sunt, Liv. 27. 23. — 21. M. Fulvius novendiale saterque teriam per dies XV pugnatum est, Ib. 39. 4. — 22. Nuntius decem horis nocturnis sex et quinquaginta milia possum pervolavit, Cic. Rosc. Am. 19. 37. — 23. Triphasia is Adriaticum venire potestis, Caes. B. G. 6. 5. — 24. Caesar opidum Velantia oppugnare instituit, idque biennio circumvallavit, Ib. 7. 11. — 25. Helvetii intellexerunt, Caesarem id quod ipse diebus XX ægerum confecerant, uno die fecisse, Ib. 1. 13. — 26. Philippus montem Hæmum quā triduo ascenderat,

1 to withdraw. — 2 abl. abs., the same as *re infecta*. — 3 auctorem esse with an infinitive clause, to vouch for the fact that. — 4 to proclaim. — 5 to elect. — 6 the same as *causa*. — 7 to draft. — 8 regnum occupare, to exercise royal power. — 9 vel, quidem, the same as *vel potius*. — 10 to seize. — 11 *ita ut*, in such a manner that. — 12 morare, to serve (as soldiers). — 13 an example of an ablative absolute forming a completing object of a verb. — 14 regnum obtinere, to hold or occupy the throne, to be king. — 15 prison. — 16 quādiu, inst. of *quādiu*, as long as. — 17 an interrogative subject-clause with the impersonal tamdiu quādiu, as long as. — 18 an interrogative subject-clause with the impersonal tamdiu quādiu, as long as. — 19 quantum proficere has the force of a genitive of a noun (progressus) dependent on poterit. — 20 to keep concealed, supply nobis. — 21 to notify; supply ut. — 22 to suspend. — 23 the ladies. — 24 like, as if. — 25 iurare aliquid, to wear something for somebody. — 26 after passing their word, i. e. for their personal safety. — 27 when they detained themselves. — 28 supply tempore, ever since. — 29 to lay in wait for somebody, to pursue somebody. — 30 the nobility. — 31 a circumlocution for our 'with the fact that by their fraud Hannibal' etc. — 32 to hold as a province. — 33 larger victims, the more solemn way of sacrificing. — 34 to slaughter. — 35 sacrum tenere, to observe a sacred season. — 36 supply agro, the district of Picenum. — 37 to fly over. — 38 to commence. — 39 to surround with a rampart. — 40 to be aware. — 41 with the greatest difficulty. — 42 by the same way where.

*biduo* est degressus<sup>1</sup>. Liv. 40, 22.— 27. Hasdrubal cum ceteris copiis *septuagesimis* castris Tarracōnem rediit. Ib. 28, 16.— 28. Caesar ex eo loco *quintis* castris Gergoviam pervēnit. Cæs. B. G. 7, 36.— 29. Latera regis duo filii juvenes<sup>2</sup> cingēbant<sup>3</sup>, Persens jam *tricesimum* annum agens, Demetrius *quinquennium* minor. Liv. 40, 6.— 30. *Novem* annorum a vobis profectus, post sextum et tricesimum annum redii. Ib. 30, 37.— 31. Non *die*, non *horā citius*<sup>4</sup> quam necesse est magistratū abieris<sup>5</sup>, modo ne<sup>6</sup> excedas<sup>7</sup> fluitum<sup>8</sup> tempus. Ib. 9, 34.— 32. Gracchus centum tria oppida *intra paucos dies* in deditiōnem accēpit. Ib. 40, 49.— 33. Ob res prospere gestas a patribus *in dies* quinque supplicatiōnes decretæ sunt. Ib. 33, 24.— 34. Horum prodigiōrum<sup>9</sup> causā *diem unum* supplicatio fuit. Ib. 27, 23.— 35. Addita *unum diem* supplicatio est ex decreto pontificum. Ib. 39, 22.— 36. Vercingetorix nuntiat, se exigue<sup>10</sup> *diērum* XXX habere frumentum, sed paulo etiam *longius* tolerārī<sup>11</sup> posse parcendo<sup>12</sup>. Ib. 7, 71.

#### IV. RELATIONS OF MODALITY.

##### A. RELATION OF MANNER.

§ 551. The relations of modality comprise all those accompanying circumstances of an action which neither refer to PLACE, nor to TIME. They are distinguished as the relation of MANNER (in a narrower sense), of COINCIDENT ACTION, of QUANTITY, and of CAUSE. The grammatical forms which the language uses for the relation of MANNER, aside from the prepositions and clauses of manner, are 1) THE ADVERBS OF MANNER; 2) the ABLATIVE CASE OF ATTRIBUTIVE PHRASES, and in certain instances the ablative of NOUNS WITHOUT ATTRIBUTES.

Obs. The relation of MODALITY cannot be otherwise defined than negatively. The special relations belonging to it pass over into each other, and it is impossible to determine distinctly their limits, many forms which we will have to consider having the nature of several of these relations. Thus the adverbs *fortuito*, *gratuito* (gratuitously), *falso*, *merito* (deservedly), may be considered either as adverbs of cause, or as adverbs of manner; the adverbs *sedulo*, *radicaliter*, *penitus* (thoroughly), and all the adverbs of comparative and superlatives may be considered either as adverbs of manner, or as adverbs of quantity (intensity). The relation of PRICE and VALUE, for which language has established specific adverbial forms, is a complicated relation, which may be considered as one of manner, or of cause, or of quantity. It refers to the MANNER of an action when we simply consider the nature of the transaction, for instance, when the question arises whether something has been taken as a gift or for a consideration. It may be considered as a relation of CAUSE when we conceive the idea of value as the REPRESENTATIVE of a thing. The judge for instance awards damages *because* the loss is of such a value; I give a price for something *on account* of its value. The same relation is one of quantity if we measure the value, comparing it with other values.

§ 552. The ADVERBS OF MANNER are formed 1) from descriptive adjectives (see §§ 68. 219. 220), as *diligenter*, *jucunde*; 2) from form-adjectives, as *ita* (from the root of *is*), *uti* (from the root of *quis*), *aliter*. These are called MODAL FORM-ADVERBS; 3) from participles, as *amanter*, *secretō*, *privatim*; 4) from nouns, either by inflection, as *forte*, *partim*, or by composition, as *quomodo*, *obiter*; 5) from prepositions, as *ultro*, of one's own accord.

Obs. 1. The adverbs of manner formed from descriptive adjectives are of a twofold character. They must be either conceived as ADJECTIVE ATTRIBUTES of substantive ideas implied in the verb on which they depend, or they denote independent actions of the

<sup>1</sup> to make the descent.—<sup>2</sup> his two young sons (subject).—<sup>3</sup> to surround. Transl.: On both sides of the king went etc.—<sup>4</sup> sooner.—<sup>5</sup> Perfect subjunctive, with the force of 'you may', 'I have no objection, if you' etc. *Magistratū abire*, to resign an office.—<sup>6</sup> provided you do not, so long as you do not.—<sup>7</sup> to exceed, to stay beyond.—<sup>8</sup> prescribed.—<sup>9</sup> prodigy.—<sup>10</sup> scantily.—<sup>11</sup> impersonal passive predicate-infinitive: That his army might get along.—<sup>12</sup> by close management.

subject, which, for the sake of brevity, are combined with the predicate in the form of an adverb. In this case the adverbs have the nature of PREDICATIVE ADJECTIVES. Thus *jucunde vivere* has the force of *vitam jucundam agere*; *leviter punire* means *levem poenam irrogare*. *Negotium negligenter conficere* means *negligentem esse in conficiendo negotio*; *hoc facillime dicitur* = *hoc dicere facillimum est*. Sometimes the Latin language uses adverbs in the last mentioned sense where we make use of different expressions in English, as *Male, hercule, narras!* indeed *you are wrong* to mention this. Cic. Tusc. 1, 6.— *Hæc et dicuntur et creduntur stultissime*, it is most foolish to say and believe these things. Cic. N. D. 2, 28.— *Utrum impudentius* Verres has res populo Romano ademit an *audacius* tabulas commutavit? Was it *more impudent* in Verres to steal these things from the Roman people, or *more bold* to forge the entry? Cic. Verr. 3, 36. Ex. 1, 2.

Obs. 2. Aside from this instance the idioms of both languages are often different in the use of adverbial expressions of manner. Often the one language makes use of the form of a descriptive or form-adverb, while the other language uses adjectives, or adverbial expressions not having the form of an adverb, as *Siccine* est sententia? Is *this* (literally *thus*) thy opinion? Ter. Heaut. 1, 1.— *Se ita* a majoribus suis didicisse, ut magis virtute quam dolo contenderent, they had learned *this rule* from their ancestors, to fight the enemy rather by valor than by deception. Cæs. B. G. 1, 13. Absolute form-adjectives, which, in English, are used as factitive predicates of verbs of calling (p. 102, B), take, in Latin, the form of *adverbs* of manner; as: *What* is this called? *Quomodo* (not *quid*) hoc dicitur? as: *Tria* sunt genera, quid fiat, aut quale sit, aut *quomodo* nominetur (referring to the question 'what it is called',—i. e. what name is applied to it). Cic. Or. 2, 16.—Several English adjectives form regular adverbs, while their Latin equivalents do not admit of adverbial forms. Thus the adjectives *immobilis*, *immensus*, *inflexibilis*, *inermis*, *incolumis*, *ingens*, *enormis* (the adverb *enormiter* being only used by late writers), and many others, do not form adverbs in Latin, while from their English equivalents regular adverbs are formed. On the other hand, Latin adverbs must frequently be rendered by prepositional or other adverbial expressions, if English analogous adverbs do not exist, as *impune*, with impunity; *ægerime*, with the greatest difficulty; *vicissim*, in turn; *perinde*, in the same manner, and many others.

Obs. 3. To the descriptive adverbs formed in *o* which are enumerated § 69, the following should be added: *arcano*, secretly; *consullo*, deliberately; *directo*, directly; *gratuito*, gratuitously; *improviso*, unforeseen; *inopinato*, unexpectedly; *liquido*, clearly; *merito*, deservedly; *optato*, according to one's wishes; *precario*, on sufferance; *paritario*, on shares; *testato* and *intestato*, with, and without a testament. Here belong the impersonal ablatives absolute mentioned § 536, R. 234.

Rem. 15. The MODAL FORM-ADVERBS are formed from the roots of the determinative form-adjectives, similarly to the locative form-adverbs (§ 548, R. 4), almost all corresponding to the first locative case.

1. To the interrogative and relative forms (root *cu*) belong: the adverbs *uti* or *ut* (inst. of *cui*), how; *quā*, how; *utut* (corresponding to *quisquis*), and *utcumque* (corresponding to *quicumque*), howsoever.
2. To the definite form belong *sic*, thus, so (corresponding to *hic*); *ita*, thus, so (from the root *i* of *is*); *itidem* and its abbreviated form *item* (from *idem*), in the same manner, likewise.
3. To the indefinite form belong *utique* (corresponding to *quisque*), by all means, anyhow; the negatives *neutiquam* (inst. of *ne-utiquam*), and its synonym *nequāquam*, in no way, in no manner, in no respect; *nequicquam* (also written *nequidquam* or *nequiquam*), in vain (all corresponding to *quisquam*); *aliqui* or *alioquin*, in other respects, else (from *alius* and *quis*), and *aliter*, otherwise, in a different manner.

Of these adverbs only *quā*, *sic*, and *ita*, besides some of the indefinites, are in general use. In place of the others, compounds or phrases with *modo* are generally employed. Such phrases must be used in place of the wanting modal adverbs of *aliquis*, *quidam* and *ullus*, as *aliquo modo* or *quodammodo*, in some manner, *ullo modo* and *nullo modo*, in no way, the latter of which is more usual than, and slightly different from, *nequāquam*.

Obs. 1. The regular modal form-adverb of the INTERROGATIVE and relative form (root *cu*) is *uti* or (more usually) *ut*. But in this meaning *ut* is never (in prose) used in direct

\* *Sic* (instead of *si-ce*) probably is identical with the conjunction *si*, both belonging to an ancient demonstrative root *sa*, which occurs in cognate languages. Some consider the *s* in *sic* as a euphonic change from *h* in *hic* (as *ē* and *ser*).—† It frequently thus occurs in interrogative clauses: In vulgus elatum est, *ut* ea res colloquium diremisset (how this had broken up the conference). Cæs. B. G. 1, 46.

interrogations. It occurs, however, as the regular form (rarely replaced by *quomodo*), in exclamatory sentences, as: *Eu autem noster ut totus jacet!* But look at our man, how he is wholly down! Cic. Att. 7, 19. *Ut* is the regular form-adverb corresponding to the English 'as', in inserted relative clauses, where it is just on the limit which separates relative adverbs from conjunctions, and, hence, is considered by some as an adverb, by others as a conjunction, as: *Non, ut aliena scilicet, sed ut nemo fit, minimum introducti*, thou hast introduced a nime, not as it was formerly the custom, but as it is done now-a-days. Cic. Fam. 9, 16. *Qui in sua re fuisset egentissimus, erat, ut fit, insolens in aliena*, who had been most indigent in his own circumstances, was, as it frequently happens, reckless in those of others. Cic. Rose. Am. 8. In place of *ut* in this connection, which is its proper function as a relative adverb, its compound *sicut* is frequently used, especially as a correlative of *ita*, as *Hec sicut exposui ita gesta sunt*, This has been done so as I have stated. *Ut*, in inserted clauses of this kind, frequently modifies a previous general statement, restricting it to some proportional standard, and is variously rendered by 'according to the fashion', 'in proportion to', 'as for', 'for': *Multa etiam in eo, ut in homine Romano, littere*, he also had great literary knowledge for a Roman. Cic. Sen. 4. Ex. 5. 6.

Obs. 2. The English 'how', in interrogative sentences, both independent and dependent, is generally rendered by the compounds *quomodo*, and *quemadmodum* (i. e. *quo modo*, *quam ad modum*, but often by *quid*), as: *Quomodo modum eis carere poterant?* How will they be able to do without these? Cic. Cat. 2, 10. *Quomodo crimen committitium confirmaret non inveniebat*, he did not find out how he might prove the false accusation. Cic. Rose. Am. 15. *Quero qui Milo scire potuerit*, I ask how Milo could have known it? Cic. Mil. 17. Thus frequently *qui fit* occurs with a following *ut*, as *Qui fit Mæcenæ, ut nemo... contentus virat?* How does it happen. O Mæcenæ, that nobody lives contentedly, etc. Hor. Sat. 1, 1. *Quomodo* and *quemadmodum*, the same as *ut*, are also used as relative adverbs, either referring to a demonstrative adverbial antecedent (*eodem modo*, *eo modo*), or implying it, or introducing inserted clauses, and referring to a whole sentence. They are then rendered by 'as'. *Quemadmodum sunt in quibus, in quibus, eodem modo sunt erga amicos*, As they are disposed towards themselves, in the same manner they should be disposed towards their friends. Cic. Fin. 2, 26. *Tua hæc altera patria, quemadmodum dicere solitas, Messianæ circumstanti*, Your second fatherland, as you used to say, Messianæ has overreached you! Cic. Verr. 4, 5, 17. Instead of *quomodo* and *quemadmodum* a very frequently the phrase *quo pacto* is used (a favorite expression of Cicero), as: *Nescio quo pacto semper hoc fit*, I do not know how this always happens. Cic. Mur. 21. Frequently 'how' is expressed by the neuter adjective *quid*, especially if it forms by itself an elliptical sentence, as *Quid? tu me hoc tibi mandasse existimas?* How? You believe I have directed you to do this? Cic. Fam. 2, 8. All these equivalents of 'how' must be distinguished from *quam*, corresponding to 'how' as an adverb of intensity. R. 30, obs. 2. Instead of *ut* and *sicut* the compound *quemadmodumque* and the phrase *quomodo modo* are often used, as: *Quemadmodumque dicitur, in dicitur tam potest, noscitur ita*, howsoever it may be said, it is intelligible. Cic. Fam. 5, 11. *Quis est qui, quomodo in quo, quod interfectus est, puniendum putatur*, who is there that believes a punishment should be inflicted in what manner so ever one may have been killed? Cic. Mil. 3.

Obs. 3. *Sic* and *ita* are so distinguished that *sic* is more generally employed in a comparative sense, especially in connection with a comparative clause introduced by *ut*, as: while *ita* more generally designates manner not expressed comparatively, as *Ego Bruti rem sic ago ut ipse non optaret*, I attend to Brutus's affairs such as I might see as he would not do it himself. Cic. Att. 5, 18. *Qui stadium cursum supplentem cum quicquam certet nullo modo debet; sic in vita alibi eripere quod pertinet ad usum, jus non est*, Who competes in a race ought in no way play tricks with his adversary; thus it is wrong in life to take away from another the things pertaining to its legitimate use. Cic. Off. 2, 10. *Arar in Rhodanum induit incrementa lenitate, Et ut in utrum partem fluit judicari non possit*, the Arar empties into the Rhodanus with wonderful smoothness, so that it cannot be made out in what direction it is flowing. Cæs. B. G. 1, 12. *Ita spero quidem*,

\* *Quomodo* is often written in two separate words, other words being frequently inserted between the two parts. This is always the case in interrogative sentences when it is strengthened by *nam*, as: *Quonam modo*, how?

† It is very probable that *quid*, in this sense, is an old form of the ablative case of *quis*, declined after the third declension. The student will have noticed that the cases of this relative have the endings of both the second and third declension, and it is most probable that each of its cases had thus a double form. The dative and ablative plural occur, in both forms, even in classical prose, *quibus* and *quibus*, which is also spelled *quibus*. *Qui* often occurs, as an ablative masculine or neuter singular of the relative *quis*, especially with the preposition *cum*, which is enclitically affixed to it, as: *Eum quicum (inst. of cum quo) bellum geras*, the one with whom you wage war. Cic. Off. 1, 12. The use of *quicum* for the feminine *quicum*, and for the plural *quibuscum*, is non-classical.

so I hope. Ter. Andr. 1, 5, 63.—In tertio de Oratore *ita* scriptum est (a passage of Cicero being quoted after these words), in the third book 'On the Orator' the following passage occurs (literally 'it is written'). Quint. 9, 1, 25. But this distinction is often disregarded, *sic* being used in place of *ita*, and vice versa. Peculiar is the idiom by which *ita* (not *sic*) followed by *ut* (that) is used with a concessive and adversative force, equivalent to 'but so that', as *Ita triumpharunt ut*, they triumphed, but so that. *Hæc ita prætereāmus ut tamen influentes relinquāmus*, let us pass this, but so that we (as to) keep it in our view (literally: let us so pass this that we, however, leave it behind looking at it). Cic. Sen. 5.—In interrogative sentences both *ita* and *sic* are generally placed first, taking the enclitic *ne*, *sic* being changed into *siccine*, as *Itane censes*, do you think so? Cic. Div. 2, 32.—*Siccine tu hominem optime de republica meritum in discrimen vocavisti?* Didst thou thus place in jeopardy a man of the greatest merits for the republic? Cic. Flacc. 33.

*Tam* and *adeo*, both meaning so (not 'thus') are quantitative adverbs (see R. 30, obs. 4), and cannot be used as adverbs of manner in any of the mentioned sentences; but *ita* (rarely *sic*) before adjectives and verbs, is sometimes used with quantitative force, as *Ita sum afflictus ut nemo umquam*, I am so much afflicted as no one ever was. Cic. Att. 2, 12.

Obs. 4. To *sic* and *ita* corresponds the adjective *talis*, such, of that kind (inst. of *itālis*), for which the attributive genitive phrase *ejus modi* (generally written in one word *ejusmodi*) is frequently used. *Ejusmodi*, if used predicatively, has the force of a predicate-genitive. *Nomen legāti ejusmodi esse debet ut*, the name of an ambassador should be of such a kind that. Cic. Verr. 2, 1, 33.—*Genus hoc ejusmodi judiciorum*, this class of courts of that kind. Ib. 60.

Obs. 5. *Item* and *itidem* are generally used in the meaning 'likewise', assigning the same predicate to another subject or object, as: *Est igitur vis virtutis duplex...; temperantia autem itidem distributa est duobus modis*, The power of virtue is twofold...; but temperance is likewise distinguished in a double way. Cic. Part. 20, 76, 77.—*Litteræ mittuntur isti a patre vehementes, ab amicis item*, Vehement letters are sent to him by his father, and likewise by his friends. Cic. Verr. 6, 19.—Elegantly, *non item* is employed in the last of two adversative sentences having the same predicate, when the last sentence is negative. *Non item*, in this instance, is translated 'but not', occupying the last place: *O spectaculum uni Crasso jucundum, ceteris non item*, O for the sight pleasant to Crassus alone, but not for the others! Cic. Att. 2, 21. To render the English 'in the same manner' either *item* (*itidem*) is used, or the phrase *eodem modo* (*eodem ratione*), or the adverb *perinde* (also *proinde*). This adverb has the peculiarity that it is also used with adjective force (*perinde est*, or *perinde valet*, 'it is the same thing'). Ariovistus respondet, *jus esse belli, ut qui vicissent eis quos vicissent, quemadmodum vellent, imperarent; item populum Romanum victis ad suum arbitrium imperare consueasse*, Ariovistus answered, it was the law of war that the conqueror should treat the conquered as he wished; in the same manner the Roman people was accustomed to treat the conquered according to its pleasure. Cæs. B. G. 1, 36.—*Perinde uxor instituta fuerat, liberique instituebantur, in the same way his wife had been brought up, and (so) his children were being brought up*. Liv. 3, 44, 2. *Perinde* is especially frequent with a following comparative clause, connected by *ut*, *ac*, *atque*, *quam* (as), or by *quasi*, *ac si* (as if), being often rendered by *just*, *just so*, as *Perinde ut cutque data sunt, in the same manner* (proportion), as it has been given to each. Cic. Tusc. 1, 39. *Perinde quasi exitus rerum legibus vindicentur, just so as if the issues of things were punished by the laws*. Cic. Mil. 7, 19.

Obs. 6. Instead of *aliter*, frequently *secus* is used, especially with negatives, and a following comparative clause (*non secus ac*, *haud secus*), as: *Recte an secus, nihil ad nos, right or otherwise*, it does not concern us. Cic. Pis. 28.—*Dixi illud non secus ac sentiebam*, I did not say this otherwise than I thought. Cic. Or. 2, 6, 24.—*Nihilo secius* (or *nihilo minus*) means nevertheless.

Rem. 16. Many past participles form adverbs in *im* instead of in *e*, as,

*cæsim*, by cutting: *certatim*, at a race, emulously; *conjunctim*, united, in concert; *contemptim*, in scorn; *cursim*, rapidly; *gravatim*, unwillingly (rare); *nominatim*, by name; *passim*, scattered about; *punctim*, pointwise; *privatim*, privately; *raptim*, hastily; *sensim*, visibly; *separatim*, separately; *strictim*, briefly, summarily.

Obs. Some few of these participial adverbs have both forms, that in *e* (sometimes *o*), which is the regular adverbial ending of perfect participles, and that in *im*, as *strictim*, *conjunctim*, *separatim*. These, generally, have different significations according to these endings, as *strictim* and *strictè* (of *stringere*), the former of which belongs to the signification 'to touch', and the latter to that of 'to draw tight'. Some, as *minutim* (non-classical), and *minute* (minutely, classical) belong to different periods of the language. Others, as *conjunctim* and *conjuncte*, *separatim* and *separatè*, are used indiscriminately.

**Rem. 17.** Most adverbs of manner derived from NOUNS are formed by the ending *tim*, generally preceded by *ā*, but sometimes by other connecting letters or syllables. They have the force of an attributive genitive, the ablative *modo* (in the manner) being understood, as *gregatim*, i. e. *gregum modo*, in the manner of flocks, by crowds; *furtim*, i. e. *furum modo*, in the manner of thieves, stealthily. Sometimes their adverbial meaning is of a looser character, as *ostiātīm*, which does not mean 'in the manner of doors', but 'from door to door'.

*Catervatim*, in troops; *centuriatim*, by centuries (census-classes); *curiatim*, by curies (classes of the Patricians); *generatim*, by classes, by nationalities; *gradatim*, gradually; *membratim*, by the limb; *partim*, partly; *pedatim*, gradually, step by step; *summatim*, summarily; *viciatim*, in turn; *viratim*, man by man.

**Obs.** Some adverbs of manner are more ablatives of substantives of which the other cases are lost, as *passim*, by order; *impetum*, without order; *permissum*, by permission; *arbitratim*, according to some one's pleasure; *arbitratim*, at thy pleasure; *spontem*, of one's own accord; *spontem*, *spontem*, etc.; *forte*, by chance; *gratias*, out of favor, or gratitude; *ingratias*, unwillingly; *ritum* (probably from a lost noun *ritus*, duty; *ritum*, in vein of the root *ritus*, *ritus*).

Here belong some of the local adverbs in *itas*, as *patritas* and *funitas*, and the adverb *penitus*, thoroughly. *Radicitas*, radically, refers to the total taking away of something, and *funitas*, totally, refers to a total destruction of a thing, as *Ros penitus perit*, things thoroughly understood, Cic. Or. 1. 23. *Religiosum* or *religiosum* *in specie*, things thoroughly understood, Cic. Or. 1. 23. *Religiosum* or *religiosum* *in specie*, things thoroughly understood, Cic. Or. 1. 23. *Religiosum* or *religiosum* *in specie*, things thoroughly understood, Cic. Or. 1. 23. *Religiosum* or *religiosum* *in specie*, things thoroughly understood, Cic. Or. 1. 23.

*Obiter* (from *ob* and *iter*, having originally the local meaning of *obiter*, is used as an adverb of MANNER, signifying 'in passing', 'superficially'.

1. Edm. Caesarem certiorum facit, sese depopulatis agris non tunc ab oppidis vim hostium prohibere. Cic. B. G. 1. 11. — 2. Vos fortasse sapienter excessistis, ubi ea quam liberatis. Cic. ad Brut. 1. 15. 5. — 3. Ubi sapienter ingenia in occulto latent? Plaut. Capt. 1. 2. — 4. Mihi senatus non, ut multis, bene gessit, sed, ut nemini, conservare reipublice testimonium dedit. Cic. Pis. 3. 6. — 5. Ubiorum civitas ampla atque florens fuit, ut est capta Germanorum. Cic. B. G. 4. 3. — 6. Erit quoniam Latini tum etiam Graecis, ut temporibus illis, eruditus. Cic. Brut. 28. — 7. Quomodo modo Hasdrubal sine certamine exere tum adducere potuit? Quomodo autem dux Romanus ei non obstitit? Liv. 25. 35. — 8. Quomodo autem in boni fidelesque cives esse possunt? Liv. 22. 60. — 9. De familia quomodo antea placuisse scribis, faciemus. Cic. Fam. 11. 1. 3. — 10. In hac arte nullum est preceptum quomodo verum invidetur, tantum quomodo iudicetur. Cic. Or. 2. 33. — 11. Quomodo soles de ceteris rebus, sic de amicitia soles disputare. Cic. Am. 4. — 12. Qui per largitionem magistratum adepti sunt, solent ita potestatem gerere ut non tantum per familiam, sed etiam per civitatem severitas. Cic. Off. 1. 25. 88. — 13. Si est vulgus, ex veritate pauca, ex opinione multa aestimat. Cic. Rose. Com. 10. — 14. Pomponium Atticum sic amo ut alterum barrem. Cic. Fam. 13. 1. — 15. Ariovistus dixit, ut in concedi non oporteret si in nostros finis impetum faceret, sic ita nos esse iniquos, quod in suo iure se interpellaremus. Cic. B. G. 1. 44. — 16. Omnium magnam animam, sicut arborum altitudo, nos delectat, radices stirpesque non ita. Cic. Or. 13. — 17. Meminerunt illi, perinde conjecturam de moribus suis homines esse facientes, prout hoc vel illud elegerint. Pan. Pan. 20. 6. — 18. Quotus finit pagat secus multum per literas, et adimat nihil a se cuiquam de te secus esse dictum. Cic. Att. 1. 19, 11.

§ 553. Objects of manner take the form of ATTRIBUTIVE PHRASES in the ablative if manner is expressed: 1) by ONE OF THE NOUNS DENOTING

1 In the dark. — 2 large. — 3 captus, G. us, idea, notions. — 4 learned. — 5 § 421. — 6 *arbitratim* adducere, to 'lead to' his army, i. e. to join him with his army. — 7 *adlocutus* *credidit* = *dare* *credidit* *ad* *credidit*. — 8 to oppose; how should he have failed to oppose? — 9 *famula*, the servants. — 10 bribery. — 11 *potestatem* *gerere*, to administer their office. — 12 a gap, a deficiency. — 13 in their private fortunes. — 14 greatness. — 15 smoothness. — 16 § 444. 2. — 17 another. Why can *alius* not be used here? — 18 *interpellare* severity. — 19 § 444. 2. — 20 another. Why can *alius* not be used here? — 21 *interpellare* severity. — 22 § 444. 2. — 23 another. Why can *alius* not be used here? — 24 *interpellare* severity. — 25 § 444. 2. — 26 another. Why can *alius* not be used here? — 27 *interpellare* severity. — 28 § 444. 2. — 29 another. Why can *alius* not be used here? — 30 *interpellare* severity. — 31 § 444. 2. — 32 another. Why can *alius* not be used here? — 33 *interpellare* severity. — 34 § 444. 2. — 35 another. Why can *alius* not be used here? — 36 *interpellare* severity. — 37 § 444. 2. — 38 another. Why can *alius* not be used here? — 39 *interpellare* severity. — 40 § 444. 2. — 41 another. Why can *alius* not be used here? — 42 *interpellare* severity. — 43 § 444. 2. — 44 another. Why can *alius* not be used here? — 45 *interpellare* severity. — 46 § 444. 2. — 47 another. Why can *alius* not be used here? — 48 *interpellare* severity. — 49 § 444. 2. — 50 another. Why can *alius* not be used here? — 51 *interpellare* severity. — 52 § 444. 2. — 53 another. Why can *alius* not be used here? — 54 *interpellare* severity. — 55 § 444. 2. — 56 another. Why can *alius* not be used here? — 57 *interpellare* severity. — 58 § 444. 2. — 59 another. Why can *alius* not be used here? — 60 *interpellare* severity. — 61 § 444. 2. — 62 another. Why can *alius* not be used here? — 63 *interpellare* severity. — 64 § 444. 2. — 65 another. Why can *alius* not be used here? — 66 *interpellare* severity. — 67 § 444. 2. — 68 another. Why can *alius* not be used here? — 69 *interpellare* severity. — 70 § 444. 2. — 71 another. Why can *alius* not be used here? — 72 *interpellare* severity. — 73 § 444. 2. — 74 another. Why can *alius* not be used here? — 75 *interpellare* severity. — 76 § 444. 2. — 77 another. Why can *alius* not be used here? — 78 *interpellare* severity. — 79 § 444. 2. — 80 another. Why can *alius* not be used here? — 81 *interpellare* severity. — 82 § 444. 2. — 83 another. Why can *alius* not be used here? — 84 *interpellare* severity. — 85 § 444. 2. — 86 another. Why can *alius* not be used here? — 87 *interpellare* severity. — 88 § 444. 2. — 89 another. Why can *alius* not be used here? — 90 *interpellare* severity. — 91 § 444. 2. — 92 another. Why can *alius* not be used here? — 93 *interpellare* severity. — 94 § 444. 2. — 95 another. Why can *alius* not be used here? — 96 *interpellare* severity. — 97 § 444. 2. — 98 another. Why can *alius* not be used here? — 99 *interpellare* severity. — 100 § 444. 2. — 101 another. Why can *alius* not be used here? — 102 *interpellare* severity. — 103 § 444. 2. — 104 another. Why can *alius* not be used here? — 105 *interpellare* severity. — 106 § 444. 2. — 107 another. Why can *alius* not be used here? — 108 *interpellare* severity. — 109 § 444. 2. — 110 another. Why can *alius* not be used here? — 111 *interpellare* severity. — 112 § 444. 2. — 113 another. Why can *alius* not be used here? — 114 *interpellare* severity. — 115 § 444. 2. — 116 another. Why can *alius* not be used here? — 117 *interpellare* severity. — 118 § 444. 2. — 119 another. Why can *alius* not be used here? — 120 *interpellare* severity. — 121 § 444. 2. — 122 another. Why can *alius* not be used here? — 123 *interpellare* severity. — 124 § 444. 2. — 125 another. Why can *alius* not be used here? — 126 *interpellare* severity. — 127 § 444. 2. — 128 another. Why can *alius* not be used here? — 129 *interpellare* severity. — 130 § 444. 2. — 131 another. Why can *alius* not be used here? — 132 *interpellare* severity. — 133 § 444. 2. — 134 another. Why can *alius* not be used here? — 135 *interpellare* severity. — 136 § 444. 2. — 137 another. Why can *alius* not be used here? — 138 *interpellare* severity. — 139 § 444. 2. — 140 another. Why can *alius* not be used here? — 141 *interpellare* severity. — 142 § 444. 2. — 143 another. Why can *alius* not be used here? — 144 *interpellare* severity. — 145 § 444. 2. — 146 another. Why can *alius* not be used here? — 147 *interpellare* severity. — 148 § 444. 2. — 149 another. Why can *alius* not be used here? — 150 *interpellare* severity. — 151 § 444. 2. — 152 another. Why can *alius* not be used here? — 153 *interpellare* severity. — 154 § 444. 2. — 155 another. Why can *alius* not be used here? — 156 *interpellare* severity. — 157 § 444. 2. — 158 another. Why can *alius* not be used here? — 159 *interpellare* severity. — 160 § 444. 2. — 161 another. Why can *alius* not be used here? — 162 *interpellare* severity. — 163 § 444. 2. — 164 another. Why can *alius* not be used here? — 165 *interpellare* severity. — 166 § 444. 2. — 167 another. Why can *alius* not be used here? — 168 *interpellare* severity. — 169 § 444. 2. — 170 another. Why can *alius* not be used here? — 171 *interpellare* severity. — 172 § 444. 2. — 173 another. Why can *alius* not be used here? — 174 *interpellare* severity. — 175 § 444. 2. — 176 another. Why can *alius* not be used here? — 177 *interpellare* severity. — 178 § 444. 2. — 179 another. Why can *alius* not be used here? — 180 *interpellare* severity. — 181 § 444. 2. — 182 another. Why can *alius* not be used here? — 183 *interpellare* severity. — 184 § 444. 2. — 185 another. Why can *alius* not be used here? — 186 *interpellare* severity. — 187 § 444. 2. — 188 another. Why can *alius* not be used here? — 189 *interpellare* severity. — 190 § 444. 2. — 191 another. Why can *alius* not be used here? — 192 *interpellare* severity. — 193 § 444. 2. — 194 another. Why can *alius* not be used here? — 195 *interpellare* severity. — 196 § 444. 2. — 197 another. Why can *alius* not be used here? — 198 *interpellare* severity. — 199 § 444. 2. — 200 another. Why can *alius* not be used here? — 201 *interpellare* severity. — 202 § 444. 2. — 203 another. expresses INSTRUMENTALITY OF CAUSE, as *Helvetii dixerunt se magis virtute quam dolo contendere*, Cæs. B. G. 1, 13. the Helvetians said that they were accustomed to fight rather by valor than by fraud (i. e. BY MEANS of their valor, not by fraudulent MEANS), where by using the preposition *with* as exponent of MANNER, a meaning different from that of the author would be imparted to the sentence. 'To fight with valor' is not *virtute contendere*, but *magis (cum) virtute* or *fortiter contendere*. — *Multas imperatores temeritate atque inscientia exercitum in locum precipitem perduxisse dixit*, Liv. 26, 2; he said that many commanders had led their armies by recklessness and ignorance (out of recklessness, not with recklessness) into 'tight' places. Thus, if we would render the sentence 'he accomplished the business with diligence and care' by mere ablatives (*negotium diligentia et cura perfectum*), we would thereby change the relation of MANNER into one of INSTRUMENTALITY. If we mean to convey the idea 'diligently' and 'carefully' we must use either adverbs of manner, or provide the ablatives *diligentia et cura* with attributes of intensity (*magna, omni, or summa diligentia et cura*).

Obs. 3. There are a few nouns, the mere ablatives of which are generally considered to express a relation of MANNER. But although we generally render these nouns as if they belonged to the relation of manner, we shall find, on closer examination, that they either belong to the relation of instrumentality and cause, or to that of coincident action, and that even in the latter instance they were originally conceived as expressing 'means' and 'instrumentality'. Here belong 1) *jure* (rightly, justly, correctly), which is used either without any attribute or with possessives (*meo, tuo, suo* etc.), or *optimo*; as: *Queritur num jure hoc feceris*, it is the question whether you have done this rightly (whether you were right in doing this). — *Hoc tuo (or optimo) jure affirmare videtur*, it seems that you assert this 'rightly', 'correctly' (i. e. that you are right in asserting this). *Jure* has evidently the meaning 'on right grounds', and hence belongs to the relation of CAUSE. — 2) *Injuria*, as *injuria bellum inferre*, to commence a war unjustly, Cæs. B. G. 1, 26. An unjust war is not one that is waged in an unjust manner, but one that is commenced on frivolous grounds, and hence the expression belongs to the relation of 'cause' and 'instrumentality'. — 3) *Vi* and *dolo*, violently and fraudulently, as in the phrase *vi, dolo, precario rem possidere*, which means to be in possession of a thing by violent, or fraudulent means, or on sufferance. It is evidently a relation of instrumentality. — 4) *Casa*, accidentally, the English equivalent of which (*by accident*) shows its causal nature. — 5) *Silentio* (in silence), for inst. *expediti castris*. This is a relation of coincident action, but conceived as a relation of cause, since 'silence' made the coming out of the camp possible. — 6) *Clamore*, with shouts, as in Livy 26, 5: *Prælium non secuta modo clamore ac tumultu est ceptum*, the battle was not commenced in the usual manner with shouting and uproar, where *clamore* stands in apposition to *secuta modo*, and must be in the ablative, not because it expresses manner, but because it must agree with a regular object of manner. — 7) *Lamentis lacrimisque*, with wailing and tears, as *Vos quippe colite patrum lamentis lacrimisque catenatos pressepai*, I wish that you, too, would not honor *prospici* has typically this meaning) the dead with wailing and tears, Liv. 25, 38, where the ablative evidently denotes the means by which the dead are honored.

Obs. 4. The Latin often uses instead of the general noun *modus* (*partim*) more special nouns, but still of general import, EMPLOYING the noun *modus*, as *conditio*, but in the meaning 'condition', *ratio*, *ritus* (habit, manner), *mos* (habit, manner). All these nouns may be used in place of *modus*, taking the same kind of attributes, as *Pax hac conditione* (*depo*) *datur est*, at etc., Peace was given on this condition that etc. (i. e. 'in this manner', the terms of the peace being the manner in which it was concluded). — *Ab nostris eadem ratione qua pridie resistitur*, by our troops the defence was made in the same manner as on the day before, Cæs. B. G. 5, 40. — *Simili ratione Pompejus in suis castris consedit*, in a similar manner Pompey kept within his camp, Cæs. B. C. 3, 76. — Relations of modality, not belonging to those specially enumerated, are expressed by the ablatives of GENERAL nouns denoting that relation, being subject to the same restrictions as the noun *modus*. Thus the idea of 'motive' is expressed by *causa*, as: *Hic partem copiarum traduxerunt, ad consilio* ut castellum expugnarent, there they crossed a part of their troops with a view to take the fort, Cæs. B. G. 2, 9. These, and many similar ablatives, belong to the relation of modality, but not to that of MANNER. In the following sentence: *Hoc fecit non dubia spe debellari posse*, he did this in the certain hope that the war might be finished (Liv. 25, 35), the phrase *non dubia spe* expresses coincident action (*non dubie sperans*).

Obs. 5. The ablative of those abstract nouns which DIRECTLY describe the manner of an action (§ 553, 2) is frequently made dependent on the preposition *cum* (§ 446, 2) which is generally inserted between the adjective preceding and its governing noun, as: *Intellexit Caesar quando id cum periculo fecerit*, Caesar was aware with how great danger he had done this, Cæs. B. G. 1, 17. The form with *modus* (§ 446, 1) does not admit *cum*, but may be expressed by *in* or *ad* with the accusative, as *in hoc modum*, *ad hunc modum* (Cic. Tusc. 2, 4), *in hac conditione*, but not *hac cum modo*, *hac cum conditionibus*. See § 561, R. 72.

Obs. 6. From the relation of MANNER must be distinguished those ablative phrases which express the relation of COINCIDENT ACTION, as *ornatu regali in solio sedet* (Cic. Fin. 2, 21); *magno comitatu ingressi sunt*, Cic. Cat. 3, 2, 6, *omnibus copiis ad castra contendere*, Cæs. B. G. 2, 7; *nudato corpore pugnare*, Ib. 1, 25, *aequo animo ferre*. All these and similar objects do not denote the MANNER of sitting, of coming, of hastening, and fighting, but actions COINCIDENT and combined with another action of the same subject. They are equivalent to participial expressions, used as accessory predicates (to sit being in royal state; to come along having a great retinue; to hurry to the camp having all the forces; to fight having an unprotected body etc.). See § 554 foll.

Obs. 7. Sometimes phrases, properly belonging to the relation of manner, take the form of an accessory predicate, in the same way as the relation of CAUSE is expressed according to § 501, R. 115. Thus especially the participle *usus* is employed, which in this relation performs the same function as the participles *adductus*, *commotus* etc. in the relation of CAUSE, as: *Postquam in vulgus militum elatum est, qua arrogantia in colloquio Ariovistus usus omni Gallia Romanis interdixisset*, after it had become generally known in the army with what arrogance (literally 'using what arrogance') Ariovistus had forbidden the Romans from the whole of Gaul, Cæs. B. G. 1, 46.

1. *Hoc modo iste sibi prospicere*<sup>1</sup> didicit, Cic. Verr. 2, 1, 61. — 2. *Siculi ipsum Verrem pertulissent*<sup>2</sup>, si humano modo, si usitato more<sup>3</sup>, si uno aliquo in genere peccasset<sup>4</sup>, Ib. 2, 2, 3, 9. — 3. *Thessali<sup>5</sup> servorum modo præter spem repente<sup>6</sup> manumissorum<sup>7</sup> jacebant*<sup>8</sup> sese insectatione<sup>9</sup> et conviciis<sup>10</sup> Romanorum, Liv. 39, 26. — 4. *Sumat argentum*<sup>11</sup> alicunde; si nullo alio pacto, fenore<sup>12</sup>, Ter. Phorm. 2, 1, 71. — 5. *Ab his, qui pecudum<sup>13</sup> ritu ad voluptatem omnia referunt*<sup>14</sup>, longe dissentiunt, Cic. Am. 9, 32. — 6. *Ariovistus postulavit ut uterque cum equitatu veniret: alia ratione sese non esse venturum*<sup>15</sup>, Cæs. B. G. 1, 42. — 7. *Hac oratione habita mirum in modum conversae<sup>16</sup> sunt omnium mentes*, Ib. 1, 41. — 8. *Scipio omni cura intentus erat necubi hosti aequo<sup>17</sup> se committeret loco*, Liv. 25, 33. — 9. *Hoc te ita rogo, ut te majore studio rogare non possim*, Cic. Qu. Fr. 1, 2. — 10. *Marcellus, captis Syracusis, cum res in Sicilia tanta fide atque integritate composuisset*<sup>18</sup>, Romam devexit<sup>19</sup>, Liv. 25, 40. — 11. *Catulus, sententiam rogatus, hoc initio est summa cum auctoritate<sup>20</sup> usus*, Cic. Verr. 1, 15.

#### B. RELATION OF COINCIDENT ACTION.

§ 554. The relation of COINCIDENT ACTION represents the accompanying circumstances of the predicate as separate actions, but as closely united with the main act, or affecting the same, so as to be conceived as a relation of modality in regard to the latter.

Obs. The relation of coincident action holds a middle place between the relations of manner, time, and cause on the one side, and the connection of two actions by copulative co-ordination, on the other. Hence it may either assume the grammatical form of an OBJECT, or that of a PREDICATE (accessory predicate). Thus the English phrases 'to perform an action GLADLY, THANKFULLY, UNWILLINGLY' express a relation of COINCIDENT ACTION, although ADVERBS formed like those of MANNER are used to express them. These adverbs do not express the property of the actions, but the feelings of the subject while performing the actions. Not the ACTION is thankful, but the individual. The LATIN expresses coincident actions of this kind mostly in the form of an accessory PREDICATE, either by participles, or adjectives, but often objective forms are employed, as: *Nos vero, si tale quid acciderit, LAETI ET AGENTES GRATIAS PAREMUS*, but we, if such a thing happens, will obey cheerfully and thankfully (literally 'being cheerful and rendering thanks'), Cic. Tusc. 1, 49. The same relations may be expressed objectively in the form of ADVERBS (rarely), or in the form of ABLATIVES, or by PREPOSITIONS, as: *Antonius Sulpicium exstinctum LAETE atque INSOLENTER tulit*, Antonius bore the death of Sulpicius joyfully and insolently, Cic. Phil. 9, 3. — *Præterita GRATE meministi*, he remembers the past thankfully, Cic. Fin. 1, 19. — The same relations may be expressed by the phrases *grato* (*laeto*) *animo*, *gratissima memoria*, *summo cum gaudio* etc. Cic. Phil. 4, 1; 10, 3.

§ 555. The relation of coincident action takes either a predicative or an objective form. The predicative form is called the form of the ACCESSORY

<sup>1</sup> To take care. — <sup>2</sup> to endure. — <sup>3</sup> customary. — <sup>4</sup> to offend. — <sup>5</sup> *Thessalus*, a Thessalian. — <sup>6</sup> suddenly. — <sup>7</sup> *manumittere*, to emancipate. — <sup>8</sup> *se jactare*, to boast. — <sup>9</sup> prosecution. — <sup>10</sup> *convicium*, abuse. — <sup>11</sup> money. — <sup>12</sup> *fenus*, loan at interest. — <sup>13</sup> *pecudes*, cattle. — <sup>14</sup> to refer to, to place in connection with. — <sup>15</sup> supply: *dixit*. — <sup>16</sup> *convertere*, to turn. — <sup>17</sup> even. — <sup>18</sup> to settle. — <sup>19</sup> *devehere*, to sail for. — <sup>20</sup> power, effect.

PREDICATE (§ 461), as *Hæc FLENS a Cæsare petiuit*, this he asked *weeping* from Cæsar, Cæs. B. G. 1, 20. The objective form of the coincident action consists either in an adverb of manner, or in a phrase in the ablative, or in prepositional expressions, especially with *cum* and *sine*.

Rem. 18. The accessory predicate may consist of a present participle, an adjective, or substantive, but it is always CONCEIVED as a present participle, the adjectives and substantives used in this relation having the force of participles of predicate-adjectives and nouns, the participle of the copula being understood. In whatever form the accessory predicate may appear, it must always agree with its logical subject in case, number, and (if it is movable) in gender. The logical subject of the accessory predicate is always at the same time a member of the phrase in which the principal predicate is contained. Thus it may be the grammatical subject, or an object of the principal predicate, or an attribute combined with a phrase of the principal predicate. The accessory predicate, according to the relation of its logical subject, is either in the nominative, or in any of the oblique cases, mostly the accusative:

(a) AGREEING WITH THE SUBJECT: *Gaius festinans advenit*, Gaius arrived hastening (in haste).—*Nemo saltat sobrius*, nobody dances 'sober'. Cic. Mur. 6.—*Cæsar proquestor in provinciam abiit*, Cæsar went as proquestor into the province.

(b) AGREEING WITH OBJECTS: *Itæ legatos flentes dimisit*, the king dismissed the ambassadors weeping (the ambassadors wept).—*Imperator Sempronius petente veniam dedit*, the commander pardoned Sempronius at his request (literally 'to the asking one').—*Eo Sempronius teste usus est*, Sempronius used him as a witness.

(c) AGREEING WITH ATTRIBUTES: *Tyrannus specie innocens interfecti viri agnoscitur*, the tyrant was haunted by the image of the 'innocently killed' man.

Obs. Accessory predicates, in regard to their grammatical function in the sentence, must be considered as predicative phrases, combined with the principal predicative phrases (§ 93). The logical subject of the accessory predicate is always the common word of the two phrases. In resolving phrases of this kind, the phrases of the accessory predicate must first be put down as phrases with a finite predicate. Then the phrase must be changed into the grammatical form which the common word has in the governing phrase, turning the finite verb into a participle, which is omitted if the finite verb is the copula *esse*, as for inst. in the sentence: THE COMMANDER LEFT THE DEAD UNBURIED.

1. SINGLE PHRASES: The commander left the dead, *imperator mortuos reliquit*.—The dead are unburied, *mortui insepulti sunt*. 2. The subject *mortui* being in the accusative in the governing phrase, the dependent predicative phrase is changed into an accusative, the copula *sunt* being omitted: *mortuos insepultos*.

THEY FOUND THE SOLDIERS SLEEPING.

1. SINGLE PHRASES. They found the soldiers, *militēs inveniunt*.—The soldiers sleep, *militēs dormiunt*. 2. The subject *militēs* being in the accusative in the governing phrase, the dependent phrase is changed into an accusative phrase with participial form (*militēs dormientes*), and thus incorporated with the governing phrase.

Rem. 19. NO PARTICIPLES but the PRESENT can be employed as accessory predicates. Hence this construction is generally confined to the active voice. But the language has in the periphrastic conjugation of the participle (§ 506) a means to supply this defect, and hence participles, in the form of the perfect passive, frequently occur as accessory predicates, which must always be considered as PRESENT PARTICIPLES of the PERIPHRASTIC CONJUGATION, as

*Imperator vincitus hostibus traditus est*, the general was surrendered in fetters (fettered) to the enemy. The periphrastic participle, in this connection, strictly keeps the force which it has in the finite tenses, namely that of a STATE, the general was in a fettered STATE when he was surrendered. The tense in this construction is always conceived as a PRESENT, relatively to the time of the main action.

Here belong the expletive participles *adductus*, *permotus* etc. (p. 119, R. 115), which are frequently used as accessory predicates (Ex. 16, 19).—For the use of the periphrastic participles in *urus*, and gerundials in *us*, as accessory predicates, see p. 139, R. 158; p. 147, § 516. For the use of the participial adjectives in *bundus* as acc. pred. see P. I., p. 352.

Obs. 1. The English equivalents of participial accessory predicates are generally PARTICIPLES, but frequently other forms are used, especially when the participle is in an oblique case, in which instance the English participle would often give rise to ambiguity. Thus the phrase *Flentem cum reliquit*, which is perfectly clear in Latin, would become ambiguous if literally rendered into English I left him weeping, since it would be left doubtful whether the weeping refers to the grammatical subject, or to the object. But often we use prepositional or adverbial expressions aside from this instance, as: *Velim scire quid dicens frater tuus profectus sit*, I wish to know with what words (literally 'what saying') thy brother departed. So we translate the accessory predicates *libens* and *sciens* by adverbs, as: *Hanc causam libens relinxissem*, I would have gladly (willingly, fain) kept silent about this reason. Liv. 27, 8.—*Ut offenderet sciens neminem*, that he knowingly offended no one. Cic. Plauc. 16, 41.

Obs. 2. The case of an accessory predicate is, of course, in the accusative if the sentence in which it is used is an infinitive clause, provided that it refers to the subject-accusative of the sentence. (Ex. 18, 19, 20.)

1. Plato uno et octogesimo anno scribens est mortuus. Cic. Sen. 5, 13.—2. Terentius orans<sup>1</sup> urbem inivit. L. 40, 16.—3. Orat vos Avitus et flens obsecrat<sup>2</sup>, ne se homini illi nefario condonati<sup>3</sup>. Cic. Clu. 70, 201.—4. Centuriones<sup>4</sup> omnes fortissime pugnales concitaverunt<sup>5</sup>. Cic. B. G. 6, 40.—5. Ne terrum<sup>6</sup> quidem ad bene<sup>7</sup> moriendum hostis oblatus est: scilicet bellum condidit. Liv. 9, 3.—6. Additum est, ne ante dimitterent legatos quam Romanum imperatorem, quid petentes<sup>8</sup> venissent, certiores facerent. Ib. 30, 28.—7. Quidam incandescentes<sup>9</sup> sentis<sup>10</sup> nique<sup>11</sup> pilis<sup>12</sup> stabant. Ib. 44, 36.—8. Sulpicius properans, mandata<sup>13</sup> vestra facere cupiens in hac constantia<sup>14</sup>, morbo adversante<sup>15</sup>, perseveravit. Cic. Phil. 9, 3, 6.—9. Opto ut moriens<sup>16</sup> populum Romanum liberum relinquam. Cic. Ib. 2, 46.—10. Omnia hæc non dubitans confirmare possum. Cic. Fam. 5, 16, 4.—11. Ego plus hodie boni feci improbis<sup>17</sup> quam sciens<sup>18</sup> ante hunc diem unquam. Ter. Heu. 5, 4, 40.—12. Tota Italia illius facti gloriam libens agnovit. Cic. Mil. 14.—13. Armatas rex aliquid impetrare posse videtur, inermis vero nullius momenti<sup>19</sup> apud Romanos erit. Liv. 35, 45.—14. Qui hinc integri et sinceri<sup>20</sup> Romanus erunt, imbuti<sup>21</sup> illinc et infecti<sup>22</sup> Romanis delinquentibus<sup>23</sup> redempti. Ib. 40, 11.—15. Hostes separatim et divisi<sup>24</sup> opprimi possunt. Ib. 25, 28.—16. Jam illis promissis standum<sup>25</sup> non esse quis non videt, quæ condas quis<sup>26</sup> metu, quæ decipias dolo promiserit? Cic. Off. 1, 10.—17. Tu ne quæ idæ quidem fecit obijcis, ne desti<sup>27</sup> quæ ex<sup>28</sup> parte conjunctus cum eo reperire. Cic. Clu. 11, 35.—18. Ex lacrimis horum existimare<sup>29</sup> potes, decuriones<sup>30</sup> hæc decrevisse lucrimantis. Cic. Clu. 69, 197.—19. Cæsar cognovit Considium timore perterritum quod non vidisset pro viso sibi renuntiassse<sup>31</sup>. Cæs. B. G. 1, 22.—20. Legati existimabant, spatium<sup>32</sup> sumpto, Romanos omnibus instructiores<sup>33</sup> rebus cepturos bellum. Liv. 42, 47.

Rem. 20. THE ADJECTIVES which are used as accessory predicates, generally with English adverbs as equivalents, cannot be reduced to a definite rule, since the Latin language frequently employs ADVERBS even in relations which do not belong to 'MANNER', but to 'COINCIDENT ACTION'. Almost all adjectives thus employed belong to those expressing personal qualities, especially affections and tempers of the mind, and properties referring to the body, to health and life, to clothing and arms. But some, especially such as have a participial character, do not belong to any of these classes. The following adjectives are most frequently used as accessory predicates:

*tristis* (in the meaning sadly), *latus* (gladly), *alacer* (cheerfully), *iratus* (angrily), *timidus* (timidly), *trepidus* (anxiously, trembling), *infestus* (with hostility), *infensus* (with animosity), *invidus* (unwillingly), *quæstus* (quietly), *tacitus* (in silence), *integer* and *incolumis* (unhurt, without injury), *intentus* (attentively), *improbitus* and *incurtus* (in-

<sup>1</sup> *Orare*, to celebrate an ovation, i. e. a minor triumph.—<sup>2</sup> to adjure.—<sup>3</sup> to abandon, to sacrifice.—<sup>4</sup> a centurion, commanding a division of one hundred soldiers.—<sup>5</sup> *concidere*, to fall.—<sup>6</sup> the sword.—<sup>7</sup> bravely.—<sup>8</sup> to request (to be rendered by a prepositional expression).—<sup>9</sup> to lean on.—<sup>10</sup> *nica*, to be supported by.—<sup>11</sup> *pilum*, a javelin.—<sup>12</sup> order.—<sup>13</sup> undiminished course.—<sup>14</sup> § 52, R. 229.—<sup>15</sup> unintentionally.—<sup>16</sup> *momentum*, weight.—<sup>17</sup> *imbutus*, to stain.—<sup>18</sup> *inficere*, to infect.—<sup>19</sup> *delinquentum*, a bait, an allurements.—<sup>20</sup> *stare ad aliquid*, to abide by something.—<sup>21</sup> inst. of *adquis*.—<sup>22</sup> See § 408, 4.—<sup>23</sup> See § 445, R. 55.—<sup>24</sup> to judge.—<sup>25</sup> *decuriones*, the members of the common council.—<sup>26</sup> to report.—<sup>27</sup> *spatium*—*tempus*.—<sup>28</sup> *instruere*, to provide.

cautiously), *ferox* (furiously), *citus* (rapidly), *subdolos* (treacherously), *innocens*, *innocuius*, and *insons* (innocently), *occultus* (hidden, in secret), *imprudens* (without knowledge of), *necopinans* and *inopinans* (without expecting), *memor* (remembering), *immemor* (unmindful), *vivus* (alive), *aeger* (sick), *sanus* (healthy), *salvus* (in safety), *praesens* (in presence, or 'in cash'), *absens* (in one's absence), *nudus* (naked, without protection), *paludatus*\* (in full uniform), *inermis* (unarmed), *dulcis*, sweet, *frequens* (frequently, in large numbers), *rarus* (seldom, in small numbers, far between), *confertus* (crowded, in close columns), *diversus* (on different roads, in the plur.), *praeceps* (see OBS. 3.), *sublimis* (on high), *mutuus* (as a loan, especially in the phrase *pecunia mutua data*, money given on loan), and many other adjectives.

OBS. 1. The English language uses the form of the accessory predicate only in a few instances with adjectives. But even in Latin the question whether the form of an adverb, or the form of an adjective must be used, does not always depend on the nature of the relation which is to be expressed. Adjectives are always used in the adverbial form if the relation is one of MANNER, i. e. if the adjective represents a property of the action, and not a quality of the subject. Thus adverbs must always be used in such phrases as 'to write elegantly' (*ornate scribere*, Cic. Tusc. 2, 3); to flee ingloriously (*turpiter fugere*, Cæs. B. G. 2, 24); to speak barbarously (*barbare loqui*, Cic. Tusc. 2, 4); to sing falsely, *absurde canere* (Cic. ib.). Here not the subjects of the action, but the actions are represented to be elegant (*oratio ornata*), inglorious (*fuga turpis*), barbarous (*sermo barbarus*), false (*cantus absurdus*). In all these examples the actions expressed by the predicate are essentially modified and changed by the circumstance connected with them. The other extreme is when this connection is merely an external one, not changing or even affecting the actions, but expressing a state or condition of the subject merely in REGARD to the principal predicate, which may be seen best when the predicate is a verb implying a local action. Thus in the phrase 'GAJUS ARRIVED SAFELY', the action of ARRIVING is not at all affected by the safe condition of the subject. Although a loose English idiom often employs adverbs in such relations, the Latin always expresses them by adjectives in the form of accessory predicates (*Gajus incolumis* or *salvus advenit*, not *incolumiter* or *salviter*). Thus we must say *quietus* (not *quiete*) *sedet*, he sits quietly (Cic. Sen. 6, 17), and *latus* (not *late*) *abiit* or *reliit*. Cicero, in describing Nestor's language uses the metaphor 'it flowed sweeter than honey', saying *dulcior* (not *dulcius*) *melle fluebat oratio* (Sen. 10, 31), since the action of flowing is not at all affected by the sweetness. But between these extremes there are many intermediate cases in which the two relations pass over into each other. This occurs especially in two instances: (a) If the circumstance, while properly belonging to the subject, more or less affects or modifies the action, both forms, the adverbial and the adjective, are used according to the fancy of the author, or according to established usage. Thus Cicero says: *Siquid muliebriter, serviliter, ignave facimus* (Tusc. 2, 23), where not the actions, but the persons are womanish, slavish, or cowardly. But the actions are impregnated and modified by the qualities of their doers; hence the relation passes over into that of manner. Cicero says *timide facimus* (Cic. Tusc. 2, 23), but Sallust (Cat. 60, 3) *timidi resistunt*. Thus occurs *occultus venit* (Sall. Jug. 61, 1), and *occulte proficiscitur* (Cæs. B. C. 1, 66); *ferox instabat*, he dashed fiercely (Sall. Jug. 84, 1), and *ferociter adequitur* (Liv. 3, 47, 2). Thus the Latin always says *studiose* (not *studiosus*) or *diligenter* (not *diligens*) *rem tractat*, although not the action is studious or diligent, but the doer. — (b) If the action as such is mentioned without the doer, or if the action has an impersonal form, the adverb (with some exceptions, see R. 25, OBS. 2), and not the adjective is used, although the circumstance belongs rather to the person than to the act. Thus Cicero, while, in the personal construction, he has *Quietus sedet* (Sen. 6), says impersonally '*ad quiete vivendam*', to live quietly (Cic. Fin. 1, 16), where the form of an accessory predicate would be a grammatical impossibility.

\* *Paludatus*, a participial form, without a corresponding verb, and of unknown derivation, is used only as an accessory predicate, especially in the phrase *paludatum ex urbe exire*, to leave the city in full uniform. It is said of the chief-commander who is leaving the city for the theater of war.

† The student should be careful not to mistake this relation for an attributive relation, as most grammarians do by pronouncing such adjectives to be 'IN APPPOSITION'. An attributive adjective has no relation whatever to the predicate, not even an external one, but belongs exclusively to its own governing noun. The sentences 'THE SICK MAN ARRIVED' and 'THE MAN ARRIVED SICK', are to each other in exactly the same relation as the sentences 'COMMISSIONER A. ARRIVED' and 'A. ARRIVED AS COMMISSIONER'. The first forms are attributive, but the last forms are predicative. These relations are utterly confused by applying the term 'apposition' to the form '*the man arrived sick*'. For it is evident that according to this meaning of the term the two forms 'Commissioner A. arrived' and 'A. arrived as Commissioner' would be both appositional. Hence those grammarians who call the adjective *sick* in the second phrase, an *appositive* adjective, either misapply the term, or misunderstand the relation.

OBS. 2. The limits noticed in OBS. 1 are frequently disregarded by the poets, who often use adjectives where prose-writers would employ adverbs, as *Rapidus* (inst. of *cito*) *fratrem vocavit*, he rapidly (in haste) called his brother, Virg. Æn. 5, 13. Thus poets frequently clothe the adverbial relations of time and place in the form of accessory predicates, and even in the form of attributes, as *Vesperlinus pete tectum*, seek at evening thy roof (inst. of *vesperi*). Hor. Epist. 1, 6, 20. — *Æneas se matutinus agebat*, Æneas was early astir (inst. of *mane*). Virg. Æn. 8, 465. — *Domesticus otior*, I enjoy my leisure at home (inst. of *domi*). Hor. Sat. 1, 6, 127.

OBS. 3. Here belongs the frequent phrase *præcipitem ire, agi, dari, or ferri* (*præceps irit, præceps actus est*) in the meaning 'to rush headlong, to be driven into ruin' (literally: to go with the head foremost); as *Peccatis indulgens præcipitem amicum ferri sinit*, who connives at his friend's faults, suffers him to rush (precipitously) to his destruction. Cic. Am. 24, 89. *Præceps* is not used as an adverb before the silver age. Similar is the phrase *sublimem ferri* or *sublimem abire* (*sublimis fertur* or *abit*), to be borne aloft, or on high. In this phrase, however, the adjective form is chiefly poetical (but see Ex. 26), while in prose the adverbial expression (but in the form of the neuter adjective *sublime*) is the usual one, as *aër sublime fertur*, the air rises upward. Cic. N. D. 2, 39.

1. Hannibal hanc contumeliam tacitus tulit. Liv. 35, 19. — 2. Etoli incauti<sup>1</sup> oppressi<sup>2</sup> sunt. Ib. 37, 4. — 3. Non placuit Lycios, qui nati liberi sint, ulli genti in servitūtem dari<sup>3</sup>. Ib. 41, 6. — 4. Inter omnes convenit<sup>4</sup>, ut primo quieti in foro obversarentur<sup>5</sup>. Ib. 38, 1. — 5. Gallo-Græci nudi pugnabant. Ib. 38, 21. — 6. Scipio monuit præfectos navium, ut vigilias nocturnas<sup>6</sup> intenti<sup>7</sup> servarent<sup>8</sup>. Ib. 26, 43. — 7. Nihil feci iratus, nihil impotentis animo, nihil non diu consideratum<sup>9</sup>. Cic. Har. R. 2, 3. — 8. Lictores<sup>10</sup> consuum quinque viri in hostium potestatem venerunt. Liv. 27, 27. — 9. Sempronius sæpe antehac fidem prodiderat, luxuria atque inopia præceps abierat. Sall. Cat. 25, 4. — 10. Marius hoc tempore (nam postea ambitione præceps datus est) consulatum petere<sup>11</sup> non audēbat. Ib. Jug. 63, 16. — 11. Multi nobiles Etrusci primo praesentes erant coudemnati; postea sibi met ipsi exilium consciscerent<sup>12</sup>, cum absentes damnati essent, bona tantum poenae præbebant<sup>13</sup>. Liv. 29, 37. — 12. Privati eam conditionem læti accipere. Ib. 31, 13. — 13. Calanus Indus (the Indian) sua voluntate rivus est combustus<sup>14</sup>. Cic. Tusc. 2, 22. — 14. Post diem tertium veni in ædem Telluris<sup>15</sup>, et quidem<sup>16</sup> invitus. Cic. Phil. 2, 35. — 15. Mane Germāni frequentes ad Cæsarem in castra venerunt. Cæs. B. G. 4, 13. — 16. Mea quidem sententia (frequens enim te audivi et adfui) homines illos sale<sup>17</sup> tuo et lepore<sup>18</sup> pellexisti<sup>19</sup>. Cic. Or. 1, 47. — 17. Quid tandem novi fecerunt matronae<sup>20</sup>, quod frequentes in causā ad se pertinente<sup>21</sup> in publicum<sup>22</sup> processerunt? Liv. 34, 5. — 18. Rure scale<sup>23</sup> mœnium altitudini æquare<sup>24</sup> poterant. Ib. 26, 45. — 19. Accedebat huc ut nunquam conferti, sed rari magnisque intervallis præliarentur<sup>25</sup>. Cæs. B. G. 5, 16. — 20. Nuntia G. Fabio, Æmilium præceptorum ejus memorem<sup>26</sup> et vixisse et mori. Liv. 22, 49. — 21. Herennius Pontius omnis quam primum inviolatos<sup>27</sup> dimittendos censuit. Ib. 9, 3. — 22. Tibi nos, Rulli, totam Italiam inermem tradituros existimasti? Cic. Leg. Agr. 1, 5, 16. — 23. In eis dentibus eburneis<sup>28</sup> scriptum litteris Punicis<sup>29</sup> fuit, regem Masinissam imprudentem eos accepisse, (sed) re cognita reportandos<sup>30</sup> curasse. Cic. Verr. 4, 46, 103. — 24. Cato scribit, legiones sæpe alacris in eum locum profectas (esse) unde redituras se non arbitrarentur. Cic. Tusc. 1, 42. — 25. Animadvertit Cæsar, Sequanos tristes capite demisso<sup>31</sup> terram intuēri<sup>32</sup>. Cæs. B. G. 1, 32. — 26. Pubes<sup>33</sup> Romana credēbat patribus, Romulum procellā sublimem raptum<sup>34</sup> esse. Liv. 1, 16.

Rem. 21. FORM-ADJECTIVES used as accessory predicates in Latin, mostly correspond to adverbs in English. Here belong 1) the ordinal adjectives with an adverbial force, including *prior*, *princeps* (first, foremost), *ultimus*, *postrēmus*; 2) the cardinals (and distributives) *unus*, *solus*, *totus*, *multus*, *singuli*; 3) the adjectives *propior* and *proximus*, having in this respect

<sup>1</sup> Unprepared for the emergency. — <sup>2</sup> *opprimere* in military language means to overpower the enemy by surprise. — <sup>3</sup> *in servitūtem dare aliquem*, to assign somebody as a slave. — <sup>4</sup> impersonally used: All agreed. — <sup>5</sup> to walk about. — <sup>6</sup> the nightly guard-service. — <sup>7</sup> rigidly. — <sup>8</sup> to observe. — <sup>9</sup> considered. — <sup>10</sup> licitors, the constant menial attendants of curule magistrates. — <sup>11</sup> to be a candidate for. — <sup>12</sup> *sibi consciscere*, to inflict upon one's self. — <sup>13</sup> to offer, to leave for punishment. — <sup>14</sup> *comburare*, to burn. — <sup>15</sup> Tellus, the goddess of the Earth. — <sup>16</sup> *et quidem*, and, too. — <sup>17</sup> *sal*, salt, wit. — <sup>18</sup> *lepos*, wit, humor. — <sup>19</sup> *pellicere*, to attract. — <sup>20</sup> the ladies, the women. — <sup>21</sup> *pertinere ad*, to affect somebody or something. — <sup>22</sup> to appear publicly in a body. — <sup>23</sup> ladders. — <sup>24</sup> *æquare*, to adapt. — <sup>25</sup> *præliari*, to fight. — <sup>26</sup> unhurt. — <sup>27</sup> *dens eburneus*, an elephant tusk, of very high value with the ancients. — <sup>28</sup> Punic (the same as Hebrew) letters. — <sup>29</sup> to take back. — <sup>30</sup> cast down. — <sup>31</sup> to look at the ground. — <sup>32</sup> youth. — <sup>33</sup> *rapere*, to carry.

the nature of ordinals; 4) the determinatives *idem* and *et ipse*, in the meaning *likewise*; 5) the negative determinatives *nullus* and *nihil* with the force of the particle of negation (*non*).

Obs. 1. The adjective form of the ordinals, as accessory predicate, is used to express the English adverbial forms 'first', 'at first', if ONE AND THE SAME ACTION is represented to be performed or suffered by SEVERAL DOERS, but first (second etc.) by one among them. Such phrases may always be paraphrased by 'he (etc.) was the first who did (suffered) the action', as: *Signifer portam primus iitit*, the standard-bearer entered the gate first. Liv. 41, 4 (i. e. he was the first among all the troops that entered the gate). Sometimes these ordinals are rendered by English ordinal adjectives with 'as': *Antiochus se tertium accens*, masc.; *a Romanis pti dicit*, Antiochus said he was aimed at as the third by the Romans. Liv. 37, 25 (Ex. 7).

Obs. 2. The adverbial forms in *um* (*primum*, *iterum*, *tertium* etc.) are used if the SAME ACTION is represented as done or suffered by the SAME DOER for the first, second etc. time. This form may be paraphrased by 'first', 'for the first time', 'the first time', as: *Non hodie me primum (adv.) frater accusat, sed hodie primum aperte*, my brother does not to-day accuse me for the first time, but to-day he does it first openly. Liv. 40, 15.— *Lei Battus lingua natis solutis loqui primum cepit*, there Battus, the fethers of his tongue being removed, began first for the first time to speak. Just. 13, 7. Here belong the often mentioned formulas: *tertium, quoniam etc. censet*. Sometimes, but rarely, the forms in *ore* are used in this relation, as *Hoc anno, pti dicitur a passenda vici, tertio post conditam urbem lectisternium fuit*, in this year there was, for the first time, the peace of the gods, the third time a lectisternium. Liv. 7, 2. Sometimes it may appear doubtful whether the adjective or the adverbial form must be used, as in the passage: *Quid d. e. decretum supplicacionis m'di primum post urbem conditam fuit a consiliis*, which honor decretem supplicacionis m'di primum post urbem conditam fuit a consiliis, which honor was conferred on me, the first time it was given to a citizen since the building of the City. Cic. Cat. 3, 6. [The construction consists of two different sentences constructed into one: 1) that the honor then and there was given for the first time to a togatus (which construction requires the adverb *primum*); 2) that Cicero was the first among the togati who obtained it. This construction requires the adjective *primus*. Hence the writer might have used either form, but he preferred the adverb to avoid several ambiguities which would have arisen from the use of the adjective. Similarly the passage Ex. 17. must be explained.]

Obs. 3. The adverbial forms in *o* (*primo*, *deinde*, *tertio* etc.) are used if DIFFERENT ACTIONS are represented as being performed or suffered by the SAME PERSON in succession. But in this instance the forms in *um* (with *deinde* instead of *iterum*), may also be used. These adverbs are rendered by 'first', 'firstly', 'at the first place', as: *Tyrannus primo (or primum, but not primus) negare aliter urbem se accepturum, deinde Philoclem jussit* etc., the tyrant first (in the first place) said that he would not accept the city otherwise; then he ordered Philocles etc. Liv. 32, 38.— *Liquores primum (or primo, but not primi) in devos salus crederentur, deinde in rivos castellique sua dilapsi sunt*, the Ligurians first retreated into devous forests, and then dispersed in their rivers and forges. Liv. 40, 17.

Obs. 4. Instead of *primus* (in the adjective form), *primus* is frequently used, especially in the meaning 'foremost'. The ordinal expression 'first', 'firstly', for the first time, is expressed by *ultimus* or *postimus*. *Primus* is only employed when the ordinal must take ADJECTIVE form according to obs. 1; *postremus* is mostly used if the numeral must take ADJECTIVE form according to obs. 2 and 3. If the English 'first' refers either to two persons (parties), or to two actions, *prior* is used instead of *primus*, and the adverb *prius* takes the place of both *primum* and *primo*. *Hannibal princeps in prolium ibat, ultimus conserto proelio excedebat*, Hannibal went into battle first (among his soldiers), and was the last to leave the field after the close of the battle. Liv. 21, 4.— *Carnates principes ex omnibus bellum facturus pollicebantur*, the Carnates promised that they would take the foremost part in the war among all. Caes. B. G. 7, 2.— *Rea prior pignus abstulit*, the king gave up the battle first (there being only one more party to the action). Liv. 31, 17.— *Legati prius* (inst. of *primum* or *primo*), *deinde*, *Phar-macum adire jussi sunt*, the envoys were ordered to address first Antiochus, and then Ptolemy. Liv. 41, 19.

Obs. 5. A similar distinction as between *primus* and *postimus* is made in the use of *potissimus* and *potissimum* (chiefly, see § 405), as: *Par que dum nunti colentia, potissimus tentare*, the guide tried first and foremost (of the other soldiers) what seemed to be of doubtful strength for a foothold. Sall. Jug. 94, 2.

Obs. 6. If the ordinals refer to LOCALITY (at the first place), either literally, or metaphorically (of passages in books) the forms in *um* are wholly extended, and the adjective form of the accessory predicate is alone used (the forms in *o* being doubtful, there being no

vouchers for them at hand), as: *Ut Miltiades imago in parile prima (not primum) poneretur*, that Miltiades's picture was placed first (had the first place) in the picture-hall. Nep. Milt. 6, 3.— *Alia prima ponit orator, alia postrema*, he (the orator) will place some of the points first, and others last. Cic. Or. 15.— The words *propior* (nearer) and *proximus* (next) likewise denote order in respect to locality, but so as to refer to another place. They generally take the adjective form if they refer to the SUBJECT, and the adverbial form (in *us* and *e*) if referring to OBJECTS, as: *Jugurtha propior montem cum omni equitatu suos collocat*, Jugurtha arranged his troops nearer to the mountain (i. e. being nearer to the mountain), having all his cavalry with him. Sall. Jug. 49.— *Crassus proximus mare hiemarat*, Crassus had had his winterquarters nearest to the sea. Caes. B. G. 3, 7, 2.— *Ne propius castra moveret*, lest he should move his camp nearer. Caes. B. G. 4, 9.

1. Augustus *primus* omnium tigrin<sup>1</sup> Romae ostendit in cavea<sup>2</sup> mansuefactum<sup>3</sup>. Plin. H. N. 1, 8, 11.— 2. Livius *primus* rogatus est sententiam. L. 37, 14.— 3. His diebus referretur<sup>4</sup> quidam, quae *primus* quisque ex Romanis ducibus fecisset. *Primus* navali proelio Dullius vici<sup>5</sup>, *primus* Charius Dentatus in triumpho duxit<sup>6</sup> elephantos. Sen. Brev. V. 13.— 4. *Primus* Alexandrini legati ab Ptolemaeo et Cleopatra regibus vocati sunt. Liv. 44, 19.— 5. Omnium nationum exterarum *princeps* Sicilia se ad amicitiam populi Romani applicuit<sup>7</sup>. Cic. Verr. 2, 2, 2.— 6. Rapuit<sup>8</sup> fatum Marcellum ad Hannibalem, ut ex quo<sup>9</sup> *primus* secundus<sup>9</sup> pugnae gloriam ceperat<sup>10</sup>, in ejus laudem *postremus* Romanorum impunito am eadere<sup>11</sup>. Liv. 26, 29.— 7. *Tertius* ad hos Favonius accessit<sup>12</sup>. Cic. Fam. 8, 11.— 8. Legio Martia<sup>12</sup> *princeps*, cum hostibus conflixit<sup>13</sup>. Cic. Phil. 14, 14.— 9. Cum areretur<sup>14</sup> quae civitates liberae essent, Thesalos *primos* omnium nominavit consul. Liv. 32, 10.— 10. Hostis *prior* in castra copias reduxit. Ib. 44, 37.— 11. Consul regem equum consabat *priorem* dicere<sup>15</sup>. Ib. 32, 33.— 12. *Leratus* omnium *primum* filium Scipioni sine pretio<sup>16</sup> redditum regem dixit. Ib. 37, 36.— 13. Praetor Romanus spem factam hosti credidit, nihil se *priorem* motum<sup>17</sup>. Ib. 40, 31.— 14. *Præcones*<sup>18</sup> *primos* excivere<sup>19</sup> Albano. Hi, ut regem audirent, *proximi* constitere<sup>20</sup>. Ib. 1, 28, 2.— 15. *Princeps* in senatu *tertium* lectus<sup>21</sup> est P. Scipio Africanus. Ib. 38, 28.— 16. Sex priores illo anno *primum* creati sunt. Ib. 32, 27.— 17. Exercitus Asiatici *primum* lectos *primo*<sup>22</sup> Romam advexerunt<sup>23</sup>. Ib. 39, 6.— 18. Carthaginienses quod *primo* majorem suorum fuisset, deinde ab Syphace ad se pervenisset, repetere<sup>24</sup> eam<sup>24</sup>. Ib. 40, 47.— 19. Temporum divisio in eandem aetatem sex<sup>25</sup> partita est: *primo* preparandum<sup>26</sup> est, *secundo* servandum<sup>27</sup>, *tertio* nutriendum<sup>28</sup>, *quarto* legendum<sup>29</sup>, *quinto* condendum<sup>30</sup>, *sexto* promendum<sup>31</sup>. Varro R. R. 1, 37.

Obs. 7. The English adverbs 'wholly', 'entirely', are sometimes expressed by the adverbs *prorsus* and *penitus*, but more generally by the adjective *totus*, as *Multitudo, novarum rerum avida, Antiochi tota erat*, the multitude, eager for a change of affairs, belonged wholly (entirely) to Antiochus. Liv. 35, 33.— *Alone*, both as an adjective and an adverb is expressed by the adjective *unus* or *solus*, as *Antigonus ex Philippi amicis unus inchoat<sup>1</sup> perire<sup>2</sup>*, Antigonus alone among the friends of Philip had remained unharmed. Liv. 10, 54.— *Quam rem sibi solus alius solam quam eam altero regere*, when it seemed more convenient to govern alone than together with another man. Cic. Off. 3, 10, 41.— Both *unus* and *solus* are placed in the GENITIVE if they are combined attributively with possessives (s. 254, R. 9), as *Qui de suis amicis sententia omnia gerit*, who does everything according to his own opinion alone. Liv. 44, 22.— *Idem solus soluti sunt*, *crus*, so many are solicitous alone for my sake. Ter. Heaut. 1, 1, 77.— *Multus*, as accessory predicate denotes 'frequently', as *Marius nobilitati multus ac ferax instabat*, Marius frequently and fiercely defied the nobility. Sall. Jug. 84, 1.— *Qua lingua multa jam Ariovistus utebatur*, which language Ariovistus now frequently used. Caes. B. G. 1, 47.— 'Singly', if referring to plural subjects or objects, is mostly expressed by the adjective *singuli*, less frequently by the adverb *singillatim*, as *Sic ulciscar ea genera singula*, I shall thus punish each of these classes singly. Cic. P. R. Qu. 9, 21.

Obs. 8. *Non*, the particle of negation, is frequently expressed adjectively in the form of an accessory predicate by *nullus*, or, if not referring to persons, by *nihil*, as *Servus ab*

1 *Tigris*, a tiger.— 2 *pin.*— 3 to tame.— 4 to enslave.— 5 to parade.— 6 *se applicare ad amicum*, to join a friend with.— 7 *rapere aliquem*, to hurry somebody.— 8 The following *eum* is the antecedent of *ex quo*.— 9 *successui*.— 10 *capere ex aliquo*, to gain from somebody.— 11 *accutere ad aliquem*, to join somebody.— 12 the legion of March, called so in honor of the day of Caesar's assassination (on the Ides of March).— 13 to fight.— 14 *argere*, to discuss the question.— 15 to speak.— 16 ransom.— 17 to undertake.— 18 herald.— 19 to enfil out.— 20 *consistere*, to place one's self.— 21 *legere*, to choose.— 22 *lectus aratus*, a brazen couch.— 23 *advhere*, to import.— 24 to reclaim.— 25 *divisio in sex partita est*, the division is sixfold, consists of six parts.— 26 *preparare*, to prepare the land.— 27 to sow the land.— 28 to cultivate the land.— 29 to reap the harvest.— 30 to store the crops.— 31 to market the fruits.

*armis nullus discedit*. Sextus does not lay down his arms. Cic. Att. 15. 22.—*Illū quidem nocte nihil præterquam vigilatum est in urbe*, aside from this, there was no watching on that night in the city. Liv. 3. 26. 12. Here belongs, perhaps, the phrase '*nihil impedio, per me licet*, I am not in the way (I have no objection), you (he, they) may do it'.

Obs. 9. The English '*likewise*', '*also*', '*at the same time*', are frequently expressed in the form of an accessory predicate, either by *et ipse* or by *idem* (in place of the adverb *item*), as *Romāni se in castra recepērunt; rex et ipse copias in castra reduxit*, the Romans retired to their camp; the king withdrew his troops *likewise* to his camp. Liv. 44. 37.—*Oratio splendida et grandis et eadem in primis facta*, a splendid and grand style, and at the same time especially witty. Cic. Brut. 79. 273.—*Quid honestum est, idem est utile*, what is moral, is also expedient. Cic. Off. 2. 10. *Et ipse* is used if the SAME predicate refers to DIFFERENT (logical) subjects, and *idem*, if DIFFERENT predicates refer to the SAME subject.

1. Cæsar hac parte Galliæ pacatā<sup>1</sup>, totus et mente et animo in bellum Trevirorum in-  
elst<sup>2</sup>. Cæs. B. G. 6. 5.—2. Et ei qui suum negotium gerunt, et ei qui se totos tradidē-  
runt voluptatibus, sentiunt<sup>3</sup>, sine amicitia vitam esse nullam. Cic. Am. 23. 86.—3. *Soli*  
omnium otiosi<sup>4</sup> sunt qui sapientie<sup>5</sup> vacanti<sup>6</sup>; *soli*<sup>7</sup> vivunt. Sen. Br. Vit. 14.—4. Mihi  
semper uni magis quam universis<sup>8</sup> placere voluisti. Cic. Qu. Fr. 1. 1. 16.—5. Honestius<sup>9</sup>  
eum agrum vos universi<sup>10</sup> quam *anguli* possiderētis. Cic. Agr. 2. 31.—6. Omnes cives  
judicant, civitatis salutem cum *unius meæ* salutis esse conjunctam. Cic. Vat. 3.—7. Sulla  
in operibus<sup>11</sup>, in agmine<sup>12</sup>, atque ad vigilias<sup>13</sup> nullus adesse solēbat. Sall. Jug. 96. 3.—  
8. Philotimus non modo nullus venit, sed ne per litteras quidem certiorē me fecit  
quid egerit. Cic. Att. 11. 24.—9. Sic tecum loquar ut misericordia permōtus esse videar  
quæ tibi nulla debetur<sup>14</sup>. Cic. Cat. 1. 16.—10. *Nihil* profecto sapis<sup>15</sup>. Cic. Phil. 2. 8.—  
11. *Nihilne* te nocturnum presidium Palatii<sup>16</sup>, *nihil* urbis vigilie<sup>17</sup>, *nihil* timor populi,  
*nihil* horum ora<sup>18</sup> vultusque<sup>19</sup> movērunt? Cic. Cat. 1. 1.—12. Intervēnit cogitatio<sup>20</sup>  
Locros urbem recipiendi, quæ sub defectionem<sup>21</sup> Italiæ et ipsa desciverat<sup>22</sup> ad Pœnos.  
Liv. 29. 6.—13. Non omisere pugnam deserti<sup>23</sup> ab Etruscis Fregellani; sed postquam  
vulneratos ambo consules vidēre, tum *et ipsi* cum Crispino consule duobus jaculis<sup>24</sup>  
icti<sup>25</sup>, et Marcello adolescente, sancio<sup>26</sup> et ipso, effugerunt. Ib. 27. 27.—14. Pugnare  
*et ipsi* mihi placet. Ib. 44. 39.—15. Milites levem<sup>27</sup> et concursatorem<sup>28</sup> hostem, cum  
procul missilibus<sup>29</sup> pugna eluditur<sup>30</sup>, instabilem<sup>31</sup> eundem ad comminus<sup>32</sup> conseren-  
das manus, expulerunt loco. Ib. 27. 18.—16. Indūcis<sup>33</sup> sermonem<sup>34</sup> factum<sup>35</sup>, me  
dicere solere esse me Jovem, eundemque dictitāre<sup>36</sup> Minervam esse sororem meam.  
Cic. Dom. 34. 92.—17. Nihil est liberale quod non *idem* justum est. Cic. Off. 1. 14.—  
18. Necesse est, qui fortis sit, eundem esse magni animi. Cic. Tusc. 3. 7.—19. Mu-  
sici<sup>37</sup>, qui erant quondam *eidem* poetæ, machinati<sup>38</sup> ad voluptatem sunt versus<sup>39</sup>  
atque cantum<sup>40</sup>. Cic. Or. 3. 44.

Rem. 22. The NOUNS used as accessory predicates, are mostly PERSONAL nouns, describing a person by his qualities (for inst. *office, vocation, state of life, age* etc., as *rex, consul, obses, captivus, nuntius, senex, adolescens*), and representing such qualities, not as inherent in the person (as in the apposition), but as existing only in regard to, and in coincidence with, the action expressed by the principal predicate. In English they are generally connected with the predicate by the conjunction '*as*', or are expressed by means of adverbial phrases (in the quality, capacity of). Sometimes such personal nouns are rendered by nouns denoting the QUALITIES they express, as *puer*, in his (my etc.) boyhood.

Junius ædem Salutis quam consul voverat, censor locaverat, dictātor dedicāvit, J. de-  
dicated as dictator the temple of Salus, which he had vowed as consul (in his consulship),

<sup>1</sup> To subdue.—<sup>2</sup> *insistere in aliquid*, to apply one's self to something.—<sup>3</sup> to be of opinion.—<sup>4</sup> are at leisure in the proper sense of the word.—<sup>5</sup> the study of wisdom.—<sup>6</sup> to apply one's time.—<sup>7</sup> supply 'they'.—<sup>8</sup> all the rest together.—<sup>9</sup> The adverb is taken predicatively. § 552, obs. 2. The predicate must be rendered by a potential with 'would'.—<sup>10</sup> all of you taken together.—<sup>11</sup> at the military labors.—<sup>12</sup> at the march.—<sup>13</sup> at the guards, or posts.—<sup>14</sup> *debetur aliquid alicui*, something is owing or due to somebody.—<sup>15</sup> to be wise.—<sup>16</sup> The Palatium, one of the seven hills, was the quarter where most of the aristocracy had their seats.—<sup>17</sup> the sentinels in.—<sup>18</sup> as, face.—<sup>19</sup> mien.—<sup>20</sup> then the idea struck him.—<sup>21</sup> desertion, defection.—<sup>22</sup> *desciscere*, to fall off, to go over.—<sup>23</sup> by although.—<sup>24</sup> dart.—<sup>25</sup> struck.—<sup>26</sup> wounded.—<sup>27</sup> nimble, agile. Transl. by a relative clause (*who was*).—<sup>28</sup> a good skirmisher.—<sup>29</sup> missile.—<sup>30</sup> to dodge.—<sup>31</sup> unstable.—<sup>32</sup> *comminus conserere manus*, to fight hand to hand. Transl. by a noun.—<sup>33</sup> to introduce.—<sup>34</sup> remark.—<sup>35</sup> witty.—<sup>36</sup> to assert.—<sup>37</sup> musician.—<sup>38</sup> *machinari aliquid*, to give to something a form adapted to.—<sup>39</sup> *versus*, poetry.—<sup>40</sup> music.

and which he had built (giving it on contract) as censor. L. 10. 1.—*Cato litteras Græcas senex didicit*, Cato learned the Greek language in his old age (as an old man). Cic. Sen. 8.

Obs. More rarely non-personal nouns are used as accessory predicates, as *Cæsari Gal-  
lia provincia obvenit*, to the lot of Cæsar fell Gaul as province. Sometimes accessory predicate-nouns are connected by comparative conjunctions (*ut, tamquam, velut*), if the connection of the noun with the main action is merely assumed by the subject, as *Mortem ut finem miseriæ exspecto*, I expect death as the end of my miseries. Tac. H. 4. 58.—In place of nouns, absolute adjectives may be employed as accessory predicates (Ex. 6).

1. *Ego nec obses ut Romānis traderer, nec ut legatus mitterer Romam petii*. Liv. 40. 15.—2. Juravit Labienus se nisi<sup>1</sup> victorem in castra non reditūrum. Cæs. B. C. 3. 87.—3. Quicunque (*whosoever*) bellum civile optavit<sup>2</sup>, eum detestabilem<sup>3</sup> civem reipublice natum (esse) judico. Cic. Phil. 13. 1. 1.—4. C. Sempronius dixit. *Fulvium* prope unum nuntium delēti exercitus (sui) Romam redisse. Liv. 26. 2.—5. *M. Junius Silanus* pro-  
prietor adiutor<sup>4</sup> ad res gerendas Scipioni a senātu datus est. Ib. 16. 19.—6. Si Romāni hoc cunctantur facere, brevi extorres<sup>5</sup> regno Ptolemæus et Cleopatra Romam venient. Ib. 44. 19.—7. Cetera<sup>6</sup> multitudo, præcipue qui graviorum armorum erant, spectatores<sup>7</sup> pugnae stabant. Ib. 44. 4.—8. *Ego* non eadem volo senex quæ puer volui. Sen. Ep. 61.—9. Auri argentique<sup>8</sup> usum, velut omnium scelerum materiam<sup>9</sup>, sustulit<sup>10</sup> Lycurgus. Just. 3. 2.

Rem. 23. All kinds of accessory predicates may have, as logical subjects, the TRANSITIVE objects of the verbs to which they are attached in which case they must agree with these objects in the same way as the complet-  
ing predicates of factitive verbs (§ 487). Almost all kinds of transitive verbs may take accessory predicates combined with their transitive ob-  
jects. Such accessory predicates may have a participial, an adjective, or a substantiv form, the same as those which refer to the grammatical sub-  
ject of the sentence:

Attalum aliquamdiu nihil agentem tennere, they kept Attalus for some time inactive. Liv. 31. 15.—Multorum te oculi non sentientem custodient, the eyes of many will watch you, without your being aware of it. Cic. Cat. 1. 2. 6.—Quod illum spoliātum stipatum-  
que lictoribus vidēres, that you should see him despoiled, and surrounded with lictors. Cic. Verr. 2. 4. 40.—Ceteros inermis Demetriadem remittit, the rest he sends back without arms to Demetrias. Liv. 39. 14.—Alterum vivum amavi, alterum non odi mortuum, the one I loved in his life-time, the other I do not hate after his death. Cic. Off. 3. 18. 73.—Oppressit igitur necopinantis ignarosque omnis Perseus, Perseus, therefore, overpowered them all without their expecting or knowing it. Liv. 40. 57.—Neque enim liberum id vobis Philippus permittit, for Philip will not leave this free to you. Ib. 31. 6.—Quinc-  
tius deos testis ingrati Magnætum animi invocavit, Quintus invoked the gods as wit-  
nesses of the ingratitude of the Magnetes. Ib. 35. 31.

Obs. 1. Grammatically this construction is the same as that with a double accusative after factitive verbs (§ 487, R. 74). But the accessory predicates do not complete the idea of the verbs with which they are combined by means of the unity of their logical-sub-  
jects with the transitive objects of these verbs. There is hardly a transitive verb which might not be combined with an accessory predicate of its transitive objects. The most usual verbs which may be thus connected, are the same as may take parti-  
cipial gerundials (which are nothing but a species of accessory predicates, § 514), especi-  
ally verbs of motion (*mittere, ducere, reducere, dimittere, remittere, agere, redigere*), *re-  
linquere, capere, tenere, opprimere, invenire, tradere, permittere, dare, damnare, assequi, obtinere*, and a great many others.

Obs. 2. To the verbs which sometimes take an accessory predicate of their transitive objects belong *audire* and *videre*, both of which are more generally construed with an infinitive clause, as: *Neque eum quisquam quærentem* audivit, nor did any one hear him inquire. Nep. Tim. 4 (instead of the more usual *eum quærentem*, that he inquired).—*M. Catonem vidi in bibliotheca sedentem, multis circumfusus* Stoicorum libris; I saw Cato sitting in his library, surrounded with many books of the Stoics. Cic. Fin. 3. 2.—*Subvenies si me hærentem vides*; You will come to my help if you see me flustering. Ib. 3. 4.—*Quis te illis diēbus sobrium* vidit? Ib. Pis. 10.—*Illum stipatum* lictoribus vidēres. Ib. Verr. 2. 4. 40.—For nouns thus used as accessory predicates see Ex. 27. 29.

<sup>1</sup> Except.—<sup>2</sup> to wish for.—<sup>3</sup> detestable.—<sup>4</sup> assistant.—<sup>5</sup> Properly an adjective, '*driven from the country*'. It may be translated by *exile*.—<sup>6</sup> *ceteri* is sometimes (rarely) used in the singular as an attribute of collective nouns.—<sup>7</sup> spectator.—<sup>8</sup> silver.—<sup>9</sup> ma-  
terial.—<sup>10</sup> *tolle*, to abolish.

Obs. 3. Transitive objects of the verb *habere* frequently take passive (periphrastic) participles as accessory predicates, in a signification quite similar to our active tenses of the verb with *have*, except that the Latin participle always denotes a state. This form is remarkable because to it the use of 'have' as an auxiliary verb in the modern languages owes its origin, as: *Portoria parvo pretio redempta habuit, he owned (had) the imposts, having bought them at a small price.* Cæs. B. G. 1, 18 (literally *he had the imposts bought at a small price*).— *Equitatum quem coactum habebat, the cavalry which he had drafted.* Ib. 1, 15 (properly meaning: *the cavalry which he had as a drafted one, or having drafted it*).

Obs. 4. The participles *acceptus, datus, expensus*, as accessory predicates of transitive objects, expressing values, of the verb *referre* or *ferre*, have a technical meaning connected with the Roman account-books. Account-books (*tabulae*) were used by all Romans who had any money transactions. Two books were kept, the one being called *codex expensi* or *dati*, where all charges against other parties were entered (*expendere*, to pay out); the other being called *codex accepti*, where the money due to others was put on their credit (*accipere*, to receive money). The act of entering was called *referre* or *ferre*. Thus *aliquid expensum* or *datum referre a ferre* means to enter something as given or paid to another *i. e.* as due by him, to charge another with something. *Aliquid acceptum referre* means to enter something for inst. *manus* as being received by the party entering, who thereby acknowledged himself to be a debtor to that amount. Hence it is tantamount with 'to owe something to another', as: *Marius Dolabella Verri acceptam petulit quam Verres ei expensum tulit.* Dolabella placed less to the credit of Verres, than Verres placed to his charge (charged him with). Cic. Verr. 2, 1, 39. Both phrases, aside from the account-books, are frequently used in the general meaning 'to owe' or 'to acknowledge to owe' (*acceptum ferre*), and *to have a claim* (*expensum ferre*), as: *Fuit nemo qui non mihi vitam suam, liberos, rempublicum referret acceptam, there was nobody who did not acknowledge that he was indebted to me for his life, children, and for the republic.* Cic. Phil. 2, 5.

1. Histri Strabonem in praetorio<sup>1</sup> *instruentem*<sup>2</sup> atque *adhortantem* suos oppresserunt. Liv. 41, 2.— 2. His diebus audiui quendam sapientem *referentem* quae primus quisque ex Romanis ducibus fecisset. Sen. Br. Vit. 13.— 3. Cogam eum respondere, cur tot viri hunc unum non aut *stantem* comprehenderint<sup>3</sup>, aut *fugientem* consecuti sint. Cic. Cael. 28, 67.— 4. Epaminondas *imperantem* patriam Lacedaemoniis relinquebat quam acceperat *servientem*. Cic. Tusc. 2, 24.— 5. Atque haec non eo<sup>4</sup> dicuntur ut te oratio mea *dormientem* excitasse<sup>5</sup>, sed potius ut *currentem*<sup>6</sup> incitasse<sup>7</sup> videatur. Cic. Qu. Fr. 1, 1, 16.— 6. Quod nisi<sup>8</sup> ita esset, nunquam claros viros senatus *rinctos* hostibus tradidisset. Cic. Off. 3, 29.— 7. Hoc ita comparatum<sup>9</sup> more majorum<sup>10</sup> erat, ne quis triumpharet nisi *perdomitam*<sup>11</sup> pacatamque provinciam tradidisset successori. Liv. 39, 29.— 8. Hunc locum nobilitas praesidiis *firmatum* atque omni ratione<sup>12</sup> *obvallatum*<sup>13</sup> tenebat. Cic. Agr. 2, 1, 3.— 9. Brassica<sup>14</sup> esto<sup>15</sup> vel *coctam* vel *crutam*<sup>16</sup>. Cato R. R. 156.— 10. Dux Romanus in alas *divisum* socialem<sup>17</sup> exercitum habebat. Liv. 31, 21.— 11. Non erunt isti homines audiendi, si quando de amicitia, quam nec usu<sup>18</sup> nec ratione<sup>19</sup> habent *cogitam*, disputabunt<sup>20</sup>. Cic. Am. 15, 52.— 12. Verres *expensa* Chrysogono servo sestertium<sup>21</sup> sexcenta millia<sup>22</sup>, *accepta* pupili<sup>23</sup> Malleoli centum. Cic. Verr. 2, 1, 36.— 13. Omnia mala quae postea vidimus, si recte ratiocinabimur<sup>24</sup>, non *accepta* sed *recepta* Antonio. Cic. Phil. 2, 22.— 14. Philippus rex nuntius suis *insepulchris*<sup>25</sup> ad Cynoscephalas<sup>26</sup> reliquit. Liv. 26, 8.— 15. Consul interclusit<sup>27</sup> hostibus ad urbem iter, catenae<sup>28</sup> *receptae* cepit. Ib. 30, 14.— 16. Consul milites usque ad tertium diem horum *quitos* in castris tenuit. Ib. 36, 23.— 17. Marius dixit, si se consulem fecisset plebs, brevi tempore aut *radicem* aut *montem* Jugurtham se in potestatem populi Romani redacturum<sup>29</sup>. Cic. Off. 2, 30, 39.— 18. Caesar milites *rarus* in muro disponebat. Cæs. B. C. 1, 21.— 19. Scipio ut *improvidos* innotatosque (eos) opprimeret, subitis<sup>30</sup> anchoris<sup>31</sup> ad hostem vadit<sup>32</sup>. Liv. 22, 19.— 20. Syphacis (eos) conjux (wife) regem socium<sup>33</sup> nobis alienasse<sup>34</sup> atque in arma egisse *praecipitem* dicitur. Ib. 30, 14.— 21. Decretum est, *invitum* ne quem militem veterem ducendi<sup>35</sup> jus

<sup>1</sup> The praetorian tent.— <sup>2</sup> to draw up.— <sup>3</sup> to arrest.— <sup>4</sup> to that effect.— <sup>5</sup> to arouse.— <sup>6</sup> to run.— <sup>7</sup> to stimulate.— <sup>8</sup> if not.— <sup>9</sup> to establish.— <sup>10</sup> ancestors.— <sup>11</sup> *perdomare*, to conquer wholly.— <sup>12</sup> by every means.— <sup>13</sup> *obvallare*, to barricade.— <sup>14</sup> cabbage.— <sup>15</sup> From *edere*, the second form of the imperative being used, because the sentence contains one of the RULES laid down by Cato.— <sup>16</sup> raw.— <sup>17</sup> auxiliary (literally 'social').— <sup>18</sup> practically.— <sup>19</sup> theoretically.— <sup>20</sup> to discuss.— <sup>21</sup> Gen. plur. of the second decl. in *um*, as further below '*talentum*'.— <sup>22</sup> For the use of the genitive plural of *sestertium* with *millia*. See R. 31, obs. 6.— <sup>23</sup> ward.— <sup>24</sup> *ratiocinari*, to reckon, to calculate.— <sup>25</sup> unburied.— <sup>26</sup> *Cynoscephalae*, the place of the renowned battle of Flamininus against Philip.— <sup>27</sup> to cut off.— <sup>28</sup> empty, *i. e.* without a garrison.— <sup>29</sup> *redigere*, to bring.— <sup>30</sup> to dispose, to distribute.— <sup>31</sup> to raise.— <sup>32</sup> anchor.— <sup>33</sup> to march by land.— <sup>34</sup> allied.— <sup>35</sup> to alienate.— <sup>36</sup> *ducere*, to compel a soldier to take part in a campaign.

esset. Ib. 31, 8.— 22. Privatis<sup>1</sup> quibusdam ex pecuniâ quam consulis *mutuam* dederant, tertia pensio<sup>2</sup> debebatur. Ib. 31, 13.— 23. Pro impensis in bellum factis quindecim milia talentum dabitis, quingenta *praesentia*, et millia talentum per duodecim annos. Ib. 37, 45.— 24. Ismenias capitalis poenae<sup>3</sup> *absentes* eos damnat. Ib. 42, 43.— 25. Incolumem te cito, ut spero, videbimus. Cic. Fam. 6, 6, 13.— 26. Hannibal hospitibus<sup>4</sup> deos violatâ a Prusiâ fidei *testis* invocans, poculum<sup>5</sup> exhaustum. Liv. 39, 41.— 27. Syphacis conjugem, etiamsi<sup>6</sup> non patrem ejus *imperatorem* hostium videremus, Romanam oportet militi. Ib. 30, 15.— 28. Varro denunciavit<sup>7</sup>, bellum arcessitum<sup>8</sup> in Italiam ab nobilibus esse, mansurumque in visceribus<sup>9</sup> reipublicae, si plures Fabios *imperatores* haberent. Ib. 22, 38.— 29. Cato quam multa excedens vitâ providit<sup>10</sup>, tum quod te, Antoni, *consulem* non vidit. Cic. Phil. 2, 5.

Rem. 24. Sometimes INTRANSITIVE objects take accessory predicates. This, most frequently, occurs with the ablative objects of the verb *uti*, and with the dative objects of several verbs, as

Galli *administris* ad ea sacrificia *Druidibus* utuntur. *The Gauls use the Druids as ministers for these sacrifices.* Cæs. B. G. 6, 16.— *Faciam ut aut vivo aut mortuo gratias agas.* I shall cause you to be thankful to me either living or dead. Cæs. B. C. 3, 101.— *Pax deinde data petentibus Corsis, peace was then granted to the Corsicans at their request.* Liv. 42, 7.

1. Cicero respondit, non esse consuetudinem populi Romani accipere ab hoste armato conditionem: si ab armis discederet<sup>1</sup> velint, se *adjutores* utuntur, legatosque ad Casarem mittant. Cæs. B. G. 5, 41.— 2. Lacesse<sup>2</sup> vos, in contumeliam<sup>3</sup> voco! Populo Romano *dis-mittant* ut volo. Cic. Agr. 1, 7.— 3. Si hoc populo Romano injuste *imperanti* accidere *expetatur*<sup>4</sup> ut volo. Cic. Agr. 1, 7.— 4. Si hoc populo Romano injuste *imperanti* accidere *potuerunt*, quid debent putare<sup>5</sup> singuli<sup>6</sup>? Cic. Off. 2, 8.— 5. Si jacens<sup>7</sup> vobiscum aliquid ageret<sup>8</sup> Antonius, audirent<sup>9</sup> fortasse; *stanti*<sup>10</sup> resistendum est. Cic. Phil. 12, 2.

Rem. 25. Accessory predicates are not only combined with FINITE verbs as principal predicates, but also with infinitives, participles and gerundials. The rules about the grammatical forms which accessory predicates assume in these instances are the same as those for COMPLETING predicates. § 463.

Obs. 1. If an accessory predicate is attached to an object-infinitive, it is treated in every respect, as if the object-infinitive were a finite verb, as: *Hostes separatim et *divisi* opprimi possunt, the enemy may be overpowered separately and divided.* Liv. 25, 38.— *Convivam me tibi committere non ausus sum, I dared not entrust myself as a guest to thee.* Ib. 40, 9.— *Antiocho *reconciliatore* pacis potius quam duce belli uti volumus, we will make use of Antiochus rather as a mediator of peace, than as a leader in war.* Ib. 35, 44.

Obs. 2. If an adjective, as an accessory predicate, is directly attached to SUBJECT-INFINITIVE, it is generally changed into an adverb, according to R. 20, obs. 1, since there is generally no logical subject with which it might be made to agree. But sometimes it is placed in the accusative of the masculine according to the rules for completing predicates (§ 463, 2), as: *Si mori *factum* vult, of *factus* oportet, taceamus, if it is our duty to die in *silence*, let us be silent.* Liv. 40, 9. If, however, in this construction the logical subject of the accessory predicate is added as an object of the impersonal predicate in the dative, it agrees with this dative object (§ 463, R. 19). Such impersonal predicates are *licet, necesse est*, and some predicative adjectives used impersonally (as for inst. *liberum est alieni*): *Postulavit consul ut *triumphanti* sibi inveni *liceret* in urbem, the consul made the demand that it be allowed to him to enter the city in triumphal procession.* L. 31, 20.— *Ut sibi *liberum* esset vel ad bellum *manenti* vel ad pacem *cedenti* rem inclinare, that it might be free to him to direct the situation, either staying for war or yielding for peace.* Ib. 32, 32.— If accessory predicates belong to objects of the SUBJECT-INFINITIVE, they are treated, as if the subject-infinitive were a finite verb. Ex. 2.

Obs. 3. Accessory predicates are sometimes attached to participles, especially in the construction of ablatives absolute. They are then placed, like completing predicates, in the ablative, as: *Theoxena *parris* admodum *relictis omnibus* (liberis) decessit, Theoxena died leaving all her children very small.* Liv. 40, 4.— Rarely accessory predicates are attached to gerundials.

<sup>1</sup> Private persons.— <sup>2</sup> installment.— <sup>3</sup> *capitalis poena*, the same as *capitis*.— <sup>4</sup> of hospitality.— <sup>5</sup> even.— <sup>6</sup> to empty.— <sup>7</sup> even if.— <sup>8</sup> *demandare*, to make the charge.— <sup>9</sup> *bellum ar-tare*, to draw a war over.— <sup>10</sup> *visera* pl. t. (presumed nominative: *viscus, a, visceris*), *causa*, to draw a war over.— <sup>11</sup> *visera* pl. t. (presumed nominative: *viscus, a, visceris*), *causa*, to draw a war over.— <sup>12</sup> *providere aliquid*, to make provision, to provide for something.— <sup>13</sup> to intestines.— <sup>14</sup> *providere aliquid*, to make provision, to provide for something.— <sup>15</sup> to intestines.— <sup>16</sup> *providere aliquid*, to make provision, to provide for something.— <sup>17</sup> to intestines.— <sup>18</sup> to intestines.— <sup>19</sup> to intestines.— <sup>20</sup> to intestines.— <sup>21</sup> to intestines.— <sup>22</sup> to intestines.— <sup>23</sup> to intestines.— <sup>24</sup> to intestines.— <sup>25</sup> to intestines.— <sup>26</sup> to intestines.— <sup>27</sup> to intestines.— <sup>28</sup> to intestines.— <sup>29</sup> to intestines.— <sup>30</sup> to intestines.— <sup>31</sup> to intestines.— <sup>32</sup> to intestines.— <sup>33</sup> to intestines.— <sup>34</sup> to intestines.— <sup>35</sup> to intestines.— <sup>36</sup> to intestines.— <sup>37</sup> to intestines.— <sup>38</sup> to intestines.— <sup>39</sup> to intestines.— <sup>40</sup> to intestines.— <sup>41</sup> to intestines.— <sup>42</sup> to intestines.— <sup>43</sup> to intestines.— <sup>44</sup> to intestines.— <sup>45</sup> to intestines.— <sup>46</sup> to intestines.— <sup>47</sup> to intestines.— <sup>48</sup> to intestines.— <sup>49</sup> to intestines.— <sup>50</sup> to intestines.— <sup>51</sup> to intestines.— <sup>52</sup> to intestines.— <sup>53</sup> to intestines.— <sup>54</sup> to intestines.— <sup>55</sup> to intestines.— <sup>56</sup> to intestines.— <sup>57</sup> to intestines.— <sup>58</sup> to intestines.— <sup>59</sup> to intestines.— <sup>60</sup> to intestines.— <sup>61</sup> to intestines.— <sup>62</sup> to intestines.— <sup>63</sup> to intestines.— <sup>64</sup> to intestines.— <sup>65</sup> to intestines.— <sup>66</sup> to intestines.— <sup>67</sup> to intestines.— <sup>68</sup> to intestines.— <sup>69</sup> to intestines.— <sup>70</sup> to intestines.— <sup>71</sup> to intestines.— <sup>72</sup> to intestines.— <sup>73</sup> to intestines.— <sup>74</sup> to intestines.— <sup>75</sup> to intestines.— <sup>76</sup> to intestines.— <sup>77</sup> to intestines.— <sup>78</sup> to intestines.— <sup>79</sup> to intestines.— <sup>80</sup> to intestines.— <sup>81</sup> to intestines.— <sup>82</sup> to intestines.— <sup>83</sup> to intestines.— <sup>84</sup> to intestines.— <sup>85</sup> to intestines.— <sup>86</sup> to intestines.— <sup>87</sup> to intestines.— <sup>88</sup> to intestines.— <sup>89</sup> to intestines.— <sup>90</sup> to intestines.— <sup>91</sup> to intestines.— <sup>92</sup> to intestines.— <sup>93</sup> to intestines.— <sup>94</sup> to intestines.— <sup>95</sup> to intestines.— <sup>96</sup> to intestines.— <sup>97</sup> to intestines.— <sup>98</sup> to intestines.— <sup>99</sup> to intestines.— <sup>100</sup> to intestines.—

tached to attributive participles, or with participles that are themselves accessory predicates. They always, in such instances, agree with the governing nouns of the participles to which they are attached, and may accordingly assume any of the five cases, as *ut* Nom.: *Plerique, precipites per vastam altitudinem propepsi, exanimantur, the most are killed being headlong precipitated into the enormous depth*, Liv. 38, 23. — (b) GEN.: *Identidem Philippum species et umbrae insontis interempti filii agitabant, Again and again the image and shadow of his innocently killed son haunted Philip*, Liv. 40, 56. — (c) DATIVE: *Exire sua secum efferentibus jussis arma ademit, he took their arms from them who were ordered to leave carrying all their property with them*, Liv. 43, 18. [This dative is directly dependent on the object infinitive *exire*, but it agrees with the governing pronoun *eis* of the participle *jussis* understood.] — (d) ACCUSATIVE: *Legati orabant senatum ne se inuicem deditos acerbius quam in hostis saviret, the envoys asked the Senate not to be more cruel against them who had surrendered without being guilty, than against foes*, L. 39, 54.

In the same way those accessory predicates are treated which are attached to GERUNDIALS, as *Hoc porco piaculo immolando*, by sacrificing this hog as an expiation, Cato R. R. 139. See Ex. 14, 15.

1. Caesar cum exercitum ad pugnam adhortaretur, imprimis commemoravit<sup>1</sup> *testibus se militibus uti posse*, quanto studio pacem petisset, Cæs. B. C. 3, 90. — 2. Quibusdam aliis *absentem capere*<sup>2</sup> imperatorem quam *presentem* monere melius visum est, Liv. 44, 38. — 3. Quod vivit Antonius hodie, quod Lepidus una est, quod exercitus habent non contemnendos, *omne* Casari *acceptum referre possunt*, Cic. Fam. 10, 14. — 4. Dumnorix, cupiditate regni adductus, rebus novis studebat, et plurimas *amicitias* suo beneficio<sup>3</sup> habere obstrictas<sup>4</sup> volebat, Cæs. B. G. 1, 9. — 5. Exules<sup>5</sup> frequentes Rhodios orabant, ne urbem et viciniam<sup>6</sup> sibi et cognatam<sup>7</sup> *innocentiam perire sinerent*, Liv. 37, 17. — C. Legati affirmabant, *se facitos abire in animo habuisse*, Ib. 39, 54. — 7. Posse liberalitate *uti* non spoliantem se patrimonio pecunie est fructus maximus, Cic. Off. 2, 18. — 8. Plane confictor fieri nihil posse dementius quam *scientem* in eum locum *venire*, ubi libertatem sis perditurus, Cic. Rab. 9, 24. — 9. Hannibal nihil majus precatur deos, quam ut *incolumi* *cedere*<sup>8</sup> atque *abire* ex hostium terra *liceat*, Liv. 26, 41, med. — 10. Rex non censuit *incolas* *quitos* in radicibus<sup>9</sup> montium gelidorum<sup>10</sup> *sedentes* frigus aut inopiam laturos, Ib. 28, 19. — 11. Gracchus milites perpetrato<sup>11</sup> sacro *inimici* *reducere*<sup>12</sup> obtinuit, Ib. 23, 35. — 12. Adiles, *pecuniam multam sumpserunt* intertrimentum<sup>13</sup> argenti expleverunt<sup>14</sup>, Ib. 32, 2. — 13. Hæc manus<sup>15</sup>, *quinto sedente* *rege* ad Euphetum, agros nudare<sup>16</sup> populando<sup>17</sup> potuit, Ib. 44, 27. — 14. Peto abs te ut tuam liberalitatem in me *absente* defendendo mihi praestes<sup>18</sup>, Cic. Fam. 5, 9. — 15. *Rempublicam* Muræna cupio tradere *incolumem*<sup>19</sup> ab tantis periculis defendendam, Ib. Mur. 37, 80. — 16. Cn. Fulvius, decem ex Campanorum numero *jussis inermibus* deduci ad se, in fidem omnis recepit, Liv. 24, 47.

Obs. 4. In the same way as in the instances mentioned above, accessory predicates may be dependent on ATTRIBUTIVE GENITIVES, or ATTRIBUTIVE ADJECTIVES, as: *Munes Virginie, mortue quam vive felicioris, tandem quieverunt*; The departed spirit of Virginia, happier when dead than when alive, rested at length, Liv. 3, 58. — At quem hominem, absentem, causam incognitam, condemnasti? *Cujus absentis* nomen receperis (i. e. ad judicandum)? whose name did you receive in his absence (i. e. 'whom did you put to trial when he was absent')? Cic. Verr. 2, 2, 45.

Rem. 26. ABSTRACT DATIVES (p. 83, R. 34), and ABLATIVES of QUALITY (p. 80) are frequently used as accessory predicates; very rarely GENITIVES of QUALITY (p. 77) are used in this relation. With such datives, ablatives, etc., the PARTICIPLE of the copula must be understood.

Obs. 1. Genitives of quality are very rarely used as accessory predicates, as: *Novem annorum* a vobis profectus, post sextum et tricesimum annum redit, Liv. 30, 37; (Having departed from you at the age of nine years; analogous to the ordinary predicate-genitive '*novem annorum eram*'). — The ABLATIVE of quality frequently occurs in this form, as: *Puri animo* Lacedæmonii in Thermopylis occiderunt; With a similar spirit (i. e. being animated with a similar spirit or feeling) the Lacedæmonians fell at Thermopylæ, Cic. Tusc. 1, 42, 101 (with a finite copula: *Puri animo erant Lacedæmonii*). — *Prandete animo forti*; Take your meal with courageous hearts (being with courageous hearts), Cic. Ib.

Obs. 2. The accessory PREDICATE-DATIVE (abstract dative, § 469) is far more frequent than the accessory predicate-genitive. It is of the same nature as the predicate-dative with the copula, only that it is attached to principal predicates expressed by the verbs

<sup>1</sup> To mention. — <sup>2</sup> to denounce, to abuse. — <sup>3</sup> favors. — <sup>4</sup> obstringere, to bind, to oblige. — <sup>5</sup> exul, an exile. — <sup>6</sup> neighboring. — <sup>7</sup> kindred. Transl. both co-ordinates by a compound: *neighboring sister-city*. — <sup>8</sup> to escape. — <sup>9</sup> *radices montis*, the foot of a mountain. — <sup>10</sup> cold. — <sup>11</sup> to perform a sacrifice. — <sup>12</sup> to slaughter. — <sup>13</sup> wear and tear. — <sup>14</sup> to supply. — <sup>15</sup> band, body of troops. — <sup>16</sup> to strip. — <sup>17</sup> to lay waste (supply them). — <sup>18</sup> to lend. — <sup>19</sup> *Incolumem* is not to be connected with *tradere*, but with *defendendam*.

mentioned R. 23, Obs. 1, the copula being conceived as a participle understood, as: Pausanias, quos Byzantii ceperat regis propinquos *tibi muneri misit*, Pausanias sends to thee as a gift (being a gift) the relatives of the king whom he took at Byzantium, Nep. Paus. 8, 3, 1. — *Pars Sabinis eunt auxilio*, a part went as a help (being a help) to the Sabines, Liv. 2, 53. Here belong the frequent phrases *diem* (alicui) *colloquio dicere*, to appoint a day for an interview; *aliquem* (alicui) *praesidio relinquere*, to leave somebody for protection; *aliquid pignori dare*, to give something for security; *aliquid alicui crimini, vitio, or probro dare*, to impute some action to somebody as a crime (Ex. 7, 9). Frequently these constructions must be recast in rendering, as *Fabio laudi non est datum quod pingeret*, it was not considered a ground for praise that Fabius practised painting, Cic. Tusc. 1, 2, 4. The phrase *locum castris capere*, to select a place for a camp may be either understood as an accessory predicate-dative (supplying *sibi*), or as an ellipsis of a dative gerundial (*castris faciendis*). Here belongs the phrase *receptui canere*, to give the signal for retreat, where *militibus* is either supplied or expressed.

1. Tum quum rem<sup>1</sup> habebas, quæstionem<sup>2</sup> te faciebat attentiores; nunc, quum tam æquo animo bona perdas, estimationem<sup>3</sup> te nullam putas accipere, quum me hospitio<sup>4</sup> recipias, Cic. Fam. 9, 16, 7. — 2. Si quid obtigerit<sup>5</sup>, æquo animo paratior moriar, Cic. Cat. 4, 2. — 3. Ignavi milites in proelio nonnunquam integro corpore se abijciunt<sup>6</sup>, atque afflicti<sup>7</sup> et exanimati<sup>8</sup> jacent, Cic. Tusc. 2, 23. — 4. Oppidani prælium majore animo commiserunt quam sustinuerunt, Liv. 44, 31. — 5. Cæsar in animo habuit, conjuncto exercitu cum Domitio per Illyricum Italia subsidio proficisci, Cæs. B. C. 3, 78. — 6. Quarta pars militum præsidio impedimentis relicta erat, Cæs. B. G. 5, 11. — 7. Ego etiam que tu sine Verre commisisti, Verri crimini<sup>9</sup> datus sum, Cic. Cæc. 11, 35. — 8. Virtus sola neque datur dono, neque accipitur, Sall. Jug. 85, 38. — 9. Vitio mihi dant quod mortem hominis necessarii<sup>10</sup> graviter<sup>11</sup> fero, Cic. Fam. 11, 28, 2.

Rem. 27. Often the form of the accessory predicate is borrowed to connect the idea of coincident action with the adverbial relations of PLACE, TIME, and CAUSE. Hence this form is applied to adverbial clauses of all kinds to represent them as coincident with the main action. In the construction of ablatives absolute with present participles, adjectives, and nouns, the relation of the participle to that of the principal predicate is the same as that of an accessory predicate.

Obs. Here belong, in regard to the relation of place, the expressions *obvius*, *sublimis*, *præceps*, and the compounds with *versus*, as *transversus* and *aversus*, instead of the adverbial forms *obviam*, *sublime*, [*capite præmisso*], *transverso*, *ex averso*; as *Adherbal Jugurthæ obvius procedit*, Adherbal marches to meet Jugurtha, Sall. Jug. 21. — *Obvius mihi litteras mittas*, send me the letters to meet me on my journey, Cic. Att. 6, 5. — *Romulus sublimis abiit*, Romulus is borne upward to heaven, Liv. 1, 16, 7. — *Cum cepit eos transversos agere felicitas*, when prosperity has begun to drive them 'across' (i. e. from the straight road), Sen. Ep. 8. — *Hoc toto proelio aversum hostem nemo videre potuit*, in this whole battle nobody could see any of the enemy 'by the back' or 'turned off' (i. e. the back of any one), Cæs. B. G. 1, 26. — In regard to TIME, the participle *natus*, in the meaning old (§ 498, 2), must be considered an accessory predicate (inst. of *natu*, in regard to birth). In other relations the form of the accessory predicate (like that of the English participle absolute), is used when the connected action is meant to convey more than one idea, so that the more definite forms introduced for expressing CAUSE, CONDITION, TIME, in the given case would weaken the meaning of the author. Hence it is very rare that these most frequent constructions with accessory predicates can be resolved into finite forms without impairing the force of the expression, although, generally, the one or the other idea must be considered as the prevailing one. Examples occur on every page of the Latin authors, as: Dumnorix petivit ut in Gallia relinqueretur, quod *insuetus navigandi* mare timeret, D. asked to be left in Gaul because he being unaccustomed to sailing, was afraid of the sea, Cæs. B. G. 5, 6. Here the accessory predicate *insuetus* is added as an explanation of his fear, not strictly as a cause. Thus in the following two sentences the accessory predicates *nescius* and *instum* combine, the one a temporal and a concessive idea, the other a temporal and conditional idea, having at the same time the force of a relative clause:

Carthaginis expugnationem in hunc annum contuli, *haud nescius* quosdam esse qui anno insequentis capiam tradiderint, I have placed the fall of Carthage in this year (210 B.C.), being fully aware that there are some who state that it was taken in the next year, Liv. 27, 7. — Generosius in sua quicquid sede gignitur: *instum* alienæ terræ, in id

<sup>1</sup> Property. — <sup>2</sup> a small gain. — <sup>3</sup> honor. — <sup>4</sup> as a guest (literally: to hospitality). — <sup>5</sup> should happen, i. e. if death should befall me, a frequent euphemism. — <sup>6</sup> throw themselves to the ground. — <sup>7</sup> paralyzed. — <sup>8</sup> lifeless. — <sup>9</sup> *homo necessarius*, a relative. — <sup>10</sup> *graciter ferre*, to bear with grief.

quo alitur degenerat, everything genuine grows in its own home: *transplanted* to a strange soil, it degenerates to that by which it is fed. Liv. 38, 17.

§ 556. Aside from the form of an accessory predicate, the relation of coincident action is expressed OBJECTIVELY: 1) in the form of an ATTRIBUTIVE PHRASE (rarely a mere noun) in the ABLATIVE, as *magno clamore*, with great shouting (the same as *magnopere clamitans*); 2) by a phrase or noun connected with the main action through the preposition *cum* (negatively *sine*), as *aliquem cum frequenti assensu audire*, to hear some one with frequent assent (*i. e. frequenter assentans*); *cum exercitu advenire*, to arrive with the army, *i. e. accompanied by the army*, or *accompanying the army*; *sine ordine proficisci*, to march without order, *i. e. observing no order*.

Rem. 28. Attributive ablative phrases, expressing the relation of coincident action, are of three kinds: 1) such in which the idea of coincident action is contained in the ATTRIBUTE, as *nudo corpore pugnare*, to fight with unprotected body (*i. e. without protection*); 2) phrases in which the idea of coincident action is contained in the GOVERNING NOUN, as *magno clamore castra intrare*, to enter the camp with great shouting (*i. e. clamitans*); 3) such phrases, in which neither the noun, nor the attribute contain the coincident action, the phrase being conceived as an object of an accessory predicate *understood*, in which the idea of coincident action is contained, as: *Omnibus copiis advenit* (ACCOMPANIED by all his troops).

Obs. 1. The first of these forms is the ABLATIVE OF QUALITY, used as accessory predicate, as explained Rem. 26, obs. 1. Being grammatically a PREDICATIVE form (§ 466, R. 27), it does not properly belong to the objective forms of this relation. It is used when the coincident action is attached to nouns expressing the soul of the doer (*animo forti*), or his body, or parts of his body, as *Fabius nudis pedibus inambulabat*, Fabius walked along with naked feet (instead of *nudus pedibus*). Cic. Fam. 10, 32; *capite demisso terram intuebantur*, they looked at the ground with their heads hanging down, Cic. B. G. 1, 32; *legati capillo promisso ingressi sunt curiam*, the envoys entered the senate-hall with disordered hair. Liv. 44, 19. This form can never take the preposition *cum* (not *cum nudis pedibus*, *cum capillo promisso* or *cum capite demisso*).

Obs. 2. The second of these forms, the action being expressed by the GOVERNING NOUN of the phrase, must primarily be considered as an ablative of means and instrument, the same as all other adverbial relations expressed by the ablative, as: *Marino clamore et plausu Brutus memoriam prosequatur*, he expressed his feelings in regard to the memory of Brutus with (by) the loudest shouting and applause. Cic. Phil. 10, 4. Here the shouts and applause may be considered as the means by which the subject gave vent to his feelings; but frequently the relation of 'means' is only an indirect one, passing over into that of coincident action, when the noun (always a verbal noun) may be resolved into a present participle, as *Legati magno fletu a Cesare auxilium petierunt*, the envoys with great weeping asked help from Caesar. Cic. B. G. 1, 22. So *sedulo gradu abire*, to go away with a quiet step. Liv. 25, 37 (*i. e. sedate gradiens*). This kind of phrases always ADMITS the construction with the preposition *cum*, as *magno cum strepitu egressi*, having gone out with great noise. Cic. B. G. 2, 11. *Cum* must be used if the noun has no attribute: *Cum imperio in provinciam proficisci* *neesse erat*, to depart with 'imperium', *i. e. being invested with imperium*. Cic. Fam. 3, 2; but *Consulatu imperio proficisci* (Ex. 8).—*Cum cruciatu necabatur*. Cic. B. G. 5, 45; but *Summo cruciatu perit*. Cic. N. D. 3, 33. Mere ablatives without an attribute must be taken as ablatives of means, although they may often be changed into accessory predicates without affecting the sense, as: *Agēbat auctoritate, agebat consilio* (by authority, by plan). Cic. Sest. 40.—*Contumacia adversus nobiles certare* (by defying the nobility). Liv. 9, 46.—*Voluntate in divitionem venire*. Ib. 29, 38.—*Lege agere*, Liv. 1, 9; Cic. Verr. 1, 45.—*legis actione agere*, to sue by a 'legis actio' (a form of procedure in the old republican law. Gaj. Inst. 4, 11).—But in a few CONVENTIONAL expressions, 'mere ablatives' denote coincident action, *without* the idea of instrumentality: *Silentio exercitum reducit*. Cic. B. C. 2, 35 (so Ib. B. G. 7, 11; Liv. 21, 47).—*Clamore provocant*. Liv. 7, 7.—*Clamore castra invadere*. Ib. 5, 45.—*Strepitu adventare*. Sall. Jug. 53.

Obs. 3. In the third instance of R. 28, the phrase is generally connected by *cum* (negatively by *sine*), as: *Hasdrubal propediem advenit cum manu haudquaquam con-*

*temnendā*, Hasdrubal will in a few days be present with a body of troops by no means to be despised, (*i. e. accompanied by a body of troops*). Liv. 30, 7.—*Cognovi ex eo te Romanam venisse cum febre*, I learned from him that you had come to Rome with the fever (*i. e. having the fever*). Cic. Att. 6, 9. But there are several exceptions to this rule:

(a) If the phrase may be conceived as an ABLATIVE ABSOLUTE with a participial adjective (§ 535, obs.), the preposition *cum* is frequently omitted. Here belong the majority of those phrases which formerly were explained by an ELLIPSIS of the preposition *cum*, and which our present grammarians generally represent as an ablative of 'MANNER', although they never denote a PROPERTY of the main action, as: *Ambiorix alias regiones petivit non majore praesidio quam quatuor*, A. was fleeing to other parts with a retinue of no more than four persons (*i. e. his retinue being not greater*). Cic. B. G. 6, 43.—*Clodius cum uxore rehebatur in rhetā, penulatus, magno et impedimento et muliebri comitatu*, Clodius drove with his wife in a carriage, wearing a wooden cloak, with a large luggage and a female suite (*i. e. his luggage being large, and his suite consisting of females*, Cic. Mil. 9, 28.) Here belong the different phrases with 'agmen', describing the movements of an army, or its condition on a march, as *agmine quadrato accedere*, to approach in battle order (literally *the army being squared, or arranged*). Cic. Phil. 13, 8; 2, 42; Sall. Jug. 105; *agmine effuso abire*, to march off with dissolved (spread out) ranks. Liv. 44, 39; *citato agmine*, by forced marches (the agmen being hurried). Liv. 25, 35.—So *agmine infesto* (§ 535, obs.). Hence military language sometimes makes use of this form, in regard to army movements, even if the phrase cannot be interpreted as an ablative absolute, as *Ingenti exercitu ab urbe profectus est*, he marched from the city with an enormous army. Liv. 7, 9. Thus sometimes *omnibus copiis* is used, instead of *cum omnibus copiis*, as *Hostes ad castra Caesaris omnibus copiis contendunt*, the enemy marched on Caesar's camp with all their troops. Cic. B. G. 2, 7. Generally, however, phrases of this kind take the preposition *cum* (*cum omnibus copiis*, Cic. B. G. 1, 26; 1, 38; Liv. 36, 26, and often). (b) If the object is DRESS OR APPAREL, the phrase is more frequently used without than with a preposition, as *vestitu humili atque obsolito accubare*, to sit (lie) to table in a humble and old-fashioned dress. Nep. Ages. 8, 2.—*Verres cum pallio purpureo in a purple cloak in convivio versatus est*. Cic. Verr. 2, 5, 13.—(c) Here belongs the idiom 'pace' or *bona venia* (*amicitia*), *agendi dicitur* or 'fama' (*with you etc. leave*): *Pace tuā dixerim*. Cic. Tusc. 5, 5. But also with *cum*: *Ad Alpes cum bona pace* (without opposition by) *Gallorum pervenit*. Liv. 21, 32.

Obs. 4. If the coincident action denotes the EFFECT of the predicate, the nouns expressing the effect (*periculum, emolumentum* etc.) are in the ablative, with or without *cum*, which is rendered either by 'with' or 'to', as: *Legati nuntiant majore periculo quam emolumento exercitum per invios saltus in Macedonia inductum*, the envoys report that the army had been sent to Macedonia through impassable forests with greater danger than advantage (more to their danger than to our advantage). Liv. 44, 20.—*Ptolemaeus et Cleopatra Romam venient cum patre populi Romani*, Ptolemy and Cleopatra will come to Rome to the shame of the Roman people. Liv. 44, 19.

Obs. 5. Besides the prepositions *cum* and *sine*, *in* with an ablative is sometimes used to express coincident action, but only in a local, not in a metaphorical sense, as: *Obviam ei sit Clodius expeditus, in equo*, he is met by Clodius, without encumbrance, on horseback. Cic. Mil. 10, 38. In other relations the English *in* expressing coincident action must be rendered either by the ablative or by *cum* according to the rules given above, as: *he came in great fear*, *magno cum timore venit*; *he came in tears*, *cum lacrimis*; *in a white cloak*, *cum albo pallio*, or *albo pallio* (not *in timore*, *in lacrimis*, *in pallio*).

1. *Legati sordidati, barbati et capillo promisso, cum ramis oleae ingressi curiam*, pro-cubant<sup>1</sup>. Liv. 44, 19.—2. *Dixit Cato se legem hanc in ignis roce et bonis lateribus*<sup>2</sup> suasisse. Cic. Sen. 5, 14.—3. *Fabius nudis pedibus, tunica soluta, manibus ad tergum*<sup>3</sup> *repositis* inambulabat. Cic. Fam. 10, 32.—4. *Dux Romanus peditum aciem instruc-tam pleno gradu in hostem inducit*<sup>4</sup>. Liv. 4, 32, 10.—5. *Jucunda sunt quae humanam*<sup>5</sup> *frontem, certe laet, placidamque*<sup>6</sup> *tribuantur*<sup>7</sup>. Sen. Ben. 2, 13.—6. *Majores nostri ne-minem qui cum potestate aut legatione in provinciam esset profectus, tam amentem*<sup>8</sup> *fore putaverunt ut emeret argentum; dabatur enim de publico*<sup>9</sup>. Cic. Verr. 2, 4, 5.—7. *C. Anicuri, familiaris meus, negotiorum suorum causa legatus est in Africam lega-tione libera*<sup>10</sup>. Cic. Fam. 12, 21.—8. *Maximas audio tibi, L. Luculle, venisse hereditates*<sup>11</sup>.

<sup>1</sup> Filthy. A filthy garb was one of the emblems of supplicants.—<sup>2</sup> beard.—<sup>3</sup> ramus, branch.—<sup>4</sup> *procurantibus*, to fall on one's knees.—<sup>5</sup> laet, to be glad.—<sup>6</sup> *suadere legem*, to speak in favor of a law.—<sup>7</sup> open.—<sup>8</sup> the back.—<sup>9</sup> to throw (backward).—<sup>10</sup> to walk step.—<sup>11</sup> *aciem instruere*, to draw up an army in order of battle.—<sup>12</sup> *plenus gradus*, full at a trot.—<sup>13</sup> *aciem instruere*, to draw up an army in order of battle.—<sup>14</sup> *plenus gradus*, full at a trot.—<sup>15</sup> *aciem instruere*, to draw up an army in order of battle.—<sup>16</sup> *plenus gradus*, full at a trot.—<sup>17</sup> *placida*, to be glad.—<sup>18</sup> to give.—<sup>19</sup> *potestas*, the power of a civil magistrate.—<sup>20</sup> a commis-sion to transact business in the province.—<sup>21</sup> insane.—<sup>22</sup> Supply *ararium*, public treasury.—<sup>23</sup> *legare aliquem*, to dispatch somebody as a commissioner.—<sup>24</sup> *legatio libera*, the char-acter of an ambassador, without performing any public business. The Senate often,

*nimium*, which is used with the force of *nimis*, both before adjectives and verbs, as *nimium multa*, too many, Cic. Clu. 46. In place of the other quantitatives, the adverbs mentioned R. 30 must be used to qualify adjectives, as *quam difficilis*, how difficult (not *quantum difficilis*); *tam insolens* (not *tantum insolens*); *valde ingeniosus* (not *multum ingeniosus*); *magis idoneus*, more adapted (not *plus idoneus*); *marime* (not *plurimum laboriosus*). The forms with *opere* (R. 29) are used synonymously with the accusative (adverbial) forms of the quantitatives. They qualify predicates of all kinds, but cannot be connected with attributive adjectives. With some verbs the forms in *opere* never occur. Thus *valere*, to be strong, to be powerful, to be worth, always takes the forms in *um*, not those in *opere*. Ex. 11.

Obs. 3. The forms in *o* of the quantitatives are used before COMPARATIVES, and with such verbs as imply a comparative (as *prestare*, to be superior)\*, as: *Quanto* (not *quantum*, nor *quam*, nor *quantopere*) *Stoici melius*, qui a vobis reprehenduntur, *hinc much better* are the Stoics who are censured by you? Cic. N. D. 1, 44.—*Sic ille multo sceleratior et nequior* quam Hadrianus, *aliquanto etiam felicitior* fuit, thus he was *much more villainous and wicked* than Hadrianus, and also *a good deal luckier*. Cic. Ver. 2, 1, 27.—*Multo mihi prestat* in eadem recidere fortunam, *quam etc.*, it is *much more preferable* to me to relapse into the same situation than etc. Cic. Sen. 67, 146. More rarely the forms in *o* are applied to SUPERLATIVES, as *multo ex maxima parte*, by far for the greatest part. Cic. Verr. 2, 1, 16. The most usual adverb of intensity which is connected with superlatives is *longe*, as: *Apud Helvetios longe nobilissimus* fuit Orgetorix, among the Helvetians Orgetorix was *far the most distinguished* man. Cic. B. G. 1, 2. For the meaning of *quam* with superlatives see obs. 6.—All form-adjectives, qualifying comparatives, assume a quantitative character, and must take the ablative form of the neuter, as *nihilo magis*, no (by nothing) more; *eo magis* (with the force of *tanto magis*), the more, so much more.

Obs. 4. The English 'as much' after cardinal adverbs (*twice, three times as much* etc.) is expressed by *tanto* after the Latin cardinal adverbs, as *Bis tanto valeo quam valui prius*, I am worth twice as much as before. Plaut. Merc. 2, 2, 26. More rarely the accusative forms are used, as *Series tantum* quam quantum satum est ab aratoribus, *six times* as much as was sown was taken from the farmers. Cic. Verr. 2, 3, 43.—The English 'as much more' or 'as much again' after cardinal adverbs is expressed by *tanto* (sometimes *eo*) with *amplius* or *plus*, as *Quinque tanto amplius* quam elicitum erat civitatibus imperavit, he taxed the cities with five times as much again as he was allowed. Cic. Verr. 2, 3, 97.—Instead of *bis tanto* the form *altero tanto* is often used, as *Via altero tanto longiorem anfractum habebat*, the road was twice as long (literally had a 'round about' twice as long). Nep. Eun. 8.

Obs. 5. The English 'little' as adverb of INTENSITY (opposed to 'much') has no direct equivalent in Latin, the quantitative *paulum* meaning 'a little', and *parum*, too little. This adverb is generally expressed by connecting a negation with the different equivalents of *much*, as *non magnopere* (R. 29, last example), *non multum*, *minime multum*. Thus 'as little as' is generally expressed by *non magis quam* (§ 412). Sometimes 'how little' and 'so little' are expressed by *quantulus* and *tantulus*, as *quantulum iudicare possumus*, as little as we can judge. Cic. Verr. 2, 3, 1. *Tantulum* mostly corresponds to the English 'ever so little', as *si tantulum moro interest*, if there is ever so little difference. Cic. Leg. 1, 12, 34. 'How little' is generally expressed by *quam nihil* or *quam non*, as *Quam id te non decebat*, how little was that becoming to you! Cic. Phil. 2, 8.—*Quam nihil explicas*, how little do you explain! Cic. Att. 9, 2.—'So little' is expressed by *adeo non* or *adeo nihil*, as *Manlius adeo non tenuit iram, ut gladio cinctum se in senatum venturum diceret*, Manlius controlled his anger so little that he said he would come with his sword into the senate. Liv. 8, 5.—*Hæc adeo nihil moverunt quemquam, ut etc.*, this had so little effect on anybody that etc. Liv. 3, 2. For the particulars in the use of *non magis quam*, and *non plus quam*, in the meaning 'as little', see p. 757 foll.

Obs. 6. The relative use of the quantitative adjectives and adverbs (*quantum, quam, quantopere*) is confined to COMPARATIVE CLAUSES, which are nothing else but 'relative clauses' applied to the relations of manner and intensity. The antecedents of the quantitatives of the relative form are 1) in the comparative clauses of 'difference' the COMPARATIVES of adjectives, in which instance *quam* (than) is used as relative word, passing over into a conjunction. See § 294 foll.—2) If the comparison is one of equality, the antecedents are *tam, tantum (tanto), tantopere, tantundem*. The relatives, which are always rendered by 'as', almost always take the same form as the antecedents. To *tam* corresponds

\* The comparative *plus* and the superlative *plurimum*, of course, cannot be used to intensify COMPARATIVES. Hence they have only one form. *Nimio*, in this respect, has the same nature as *plus* and *plurimum*, but it is used in connection with comparatives in place of *quam* with a positive, as *nimio plus*, more than too much. Plaut. Bacch. 4, 4, 21.—† Sometimes, but very rarely, the quantitative *parum*, in classical language occurs with the meaning 'little'.

*quam*: to *tantum, quantum*; to *tanto, quanto*, and to *tantopere, quantopere*: *Neque enim tanto opere hanc a Crasso disputationem desiderabam, quanto opere ejus in causis oratione delector*, for I did not desire so much this discussion from Crassus, as I am delighted by the language (he uses) in his pleadings. Cic. Or. 1, 35.—*Si me amas tantum quantum pro feceris amas*, if you love me so much, as you indeed do. Cic. Att. 2, 23. For examples with *tantumquam*, see R. 30, obs. 4.—*Tantumdem* is followed by *quantum*, as *tantumdem capit* *tantum omnes heredes*, he receives as much as the other heirs. Cic. Leg. 2, 19. *Tanto* before comparatives takes *quanto* (rarely *quod*) as a relative, which often, (as in English) is placed BEFORE the antecedent *tanto*. Both *tanto* and *quanto* are rendered 'the', as: *Quanto erat gravior oppugratio, tanto crebriores nuntii ad Caesarem mittebantur*, the more serious the siege was, the more frequently messengers were sent to Caesar. Cic. B. G. 5, 45. Instead of *tanto* the ablative neuter *eo* (of *is*) may be used, which takes either *quo* or *quant* as a relative *eo magis quod*, or *eo magis quo*, the more as). Peculiar is the construction of the relative quantitatives *quam* and *quantum* with *posse*, corresponding to the English 'as much as I can', or 'as diligently' (or any other adjective) *as I can*. The definite *tam* and *tantum*, in this instance, are always omitted, and the adjective or adverb which is qualified by the relative takes the form of a superlative, as *voce quam passim maximam* with the loudest voice I can, with the loudest voice possible, with as loud a voice as I can. Cic. Dom. 36.—*Quanto maximo possent impetu incurrere jussit Fabius*, Fabius ordered them to advance with the greatest impetuosity they could (with as great impetuosity as they could). Liv. 10, 29. The verb *posse* is frequently understood, as *Commendissimum est quam latissimum habere habinas amicicie*, it is most convenient to hold the reins of friendship as loosely as possible. Cic. Am. 13.—*Quantum* is used, with relative force, in inserted clauses in the meaning 'as much as', 'as far as', analogous to *ut* and *quemadmodum* (R. 15, obs. 1 and 2), as *Hæc lex Attico nostro non placet, quantum ex vultu ejus intelligo*, this law does not please our Atticus, as much as I see in his face. Cic. Leg. 3, 16, 37.

Obs. 7. The neuter absolute adjective *summum* (irregular superlative of *superus*), in some of its meanings, may be considered as a quantitative adjective (*summum* having frequently the force of *metrimum*). In classical language it means either 'at the utmost', or 'at the farthest', as *Ubi aut summum altero probo, caput Italiae in potestate habituros*, by one or, at the utmost, by the second battle they would have the capital of Italy at their mercy. Liv. 21, 35.—*Respondit Caelius, Milonem triduo aut summum quadriduo periturum*, in three or four days at the farthest. Cic. Mil. 9.—The adverb *summe* is used as synonym of *plurimum* or *maxime*: *Vidi te semper summe diffidere*; I saw that you always were exceedingly distrustful. Cic. Fam. 4, 7, 2.—It is also used before ADJECTIVES to denote an unusually high degree: *Hoc non potest mihi non summe esse jucundum*, this must be exceedingly pleasant to me. Cic. Fam. 13, 18, 2.

1. Dicit vix potest, *quantopere* gaudeant homines in municipiis<sup>1</sup>, ut ad me concurrant<sup>2</sup>, ut audire cupiant verba mea de morte Caesaris. Cic. Att. 11, 6.—2. Videtis *quando* se opere custodiant<sup>3</sup> bestie, ut in pastu<sup>4</sup> circumspiciant<sup>5</sup>, ut in cubilibus<sup>6</sup> delitescant<sup>7</sup>. Cic. N. D. 4, 49.—3. Attici quies *tantopere* Caesari fuit grata<sup>8</sup> ut victor quum privatis<sup>9</sup> pecunias imperaret, huic molestus<sup>10</sup> non fuerit. Nep. Att. 7.—4. *Tanto* opere justitia apud majores nostros culta<sup>11</sup> est, ut ei qui civitates in bello devictas in fidem<sup>12</sup> recepissent, eorum patroni<sup>13</sup> essent. Cic. Off. 1, 11.—5. Quis nos *magno* opere attendit<sup>14</sup> unsem, eorum patroni<sup>15</sup> essent. Cic. Off. 1, 11.—6. Hæc res, etiam si lex non quam in hoc genere causarum<sup>16</sup> Cic. Verr. 2, 1, 10.—7. Hæc sunt vitia<sup>17</sup> exordiorum<sup>18</sup> quæ esset<sup>19</sup>, *magnopere* vitanda fuit. Ib. 2, 1, 42.—8. Simulac<sup>20</sup> proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—9. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—10. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—11. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—12. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—13. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—14. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—15. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—16. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—17. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—18. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—19. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—20. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—21. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—22. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—23. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—24. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—25. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—26. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—27. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—28. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—29. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—30. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—31. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—32. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—33. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—34. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—35. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—36. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Inv. 1, 18, 26.—37. *Simulac proffigit<sup>21</sup> Heraclius, *summo* opere vitari oportebit. Cic. Verr. 2, 2, 14. — 29. Caesar Cingetorigis auctoritatem *quam plurimum* inter Treviros valere voluit. Cic. B. G. 5, 4.

## 2) Relation of Value and Price.

§ 559. The VALUE and PRICE attached to an action is expressed: 1) by the ablative case of GENERAL NOUNS expressing value and price, as *pretium*; 2) by the ablative case of the MEASURE-UNITS of money (*nummus*, *sestertius* etc.) in connection with CARDINAL numerals; 3) by the ablative or genitive neuter singular of absolute quantitative form-adjectives, as *quanti*, at what price; *magno*, at a high price.

Rem. 32. The adverbial objects denoting price and value are always (but see OBS. 1.) dependent on one of those verbs with which the idea of price and value may be connected. These verbs are, 1) those implying or referring to TRANSACTIONS for a valuable consideration, as *emere*, to buy (*aliquid magno emere*, to buy something at a high price); 2) verbs signifying TO ESTIMATE, TO APPRAISE (value), as *aestimare* (*aliquid tribus sestertiis aestimare*, to value something at three sestercies); 3) verbs denoting 'COSTING' and 'BEING WORTH', as *constare*, *esse* (*quanti est illa merx?* what is that article worth?).

OBS. 1. Only one adjective, *venalis*, in connection with *esse*, is sometimes, but rarely, construed with an object of price and value, as *P. Clodii insula est venalis decem millibus*, the plot of ground belonging to P. Clodius is to be had at 10,000 sestercies. Cic. Cael. 7, 17.

OBS. 2. The most usual verbs implying money transactions are *vendere*, to sell; *venire*\*, to be sold, to sell (in a neuter sense); *emere* and *mercari*, to buy; *redimere*, to redeem, to acquire for money; *locare*, to let; *conducere*, to rent; *transigere*, to agree on a price in a bargain; *decidere*, to compromise for a price; *addicere*, to award a contract or a work, to strike off in an auction; *item alicujus aestimare* to award or fix damages against one. In the same way are construed many verbs denoting actions which are either performed for payment, or which cost a certain sum, as *aedificare* (to build some-

<sup>1</sup> ascent. — <sup>2</sup> *gratum alicui facere*, to do somebody a favor. — <sup>3</sup> recommendation. — <sup>4</sup> to do harm. — <sup>5</sup> to do good, to be of advantage. — <sup>6</sup> *et quidem*, and ... too. — <sup>7</sup> auxiliary troops. — <sup>8</sup> *notare*, to note down. — <sup>9</sup> sloth. — <sup>10</sup> to excel. — <sup>11</sup> *cunctus*, all. — <sup>12</sup> *tot jugera oliveti colere*, to cultivate an olive-farm of so many acres. — <sup>13</sup> *villicus*, a farmer. — <sup>14</sup> therefore, on that account. — <sup>15</sup> *auctorem esse ut aliquid aliquid faciat*, to make somebody do something. — <sup>16</sup> *agere*, to institute proceedings or a lawsuit. — <sup>17</sup> quarrelsome, litigious. — <sup>18</sup> noisy.

\* *venire* (PRES. *veneo*) is used as the regular passive voice of *vendere*; as *sestertio venire*, to be sold for a sesterce.

thing for a price), *docere* (to teach at a price), *habitare* (to live at a certain rent), *cenare* (to dine for a certain price) and many others, as: *Modium tritici denario emere*, to buy a bushel of wheat for a denarius. Cic. Verr. 2, 3, 85. — *Agrum frumento locavit*, he let out land for a rent in grain. Liv. 27, 3. — *Ternis medimnis deciderunt*, they compromised at the price of three medimni (a piece). Cic. Verr. 2, 3, 49. — *Piscinae aedificantur magno*, nurseries for fish are built at a high price (cost much money to build). Varro R. R. 3, 17. — *Triginta millibus eum dixistis habitare*, you said that he lived at a rent of 30,000 sestercies. Cic. Cael. 7. — *Caesar centies sestertio cenavit uno die*, Caesar dined on one day at a cost of ten millions sestercies. Sen. Cons. 9. Here belong the verbs denoting 'to condemn to a fine', as: *Absens quindecim millibus condemnatus est*, he was, in his absence, condemned to 15,000 sestercies. Liv. 5, 32. — To write a note for a certain sum of money<sup>1</sup> (for inst. 1,000 sestercies) is expressed by *syngrapham mille sestertium* (gen. plur.) *facere*. Cic. Phil. 2, 37.

OBS. 3. The verbs of estimating and appraising are *aestimare* and (rarely) *putare*, (*taxare* being post-classical), as: *Est modius tritici lege tribus sestertiis semisse aestimatus*, the bushel of wheat was by law valued at a tax of three sestercies and a half. Cic. Verr. 2, 3, 75. *Si denariis quadringentis Cupidinem illum putasset*, if he had estimated that statue of Cupido at 400 denarii. Cic. Verr. 2, 4, 7.

OBS. 4. The verbs signifying 'to cost', 'to be worth' are *esse*, to be worth (which signification can always be recognized by the attached phrases denoting the price); *stare* and *constare*, to cost; *licere*, to be held at a certain price; *valere*, to be worth (ante and post-classical); as: *Sextante sal Romae et per totam Italiam erat*, salt was worth one-sixth of a sesterce at Rome and throughout Italy. Liv. 29, 37. — *Polybius scribit, centum talentis eam rem Achæis stelsse*, Polybius writes that this affair cost the Achæans one hundred talents. Liv. 34, 50. — *Una quadrigæ Romæ constiterunt quadringentis millibus*, one four-horse team cost 400,000 sestercies at Rome. Varro R. R. 2, 1, 14. — *Quanti Drusi horti licuisse scribis, id ego quoque audieram*, the price at which you write that Drusus's park was held, I had likewise heard. Cic. Att. 12, 23. — What a person is worth in money is not expressed in this form by an accusative of value, but by a transitive accusative with *possidere*, as: He is worth a million, *possidet decies*. — Both *constare* and *stare* are frequently used of equivalents metaphorically represented as 'costs', as *Multorum sanguine et vulneribus ea Pœnis victoria stetit*, that victory cost the Carthaginians 'the blood and wounds of many' (i. e. they paid for it with etc.). Liv. 23, 30. — *It cost his life* is not '*vita stetit*' or '*constitit*', but *morte stetit* (*constitit*), as *Utrique vindicta libertatis morte stetit*, the vindication of liberty cost both their lives (both paid with their lives for etc.). Vell. 2, 64.

Rem. 33. The general nouns expressing PRICE and VALUE are *pretium* (price, value); *pecunia*, money; *impensa* or *impensæ* (not *expensæ*) and *sumptus*, expense, expenses; *merces*, pay, fee, wages (*stipendium*, the pay of a soldier). The ablatives of these nouns do not belong to the relation of 'quantity' unless they have adjectives expressing quantity as attributes. A LOW PRICE is expressed by *parvum* (*vile*, or *exiguum*) *pretium*; a HIGH PRICE, by *magnum pretium*.

OBS. 1. Adverbial ablatives of the nouns mentioned above, if not accompanied by adjectives expressing quantity, belong to other modal relations than that of price and value, generally expressing means and instrumentality, as *Apollonius mercede docebat*, Apollonius taught for pay. Cic. Or. 1, 28. — *Fidem et religionem suam pecuniâ commutare*, to barter one's faith and religion (i. e. one's principles) for money. Cic. Clu. 46, 29. — *Verres sumptu publico in Asiam mercator signorum missus est*, Verres was sent at public expense to Asia as a trader in statues. Cic. Verr. 2, 1, 22. — *Pretio ordinem senatorium mercari*, to buy the senate with money. Ib. 2, 2, 49.

OBS. 2. Quantitative expressions with *pretium* to denote indefinite amounts of price, are not very frequently used. Instead of such phrases the absolute form of the quantitative adjectives in the ablative or genitive (§ 560) are far more usual. The adjectives which are used with *pretium*, aside from those mentioned R. 33, are the comparatives *major* and *minor*, the superlatives *maximus* and *summus*, and all those quantitative form-adjectives that may be attached as attributes to nouns (263 foll.), as *Dumnorix omnia Eduorum vectigalia parvo pretio redempta habebat*, Dumnorix had farmed all the public imposts of the Æduli at a small (low) price. Cic. B. G. 1, 18. — *Non majore pretio redimi possumus quam hi emuntur*, we cannot be redeemed at a higher price than these may be bought for. Liv. 22, 59 (Sometimes *vili pretio*, at a cheap price). — If price is expressed by an adjective with *pretium*, dependent on *esse* (to be worth), the phrase is not in the ablative, but in the QUALITATIVE GENITIVE: *Nullus est tam parvi pretii quin etc.* (is of so small value but that). Plaut. Aul. 4, 10, 60. — *Parvi pretii est*. Cic. Qu. Fr. 1, 2, 4. — *Minoris pretii esse*. Liv. 23, 28. — *Multus* in the positive is never used in regard to price, and *pecunia* always takes *magnum* (*tantus*) and its degrees: *Fidem majore pecunia adversario tra-*

*didisti*, you have surrendered your faith for more money (a larger sum) to your adversary. Cic. Verr. 2, 2, 32.—*Tantā pecuniā*, for so much money. Cic. Ib. 2, 1, 55.—*Minore pecuniā*, at less money. Cic. Ib. 2, 2, 9.—There is no general noun for the English 'sum', which is variously expressed by the one or the other of the above mentioned general terms. The noun *summa* means a 'sum' as the result of computation, of summing up, as: What is the sum (total) of these men? *Quanta istec hominum summa est?* Plaut. Mil. 1, 1, 46.

**Rem. 34.** If the price of an action is determined by a noun denoting MEASURE-UNITS OF MONEY, the latter must take CARDINAL (including DISTRIBUTIVE) NUMERALS as attributes, either in the INTERROGATIVE (relative) form (*quot, quotēni*), or in the DEFINITE (or demonstrative) form (*tot, unus, duo, bini* etc.), or in the INDEFINITE form (*aliquot, multi, plures, plurimi, pauci*). These phrases are placed in the ABLATIVE (a few instances excepted, OBS. 3 and 4), as: Plinius commentarios suos vendere poterat *quadringentis millibus nummum*, Pliny could have sold his commentaries for 400,000 sesterces. Plin. Ep. 3, 5. In English these ablative phrases of price are rendered variously by *for, at, to*, or by a mere objective, according to the meaning of the governing verb. We say: *to estimate at, to sell for or at, to build a house for, it costs* (is worth) *three dollars, to condemn to a fine of etc.* In Latin all these prepositional phrases, and the mere objective after 'cost', 'to be worth', are expressed by *ablative phrases*.

**OBS. 1.** If 'price' is made the COMPLETING object or subject of a verb, the phrases by which price is expressed, take, of course, the case required by the construction, as *Numerantur illi sestertia CCL*, 250,000 sesterces are paid to him. Cic. Verr. 2, 2, 20.

**OBS. 2.** The interrogative and indefinite forms of these numeral phrases of price are rarely used, the quantitative forms mentioned § 560 being preferred for this purpose. But in certain connections these forms cannot be dispensed with, as: *Pluribus aliquanto medimnis* decumas emērent quam jugera erant sata, they bought the tithes for quite considerably more medimni than there were acres sowed. Cic. Verr. 2, 3, 47. The definite numeral *unus* as attribute of nouns expressing the denominations of money, is frequently understood, as *aliquid sestertio emere*, to buy something for a (one) sesterce.

**OBS. 3.** The verb *esse* in the meaning 'to be worth' takes the price either in the ablative, or in the form of a predicate-genitive, as: *Quum in Sicilia sestertiis binis tritici modius esset, summum ternis*, when in Sicily wheat was worth a modius, or three at the highest. Cic. Verr. 2, 3, 81.—*Opus hoc erat vix sestertium quadraginta millium*, This work was hardly worth 40,000 sesterces. Cic. Ib. 2, 1, 54. The ABLATIVE 'of worth' is used to denote the MARKET PRICE of an article, while the genitive denotes its real value. See the first example R. 32, OBS. 4, and Ex. 5. 6. Sometimes (but rarely, and mostly in post-classical language) *valere* is used in the sense of 'to be worth something', generally construed with the ablative (as Plin. 33, 3), but once (in Varro) it is found with the object of value in the ACCUSATIVE: *Denarii dicti quod denos aeris valebant*, qui auri quod quinos, the denarii were called so because they were worth ten (pounds) of copper each, the quinari because they were worth five. Varro L. L. 4, 36.

**OBS. 4.** The verb *æstimare*, especially in the combination *litem æstimare* (see R. 32, OBS. 2), is sometimes construed with *ad* before the price, in place of an ablative, as: *Dolabellæ ad tricies lra est æstimata*, the damages against Dolabella were laid at 15 millions. Cic. Verr. 2, 1, 38.—If *æstimare* is construed with a genitive of a price expressed by a definite numeral, it has not the meaning 'to appraise', but the figurative meaning 'to esteem', 'to consider', in which meaning the object of value regularly is in the genitive (§ 561), as *Rumores senum unius æstimantur assis*, the talk of old men is valued at ONE AS, i. e. amounts to nothing. Catull. 5, 3.

**OBS. 5.** The standard of Roman money was originally the copper AS, weighing one pound (*as librāle, as grave*), which gradually was reduced to one twenty-fourth of its original weight with the same nominal value. On this standard, silver coins were made of three denominations: 1) the *denarius*, containing 10 as; 2) the *quinarus* of 5 as; 3) the *sestertius* (contracted of *semis tertius*, i. e. 2½) of half this value, worth about 4 cents of our money. All sums of money in public and private intercourse were calculated by the *sestertius*, which also was simply called *nummus* (properly meaning 'coin' or 'piece of money'). The sesterce is generally notated by the letters HS (a corruption from HS, i. e. *duo et semis*). Occasionally larger sums of money were determined by Greek denominations of money, especially the MINE (*mina*, which in Greek was worth 100 drach-

mæ, while the Romans understood by it a sum of 100 denarii); and the Attic TALENT (*talentum*, of 60 mines, or about \$1050 in gold).—The words of the second declension expressing money, measure, and weight, rarely form their genitives plural in *gram*, but generally in *um*, according to the inflection of the third declension, as *nummum, sestertium, denarium, medimnum, talentum*, inst. of *nummorum* etc.—The word *sestertius*, as the governing noun of cardinals, is frequently understood, as *Domum locavit duobus millibus*, he let the house for 2000 sesterces.

**OBS. 6.** In regard to the grammatical form of the word *sestertius* and the numerals connected with it, the following rules should be noticed:

1. *Sestertius* is properly an adjective, the noun *nummus* being understood, but often expressed, as Varro R. R. 3, 6, 1. In connection with numerals of more than one thousand, the word *sestertius* should, according to the general rules, be placed in the genitive plural, generally in the form *sestertium*, rarely *sestertiūrum* if the thousands are not combined with other smaller numbers, as *duo millia sestertium*, 2000 sesterces. If other numerals are added *sesterti* should agree in CASE with *millia*. But in this instance it always assumes the neuter gender, according to its adjective nature, agreeing not only in case, but also in gender with *millia*: two thousand six hundred sesterces, *sestertia* (not *sesterti*); *duo millia sestertia*. This form has been even extended to the instance when only one thousand is connected with it, as *duo millia sestertia recipere*, Varro R. R. 3, 16, 11 (where according to the general rules the genitive *sestertium* should be expected). Frequently the word *millia* is UNDERSTOOD, which always can be seen from the neuter gender of '*sestertia*'\* and its accompanying numbers, as *Capit ille suis prediis sexcenta sestertia*, he receives 600,000 sesterces out of his landed property. Cic. Par. 6, 3.

2. A million of sesterces, if fully written out, is expressed by the combination of the cardinal adverbs from *decies* upward with *centum milia* or *centena milia* (§ 255. R. 7), as *Septuaginta HS decies centena milia numerasse*, he says that Dio paid a million sesterces. Cic. Verr. 2, 1, 10. But generally the expression *centena milia* is understood, the smaller numerals retaining their own forms, as if *centena milia* were expressly added. This omission is always clear from the mere cardinal adverb after HS, which combination occurs in no other sense, as *quum ad HS decies quingentos redegissemus emstret*, when it was known that he had taken 25 times 100,000 sesterces i. e. 2 millions and a half). Cic. Verr. 2, 1, 36.—*Accipisse illum HS decies et octingenta milia*, that he had received ten times 100,000 and eight hundred thousand sesterces, i. e. one million eight hundred thousand sesterces. Cic. Verr. 2, 1, 39.

3. The amount of 100,000 sesterces is frequently expressed by the neuter singular *sestertium*, more than one 100,000 being expressed by the cardinal adverbs. This expression is always in the singular, requiring as subject even the predicate to be in the singular. It never allows the addition of any smaller numerals: *Sestertium quater decies Q. Tullio numeratum est*, fourteen times a sestertium i. e. one million four hundred thousand sesterces) was paid to P. Tullius. Cic. Verr. 2, 1, 39, 100.—*Sexagies sestertio margaritam mercatus est*, he bought a pearl for six millions sesterces. Suet. Cæs. 50. So *Syngrapha sestertii centies*, a note for ten millions sesterces. Cic. Phil. 2, 37.—*Centies sestertii largitione*, by a bribe of ten millions sesterces. Tac. Ann. 12, 58.

1. *Mattis Magnæ tanum pecuniā grandis venditum est*. Cic. Sest. 26.— 2. *Cæsar doctus quatuordecim milia et quatuordecim milia fortium mori*, necesse sit constare vicariam. Cæs. B. G. 7, 19.— 3. *Chrysogonus vas aliquod Corinthium tanto pretio mercatus est, ut qui pretereuntes quid precor enumeraret audiebant, fundum venire arbitrantur*. Cic. Rose. Am. 46.— 4. *Ei qui ab hoste obsidentur, si emere aquæ sextarium cogantur min, nihil hoc nos magno opere mirari oportet*. Cic. Off. 2, 16.— 5. *Num vir bonus emet denario quod sit mille denarium?* Cic. Off. 2, 23.— 6. *Decumas*<sup>11</sup> *sester-*

\* The neuter gender '*sestertia*' is explained differently by our grammarians. They assume that it was a 'faulty construction', because from the frequent use of the genitive form '*sestertium*' the people had mistaken this word for a neuter singular. This is a very improbable surmise, since the word *sestertia* is just found in the very connection where the genitive *sestertium* should stand according to the rule. The fact that *sestertius* is an adjective explains all these seeming anomalies. For the noun *sestertium* as a singular neuter, see OBS. No. 3.

† The use of the singular '*num pntum*' makes it clear that *sestertium* in this passage cannot be understood as a genitive plural. It is evident that this use of *sestertium* has nothing to do with the neuter plural *sestertia* in connection with *millia*. The opinion of Zumpt that this use of *sestertium* does not occur in Cicero is erroneous, as is seen by the examples 1 and 3 quoted above.

1 The great mother is the goddess Cybele.— 2 temple.— 3 considerable.— 4 a vase.— 5 Corinthian.— 6 i. e. ei qui.— 7 *preterire*, to pass by.— 8 the crier.— 9 to count up.— 10 the sextarius, a liquid measure containing about a pint.— 11 *decuma*, a tithe.

tam pecuniam redemptorī<sup>1</sup> solvendam<sup>2</sup> curarent. Cic. Phil. 9. 7.—6. Permittite ut decumas quanti quisque (prætorum), velit tantū æstimet. Cic. Verr. 2. 3. 95.—7. Dixit Verres se decumas tantidem æstimasse quanti Sacerdotem<sup>3</sup>, sed eadem æstimatione<sup>4</sup> alter sublevat<sup>5</sup> aratores, alter everterat. Ib. 2. 3. 92.—8. Accepisti HS XV pro medimno, tanti enim erat illo tempore tritici medimnum; retinuiſti HS XXI, tanti enim est frumentum Siciliensæ ex lege æstimatum. Ib. 2. 3. 75.—9. Si magno emerat Apro-nius, quare putabas emptori lucrum<sup>6</sup> addi oportere? Ib. 2. 3. 30.—10. Malèbant isti publice potius quamvis magno emere, quam in aliquem Verriſ emissarium<sup>7</sup> incidere<sup>8</sup>. Ib. 2. 3. 42.—11. Nunquam aratoris interfini<sup>9</sup> quanti decumae venirent; non enim ita est lex ut, si magno venerint, plus agitor debeat<sup>10</sup>, si parvo, minus: ut fragmenta nata<sup>11</sup> sunt, ita decumae veniant. Ib. 2. 3. 63.—12. Emit Verres Capidinum<sup>12</sup>? Praxi-telis HS mille sexcentis! Direct aliquis? Quid? tu ista permagno asimas? Ego vero tibi vobis ita arbitror spectari<sup>13</sup> oportere, quanti hæc eorum iudicio quā studiosus sunt a vobis ita arbitror spectari<sup>13</sup> oportere, quanti ventro soleant, quoties hæc ipsa signa ventre pos-suarum rerum æstimentur, quanti ventro soleant, quoties hæc ipsa signa ventre pos-sent. Ib. 2. 4. 7.—13. Negari non potest, Verrem unius agri decumas triginta millibus modis minōris quam poterit vendidisse. Ib. 2. 3. 61.—14. Verum<sup>14</sup> ut ita sit, tamen modis minōris quam poterit aliquid prædicare<sup>15</sup>, magno te decumas vendidisse, quoniam non potes quasi præclarum aliquid prædicare<sup>15</sup>, magno te decumas vendidisse, quoniam fuisse fatēre qui<sup>17</sup> multo plaris voluerit emere. Ib. —15. Summa a me data est opera ut quam plurimo decumas venderem. Cui igitur, Metelle, non ita magno vendidisti? Ib. 2. 3. 53.—16. Dixit ille, Verrem emptos habere iudices, alium HS quadringentis millibus, alium HS quingentis, quem minime<sup>18</sup>, trecentis. Ib. 2. 3. 62.

§ 561. If the value attached to a thing is not reducible to money or figures, but is conceived as 'esteem' or as an 'inner appreciation' of a person or thing, the DEGREE of appreciation is generally expressed by the same quantitative adjectives which are used to denote price (R. 35), but these adjectives are *all* placed in the GENITIVE case.

these adjectives are *all* placed in the GENITIVE case.

Obs. 1. The verbs by which 'appreciation' and 'esteem' are expressed are: *æstimâre*, and *pendere*, to value, to price, to place a value on something; *facere, ducere, habere, putare* and *existimâre*, to hold, to esteem; *esse*, to be worth. The degree of appreciation is expressed by the adjectives mentioned R. 35, ALL of which (except rarely *magno* with *æstimâre*) are in the GENITIVE. For *plurimû* ('very high', or 'highest'), *maximû* is also used. ABSENCE of esteem is expressed by *nihilû*. *Pompejum, quem unum ex omnibus facio plurimû* (whom I hold highest of all). Cic. Fam. 3. 10. 2.—*Quantû quisque se ipse facit, tantû fit ab amicis*, every one is held as high by his friends as he holds himself. Cic. Am. 16.—*Catonis opera magni existimata est in prælio apud S. Senm.* Cato's help in the battle of Sena was considered of great value. Nep. Cat. 1.—*Lælius non valde dictus est sapiens quod non intelligeret quid suavissimum esset, sed quid parvi id duceret.* Lælius was not called the Wise because he did not know what was very pleasant, but because he held it low. Cic. Fin. 2. 8.—*Est ulla res tantû de viri boni nomine amittas*, is there anything good so much that you should lose the name of a good man (your good name) for it? Cic. Off. 3. 26.—*Nihilû est qui officium suum facere inmemor est*, he is worth nothing who is unmindful of doing his duty. Plaut. Pseud. 4. 7, 1.

ONS. 2. For the construction of *astimāre* see R. 35, OBS. 3. — *Tanti est* with a subject-infinitive and a dative of the interested person as *mihī* means 'I do not mind the trouble of undergoing something' (it is 'so much', i. e. 'nothing' for me), as: *Est mihi tanti, hujus ieradia tempestatem evitare, dummodo a vobis belli periculum depellatur*, I would not mind (would willingly submit to) the tempest of this hatred, if only the danger of a war is averted from you. Cic. Cat. 2. 7.

Obs. 3. Of the same construction are the 'colloquial' genitives *flocchi, navici, assai, renzucchi*, which, with *facere, penderi, ducere* and *habere*, and a negation, correspond to our

1 The contractor. — 2 to pay. — 3 proper name. — 4 valuation. — 5 to relieve. — 6 a profit.  
— 7 agent. — 8 *incutere in aliquem*, to fall in the hands of somebody. — 9 *interest alienas*,  
somebody has an interest. — 10 *debere*, to be bound to pay. — 11 *nasci*, to grow. — 12 *Capi-*  
do. — 13 *spectare*, to consider, to regard. — 14 *et qui studiis suis harum rerum*, those  
that feel an interest for those things; or the phrase may be taken for a circumlo-  
cution of our noun 'expert'. — 16 *verum* may be understood as an adversative conjunc-  
tion (*but*), or as the neuter of the adjective *verus*. In the first case the phrase is to be  
rendered '*But be this as it may*'; in the second case the translation would be '*Supposing*  
*this were true*'. — 16 literally 'to assert as something excellent', i.e. to pride yourself upon  
(with a participial construction). — 17 *fuisse qui*, that there have been those who. —  
18 supply *emerit*.

'not to care a straw for something', as *Judices rempublicam stocci non faciunt*, the judges do not care a straw for the republic. Cic. Fam. 4, 5.—*Equi conique aliquid facere* means 'to take a thing pleasantly' (in good part), as *Si vos non moveat periculum, nos æqui bonique facimus*, if you do not care for the danger, we look pleasantly at it. Liv. 34. 22.

1. Scio *quantū* aestimetur nostrae apud vos querelae. Liv. 29, 17. — 2. His temporibus, tam dubia vitiā optimi cuiusque, *magnū aestimō* unius aestatis fructum<sup>1</sup> palæstræ<sup>2</sup> Palatinæ. Cic. Att. 2, 4, 7. — 3. Si callidi rerum aestimatores<sup>3</sup> prata et areas<sup>4</sup> quasdam *magnū*<sup>5</sup> *aestimant*, *quantū* est *aestimanda* virtus, quæ neque naufragio<sup>6</sup> nec incendio amittitur? Cic. Par. 6, 2, 51. — 4. Verresne tibi *tantū* *fuit*, ut ejus libidinem hominum lino-centum sanguine lui<sup>7</sup> velles? Cic. Verr. 2, 1, 30. — 5. Nosrum est ferre modice<sup>8</sup> populi voluntates; honores si *magnū* non *petimus*, non servire populo; sin<sup>9</sup> eos expectamus, non delatigari<sup>10</sup> supplicando<sup>11</sup>. Cic. Planc. 4, 11. — 6. Si bona valetudo<sup>12</sup> *pluris* est *aestimata* longa quam brevis, sapienter quoque usus longisimus quisque<sup>13</sup> *plurimi* *est*. Cic. Fin. 3, 14. — 7. Non est beator ille qui plura habet bona ea quæ in corpore *magnū* *aestimatur*. Cic. Ib. 3, 13. — 8. Si sapiens aliquis miser esse potest, næ ego istam gloriosam<sup>14</sup> virtutem non *magnō*<sup>15</sup> *aestimandam* puto! Cic. Ib. 3, 3. — 9. Illud est hominis magni atque sapientis, *maximū* *aestimare* conscientiam mentis suæ. Cic. Clu. 58, 10. Pravi<sup>16</sup> homines sua *parvū* *pendere*, aliēna cupere solent. Sall. Cat. 12. — 11. Cato ex Sicilia Ennium poetam deduxerat<sup>17</sup>, quod non *minorū* *aestimamus* quam quælibet amplissimum triumphum. Nep. Cato, 1. — 12. Qui ad virtutem adiungunt volupstatem, quam etiam virtus *minimū* *favit*, accessione<sup>18</sup> utuntur non ita<sup>19</sup> probabiliter<sup>20</sup>. Cic. Fin. 2, 13. — 13. Jugurtha Cassii privatum fidem<sup>21</sup> non *minoris* quam publicum populi Romani *ducebat*. Sall. Jug. 32. — 14. Caesar *tantū* apud se Divitiarum gratiam *esse* ostendit, ut suum dolorem ejus precibus condonaret<sup>22</sup>. Cæs. B. G. 1, 20. — 15. Video quanta nobis invidiæ tempestas impendat<sup>23</sup>; *sed est tantū*, dummodo<sup>24</sup> ista calamitas a reipublica periculis sejungatur<sup>25</sup>. Cic. Cat. 1, 9. — 16. Horti illi inveniendi<sup>26</sup> tibi sunt si me *tantū* facis *quantū* certe facis. Cic. Att. 12, 37.

**Rem. 36.** The genitives of the quantitative adjectives are used as one of the forms to denote the degree of INTEREST which is taken in an action, which is generally expressed by the impersonals *interest* and *refert* (p. 621).

ORIS. 1. The idea of 'interest' may be expressed by several other verbs: 1) By *esse* with a genitive of 'appreciation': mostly used in the meaning '*it is important*', e.g. *consequens*: *Nam illud quod maxime parum est, facit me satisfacturum arbitror*: As to you, which is the most important point, for me I will easily satisfy you. Cic. ad Brut. 1, 12.—which is the most important point, for me. 2) By *cupidus*, and *non attinet* (see p. 621).—3. By the predicate-dative '*aliquid alicui cordi est*', something is at one's heart'.—his heart is set on it', he feels interest in something', where *cordi* has the abstract meaning '*feeling*'. Quia ita cordi erat regi, because the king had set his heart on it. Liv. 28. 18. Comp. Ib. 1, 39; 28, 20 (also = *carum esse alicui*. Cic. Verr. 2, 1. 44). But neither *cordi est* nor *exipedit* and *attinet* are construed with objects denoting the DEGREE of interest.

Obs. 2. The impersonal *refert* has nothing to do with the verb *référer* (to refer), but is a compound of *rē* (the ablative of *res*) and *fert*. *Fert* is used in this connection with a force similar to the English 'it tells', the ablative *re* meaning 'in the affair' or 'in the interest'. Thus: *re mē fert*, it tells in my interest or affair, *i. e.* I am interested in something, it is important to me.—*Re Gajī fert*, 'it tells in the interest of Gajus', it is important to Gajus. By writing *re* in one word with *fert*, the construction became this: *Gajī refert*, *mē refert*. This same construction was applied to *interest* which has the same meaning as *fert* (*refert*); but with *interest* the ablative *re* was omitted as soon as the combination *refert* had effaced the understanding of the original form of this construction. Notwithstanding the omission of *re*, the former attributive genitive, and the attributive possessives of *re*, were retained in their original forms as grammatical objects of *interest*. (Obs. 4).

Obs. 3. As SUBJECTS of *interest* and *refert* are used SUBJECT-CLAUSES, or (more rarely) SUBJECT-INFINITIVES. The subject-clauses are mostly interrogative or infinitive clauses,

<sup>1</sup>The revenue, rent.—<sup>2</sup>the gymnastic hall on the Palatine.—<sup>3</sup>appraiser.—<sup>4</sup>plot of ground.—<sup>5</sup>There is another reading '*mami*'. Which is the correct reading?—<sup>6</sup>shipwreck.—<sup>7</sup>to be satisfied.—<sup>8</sup>without murmuring.—<sup>9</sup>but if.—<sup>10</sup>to be tired.—<sup>11</sup>by work.—<sup>12</sup>bond slave.—health.—<sup>13</sup>'quique' is here redundant. See p. 751.—our supplications.—<sup>14</sup>bond slave.—<sup>15</sup>Some editions give *nagrik*, and some manuscripts have boastful pretensions.—<sup>16</sup>Some editions give *asimam*, referring to inner valuation.<sup>17</sup>Magna is correct, since Cicero construes as'imam, referring to inner valuation, either with magni or (but rarely) with magno.—<sup>18</sup>bad.—<sup>19</sup>to take along. The word deducere is technically used of the captured hostile chiefs who were paraded in triumphal processions.—<sup>20</sup>to make an addition.—<sup>21</sup>very.—<sup>22</sup>approvable.—<sup>23</sup>pledged faith, word.—<sup>24</sup>to sacrifice.—<sup>25</sup>to be imminent.—<sup>26</sup>as long as, if but.—<sup>27</sup>to keep apart.—<sup>28</sup>to find out (for me).

as: *Maxime interest quemadmodum quæque res audiatur*; it makes a vast difference how a thing is heard. Cic. Brut. 57.—*Quid refert, victum esse Antonium?* What difference makes it that A. has been defeated? Ib. ad Brut. 1, 17.—*Interest omnium recte facere*. It is in the interest of all to do right. Ib. Fin. 2, 22.—More rarely the subject-clauses of *interest* and *refert* take the form of That-clauses with *ut, ne, quod*, or the form of a Si-clause. Frequently, in place of subject-clauses, the neuters singular of the determinative form-adjectives (*hoc, illud, id, quod*) are used (Ex. 1, 8, 9, 14, 18, 19; see § 494, R. 95). For the particulars of the constructions of *interest* and *refert*, see p. 621 foll.

Obs. 4. The quantity or degree of the interest is expressed either by the QUANTITATIVE FORM-ADJECTIVES, or by the ADVERBS OF INTENSITY (p. 261), or by the neuters singular of some DETERMINATIVES of the interrogative and indefinite forms (*quid, aliquid, nihil*).

The QUANTITATIVE ADJECTIVES take either (a) the form in *um*, according to the rules on the relation of INTENSITY (R. 31), as *Quantum interest (refert)*, what a great difference does it make, how important is it (Ex. 4, 5, 6.); *tantum interest*, so important is it; *plurimum interest*, it is of the greatest importance, etc.—Or they are (b) conceived as degrees of APPRECIATION, taking the genitive form according to the rule § 561. In this instance these adjectives (*quantum, tantum, multi, plurimum*) are subject to the same restrictions as when they are used as objects of the verbs of 'esteeming', as *Permagna nostra interest te esse Romæ*, it is of the highest importance for us that you should be at Rome. Cic. Att. 2, 23.—*Ilui parvi refert nos vectigalia amissa postea victoriâ recuperare*. It is of little consequence (it makes little difference) that we afterwards recover the lost revenue by victory. Cic. Man. 7, 18.—*Quanti id refert si tamen accidit?* What difference does it make, if it yet happens? Cic. Fam. 5, 9, 1. (See Ex. 7-12.)

The ADVERBS OF INTENSITY take all the different forms detailed in § 558, as *quantopere interest*, how greatly important is it; *magnopere refert*; *non tam interest quam*; *magis, minime, maxime interest*. (See Ex. 13-17.)

If the NEUTER DETERMINATIVES are used to qualify the verbs *interest* and *refert* (a case which must be well distinguished from the instance that the neuters *hoc, illud, quod* are impersonal SUBJECTS), we generally render such phrases by the nouns 'importance', 'consequence', 'difference'. These combinations are very frequent with *refert*, but extremely rare with *interest*, as: *Quid id meâ refert?* What difference makes it for me? Plaut. Curc. 3, 25.—*Si servus est numquid refert?* If he is a slave, makes it any difference? Plaut. Pseud. 2, 4, 23. (Ex. 18, 20, 21, 22.)—*Refert with nihil or non* is rendered 'it makes no difference' or 'it is of no consequence', or 'it is unimportant', 'it concerns not', as: *Meâ quidem istuc nihil refert*, that concerns me not (or 'it is of no consequence,' etc. to me). Plaut. Pers. 4, 3, 68. See Ex. 18, 21, 22.

The personal construction with substantives as subjects of *refert* and *interest* is extremely rare and mostly non-classical, as *Longitudo in his refert, non crassitudo*, the length is the important point in this, not the thickness. Plin. H. N. 18, 31, 74.

Obs. 5. The PERSON or THING (always conceived as a person) that is interested in an action, is placed in the GENITIVE. But if the interested person is expressed by a personal pronoun, the latter takes the form of a POSSESSIVE FORM-ADJECTIVE in the ablative singular feminine (*meâ, tuâ, suâ, nostrâ, vestrâ*; but *illius, ipsorum, cuius, cuiusquam, Guji, reipublicæ* etc.). When the genitive of substantives is required, the verb *interest* is far more frequent than *refert*, which is very rarely construed with the genitive of substantives, but very often with ablative possessives. In English these forms of the 'interested person' are expressed either personally by subject-nominatives, or by the equivalents of the DATIVE as the proper case of the 'interested person' (§ 474, R. 47, § 469); as: *Magni interest meâ unâ nos esse*, it is of great importance (great interest) to me that we should meet, Cic. Att. 13, 4.—*Magis nullius interest quam tuâ*, non imponi cervicibus tuis onus sub quo concidas, it is to nobody of so great importance as to yourself, that no burden should be placed on your shoulders (literally 'neck') under which you would sink. Liv. 24, 8.—*Semper ille quantum interesset Clodii se perire cogitabat*, he always thought of how great importance it was for Clodius that he should perish. Cic. Mil. 21, 56.

The origin of this construction is the one explained in obs. 2, although some grammarians have taken very different views. The older grammarians mostly explained *meâ, tuâ* etc. as neuter accusative plurals (not considering the long quantity of the final *a* and the length of the syllable *re* in *refert*). Others (for inst. Zumpt and Kühner) supply *causâ*. Madvig thinks that *meâ* is an adverb with the force 'in my direction'. But old Priscian explains *refert* by *in re meâ fert*, and he is unquestionably right.

Obs. 6. The THING which is concerned in the action BESIDES or IN PLACE OF the person is sometimes added by means of the preposition *ad*, as *Magni ad honorem nostrum interest* (inst. of *honoris nostri*) *me quam primum ad urbem venire*, it is of great consequence to my honor that I should come as soon as possible to town. Cic. Fam. 16, 1. The DATIVE of the interested person as object of these verbs occurs in the only passage of Hor. Sat. 1, 1, 49: *Dic quid referat intra Naturæ finis viventi* (some reading *viventis*) *jugera*

*centum an mille arel?* Say what matters it to one living within Nature's bounds whether he ploughs a hundred acres or a thousand?

1. Epistolârum genera multa esse non ignôras, sed unum illud certissimum cuius causâ inventa res ipsa est, ut certiores faceremus a sentis si quid esset *quod eos scire aut no trâ aut ipsorum interesset*. Cic. Fam. 2, 4, 1.—2. Hic suâ putat interesse se re ipsâ et gesto negotio, non lege, defendi. Cic. Clu. 54.—3. Quis est hodie *cujus interest* istam legem manere? Cic. Phil. 1, 9.—4. *Quantum reipublicæ interfuit* Cæsarem potius habere quam Antonium principem, *tantum* (reipublicæ) *retulisset habere* Brutum quam Cassium. Vell. 2, 72.—5. Ostendam alio loco *quantum salutis communis intersit* duos consules in reipublicâ esse. Cic. Mur. 2, 4.—6. *Is vacat*<sup>1</sup> in suffragio plurimum *cujus plurimum interest* esse in optimo statu civitatem. Cic. Rep. 2, 22.—7. Tuâ sponte te intezigere scio, *quantum reipublicæ intersit* omnis copias in unum locum convenire<sup>2</sup>. Cic. Att. 8, 6.—8. Nihil pot<sup>3</sup> *pluris tuâ hoc quam quanti illud refert meâ*. Plaut. Rud. 4, 3, 38.—9. Cum M. Varro sibi ita persuasisset ipse, meas de se accurate scriptas litteras maximum apud te pondus<sup>4</sup> habituras, malui facere *quod* meus familiaris *tanti suâ interesse* arbitraretur. Cic. Fam. 13, 10.—10. *Magni refert quali* in corpore *locatî*<sup>5</sup> *sint animes*. Cic. Tusc. 1, 33.—11. *Parvi refert* abs te ipso *jus dici*<sup>6</sup> *æquabiliter*<sup>7</sup>, nisi idem ab eis fiet quibus tu ejus muneris<sup>8</sup> aliquam partem concesseris<sup>9</sup>. Cic. Qu. Fr. 1, 1, 7.—12. Quod tu isti lacrimis te probare postulas<sup>10</sup>, *non plus refert* quam si imbrem<sup>11</sup> in cribrum<sup>12</sup> *geras*<sup>13</sup>. Plaut. Pseud. 1, 1, 100.—13. Cæsar Divitiacum docet *quantopere reipublicæ communitisque salutis intersit* manus hostium distineri<sup>14</sup>. Cæs. B. G. 2, 5.—14. Erat tam demens hic ut omni<sup>15</sup> suas fortunas alienis servis committeret. At quibus servis? *Refert enim magno opere id ipsum*. Cic. Cæl. 23, 57.—15. Cæsar dicere solēbat, *servi non tam suâ quam reipublicæ interfuisse* at salvis esset. Suet. Cæs. 86.—16. Sulla regi non tam suâ quam reipublicæ *interfuisse* at salvis esset. Suet. Cæs. 86.—17. Sulla regi non tam suâ quam reipublicæ *interfuisse* at salvis esset. Suet. Cæs. 86.—18. Sulla regi non tam suâ quam reipublicæ *interfuisse* at salvis esset. Suet. Cæs. 86.—19. Sulla regi non tam suâ quam reipublicæ *interfuisse* at salvis esset. Suet. Cæs. 86.—100. Sulla regi non tam suâ quam reipublicæ *interfuisse* at salvis esset. Suet. Cæs. 86.

### 3. Relation of Weight.

§ 562. The relation of quantity in regard to weight is expressed by the measure-units of weight with attributive cardinals in the ACCUSATIVE; as: Cyathus pendet *drachmas decem*, a cyathus weighs ten drachmæ. Plin. H. N. 21, 209. Indefinite weight is expressed by the quantitative form-adjectives (R. 31) in the ACCUSATIVE NEUTER form, as: Plumbum *tantundem* pendere par est, lead should weigh just as much, Lucr. 1, 360.

Obs. 1. The standard of Roman weight was the POUND (*libra, pondo*), which in opposition to the fractional parts was called *as* (§ 498, R. 105). *Pondo* is originally an ablative meaning 'in weight', adding the measure-unit of weight in the accusative, as *decem libras pondo*, ten pounds in weight. The noun *libra* (*libram*) being frequently UNDERSTOOD (*decem pondo*, ten pounds in weight), the noun *pondo* gradually took the place of *libra*, taking the form of an indeclinable noun, and the meaning 'pound'. It is, however, frequently used in connection with *libram* or *libras*. Half a hundred-weight is sometimes expressed by *talentum*.—The twelfth part of a pound is *uncia* (ounce).

Obs. 2. The NEUTER verb to weigh is expressed either by the neuter verb *pendere*\* or

\* *Aliquis valet in suffragio*, One's vote has weight, or is of weight.—<sup>2</sup> *optimus status*, the greatest prosperity.—<sup>3</sup> *assemble*.—<sup>4</sup> *pol* or *ædopol*, a swearing particle, literally 'by Pollux'.—<sup>5</sup> *quam* and *quantum* are together rendered by 'as'.—*Quam* is considered as a mere conjunction of comparison, and *quantum* as a quantitative of the relative form.—<sup>6</sup> *jus* to have weight with somebody.—<sup>7</sup> *locare*, to place.—<sup>8</sup> *jus* to invest somebody with something.—<sup>9</sup> *impartially*.—<sup>10</sup> What you claim to prove.—<sup>11</sup> *rain*.—<sup>12</sup> *cribrum*, a sieve.—<sup>13</sup> *to let run*.—<sup>14</sup> *to keep separated*.—<sup>15</sup> *corvus*, raven.—<sup>16</sup> *cornix*, a crow.—<sup>17</sup> *long*.—<sup>18</sup> *to add on writing*.—<sup>19</sup> *Inde mite subject*, instead of *aliquid*.—<sup>20</sup> Our lexicons (including Forcellini, even in the newest edition) give not *pendere*, but the transitive verb *pendere* as the word expressing the idea 'to have weight'. This is

by *esse*, both taking the object denoting the weight in the accusative case, as: *As erat libram pondo*, the *as* weighed a pound (was a pound in weight). Varro L. L. 5, 36.—*Iris cribrata sit pondo quincuncem*, the quantity of sifted 'Iris' should weigh a pound and five twelfths. Col. 12, 28.—*Quot pondo te censes esse*, how many pounds do you think you weigh? Plant. Asin. 2, 2, 35.

Obs. 3 The numeral expressions by which weights are determined are added in the ACCUSATIVE CASE to *pondo*, being the adverbial object of the idea 'weighing', which is never expressed by an adjective, or by a participle (as in English). This accusative also corresponds to our English objective after 'of', indicating the weight, as: *Paterae aureae fuerunt CCLXXVI libras fere omnes pondo*, there were 276 golden bowls weighing all exactly one pound (all a pound in weight, all of a pound). Liv. 26, 47.—*Dictator coronam auream libram pondo*, in Capitolio Jovi donum posuit, the dictator placed a golden crown, one pound in weight, (of one pound) in the Capitol as an offering to Jupiter. Liv. 4, 20.—From *libra* is formed the adjective *libralis*, denoting 'one pound in weight', as *Pira* (pears) *libralia*. Plin. H. N. 15, 11.—*To be of weight*, in a figurative sense, is expressed by the qualitative genitive *ponderis esse*, or by *valere* with a neuter quantitative: *Tuae litterae marini sunt apud me ponderis*. Cic. Fam. 2, 19. So *pondus habere*, Ib. 3, 1; *plus* and *tantum valere*, Ib. 3, 7; Off. 3, 31.

1. Drachma<sup>1</sup> Attica<sup>2</sup> denarii argentei<sup>3</sup> habet pondus, eademque sex obolos<sup>4</sup> pondere efficit<sup>5</sup>; obolus decem chalcos<sup>6</sup> pendet, Plin. H. N. 21, 109.—2. Mna<sup>7</sup>, quam nostri minam vocant, pendet drachmas Atticas centum. Ib.—3. In Transpadana<sup>8</sup> Italia scio, *vicenas quinas libras*, farris<sup>9</sup> modios pendere; circa Clusium et senas. Ib. 18, 12, 2.—4. Invenimus thunnos<sup>10</sup> talenta quindecim pependisse. Ib. 9, 17.—5. *Pistulas*<sup>11</sup> denum pedum longitudinis esse legitimum est<sup>12</sup>, et si quinarie<sup>13</sup> erunt, *sexagena pondo pendere*; si octonariae, *centena*; si denariae, *centena rivena*. Ib. 31, 31.—6. Exercitus Minucio coronam auream libram pondo decrevit. Liv. 3, 29, 3.—7. Vincit centum pondo es, quando *pendes*<sup>14</sup> per (on) pedes. Plant. Asin. 2, 2, 35.

GENERAL REMARKS ON THE GRAMMATICAL FORMS USED IN THE RELATIONS OF MEASUREMENT, WEIGHT, AND COMPUTATION.—The most general form by which the English language designates all these relations, and distinguishes them from each other are ADJECTIVES (participles) and VERBS to which the numeral expressions of measurement, weight and computation are added as objects in the form of the objective case. As to the use of adjective and participial expressions, the two languages are analogous in the measurement of SPACE and TIME, but they differ in the other relations.

(a) In SPACE the adjective expressions used in both languages to designate measurement, aside from minor diversities, are almost the same (§ 498 and R. 103). The general verb 'to measure' (in a neuter sense), under which all the different kinds of measurement in space are comprised, is in Latin expressed by the verb *patere*, which, in this sense, is construed with an ACCUSATIVE, corresponding to the English objective, as: *Aestimabat quid in fronte paterent lapides singuli*, he estimated what the single stones measured in front. Liv. 25, 23. *Schenus quadraginta stadia patet*, the schenus (a Persian measure of distance) measures forty stadia. Plin. H. N. 12, 30, 2.—*Hujus silvae latitudo novem dierum iter patet*, the width of this forest measures nine days' journeys. Cic. B. G. 6, 25.

(b) In the relation of TIME the English language designates by ADJECTIVES the age, but no other spaces of time. The Latin language agrees in this respect with the English (§ 498), except that in respect to the age of THINGS or ANIMALS the English 'old' is neither expressed by *natus*, nor by *agens*, but either by a genitive, or by *annum* (annos) *habere*, as: *Lucus Lucinus nunc circiter annum quadringentesimum quinquagesimum habet*, the Lucinian grove is now about 450 years old, Plin. 16, 85.

(c) In the relation of PRICE and VALUE the Latin language has no adjective corresponding to our adjective 'worth'. The expression 'worth such a price' is variously paraphrased according to the connection (R. 32, obs. 4).

a strange error, caused by the passage of Lucretius cited above. It is certain that in this passage the word *pendere* has a short penult, and hence is of the third conjugation, belonging to *pendo*, not to *pendeo*. But since *pendere* always denotes 'to weigh a thing', in an active sense, it is obvious that Lucretius, by a frequent poetical license, for the sake of the metrum, has used the active verb in a neuter sense. There is no other passage in any author in which *pendere* is used in the neuter sense 'to have weight'. The passages of Pliny in which *pendere* and *pependisse* occur in the infinitive form (Plin. 18, 12, 3; 9, 17; 31, 31) must be assigned to *pendere*, and not to *pendeo*.

<sup>1</sup> A drachma or drachm, a small Greek silver-coin, which is still used in modern Greece.—<sup>2</sup> Attic.—<sup>3</sup> silver (adj.).—<sup>4</sup> an obolus, a Greek copper-coin.—<sup>5</sup> to contain.—<sup>6</sup> the chalcus, (copper), the smallest Greek coin.—<sup>7</sup> a Greek word (Mna).—<sup>8</sup> Transpadane, i. e. beyond the Padus (the river Po).—<sup>9</sup> far, rye.—<sup>10</sup> a tunny-fish.—<sup>11</sup> lead pipes.—<sup>12</sup> legitimum est esse, they should be (literally: it is legitimate that they should be).—<sup>13</sup> quinarus, octonarius, denarius, measuring five, eight, ten digits in circumference.—<sup>14</sup> *pendere* is here 'to be weighed', not 'to hang'. See Lambin. to this passage.

(d) In the relation of WEIGHT the phrase 'weighing such an amount' is expressed by the indeclinable *pondo* (in weight) with an accusative, or by a mere accusative (§ 562, obs. 3.)

(e) In 'computation' the Latin language, like the English, lacks specific grammatical forms. Our phrase 'so many men etc. strong' is not expressed by an adjective, but by the ablative *numero* (or *ad numerum*) in connection with a genitive, as: *Cum Persae mille numero navium classem ad Delum appulissent*, when the Persians had landed at Delos a fleet one thousand sails strong (in number). Cic. Verr. 2, 1, 18. See Cæs. B. G. 1, 15.

#### D. RELATION OF CAUSE.

§ 563. The relation of CAUSE is of three different kinds. It may be conceived: 1) as the means and instrument of an action; 2) as the fact which effects an action (CAUSE EFFICIENT as *real* cause, and MOTIVE as *moral* cause); 3) as PURPOSE. To each of these subdivisions of cause different grammatical forms are applied.

§ 564. If the relation of cause is conceived as the means and instrument of an action, it is expressed either by the ABLATIVE case of the noun represented as means and instrument, or by the preposition *per*.

Rem. 37. Both, the ablative of means, and the preposition *per* are rendered by the English preposition 'by'; but sometimes by other prepositions (*with*, *at*, *on*, *from*). In the passive voice the ablative of means has the appearance of a passive agent, as *dolo aliquem circumvenire*, to circumvent some one by treachery; *dolo circumveniri*, to be circumvented by treachery. *Per* is used with the same force, as:

*Rubrium per vim deduci imperavit*, he ordered Rubrius to be taken up by force. Cic. Verr. 2, 1, 25.—*Cum in eas urbes vi invasisses*, when you had invaded these cities by force. Ib. 26.

Obs. 1. The ABLATIVE OF MEANS has a wider range than the preposition 'by' in English. It borders at the one side on the relation of 'manner', and at the other side, passes over into the relation of 'cause efficient' and 'motive'. (Compare the Examples given § 553, obs. 3.) Thus *pedibus ire* (*ferri*), to walk on foot; *curru vehi* (but also with *in*, Cic. Phil. 2, 21, 58), to ride in a carriage (by wagon), as *Irreligiosum ratus est, sacerdotem pedibus ire ferrique, ac se in vehiculo conspici*, he deemed it irreligious that a priest should walk (and move) on foot, while he himself was seen in a carriage. Liv. 5, 40.—We say 'to be astonished at a thing', or 'to be astonished because', conceiving this phrase either as a metaphor of PLACE or as 'cause efficient'. The Latin conceives the thing at which one is astonished as the 'instrument' of the astonishment, using an ablative of MEANS: *Obstupuit hominis improbi dicto*, he was astounded at the words of the wicked man. Cic. Verr. 2, 1, 26. The MORAL GROUND of an action, which is in English expressed by 'for', is in Latin conceived as an INSTRUMENT of the action, and placed in the ablative, as: *Philippus Demetrium filium nullo alio crimine quam Romane amicitiae initae occidit*, Philip killed his son Demetrius for no other crime than that of having joined friendship with the Romans. Liv. 41, 23. Thus the ablative of means touches the relation of cause as 'a motive', where we use the preposition 'from' or 'out of', as: *Prætor irâ provincie sibi creptæ magistratū se abdicaturus erat*, the prætor was about to resign his office from (out of) anger that the province had been taken from him. Liv. 37, 51. Here belongs the relation represented by 'according to', which in Latin is expressed by *ad* or *ex*, but also by the mere ablative, as *Opinione meâ*, according to (in) my opinion.—*Judices dedit nullâ lege, nullo instituto, nullâ sorte*, he appointed the judges according to no law and precedent, without casting lots for them. Cic. Verr. 2, 2, 16.

Obs. 2. The exact limits of this 'ablative of means and instrument' cannot be reduced to a rule, and in this respect the ablative case shares the character of most prepositions, the limits of which cannot be exactly defined by distinct marks and theoretical reasoning. But it is evident that the idea of 'means and instrumentality' is the leading conception out of which all these different shades and varieties of 'cause' must be explained. It is a remarkable argument for the correctness of this view that in almost all the instances in which an ablative of means is used to express what we generally conceive to be 'cause efficient' or 'motive', the preposition *per* (likewise denoting means) may take the place of the ablative, as: *Si naturalis esset ira, quomodo quemquam penitet quod fecisset per iram?* if anger were natural, how could any one feel compunction at what he has done out of anger? Cic. Tusc. 4, 37.—*Per metum* potius quam voluntate

civium fortūnis consuluerunt patres, the Patricians consulted for the interests of the citizens rather *out of* (through) fear than by their free will. Liv. 2, 24. Here *per metum* is used (with the force of *propter metum*) in place of an ablative, the ablative *metu* having CONVENTIONALLY AN ACTIVE MEANING (by exciting fear, i. e. by threats and terrorism).

This vagueness in the limits of the ablative of 'means' must not make us believe that in Latin the ablative is used for *every* causal relation, and for every instance where we employ our different causal prepositions. Conventional usage, and chiefly the connection in discourse, are the two points by which in this, as in many other relations, the correctness of a given phrase must be tested. While often, as appears from the examples given above, the ablative of means is used with the force of the preposition *propter*, in other instances such a substitution in place of the more definite prepositions would be improper, and make the meaning of the author unclear, as for instance in the following sentence: Andro cum *propter eloquentiam tam propter virtutem* legatus electus est. Andro was chosen deputy both for his eloquence and for his integrity. Cic. Verr. 2, 2, 64. Here the ablative *eloquentia electus est* would rather convey the idea that his election was owing to an eloquent speech which he made in his own behalf. Thus we may lay down the PRACTICAL rule that the relations of 'cause efficient' and 'motive' can only be expressed by an ablative of means (i. e. according to the connection, these relations could not be founded with the relation of 'means and instrumentality' in the proper sense of the word).

Obs. 3. The relation of means and instrumentality cannot be expressed by form-adverbs, nor generally by the ablative of absolute form-adjectives, which usually require a noun to indicate the relation as one of means and instrumentality. By this fact the relation of means and instrumentality is distinguished from all other adverbial relations. In the INTERROGATIVE form the phrase 'by what means' cannot be expressed by a mere *quo?* but by phrases such as *quibus auxiliis, quomodo, qua ratione*, where the ablatives *auxiliis, modo, ratione* are understood to denote 'means' or 'instrumentality'. Thus Boeth. Top. 4, giving the interrogative forms for the principal adverbial relations, enumerates them thus: Quid? Cur? Quomodo? Chi? Quando? *Quibus auxiliis?* (i. e. by what means?). If the relation of 'means' is expressed in the relative form, the antecedent is very frequently repeated after the relative, as: *His esse certum Scythis inter se, quo jure certant, that the Scythians had a certain law of their own, according to which they conducted their law-suits.* Cic. Verr. 2, 2, 16. Thus in the INDEFINITE form: *Quod de ali aliquā ratione potest* (not *aliquo* alone), what may be denoted by some means. Cic. Verr. 2, 2, 41. But in the DEFINITE form the ablative singular *quo*, as not rarely denotes means and instrumentality, as: *Hae committito quod existimare hoc vos volo* etc., I mention this because I wish you to judge 'by this' (surely) etc. Cic. Verr. 2, 4, 60. *Et custodias hostium fallēbant, thereby they deceived the posts of the enemy.* Liv. 23, 19.

Obs. 4. If the means or instrument of an action is expressed by a whole sentence, the Latin generally uses the form of a GERUNDIAL ABLATIVE (§ 529) [more rarely the form of ablatives absolute, see § 530, R. 215], and sometimes the form of a dependent clause introduced by *quod*, and preceded by the absolute neuter *eo* (of *is*), as: *Captivi fidem eo maxime auxere quod sermo inter omnes congruebat*, the prisoners increased the reliance placed upon them chiefly by the fact that the reports of all agreed (by agreeing in their reports). Liv. 9, 2, 4. The same ablative *eo* with a clause introduced by *quod* or *quia* frequently denotes 'cause efficient' or 'motive', as: *Helvetii eo (i. e. ea causa) quod re frumentaria intercludi posse confiderent, iter convertunt*, the Helvetians turned their march for the reason that (because) they trusted that the Romans might be cut off from their supplies. Caes. B. G. 1, 23. The ablative *eo* as ablative of means, must be distinguished 1) from *eo* denoting PURPOSE (§ 566), which is followed by a clause with *ut*; 2) from *eo*, as ablative of DIFFERENCE before a comparative, which is followed by a clause with *quo* (751). See p. 654.

1. Siculi talem acceperant injuriam quam nullā lege satis digni persequi possent. Cic. Verr. 2, 1, 32.— 2. Tu apud exteras nationes imperii nominisque nostri famam *tuis probriis* flagitiisque violasti. Ib.— 3. Caesar dixit, Ariovistum Gallos magis *ratione* et *consilio* quam *virtute* vicisse. Caes. B. G. 1, 40.— 4. Heraclius, pecuniosissimus antea Syracusanorum, nunc nullā aliā calamitate nisi Verres avaritiā atque injuriā pauperimus est. Cic. Verr. 2, 2, 14.— 5. Circumsessus est Verres a Lampsacenis, hominibus et *natūra* et *consuetudine* et *disciplina* lenissimis, ponit autem populi Romani *conditione* sociis, *fortuna* servis, *voluntate* supplicibus. Ib. 2, 1, 32.— 6. Verres milites Myndo Milētum pedibus reverti jussit. Ib. 2, 1, 34.— 7. In culpā sunt qui

1 To prosecute.— 2 *probrum*, a disgraceful act.— 3 method.— 4 strategy.— 5 rich.— 6 *circumsedere*, to besiege.— 7 inhabitants of Lampsacus.— 8 also, further.— 9 by their political condition.— 10 by their misfortune, *fortuna* being used of accidental events in both a fortunate and an unfortunate sense.— 11 as to their wishes. The three ablatives may all be rendered by 'as to'.— 12 *in culpā esse*, to be blamable, to be in fault.

officia deserunt<sup>1</sup> *molitiā*<sup>2</sup> animi. Cic. Fin. 1, 10, 33.— 8. *Oratorum aut interitus* aut *discessu*<sup>4</sup> aut *fuga* primas<sup>5</sup> in causis<sup>6</sup> agebat Hortensius. Cic. Brut. 90, 308.— 9. Regale civitatis genus<sup>7</sup> non tam regni quam regis *vitiis* repudiatum<sup>8</sup> est. Cic. Leg. 3, 7, 15.— 10. Ob haec beneficia, *quibus* illi homines obstupescunt, nullos honores mihi nisi verborum decerni sinit. Cic. Att. 5, 21, 7.

§ 565. The relation of CAUSE EFFICIENT and of MOTIVE is expressed 1) by attributive phrases consisting of the general nouns denoting CAUSE, especially *causa* and *ratio* (sometimes *res*), which are either placed in the ablative, or take a prepositional form, chiefly with *de* and *ob*, sometimes with *ex* and *propter*; 2) by the PREPOSITIONS *propter* and *ob* in direct connection with the substantive represented as the cause, without any intermediate noun, such as *causa* or *ratio*; 3) by substituting a MERE ABLATIVE of the noun in place of *propter* and *ob*; 4) by the FORM-ADVERBS of cause, as *cur*, *ideo* etc.; 5) by CLAUSES or SENTENCES introduced by one of the causal conjunctions (§ 385, 386 and B. VI.); 6) by accessory predicates in form of certain participles (*inductus, adductus, permotus* etc. § 501, R. 115).

Rem. 38. The ABLATIVE *causā* is thus used 1) in connection with ATTRIBUTIVE GENITIVES either of nouns (§ 437, R. 43) or of gerundials (§ 526, R. 206, obs. 3), as *Cæsaris causā*, for the sake (on account) of Cæsar; *honoris causā*, out of respect; *pugnandi causā*, for the sake of fighting. For the ablative *causā* the ablative *gratiā* is, in this connection, frequently used as a synonym.— 2) with ATTRIBUTIVE ADJECTIVES, either descriptive or form-adjectives, as *meā causā*, on my account; *probabili causā*, from a plausible reason; *aliena causā*, for the sake of others. In this connection *gratiā* cannot be used in place of *causā*, except in connection with possessives.

Obs. 1. The ablative of *causa* or *gratia* with an attributive genitive or an attributive possessive adjective is the most general form for 'cause efficient' and for 'motive.' These phrases take POSSESSIVES as attributes, if the cause is conceived as a PERSON in the form of a pronoun of the first or second person, singular or plural (*meā, vestrā, causā*). This form is also used if the attribute is a personal pronoun of the third person which, according to the general rules, is required to be in the REFLEXIVE form (see Summary of Rules after § 425), as: *Dixit, omnis sua causā sollicitos esse*, he said that all were solicitous for his sake. But when, according to the same rules, the DEMONSTRATIVE form must be used, the attribute of *causā* takes the form of a GENITIVE, either of the pronoun of the third person, or of the equivalent demonstratives (*ujus, illius, istius*), as: *Non ita dilexit fratrem ut *ejus causā* labores susciperet*, he did not love his brother so much as to undergo dangers for his sake. Thus *eorum (earum) causā*, for their sake. Sometimes even the pronouns of the first and second persons assume the genitive forms of personal pronouns (*mei, tui, nostri, vestri, sui causā*, for my, thy etc. sake). The ancient ablative *ergo* which is a synonym of *causā* and *gratiā* in this meaning, always requires a genitive attribute. It is ante-classical and poetical, but is also used (even classically) in the language of the LAW. (p. 114, 98).

Obs. 2. The combination of the ablative *causā* with descriptive adjectives and form-adjectives other than possessives is extremely rare, and confined to a few conventional phrases. Instead of using in such connections the ablative *causā*, the prepositional forms of *causa* with *de* and *ob* are far more usual (*de causā; ob quam causam*; but *nullā aliā causa; multis de causis*, not *multis causis*).

Rem. 39. The prepositional form of *causa*, as exponent of the relation of cause efficient and motive (generally with *de* or *ob*) is confined to ad-

1 *officia deserere*, to be faithless to one's duties.— 2 softness.— 3 death.— 4 removal.— 5 *primas agere*, supply *partis*, primarily used of an actor's playing the principal role, means 'to be foremost in any position'.— 6 Supply *agentis*, in pleading causes, i. e. as a pleader.— 7 *regale civitatis genus*, the monarchical form of government.— 8 to repudiate.

jective attributes which do not belong to the possessives, but hardly ever occurs with attributive genitives. It is as unusual to say *ob causam Gaji* in place of *Gaji causā*, as *gravi causā* (for an important reason) in place of *gravi de causā* or *ob gravem causam*.

Obs. 1. *Per* with *causam* and an attributive genitive means 'under the pretext of', as *per causam equitatus cogendi*, under the pretext of drafting cavalry. *Cæs. B. G. 7, 9.*—In a certain meaning *propter* is connected with *ratio* and an attributive genitive, as *propter rationem brevilitatis*, from a regard for brevity. *Cic. Verr. 2, 1, 40.*

Obs. 2. Sometimes *res* with prepositions or in the ablative is used in place of *causa* in this meaning. Some of these combinations (*quare* and *quamobrem*) are considered as regular form-adverbs of cause. (R. 40.)

Rem. 40. The FORM-ADVERBS employed to express the relation of 'cause efficient' and 'motive' are: 1) INTERROGATIVE and RELATIVE FORMS: *Cur*, why; *quidni*, why not; *quare*, *quamobrem*, why, wherefore, for what reason (*quapropter* in this meaning being anteclassical).—2) DEFINITE FORM: *eo*, *ideo*, *iccirco* (or *idecirco*), *propterea*, therefore. Causal form-adverbs of the indefinite form do not exist. In their place phrases with *causa* (in the singular or plural) are used, as *multis de causis*. In place of *cur*, the neuter adjective *quid* is frequently used in the meaning 'why'.

Obs. 1. *Quocirca*, generally enumerated among the adverbs of CAUSE, is a compound of the preposition *circa* with the third locative case *quo* (p. 217, Obs. 8), having the meaning of *circa quod*, i. e. in which respect. Hence it does not properly belong to the relation of cause, but it is sometimes used as a causal adverb, as a synonym of *quamobrem* with the force of a conjunction. See Obs. 6.

Obs. 2. The adverb *cur* is generally considered as an abbreviated form of *quare* or of *cui rei*, both of which surmises are very doubtful, the coexistence of both forms *quare* and *cur* making it very improbable that the one should be a corruption of the other, and the meaning of *cur* excluding its derivation from *cui rei*, which even in its form would have no analogy. *Cur* is unquestionably a word which reaches up to the very earliest periods of language. It distinctly shows the interrogative root *cu* in its primary form (like *cubi*), the letter *r* being most likely a formative sound, which occurs with a similar signification in the cognate languages (the *r* in the English 'where', being of the same origin).

Obs. 3. In anteclassical language the old ablative *quid* (see R. 15, Obs. 2) was used with the signification 'why' (*Plaut. Bacch. 5, 2, 45*). The neuter *quid* frequently occurs in classical language with the force of *cur*, as *Quid est argumentum?* *Quid plura despero?* Why do I argue? Why do I discuss the matter? *Cic. Mil. 16.* It is very frequently used in connection with *est* and the conjunction *quod* (sometimes with *quamobrem*) as an emphatic circumlocution in place of *cur*, as: *Quid est quod tu alios arguas?* *Quid est quamobrem putes te tuam culpam communicare cum altero posse?* Why (literally: what is it that) do you accuse others? Why (literally: what is it for which reason) do you think you can make another share your guilt? *Cic. Verr. 2, 2, 20.*

Obs. 4. Among the causal form-adverbs of the interrogative form, *cur* and *quid* are the most frequent, having the most general character. *Quare* usually asks for the reasons which have determined an action, and *quamobrem* more generally refers to MOTIVE or PURPOSE; as: *Quare primum ille adesse noluit?* deinde tu *cur* iudices alios sortitus es? Why, in the first place, refused that man to be present? and again, why did you draw (by lot) other judges? *Cic. Verr. 2, 2, 18.*—*Quamobrem* censores ad statum tibi conferbant? Why did the censors contribute for thy statue? *Ib. 2, 2, 55.*—If the interrogation is negative, three forms are used: *Quin* (instead of *quid non*), *quidni*, *cur non*, corresponding to *quid*, *quid*, and *cur*, (*quare* and *quamobrem* being rarely used with negations). *Quin* (why not) does not really ask for a reason, but implies that a future action should be performed, and hence always makes the sentence virtually IMPERATIVE, as: *Quin conscendimus equos.* Why not mount our horses? (= *Conscendimus equos.*) *Liv. 1, 57.* See pp. 546 and 547.

Obs. 11. *Cur non* asks for the reason of a present or past not-doing: *Qui sunt hi? cur non nominantur?* Why are they not named? *Cic. R. A. 27.*—*Cur non recta introibam?* Why did you not enter straightways? *Ter. Eun. 1, 2, 7.*—*Quidni* (always with the subjunctive) means 'Why should not?' and virtually contains an emphatic AFFIRMATION, being also used without a predicate (= *Why not?*). It generally refers to the speaker's own acts: *Quidni meminero?* Why should I not remember? (i. e. I certainly remember). *Cic. Or. 2, 66.* See, for the derivation and nature of this adverb, p. 708, note †. All the causal interrogatives, except *quidni* (*quin* only in certain connections; see pp. 547, 548

615, 12) are also used in indirect questions and as relatives: *Quæ quum ita sint, cur non arbitrum pro socio adegeris Q. Roscium, quæro?* I ask, why you did not proceed against Q. R. by an action on account of partnership? *Cic. R. Com. 9.*—*Ipse ostendit, quamobrem Carbonem reliquerit;* he himself shows why he left Carbo. *Ib. Verr. 2, 1, 13.*—If used as relative adverbs, *quare* etc. generally have the office of relative adjectives with causal prepositions, referring to *causa*, *ratio*, *res*, as antecedent, and are rendered 'for which', 'on account of which'. See Ex. 18, 19, 20. For the particulars of this relative use, see p. 527 (a).

Obs. 5. The demonstrative adverb *eo* (expressing 'cause efficient' or 'motive') is not the same as the local adverb *eo* of the third locative case (R. 5, No. (e)), but the ablative neuter of *is*. *Ideo* is a compound of *id* with *eo*. *Propterea* is formed out of the fourth locative case *ed* with the preposition *propter*. To these causal adverbs may be added the second locative cases *hinc* and *inde*, which sometimes are used in a causal sense, in the meaning 'hence'. Here belongs also the compound *proinde*, hence, and the words *itaque*, *igitur*, *ergo*, which have assumed the nature of coordinating conjunctions (§ 385). Here also belong the relatives *quare*, *quamobrem*, and *quapropter* which are very frequently employed in the signification of *itaque*, the relatives which form part of these adverbs having a DEMONSTRATIVE force, as is frequently the case with all kinds of relatives. With the same force *quocirca* is sometimes used.

Obs. 6. The causal adverbs of the relative and definite (demonstrative) forms, are on the dividing line which separates CONJUNCTIONS and RELATIVE ADJECTIVES from the ADVERBS, and hence belong to the most interesting formations of the language. The common feature of the causal conjunctions and causal adverbs of the demonstrative and relative forms is that they all contain a DEMONSTRATIVE or RELATIVE element which incorporates in them a whole sentence, either preceding or following. While thus, as it were, either REPEATING or ANTICIPATING sentences, they at the same time, by their second, CAUSAL element, designate these sentences as CAUSES. Hence this form was admirably adapted for 'connecting sentences' with each other. This nature of connectives they especially have when they are the first words in a new sentence. Those among them which are HABITUALLY placed thus in the beginning of sentences for the purpose of connecting them with the preceding sentence, have by this fact assumed the nature of conjunctions, being, as it were, impregnated with the force of causal connectives. These are *itaque*, *igitur*, *ergo*, which are ONLY used as connectives, and hence are exclusively considered as conjunctions. The same nature have *quare*, *quamobrem*, *quapropter*, *quocirca*, although these words are not called conjunctions, since they, as interrogatives and relatives, retain their adverbial force. As conjunctions they occur in the following sentences: *Non tam facile Carthaginis opes concidissent, nisi Sicilia classibus nostris pateret. Quare P. Africanus, Carthagine delēta, Siculorum urbes pulcherrimis monumentis exornavit;* The power of Carthage had not collapsed so easily, had not Sicily been open to our fleets. *Therefore P. Africanus, after the destruction of Carthage, embellished the cities of Sicily with the most beautiful monuments.* *Cic. Verr. 2, 2, 2.*—*Mihi necessario properandum est. Quamobrem reliqua attendite;* I must necessarily hurry. *Therefore* attend to the rest. *Ib. 2, 1, 16.*—*Quocirca merere hoc eventu, vereor an magis invidi sit quam amici. Therefore* I am afraid lest it be rather a sign of envy than of friendship, to mourn for this event. *Cic. Am. 4, 13.* *Nemo istum comperendinatum sed condemnatum iudicaret. Quapropter ego, quod ad me attinet, vici;* Nobody would think his case adjourned, but they would consider him condemned. *Therefore* I have triumphed as far as I am concerned. *Ib. 2, 1, 8.*—In all these sentences the adverbs *quare*, *quamobrem*, *quapropter*, *quocirca* are virtual conjunctions, and may be replaced by *itaque*; *quapropter* in the last sentence may be even replaced by *ergo*. Thus *proinde* is generally used with the force of *ergo*, as: *At accusatores ejus multo majorem pecuniam pretori polliceri; proinde, si saperet, vidēret quid sibi esset faciendum;* He says that his accusers were promising the praetor a far greater sum; hence, if he were wise, he would see what he had to do. *Cic. Verr. 2, 2, 29.*

Obs. 7. *Eo*, *ideo*, *iccirco*, and *propterea* are distinguished from *quare*, *quamobrem*, *quapropter*, *itaque* and *ergo* by the fact that they cannot be used with the force of conjunctions. They may open a sentence the same as *quare* etc., but they do not, in this case, connect the preceding sentence with that sentence of which they are grammatical members, as: *iccirco*, iudices, quia veram causam habebam, brevi peroravi. *Therefore*, O judges, did I plead briefly, because I had a good cause. *Cic. Inv. 1, 48.*—*Eo*, *ideo*, *iccirco*, and *propterea* generally are in the relation of 'ANTECEDENTS' to CAUSAL CLAUSES introduced by *quod* or *quia* (see p. 492, Obs. 15 foll.; p. 683, Obs. 3), being rendered 'therefore', or 'for the reason', the following conjunction *quod* or *quia* being translated by 'that'. Often both, *ideo* (*iccirco* etc.) and the following conjunction are rendered by the single conjunction 'because'; as: *Ideo mihi non satisfacio quod nullam partem meritorum tuorum consequi possum,* I am not satisfied with myself for the reason that (or because) I cannot reach any part of thy merits. *Cic. Att. 3, 14.*—*Filia habitabat cum patre propterea quod*

virum non habebat, the daughter lived with her father *because* she had no husband. Cic. Verr. 2, 1, 25.—*Eo* is generally placed *after* the causal clause, and sometimes this is also the case with the other causal adverbs, as: *Quod* probare populo Romano fidem vestram non potuistis, *eo* vobis iudicandi potestas erepta est, *because* you could not prove to the Roman people your faithfulness, *therefore* the judicial power has been taken from you. Cic. Verr. 2, 1, 8.—Instead of *eo*, in this sense, frequently *eā re* with *quod* or *quia* is used [which serves as an evidence that *eo* in this connection is an ablative, and not the third locative case]; as: Causam cognosci oportet; *eā re* quidem *quod* aliter condemnari reus non potest, the case must be tried, and *for this reason* that otherwise the accused cannot be condemned. Verr. 2, 1, 9.

Obs. 8. *Propterea*, in classical language, is rarely used otherwise than in connection with a causal clause. But *eo*, *ideo*, *icircō* occur also without such a clause, referring to the *previous sentence*, which in this instance must be UNDERSTOOD as being added to the adverbs in the form of a CAUSAL CLAUSE; as: Afranius et Petrejus Caesarem praelio lacessunt; neque *icircō* Caesar opus intermittit; Afranius and Petrejus make attacks on Caesar; but Caesar does not interrupt his work *for that reason* (on that account). Cic. B. C. 1, 42. Here we must after *icircō* supply the previous sentence in the form '*quod praelio lacessēbatur*'. In such connections the adverbs *ideo* etc. are nearest related to the causal conjunctions *itaque* etc., and their equivalents *quare*. But there is still this difference between both classes of words, that *ideo* etc. never connect the sentences, but are the grammatical objects of the predicates in their own sentence. *Itaque* etc., on the other hand, are not members of any of the phrases of the sentence which they introduce. Hence *ideo* etc. express the reason 'for the sake' or 'on account of' which the subject of the sentence performs the action contained in the predicate; while the reason which is expressed by *itaque* is conceived by the author, who makes the connection, and not by the subject. This will be clear by comparing the following sentence with the one last quoted: In censu habendo potestas omnis censōri permittitur. *Itaque* populus eum maximā curā deligit; in making the census all the power is left to the censor. *Therefore* the people elects him with the greatest care. Cic. Verr. 2, 2, 43. Here *itaque* expresses the author's reason, by which he accounts for the care in electing the censor; hence *icircō* or *ideo* would be improperly applied in place of *itaque*. But in the sentence quoted above the reason for the act is represented as that of the subject, not that of the author.

1. Sophistae<sup>1</sup> appellantur ei qui ostentationis<sup>2</sup> aut questus<sup>3</sup> causā philosophantur<sup>4</sup>. Cic. Acad. 2, 23.—2. Beneficium est quod quis non suā causā dat, sed ejus cui dat. Sen. Ben. 5, 11.—3. Quam multa quae nostris causis<sup>5</sup> iniquum, invidiosum, laetum causā amantur. Cic. Am. 16, 57.—4. Omnia sub ta videntur majore, et quidem ob deos causis. Cic. Tusc. 3, 22.—5. Quamobrem quid est quod mirere, si cum eisdem me in hac causā vides adesse<sup>22</sup> cum quibus in ceteris intelligis abfuisse<sup>23</sup>? Ib. 3, 7.—29. Etiam deos aliqui verbis ferocioribus<sup>24</sup> increpant<sup>25</sup>, nec ideo quemquam fulmine ictum<sup>26</sup> audimus. Liv. 45, 23.

§ 566. The relation of CAUSE, conceived as PURPOSE, is expressed by the following grammatical forms: 1) by attributive phrases in the ABLATIVE with the general nouns expressing purpose as governing words (*causa*, *gratia*, *ratio*, *consilium*, *animus*, *mens*; 2) by PREPOSITIONAL PHRASES with *ad* and the special noun *finis* (end, purpose) as governing word; 3) by the prepositions *ad* and *ob* with NOUNS or GERUNDIALS; 4) by the FORM-ADVERBS *quo*, *quamobrem*, and *cur* (for what purpose); *eo* and *ideo* (for that purpose); 5) by clauses with *ut*, *ne*, *quo*, or equivalent relative clauses; 6) by the participial gerundials (§ 516); 7) by the participle of the PERIPHRASTIC FUTURE as an accessory predicate (§ 510); 8) by the ABSTRACT DATIVE, as completing or accessory predicate (§ 469, R. 34; § 555, R. 26, OBS. 2); 9) by the GERUNDIAL DATIVE (§ 528, R. 211); 10) by the FIRST SUPINE (§ 351).

Obs. 1. The ablative of the nouns *causa* and *gratia* with a genitive gerundial (§ 526, R. 206, OBS. 3), almost always represents the genitive of the gerundial as a PURPOSE of the doer. But often the genitive of mere nouns (abstract or otherwise) dependent on *causā* or *gratiā* must be conceived as denoting purpose, as *Bestias hominum gratiā* generatas esse videmus, we see that the beasts are created for the sake of men (i. e. the aim of their creation is to serve men), Cic. N. D. 2, 63. Thus Ex. 1 of the last exercises strictly belongs here (it is the PURPOSE of the sophists to make money out of 'philosophy').—The nouns *ratio*, *consilium*, *animus*, *mens* in the ablative in connection with form-adjectives generally denote 'purpose', being rendered either by this word, or by 'view', or similar nouns (*eā ratione*, for that purpose; *hoc consilio*, with this intention; *eo animo* or *hac mente*, with this view), as: omnes illi—*hac mente* laborem sese ferre ajunt, senes ut in otia tuta recedant, all these say they bear their hardship with this view to retire, when old, into an undisturbed ease. Hor. Ser. 1, 1, 30.—*Hoc consilio* a Metello petiverunt, ut quam primum Verri succederet, with this intention they petitioned Metellus to succeed Verres as soon as possible. Cic. Verr. 2, 2, 4.—*Ad* with *finem* expresses 'end' or 'purpose' in the same way as *ob* with *causam* or *rem* expresses 'cause efficient' or 'motive', as *quem ad finem*, for what end or purpose. (See No. 15 of the last examples.)

<sup>1</sup> Instead of *illa est res (causa) ob quam rem* (quamobrem). — <sup>2</sup> to steal. — <sup>3</sup> female proper name. — <sup>4</sup> to dread. — <sup>5</sup> inclined. — <sup>6</sup> determined upon. — <sup>7</sup> severity. — <sup>8</sup> to expend. — <sup>9</sup> under the item. — <sup>10</sup> graviter aliquid ferre, to feel sorry for something. — <sup>11</sup> The construction belongs to § 487, R. 74, A. — <sup>12</sup> gratum aliquid alicui facere, to do somebody a favor with something, to oblige somebody with something. — <sup>13</sup> non recūso quin, I have no objection to, I submit to. — <sup>14</sup> to spare. — <sup>15</sup> alicui probari or probatum esse, to be endorsed by somebody. — <sup>16</sup> house-mate. — <sup>17</sup> necessarius, a relative, is properly an adjective. For the connection with *maxime* see § 355, R. 2; § 292, R. 12. — <sup>18</sup> See § 381, R. 9. — <sup>19</sup> misdeed. — <sup>20</sup> to hush up. — <sup>21</sup> to come forward. — <sup>22</sup> abesse in, to keep aloof from. — <sup>23</sup> rather fierce. — <sup>24</sup> to scold. — <sup>25</sup> struck (supply *esse*).

Obs. 2. The prepositions *ad* and *ob* express purpose not only with gerundials (§ 538; § 543), but also with nouns when verbs of general meaning in a gerundial form may be understood with them. Thus 'amicos alicujus *ad* mortem deposcere' (i. e. *ad* mortem subeundam), to demand somebody's friends for death. *Cas. B. C. 3, 10* — Pecuniam *ad statuum* conferre (i. e. *ad* statuum faciendam), to contribute money for a statue. *Cic. Verr. 2, 3, 77*. — In a similar manner *ob* with a noun has the specific meaning of *ob* with a gerundial, if we may supply the gerundial of a verb of general import, as: Pecuniam illam *ob censuram* contra leges clam dedērunt, they illegally and secretly gave that money 'for assessment', i. e. so that they might be assessed lower than they ought to have been assessed. *Cic. Verr. 2, 2, 55*. (See Ex. 4. 5. 6.)

Obs. 3. The form-adverbs *quo*, to what purpose, and *eo*, to that purpose, are the third locative cases of *quis* and *is*, and have assumed the meaning of purpose by the preposition *ad* which is implied in them; as: Primum *quo* tantam pecuniam (dedērunt), in the first place for what purpose did they give so large a sum? *Cic. Verr. 2, 2, 55*. *Eo*, if used in this meaning, is generally followed (sometimes preceded) by a clause with *ut*, as *Ut hoc pacto rationem referre liceret, eo* Sullānus repente factus est, non *ut* honos et dignitas nobilitati restitueretur, that he might be allowed to render his accounts in that way, therefore (i. e. with that purpose) he turned Sullanist, not to restore honor and dignity to the nobility. *Cic. Verr. 2, 1, 14*. — *Ideo* is, in this sense also, used with the force of *eo*, and must then be considered as a compound of *id* and the third locative case, to be distinguished from *ideo* denoting 'cause efficient' (*R. 40. Obs. 5*), as: *Ideo* delecti patrum ad eum missi sunt, *ut* in perpetuum mentio ejus rei finiretur, for that purpose were deputies of the Patricians sent to him that this matter might be set at rest for ever. *Liv. 2, 15, 2*.

1. Navis onerarias<sup>1</sup> Dolabella eā mente comparavit<sup>2</sup> ut Italiam peteret<sup>3</sup>. *Cic. Fam. 12, 14, 1*. — 2. Quo consilio huc imas? *Ter. Eun. 5, 8, 1*. — 3. Explicavi sententiam meam, et eo quidem consilio, tuum judicium ut cognoscerem. *Cic. Fin. 1, 21*. — 4. Naves tedia<sup>4</sup> et pice<sup>5</sup> reliquisque rebus quae sunt ad incendia complere<sup>6</sup> erant. *Cas. B. C. 3, 101*. — 5. Non concedes tu quaestori tuo ut potestate sua ut questum utatur. *Cic. Qu. Fr. 1, 1, 3*. — 6. Nego tibi ipsi ullum nummum esse numeratum<sup>7</sup>, sed cum ob tua decreta, ob edicta, ob imperia, ob judicia pecuniae dabantur, non erat quaerendum ejus manu numerarentur, sed ejus injuria cogerentur<sup>8</sup>. *Cic. Verr. 2, 2, 10*. — 7. Quid hoc homine iacias? aut quo civem importunum<sup>9</sup> aut quo potius hostem tam acceleratum reserves<sup>10</sup>? *Cic. Sest. 13*. — 8. Si Balbus tam familiaris<sup>11</sup> erat Clodiae quam tu esse vis, dixit ei profecto quo vellet<sup>12</sup> aurum illud. *Cic. Cel. 21, 53*. — 9. Eo te non interpellavi<sup>13</sup> ne quid de hoc tempore diminuere<sup>14</sup>. *Cic. Or. 3, 49*. — 10. Mariōnem ad te eo misi ut aut tecum ad me quam primum veniret, aut, si tu morare<sup>15</sup>, statim ad me rediret. *Cic. Fam. 16, 1*. — 11. Non ideo Rhenum insedimus<sup>16</sup> ut Italiam tueremur, sed ne quis alius Ariovistus regno Galliarum potiretur. *Tac. H. 4, 73*. — 12. Catilina notat<sup>17</sup> et designat<sup>18</sup> ad cedem<sup>19</sup> unumquemque nostrum. *Cic. Cat. 1, 1, 2*.

<sup>1</sup> Freightskip. — <sup>2</sup> to procure. — <sup>3</sup> to try to land. — <sup>4</sup> pine-wood. — <sup>5</sup> pitch. — <sup>6</sup> to fill. — <sup>7</sup> to pay. — <sup>8</sup> to collect. — <sup>9</sup> evil-minded. — <sup>10</sup> to reserve. — <sup>11</sup> intimate with. — <sup>12</sup> supply. — <sup>13</sup> habere. — <sup>14</sup> to interrupt. — <sup>15</sup> diminish. to be lost. — <sup>16</sup> morari, to tarry. — <sup>17</sup> insidere locum (more frequently loco), to occupy a place with troops. — <sup>18</sup> to mark. — <sup>19</sup> to designate. — <sup>20</sup> murder.

## EXERCISES.

I. LOCATIVE FORM-ADVERBS. — 1. Where is your friend? He is there whence nobody has ever yet returned. — 2. Where did your vessel land? There where it had started<sup>3</sup> [on its voyage]. — 3. Where do you come from? From there where I wrote you I would start. — 4. Is there any road from here over the mountains to Himera? — 5. Here the farmers<sup>5</sup> are in the habit of doing their business<sup>6</sup>; at the same [place] the butchers<sup>7</sup> have their shops<sup>8</sup>. — 6. Blackberries<sup>9</sup> are found almost everywhere in these regions. — 7. The width of Illyria<sup>10</sup>, where it is greatest, is 325 miles. — 8. The straits<sup>11</sup> where the Peloponnesus begins is called the Isthmus of Corinth<sup>12</sup>. — 9. Over these mountains there is only one not very (ita) narrow road (iter), where two wagons<sup>13</sup> can pass<sup>14</sup> at the same time<sup>15</sup>. — 10. The na-

<sup>1</sup> Navis. — <sup>2</sup> to land, appelli. — <sup>3</sup> proficisci. — <sup>4</sup> There is a road to, iter fert (ad). — <sup>5</sup> agricultor. — <sup>6</sup> to do their business (by going and coming), commutare. — <sup>7</sup> lanus. — <sup>8</sup> taberna. — <sup>9</sup> rubus Idaea (in the sing.). — <sup>10</sup> Illyricum. — <sup>11</sup> angustiae. — <sup>12</sup> by the adjective Corinthius. — <sup>13</sup> currus. GEN. us. — <sup>14</sup> duci. — <sup>15</sup> Two at the same time is expressed by the distributive numeral alone.

ture of the locality<sup>16</sup> is such<sup>17</sup> that (ut) darts<sup>18</sup> can be thrown<sup>19</sup> everywhere on the enemy. — 11. Where do these men intend to assemble<sup>20</sup> for (by causā) holding<sup>21</sup> [their] meeting<sup>22</sup>? — 12. The east-side of the house is protected<sup>23</sup> by a parapet<sup>24</sup> nine feet high and thirty feet long.

II. MEASUREMENT OF SPACE. — 1. It is reported that Philippides, at the time of the first Persian war, ran 1140 stadia, [the distance] from Athens to Sparta, in two days. — 2. Philonides, however, the runner<sup>25</sup> of Alexander the Great, ran 1200 stadia, the distance from Sicyon<sup>26</sup> to Elis<sup>27</sup>, in one day. — 3. In the consulship of Fontējus and Vipsanius, a boy eight years old, is said to have run 75 miles from noon to evening. — 4. The longest [day's] journey made by Tiberius, when (partic.) he hastened to his sick brother Drusus in Germany, was no more than [a distance of] 200 miles. — 5. The river Alpheus is navigable<sup>28</sup> [a distance of] six miles from the sea. — 6. There are 120 miles from Elis to Epidaurus. — 7. Cape<sup>29</sup> Athos, which Xerxes cut off<sup>30</sup> from the continent<sup>31</sup> by a canal<sup>32</sup>, runs<sup>33</sup> [a distance of] seventy miles into the sea. — 8. Apollonia, a colony of the Corinthians, is forty miles from the sea. — 9. The [two] shores of the Corinthian Isthmus are five miles distant (by intervallum) from each other. — 10. The city of Byzantium is 711 miles distant from Dyrrachium. So great is (patēre) the length of the land-road<sup>34</sup> between the Adriatic Sea and the Propontis<sup>35</sup>. — 11. The [two] shores of Asia and Europe, where they are separated<sup>36</sup> by the Hellespont, are seven stadia distant from each other. — 12. Eratosthenes says that the whole earth extends (patēre) 252,000 stadia, which amounts to<sup>37</sup> 31,500,000 Roman paces. Hipparchus adds to this measure<sup>38</sup> a little less than 25,000 stadia, making (and makes) the earth the ninety-sixth part of the whole world. — 13. How far is it from the earth to the moon according<sup>39</sup> to Posidonius? — 14. The Island of Man<sup>40</sup> is about equidistant from Ireland<sup>41</sup> and Britannia. — 15. Meroe is a twelve days' journey distant from Sirbitus; from there it is just as far to Davelli. — 16. The army of the Athenians took a position<sup>42</sup> near the village<sup>43</sup> of Marathon<sup>44</sup>, about ten miles from the city. — 17. Epirus borders on Macedonia and Macedonia. — 18. The Peloponnesus, a peninsula, similar in shape<sup>45</sup> to a platanus-leaf<sup>46</sup>, borders on two seas, the Ionian<sup>47</sup> and the Aegean<sup>48</sup>. — 19. Attica, towards the north, borders on Boeotia. — 20. From that [point] the shore has a north-eastern direction<sup>49</sup>.

III. EXPRESSIONS OF TIME SIMPLE BY FORM-ADVERBS. — 1. When did your brother die? My brother is still living. — 2. There was a time when this man was worth<sup>50</sup> nothing. — 3. Then I was in delicate<sup>51</sup> health; but now I am well. — 4. The soldiers began to despair of their safety. Then [it was that] two centurions went forth<sup>52</sup> from the ranks<sup>53</sup>, and offered<sup>54</sup> to die for the army. — 5. I told these men that I would first finish my business, [and] then would go<sup>55</sup> where they would have me go. — 6. Everything that

<sup>16</sup> Locus. — <sup>17</sup> is, ea, id. — <sup>18</sup> telum. — <sup>19</sup> conicere. — <sup>20</sup> convenire. — <sup>21</sup> habere. — <sup>22</sup> con-  
fio. — <sup>23</sup> defendere. — <sup>24</sup> vallum. — <sup>25</sup> cursor. — <sup>26</sup> GEN. Sicyōnis. — <sup>27</sup> GEN. Elidis. — <sup>28</sup> to  
be navigable, navigari. — <sup>29</sup> promontorium. — <sup>30</sup> abscindere. — <sup>31</sup> continens (i. e. terra).  
— <sup>32</sup> a canal, connecting with the sea = fretum. — <sup>33</sup> excurrere. — <sup>34</sup> transl.: of the lands,  
terrārum. — <sup>35</sup> GEN. Propontidis. — <sup>36</sup> dividere. — <sup>37</sup> to amount to, efficere. — <sup>38</sup> mensura.  
— <sup>39</sup> Transl.: How far does Posidonius say that the earth is etc.? — <sup>40</sup> Mona. — <sup>41</sup> Hibernia.  
— <sup>42</sup> to take a position, castra facere. — <sup>43</sup> vicus. — <sup>44</sup> Accus. (Greek) Marathōna. — <sup>45</sup> for-  
ma. — <sup>46</sup> the leaf (folium) of a platanus. — <sup>47</sup> Ionius. — <sup>48</sup> Egēus. — <sup>49</sup> spectare. — <sup>50</sup> pos-  
sessed nothing. — <sup>51</sup> infirmus. — <sup>52</sup> procedere. — <sup>53</sup> acies (sing.). — <sup>54</sup> Transl.: saying that  
[they] were willing to devote (devovēre) themselves for the army. — <sup>55</sup> Transl.: that I  
would go thither whither they commanded (velle) that I should go (inf. clause).

is now doubtful and obscure will once become certain and clear.— 7. All civilized<sup>66</sup> nations have once been wild<sup>67</sup> and barbarous.— 8. Once our ancestors held<sup>68</sup> these things in no esteem<sup>69</sup>, but they are now coveted<sup>70</sup> by every good<sup>71</sup> man.— 9. I remember that you once made the same<sup>72</sup> remark.— 10. Such<sup>73</sup> offences<sup>74</sup>, once committed<sup>75</sup>, may be pardoned, but, often repeated<sup>76</sup>, they must be corrected<sup>77</sup> by words and punishments.— 11. I have been for a long time ignorant<sup>78</sup> of what you were doing<sup>79</sup>.— 12. I have longed<sup>80</sup> for a great time to see the falls<sup>81</sup> of Niagara.— 13. One of my sons will soon leave<sup>82</sup> for Rome.— 14. How soon will you have time<sup>83</sup> for me?— 15. So soon was Greece reduced<sup>84</sup> from the summit<sup>85</sup> of power<sup>86</sup> to the last degree<sup>87</sup> of weakness<sup>88</sup>.— 16. Tell<sup>89</sup> your friend that I shall receive<sup>90</sup> him presently.— 17. Believe me that I shall pay this debt<sup>91</sup> soon.— 18. At last I received your letter so long expected by me.— 19. The debates<sup>92</sup> were long and violent<sup>93</sup>; the one proffered<sup>94</sup> this, the other that advice, [till] at last Sulpicius arose<sup>95</sup> with the following<sup>96</sup> address<sup>97</sup>.— 20. Is it allowed<sup>98</sup> to go to the exhibition<sup>99</sup> this evening? It is, but see<sup>100</sup> that (ut) you are back<sup>101</sup> in time (timely).— 21. Was the exhibition well visited<sup>102</sup> the day before yesterday?— 22. Cato Uticensis seemed to have lived with the republic and to have died<sup>103</sup> at the same time with it.

IV. EXPRESSIONS OF TIME SIMPLE BY PHRASES AND DATES.— 1. On what day will your commencement-exercises<sup>104</sup> begin?— 2. In what year was Cicero consul<sup>105</sup>?— 3. Tacitus and Pliny lived<sup>106</sup> in the next century after Augustus.— 4. Cato commanded<sup>107</sup> all cities of Spain to<sup>108</sup> dismantle<sup>109</sup> forthwith their fortifications, and had<sup>110</sup> this order<sup>111</sup> delivered<sup>112</sup> to all on the same day.— 5. Sempronius writes to me that his house, which last<sup>113</sup> summer had been struck<sup>114</sup> by lightning, had, after being struck again, been consumed by fire.— 6. I have been busy<sup>115</sup> the whole winter with translating<sup>116</sup> the dialogues<sup>117</sup> of Plato.— 7. The solar eclipse<sup>118</sup> which happened<sup>119</sup> in the consulship of Vipsanius and Fontejus was witnessed<sup>120</sup> in Campania at seven and in Armenia at ten o'clock. This could not have happened, remarks<sup>121</sup> Pliny, if the earth were a plane<sup>122</sup>.— 8. In Egypt the shadow of the sun-dial<sup>123</sup> is at noon-time<sup>124</sup> a little longer than half the size<sup>125</sup> of the style<sup>126</sup>: in the city of Rome, at the same hour, the ninth part of the style is wanting to the shadow; in the town of Ancōna there is an excess<sup>127</sup> of one-fifth; in Venetia at the same hours the shadow is equal<sup>128</sup> to the style.— 9. In Patalis, a renowned port<sup>129</sup> of India, the constellation of the Great Bear<sup>130</sup> appears only for fifteen nights, and is seen<sup>131</sup> only in their first parts.— 10. The beginnings<sup>132</sup> of the seasons<sup>133</sup> of the year with the Romans

<sup>66</sup> Humanitatis particeps. — <sup>67</sup> ferus. — <sup>68</sup> habere. — <sup>69</sup> in numero. — <sup>70</sup> appetere. — <sup>71</sup> superlativum. — <sup>72</sup> to make the same remark, *idem dicere*. — <sup>73</sup> ejusmodi. — <sup>74</sup> peccatum. — <sup>75</sup> perpetrare. — <sup>76</sup> to repeat often, *iterare*. — <sup>77</sup> coercere. — <sup>78</sup> to be ignorant of something, *ignorare aliquid*. — <sup>79</sup> agere. — <sup>80</sup> concupiscere. — <sup>81</sup> cataracta (*cascades*). — <sup>82</sup> abire. — <sup>83</sup> to have time for somebody, *aliqui vacare*. — <sup>84</sup> redigere. — <sup>85</sup> by *summus*. — <sup>86</sup> potentia. — <sup>87</sup> by *summus*. — <sup>88</sup> infirmitas. — <sup>89</sup> nuntiare, narrare. — <sup>90</sup> admittere. — <sup>91</sup> to pay a debt, *numeri solvere*. — <sup>92</sup> by *disputare*. — <sup>93</sup> acer. — <sup>94</sup> proferre. — <sup>95</sup> exoriri. — <sup>96</sup> hic. — <sup>97</sup> verba. — <sup>98</sup> licet. — <sup>99</sup> Transl.: to go to see (*aspicere*) the games. — <sup>100</sup> curare. — <sup>101</sup> to be back, *re-verti*. — <sup>102</sup> Transl.: Were the games performed (*factae*) mainly being present? — <sup>103</sup> to die, *exstinguere*. — <sup>104</sup> sollemnia academicae vestrae. — <sup>105</sup> to be consul, *consulatum gerere*. — <sup>106</sup> esse. — <sup>107</sup> precipere. — <sup>108</sup> in. — <sup>109</sup> diruere. — <sup>110</sup> Transl. and directed that order to be delivered. — <sup>111</sup> litterae. — <sup>112</sup> reddere. — <sup>113</sup> superior. — <sup>114</sup> ferre. — <sup>115</sup> occupatus. — <sup>116</sup> interpretari. — <sup>117</sup> cognoscere. — <sup>118</sup> solis defectio. — <sup>119</sup> to happen, *feri* (by partic. constr.). — <sup>120</sup> videre. — <sup>121</sup> inquit. — <sup>122</sup> were level (*planus*). — <sup>123</sup> horologium. — <sup>124</sup> tempus meridianum. — <sup>125</sup> mensura. — <sup>126</sup> gnomon, GEN. gnomonis. — <sup>127</sup> there is an excess, *superest*. — <sup>128</sup> par. — <sup>129</sup> portus. — <sup>130</sup> the const. of the Great Bear, *septentriones*. — <sup>131</sup> aspicere. — <sup>132</sup> principium. — <sup>133</sup> tempus.

were the following<sup>134</sup>: On the 17th day of March, when the sun entered<sup>135</sup> into Aries, Spring commenced<sup>136</sup>; on the 9th of May was the beginning of Summer; on the 12th day of August, that of Autumn<sup>137</sup>, and on the ninth of November, that of Winter.— 11. The consul appointed<sup>138</sup> the day for election<sup>139</sup> on (in) the third of August, and the Latin festival<sup>140</sup> on the 11th of August.— 12. We intend to be in the Firmian villa<sup>141</sup> till the fourth of May.— 13. In the year of Rome 365, on the 17th of June, the Romans were defeated by the Gauls at the river Allia.— 14. Julius Cæsar was assassinated<sup>142</sup> in the year 44 before Christ on the 15th of March.— 15. M. Tullius Cicero was killed by Popilius Lænas, a military tribune<sup>143</sup>, on the 5th of December in the year 711 of the city.— 16. The emperor Tiberius was born in the year after Cicero's death on the 17th of November.— 17. The city of Rome was built on the 22d of April, in the year 753 B. C.— 18. The Megalensian<sup>144</sup> games were celebrated<sup>145</sup> in the month of April from the fourth to the tenth.

V. DISTANCE OF TIME. [*The different expressions of Time must be rendered in every form admissible, the regular forms being placed first.*]— 1. How many years ago did you come<sup>146</sup> to this country<sup>147</sup>? Twenty-three years ago.— 2. I visited<sup>148</sup> Sempronius three years ago on (ex) [my] journey when I was going<sup>149</sup> to the province to preside<sup>150</sup> at the Courts.— 3. A few years ago these cities were occupied by the enemy.— 4. Homer lived<sup>151</sup> many years before Romulus.— 5. When I arrived at the city, thy brother, who had come three days before, was waiting<sup>152</sup> for me and took<sup>153</sup> me to his hotel<sup>154</sup>.— 6. Scipio made<sup>155</sup> the march to Agosta so rapidly (*tum cito*) that (ut) he overtook<sup>156</sup> the column<sup>157</sup> which, a few days before, he had sent ahead.— 7. While Jul. Cæsar was Pontifex, he changed<sup>158</sup> the ancient<sup>159</sup> Roman calendar<sup>160</sup>, several years before he went to Gaul as chief<sup>161</sup> of the province.— 8. Carthage was destroyed forty-seven years after the end<sup>162</sup> of the second Punic war, and was rebuilt<sup>163</sup> twenty-three years later.— 9. I shall write (*dare*) a letter to you in ten days; take care<sup>164</sup> that you answer two or at the latest (*summum*) three days after the letter will have been delivered<sup>165</sup> to you.— 10. I shall depart from here in four days, and will return a few days later.— 11. The body of Alexander the Great was taken<sup>166</sup> to Memphis, and from there, after several years, to Alexandria.— 12. This whole fleet was finished 60 days after the carting<sup>167</sup> of the timber had commenced.— 13. Six years after the destruction of Carthage, Viriathus was killed by his own soldiers. Not very (*ita*) long afterwards the Numantians<sup>168</sup> revolted<sup>169</sup>.— 14. It is reported<sup>170</sup> by some that the first sun-dial<sup>171</sup> in Rome was erected<sup>172</sup> by Papirius Cursor a few years before the war<sup>173</sup> with Pyrrhus. But Varro states<sup>174</sup> that this happened in the first Punic war thirty years later than the Papirian<sup>175</sup> sun-dial is said to have been erected.

<sup>134</sup> hic. — <sup>135</sup> transitum facere. — <sup>136</sup> initium capere. — <sup>137</sup> auctumnus. — <sup>138</sup> to appoint a day for something, *diem dicere alicui rei*. — <sup>139</sup> comitia. — <sup>140</sup> ferie. — <sup>141</sup> the Firmian villa, *Firmianum*. — <sup>142</sup> occidere. — <sup>143</sup> tribunus militum. — <sup>144</sup> Megalensis. — <sup>145</sup> institere (*im-perare*). — <sup>146</sup> commigrare. — <sup>147</sup> res publica. — <sup>148</sup> adire. — <sup>149</sup> proficisci. — <sup>150</sup> to preside at the Courts, *contentus agere*. — <sup>151</sup> esse. — <sup>152</sup> expectare aliquem. — <sup>153</sup> conducere. — <sup>154</sup> deversorium. — <sup>155</sup> conficere. — <sup>156</sup> to overtake, *itinere præterire*. — <sup>157</sup> agmen. — <sup>158</sup> commutare. — <sup>159</sup> pristinus. — <sup>160</sup> fasti. — <sup>161</sup> Transl. went (*proficisci*) into the province of Gaul with power (*imperium*). — <sup>162</sup> Transl. 'after the ended war'. — <sup>163</sup> reparare. — <sup>164</sup> curare ut. — <sup>165</sup> reddere. — <sup>166</sup> transferre. — <sup>167</sup> Transl.: after the timber (*materiam*) had been commenced to be carted (*comportare*). — <sup>168</sup> Numantini. — <sup>169</sup> rebellare. — <sup>170</sup> ferre. — <sup>171</sup> horologium solare (the addition *solare* being made only, if necessary to distinguish sun-dials from other kinds of time-pieces). — <sup>172</sup> statuere. — <sup>173</sup> Transl.: before it had been warred with Pyrrhus. — <sup>174</sup> prodere. — <sup>175</sup> Papirianus.

VI. MEASUREMENT OF TIME-PERIODS.—1. It is reported that [there] have been [men] who abstained<sup>67</sup> (*subjunctive*) ten days in succession<sup>67</sup> from food.—2. We think day and night of the sad condition of the republic.—3. Certain little animals<sup>68</sup> live only one<sup>69</sup> day.—4. Dionysius was for thirty-eight years tyrant of the Syracusians.—5. How long did you stay<sup>70</sup> at Rome? I staid only a few days at Rome, but in Naples I spent<sup>71</sup> the whole summer.—6. It is known<sup>72</sup> (says<sup>73</sup> Pliny) that in the town of Ptolemais<sup>74</sup>, on the border<sup>75</sup> of the Red<sup>76</sup> Sea, 45 days before the solstice<sup>77</sup>, and as long<sup>78</sup> afterwards, the sun stands<sup>79</sup> at midday<sup>80</sup> perpendicularly<sup>81</sup> over head, and that during these ninety days the shadows are thrown<sup>82</sup> southward<sup>83</sup>.—7. In the Island of Thule (says the same author), which is a six days' sail<sup>84</sup> distant from Britannia toward (*in*) the North, and is near the vertex<sup>85</sup> of the world, both the day and the night last<sup>86</sup> six months in succession.—8. Trees may be transplanted<sup>87</sup> both in spring and autumn during about thirty days.—9. We had not seen (*perf.*) your friend for three months.—10. Pope<sup>88</sup> Pius the Ninth has been reigning now 26 years (by *ordinals*).—11. Did not the Macedonian<sup>89</sup> Alexander meet with death<sup>90</sup> in his thirty-third year? (*Render by all methods admissible*).—12. Hannibal, nine years old, was bound<sup>91</sup> under (*by*) oath by his father Hamilcar to (*in*) perpetual<sup>92</sup> enmity against the Romans.—13. It is reported that 360,000 men built the pyramid<sup>93</sup> of Cheops in 20 years.—14. The star Saturnus completes<sup>94</sup> its course<sup>95</sup> in thirty years, but Jupiter in twelve.—15. Scipio led his army by the third night watch out of the town, and arrived in three days (*Render by all methods admissible*) at Tarraco.—16. It will take me<sup>96</sup> the best part<sup>97</sup> of six months to build this house.—17. For<sup>98</sup> attending<sup>99</sup> to the funeral<sup>100</sup> of that man, a vacation of two days was given<sup>1</sup> to the students<sup>2</sup> (*Render by all admissible methods*).

VII. ADVERBS OF MANNER.—1. It was more cruel to preserve<sup>3</sup> Capua on (*by*) these conditions, than to destroy it<sup>4</sup>. [*To this sentence must be given an adverbial form according to § 552, obs. 1.*]—2. How these men will triumph<sup>5</sup> when they hear<sup>6</sup> that you have not succeeded<sup>7</sup> in this affair!—3. These things are so as I told you repeatedly.—4. If Cæsar, as you think<sup>8</sup>, is determined<sup>9</sup> on seizing<sup>10</sup> the government<sup>11</sup>, drafts<sup>12</sup> for soldiers must be made<sup>13</sup> throughout the whole of Italy.—4. Alcamenes is a rich<sup>14</sup> [man] for an Athenian.—6. Such a knowledge<sup>15</sup> was quite<sup>16</sup> astounding<sup>17</sup> for those times.—7. How could you know that the senate would be satisfied<sup>18</sup> with such excuses<sup>19</sup>?—8. I ask<sup>20</sup> you how it could happen<sup>21</sup> that all this was effected without your knowledge<sup>22</sup> or consent<sup>23</sup>?—9. Thus it came<sup>24</sup> that nobody

<sup>67</sup> abstinere.—<sup>68</sup> continuous days.—<sup>69</sup> a little animal, *bestiola*.—<sup>70</sup> be careful in translating this numeral.—<sup>71</sup> morari.—<sup>72</sup> esse. 'Spent' may also be rendered 'absumpsi', with a transitive accusative. But in *absumere* the idea 'to spend for a purpose' is contained.—<sup>73</sup> constare.—<sup>74</sup> inquit.—<sup>75</sup> Gen. Ptolemaidis.—<sup>76</sup> margo.—<sup>77</sup> Mare Rubrum.—<sup>78</sup> solstitium.—<sup>79</sup> Transl.: 'as many', *totidem*.—<sup>80</sup> esse.—<sup>81</sup> § 372, R. 31.—<sup>82</sup> perpendicularly over head, *supra verticem*.—<sup>83</sup> jacere.—<sup>84</sup> in meridiem.—<sup>85</sup> *navigatio*, treated the same as *iter*.—<sup>86</sup> vertex.—<sup>87</sup> render according to R. 14.—<sup>88</sup> *loci mori* or *transire*. *Transplantare* is no Latin word; *transserere* means a certain method of grafting trees.—<sup>89</sup> Maximus pontifex.—<sup>90</sup> Macedo.—<sup>91</sup> mortem obire.—<sup>92</sup> astringere.—<sup>93</sup> perpetuus.—<sup>94</sup> pyramis, Gen. pyramidis.—<sup>95</sup> conficere.—<sup>96</sup> cursu.—<sup>97</sup> Transform into the proper expressions with adverbial time-objects.—<sup>98</sup> by *non multo minus*.—<sup>99</sup> cau-ā.—<sup>100</sup> prosequi.—<sup>1</sup> funus.—<sup>2</sup> concedere.—<sup>3</sup> discipulus.—<sup>4</sup> conservare. 'To preserve Capua must be turned into a passive predicative phrase.—<sup>5</sup> 'To destroy it' must be rendered 'than if it had been destroyed'.—<sup>6</sup> exultare.—<sup>7</sup> future perfect.—<sup>8</sup> rem male gerere.—<sup>9</sup> existimare.—<sup>10</sup> velle.—<sup>11</sup> potiri.—<sup>12</sup> respública.—<sup>13</sup> drafts for soldiers, *draftus*.—<sup>14</sup> habere.—<sup>15</sup> pecuniösus.—<sup>16</sup> scientia.—<sup>17</sup> sane.—<sup>18</sup> minus.—<sup>19</sup> contentus.—<sup>20</sup> excusatio.—<sup>21</sup> interrogare.—<sup>22</sup> fieri.—<sup>23</sup> by *nesciens*.—<sup>24</sup> by *invitus*.—<sup>25</sup> fieri.

was willing to plough his land<sup>26</sup> while (*abl. abs.*) that [man] was prætor.—10.—You have heard how Acilius did his duty<sup>27</sup>; if thy friend had chosen (*relle*) to act thus, while it was yet possible<sup>27</sup>, he would not find himself<sup>28</sup> now in such a predicament<sup>29</sup>.—11. As it is allowed<sup>30</sup> to a state to repel violence<sup>31</sup> by violence, so it must be conceded to private citizens to use violence if their property<sup>32</sup> or their lives (*sing.*) are threatened<sup>33</sup> by open force (*vis*) or by arms.—12. These conditions were accepted, but so that the war-indemnity<sup>34</sup> should be paid<sup>35</sup> in three, not in five installments<sup>36</sup>.—13. Such arguments must be considered worthless<sup>37</sup>.—14. The character<sup>38</sup> of a judge must be such that not even slander<sup>39</sup> or suspicion is able to hurt it.—15. To all these propositions<sup>40</sup> of the delegates Sempronius was vehemently opposed<sup>41</sup>; Afranius was likewise of the opinion<sup>42</sup> that peace should be denied to the petitioners<sup>43</sup>.—16. He easily gained<sup>44</sup> Otacilius, but not Sempronius.—17. The envoys spoke just as if their army had been<sup>45</sup> victorious<sup>46</sup>, not as if they had been defeated, as they were<sup>47</sup>.—18. Nevertheless the senate did not think<sup>48</sup> it fair<sup>49</sup> to reject entirely<sup>50</sup> those conditions.

VIII. MANNER EXPRESSED BY ATTRIBUTIVE PHRASES.—1. In what style<sup>51</sup> did Gajus build his villa?—2. In what manner do the Consuls think<sup>52</sup> the delegates of the Gallic towns (*municipium*) should be answered?—3. On what conditions will peace be granted to the king?—4. I do not know how (*by pactum*) you could expect that your treachery<sup>53</sup> would main (*esse*) concealed<sup>54</sup>?—5. In the same manner Sulpicius has always been an adviser<sup>55</sup> of peace.—6. You always have been a witness<sup>56</sup> that I said, nay<sup>57</sup> shouted<sup>58</sup>, that peace could be preserved in no other way.—7. If Clodius had come in good faith to Ariminum, we would not have heard him swagger<sup>59</sup> in the manner of gladiators.—8. Let us celebrate<sup>60</sup> this day according to the manner (*habit*) of our countrymen<sup>61</sup>.—9. Thy brother spoke<sup>62</sup> in the senate with ability<sup>63</sup> and wisdom<sup>64</sup>.—10. Your delegates have examined<sup>65</sup> this matter (*causa*) with the greatest fairness<sup>66</sup> and intelligence<sup>67</sup>.—11. You have defended this opinion with greater eloquence than justice.—12. Sulpicius decided<sup>68</sup> his cases<sup>69</sup> with admirable<sup>70</sup> ingenuity<sup>71</sup> and accuracy<sup>72</sup>; but<sup>73</sup> his style<sup>74</sup> did not run (*imperf.*) with fluency<sup>75</sup>; nor was [there] any ornament<sup>76</sup>, any light<sup>77</sup>, so that everything was expressed<sup>78</sup> with sameness<sup>79</sup> and in one way<sup>80</sup> [only].

IX. ACCESSORY PREDICATES AGREEING WITH THE SUBJECT.—1. Zeno, terrified<sup>81</sup> by this remark<sup>82</sup>, asked<sup>83</sup> the delegates weeping to pardon him.—2. There Hasdrubal fell<sup>84</sup> fighting, worthy of [his] father Hamilcar and [his] brother Hannibal.—3. Cæsar, on his departure<sup>85</sup> for Spain left<sup>86</sup> Italy to Antonius to trample<sup>87</sup> her under his feet.—4. He asked the envoys with

<sup>26</sup> arer.—<sup>27</sup> to do one's duty, *officium præstare*.—<sup>28</sup> while it is possible, *re integrâ*.—<sup>29</sup> to find one's self, *versari*.—<sup>30</sup> discri-men.—<sup>31</sup> licet.—<sup>32</sup> vis.—<sup>33</sup> bona.—<sup>34</sup> to threaten, *periculis*.—<sup>35</sup> pecunia pro damnis belli.—<sup>36</sup> solvere.—<sup>37</sup> pensio.—<sup>38</sup> pro nihilo habere.—<sup>39</sup> nomen.—<sup>40</sup> calumnia.—<sup>41</sup> qua a legatis proponebantur.—<sup>42</sup> obstare.—<sup>43</sup> cen-sure.—<sup>44</sup> petens.—<sup>45</sup> conciliare.—<sup>46</sup> existere.—<sup>47</sup> victor.—<sup>48</sup> to be placed after 'as if'.—<sup>49</sup> censere.—<sup>50</sup> æquus.—<sup>51</sup> omnino.—<sup>52</sup> ratio.—<sup>53</sup> existimare.—<sup>54</sup> insidie.—<sup>55</sup> prosequi.—<sup>56</sup> auctor.—<sup>57</sup> testis.—<sup>58</sup> immo vero.—<sup>59</sup> clamitare.—<sup>60</sup> se jactare.—<sup>61</sup> cives nostri.—<sup>62</sup> sententiam dicere.—<sup>63</sup> ingenium.—<sup>64</sup> consilium.—<sup>65</sup> cognoscere.—<sup>66</sup> æquitas.—<sup>67</sup> sapientia.—<sup>68</sup> dijudicare.—<sup>69</sup> causa.—<sup>70</sup> egregius.—<sup>71</sup> acumen.—<sup>72</sup> diligentia.—<sup>73</sup> neque tamen.—<sup>74</sup> oratio.—<sup>75</sup> by *perfacilis*.—<sup>76</sup> flos.—<sup>77</sup> humen.—<sup>78</sup> dicere.—<sup>79</sup> by *similis*.—<sup>80</sup> modus.—<sup>81</sup> perterritus.—<sup>82</sup> vox.—<sup>83</sup> to ask somebody to pardon one's self, *veniam alicujus petere*.—<sup>84</sup> cadere.—<sup>85</sup> by *proficisci*.—<sup>86</sup> dare.—<sup>87</sup> to trample under feet, *conculcare*.

what hopes<sup>88</sup> they had returned.— 5. There I was informed<sup>89</sup> that the consul a few hours before had left<sup>90</sup> the city for the theater of war.— 6. The king was carried<sup>91</sup> from the battle-field<sup>92</sup> covered<sup>93</sup> with blood and wounds.— 7. The soldiers returned loaded<sup>94</sup> with booty.— 8. This band<sup>95</sup> of the bravest of men suddenly broke through<sup>96</sup> the solid<sup>97</sup> ranks<sup>98</sup> of the enemy, and all without exception came unhurt to the camp.— 9. If I should have ever knowingly offended any of you, you will judge me more by my will<sup>99</sup> than by my deeds<sup>100</sup>.— 10. The young man bore this abuse<sup>1</sup> silently and returned quietly to his place.— 11. In the same year one of the Vestal<sup>2</sup> Virgins was buried alive.— 12. Sempronius said he ought (*posse*) not to have been condemned in his absence, since he had been absent in the service<sup>3</sup> of the state.— 13. Bold and a despiser<sup>4</sup> of gods and men, Catiline rushed daily<sup>5</sup> [more] into his ruin.— 14. When Verres departed as quaestor for the province, he took<sup>6</sup> with him all the money, out of which the soldiers were to be paid<sup>7</sup> for (*in*) the next year.— 15. Regulus said that he had not returned to Rome as a free man, but as the bondsman<sup>8</sup>, and the slave of the enemy.— 16. If thou hast neglected to sow<sup>9</sup> in thy boyhood, thou wilt not reap a harvest<sup>10</sup> in thy old age.— 17. I would have willingly done you this service<sup>11</sup> if you had sent me word<sup>12</sup> a little earlier<sup>13</sup>.— 18. My friends came to see<sup>14</sup> me in larger numbers than I had a right<sup>15</sup> to expect.— 19. We approach<sup>16</sup> you, O Conscript<sup>17</sup> Fathers, as suppliants<sup>18</sup> well knowing<sup>19</sup> by whose artifices<sup>20</sup> your minds have been preoccupied<sup>21</sup>.— 20. Publius Cornelius Rufus lost his eyesight<sup>22</sup> sleeping, while (*cum*) he was dreaming<sup>23</sup> that this happened to him.

#### X FORM-ADJECTIVES AS ACCESSORY PREDICATES.

CAPTION: In rendering English expressions referring to 'priority of an action', the student must remember that the Latin has only two methods to express them, the form of the accessory predicate and the adverbial forms in *um* or *o*. The English circumlocutions 'he was the first who', and the English affirmative form 'I saw at such a day the first tiger', would, literally rendered, not be idiomatic Latin, and must be transformed according to the rules R. 21 (p. 230) either into accessory predicates, or into adverbial forms. Thus 'Aristides was the first who painted in wax colors' must be transformed 'Aristides, as the first, painted in wax colors'. Instead of 'This was the first picture that was sold in Rome', the Latin says 'This picture was sold, as the first, in Rome'. The sentence 'Then I saw the first man-of-war' must be changed into 'Then I saw a man-of-war for the first time (*primum*)'. When the English sentence has a passive form with a passive agent, the sentence must generally become active in Latin to express it idiomatically. Thus the English sentence 'The first money was coined by Servius Tullius', must be changed actively into 'Servius Tullius, as the first, coined money'.

1. King Tullus Hostilius was the first who wore<sup>24</sup> a toga praetexta after having conquered the Etruscans<sup>25</sup>.— 2. The first oysterbeds<sup>26</sup> were made by Sergius Orata at his villa near Bajæ<sup>27</sup>, at the time of the orator L. Crassus.— 3. Italy saw the first elephants<sup>28</sup> in the war with<sup>29</sup> king Pyrrhus, in the year 472 of the City.— 4. Pompey was the first who paraded<sup>30</sup> a yoke<sup>31</sup> of elephants in his African triumph.— 5. Asinius Pollio was the

<sup>88</sup> by *sperare*.— <sup>89</sup> certiorē facere.— <sup>90</sup> urbe excedere.— <sup>91</sup> auferre.— <sup>92</sup> acies.— <sup>93</sup> copertus.— <sup>94</sup> onustus.— <sup>95</sup> manus.— <sup>96</sup> perrumpere per aliquid.— <sup>97</sup> confertus.— <sup>98</sup> acies (*sing.*).— <sup>99</sup> voluntas.— <sup>100</sup> factum.— <sup>1</sup> injuria.— <sup>2</sup> Vestālis.— <sup>3</sup> in the service, of the state, *reipublice causā*.— <sup>4</sup> contemptor.— <sup>5</sup> in dies.— <sup>6</sup> ferre.— <sup>7</sup> to pay the soldiers, *stipendium numerare militi*.— <sup>8</sup> in incipium.— <sup>9</sup> sementem facere.— <sup>10</sup> messem facere.— <sup>11</sup> to do a service, *munus prestare*.— <sup>12</sup> certiorē facere.— <sup>13</sup> matūre.— <sup>14</sup> to come to see somebody, *convenire aliquem*.— <sup>15</sup> I have a right, *licet mihi*.— <sup>16</sup> adire.— <sup>17</sup> conscriptus.— <sup>18</sup> supplex.— <sup>19</sup> non ignārus.— <sup>20</sup> ars.— <sup>21</sup> occupatus.— <sup>22</sup> oculorum visus.— <sup>23</sup> somnare.— <sup>24</sup> uti.— <sup>25</sup> Etrusci.— <sup>26</sup> an oy-ter bed: *ostrearum vivarium*.— <sup>27</sup> a villa near Bajæ, *Bajānum*.— <sup>28</sup> elephantus.— <sup>29</sup> Transl.: the war waged (*gerere*) with Pyrrhus.— <sup>30</sup> ducere.— <sup>31</sup> a yoke of elephants, *elephantū juncti*.

first who made man's genius<sup>32</sup> public property<sup>33</sup> by establishing<sup>34</sup> a library<sup>35</sup> in Rome.— 6. M. Valerius Messala exhibited<sup>36</sup> the first battle picture<sup>37</sup> in Rome in the year 490 after the building of the City.— 7. L. Mummius, the same (*is*) who destroyed Corinth, placed<sup>38</sup> a picture<sup>39</sup> of Aristides, representing Father Liber, in the temple of Ceres, which Pliny believes was the first foreign<sup>40</sup> picture<sup>41</sup> exhibited<sup>42</sup> in Rome.— 8. The red<sup>43</sup> color which is called sinōpis was first found in Pontus, not far from the city of Sinōpe, whence it received<sup>44</sup> [its] name.— 9. Sempronius caught<sup>45</sup> the first mullet-fish<sup>46</sup> in this year.— 10. Thales is said to have first predicted<sup>47</sup> an eclipse<sup>48</sup> of the sun.— 11. The Cimbri crossed the Alps first of all German nations.— 12. While (*abl. abs.*) the two<sup>49</sup> legions disputed<sup>50</sup> with each other which of them should enter<sup>51</sup> the city first, the chief commander directed the seventh legion to enter<sup>52</sup> first.— 13. The slave was uncertain whether he should invite Lucullus first or Sulpicius.— 14. To-night (*hodie*) will be the third representation<sup>53</sup> of the tragedy Œdipus.— 15. Sempronius was directed to leave first a sufficient<sup>54</sup> garrison at Crotōna, and then to go to help<sup>55</sup> the other Consul.— 16. The captain<sup>56</sup> himself left the wrecked<sup>57</sup> ship last of all.— 17. Hispania was the last of all [provinces] which, under the lead of Cæsar Augustus was subjected<sup>58</sup>.— 18. In that year Gajus was elected the fourth time mayor of the city<sup>59</sup>.— 19. My brother has devoted<sup>60</sup> himself wholly to Greek literature.— 17. The chief-commander directed the legions to obey his commands alone.— 18. The Stoics believed that virtue alone was sufficient for a happy<sup>61</sup> life<sup>62</sup>.— 19. Ariovistus marched<sup>63</sup> as quickly as he could<sup>64</sup> on Vesontio; but Cæsar likewise intended<sup>65</sup> to make himself master<sup>66</sup> of that city.— 20. Cæsar accused the chiefs of the Ædui that they had not kept their promise<sup>67</sup>, and that they, likewise, had not helped<sup>68</sup> him with supplies, although<sup>69</sup> they might have done so<sup>70</sup>.

XI. ACCESSORY PREDICATES NOT AGREEING WITH THE GRAMMATICAL SUBJECT (R. 23-26).— 1. Cæsar, being carried<sup>68</sup> too far<sup>69</sup> by the streams of the sea<sup>70</sup>, perceived<sup>71</sup> Britannia, lying<sup>72</sup> at his left.— 2. Cæsar, at his departure<sup>73</sup> for Britannia, had left the Morini in a state of subjection<sup>74</sup>.— 3. Apelles left his renowned<sup>75</sup> picture of the Coan<sup>76</sup> Venus unfinished<sup>77</sup>.— 4. The Athenian generals were innocently condemned to death, because (*quod*) they had left unburied<sup>78</sup> those whom they had been unable<sup>79</sup> to take up<sup>80</sup> on account of the violence<sup>81</sup> of the storms<sup>82</sup>.— 5. Marius took<sup>83</sup> Jugurtha fettered<sup>84</sup> to Rome.— 6. The consul dismissed the envoys weeping (*the envoys wept*), and lamenting the fatal<sup>85</sup> error of the king by which he had been induced to make war on the Roman people.— 7. The general took the city almost entirely<sup>86</sup> destroyed by fire, and destitute<sup>87</sup> of inhabitants.— 8. You have repeatedly threatened my life<sup>88</sup> without my sus-

<sup>32</sup> Transl.: the geniuses (*ingenia*) of men.— <sup>33</sup> res publica.— <sup>34</sup> dicare.— <sup>35</sup> bibliotheca.— <sup>36</sup> proponere.— <sup>37</sup> praelii picti tabula.— <sup>38</sup> ponere.— <sup>39</sup> a picture representing Father Liber = *Father Liber, a picture (tabula)*.— <sup>40</sup> externus.— <sup>41</sup> pictūra.— <sup>42</sup> publicare.— <sup>43</sup> ruber.— <sup>44</sup> trahere.— <sup>45</sup> capere.— <sup>46</sup> mullus.— <sup>47</sup> predicere.— <sup>48</sup> defectio.— <sup>49</sup> uterque.— <sup>50</sup> certare.— <sup>51</sup> introire.— <sup>52</sup> intrare.— <sup>53</sup> Transl.: the tragedy will be represented (*agere*).— <sup>54</sup> satis.— <sup>55</sup> auxilium (by the abstract-dative).— <sup>56</sup> dux.— <sup>57</sup> to wreck, *affligere*.— <sup>58</sup> pacare.— <sup>59</sup> princeps decurio.— <sup>60</sup> dare.— <sup>61</sup> beatus.— <sup>62</sup> by 'to live'.— <sup>63</sup> contendere.— <sup>64</sup> by as great marches (*iter*) as he could.— <sup>65</sup> velle.— <sup>66</sup> potiri.— <sup>67</sup> fidem servare.— <sup>68</sup> ajuvare.— <sup>69</sup> cum.— <sup>70</sup> Transl.: 'although they had could'.— <sup>71</sup> deferre.— <sup>72</sup> longius.— <sup>73</sup> the streams of the sea, *astus*. GEN. *us* (*sing.*).— <sup>74</sup> conspiceret.— <sup>75</sup> Transl.: left (*relinquere*) under his left [hand].— <sup>76</sup> by *proferisci*.— <sup>77</sup> by *pacare*.— <sup>78</sup> inclitus.— <sup>79</sup> Coa (*i.e.* of Cos, one of Ægean islands).— <sup>80</sup> Transl.: begun (*inchoare*).— <sup>81</sup> insepultus.— <sup>82</sup> non posse.— <sup>83</sup> excipere.— <sup>84</sup> vis.— <sup>85</sup> tempestas (*sing.*).— <sup>86</sup> ducere.— <sup>87</sup> vincere.— <sup>88</sup> fatālis.— <sup>89</sup> almost entirely, *pæne*.— <sup>90</sup> destitutus.— <sup>91</sup> to threaten one's life, *insidiari alicui*.

pecting<sup>90</sup> it.— 9. Thou wilt have [in] me a friend not less true than thy father found<sup>90</sup> me a brave enemy.— 10. The states refused to pay<sup>91</sup> the money they had received as a loan.— 11. You have forgotten to place that two hundred sesterces to my credit which Gaius paid you in my name.— 12. I am going to charge thee with all the damages<sup>92</sup> caused<sup>93</sup> by thy agent<sup>94</sup> on my premises<sup>95</sup>.— 13. The President<sup>96</sup> refused to employ<sup>97</sup> this man [any] longer as minister<sup>98</sup> of war.— 14. It is not possible<sup>99</sup> for every one (*all*) to die rich, but it is possible for all to die honest, and free<sup>100</sup> from crime<sup>1</sup>.— 15. It is the mark of a wise man to go<sup>2</sup> unflinchingly<sup>3</sup> to death.— 16. Having dismissed the king in anger<sup>4</sup> (*the king was angry*), the consul directed [his] lieutenant<sup>5</sup> to march<sup>6</sup> with all troops without delay to the boundaries of Macedonia.— 17. Our soldiers fell on<sup>7</sup> the enemy leaving<sup>8</sup>, loaded with booty, the camp.— 18. I have received the book which you have sent me as a present.— 19. It was imputed to the general as a crime that (*quod*) he did not send two legions to help<sup>9</sup> the distressed<sup>10</sup> Sempronius, in spite<sup>11</sup> of the order of the chief commander.— 20. The inhabitants asked the consul to (*ut*) leave them three cohorts<sup>12</sup> for protection<sup>13</sup>.

XII. COINCIDENT ACTION IN THE FORM OF AN OBJECT. (§ 556).— 1. Expect<sup>14</sup> the attack of the enemy with undaunted<sup>15</sup> souls. (*sing.*).— 2. With a great soul, and free<sup>16</sup> from all desire<sup>17</sup> for revenge<sup>18</sup>, Cæsar forgave all his adversaries.— 3. With the ancient Jews<sup>19</sup> it was considered a crime<sup>20</sup> to take a meal<sup>21</sup> with unwashed<sup>22</sup> hands.— 4. The Sabine<sup>23</sup> women, with dishevelled<sup>24</sup> hair<sup>25</sup> and torn<sup>26</sup> garments<sup>27</sup> rushed<sup>28</sup> among the flying darts<sup>29</sup>.— 5. The emperor<sup>30</sup> Augustus was never seen with an unshaved<sup>31</sup> face.— 6. The severe sentence of the Consul was received with great wailing<sup>32</sup> of the soldiers.— 7. The king asked the envoys whether they had come with authority<sup>33</sup> to conclude a peace.— 8. The barbarians made the attack with immense<sup>34</sup> howling<sup>35</sup>.— 9. On that journey I was so drenched<sup>36</sup> by rains<sup>37</sup> that I returned home with a cough<sup>38</sup>.— 10. With the Medes (*Medus*) it was the custom for<sup>39</sup> women, to be married in many-colored<sup>40</sup>, gold-woven<sup>41</sup> garments<sup>42</sup>.— 11. When Metellus saw<sup>43</sup> that Jugurtha intended<sup>44</sup> to throw himself into the deserts<sup>45</sup> of Libya, he began to follow<sup>46</sup> him by forced marches.— 12. Cleon went<sup>47</sup> to battle with an undisciplined<sup>48</sup> army, with unwilling<sup>49</sup> allies, [being] not even in the number of troops equal (*par*) to [his] adversary.— 13. I heard, to my great terror, what the agents of Fabius expected me to do.— 14. I hope that in the administration<sup>50</sup> of thy office<sup>51</sup>, thou wilt imitate chiefly my maxims<sup>52</sup>, which gained<sup>53</sup> to me the applause<sup>54</sup> of every good<sup>55</sup> (man), although I made<sup>56</sup>, to my great satisfaction, not a few enemies by the severity of my discipline.

<sup>89</sup> By *necopians*.— <sup>90</sup> expectri.— <sup>91</sup> solvere.— <sup>92</sup> damnum.— <sup>93</sup> facere.— <sup>94</sup> emissarius.— <sup>95</sup> prædium (*sing.*).— <sup>96</sup> princeps reipublicæ.— <sup>97</sup> uti.— <sup>98</sup> rei militaris præfectus.— <sup>99</sup> licet.— <sup>100</sup> purus.— <sup>1</sup> scelus.— <sup>2</sup> mortem obire.— <sup>3</sup> imperterritus.— <sup>4</sup> iratus.— <sup>5</sup> legatus.— <sup>6</sup> contendere.— <sup>7</sup> opprimere aliquem.— <sup>8</sup> excedere.— <sup>9</sup> auxilium.— <sup>10</sup> by *laborare*.— <sup>11</sup> Transl.: having neglected the order (*jussus*, G. *us*) of the imperator.— <sup>12</sup> cohorts.— <sup>13</sup> præsidium.— <sup>14</sup> attendere.— <sup>15</sup> imperterritus.— <sup>16</sup> solutus.— <sup>17</sup> capiditas.— <sup>18</sup> by *abscisci*.— <sup>19</sup> Judæus.— <sup>20</sup> nefas.— <sup>21</sup> comæ.— <sup>22</sup> illatus.— <sup>23</sup> Sabini.— <sup>24</sup> passus.— <sup>25</sup> crinis (*plur.*).— <sup>26</sup> to tear, *scindere*.— <sup>27</sup> vestis (*sing.*).— <sup>28</sup> ruere.— <sup>29</sup> telum.— <sup>30</sup> princeps.— <sup>31</sup> intonsus.— <sup>32</sup> gemitus, GEN. *us*.— <sup>33</sup> auctoritas.— <sup>34</sup> ingens.— <sup>35</sup> ululatus, G. *us*.— <sup>36</sup> excutere.— <sup>37</sup> imber.— <sup>38</sup> tussis.— <sup>39</sup> Transl.: that women were married (*nubi*).— <sup>40</sup> pictus.— <sup>41</sup> auro intextus.— <sup>42</sup> vestis (*sing.*).— <sup>43</sup> animadvertere.— <sup>44</sup> to intend to throw one's self, *petere*.— <sup>45</sup> deserta loca.— <sup>46</sup> insequi.— <sup>47</sup> pugnam committere.— <sup>48</sup> male instructus.— <sup>49</sup> infensus.— <sup>50</sup> by *gerere*.— <sup>51</sup> munus.— <sup>52</sup> ratio (*sing.*).— <sup>53</sup> ferre.— <sup>54</sup> plausus.— <sup>55</sup> superlative.— <sup>56</sup> Transl.: although I took (*suscipere*), to my great pleasure (*voluptas*) not a few (*nonnulli*) enemies (*inimici*) from (*ex*) the severity (*severitas*).

XIII. RELATION OF INTENSITY.— 1. It can hardly be expressed by words, how greatly thy zeal for my welfare has delighted me.— 2. You are well aware (*non ignoras*) how much [weight] I have always placed (*tribuere*) on your opinion.— 3. If you undertake<sup>57</sup> some new [kind of] work, [you] must not ask how much it can benefit, but how much it can hurt you.— 4. We all feel how sad, how pitiful (*miser*) this victory was, [and] how disgraceful and criminal<sup>58</sup> the flight of our [friends].— 5. How much better, how much fairer<sup>59</sup> would it have been, if you had chosen<sup>60</sup> to listen<sup>61</sup> to my opinion.— 6. If I hated you so much, as you know that I love you, I would in no way resist<sup>62</sup> you, nay (*immo*), I would urgently ask you to do what you have proposed<sup>63</sup>.— 7. I wonder that you so greatly wish to buy that slave.— 8. So cautiously, so secretly was that affair transacted<sup>64</sup>, that we did not even suspect that anything (*aliquid*) was being prepared before we saw<sup>65</sup> that all was accomplished.— 9. The purchase<sup>66</sup> of thy villa in Formiæ<sup>67</sup> seems to have been as well considered<sup>68</sup> as [it was] lucrative<sup>69</sup>; for I hear that you have sold again with an immense profit<sup>70</sup>.— 10. All these misdeeds<sup>71</sup>, however nefarious, however shocking<sup>72</sup>, Verres committed<sup>73</sup> with admirable<sup>74</sup> indifference<sup>75</sup>.— 11. Thy interpretation<sup>76</sup> of this passage<sup>77</sup> displeases me exceedingly.— 12. I am not much impressed<sup>78</sup> by these arguments.— 13. Know that I am greatly bowed<sup>79</sup> down; for I found here thy two letters, and one of our Varro, from which I see how little we can hope of those conditions which we thought would bring<sup>80</sup> us peace.— 14. The address<sup>81</sup> of the king impressed the ambassadors not a little.— 15. I wished (*velim ut*) that our ambassadors had understood<sup>82</sup> these arrogant demands<sup>83</sup> a little more firmly.— 16. It cannot be doubted, that this enemy of the country has become the more impudent, the more generously we have treated<sup>84</sup> with him.— 17. The ancients believed that the sun was nine times as large as the moon.— 18. The praises which people (*homines*) spend<sup>85</sup> on [to] me for having (by *causa*) saved the country, seem to be much greater than I could ever expect.— 19. Art thou so ignorant<sup>86</sup> in knowledge<sup>87</sup>, so inexperienced<sup>88</sup> in our institutions<sup>89</sup>, that thou canst not even read this law correctly<sup>90</sup>?— 20. The enemy made the attack against our soldiers with the densest<sup>91</sup> ranks they could.— 21. I wish you would assist me in this matter, as much as you can, by your advice and influence<sup>92</sup>.— 22. Capito, as much as I can gather<sup>93</sup> from his letter, does not intend to leave Italy.— 23. You are much mistaken<sup>94</sup>, Sulpicius's villa is no more than fifteen, or at the utmost, sixteen miles distant from the city.

XIV. RELATION OF PRICE.— 1. The pictures<sup>95</sup> of renowned artists were sold at fabulous<sup>96</sup> prices in antiquity [*with the ancients*].— 2. The Archigallus of Parrhasius, which picture the emperor Tiberius loved so much that he locked it up<sup>97</sup> in his sleeping apartment<sup>98</sup>, was estimated at 6 millions sesterces.— 3. The 'sick man' of Aristides of Thebes was bought by king Attalus for one hundred talents.— 4. The Argonauts<sup>99</sup> of Cydias the

<sup>57</sup> Suscipere (*perf. future*).— <sup>58</sup> flagitiosus.— <sup>59</sup> æquus.— <sup>60</sup> velle.— <sup>61</sup> audire.— <sup>62</sup> adversari.— <sup>63</sup> constituere.— <sup>64</sup> peragere.— <sup>65</sup> intelligere.— <sup>66</sup> emtio.— <sup>67</sup> Formiæ.— <sup>68</sup> maturatus.— <sup>69</sup> fructuosus.— <sup>70</sup> lucrum.— <sup>71</sup> facinus.— <sup>72</sup> flagitiosus.— <sup>73</sup> perpetrare.— <sup>74</sup> egregius.— <sup>75</sup> animi æquitas.— <sup>76</sup> interpretatio.— <sup>77</sup> locus.— <sup>78</sup> movēre.— <sup>79</sup> affligere.— <sup>80</sup> afferre.— <sup>81</sup> oratio.— <sup>82</sup> obstāre.— <sup>83</sup> postulatum.— <sup>84</sup> agere.— <sup>85</sup> tribuere.— <sup>86</sup> expers.— <sup>87</sup> litteræ.— <sup>88</sup> imperitus.— <sup>89</sup> institutum.— <sup>90</sup> recte.— <sup>91</sup> confertus.— <sup>92</sup> auctoritas.— <sup>93</sup> colligere.— <sup>94</sup> I am mistaken, *opinio me fallit*.— <sup>95</sup> Transl.: The tables of renowned pictors.— <sup>96</sup> incredibilis. *Prædium* must be in the singular.— <sup>97</sup> includere.— <sup>98</sup> cubiculum.— <sup>99</sup> Argonautæ.

lawyer<sup>100</sup> Hortensius bought for 144,000 sesterces, and built<sup>1</sup> [expressly] a house<sup>2</sup> for it in his Tusculan villa.— 5. The Ephesians<sup>3</sup> engaged<sup>4</sup> Apelles to paint Alexander the Great with lightning in his hand<sup>5</sup> for the price of twenty talents.— 6. Timomachus of Byzantium<sup>6</sup> sold his Ajax and his Medea to Julius Caesar for eighty talents, which pictures were placed in the temple of Venus Genetrix.— 7. Gajus gave me, for money given to him as a loan, his note for one hundred twenty thousand Dollars [express the amount in sesterces].— 8. The price<sup>7</sup> for a trip to Troy on the boat is three Dollars [express in sesterces].— 9. The Senate has compromised that claim<sup>8</sup> at 60 millions of sesterces [render in all methods admissible].— 10. That work has been awarded to Sempronius, who made the lowest bid<sup>9</sup>, at 362,000 sesterces [render in every way admissible].— 11. I have rented my farm<sup>10</sup> to Gajus for 6,300 sesterces a year<sup>11</sup>.— 12. That house is worth 150,000 sesterces, or at the utmost 160.— 13. Wheat sells now at two<sup>12</sup> Dollars a bushel [express by sesterces].— 14. Verres bought a statue that was worth 60 times as much, for 6,500 sesterces.— 15. The Justice of peace<sup>13</sup> laid the damages against Sempronius at 1,300 sesterces.— 16. This house cost me exactly (fere) 289,600 sesterces to build<sup>14</sup>.— 17. This fence will cost you not less than a mina to make.— 18. This war has cost me my house.— 19. That book is exceedingly rare; it sells at auction for prices ranging from 500 to 1,000 sesterces<sup>15</sup>.— 20. The splendid team<sup>16</sup> of Sempronius has cost him 50,000 sesterces.— 21. I cannot do this work for less than 100,000 sesterces.

XV. INDEFINITE PRICE.— 1. What will you take<sup>17</sup> for that horse?— 2. What is gold worth to-day?— 3. What damages has the jury<sup>18</sup> awarded in that law-suit?— 4. What did your house cost?— 5. What did you bid<sup>19</sup> [for] that statue at auction?— 6. At what sum did you compromise?— 7. What do you think that picture is worth? At what sum do you value it?— 8. How does wheat sell to-day?— 9. In the Roman Forum was a picture of Aristides, representing<sup>20</sup> an old herdsman with a staff<sup>21</sup>, in regard<sup>22</sup> to which an envoy of the Teutons<sup>23</sup>, being asked how high he estimated him, answered, he would not take<sup>24</sup> such a [fellow] as a gift [if he were] alive.— 10. How much higher does wheat sell than barley<sup>25</sup>?— 11. Sempronius sold me that statue for what<sup>26</sup> it cost him.— 12. Sempronius sold me that statue for a much higher price than [what<sup>27</sup>] he bought it [for].— 13. I have rented this house for the same price as last<sup>28</sup> year.— 14. Grain sold then so high that poor people<sup>29</sup> could not buy it.— 15. The contractors made so high a bid [on] that work that nobody could compete<sup>30</sup> with

<sup>100</sup> Orator.— <sup>1</sup> facere.— <sup>2</sup> aedes (sing.) Aedes is placed in the singular if it denotes houses, consisting of one main room, as temples, and structures such as the mentioned one of Hortensius.— <sup>3</sup> Ephesius.— <sup>4</sup> Transl.: gave out on contract Alexander to be painted etc.— <sup>5</sup> Transl.: holding in [his] hand.— <sup>6</sup> Byzantius.— <sup>7</sup> Transl.: It is sailed (navigare) now to Troy for etc.— <sup>8</sup> nomen.— <sup>9</sup> Transl.: who had bidden (liciti) the lowest (minimo).— <sup>10</sup> rus.— <sup>11</sup> 'a year' is expressed by giving to the numeral the distributive form.— <sup>12</sup> Be careful in rendering this numeral.— <sup>13</sup> judex pedanens.— <sup>14</sup> Transl.: I have built this house for etc.— <sup>15</sup> Transl.: at 500 sesterces up to 1,000.— <sup>16</sup> bigae.— <sup>17</sup> by vendere.— <sup>18</sup> judices. In classical times the function of the judex was almost the same as that of our juries. What we call 'judge', in those times was the praetor, who decided the question of 'law', while the judex decided on 'fact' and evidence.— <sup>19</sup> The bid, connected with licere, is the same as other objects of price and value.— <sup>20</sup> Transl.: a table of an old (senex) herdsman (pastor) painted by.— <sup>21</sup> baculum.— <sup>22</sup> de.— <sup>23</sup> The Teutons, Teuton.— <sup>24</sup> Transl.: he would not (nolle) that such a one was presented to him alive.— <sup>25</sup> hordeum.— <sup>26</sup> for so much, as.— <sup>27</sup> The Latin cannot omit the relative of price in comparative clauses after quam.— <sup>28</sup> superior.— <sup>29</sup> Poor people, egentes.— <sup>30</sup> Transl.: could bid against.

them.— 16. Your negligence has cost you dear!— 17. Sempronius estimates this work at a very high price.— 18. The Jury have estimated the damages at a lower rate than I expected.— 19. The Jury have estimated the damages against Sempronius at a lower rate than they estimated those against Gajus.— 20. Life is cheap<sup>31</sup> in Tarent.— 21. Rent is cheap<sup>32</sup> in that part of town, I think.— 22. Landlords<sup>33</sup> wish to let as high as possible, and tenants<sup>34</sup>, to rent as low as possible.— 23. You have bought this house for a mere song (flocci).

XVI. RELATION OF INNER VALUE.— 1. It is wonderful, what value is now attached<sup>35</sup> to these accomplishments.— 2. I do not know how high you hold that man; I, on my part, hold him at nothing.— 3. If you hold the welfare of the republic as dear, as I do, we ought to let minor points<sup>36</sup> drop.— 4. Even the smallest [sum of] money is worth much to me in these times.— 5. Was this man so much to thee that his fall<sup>37</sup> should affect thee with so great a grief?— 6. All these disadvantages<sup>38</sup> I do not mind, if thou wilt but pledge<sup>39</sup> that my and my children's LIVES (sing.) shall be safe<sup>40</sup>.— 7. If you place a great value on the pleasure of a few<sup>41</sup> hours, how much higher must you value a pleasure which at no time can<sup>42</sup> be interrupted<sup>43</sup> or disturbed<sup>44</sup>?— 8. If what I esteem highest is held lowest by thee, then indeed no communion<sup>45</sup> can be between us.— 9. Since<sup>46</sup> I despise, at least<sup>47</sup> take<sup>48</sup> lightly, the great injuries of these men, you should<sup>49</sup> take their mere<sup>50</sup> pleasures<sup>51</sup> in good part.

XVII. RELATION OF INTEREST.— 1. What difference does it make to Sempronius, whether you are sorry or glad?— 2. I do not know of what importance this matter is to thee, but to me it is of the greatest importance.— 3. That thou art going soon to return home from thy journey, will be of great interest to my brother.— 4. It can hardly be believed, of what interest it is to us, that this matter should be decided in the shortest possible time.— 5. The emperor<sup>52</sup> Napoleon I., copying<sup>53</sup> Caesar, said that France (Gallia) was more interested in<sup>54</sup> his safety, than he himself, and that France was more in need of him than he [was in need] of France.— 6. It made little difference to Fulvius whether the Senate would ratify<sup>55</sup> his decrees or not.— 7. It will be of the last importance to us if you can induce<sup>56</sup> your brother to (ut) join<sup>57</sup> in our councils.— 8. It is not so much our interest as that of the king that the conditions of peace should be kept<sup>58</sup> sacred<sup>59</sup>.— 9. What matters it that the tyrant has assigned to Sextus a province for plunder, in which there is<sup>60</sup> nothing left to be<sup>61</sup> plundered?— 10. It does not matter to what sum<sup>62</sup> you bind<sup>63</sup> yourself, as long (si) as you have nothing with which to discharge<sup>64</sup> the obligation.

XVIII. RELATION OF WEIGHT, AND MEASUREMENT IN GENERAL.— 1. Which weighs more, a pound of lead, or [a pound] of flax<sup>65</sup>?— 2. How many pounds does that fish weigh? It weighs two pounds and a half.— 3. The

<sup>31</sup> Transl.: It is lived at a cheap price.— <sup>32</sup> Transl.: I think that it is dwelled (habitare) at a cheap price in that part (regio).— <sup>33</sup> Transl.: they that rent (qui locant).— <sup>34</sup> qui conducunt.— <sup>35</sup> at what [value] these accomplishments (artes) are held.— <sup>36</sup> Transl.: everything smallest (par.) will have to be dropped (mittere).— <sup>37</sup> interitus.— <sup>38</sup> incommodum.— <sup>39</sup> prestare (perf. subj.).— <sup>40</sup> salvus.— <sup>41</sup> pauculus.— <sup>42</sup> By the subjunctive of the principal predicate.— <sup>43</sup> intermittere.— <sup>44</sup> interpellare.— <sup>45</sup> communio.— <sup>46</sup> quoniam.— <sup>47</sup> certe.— <sup>48</sup> ferre.— <sup>49</sup> Pres. subj. of the principal predicate.— <sup>50</sup> merus.— <sup>51</sup> facies.— <sup>52</sup> imperator.— <sup>53</sup> ludere.— <sup>54</sup> Transl.: that he was safe (inf. clause).— <sup>55</sup> to ratify some.— <sup>56</sup> inducere.— <sup>57</sup> Transl.: to hold something as granted.— <sup>58</sup> persuadere.— <sup>59</sup> accedere ad.— <sup>60</sup> servare.— <sup>61</sup> integer inviolatusque.— <sup>62</sup> diripere, partic. gerundial.— <sup>63</sup> Transl.: what [may] be plundered (subj.).— <sup>64</sup> how high.— <sup>65</sup> obligare.— <sup>66</sup> Transl.: by which you may discharge (solvete) the obligations (nomina).— <sup>67</sup> limum.

general presented the Delphic Apollo with a golden tripod<sup>66</sup> three pounds in weight.— 4. Servius Tullius, fourth king of the Romans, is said to have been the first who coined<sup>67</sup> money: the ases, coined by him weighed one pound a piece.— 5. An English<sup>68</sup> mile<sup>69</sup> measures more than four times as much.— 6. I cannot estimate the exact measure<sup>71</sup> of these fields from such a distance<sup>72</sup>.— 7. On the following<sup>73</sup> day, at daybreak, the inhabitants perceived<sup>74</sup> to their greatest terror the troops of the enemy, 10,000 strong, standing<sup>75</sup> in battle array<sup>76</sup> at their gates.— 8. The ancients report (*prodere*) that there were several trees more than thousand years old.

XIX. MEANS AND INSTRUMENT.— 1. By this means Verres meant<sup>77</sup> to conceal<sup>78</sup> his plans.— 2. We could effect this by no other means.— 3. I cannot defend this opinion by any law but by the custom of our ancestors, who held (*velle*) that not even the enemy should be deceived by fraud.— 4. Antonius was by nature shrewd<sup>79</sup> and prudent, and he assisted nature by the greatest perseverance.— 5. The Lacedæmonian Phœbidas seized<sup>80</sup> the fortress<sup>81</sup> of Thebes<sup>82</sup> at the instigation<sup>83</sup> of a few Thebans who were in favor<sup>84</sup> of the Lacedæmonians.— 6. I was astonished at the ignorance of this man, who when he was obliged<sup>85</sup>, as a prætor, to make<sup>86</sup> laws himself, could not even correctly understand those that were made by others.— 7. It takes two hours<sup>87</sup> to walk on foot from my house to the city.— 8. There was at that time no law by which Caninius could right<sup>88</sup> the wrong [which he had] suffered<sup>89</sup>.— 9. According to my opinion at least (*quidem*), this assertion<sup>90</sup> cannot be proved at all.— 10. This assertion I can prove by the fact that never any enmity existed (*esse*) between Roscius and his father.

XX. CAUSE EFFICIENT AND MOTIVE.— 1. Icilius said that he had not come for his (own) sake, nor was going to implore forgiveness in his own name.— 2. Do you believe that he (*ille*) always looks<sup>91</sup> at his own advantage<sup>92</sup> who relieves<sup>93</sup> his neighbor<sup>94</sup>, or subjects<sup>95</sup> himself to hardships for his sake?— 3. For this reason (*causa*) alone Roscius separated<sup>96</sup> for a while from his father.— 4. From these reasons (*causa*) I have chosen<sup>98</sup> the part of the accuser, when the principles<sup>99</sup> of my life called<sup>100</sup> me to defend the welfare of my fellow-citizens.— 5. From many reasons (*causa*) the consul thought it best<sup>1</sup> to withdraw<sup>2</sup> his army from these parts.— 6. Ver-  
cingetorix executed<sup>4</sup> people (*homines*) by burning them alive<sup>5</sup> for serious<sup>6</sup> offences<sup>7</sup>; for lighter<sup>8</sup> cause he cut off<sup>9</sup> their<sup>10</sup> ears, or gouged out<sup>11</sup> their eyes.— 7. The Romans made war on the Carthaginians from the most frivolous<sup>12</sup> causes.— 8. In order to (ut) destroy<sup>13</sup> the king the (eo) more surely<sup>14</sup> and unforeseen<sup>15</sup>, Burrus accompanied<sup>16</sup> him on his journey under the pretext of friendship.— 9. Some<sup>17</sup> remained out of<sup>18</sup> shame<sup>19</sup> in order to

<sup>66</sup> Tripus, GEN. tripodis (Greek decl.) — <sup>67</sup> obsignare. — <sup>68</sup> Anglicus. — <sup>69</sup> milliarius. — <sup>70</sup> milliarius navale. — <sup>71</sup> Transl.: what these fields measure. — <sup>72</sup> intervallum. — <sup>73</sup> proximus. — <sup>74</sup> conspiciere. — <sup>75</sup> instructus. — <sup>76</sup> acie. — <sup>77</sup> velle. — <sup>78</sup> tegere. — <sup>79</sup> peracutus. — <sup>80</sup> occupare. — <sup>81</sup> arx. — <sup>82</sup> Thebani. — <sup>83</sup> impulsus. GEN. us. — <sup>84</sup> to be in favor of somebody. — <sup>85</sup> occupare. — <sup>86</sup> arx. — <sup>87</sup> by quartet. — <sup>88</sup> scribere. — <sup>89</sup> Translate: It is walked on foot two hours etc. — <sup>90</sup> prosequi. — <sup>91</sup> accipere. — <sup>92</sup> sententia. — <sup>93</sup> spectare aliquid. — <sup>94</sup> militas. — <sup>95</sup> sublevare (perf. subj.). — <sup>96</sup> Translate: the other one. — <sup>97</sup> Translate: I have betaken to hardships. — <sup>98</sup> Translate: I have betaken myself (se conferre) to accusing. — <sup>99</sup> institutum (sing.). — <sup>100</sup> advocare ad. — <sup>1</sup> consilium with myself (se conferre) to accusing. — <sup>2</sup> deducere. — <sup>3</sup> regiones. — <sup>4</sup> necare. — <sup>5</sup> Translate: by fire. — <sup>6</sup> predicate-gerundial. — <sup>7</sup> deducere. — <sup>8</sup> levius. — <sup>9</sup> desecare. — <sup>10</sup> Dative of the personal pronoun. — <sup>11</sup> effodere. — <sup>12</sup> levius. — <sup>13</sup> tollere. — <sup>14</sup> certe. — <sup>15</sup> necopinans. — <sup>16</sup> prosequi. — <sup>17</sup> nonnulli. — <sup>18</sup> by adductus. — <sup>19</sup> pudor.

avoid the suspicion of fear.— 10. Why have you changed<sup>20</sup> your opinion? — 11. But why do I try to teach that stick<sup>21</sup> philosophy? — 12. Why do you think<sup>22</sup> that he will frivolously<sup>23</sup> break<sup>24</sup> his duty? why have you no faith<sup>25</sup> in your manhood<sup>26</sup> and in my care for your interests<sup>27</sup>? — 13. Wherefore did you take up arms against your fellow-citizens? — 14. There was no sufficient and good<sup>28</sup> cause why you should declare<sup>29</sup> war on (to) your country, why you should join hands<sup>30</sup> with the foes of the Roman people, why nothing divine and human should be sacred<sup>31</sup> to you.— 15. Why should I not immediately arrest<sup>32</sup> thee, and direct the lictor to commit<sup>33</sup> thee to prison? — 16. Why hast not thou also made use of the same argument? Evidently<sup>34</sup> because thereby thou wouldst have confessed to<sup>35</sup> have been privy<sup>36</sup> to the plans of those.— 17. You are afraid without any reason. Therefore I shall anticipate<sup>37</sup> what I, without<sup>38</sup> your causeless fear, would have postponed<sup>39</sup> till a later day.— 18. You see how weak<sup>40</sup> your pleadings<sup>41</sup> are: therefore you ought to have kept silent<sup>42</sup>.— 19. We spend<sup>43</sup> our strength in vain; therefore let us return.— 20. Thou hast misinterpreted<sup>44</sup> me. Because (*from the reason that*) I wished to spare the<sup>45</sup> feelings of this witness, I did not ask<sup>46</sup> him that question.— 21. You have defeated our cavalry in one unimportant<sup>47</sup> battle; but do not therefore (on that account) consider your victory certain<sup>48</sup> and doubtless.— 22. Hannibal by no means despised the little<sup>49</sup> band<sup>50</sup> of the enemy; nor did he therefore (on that account) become careless<sup>51</sup> or incautious.— 23. From the reason that you refused to overcome<sup>52</sup> us by perfidious<sup>53</sup> means, we surrender<sup>54</sup> ourselves to (in) your discretion<sup>55</sup>.— 24. Not because our strength is failing<sup>56</sup> us, (therefore) we sue for<sup>57</sup> peace, but because the immortal gods themselves seem to fight<sup>58</sup> on your side<sup>59</sup>.

XXI. RELATION OF PURPOSE.— 1. Caesar did this for the (that) purpose of (ut) keeping the forces<sup>60</sup> of the enemy apart<sup>61</sup>.— 2. Did you not issue this order<sup>62</sup> with a (that) view to mislead<sup>63</sup> those who were watching your steps<sup>64</sup>?— 3. For what purpose are guards distributed through the whole city?— 4. For what purpose did you send so large a sum of money to [him] whom, according to your books<sup>65</sup>, you owed<sup>66</sup> nothing?— 5. I do not know to what purpose you have mentioned<sup>67</sup> these things. I mentioned [them] in order (*for the purpose*) that those men should not be enabled (*posse*) to excuse themselves with the ignorance of facts.— 6. Not for that purpose are the laws given<sup>68</sup> that they should be a protection<sup>69</sup> for the guilty<sup>70</sup>, but that [they should be a protection] for the innocent.— 7. We elect (*diceret*) our magistrates for the purpose that they should pro-

<sup>20</sup> Discedere de sententiâ. — <sup>21</sup> truncus. — <sup>22</sup> judicare. — <sup>23</sup> temere. — <sup>24</sup> discedere de officio. — <sup>25</sup> to have no faith in. — <sup>26</sup> virtus. — <sup>27</sup> care for your interests. — <sup>28</sup> diligentia. — <sup>29</sup> to have no faith in. — <sup>30</sup> virtus. — <sup>31</sup> care for your interests. — <sup>32</sup> diligentia. — <sup>33</sup> sufficient and good. — <sup>34</sup> satis dignus. — <sup>35</sup> indicere. — <sup>36</sup> join hands. — <sup>37</sup> arma sociare. — <sup>38</sup> involatus. — <sup>39</sup> comprehendere. — <sup>40</sup> in vincula conjicere. — <sup>41</sup> nempe. — <sup>42</sup> Infm. clause. — <sup>43</sup> consilium. — <sup>44</sup> representare. — <sup>45</sup> Transl.: unless (nisi) you had feared without cause. — <sup>46</sup> to postpone till a later day. — <sup>47</sup> in longiora diem conferre. — <sup>48</sup> infirmus. — <sup>49</sup> peroratio. — <sup>50</sup> to keep silent. — <sup>51</sup> sedere. — <sup>52</sup> consumere. — <sup>53</sup> Transl.: Deceived (fallere) has these my opinion. — <sup>54</sup> spare the feelings of somebody. — <sup>55</sup> tempore dicendi. — <sup>56</sup> Transl.: I propose (proponere) to him that question. — <sup>57</sup> in one, and the same an unimportant (minimus) battle. fect<sup>71</sup>, not that they should oppress the rights of the citizens.— 8. Not those only should be punished who give<sup>72</sup>, but also those who accept money for votes<sup>73</sup> (*suffragium*).— 9. The proconsul ordered<sup>74</sup> from the towns (*municipium*) thirty horses for [the purpose of] a journey which he was going to make through the province.— 10. The towns presented the proconsul with a two-horse team for some favors<sup>75</sup> which they (*illi*) wished<sup>76</sup> he should grant<sup>77</sup> them.— 11. Catiline is marking<sup>78</sup> every one of you for murder<sup>79</sup>!

<sup>71</sup> Defendere.— <sup>72</sup> Give and accept must be in the perfect tense.— <sup>73</sup> Arrange: who for votes money have given, but also who have accepted should be punished.— <sup>74</sup> imperare with dative.— <sup>75</sup> officium (*sing.*).— <sup>76</sup> velle with infin. clause.— <sup>77</sup> præstare.— <sup>78</sup> notare.— <sup>79</sup> cædes.

## CHAPTER SECOND. USE OF THE TENSES.

The rules on the tenses are applicable to the tenses of the subjunctive only so far as they are not modified by the special rules on the tenses of this mood (Ch. III.).

### I. PRESENT TENSE.

§ 567. The PRESENT TENSE is used 1) when the time of the predicate, *i. e.* the time spoken of, is represented as that of the SPEAKER, as *Hos ego video*, These men I see, Cic. Cat. 1, 14; 2) when the predicate is represented as belonging to ALL TIMES, as *Saturni stella cursum triginta annis peragit*, Saturn completes its course in 30 years, Plin. H. N. 2, 6; 3) if the predicate is represented as belonging to NO PARTICULAR TIME, as *Pernocant venatores in nive, in montibus uri se patiuntur*, Hunters spend their nights in the snow, and suffer themselves to be burned in the mountains, Cic. Tusc. 2, 17.

Obs. 1. If the present tense is used in the significations mentioned above, it may be said to have its own and proper meaning, the action in all these instances belonging either entirely, or partly to the SPEAKER'S time. It thus forms a contrast to all the other tenses, the common feature of which is that they designate times not those of the speaker. There are instances, however, in which the present tense has lost this distinguishing mark, having assumed the force of a preterite. See R. 45.

Obs. 2. The Latin language has only ONE form for all the different meanings connected with the PRESENT TENSE, while the PRETERITE is expressed by THREE, and the FUTURE by TWO different forms. The fact that it is often desirable to distinguish the present time in a similar way as the preterite and future, is the cause that in English to the PRESENT PERFECT some functions are assigned which properly belong to the present tense. In Latin there is only a faint trace of such a usage. See R. 42, obs. 1. But in another sense the Latin language makes use of the perfect in place of a present, if two predicates, both belonging to a time present to the SPEAKER, are so connected with each other that their times IN RELATION TO EACH OTHER are different. See R. 43.

Obs. 3. It makes no difference in Latin whether the predicate which, according to § 567 must be in the present tense, expresses a continued or a momentary action; in both instances the Latin language uses only one form, ignoring the difference between the English progressive and common forms, as: *Notat et designat oculis ad caedem unumquemque vestrum*, HE IS MARKING and SINGLING OUT with his looks every one of you for murder. Cic. Cat. 1, 1, 2.

Rem. 41. The time of the speaker is conceived in a double way: 1) AS THE MOMENT OF HIS SPEAKING, as *Hoc nunc primum audio*, I hear this now (in this moment) for the first time, Ter. Andr. 5, 4, 33; 2) as the PERIOD

OF TIME (or one of its regular divisions) within which the speaker is living, as

*Apud Lacedæmonios qui amplissimum magistrum gerunt, ut sunt, sic etiam nominantur senes*, with the Lacedæmonians those who hold the highest magistracy, as they are 'old', are called by a name implying this word. Cic. Sen. 6, 20.— *At senatus præscribo quæ sint gerenda et quomodo*, but I direct the Senate what must be done and how it must be done. Ib. 6, 18 [The speaker does not do this in the moment of his speaking, but at stated times within that period of his life in which he makes the assertion.] — *Germanorum victus in lacte, carne, caseo consistit*, the food of the Germans consists in milk, meat, and cheese. Cæs. B. G. 1, 6, 12. [This was true before the time of the assertion, and after it, and refers to Cæsar's time in general.]

Rem. 42. If an action is represented as having lasted during a period of a certain length (R. 10, obs. 2; R. 14), and as still continuing at the time of the speaker, the Latin language places the predicate expressing the action in the PRESENT TENSE, while the English language makes use of the PRESENT PERFECT. The time itself may be designated by definite or indefinite expressions, to which often *jam* is added, denoting in this connection the continuance of the action up to the moment of speaking. The force of this adverb *jam* is contained in the English present-perfect.

In hoc iudicio *jam biennium versamur*; With this trial we have been engaged the LAST two years (not *duos ultimos annos*). Cic. Quinct. 13.— *Lacedæmonii septingentos jam annos amplius vivunt*; The Laced. have been in existence already for more than 700 years. Ib. Placc. 26.— *Ego tot annos ita vivo ut etc.*; I have been so living for these many years that etc. Ib. Arch. 6, 12.— *Hæc pertinent omnia ad eam quam jam dudum tracto constantiam*; All this belongs to that constancy which I have been speaking of all the while. Ib. Am. 18. So with ordinals inst. of cardinals (Ex. 1, 2, 6, 11).

1. Hoc bellum quantum decimum annum tam pertinaciter geritis ut sæpe ad ultimum discrimen veneritis. Liv. 28, 38.— 2. Hannibal incolumi exercitu quantum decimum annum Italiam obsidet. Ib. 28, 41.— 3. Vide quam dudum hic asto et pulso. Plaut. Stich. 2, 1, 38.— 4. Ætæe montis per tot sæcula durat incendium. Just. 4, 1.— 5. Quomodo tu hoc nomen amplius triennium in adversariis jacere pateris? Cic. Rosc. Com. 3, 8.— 6. Vicesimus annus est quam omnes scelerati me unum petunt. Cic. Phil. 12, 10.— 7. Jam diu in his periculis versamur. Cic. Cat. 1, 13.— 8. Si tu, quod te jam dudum hostis, ex urbe ex his, exaurietur morum comitum senatus. Ib. 1, 5, 12.— 9. Paria te odit et mentis, et jam diu te nihil faciat nisi de parricidio suo cogitare. Ib. 1, 7, 17.— 10. Hæc gens ad hoc tempus his sedibus sese continet. Cæs. B. G. 6, 24.— 11. Vicesimum jam diem patimur hebescere aciem horum auctoritatis. Cic. Cat. 1, 2.— 12. Jam diu ignoro quid agas. Cic. Fam. 7, 9.

Obs. 1. The PERFECT is used in this kind of construction, 1) if the predicate is an INCEPTIVE, whose perfect has the meaning of a non-inceptive present (*conticui*, of *conticere*, I have become silent = I am silent); *Jam pridem conticuerunt* tuæ litteræ; Your pen has been silent for a long time. Cic. Brut. 6, 19.— 2) If the action is represented as having continued up to the time of the speaker, but as having ceased at that time: *Sero resistimus ei quem per annos decem alimus contra nos*; It is too late to resist him (Cæsar) whom we have been feeding against us for the last ten years (but no longer at the moment of speaking). Cic. Att. 7, 5, 5.— *Illuc clades quæ in nos per quatuordecim annos ingruerunt vertantur*, let the disasters which have poured upon us for fourteen years, be turned in that direction (thither). Liv. 28, 44.

Obs. 2. To that class of present predicates which represent an action as happening AT ALL TIMES (§ 567, 2), belong 1) actions really transpiring, as the example given § 567; and 2) assertions referring to merely mental conceptions, represented to be true for all times, as when general principles, truths, or definitions are proposed, as: *Numquam est utile peccare*, Committing sins is never expedient. Cic. Off. 3, 15.

1. Viri illi perpetuam admirationem sæculorum celebrantur. Quint. 11, 1, 13.— 2. Non omnes possunt esse Scipiones aut Maximi. Sen. 3, 13.— 3. Dolus malus in simulatione continetur. Cic. Off. 3, 15.— 4. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 5. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 6. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 7. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 8. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 9. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 10. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 11. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 12. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 13. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 14. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 15. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 16. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 17. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 18. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 19. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 20. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 21. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 22. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 23. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 24. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 25. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 26. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 27. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 28. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 29. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 30. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 31. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 32. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 33. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 34. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 35. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 36. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 37. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 38. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 39. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 40. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 41. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 42. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 43. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 44. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 45. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 46. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 47. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 48. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 49. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 50. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 51. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 52. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 53. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 54. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 55. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 56. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 57. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 58. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 59. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 60. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 61. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 62. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 63. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 64. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 65. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 66. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 67. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 68. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 69. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 70. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 71. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 72. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 73. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 74. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 75. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 76. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 77. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 78. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 79. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 80. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 81. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 82. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 83. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 84. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 85. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 86. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 87. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 88. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 89. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 90. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 91. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 92. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 93. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 94. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 95. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 96. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 97. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 98. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 99. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 100. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 101. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 102. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 103. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 104. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 105. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 106. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 107. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 108. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 109. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 110. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 111. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 112. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 113. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 114. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 115. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 116. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 117. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 118. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 119. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 120. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 121. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 122. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 123. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 124. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 125. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 126. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 127. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 128. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 129. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 130. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 131. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 132. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 133. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 134. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 135. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 136. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 137. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 138. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 139. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 140. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 141. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 142. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 143. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 144. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 145. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 146. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 147. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 148. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 149. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 150. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 151. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 152. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 153. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 154. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 155. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 156. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 157. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 158. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 159. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 160. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 161. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 162. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 163. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 164. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 165. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 166. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 167. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 168. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 169. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 170. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 171. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 172. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 173. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 174. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 175. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 176. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 177. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 178. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 179. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 180. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 181. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 182. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 183. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 184. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 185. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 186. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 187. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 188. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 189. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 190. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 191. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 192. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 193. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 194. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 195. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 196. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 197. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 198. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 199. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 200. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 201. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 202. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 203. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 204. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 205. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 206. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 207. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 208. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 209. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 210. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 211. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 212. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 213. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 214. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 215. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 216. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 217. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 218. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 219. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 220. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 221. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 222. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 223. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 224. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 225. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 226. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 227. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 228. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 229. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 230. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 231. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 232. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 233. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 234. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 235. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 236. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 237. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 238. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 239. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 240. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 241. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 242. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 243. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 244. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 245. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 246. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 247. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 248. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 249. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 250. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 251. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 252. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 253. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 254. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 255. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 256. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 257. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 258. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 259. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 260. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 261. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 262. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 263. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 264. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15.— 265. Vitis, quæ naturâ caduca est, nisi fulta sit, perit. Cic. Off. 3, 15

ad terram fertur.—5. Facilius in morbos *incidunt* adolescentes (quam senes), gravius *agrōtant*<sup>1</sup>, tristius *curantur*; itaque pauci *veniunt* ad senectutem. Cic. Sen. 19, 67.

Obs. 3. Actions which are represented as belonging to NO PARTICULAR TIME, are placed in the PRESENT when the speaker proposes them by way of SUPPOSITION. Such sentences usually have the form of general conditional or relative clauses (*if any one, those who*), as: *Si ei qui ab hoste obsidentur*, aquæ sextarium minâ emere *coguntur*, hoc primo auditu incredibile nobis *videtur*, if those who are besieged by the enemy, are com-elled to buy a sextarius of water for a mina, this seems, when we hear it first, incredible to us. Cic. Off. 2, 16, 56.—Sicut illi *qui navigant*, quum subito mare cepit horrescere, unus opem *implorant*, sic noster populus magistratibus in bello *paret* ut regi, As they who are sailing, when suddenly the sea begins to be in an uproar, implore the help of One, so our people obeys its magistrates as (it would) a king. Cic. Rep. 1, 40.

Rem. 43. If two predicates, both belonging to a time conceived as present to the SPEAKER, are so connected that their several times are different as to EACH OTHER, the Latin language places that predicate which designates the earlier action in the PERFECT TENSE, while the English language, generally, in this instance uses the PRESENT, as:

Si aut privatus aut populus Druidum decreto non *stetit*, sacrificiis *interdicunt*, if either a private person or the people does not obey (literally 'has not obeyed') the decree of the Druids, they exclude them from the sacrifices (excommunicate them). Cæs. B. G. 6, 23.

1. Galli pro victimis<sup>4</sup> homines immolant<sup>5</sup>, inprimis eos qui in aliqua noxiâ<sup>6</sup> sunt comprehensi<sup>7</sup>. Sed cum ejus generis (hominum) copia *deficit*<sup>8</sup>, etiam ad innocentium supplicia<sup>9</sup> *descendunt*<sup>10</sup>. Cæs. B. G. 6, 16.—2. Gallorum magistratus quæ *visa sunt*<sup>11</sup> occultant<sup>12</sup>, quæque esse ex usu *judicaverunt* multitudinî *produnt*<sup>13</sup>. Ib. 6, 20.—3. Apud Germanos, ubi quis ex principibus se *dixit* ducem fore, *consurgunt*<sup>14</sup> ei qui et causam et hominem *probant*<sup>15</sup>. Ib. 6, 23.—4. Alces<sup>16</sup> cum se arboribus, a venatoribus per radices subruit<sup>17</sup>, quævis cau-â *reclinantur*<sup>18</sup>, infirmas arbores pondere *affligunt*<sup>19</sup> atque unâ ipse *concidunt*<sup>20</sup>. Ib. 6, 27.—5. Si ad luxuriam etiam libidinum intemperantia *accessit*, duplex malum *est*. Cic. Off. 1, 34.—6. Quocunque *adspexisti*, ut furie, sic tuæ tibi *occurrunt* injuriæ. Cic. Par. 2.

Obs. The perfect verbs *meminisse*, *odisse*, and *novisse* (§ 342) are used with the force of PRESENTS in all significations of this tense. With the same force are employed all verbs that in the present denote an incipient state (especially the inceptives), the perfects of which, designating the state of 'incipiency' as a past one, express the state itself as PRESENT. Here belong the verbs *assuescere* and *converscere*, to become accustomed (in the perfect *assuevisse*, to be accustomed); *cognoscere*, to ascertain (in the perfect *cognovisse*, to know); *adolescere*, to grow up (in the perfect *adolevisse*, to be adult, the same as *puberem esse*); *adamare*, to become fond (in the perfect *adamasse*, to love); *obtinere*, to acquire (in the perfect *obtinuisse*, to have acquired, i. e. to have, to hold). All such perfects are used in two significations, in that of a perfect, denoting the action with the ordinary preterite force, and in that of a present, denoting the state which has grown out of the action as a present one. They are, in this respect, analogous to those passives which in the perfect (periphrastic participle, § 506) denote a present state.

1. Druides a bello abesse *consueverunt*, neque tributa unâ cum reliquis pendunt<sup>21</sup>. Cæs. B. G. 6, 11.—2. Vesperascent<sup>22</sup>, et non *noctant* vitem. Ter. H. aut. 2, 4, 7.—3. Galli suos<sup>23</sup> liberos, nisi<sup>24</sup> cum *adoleverunt*, palam ad se adire non patiuntur. Cæs. B. G. 6, 18.—4. Vinces<sup>25</sup> tu expectationem hominum, si quantum<sup>26</sup> laudum *decorum adimunt*, et quibus artibus eæ laudes comparantur, in eis potissimum *laboraverunt*. Cic. Fam. 2, 4.

Rem. 44. Verbs of SAYING (the same as in English) are frequently placed in the present, if the act of saying is past as to the time of the speaker. This is the case 1) if the speaker *quotes* or *mentions* the words of another

<sup>1</sup> more dangerously.—<sup>2</sup> to fall sick.—<sup>3</sup> one of the constructions noticed § 552, obs. 1.: the result of their cure is oftener fatal.—<sup>4</sup> Instead of the ordinary victims (i. e. animals).—<sup>5</sup> to sacrifice.—<sup>6</sup> offence.—<sup>7</sup> to catch, to arrest.—<sup>8</sup> copia *deficit*, there is a deficiency in.—<sup>9</sup> tormenting.—<sup>10</sup> to proceed.—<sup>11</sup> *videri* (supply bona), to seem proper (to them).—<sup>12</sup> to conceal.—<sup>13</sup> to impart.—<sup>14</sup> to arise.—<sup>15</sup> to approve.—<sup>16</sup> elks.—<sup>17</sup> cut by the roots.—<sup>18</sup> to lean on.—<sup>19</sup> to break, to upset.—<sup>20</sup> to fall to the ground.—<sup>21</sup> to pay.—<sup>22</sup> it is growing dark.—<sup>23</sup> suos is used here pregnantly; *sui liberi* being technically called the children in paternal power.—<sup>24</sup> except.—<sup>25</sup> to surpass.—<sup>26</sup> In translating, the antecedent *in eis* (with *laudibus* understood) must be placed before *quarum*.—<sup>27</sup> to give one's principal attention to.

in order to answer them, or to comment on them; 2) if passages from AUTHORS are quoted.

Obs. 1. If the speaker mentions the words of another, in order to accompany them with his own remarks, the verbs of saying by which the remarks of the other are introduced, may be placed in the present or in the perfect, and it makes here no difference whether the time of the utterance of such remarks is recent or not, as: *Negat* Fabius aditum esse classibus nostris in Africam; *negat* illos portus patere; M. Atilium captum in Africâ *commemorat*; Fabius *says* that our fleets have no access to Africa; he *denies* that any ports are open; he *mentions* that M. Atilius was made a prisoner in Africa. Liv. 28, 43. Here Scipio answers a speech just made by Fabius. In the same answer he places the verbs of saying, referring to his predecessor's remarks, promiscuously in the present or perfect: Fabius principio orationis *commemoravit*, in sententiâ suâ posse obrectationem suspectam esse, Fabius, in the beginning of his speech *has mentioned* that his statements might create the suspicion of disparagement. Liv. 28, 43.—Phalærens Demetrius Periclem *vituperat* qui tantam pecuniam in Propylæa *conjecerat*, Demetrius Phalærens *censures* (censured) Pericles for having sunk so much money in the Propylæa. Cic. Off. 2, 17. In this passage Cicero uses a present tense in respect to remarks which were uttered more than 200 years before. He represents these words as PRESENT to him, because he is going to refute the strictures of Demetrius, as if Demetrius were himself present.

Obs. 2. If passages from authors are quoted, not only the verbs of saying, but also the verbs denoting the doings of persons introduced by the author are placed in the present tense. For the use of the IMPERFECT in quotations, see Rem. 70.

1. Cyrus apud Xenophontem *negat* se unquam sensitisse senectutem suam imbecillitorem factam. Cic. Sen. 9, 30.—2. Divine Plato *escam*<sup>1</sup> malorum<sup>2</sup> *appellat* voluptatem. Ib. 13, 44.—3. Ea quæ utenda acceperis, majore mensurâ<sup>3</sup> *jubet* reddere Hesiodus. Cic. Off. 15, 18.—4. Chrysippus *disputat*<sup>4</sup>, æthera<sup>5</sup> esse Jovem. Cic. N. D. 1, 15.—5. Ecce tibi<sup>6</sup> ex alterâ parte<sup>7</sup> ab eodem poëtâ: Ex opibus<sup>8</sup> summis opis<sup>9</sup> *egens*<sup>10</sup>, Hector, tuæ. Huic subvenire debemus, *querit* enim auxilium. Cic. Tusc. 3, 19, 44.

Rem. 45. Frequently the PRESENT TENSE is used with the force of a PERFECT in stating the facts of a NARRATIVE. This present is called 'the HISTORICAL PRESENT'.

Cæsar Minucium cum omni equitatu *præmittit*: *monet* ut ignis in castris fieri prohibeat, ne qua ejus adventus procul significatio fiat; sese confestim subsequi *dicit*. Minucius ut imperatum est *facit*: Cæsar sent Minucius in advance with all the cavalry; he *admonished* him to forbid the use of fire in the camp, lest any intimation of his arrival might be given from a distance; he *said* he would follow immediately. Minucius did as directed. Cæs. B. G. 6, 29.

Obs. 1. The use of the historical present is not confined to 'animated and picturesque narrative', as a grammarians state, but is solely employed for the sake of varying the form of the predicates, to avoid monotony. In the most commonplace passages we frequently find historical presents, and as frequently the most animated narratives of battles, etc., are related in perfects.

Obs. 2. For the use of the historical present with the force of an imperfect, see § 575.

Obs. 3. Subjunctive clauses dependent on historical presents, if subject to the law of consecution, generally take those tenses which an ordinary present would require, as: Plerumque novas sibi ex loco religiones *fungunt*, Cottæque et Titurii calamitatem, qui in eodem *castris* *erant* castello, ante oculos *ponunt*; barbari autem perrumpere *nituntur*, seque ipsi *hauriunt*, ne tantam fortunam ex manibus *dimittant*; Very many *conceive* strange superstitions, relating to that locality and *placed* before their eyes the disaster of Cotta and Titurius, who *had perished* in the same fort; but the barbarians *strive* to break through, and *elaborate* each other not to *let* such a fortunate accident *slip* out of their hands. Cæs. B. G. 6, 27.—Sometimes, however the dependent clauses take those tenses which would be required if their principal predicate were placed in the perfect, as: *Percontantur* Bituriges, ne pulcherrimam urbem suis manibus incendere *cogentur*, the Bituriges *percontate* themselves, in order not to be *compelled* to burn the most beautiful city with their own hands. Cæs. B. G. 7, 15.—Galli legatos ad Cæsarem *mittunt*, et ut *conservarentur* *impetrant*, The Gauls *send* delegates to Cæsar, and *obtain* (from him) their preservation (literally 'that they were preserved'). Cæs. B. G. 2, 12.

<sup>1</sup> The bait.—<sup>2</sup> of the wicked.—<sup>3</sup> measure.—<sup>4</sup> to assert.—<sup>5</sup> Greek accusative; Nom. æther, the ether.—<sup>6</sup> There is for you; 'here is'.—<sup>7</sup> a passage of the second part.—<sup>8</sup> § 444, R. 52.—<sup>9</sup> opes (plur.), riches.—<sup>10</sup> help.—<sup>11</sup> being in need of. The verse is spoken by Andromeda.

## II. PERFECT TENSE.

§ 568. The PERFECT TENSE is the general form for predicates expressing actions which have happened before the time of the speaker, except if special rules require an IMPERFECT or PLUPERFECT.

Obs. 1. The Latin imperfect and perfect, taken together, correspond to the English preterit and present-perfect (aside from minor differences, as Rem. 42), so that either of the two tenses in one language corresponds to the one or the other of the tenses in the other language. But the dividing line between the two Latin tenses is different from that between the English tenses.

**OBS. 2.** The rules given below for the use of the Latin perfect and imperfect refer only to their use in the INDICATIVE mood, and to their application in relation to EACH OTHER. Whenever the construction requires past tenses to be in the subjunctive, in the infinitive, participle, or in the pluperfect, the distinction between the two past tenses ceases to exist, so that the verbal forms mentioned are applied without any regard to the difference between imperfect and perfect in the indicative. Both sentences '*Pericles ceteris oratoribus præstibat*,' and '*Pericles ceteris oratoribus præstitit*' must have a perfect infinitive, if made dependent on '*dicit*' (*Socrates dicit Periclem præstitisse ceteris oratoribus*). Thus the imperfect indicative *cupiēbant* in Cic. Verr. 2. 2. 55 in the sentence directly following, according to the law of consecution, is changed into a perfect subjunctive (*Res declarabit, ut cupierint*).

§ 569. Predicates which represent an action as COMPLETED (perfect) at a past time assumed by the speaker, are placed in the PERFECT (*præteritum perfectum*), while predicates designated as NOT COMPLETED at such a time (as imperfect, i. e., as being without definable limits in regard to duration and end) are placed in the IMPERFECT (*præteritum imperfectum*)\*: *Eo quum veni, prætor quiescebat*; when I came there (completed at the time spoken of), the prætor WAS RESTING (not completed at the time spoken of). *Cic. Verr. 2, 4, 14.*

Obs. The ENGLISH perfect is used: 1) when past actions or their consequences and results are represented as lasting at the time of the speaker; 2) when actions past in the moment of speaking are represented as having happened during a period conceived as present to the speaker; 3) when no certain time can be assigned to past actions. The choice of the two past tenses in English is never determined by the completeness or incompleteness of the action, which distinction is either disregarded, or expressed by the FORM (progressive or common) of the tense. But in Latin the use of the TENSE depends on the conception of the action as COMPLETED or NOT COMPLETED, while the English distinctions between the two tenses are generally disregarded in Latin.

§ 570. The Latin perfect covers almost the whole ground of the English present-perfect, and a great part of that of the English preterit (past tense).

Obs. Most Latin grammarians divide the Latin perfect into a PRESENT OF LOGICAL perfect, and an HISTORICAL perfect. This division, on the standpoint of the Latin language, has no foundation. It is true that the English present-perfect must generally (not always) be rendered by the Latin perfect; but this is owing to very different reasons, the Latin perfect being never used because the action has a relation to the PRESENT time, but because the predicate is conceived as expressing an action perfect and complete at a PAST time (See Rem. 46 and 48). Hence, in Latin, a past tense cannot be used at all if the action is represented as still lasting at the speaker's time (R. 42). That the Latins always considered their perfect as a PAST tense, is evident from the fact that perfects which our grammarians consider as present-perfects, take their accompanying actions in the IMPERFECT, where we would use a present in English; and from the fact that subjunctives dependent on so-called present perfects are placed in the same tense as those

\* PRÆTERITUM IMPERFECTUM tempus nominatur in quo res aliqua cepit geri, necdum tamen est perfecta. PRÆTERITUM VERO PERFECTUM in quo res perfecta monstratur. *Triscian.* 8, 8, 39.

dependent on historical perfects (for exceptions see p. 427 foll.): *Effudi vobis omnia quæ sentiebam*, I have imparted to you all *I know* (these being the closing words of a speech, Cic. Or. 1. 34.—*Hanc unam, Cæsar, habeo injuriam tuam: effecisti ut viverem et morerer ingratus*, thou hast effected that I live and die an ungrateful man. Sen. Ben. 2. 25. To this must be added that the ancient Latin grammarians, while fully explaining the character of the different tenses, know nothing of these two natures of the perfect, which it is safe to say they would have mentioned if they had felt any such distinction.

*Item.* 46. If the predicate denotes an action the results or consequences of which are still existing at the speaker's time (§ 569, Obs.), it is placed in the PERFECT both in English and in Latin; but in English on account of the relation of the action to the present time, and in Latin because past actions with results present to the speaker must always be conceived as completed in regard to the action as such.

1. Etsi mihi nullus noxiæ<sup>1</sup> conscius<sup>2</sup> sum, tamen cum summo pudore<sup>3</sup> in conti-  
nem<sup>4</sup> vestram processi (*I have come, and am there now*). Liv. 3, 67.—2. Tota perit respub-  
lica atque est miserior quam reliquisti. Cic. Att. 2, 21, 1.—3. Hoc consilio illi Roscium  
vobis jugulandum<sup>5</sup> tradiderunt (*they have delivered, and he is now in your hands*). Cic.  
Rose. Am. 10, 29.—4. Omnium harum rerum iudicium ipse natura in auribus nostris  
collocavit (*has placed, and it is there now*). Ib. Or. 51, 174.—5. Sulpicii morte magnum  
presidium amissimus. Ib. Fam. 12, 5.—6. Fecerunt idem quod in nostra republica solent  
ei qui per largitionem<sup>6</sup> magistratus adepti sunt (i. e. tenent). Ib. Verr. 2, 2, 55.

Obs. 1. Here belong those verbs which in the perfect are rendered by the presents of English verbs denoting the results of the actions expressed by the Latin verbs, including the perfect verbs (*memini, odi, novi*), and many inceptives as *consuevi*, I have become accustomed, or I am accustomed (of *consuescere*); *exarui*, I have become dry, or I am dry (of *exarescere*); *conticui*, I have become silent, or I am silent (of *conticescere*), as: *Exustus flos veteris ubertatis exaruit*, the flower of my former fertility, being burnt, is withered. Cic. Brut. 4, 16.—*Jampridem conticuerunt tuæ litteræ*, thy letters have become mute (are mute, R. 42) long since. Ib. 5, 19.

Obs. 2. The perfect *perii* (I have perished, I am dead) frequently is used in the meaning of a present state, mostly occurring in exclamatory sentences, and is rendered 'I am lost, I am done with.' Similarly *vici* (*viciamus*) is used to denote a present or future favorable issue of a pending dispute or difficulty, being variously rendered according to its connection.

1. *Pa. Salva* sum. *Di. At ego perii*, quoi<sup>7</sup> medullam<sup>8</sup> lassitudo<sup>9</sup> peribit<sup>10</sup>. *Plaut. Stich.* 2, 3, 16.—2. *Si senserit*<sup>11</sup>, *perii*! *Ter. Andr.* 1, 3, 8.—3. *Bruto si esse in urbe tuto habebit*, *vicinus* (*our success is certain*). *Cic. Att.* 14, 20, 3.—4. *Unum signum*<sup>12</sup> ostende *emptum*<sup>13</sup> esse: *vicisti* (*I shall allow you the victory*). *Ib. Verr.* 2, 1, 23.—5. *Si eundem animum habueritis*, *vicinus*, milites! *Liv.* 21, 42.

Obs. 3. Since the perfect denotes the completion of an action at a former time, verbs denoting STATES, and sometimes other verbs, are often pregnantly used in the perfect, to designate the state as no longer existing at the speaker's time. Such perfects, which have the force of a present with a negation, are rendered either by English preterits with 'once,' or by English presents with 'no more,' 'no longer;' as: *Ego animum istum habui quem tu nunc habes, I once had that spirit which you now have.* Liv. 44, 35.—*Fuimus Troes, fuit Ilium, We are no longer Trojans, Ilium is no more.* Virg. *Æn.* 2, 325.—Often *quondam* is expressly added to perfects of this kind, as *Fuit hoc quondam proprium populi Romani longe a domo bellare, it was once a privilege of the Roman people to wage their wars far from home* implying that this is no longer the case. Cic. *Man.* 12.

If the construction requires a subjunctive according to the law of consecution, or an infinitive, this negative meaning of the perfect is sometimes applied to the perfect and pluperfect subjunctive, and to the perfect infinitive: *Fortasse maluit longe omnium non eisdem modo atavis sed eorum etiam qui fuissent* in iure civili esse principes, he perhaps preferred to be the foremost in civil law not only of all the contemporaries, but also of those who *were no more living* (literally; *who had been*). Cic. Brut. 41, 151.—*Præco dixisse* pronuntiat, the crier declared that *the pleading had an end* (literally: that they *had spoken*). Cic. Verr. 2, 2, 30.

1. Triste est nomen carendi<sup>14</sup> quia subicitur hæc vis<sup>15</sup> 'Habuit, non habet.' Cic. Tusc.

<sup>1</sup> Guilt. — <sup>2</sup> conscious. — <sup>3</sup> reluctance. — <sup>4</sup> meeting. — <sup>5</sup> to cut one's throat. — <sup>6</sup> bribery. — <sup>7</sup> archaic form of *cui*. — <sup>8</sup> marrow. — <sup>9</sup> faintness. — <sup>10</sup> to suck up. — <sup>11</sup> to perceive. — <sup>12</sup> statue. — <sup>13</sup> paid for. — <sup>14</sup> p. 154, R. 194, No. 4. — <sup>15</sup> it implies the meaning.

1, 36.—2. De Cæsare et Marcello audirem non minus lubenter<sup>1</sup> quam de eis (oratoribus) qui fuerunt<sup>2</sup>. Cic. Brut. 71, 248.—3. De exercitatione<sup>3</sup> et consuetudine dixi<sup>4</sup>, nunc de ratione<sup>5</sup> videamus. Ib. Tusc. 2, 18.—4. Fuit ista respublica quondam: fuit ista severitas in judiciis. Ib. Verr. 2, 5, 18.—5. Ea via est in cælum, et in cætum eorum qui viserunt, et illum incolunt locum. Ib. Rep. 6, 15.—6. Sustenta te<sup>6</sup>, mi Terentia, ut<sup>7</sup> potes honestissime! Viximus, floruimus<sup>8</sup>! Ib. Fam. 14, 4, 5.

Obs. 4. For past actions continuing at the time of the speaker, see p. 299.

Rem. 47. The English language employs the present-perfect if a period of time considered as present to the speaker (as *to-day*, *now*, etc.), is added to the predicate. If such period denotes a time past to the speaker (yesterday, last year, etc.) the preterit is used in English. But the Latin tense is never determined by such designations of time, the perfect being used both with *hodie* and *heri* or similar expressions, if the action is conceived as complete at the time spoken of, while otherwise the imperfect must be used, as:

Hoc nos ab istis facere inviti heri coacti sumus, yesterday we were, much against our will, compelled by them to do this. Cic. Or. 2, 4, 18. But: Itaque heri mirabar quid accidisset, I yesterday wondered what had been the matter (i. e. while a certain action was going on). Cic. Off. 3, 14, 59.—Satis multa a nobis hodie dicta sunt, enough has been said by us to-day. Cic. Or. 1, 62, 264. But: Eum hodie expectabam, I have been expecting him to-day (while some other action was occurring). Cic. Att. 9, 11, 1.

1. Decemviros intra decem hos annos et creavimus et e republica sustulimus. Liv. 4, 4.—2. Sic nunc ad Antonium Cæsaremque pervenimus<sup>9</sup>. Cic. Brut. 36, 138.—3. Ego nunquam mihi minus quam hesterno die<sup>10</sup> placui. Cic. Or. 2, 4, 15.—4. Crassus heri nobis pollicitus est jus civile<sup>11</sup> ad artem<sup>12</sup> redacturum<sup>13</sup>. Ib. 2, 33, 142.

Rem. 48. Predicates denoting actions to which no certain time can be assigned are placed in the PERFECT, the same as in English; the imperfect being excluded, because there is, in this instance, no time at which the action could be considered incomplete.

1. Quam multi exercitus quibus minus<sup>14</sup> prospera pugne fortuna fuit, eruptione<sup>15</sup> facta victorem<sup>16</sup> hostem pepulerunt<sup>17</sup>! Liv. 44, 39.—2. Ager quum multos annos quierit, uberiores effert<sup>18</sup> fructus solet. Cic. Brut. 4, 16.—3. Apud ceteros philosophos, qui quæsit<sup>19</sup> aliquid, tacet. Ib. Fin. 2, 1.—4. Mane salutamus<sup>20</sup> domi bonos viros multos; ubi<sup>21</sup> salutatio<sup>22</sup> defluxit<sup>23</sup>, litteris me involvo<sup>24</sup>. Ib. Fam. 9, 20.—5. Hunc in pauperem putas, an dis immortalibus similem qui se fortunis omnibus exiit<sup>25</sup>? Sen. Tranq. 8.—6. Certamina factionum<sup>26</sup> fuerunt eruntque pluribus populis magis exitio<sup>27</sup> quam bella externa. Liv. 4, 9.

§ 571. The Latin perfect has the force of the English PRETERIT (past tense) whenever the action is conceived as having been completed at the time spoken of (§ 569). Hence the perfect is the regular tense 1) to express the facts of a narrative (HISTORICAL PERFECT OR AORIST); 2) to designate detached past actions to which an author refers in argumentative style (Ex. 2-4). The instances in which such actions are conceived as non-complete, and are placed in the imperfect, are specified § 572 foll.

1. Perseus ingressus est castra (consulis) nullo suorum comite. Consurrexit<sup>28</sup> consul, progressusque paullum introeunt<sup>29</sup> regi dextram porrexit<sup>30</sup>, summittentemque se<sup>31</sup> ad pedes sustulit; introductum in tabernaculum<sup>32</sup> considerat<sup>33</sup> jussit. Liv. 45, 7.—2. Cato

<sup>1</sup> With no less pleasure.—<sup>2</sup> who are deceased, are no more living.—<sup>3</sup> as to exercise.—<sup>4</sup> I am done with it.—<sup>5</sup> method.—<sup>6</sup> keep up thy spirits.—<sup>7</sup> instead of *quam*.—<sup>8</sup> our life, our happiness are gone.—<sup>9</sup> i. e. in the treatise.—<sup>10</sup> the same as *heri*.—<sup>11</sup> civil law.—<sup>12</sup> science.—<sup>13</sup> to reduce.—<sup>14</sup> minus prospera, unfavorable.—<sup>15</sup> a sortie.—<sup>16</sup> victorious.—<sup>17</sup> to rout.—<sup>18</sup> to bear.—<sup>19</sup> to receive.—<sup>20</sup> as soon as.—<sup>21</sup> reception.—<sup>22</sup> to cease.—<sup>23</sup> I bury myself in my books.—<sup>24</sup> to divest.—<sup>25</sup> faction, party.—<sup>26</sup> ruin.—<sup>27</sup> to rise.—<sup>28</sup> to enter.—<sup>29</sup> to tender.—<sup>30</sup> *se ad pedes summittere*, to fall on one's knees.—<sup>31</sup> tent.—<sup>32</sup> to take a seat.

rudi sæculo litteras Græcas didicit. Quint. 12, 11, 23.—3. Hoc verum est, dixit enim Lutatius. Cic. Or. 2, 40, 173.—4. Hæc statua est et fuit tota Græciæ summo honore. Ib. Verr. 2, 2, 85.

Obs. In the historical perfects of passives and deponents the auxiliary *esse* is frequently dropped.

1. Thraces<sup>1</sup> domos<sup>2</sup> dilapsi<sup>3</sup>, Cretenses<sup>4</sup> spem pecuniæ secuti<sup>5</sup> (i. e. sunt). Liv. 44, 45.—2. His auditis clamor cum ingenti plausu<sup>6</sup> ortus<sup>7</sup> (i. e. est). Ib. 45, 1.—3. Postero die senatus in curiâ habitus<sup>8</sup> (i. e. est), supplicationesque<sup>9</sup> decretæ (i. e. sunt). Ib. 45, 2.

§ 572. Poets and later prose writers, in imitation of the Greek aorist, sometimes use the perfect to designate habits referring to all times, intimating by the use of that tense a past (complete) experience on which the assertion is founded.

Such perfects are rendered by English presents, or by the use of the auxiliary '*will*': Non æris acervus et auri ægrôto domini deduxit corpore febris, no pile of money and gold will take diseases from the body of the sick owner. Hor. Epist. 1, 2, 48.—Rege incolunt mens omnibus una est; amisso rupere fidem constructaque mella diripere ipsæ; as long as the queen remains, all (bees) have one mind; whenever she is lost, they will break faith, and destroy themselves the cells constructed (by them). Virg. Geo. 4, 212.—Multa quam supervacua essent non intelleximus nisi quum deesse cœperunt. The superfluity of many things we will not comprehend except when they begin to be wanting. Sen. Ep. 123.—In the first example the perfect *deduxit* may also be explained by understanding the adverb *unquam* (has ever taken). In this way the perfect already occurs in Sallust: Avaritia pecuniæ studium habet, quam nemo sapiens concupivit, which no wise man has ever coveted (will covet). Sall. Cat. 11, 3. With *multi* as subject, a similar usage of the predicate occurs already in Cicero: Multi quum obesse vellent, profuerunt, et quum prodesse, obfuerunt, many have done good (will do good) when they meant to do harm, and have done harm (will do harm) when they meant to do good. Cic. N. D. 3, 28, 70.

### III. IMPERFECT TENSE.

#### A. GENERAL REQUIREMENTS OF THE IMPERFECT.

§ 573. The Imperfect represents the predicate as NOT COMPLETED at a past time assumed by the speaker: Cæsar hostis prosequi vetuit quod loci naturam ignorabat, C. forbade to pursue the enemy because he did not know (was unacquainted with) the locality. Cæs. B. G. 5, 9. Here the predicate *ignorabat* is represented as not completed and going on at the time assumed by the author, i. e. at the time when the prohibitory order was given.

Obs. An action is called incomplete, in a grammatical sense of the word, as long as it is not finished. If an action is represented as incomplete at the SPEAKER'S time the Latin language always employs the PRESENT TENSE, whether the action has begun at a past time (see R. 12), or at the speaker's time. Incomplete actions of this kind are not distinguished, as in English, by their grammatical form, from complete actions, as: *Hirtius habebat cum Balbo*, Hirtius is living with Balbus. Cic. Att. 14, 20.—*Nescis quam dulem*, you do not know how I am suffering. Ter. Heaut. 5, 1, 61. But in regard to PAST predicates, a distinction is made in grammatical form between actions complete and incomplete at that time, the latter being placed in the IMPERFECT, but the former in the PERFECT (or historical present, see R. 45).

Rem. 49. Whether a past action is to be considered as complete or incomplete in the grammatical sense of the word, depends 1) on the nature of the action itself (§ 574); 2) on the time which the speaker assumes in connection with it (§ 575).

<sup>1</sup> The Thracians.—<sup>2</sup> instead of *in domos suas*, to their homes.—<sup>3</sup> to disperse.—<sup>4</sup> the Cretans.—<sup>5</sup> applause.—<sup>6</sup> to hold.—<sup>7</sup> thanksgivings.

Obs. 1. The author, in introducing past actions, transfers himself in idea to a past time. On the stand-point in regard to time thus assumed by the author, depends the use of the tense. This stand-point of the author may be a double one. In the first place, he may identify the time with the action introduced, so that the predicate determines its own time, which may be changed with every subsequent predicate. In this instance the author dwells on the action as long as it lasted. The time viewed from this stand-point is called 'TIME ABSOLUTE', and the action is said to be 'complete *per se*'. Such predicates are (or, at least, ought to be), always in the PERFECT, as the perfect in the example § 571. No. 1, and most of the perfects in the examples belonging to § 570, and § 571. Very rarely predicates denoting such actions are found in the IMPERFECT; but they must be considered as solecisms, as: Vicesimum ab Carano, qui primus regnabat (faulty, instead of regnavit). Persea numerabant, they reckoned Perseus as the twentieth (king of Macedonia) from Caranus, who reigned first (was the first king), Liv. 45. 9. In Cicero, Caesar, and Sallust, improper imperfects of this kind are not found.

Obs. 2. The other way of determining the time of actions is by connecting them with a past time, which the author has introduced aside from the action itself. The time thus assigned to the action is termed 'TIME RELATIVE'. The predicate, in this instance, is placed in the IMPERFECT if the action is conceived as incomplete (§ 574), but in the PERFECT if it is represented as finished (complete) at the time assumed by the author. It makes here no difference, whether the action is of a longer or shorter duration. If the action is conceived as finished at the time given by the author, he dwells in his mind on the action during its whole extent, the same as in 'time absolute', and the predicate is placed in the PERFECT; Helvetii eā totā nocte ierunt, the Helvetians marched (continued their march) during that whole night. Cæs. B. G. 1, 26. Here, by the perfect ierunt, the act of marching, although a continued action, is represented as complete at the given time (eā totā nocte).—Mansit Silvius omnibus cognomen qui Albæ regnavērunt, the name 'Silvii' remained with all who ruled at Alba. Liv. 1, 3. The time (relative) of the action 'mansit' is implied in 'Albæ regnavērunt'; the predicate mansit, represented as lasting at that time, is in the perfect because the fact came to an end at the close of the period, and hence is conceived as complete at that time.—Superavit postea Cinna cum Mario; tum, clarissimis viris interfectis, lumina civitatis extincta sunt, at that time, by the murder of the most prominent men, the lights of the state were extinguished. Cic. Cat. 3, 10.—Hannibal, dum murum incautus subit, tragulā ictus cecidit. Liv. 21, 7. Here the time of the predicate cecidit is determined by the time of another action (dum subit); being complete at that time, the predicate must be placed in the PERFECT.

§ 574. Verbs in the imperfect denote either (a) a STATE existing at a given time (R. 50), or (b) an ACTION IN PROGRESS at the time (imperfects of CONTINUED ACTION, or of PROGRESSIVE ACTION, R. 51), or (c) AN ACTION REPEATED (imperfects of REPEATED ACTION, R. 54).

Obs. Imperfects denoting acts of the MIND, as existimāre, timēre, scire, etc., may belong to any of the above three classes; but imperfects of this kind, on account of several features peculiar to them, are treated as a separate class of imperfects, being termed 'IMPERFECTS OF INNER ACTION'. (§ 582.)

Rem. 50. Predicates denoting STATES are grammatically considered as not completed or unfinished as long as the state is existing. Hence such predicates are placed in the IMPERFECT if the state is represented to have been in existence at and beyond a time mentioned by the author. Here belong the verb *esse*, either as a copula, or with a periphrastic participle (§ 506), or in the meaning 'to exist'; *manēre*; *imminēre*; *servire*, to be a slave; *patere*, to be open, to extend; *distare* and *abesse*, to be distant; *florere*, to flourish, and all verbs used to describe things, localities, and persons:

Simul in silvam ventum est ubi plures diversæ semitæ erant, at the same time they came to a forest, where there were (existed) several paths in different directions (i. e. at and beyond the time of the coming). Liv. 44, 43.—Cæsar hunc locum probārat quod superioris anni munitiones integræ manebant, because last year's fortifications still remained unhurt (were still in good order at that time). Cæs. B. G. 6, 32.—Cæsar turris constitutæ cepit, nam circumvallare loci naturā prohibebat, for the nature of the locality did not allow to enclose (the town) with a wall. Cæs. B. G. 7, 17. See Ex. 1-5.

Obs. 1. Imperfects of this kind are generally rendered by the English common form of the preterit, only 'transient states' admitting of the progressive form.

Obs. 2. Predicates expressing states existing at the time spoken of, are frequently placed in the PERFECT, in order to imply that the state ceased to exist (was 'completed') at a later time. The author dwells then in idea on the whole time the state was in existence, representing it by the perfect tense, as finished at that time. This perfect passes over into the negative perfect considered. R. 46, obs. 3.—Via Nomentanā, cui tum Ficulensi nomen fuit, profecti sunt, they departed by the Nomentum road, which was then called Ficulensis. Liv. 3, 52.—Civitas ea (Saguntum) longe opulentissima fuit ultra Ibērum, that city was (at the time before Hannibal's siege) by far the wealthiest beyond the Iber. Liv. 21, 7 (this condition of the city having ended by its destruction). See Ex. 6, 7.

Obs. 3. A predicate denoting a state no more existing at the time spoken of, is generally placed in the PLUPERFECT. Sometimes, however, such predicates are found in the PERFECT (never in the imperfect, if the action denotes a state), as: Huc ex illā domo prætorīā, quæ regis Hieronis fuit, emigrabat, to this place he (Verres) would move from that prætorian palace which had been king Hiero's. Cic. Verr. 2, 5, 12. The imperfect erat would represent the palace as belonging to Hiero at that time, who was then dead long since.

1. Erant omnino itinera duo quibus Helvetii domo exire possent: unum per Sequanos, angustum et difficile: mons autem altissimus impendebat<sup>1</sup>. Cæs. B. G. 1, 6.—2. Helvetiorum fines in longitudinem millia passuum CCXL<sup>2</sup> atebant<sup>3</sup>. Ib. 1, 2.—3. Plus apud me eorum auctoritas valet<sup>4</sup> qui Magnam Græciam, quæ nunc quidem delēta est, tum<sup>5</sup> florēbat, præceptis<sup>6</sup> suis erudiērunt. Cic. Am. 4, 13.—4. Faciebat<sup>6</sup> cum pupillā<sup>7</sup> consuetudo<sup>8</sup> juris ejus quod erat<sup>9</sup> tum quum Asellus est mortuus. Cic. Verr. 2, 1, 41.—5. Crebris<sup>9</sup> arboribus succis<sup>10</sup> omnes introitus<sup>11</sup> erant præclusi<sup>12</sup>. Cæs. B. G. 5, 9.—6. Ager Tarquiniorum<sup>13</sup> qui inter urbem et Tiberim fuit, consecratus Marti est. Liv. 2, 5.—7. Hanc modestiam<sup>14</sup> ubi nunc in uno inveneris quæ tum populi universi fuit? Liv. 4, 6.

Rem. 51. Predicates denoting the PERFORMANCE of an action are considered as incomplete while the performing of the act is in progress. They are placed in the imperfect if the action was in progress at the time assumed by the author (R. 49, Obs. 2). In English, predicates of this kind are generally expressed by the PROGRESSIVE form of the preterit, except in the instances mentioned Obs. 1.: In eā civitatē duo de principatū inter se contendebant, in that city two men were struggling with each other for the highest power (at the time of Cæsar's arrival). Cæs. B. G. 5, 3.—Crescebat interim urbs, meanwhile the city was growing (i. e. while Romulus established its institutions). Liv. 1, 8. See Ex. 1-3.

Obs. In the following instances imperfects of actions in progress are in English expressed by the common form of the preterit:

1) Generally in the passive voice: Dum ea Romāni parant jam Saguntum oppugnabatur, While the Romans were preparing these things, Saguntum was already besieged. Liv. 21, 7. See Ex. 4, 5. The progressive form in the passive is used only if the common form would mean an accomplished fact (p. 127, R. 133), as: Regni certamine ambigebant fratres; major minore ab fratre pellebatur, The brothers were engaged in a combat for the throne; the older brother was being driven out by the younger. Liv. 21, 31. (Ex. 6.)

2) If the Latin verb, denoting an action in progress, is expressed by the English copula with a predicate-noun or adjective, as: Exierat cum Crasso L. Cotta, qui tum tribunatum petebat, who was then a candidate for the tribuneship. Cic. Or. 1, 7, 25. (Ex. 7.)

3) Generally predicates denoting acts of the mind, as: Rex quartā vigiliā proffugit: petebat Amphipolim, he intended to reach Amphipolis. Liv. 44, 43.—Responsum anceps datum (est) quia fatēri pigebat in potestate suā Latīnos jam non esse, because they disliked (were loath) to own that the Latins were no more under their control. Liv. 8, 2. (Ex. 8-10.)

<sup>1</sup> Hung over (the road), controlled the road.—<sup>2</sup> i. e. at the time of the emigration projected by the Helvetians.—<sup>3</sup> plus . . . valet, weighs more.—<sup>4</sup> supply 'but'.—<sup>5</sup> teaching.—<sup>6</sup> was in favor of.—<sup>7</sup> his ward.—<sup>8</sup> practice.—<sup>9</sup> in many places, (in large numbers). See p. 247, R. 20.—<sup>10</sup> succidere, to cut, to fell.—<sup>11</sup> approach.—<sup>12</sup> precluded.—<sup>13</sup> belonging to the Tarquinii.—<sup>14</sup> moderation.

4) When predicates denoting the performance of an action are applied to 'states', as: Tum Brundisium terrā petere contendī, nam maritimos cursus *præcūtabat* hiemis magnitudo, for the severity of winter *excused* a passage by sea. Cic. Planc. 40, 96 (Ex. 11).

5) In the instances of pregnant imperfects mentioned R. 52.

On the other hand the English progressive form of the preterit is sometimes used when the Latin must use a PERFECT. See the Ex. to Rem. 60 and Rem. 61.

1. Caesar Tarracōnem paucis diebus pervenit. Ibi totius fere ceterioris<sup>1</sup> provinciae legationes Caesaris adventum *expectabant*. Cic. B. C. 2, 21. — 2. Dum haec Caesar geruntur, Treviri Labienum adorti *parabant*. Ib. B. C. 6, 7. — 3. Massinenses quum Caesar advēnit, muros, portas, clas-ses *reficiunt*. Ib. B. C. 1, 31. — 4. Inter hac vis omnis belli versa<sup>2</sup> in Capuam erat: *obsidebatur*<sup>3</sup> tamen aeris<sup>4</sup> quam *appugnabatur*. Liv. 26, 4. — 5. Cuspites flumen Rhenum transierunt. Causa transeundi fuit quod ab Suevis bello *premebantur*<sup>5</sup>, et agriculturā *prohibebatur*. Cic. B. C. 4, 1. — 6. Relictis<sup>6</sup> ab his *circumveniebantur*<sup>7</sup> et *interficiuntur* ab nostris. Luc. tota Vari conversa<sup>8</sup> acies est. Ib. B. C. 2, 34. — 7. Antea quidem *subiunguntur*<sup>9</sup> brevitate<sup>10</sup> tuarum litterarum: nunc mihi loquax<sup>11</sup> esse videor. Cic. Fam. 11, 24, 1. — 8. Quum de litteris L. Marci referretur<sup>12</sup>, titulus<sup>13</sup> honoris (a Marcio assumptus) magnam partem hominum *offendebat*<sup>14</sup>. Liv. 26, 2. — 9. Caesar quod tantum civitati *adque dignitatis tribuebat*<sup>15</sup>, coercendum quibuscunque<sup>16</sup> rebus posse: Dumnorigem *statabat*. Cic. B. C. 5, 7. — 10. Multitudo *hincbat* quidem hostem, sed magis iter immensum Alpi-que *indebat*. Liv. 21, 29. — 11. Ibi castra posuit. Quae res et latus<sup>17</sup> unum castrorum ripis fluminis *monstrabat*, et post eum (Caesarem) quae essent<sup>18</sup>, tuta ab hostibus *reddebat*<sup>19</sup>. Cic. B. C. 2, 5.

Rem. 52. Imperfects of continued action (R. 51), are frequently used with PREGNANT force, so that the action expressed by the verb, although it is a complete one, pregnantly includes an imperfect of a state existing or of progressive action by implication; as: Caesar Crassum Samarobri-vae praeficit, legionemque attribuit, quod ibi impedimenta exercitus *relinquebat*, Caesar appointed Crassus commander of Samarobri-va, and gave him a legion, because he *left* there the baggage of the army (*i. e.* quod ibi, quum decederet, impedimenta *erant*). Cic. B. C. 5, 47. See Ex. 1, 2.

Obs. Imperfects of this kind are frequently used, when actions already spoken of in a previous passage are again mentioned with regard to their inner force and bearing, for instance with a view to their motives, causes, or manner of performance. Such predicates are significantly placed in the imperfect, because they pregnantly include an inner STATE (*causa, modus, etc.*) by implication (See R. 70, obs. 4). They most frequently occur in sentences introduced by *cur, quamobrem*, or similar adverbial objects, so that the inner state is expressed by the object, but is transferred from this to the PREDICATE by 'enallage': Cur igitur ad senatum *proficiscēbatur* Regulus? Why, then, *did* Regulus *depart* to the Senate? Cic. Off. 3, 10, 110. This sentence may be thus paraphrased: *Quid cogitabat* Regulus quum *cur erat causa quod* ad Senatum *proficiscens* est? See Ex. 3, 9. — For the pregnant use of verbs of SAYING in the imperfect with reference to an inner state of the mind, see R. 70.

1. Caesar navibus veritus<sup>1</sup> non est, quod deligatus<sup>2</sup> ad ancoram<sup>3</sup> *relinquēbatur*. Cic. B. C. 5, 9. — 2. Sedēbat<sup>4</sup> Clodius exanimatus<sup>5</sup> (in theatro), et cantorum<sup>6</sup> vocibus *replebatur*. Cic. Sest. 55, 118. — 3. Imperator Verres Agrinensibus ut Apronio lucrum *dent*<sup>7</sup>. Quare putabas emptori lucrum addi oportere? Esto, putabas! Quare *imperabatur*<sup>8</sup> ut adderent? Ib. Verr. 2, 3, 30. — 4. Si mentiēbatur Apronius, quamobrem *removebatur*<sup>9</sup> tabulas<sup>10</sup>? Ib. 2, 3, 47. — 5. Quamobrem quum cetera nomina<sup>11</sup> in ordinem referēbas<sup>12</sup> hoc nomen triennio amplius in adversariis<sup>13</sup> *relinquēbas*<sup>14</sup>? Nolēbas sciri, debere tibi

<sup>1</sup> Hither. — <sup>2</sup> *vertere*, to turn. — <sup>3</sup> to invest. — <sup>4</sup> zealous. — <sup>5</sup> to press. — <sup>6</sup> § 256. — <sup>7</sup> to surround. — <sup>8</sup> *convellere*, to direct. — <sup>9</sup> to be somewhat provoked at. — <sup>10</sup> garrulous. — <sup>11</sup> *re-ferre*, to make a report. — <sup>12</sup> to give offence. — <sup>13</sup> *dignitatem tribuere*, to pay respect. — <sup>14</sup> by every possible means. — <sup>15</sup> side. — <sup>16</sup> construe *ea quae postea essent*, the things (localities) which were behind him. *i. e.* his rear. — <sup>17</sup> to render. — <sup>18</sup> feared for the safety of the ships. P. 90, R. 47. — <sup>19</sup> to tie. — <sup>20</sup> anchor. — <sup>21</sup> at a particular time stated in a previous sentence. — <sup>22</sup> more dead than alive. — <sup>23</sup> singer. — <sup>24</sup> *i. e.* and the players *were singing* (*cantabant*), so that he was compelled to leave (he was sung out of the theatre). — <sup>25</sup> to allow a profit. — <sup>26</sup> *i. e.* quae erat causa quod imperatores. — <sup>27</sup> *i. e.* quae erat causa quod removebatur (put out of the way). — <sup>28</sup> account-books. — <sup>29</sup> *nomen*, an item in the account-books. — <sup>30</sup> to enter (on the books). — <sup>31</sup> *adversaria*, pl. t., a memorandum-book. — <sup>32</sup> *i. e.* quae erat causa cur relinqueres.

Roscium. Cur *scribēbas*? Ib. Rosc. Com. 3. — 6. Socium<sup>1</sup> tibi in eis bonis<sup>2</sup> edidisti<sup>3</sup> Quinctium. Cum eo tu voluntariam societatem<sup>4</sup> *coibas*<sup>5</sup> qui te in hereditaria socie-tate<sup>6</sup> fraudarat? Ib. Quinct. 21, 76. — 7. Quum igitur eos vinceret quos secum habēbat, te solutum<sup>7</sup> Romam *mittebat*<sup>8</sup>? Ib. Dej. 7, 22. — 8. Hoc igitur per gallinas Jupi-ter tantae civitati signum<sup>9</sup> *dabat*<sup>10</sup>? Ib. Div. 2, 6, 56. — 9. Eomodo inter se duo imperatores, summi viri, *certabant*<sup>11</sup>, ipsi pares, ceterum opibus disparibus. Sall. Jug. 52.

Rem. 53. Frequently actions are treated as incomplete, the verbs being placed in the imperfect, 1) to intimate that the action was not carried out, but remained an UNACCOMPLISHED OR UNSUCCESSFUL ATTEMPT (Obs. 1); 2) to represent the doer as having been ON THE POINT of performing the action (Obs. 2).

Obs. 1. Imperfects of unaccomplished attempt are used: 1) Of actions commenced, but remaining unfinished. Such imperfects are rendered either by 'endeavored to,' or by the progressive form of the verb, as: Quod evelli primi hastati signum non potuit, timide fortasse signifer *evellēbat* quod fidenter infixerat. As to the fact that the standard of the first 'hastatus' could not be taken out of the ground, the standard bearer perhaps *endeavored* without confidence to *tear out* (was perhaps tearing out with timidity) what he had inserted with assurance. Cic. Div. 2, 31, 67 (Ex. 1, 2). 2) Of actions which, as such, were finished and completed, but without the expected results, for instance orders not executed, or appointments not kept; as: Ibi Claudius manum injecit, sequique *ee judēbat*. Then Claudius laid hands on her and *ordered* her to follow him. Liv. 3, 44 (the connection showing that she did *not* follow him). Ex. 3, 4. Thus such imperfects are used of motions in debates (expressed by verbs expressing the object of the motion), which were not adopted, or laid over to another time, the matter remaining in statu quo for the time being, as: Ex hac ego lege omnia illa *tollebam*, quae ad privatorum incommodum pertinebant; Sullanorum possessiones *confirmabam*; sed hac tota res, interpellata bello, refrexit. From this law I *proposed* to take out all that pertained to the disadvantage of private persons; I *was willing to confirm* the titles of Sulla's partisans; but the whole affair, interrupted by the war, came to nought. Cic. Att. 1, 19, 4. — A Kal. Febr. legationes in Idus Febr. *rejiebantur*, the question about the legations *was laid over* from the first of February to the Ides. Cic. Qu. Fr. 2, 3, 1. In the same way the imperfects *civitatem dabat*, *relēbat*, etc., in Ex. 5, denote that Gracchus unsuccessfully proposed laws to give the citizenship, to forbid, etc.

Obs. 2. The imperfect denoting that the doer was on the point of performing the action, agrees in its general meaning with the imperfect of the periphrastic future (p. 132, R. 144), but it represents the execution of the design as directly impending, while the imperfect of the periphrastic future represents the action merely as contemplated without any regard to immediate execution. Such imperfects of the verb itself can only be used if it is made clear by the connection that the author could not mean the performance of the action as such, as: A. D. VI. Id. Maj. quum has dabam litteras, ex Pompejano *proficiscēbar*. On the 10th of May I *was on the point of departing* from the Pompejanum when I was writing this letter. Cic. Att. 5, 2, 1. Here the meaning of the imperfect could not be mistaken since the letter was not likely written on the road. But: Marcellus templum quod *aedificāturus erat* (not *aedificābat*) eis rebus ornare quas ceperat, noluit. Verr. 2, 4, 55. Here *aedificābat* would mean the building of the temple actually performed. This kind of imperfect is also used with the force of the hypothetical imperfect of the periphrastic future (p. 232, R. 144). See p. 730, 1 (Ex. 6-11).

1. Henna<sup>1</sup> tu simulacrum<sup>2</sup> Cereris tollere *audēbas*<sup>3</sup>? Henna tu de manu Cereris Victoriam<sup>4</sup> eripere *conatus es*? Cic. Verr. 2, 4, 50. — 2. Ad ea Crispinus (dixit), nec sibi nec illi hostis deesse in quibus virtutem ostendant<sup>5</sup>, conversusque<sup>6</sup> *abibat*<sup>7</sup>. Liv. 25, 18. — 3. Vocare tribus extemplo populus *judebat*; ille tamen dies intercessionē<sup>8</sup> est subligatus<sup>9</sup>. Ib. 10, 9. — 4. Misericordiae nostrae tribuas<sup>10</sup> quod a Vibone, quo te *arcescebamus*<sup>11</sup>, subito discesimus. Cic. Att. 3, 4. — 5. C. Gracchus *dabat*<sup>12</sup> civitatem<sup>13</sup> omnibus Italiis, *extendēbat* eam paene usque ad Alpes; *dividebat* agros; *vetābat* quemquam civium

<sup>1</sup> Partner. — <sup>2</sup> property. — <sup>3</sup> to declare (by public entry). — <sup>4</sup> partnership. — <sup>5</sup> to enter, Paraphrase: Quae erat mens tua quum cofres? — <sup>6</sup> joint heirship — <sup>7</sup> to defraud. — <sup>8</sup> free, at large. — <sup>9</sup> *i. e.* quae erat mens tua quum mitteres? — <sup>10</sup> warning. — <sup>11</sup> *i. e.* num erat (esse poterat) Jovis consilium ut daret? — <sup>12</sup> to contend; *i. e.* hic erat modus quo certabant. — <sup>13</sup> from Henna, a Sicilian town. — <sup>14</sup> image. — <sup>15</sup> the connection shows that this attempt was unsuccessful, while the attempt designated by *conatus es* in the next verse was carried out. — <sup>16</sup> a Victoria (statue of). — <sup>17</sup> inst. of *ostendere possent*. — <sup>18</sup> instead of *se converterit et abibat*. — <sup>19</sup> The connection shows that Crispinus did not leave the place. — <sup>20</sup> intercession of the tribunes. — <sup>21</sup> to frustrate. — <sup>22</sup> to attribute. — <sup>23</sup> he summoned Atticus, but did not keep the appointment. — <sup>24</sup> proposed to give. — <sup>25</sup> right of citizenship.

plus quingentis iugeris<sup>1</sup> habere: iudicia transferēbat ad equites. Vellej. 2, 6.—6. Philotimi literis lectis mutavi consilium de mulieribus, quas, ut scripseram, ad te Romam remittēbam<sup>2</sup>. Cic. Att. 7, 23, 2.—7. Tunc esset<sup>3</sup> hoc animadvertendum<sup>4</sup> quum classis Syracensis proficiscebatur<sup>5</sup>. Ib. Verr. 2, 5, 43.—8. Nam tum quum ex urbe Catilinam ejiciebam<sup>6</sup>, reliquam conjuratorum manum simul exitum putabam. Ib. Cat. 3, 2, 3.—9. Quum ego Catilinam ex urbe pellēbam, hoc providēbam animo, non mihi esse Cethegi temeritatem pertimescendam. Ib. 3, 7, 16.—10. Num dubitas id me imperante facere quod jam tua sponte faciēbas<sup>7</sup>? Ib. 1, 5.—11. Has legationes Caesar, quod in Italiam properābat<sup>8</sup>, ad se reverti jussit. Cæs. B. G. 2, 35.—12. Cornelio minus copiarum datum (est) quia Manlius cum haud invalido<sup>9</sup> praesidio<sup>10</sup> in Galliam mittebatur<sup>11</sup>. Liv. 21, 17.

Rem. 54. Predicates are placed in the imperfect to represent the action as INDEFINITELY REPEATED at a given time, the repetition being understood to go on at that time. The frequent repetition without definite limits marks the action as INCOMPLETE in the sense explained above: Primo adventu exercitus nostri hostes crebras ex oppido excursiones faciēbant, parvulisque prœliis cum nostris contendēbant. At the first arrival of our army, the enemy were making frequent expeditions from the town, and fought in small skirmishes with our men. Cæs. B. G. 2, 30.

Obs. 1. Mere imperfects (without any other addition) are not used to denote repeated action if it would be left doubtful whether the predicate is intended to denote repeated actions, or one continued action in progress at a given time. Thus in the sentences, Ex. 1-7 every ambiguity, in this respect, is removed by the connection itself. In Ex. 8 the predicate *procedēbant* would be a PERFECT if it had been meant to designate one single 'procession' of the prefects, which could not have been considered as 'incomplete' at the time assumed by the author. Nuntiorum pars deprehensa (ab hostibus) in conspectu nostrorum militum cum cruciātu necabatur. Part of the messengers being seized, were killed with tortures in the sight of our soldiers. Cæs. B. G. 5, 45. The imperfect *necabatur* denotes repeated action, implying that several executions were occurring and going on at the time spoken of, each messenger being killed whenever seized. The execution of all at one time would have been a complete act at the time spoken of, requiring the PERFECT tense.—Quum uterque, utrimque exisset exercitus, in conspectu fereque e regione castris castra ponebant. When both armies had started to march, each on one of the two banks of the river, they pitched camp in sight of, and almost opposite to each other. Cæs. B. G. 7, 35. The connection of this passage shows that this method of pitching camp was repeatedly done at a time when Caesar was taking certain measures. The making of the two camps on one single occasion would have implied an action complete at the given time, requiring a PERFECT. See Ex. 9.

Sometimes predicates may be classified either as imperfects of continued or of repeated action, without any difference in sense, as: Jam feriēbantur arietibus muri. Then the walls were battered by rams. Liv. 21, 8. It is indifferent whether the battering be conceived as one continued action in progress, or as an aggregate of repeated blows by the ram.

Obs. 2. Repeated actions, if represented to be REGULARLY done according to some principle, routine, rule, or habit, pass over into the imperfect of HABIT (§ 585), which usually, although not necessarily, implies repeated actions of the same kind, as: Huc Verres ex illa domo emigrābat, Thither Verres used to move (every spring) from that house. Cic. Verr. 2, 5, 12. The perfect *emigravit* would denote a single change of his abode, complete at the time spoken of. See Ex. 10-13. Here belong actions, represented to be done WHENEVER (as often as) another event happened (IMPERFECT OF CONTINGENT ACTION, see § 579): Hi, quacunque in partem impetum fecerant, hostis loco cedere cogēbant. Wherever they made an attack, they (regularly) dislodged the enemy. Cæs. B. C. 2, 41.—Athēnis sententia quum iudicibus darētur, interrogabatur reus quam aestimationem commernisse se confiteretur. When at Athens a case was passed over to the judges to pronounce sentence, the accused was asked (every time, according to the routine of the courts), what amount of punishment he confessed that he had deserved. Cic. Or. 1, 54. See Rem. 65. (Ex. 14, 15).

<sup>1</sup> Acres.—<sup>2</sup> The connection shows that he did not send the women to Rome.—<sup>3</sup> inst. of *fuisset*.—<sup>4</sup> to attend to.—<sup>5</sup> The connection shows that the matter could not have been done after the fleet had sailed.—<sup>6</sup> The connection makes it clear that the act itself of ejection could not be meant, which also would have required a perfect. The same is the case with *pellēbam* in the next sentence, and *faciēbas* in No. 10.—<sup>7</sup> was in haste to depart (was hastening in English has the same meaning of a future act).—<sup>8</sup> *haud invalidus*, pretty strong, respectable.—<sup>9</sup> force.—<sup>10</sup> Manlius had not yet left at that time.

Obs. 3. Imperfects of repeated action are rendered 1) by the common form of the preterit (see the examples in obs. 1); 2) by the PROGRESSIVE form of the preterit if repeated actions of the same kind are represented to have actually been going on at a given time (see the example in R. 34); 3) by a predicate with 'would', which may often be used if the imperfect is one of contingent action (obs. 2), as: Si quis collegam appellasset, ita discedebat ut pœnitēret non prius decreto stetit. If any one appealed to a subordinate magistrate, he would come off in such a manner as to be sorry not to have submitted to the former decision. Liv. 3, 36. See Ex. 15. 4) If a repeated action is represented as done regularly or by routine (obs. 2), the imperfect may often be rendered by 'used to' or by the addition of an adverb (*regularly, always, etc.*). See the examples in obs. 2.—Ex. 11, 12, 14.

Obs. 4. If the action is represented to have been repeated a DEFINITE number of times, the imperfect cannot be used, the action in this instance, being considered complete: Erat eisdem temporibus Ti. Gracchus, qui bis consul et censor fuit (not erat). At the same time lived Ti. Gracchus, who was twice consul and censor. Cic. Brut. 20, 49. See Ex. 16.

Obs. 5. A predicate denoting a single occurrence is often, with rhetorical exaggeration, placed in the imperfect to create with the hearers the impression that the action probably was oftener done, as: Verres quo supplicio dominos indemnatos afflictebat, hoc servos damnatos liberabat, Verres freed condemned slaves from that punishment which he inflicted on uncondemned masters. Cic. Verr. 2, 5, 8. The connection shows that both actions were only once done in regard to one slave and one master.—Quum amicos tuos annulis aureis donabas, when you presented your friends with gold rings. Cic. Verr. 2, 2, 11; (only a single donation to one man being stated). See Cic. Verr. 2, 4, 42.

1. Eadem tempestate multis signis Lacedæmonis Leuctricæ pugne calamitas denunciebatur. Cic. Div. 1, 34, 75.—2. C. Sempronius Blesus Cn. Fulvium ob exercitum in Apulia amissum in contumacia necabat. Liv. 26, 2.—3. Itaque in tantâ rerum iniquitate eventus quoque variis sequebantur. Cæs. B. G. 2, 22.—4. Inveniebatur Caesar ex captois, trans Sabim flumen omnis Nervios consediisse. Ib. 2, 16.—5. Interim juvenes captivos, trans Sabim flumen omnis Nervios consediisse. Liv. 24, 23.—6. Hostium copias summis criminibus serēbant in senatum optimatesque. Cæs. B. C. 2, 41.—7. Itaque de deditione omnis a rege auxiliis crebro agebantur. Cæs. B. C. 2, 41.—8. Metellus in Numidiam procedit, ubi ex oppidis præfecti regii obvii procedēbant. Sall. Jug. 46.—9. Publicam in veteres navis paucis rebus impositis, quum mersissent eas in alto, multiplices fuisse merces ementiebantur. Liv. 25, 3.—10. Qui inciderant in morbum haud facile septimum diem superabant. Ib. 41, 21.—11. Pompēi victorias admirantes numerabamus, tuos (O Caesar) numerare non possumus. Cic. Dej. 4, 12.—12. Nocturno ambulabat Themistocles quod somnum capere non posset, quarantibusque respondēbat. Miltiadis tropæis se ex somno excitari. Ib. Tusc. 4, 19.—13. Ibi Vercingetorix in singula diēi tempora per exploratores quæ ad Avaricum gererentur cognoscebat, et quod fieri vellet imperabat. Cæs. B. G. 7, 16.—14. Quum imperator exercitum, censor populum lustraret, bonis nominibus qui hostias ducerent eligebantur. Cic. Div. 1, 45, 102.—15. Hostes ubi ex littore aliquos singulāris ex navi egredientis conspexerant, incitatis equis impeditos ulcris ablati, plures paucos circumstabant, alii ab latere aperto tela conficiebant. Cæs. B. G. 4, 26.—16. Quater intra paucos annos primum pium duxi; quater et trices victis causa donatus ab imperatoribus sum. Liv. 42, 34.

§ 575. Frequently the INFINITIVE PRESENT (historical infinitive), and rarely the INDICATIVE PRESENT, are used with the force of an IMPERFECT. The historical infinitive mostly occurs in place of an imperfect of REPEATED ACTION:

Interim quotidie Caesar ædno frumentum quod essent polliciti flagitare. Diem ex die ducere ædno: conferri, comportari, adesse dicere, Meanwhile Caesar was daily

<sup>1</sup> Time.—<sup>2</sup> warnings.—<sup>3</sup> announce.—<sup>4</sup> mass-meeting.—<sup>5</sup> unfavorable state.—<sup>6</sup> of different results.—<sup>7</sup> on repeated inquiries.—<sup>8</sup> *considerare*, to take a place: *consedisse*, to have taken a place, to be encamped.—<sup>9</sup> charges.—<sup>10</sup> to disseminate.—<sup>11</sup> to send.—<sup>12</sup> to treat.—<sup>13</sup> to endanger.—<sup>14</sup> contractors.—<sup>15</sup> to sink.—<sup>16</sup> in the open sea.—<sup>17</sup> to pretend.—<sup>18</sup> a plague, prevailing at that time.—<sup>19</sup> to survive.—<sup>20</sup> trophies.—<sup>21</sup> awaken.—<sup>22</sup> at stated hours.—<sup>23</sup> to learn.—<sup>24</sup> to perform the lustration of.—<sup>25</sup> persons with lucky names. The ablative is one of quality, with which a subject of general import (person) must be understood.—<sup>26</sup> to lead the victims (to the altar).—<sup>27</sup> singly.—<sup>28</sup> at full gallop.—<sup>29</sup> them while trying to reach the land. *Impeditus* in military language means the position of a soldier not favorable for fighting.—<sup>30</sup> to surround.—<sup>31</sup> rank.

parative conjunctions attached to demonstrative temporal expressions (*eo tempore quo*, etc.) Ex. 8-11.

Obs. 1. The predicate of temporal clauses with *quum*, if it is represented as a POINT OF TIME at which another action occurred, is generally placed in the PERFECT INDICATIVE (rarely in the imperfect subjunctive). The principal predicate, the time of which is determined by it, is placed in the IMPERFECT if it outlasted the predicate of the clause: *Quum* Caesar in Galliam venit, alterius factionis principes erant Aedni, alterius Sequani, When Caesar came to Gaul, the chiefs of the one faction were the Aedui, those of the other were the Sequani, *Cæs. B. G. 6. 12.* But: *Casu quum legerem* tuas litteras, Hirtius erat apud me. *Cic. Att. 15. 1. 2.* Here '*quum legerem*' is represented as a SPACE of time, overlapped by the principal action. See, for the particulars, p. 649. Obs. 7.—When the principal predicate is not represented as outlasting the action of the clause, it is placed in the perfect, as: *Ego inio quum est ad me ista causa delata*, huc sum suspicione permissus. At the beginning of 2, when that case was placed in my hands, I was struck with this suspicion. *Cic. Deiot. 6. 17.*—For temporal clauses denoting SPACES of time, see Rem. 60.

Obs. 2. When two actions, by such expressions as *eodem tempore quo*, are stated to have occurred at the same time, either of the two actions may be conceived as determining and outlasting the other, and the predicates of the two sentences are either placed both in the imperfect, or both in the perfect. *Hæc eodem fere tempore mandata Cæsari referrebantur*, et legati ab Aeduis et a Treveris veniebant. These demands were reported to Cæsar almost at the same time as envoys came from the Aedui and Treverians. *Cæs. B. G. 1. 37.* But in a similar passage PERFECTS are used: *Sub eodem fere tempore et legati nuntiabant*. Almost at the same time the envoys reported that everything was warlike, and the fall of Saguntum was announced. *Liv. 21. 16. Ex. 10. 11.*

1. Ne mihi quidem ipsi tunc placēbat diutius abesse a rei publicæ custodiā: sedebamus enim in puppi et clavum tenebamus. *Cic. Fam. 15. 3.*—2. Quid? tum mortem fugiebam? *Ib. Sest. 21. 47.*—3. Murem modo fortunatus videbatur, nunc vester est supplex. *Ib. Mur. 40. 86.*—4. Et jam omnia trans Iberum præter Saguntinos Carthaginensium erant. *Liv. 21. 6.*—5. Conspicua ex muris ea multitudo erat, jamque etiam legionaria cohortes sequebantur. *Ib. 10. 43.*—6. At in illo ipso tempore apud socerum tuum sedebas. *Cic. Pis. 11. 26.*—7. Quo quidem tempore non ego causam nostram, sed consilium improbābam. *Ib. Fam. 6. 1. 5.*—8. Mirabile autem illud est, quod eo ipso tempore quo fieret indicium conjurationis in Senatu, signum Jovis in Capitolio collocabatur. *Ib. Div. 2. 20. 46.*—9. Hæc Crassi quum edita oratio est, quatuor et triginta tum habebat annos, totidemque annis mihi ætate præstābat. *Ib. Brut. 43. 161.*—10. Eodem tempore signum Jovis collocabatur quo conjunctio indicabatur. *Ib. Div. 2. 21. 47.*—11. Eodem fere tempore pons in Ibero prope effectus nuntiabatur, et in Sicori vadum reperiebatur. *Cæs. B. C. 1. 62.*

Rem. 56. More frequently the time-point at which an action was incomplete, is not expressly stated, but understood, being implied either in previous predicates, or in the predicate of the principal sentence if the action is contained in a clause.

Obs. 1. If the time is not stated, an action may either be conceived as going on at a certain time, with an IMPERFECT-PREDICATE, or it may be regarded from the stand-point of its own time, being represented as an INDEPENDENT FACT, in which case the predicate is placed in the PERFECT. In this case the use of either of the two tenses is always optional if the incompleteness of the action is no essential point in the narrative, or in the thought expressed. This may be seen by the following examples: *Fugientes, quos non silvæ montesque texerunt*, ab equitatu sunt intercepti; The fugitives, whom neither forests nor mountains protected, were killed by the cavalry. *Cæs. B. G. 7. 62.* The action '*texerunt*' is complete if viewed from the time of *intercepti sunt*, or if viewed from its own time; but it would be incomplete (requiring the imperfect *tegēbant*), if viewed from any particular time-point during the flight.—*Ubi primum impedimenta nostri exercitus ab eis qui in silvis abditis latēbant visa sunt*, subito omnibus copiis provolarunt; As soon as the baggage train of our army was seen by those who were hiding in the forests, they suddenly rushed forth in full force. *Cæs. B. G. 2. 19.* The action '*latēbant*' is complete, if viewed from the time of the predicate *provolarunt*, and incom-

<sup>1</sup> i. e. at the time when the person addressed wrote his letter.—<sup>2</sup> any longer.—<sup>3</sup> guard.—<sup>4</sup> stern.—<sup>5</sup> helm.—<sup>6</sup> at the moment when Cicero left the city.—<sup>7</sup> our measures.—<sup>8</sup> to disapprove.—<sup>9</sup> disclosure.—<sup>10</sup> to erect.—<sup>11</sup> edere, to publish.—<sup>12</sup> was in his thirty-fourth year, which outlasted the time-point of the publication.—<sup>13</sup> the river Sicoris.

plete if viewed from the time of the predicate *visa sunt*. Either tense (*latēbant* or *latuērant*) would have been justified, but Cæsar employed the imperfect to represent the action as a STATE (were lying hidden).—*Quod impedimentum agentibus fore videbatur*, id maxime ad fallendum adjūvit. *Liv. 24. 46.* The predicate *adjūvit* is viewed from the stand-point of its own time; but it might have been *adjūvabat*, if viewed from the time of the predicate *videbatur*. Thus Cæsar uses *adjūvabat* in a similar connection: *Adjūvabat eorum consilium quod, etc. Cæs. B. G. 2. 17.* Here *adjūvit* might have been used if it had not been the intention of the author to intimate by the imperfect tense that the circumstances which furnished the help were permanent states.—In mentioning who were the chiefs of certain embassies, Cæsar sometimes uses the perfect, sometimes the imperfect, representing in the former instance the being a chief as a fact, viewed from the stand-point of its own time, and in the latter instance as going on at the time of the arrival: *Legatos ad eum mittunt, ejus legationis Divico princeps fuit* (or *erat*). *Cæs. B. G. 1. 13.*—*Legatos ad Cæsarem mittunt, ejus legationis Namējus et Verudectius principes locum obtinebant*, *Ib. 1. 7.* The imperfect *obtinebant* had to be chosen because the verb *obtine* in the perfect means 'to acquire possession,' while the imperfect refers to the meaning 'to hold possession.'—*Crescebat interim urbs*. *Liv. 1. 3;* but: *Roma interim crescebat* Albæ ruinis. *Ib. 1. 30.* The predicates of these sentences might be interchanged with each other. Compare: *Eis qui aderant* (contioni) displicebat. *Cic. Att. 2. 21. 3;* and: *Existimare facilius possunt qui adfuērunt*. *Ib. Sest. 57. 122.* Eorum judicio qui adfuērunt probatus est. *Ib. Brut. 64. 229.* This twofold way of viewing an action as incomplete at a particular time-point, or as a fact, regarded from the stand-point of its own time, is most frequently applied to predicates denoting actions of the MIND. See § 582.

Obs. 2. The clauses with imperfect-predicates of time understood are most frequently relative (Ex. 1-4) and causal (Ex. 5. 7); but also comparative, and other clauses which explain the circumstances accompanying and going on at the time of the latter (Ex. 8-10). Independent sentences with such imperfects frequently have the logical value of a CLAUSE, referring to the time of a previous predicate in a similar way as the predicates of clauses refer to those of their own principal sentences. (Ex. 11-13.)

Obs. 3. In the following instances the time assumed by the author in regard to an IMPERFECT-PREDICATE is neither taken from previous predicates, nor from the predicate of the principal sentence: 1) in the DESCRIBING IMPERFECT (see § 580); 2) in the HISTORICAL IMPERFECT (see § 581); 3) where a particular time (whether a time-point or a space of time) is easily understood from the whole connection, or from particular circumstances: *Tum Brutus etsi satis, inquit, mihi videtur d. e. ante, or antequam te audire* habere cognitum Scævolam, tamen ista mihi laus nota non erat. *Cic. Brut. 40. 147.*—*Anaxagoras* ferunt nuntiā a morte sibi dixisse: *scībham d. e. quum filius meus viveret*; me genuisse mortalem. I know that I had beget a mortal. *Ib. Tusc. 3. 14* (See Ex. 7).—Thus *scībham* is used in the sense of *scībam*. *Ad te ilam*, where *mado* must be supplied: *Quis just quidq. to see you*. This expression frequently occurs in the comies. At *ros ad te videtur*. *Ter. Phorm. 5. 7. 6.* So in *Plaut. Cas. 2. 2. 9; 3. 4. 3.* and often. —Thus the time of repeated actions may be understood when it is generally known, as in Ex. 10 to R. 54: *Nostra ambabat Thymasteres*, where the author assumes his reader to know the time of these nightly walks, being a period soon after the battle of Marathon.—From the necessity of a particular time for imperfect predicates it follows that generally treatises or new paragraphs (the above cases excepted) cannot commence with sentences containing imperfects. We may begin a book with such sentence as *Roma a Romulo condita est*, but not with *Roma . . . condebatur*, because we could not take the necessary standard of time from the previous discourse. For a peculiar exception to this rule see p. 334. Obs. 5.

Obs. 4. The rule that imperfect-predicates require a particular time assumed for the action does not include those cases where the action is represented as incomplete (i. e. without definable limits) as such, as *lat* in the imperfects of habit (§ 585); (b) in the imperfects denoting unaccomplished results (see Rem. 53).

1. Claudius pervenit ad januam Ditis, ubi jacebat Cerberus. *Sen. Mort. Cæs. 8.*—2. Massilienses Albicos, barbaros homines qui montes supra Massiliam incolēbant, ad se vocaverant. *Cæs. B. C. 1. 34.*—3. Cato dedit mihi integritatis testimonium, quod se vocaveram; quod postulābam negavit. *Cic. Att. 7. 2. 7.*—4. Cæsar in Lingones contendit, ubi due legiones hiemabant. *Cæs. B. G. 7. 9.*—5. Ab hoc consilio Lingones et Treveri abindevant; i. h. quod amicitiam Romanorum sequebantur. *Treviri quod abindevant longius, et a Germanis premabantur*. *Ib. 4. 63.*—6. nium domi, nec foris<sup>9</sup> ædium acceperunt<sup>10</sup>, sed *inveniebant* utrumque. Liv. 3. 66.

§ 578. If the time is conceived as a SPACE or PERIOD, whether expressed or understood, the predicate is placed in the IMPERFECT : 1) when its action is not confined to the period assumed, but is represented to go beyond its limits (Ex. 20. 21. 24.); 2) when it denotes an action incomplete by its own nature, so that it would be in the imperfect even without any designation of time (R. 56, Obs. 4, Ex. 2. 5. 8. 10. 13. 22. 26. 27); 3) when the predicate denotes actions indefinitely repeated within the period (R. 64, Ex. 23. 25); 4) when both the space of time assumed, and the action represented as going on during the time, are of indefinite duration (R. 57, Obs. 3.) Ex. 1-7. 9. 13-19.

*Rem. 57.* Spaces of time referring to imperfect predicates are designated 1) by adverbial demonstrative expressions similar to those designating time-points (*tum, interea, illis temporibus*, Ex. 1-7); 2) by prepositional expressions directly defining the period (*ex tempore—ad tempus*, Obs. 3; Ex. 26, 27). 3) By adverbial expressions opposing the time assumed to the speaker's own time (*tunc, antehac, olim, quondam*, Ex. 13-18); 4) by temporal clauses, either ablatives absolute (*nobis pueris, me adolescente, isto prætore*), or direct participial constructions, as in Ex. 9, or finite clauses the latter being generally introduced by *quum, dum, or eo tempore quo*. (See Obs. 3, and R. 60. Ex. 7); 5) By principal sentences. R. 63.

(See Obs. 3, and R. 60. Ex. 7); 5) By principal sentences. 19. 88.  
Obs. 1. Of the demonstrative expressions (R. 57. No. 1.) the adverb *etiamtum* (Ex. 10-12.) (*still, still then, all that time*) represents the time spoken of as preceded by an indefinite period, and the action as having lasted through that period, and being still in nite period, and the action as having lasted through that period, and being still in progress at the time spoken of, as : Evolat jam quadrupes, quam etiamtum moves ceteræ uno in loco moliebantur ; The quadrigæ had already started off, when still the other vessels were all the while toiling in one spot. Cic. Verr. 5. 34. 88. *Eritantum*, in other vessels were all the while toiling with a predicate in the IMPERFECT (according to this meaning, can only be connected with a predicate in the IMPERFECT, which does not imply rule § 578, No. 1). It is distinguished from its synonym *adhuc*, which does not imply that the action was still in progress and hence may be connected with a perfect. *Hæc enim tradidit*, he gave himself up to Servilius. Cic. Sest. 62. 130. See Cic. Verr. 2, 4, 19.

62, 130. See Cic. Verr. 2, 4, 19.

Obs. 2. *Antea* and *clim* (before, formerly, once) always designate periods of indefinite duration, opposed to the time spoken of. If this time is a past one, they have their predicates in the *pluperfectum*; if the time spoken of is that of the speaker, *ante*, *hodie*, predicates in the *perfectum*; if the time spoken of is that of the future, *ante*, *hodie*, predicates in the *future perfectum*; when no limits of duration are assigned etc.), their predicates are placed in the *perfectum* when no limits of duration are assigned. These things to the action: Facillitudo mea ista foredatur antea, nunc meum res est. Cic. Fam. 9, 16, 7. — were formerly borne by my faculty, but now things are changed. Cic. Fam. 9, 16, 7. — Reos appello omnis quorum de re disceptatur, sic enim olim loquuntur: I apply the term *re us* to all whose affairs are under litigation, for that is the style they formerly used.

Cic. Or. 2, 43, 183. See Ex. 13-18. — *Postea* (after) denoting an indefinite period opposed both

<sup>1</sup> Supply: *quo profectus eram*, where I had gone — <sup>2</sup> passage. (Construct: *inquiescitio* *ab eo ubi*. — <sup>3</sup> *ab eo qui in aere*, to take one's part. — <sup>4</sup> admitted — <sup>5</sup> otherwise than. — <sup>6</sup> supply *tempus*. — <sup>7</sup> at Cumae. — <sup>8</sup> *effere*, to bury — <sup>9</sup> ahead. — <sup>10</sup> they received from their predecessors. *i. e.* there was . . . when they entered office — <sup>11</sup> Sometimes even in this instance the imperfect is used with the force of a perfect, which must be used in English in rendering such predicates: *is qui antea cantorum convicto continens celebrare suas solent*, cantorum ipsorum vocibus ejiciebatur; the same man who, before, had been in the habit of celebrating his meetings by abusing the singers, was (then) turned out by the voices of these very singers. (Cic. *Sest.* 55, 118.

to the speaker's time, and to the time spoken of before, takes its predicate in the imperfect in the case of rule § 578, No. 4. (Ex. 19.)

[illegible]

Obs. 4. The period attached to a predicate is not always the time from which the action is viewed by the speaker, as: Tempus *ejus tri-dni*, quod in eis castris morabar. in magno officio mihi ponendum putavi: The *three days' time*, which I *was spending* in that camp, I believed I ought to employ to an important duty. Cic. Fam. 15. 2. 3. The time assumed is here not the *tribulum* but that time-point within it, at which he took the resolution expressed by *putavi*. Compare the similar sentence: Scævola fuit mecum familiariter *tribulum* illud quod ego Ephesi commemoratus sum. Scævola was in my friendly intercourse with me during that three days which I spent at Ephesus. Cic. Fam. 3. 5. 5. Here the *tribulum* itself is the time assumed for the predicate, which also is the time of *fall*. Hence, both predicates according to the rule at the close of Obs. 3 must be in the PERFECT.

[illegible]

1 The author refers to the change of *s* into *p* (the later form being *Papiriv*). — 2 contemporary. — 3 at the time of Crassus and Antonius. — 4 *ita precorbat*, committed such crimes as to. — 5 chance. — 6 to render. — 7 *this*, meaning the honor of being called 'the Wise.' — 8 recently. — 9 drop the case. — 10 to weigh. — 11 went through my mind. — 12 supply *est*, such as you might imitate. i.e. models for your imitation. — 13 while they were planning. — 14 burned, i.e. pressed them. — 15 cupidity. — 16 *ritam agere*, to pass life. — 17 the nobles. — 18 played into each other's hands. — 19 vigor, energy (literally: *juice*). — 20 texture; Their works were of a somewhat richer make. — 21 to praise. — 22 charge. — 23 weighs on my breast. — 24 blood-relations. — 25 my right. — 26 supply: *esse meum arbitror*. — 27 I believe it to be my duty, my fate. — 28 hurt his feelings. — 29 hinted to me. — 30 the period of Plancius's candidature is assumed as the time of the two imperfects. — 31 the period of Plancius's candidature is assumed as the time of the two imperfects. — 32 the period of time in which he heard them (*audire*) is assumed as the time of the imperfect. — 33 the period of time in which he heard them (*audire*) is assumed as the time of the imperfect. — 34 The predicate denotes continued action within the period, not surpassing its limits. — 35 the period in which Plato was read, is the time assumed. *Admirābar* lasted longer than the reading.

*Rem. 58.* If the period of time by which an action is determined, answers to the question '*how long?*' (p. 234, R. 14), so that the designated period is conceived as '*measuring*' the time of the action in question, the predicate cannot be placed in the imperfect, as :

Obs. 1. The idea of completeness, which is always involved in actions the time of which is thus measured, excludes the use of the imperfect. However, if the 'incompleteness' is taken in the conventional sense mentioned, R. 52 and R. 53, obs. 1, the predicate *may* be placed in the imperfect, since in these cases not the action itself, but certain bearings of the action are represented as 'incomplete'. Thus in the sentence Ex. 5 to R. 52 (Cic. Rose. Com. 3), the predicate *relinquēbat* has the force of *causa erat*, *quod* (per triennium) *relinquisti*, and is placed in the imperfect, although its time is measured by *triennium*. In the last sentence quoted, R. 57, obs. 3, *Triginta dies . . . mortem expectābām*, the imperfect means 'lack of result', the action as such being complete. The same is frequently the case in predicates denoting *HABIT*, as in the sentence Ex. 26 to R. 57 (Liv. 44, 16) Thus: *Hic mos, quem per omnem vitam servābat*, . . . fecit aut stirpis divine virum P. Scipionem esse crederent. Liv. 26. 19.— Often however such predicates are found in the perfect, especially when they do not denote repeated action: *Ab urbe condita per annos CCCXLI contenti fuerunt Romani usui aquarum quas aut ex Tiberi, aut ex puteis aut ex fontibus hauriebant*. Front. Aquaed. 4. See Ex. 12.

1. Macedonia *a summo culmine*<sup>18</sup> *fortūnæ ad ultimum finem centum quinquaginta annos stetit*. Liv. 45. 9. — 2. Leg. Man. 18. — 7. Idque Sævolæ contigit, qui ſolos novem menſis provinciæ præfuit. Ib. Att. 5, 17, 5. — 8. Quæ quum ira eſſent, tamen Dejotarus uſque eo ſe tenuit quoad<sup>23</sup> a Pompējo litteræ venerunt. Ib. Dej. 4, 1. — 9. Id nomen uſque ad Pythagoræ manavit<sup>24</sup> ætatem. Ib. Tuſc. 5, 3, 3. — 10. Potiti antistites<sup>25</sup> ejus ſacri<sup>26</sup> per metus quos venerunt, diſce genus<sup>27</sup> omne Potitiarum interit. Liv. 1, 7. — 11. Aufidius erat<sup>28</sup> ad ſummum ſenſitatem. Cic. Brit. 48, 17. — 12. Tum prætor in hac officina<sup>29</sup> mot-

<sup>1</sup> The connection shows that the cure taken by Cæsar was unsuccessful. — <sup>2</sup> Keep within duty. — <sup>3</sup> carvers in metal. — <sup>4</sup> censers. — <sup>5</sup> what he had torn from the censers (of other people). — <sup>6</sup> adroitly. — <sup>7</sup> inserted (*repeated action*). — <sup>8</sup> departure. — <sup>9</sup> *primas in causis agere*, to hold the most prominent place in the bar; (the action outlasting the period). — <sup>10</sup> mentioned my name. The meeting of the Senate at that day, is the period assumed. — <sup>11</sup> the rule. — <sup>12</sup> concluded. — <sup>13</sup> instead of *Ab antiquis phi'osophis*. — <sup>14</sup> star. — <sup>15</sup> to examine. — <sup>16</sup> the prætorian law. — <sup>17</sup> for sham's sake. — <sup>18</sup> pinnacle, top. — <sup>19</sup> presented. — <sup>20</sup> his lines. — <sup>21</sup> drawn up. See p. 254, obs. 3. — <sup>22</sup> were in secret conference. — <sup>23</sup> *usque eo . . . quod*, till the time that. — <sup>24</sup> existed, was used. — <sup>25</sup> the heads. — <sup>26</sup> sanctuary. — <sup>27</sup> race. — <sup>28</sup> shop.

Rem. 59. If expressions denoting the measure of time are applied to actions which are represented as still going on at a given past time after having lasted for the space of time designated, the predicate is placed in the IMPERFECT, while in English the PLUPERFECT is used, as: *Illis, quod jam diu cupiebant, novandi res occasio data est*, To the former an opportunity was given to change the (political) affairs, which they *had desired for a long time*. Liv. 24, 29.

OBS. 2. Predicates with this meaning retain the same tenses even in the SUBJUNCTIVE, as : Quam jam amplius horis sepe pugnatum erat, Baculus et Voivodæ accurrunt ad Garbam, as : Quam jam amplius horis sepe pugnatum erat, for more than six hours. Cæs. B. G. 3. 3. The pluperfect *pugnatum esset* would denote that the combat had ceased at that time, as : Ego hæc livens proficiscens Athenis dedi quam ibi decem, ipsas dies fuissém. When I had been there for exactly ten days, Cic. Att. 5, 11. 4. The writer's stay at Athens is represented as having ended after the ten days ; else the imperfect *essem* would have been used. See Ex. 7.

Obs. 3. Designations of time by which this peculiar meaning is imparted to actions, are either numeral expressions *per tot annos, per decem menses*, etc., or the adverb *diu*, which are generally combined with *jura*, the former denoting the measure of the period, and the latter intimating the given time point (either a past time, or the speaker's time), at which the measured period *had been* or *has been* still going on.

Obs. 4. To these designations belong the prepositional expressions denoting an initial point of a period, especially *ex quo*, *ex eo tempore*, *ab illo tempore*, *inde* *ab*, etc. Predicates with these designations of time, if represented to be continued up to the speaker's time, whether going on at that time or not, require the PERFECT, and are rendered by *'ever since'* with a predicate in the present or perfect. But if represented as ceased by *'ever since'* with a predicate in the past, they require the IMPERFECT, being going on at some past time, and ceasing afterwards, with a predicate in the preterit or pluperfect: His remitted *'since'* or *'from that time'* with a predicate in the preterit or pluperfect: Ever since a *ex eo tempore* quo primum ex Africa nuntius venit, supplicare non desisti. Ever since a messenger first came from Africa, I did not cease (have not ceased) to implore them. Cic. Fam. 6, 12, 2 — Nec vero usquam discedebam nec a republica deiecebam oculos ex *eo die* quo in aedem Telluris convocati sumus. Neither did I leave for any other place *on that day* when we all left for, etc., nor did I turn my eyes from the republic *from that day* when we were summoned to the temple of Tellus. Cic. Phil. 1, 1: (the writer departed at a later time). If the imperfect *desistebam* were used in the first sentence, and the perfect *desisti* in the last, it would essentially change the meanings of the predicates. Ex. 8.

Obs. 5. Imperfects of this kind (R. 59) often occur in epistolary style (R. 77, Obs. 1 (f) time). If the imperfect *desiderabam* were to be replaced by the perfect *desideravi* in the last, it would essentially change the meanings of the preceding observations.

1. Ha-drubal peritus<sup>1</sup> erat omnium eorum gentium in 2 quibus per tot annos militabat<sup>2</sup>. Liv. 25. 33. — 2. **Rem. 61.** Temporal clauses determining the duration of another action by the duration of their own action, answering to the question '*how long*,' generally require *both predicates* to be in the PERFECT. They correspond to English clauses with '*as (so) long as*' (or '*while*' if it may be replaced by '*as long as*'), and are introduced by the conjunctions *quandū, dum, or quoad*. The principal sentences of clauses with *quandū* (more rarely those with *dum* and *quoad*) are frequently introduced by *tandū*, in which case the clause may be opened by '*as long as*.' Both words *tandū* — *quandū* are together rendered by '*as long as*:'

Hortensius *vixit tamdiu quam* (or *quantiſque*) *hœc* in civitate bene & optime vivere. Hortensius lived as long as it was possible to live honorably and happily in the commonwealth. Cic. Brut. 1, 4. (*Quæ* = *How long* did he live? Compare with : Tarquinius *non rex fuit quum regem esse licbat*, Ex. 10 to Rem. 60, where the question would be, 'When was Tarquin king?') — *Ego dum vis fuit nihil egi* : *As long as force was reigning*, I did not do anything. Cic. Sen. 10, 127 (*Quæ* = *How long* did Labian from acting?') — *Quand* Pompejus in Italia fuit, sperare non desisti : *As long as Pompey was in Italy*, I did not quit hoping. Cic. Att. 9, 10, 3.

Obs. 1. The predicates of temporal clauses with *quantum*, etc., always denoting STATES or ACTIONS IN PROGRESS, are of en rendered by the English PROGRESSIVE FORM of the present, although the Latin predicate is in the PRESENT, as: Verres *ludens* in the imperio suo *clausen voluit*, quantum conviciam *est* *persequens* *est*; Verres *dat* *est* his administratione *sua* *hect exactus* so long as it *was passing* the price of his banquet. (Cf. Verr. 2, 5, 33.)

**OBS. 2.** Sentences with *tamēdiā quam diū* = *quādiū tamēdiā quam diū* have the grammatical form of COMPARATIVE PROPOSITIONS (p. 750, foll.), the same as English clauses with '*as long as*'. They are only employed if the two actions wholly coincide in their duration. They are terminated by their terminating time-points, and always imply that both states ceased to exist after the lapse of the period. Being thus fully TAMEDIC, the actions are always conceived as 'complete'. Hence the rule: '*Sentences with TAMEDIC - QUAMDIŪ, as without exception, require their predicates to be in the PERFECT*', in the same manner as *without exception, require their predicates to be in the PERFECT*, in the same manner as *without exception, require their predicates to be in the PERFECT*. In the same manner as *without exception, require their predicates to be in the PERFECT*, in the same manner as *without exception, require their predicates to be in the PERFECT*.

Ops. 3. If the author lays less weight on the simultaneous *existence* of the notions after the lapse of the period, than on their simultaneous *existence during* the period, the clause does not generally take the comparative form with *identical* or *equal*, but is introduced

<sup>1</sup> does not generally take the comparative form. — <sup>2</sup> *laugh* is a verb. — <sup>3</sup> the midst of the ranks. — <sup>4</sup> *omnipotens*, to be omnipotent. — <sup>5</sup> laughter. — <sup>6</sup> to rush. — <sup>7</sup> the midst of the ranks. — <sup>8</sup> *omnipotens*, to be omnipotent. — <sup>9</sup> to be a powerful government (predicate noun, *hoc* being the subject). — <sup>10</sup> to suffer. — <sup>11</sup> to be sacrificed. — <sup>12</sup> were the heads of it. — <sup>13</sup> to sacrifice. — <sup>14</sup> entrails. — <sup>15</sup> *bos optimus*, the sacrificed steer *optimus* meaning of genuine, blameless quality. — <sup>16</sup> *fecit* has here the force of *inventum est*. — <sup>17</sup> foragers. — <sup>18</sup> *et hinc*. — <sup>19</sup> on both sides. — <sup>20</sup> to send help. — <sup>21</sup> gradually. — <sup>22</sup> into line.

by *dum* or *quoad*. These conjunctions are likewise rendered by 'as long as' (while), and the two predicates are *generally* (but not always, see *Rem.* 62) placed in the PRESENT. See the example to R. 61 and examples 5-10. The principal sentence may even in this instance be introduced by *tamquam*. See the example in *Obs.* 5, and *Ex.* 11.

Obs. 4. In place of the perfect *after dum*, in this meaning, also the PRESENT (with the force of a perfect) is used. This present is a true *historical* present, while the present *after dum* answering to the question 'when' (R. 60) has the force of an *imperfect*: Milo *paulisper, dum se uxor, ut fit, comparat, commoratus est*; Milo tarried for a little while, *as long as it took* his wife to trim herself, as it will usually happen. Cic. Mil. 10, 28. See Ex. 12.

Ex. 12. **Ops. 5.** If the construction requires the subjunctive, both predicates in all sentences of this kind, are placed in the imperfect subjunctive according to the law of consecution: *Nemini cen-ebat fore dubium quin temula dum ita quodret, nihil agere mente posset*: He thought it would be doubtless to all that a man as long as he was thus enjoying himself, was unable to perform any mental act. (Cic. Sen. 12, 41.)

Ques. 6. *Dum* and *quoad*, determining the duration of an action in answer to the question 'how long,' are often used to introduce actions represented to MAKE AN END to the period without having lasted through it. They are, in this instance, rendered by 'till,' until, the conjunction *dum* being used in the same sense. These clauses generally have their predicates in the SUBJUNCTIVE (see p. 671), while the principal predicate generally is in the perfect indicative, the same as when *dum* and *quoad* denote 'as long as': *Ibi tantum temporis relenti dum exponerent* quante regie copie fuissent, etc.; etc.; There they were retained only so long till they (had) explained the strength of the royal troops, etc. Liv. 45, 2.— *Tandem* certamen anceps fuit quoad Darius fugeret; The struggle was so long doubtful till Darius took (had taken) flight. Just. 11, 9.

so long doubtful till Datus took (had taken) sight. Just. 11, 9.

1. Bibulus se oppido munitissimo<sup>1</sup> tamdiu tenuit quamdiu in provincia Parthi fuerunt. Cic. Fam. 12, 19.— 2. M. Piso tenuit locum tamdiu quam ferre potuit laborem. Ib. Brut. 67, 236.— 3. Horum oratorum quamdiu mansit imitatio, tamdiu genus illud dicendi vivit. Ib. Or. 2, 23.— 4. Cur ea signa<sup>2</sup> quamdiu alium praetorem de te in iudicium intravit<sup>3</sup> putas, tamdiu domi (tuae) fuerunt? Ib. Verr. 1, 19.— 5. Hoc feci dum licuit, rum<sup>4</sup> putas, tamdiu domi (tuae) fuerunt? Ib. Phil. 2, 13.— 6. Illi dum pari certamine<sup>5</sup> res geri<sup>6</sup> poterint<sup>7</sup>, quoad non licuit<sup>8</sup>. Ib. Phil. 2, 13.— 7. Illi dum pari certamine<sup>5</sup> res geri<sup>6</sup> poterint<sup>7</sup>, quoad non licuit<sup>8</sup>. Ib. Phil. 2, 13.— 8. Quoad dum praesidia nra fuerunt, in Sulae praesidiis fuit. Cic. Rose. Am. 43, 126.— 9. Quoad Catilina fuit in urbe, eius consensu obstat<sup>9</sup>. Ib. Cat. 3, 7.— 10. Brutus, quoad vos omnia patri videri<sup>10</sup>, usus est incredibili patientia. Ib. Phil. 4, 9.— 11. Caudius usus est hoc Cupidine<sup>10</sup> tamdiu dum tantum laude crevit. Nep. Cato 2— 11. Caudius usus est hoc Cupidine<sup>10</sup> tamdiu dum forum dei immortalibus habuit<sup>11</sup> ornatum. Cic. Ver. 2, 4, 3.— 12. Numidae tandem modo remota<sup>12</sup> dum in elephantibus auxilium putant. Sall. Jug. 53, 3.

*Rem. 62.* There are two exceptions to the rule R. 61 in regard to the use of the perfect tense :

use of the perfect tense :  
 D If the time-period determining the action by a clause with *dum* or *quoad*, answers both to the questions 'how long' and 'when', the predicate of the clause *may* be either placed in the PERFECT according to R. 61, or in the IMPERFECT according to R. 60. See OBS. 1. 2. 3.

2) If the predicate of a clause with *dum* and *quoad* implies REPEATED ACTION, so that it answers to both the questions 'how long' and 'when-ever', the predicate of the clause as well as that of the principal sentence are placed in the IMPERFECT.

Atticus beneficia quæ ipse tribuerat *tamdiu memineral quoad* ille gratus erat qui acceperat; Atticus *used to remember* favors which he had himself bestowed, so long only as the receiver *was* (continued to be) thankful. Nep. Att. 11, 5, (*i. e.*, he remembered in every case (whenever he bestowed), and as long as). See Ex. 3. 4-8.

Obs. 1. The use of tense in regard to the predicate of the CLAUSE in the case of the first exceptions, solely depends on the way the author *conceives* the qualification of time, and whether greater stress is placed on the *length*, or on the historical *order* of the

time, and whether greater stress is placed on the latter.

peated one, if otherwise it would not be recognized as such. Such temporal expressions do not define the time of the repeated action in the sense of § 576, and hence are not followed by a predicate in the imperfect, except if either a time is assigned to the action *aside* from those adverbs, or if the predicate would be in the imperfect without the addition of these terms. Hence the *repper* is used with *sæpe* and *semper* in all cases of OBS. 2 (EX. 2, 7). Thus in the case of OBS. 2, No. 2, *sæpe* is connected with the perfect in the frequent formula *Sæpe audiri ex eo quoniam dicebat*: I frequently heard him say; as: *Sæpe* ex Crasso *audiri* quam *diceret* sibi certum esse a iudicis causisque discere; I often heard Crassus say that his retiring from the practice of the law was a settled matter with him. Cic. Or. 2, 33 (See B. VI. p. 635). In the case No. 3 of OBS. 2, *sæpe* is frequently used in the perfect, instead of in the imperfect, if no weight is attached to the particular time at which the action was repeated<sup>1</sup>; M. Varron at a given time *habuit* gravis in Cæsarem contiones; *sæpe* ex tribunali *prædicavit* adversa Cæsarem prælia fecisse. Cæs. B. C. 2, 18. (But see EX. 10.)

On the other hand, *sæpe* is connected with the IMPERFECT if the predicate denotes HABIT, or if the particular time assumed is an important point in the narrative: Denique Piso studio literarum se subito dedit. Nihil iuvabant magistra; I then even pro vino *sæpe oppignerabantur*; Later, Piso suddenly devoted himself to study. (But the readers did not interest him, and often his books were pawned to buy wine. Cic. Sest. 51, 110. Here the particular time is the most important point of the whole passage in regard to the predicates ('just at such a time'). EX. 11.— With *semper* the reference to a particular time almost always makes it necessary that the predicate should be in the IMPERFECT, since *semper* with a perfect commonly has the sense 'at all times,' while with an imperfect it means 'always at that time'; as: Tantum sperni olli ostendisti quantum ego semper omnibus te mo fretus *pollicabar*; You manifested such a hope for peace as I, relying on you alone, *always promised* to all. Cic. Fam. 5, 7, 1. The connection shows that a particular time during the Mithridatic war is meant; *pollicetur* *sæpe* would essentially change the sense, meaning 'at all times,' which Cæcero could not intend to say.— Thus the imperfect is used with *semper* when the predicate designates the HABIT of an action: *Semper* Africani Xenophonem in manibus *habebat*; Africanus *always had* a work of Xenophon in his hands. Cic. Tusc. 2, 26 *i. e.* had always the habit to have; *habuit* would denote that he literally continued the holding of the book at all times. See EX. 12, 13. In the same way the imperfect must be used with *semper* if the predicate denotes an action incomplete *as such*: Athenenses *semper* publicis consiliis divinos quosdam sacerdotes *adhibebant*, et Lacedæmonii de rebus majoribus *semper* aut Delphis oraculum aut ab Ammonæ aut a Dodonæ *petebant*. Cic. Div. 1, 43, 95. (The perfect *adhibebant* is used because the Athenians at all times of their history, as far as known, employed priests at their public meetings; but the imperfect *petebant* denotes an action incomplete both in itself, and as often as it was performed; they sought advice, but it was doubtful whether they would receive it. The perfect *petebant* would imply the receiving of the advice sought: 'they obtained oracles'.)

OBS. 4. Peculiar is the use of *sæpe* with an imperfect if it is connected with a clause of contingent action § 579, as: *Sæpe* quoniam *confutimur*, quoniam *pavulus venisset*, subito ipse te *refutabat*; *occidit* repente oratio; *often when you had picked up coarseness, when you had come prepared you would also pick up sleep*, and you up closely address suddenly told to the ground. Cic. Quinct. 11, 39. In the same sense, sometimes, instead of the perfect in the formula, 'Sæpe audiri quoniam diceret' (see OBS. 3), the imperfect *audiebam* is used; Equidem e Cn. Aufidio, oculis capto, *sæpe audiebam cum diceret* se lucis magis quam utilitatis desiderio moveri. Cic. Fin. 5, 19 (*i. e.*, Often when Aufidius said this, I was a hearer, or present).

OBS. 5. The adverb *quotidie* always refers to a certain period (expressed or understood) in which a repeated action happened, and always requires a predicate in the IMPERFECT except if it refers to a period answering the question, 'how long'; Inter cetera Syracusani *habebant* rationem *quotidie* piratarum qui secuti terrentur; Meanwhile the Syracusans *every day made* memorandums (kept an account of the number of pirates who were beheaded. Cic. Verr. 2, 5, 28.— He *quotidie* a quid de me fieri *apprehendit*. He daily reported something fictitious concerning me. Cic. Sest. 64, 133. See EX. 14. But: Apollonius *his omnibus diebus* (*i. e.* continuous dies quinque) equestri prælio *quotidie* contendit, *not contendebat*; Ariovistus, during all these (five) days, fought a cavalry-battle every day. Cæs. B. G. 1, 48. In the same way *quotidie* is used with an imperfect, if referring to *habits* (EX. 15).

1. Non erit tibi hoc novum; nam jam tum<sup>2</sup> ex me *audiebas*, mihi Crassum nullus rei rudem aut ignarum esse visum. Cic. Or. 2, 3.— 2. Itaque, ut ex ipso *audiebam*, Dejotarus *persæpe revertit* ex itinere quoniam jam progressus esset multarum dierum viam. Ib. Div. 6, 15, 27.— 3. Quæ tum signa *revertit* tibi omnium, capidem *audiebam*.

<sup>1</sup> We may say that in such cases the predicate answers to the question, 'how often', and that the perfect after *sæpe* is analogous to perfect predicates answering to the question, 'how long?'—<sup>2</sup> *i. e.*, nobis pueris.—<sup>3</sup> How the whole audience then manifested their feelings.

existimare<sup>1</sup> facilius possunt qui adfuerunt. Ib. Sest. 57, 122.— 4. Quantum hoc valeat hoc ipso ex loco *sæpe cognovistis*. Ib. Man. 14.— 5. Simulasse te perspicuum est, quod (because) Ti. Gracchi mortem *sæpe* in contionibus *deplorasti*, quod *semper* a bonis *discedisti*. Ib. Or. 2, 40, 170.— 6. *Sæpe* tibi meum somnium *narravi*, *sæpe* ex te *audire* contum. Ib. Div. 1, 28, 58.— 7. Multi *sæpe* Hannibalem militari sagulo<sup>3</sup> opertum<sup>4</sup> conspexerunt. Liv. 21, 4.— 8. Hi (Sennones reliquique Galli) *constanter*<sup>5</sup> omnes *nuntiaverunt*<sup>6</sup>, manus<sup>7</sup> cogit<sup>8</sup>, exercitum in unum locum *conduci*. Cæs. B. G. 2, 2.— 9. Atheniensium *semper fuit* prudens sincerumque iudicium. Cic. Or. 8, 25.— 10. Hac oratione *persensum semper fuit* prudens sincerumque iudicium. Cic. Or. 8, 25.— 11. Scævolam satis moti milites crebro *interpellabant*<sup>9</sup> (Curionem). Cæs. B. C. 2, 33.— 12. Scævolam satis mihi videtur habere cognitum ex eis rebus quas *sæpe audiebam*<sup>10</sup> ex Rutillio. Cic. Brut. 40, 147.— 13. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 14. Revertit Brut. 40, 147.— 15. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 16. Revertit Brut. 40, 147.— 17. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 18. Revertit Brut. 40, 147.— 19. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 20. Revertit Brut. 40, 147.— 21. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 22. Revertit Brut. 40, 147.— 23. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 24. Revertit Brut. 40, 147.— 25. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 26. Revertit Brut. 40, 147.— 27. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 28. Revertit Brut. 40, 147.— 29. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 30. Revertit Brut. 40, 147.— 31. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 32. Revertit Brut. 40, 147.— 33. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 34. Revertit Brut. 40, 147.— 35. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 36. Revertit Brut. 40, 147.— 37. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 38. Revertit Brut. 40, 147.— 39. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 40. Revertit Brut. 40, 147.— 41. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 42. Revertit Brut. 40, 147.— 43. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 44. Revertit Brut. 40, 147.— 45. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 46. Revertit Brut. 40, 147.— 47. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 48. Revertit Brut. 40, 147.— 49. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 50. Revertit Brut. 40, 147.— 51. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 52. Revertit Brut. 40, 147.— 53. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 54. Revertit Brut. 40, 147.— 55. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 56. Revertit Brut. 40, 147.— 57. Dejotarus auguriis *semper utebatur*<sup>11</sup>. Ib. Div. 2, 36.— 58. Revertit Brut. 40, 147.— 59. Dejotarus auguriis *semper utebatur*<sup>11</sup>. **Rem. 67.** Historical imperfects implying a TEMPORAL CLAUSE occur in various connections: (a) followed by a clause introduced by *quum* with the force of a RELATIVE ADVERB (*quo tempore*). See OBS. 1-4; (b) OPENING a detached narrative or anecdote (OBS. 5); (c) CLOSING a sentence, and indicating a temporary suspension of the narrative in regard to the progress of events (OBS. 6); (d) so that MANY HISTORICAL IMPERFECTS COMBINED point to a subsequent perfect by which the result of the actions in imperfects is to be stated (OBS. 7).

**OBS. 1.** Often a clause with *quum* following a sentence grammatically independent, is not a temporal clause determining the time of the principal predicate, but a relative clause whose time is determined by the predicate of the principal sentence. The principal sentence may contain a direct designation of time (R. 65), but it may also contain the statement of a past action, representing the predicate of the clause with *quum* as having occurred *at, during, or after* the time of this action. *Quum*, in such sentences, must be considered as a RELATIVE ADVERB with the force of *quo tempore* or *per quod tempus* (at or during which time), while *quum* as temporal conjunction has the force of *tempore quo* (post or per tempus quo), at (after, etc.) the time that. — *Tarquinus neobaptido circumdare urbem parabat, quum Sabini bellum capitis intenderet*; Tarquinus was preparing to surround the city with a stone-wall, when the Sabian war interfered with his plan. Liv. 1, 36. Logically, this sentence must be thus paraphrased: *at* either; Tarquinus urbem circumdare parabat (historical fact), et *quum* parabat quum hoc ageret, bellum intervēnit; or, *do* Tarquinus urbem circumdare parabat, *quo tempore* (per quod tempus) bellum intervēnit.

**OBS. 2.** The predicate of the clause with *quum* is regularly in the PERFECT INDICATIVE (or historical present), only *completa* acts being conventionally expressed in this grammatical form. If the predicate of the clause is an IMPERFECT, the clause with *quum* is generally an ordinary temporal clause, serving to determine the time of the principal predicate, as: *Nondum ab Romā profectus erat C. Fannius quum hoc in Hispaniā gerebantur*; While this was going on in Hispania, C. Fannius had not yet departed from Rome. Liv. 35, 2. Sometimes, however, clauses with *quum* with predicates in the imperfect have the force of relative clauses in the above sense, but in this instance temporal adverbs (*etiamtum, interea*) are added after *quum*, to show that *quum* has the meaning of a relative (*per quod tempus*). Thus in the Examples quoted Rem. 57, OBS. 1 and OBS. 3 (Triginta dies in eā navi fui, *quum interea* semper mortem expectabam. — Evolvat jam trirēmis, *quum etiamtum* naves ceterae uno in loco moliebantur). See Ex. 6.

**OBS. 3.** The predicate of the principal sentence is always in the IMPERFECT INDICATIVE if it represents a period of time during which the action of the clause happened, corresponding to the general rule, Rem. 60, OBS. 2 (Ex. 1-5). But it is placed in the PERFECT (rarely in the PRESENT) if the action has happened after the time of the principal predicate, as: *Commodum discesseras heri quum Trebatius venit*, You had just left yesterday when Trebatius came. Cic. Att. 13, 9, 1. — *Visus mihi est primo veterator intellegere praelare quid cause obsideret, quum subito suos solos servos armatos fuisse dixit*; At first it had seemed to me that the old snapper was exceedingly well aware of the objections to the case, when he suddenly stated that only his own slaves had been armed. Cic. Cic. 10, 30. Sometimes perfects are used in the principal sentence when the time period is expressed by several predicates happening successively, as: *Piso se domum abducat, inde navem conscendit, Brundisiumque citavit, et ultimas Hadriani maris oras petiit, quum interim milites domum obsidere cepērunt*. Cic. Pis. 38, 93.

**OBS. 4.** In place of a relative clause with *quum*, sometimes the form of an INDEPENDENT sentence is used, as: *Mirabar quid esset quod tu mihi litteras mittere intermisisses: indicavit mihi Pansa Epicurum te esse factum (when Pansa intimated to me that you had become an Epicurean)*. Cic. Fam. 7, 12, 1 (See Cies. B. G. 7, 25). Here belongs the Horatian *Idem forte viā Sacra: accurrit quidam, etc.* Hor. Sat. 1, 9, 1. (i. e. *quum* quidam accurrit.) — Sometimes the corresponding demonstrative adverb *tum* takes the place of *quum*, as: *Jam exiguum inter duas acies erat spatium . . . : tum consul Romanus equitum paucas turmas immisit*. Liv. 10, 36. — Sometimes intermediate clauses, as *quum hoc agerem*, are inserted in the place of *quum*, as Cies. B. C. 2, 36. See Ex. 7.

**OBS. 5.** Historical imperfects in independent sentences frequently introduce detached narratives or anecdotes. These, besides representing continued actions as ordinary historical facts, mark the TIME during which the details, containing the point of the anecdote, happened, as: *On Pompejus cenam Verri dabit*. Apposit patellam in qua sigilla erant egregia, etc.; (Once) Pompey gave (was giving) a dinner to Verres. He

placed a plate on the table on which exquisite figures were carved, etc. Cic. Verr. 2, 4, 22. Such imperfects always involve temporal clauses with *quum* (*Pompējus dedit: quum daret [dabat]* apposuit, etc. See Ex. 8-12).

**OBS. 6.** Historical imperfects very frequently form the CLOSING PREDICATE in historical connection with previous actions, as: *Helvetii jam in Aeduum finis pervenerant eorumque agros populabantur*. Aedui quum se defendere non possent, legatos ad Cæsarem mittunt, etc.; The Helvetians had already arrived within the boundaries of the Aedui, and were devastating their lands. The Aedui, since they could not defend themselves, sent envoys to Cæsar, etc. Cies. B. G. 1, 11. (i. e. *Helvetii populati sunt, et quum populabantur, Aedui mittunt, etc.*) Frequently imperfects of this kind are immediately preceded in the same sentence by co-ordinate, or otherwise connected perfects. They denote facts following those, expressed by perfect predicates, in ordinary historical succession, and are placed in the imperfect to mark a temporary stop in the course of progressing events, foreshadowing the statement of other facts which happened during the time occupied by such actions. After stating these facts, the thread of the interrupted chain of succeeding events is taken up again: *Ad nuntium iam atrocem constitit agmen, ducesque quid agerent consultabant* (here follow the details of the consultation); *quum viderent praetores . . . exercitum ducunt Megaram*. Liv. 24, 30. (i. e. *consultaverunt, et dum consultant, etc.*) See Ex. 13-18.

**OBS. 7.** Often groups of historical imperfects are combined, representing historical facts occurring in succession to each other, such as are ordinarily expressed by perfects. The form of the imperfect represents them as unfinished for the time being, always pointing to a fact to be afterwards mentioned, which will end the state of incompleteness and uncertainty as to the final result of the actions. Such imperfects have the force of time-periods for the future fact to which they point: *Primo concursu hostes pelluntur atque in fugam conjiciuntur; ab sinistro . . . reliqui ordines acerrime resistebant* (the result of this resistance remaining in suspense), *nec dabat suspicionem fugae quisquam*. Ipse dux Camolugenus suis aderat, atque eos cohortabatur. (Tum) . . . tribuni signa intulerunt, etc. Cies. B. G. 7, 62. Such groups of imperfects are very frequent in the historians, as Cies. B. C. 3, 69; Liv. 35, 10; 10, 36, and often (Ex. 19).

1. Treveri a Labieno non longius bidui viā aberant, quum duas venisse legiones jussu Cæsaris cognoscunt. Cies. B. G. 6, 7. — 2. Jam ad Hexapylum erant Hippocrates atque Epicycles, sequebanturque colloquia per propinquos popularium ut portas aperirent, quum praetores intervenirent. Liv. 24, 32. — 3. Ita equestre praelium erat, quum procul Sempronianus ex rictus utriusque partis motum praeceperat ne hostes novi adventarent. Ib. 25, 19. — 4. Minus quingentos passus a castris aberant, quum in conspectu fuere hostium equites. Ib. 42, 57. — 5. Jam non modo pacis sed ne belli quidem jura relicta erant, quum Romanus exercitus ad Olympium castra posuit. Ib. 24, 33. — 6. Caedebatur virgibus civis Romanus, quum interea nullus gemitus audiebatur. Cic. Verr. 2, 5, 62. — 7. Hippocrates castra circa Acrillas ponebat: munientibus supervenit (surprised) Marcellus. Liv. 24, 35. — 8. Dionysius, quum fanum Proserpinae Locris expilasset, navigabat Syracusas; isque quum secundissimo ventu cursum teneret, ridens 'Videtisne,' inquit, 'quam bona a dis immortalibus navigatio sacrilegis detur?' Cic. N. D. 3, 34, 83. — 9. Octo hominum millia tenebat Hannibal qui relictis in castris fuissent a Paulo et Varrone consulibus. Eos senatus non censuit redimendos, ut esset insitum militibus nostris aut vincere aut emori. Ib. Off. 3, 32, 114. — 10. Captis a Camillo Vejii milites simulacrum Junonis sede sua movere conabantur. Quorum ab uno interrogata dea an Romam migrare vellet, velle se respondit. Valer. Max. 1, 8, 3. — 11. Urbem cuiusdam Alexander donabat. Quum ille cui donabatur, se ipse mensus, tanti muneris invidiam refugisset, dicens non convenire fortunae suae: 'Non quaero,' inquit, 'quid te accipere deceat, sed quid me dare.' Sen. Ben. 2, 16. — 12. Syracusani qui praefuerant Heraclii bonis reddenda eorum negotiorum rationem in senatum dicebant quantum cuique Verri jussum nummorum esset datum. Gemebant Syracusani, sed tamen patiebantur. Repente recitatur uno nomine HS CCL millia jussu

<sup>1</sup> Order. — <sup>2</sup> to learn. — <sup>3</sup> to open. — <sup>4</sup> communications. — <sup>5</sup> friends, relatives. — <sup>6</sup> popular, the people's party, the democrats. — <sup>7</sup> throw open. — <sup>8</sup> to interfere. — <sup>9</sup> thus was going on, in that state was. — <sup>10</sup> appearing in the distance. — <sup>11</sup> = Sempronius. — <sup>12</sup> caused (gave) alarm. — <sup>13</sup> to beat. — <sup>14</sup> rod. — <sup>15</sup> groan. — <sup>16</sup> temple. — <sup>17</sup> to plunder. — <sup>18</sup> most favorable. — <sup>19</sup> to keep the course, technically used of vessels which are sailing before the wind; make good headway. — <sup>20</sup> sacrilegus, a temple-robber. — <sup>21</sup> to redeem. — <sup>22</sup> inculcated in the minds of. — <sup>23</sup> statue. — <sup>24</sup> place. — <sup>25</sup> presented with. The act of the donation is here presented as a lasting transaction. — <sup>26</sup> measuring (i. e. weighing) his own worth. — <sup>27</sup> had declined to undergo the odium of such a rich gift. — <sup>28</sup> suited to his circumstances. — <sup>29</sup> the managers of the Heraclius estate. — <sup>30</sup> to render an account. — <sup>31</sup> money. — <sup>32</sup> to groan. — <sup>33</sup> they bore up, they were patient. — <sup>34</sup> it was read that. — <sup>35</sup> in one item (belongs to recitatur).

prætoris data. Fit maximus clamor omnium. Cic. Verr. 2, 2, 19.—13. Id flumen Helvetii ratibus *transibant*. Ubi Cæsar certior factus est quartam fere partem Helvetiorum circa flumen reliquam esse, cum legionibus tribus a castris profectus, ad eam partem pervenit. Cæs. B. G. 1, 12.—14. Quum hostium acies a sinistro cornu pulsa esset, a dextro cornu vehementer nostram aciem *premebant*<sup>1</sup>. Id quum animadvertisset<sup>2</sup> P. Crassus, tertiam aciem nostris subsidio misit. Ita prælium restitutum est. Ib. 1, 52.—15. Eo quum venisset, cohortes quinque præmissi a Domitio, pontem fluminis *inter-rumpébant*<sup>3</sup>. Ib. cum antecursoribus<sup>4</sup> Cæsaris prælio commisso<sup>5</sup>, celeriter Domitiani<sup>6</sup> a ponte repulsi se in oppidum receperunt. Ib. B. C. 1, 16.—16. Hannibal cum duobus millibus equitum ad portam Collinam est *progressus* atque mœnia simulque urbis *contemplabatur*. Id eum tam licenter<sup>7</sup> facere Flacco indignum visum est; ita urbis innotuit<sup>8</sup> equites. Liv. 26, 10.—17. *Constitit*<sup>9</sup> utrumque agmen, et ad prælium sese que innotuit<sup>10</sup> equites. Liv. 26, 10.—17. *Constitit*<sup>9</sup> utrumque agmen, et ad prælium sese *expediebant*<sup>11</sup>. Scipio jaculatoribus<sup>12</sup> in fronte locat<sup>13</sup>; Hannibal equites in medium accipit<sup>14</sup>. Vix dum clamore subdito<sup>15</sup>, jaculatoribus fugerunt inter subsidia<sup>16</sup>. Ib. 21, 46.—18. *Sustinebant* Samnites impetum, et ad castra effuso<sup>17</sup> cursu *feriebantur*<sup>18</sup>. Galli facta testudine<sup>19</sup> confecti<sup>20</sup> stabant. Tum Fabius equites excedere acie jubet. Ib. 10, 21.—19. Quotidie nuntie, coacti fame, radices palmiarum *agrestium*<sup>21</sup> *colligebant*, et eis *alebantur*<sup>22</sup>; Cleomenes autem totos dies in litore *perpetuo* *ibat*<sup>23</sup>. Ecce<sup>24</sup> autem repente *nuntiatur* piratarum esse navis in portu. Cic. Verr. 2, 5, 33, 34.

Rem. 68. If historical events covering a space of time, such as battles or their particular phases, military operations, etc., are narrated according to their GENERAL FEATURES, the predicates are generally placed in the IMPERFECT. Mostly (but not necessarily, see Ex. 3. 4), such acts involve repeated action. See Ex. 1. 2. 5.

Obs. 1. Predicates of this kind designate complete historical facts following each other in succession, and would seem to require the perfect tense. But such actions, by being represented as GENERAL FEATURES, comprise an undefined number of unmentioned particular acts, which imparts to them the character of indefiniteness and incompleteness. These imperfects pass over into the imperfects of repeated action mentioned R. 65.

1. Agmina<sup>25</sup> magis quam acies<sup>26</sup> *perprebant*; superior tamen Romanus erat. Ceterum equites Numidae, repente a lateribus<sup>27</sup> circumfusi<sup>28</sup>, magnum terrorem *intulere*<sup>29</sup>. Liv. 25, 34.—2. Romani apud Fabium *arcebant* magis quam *infigebant* pugnam, *castrabaturque*<sup>31</sup> in quam maxime serum<sup>32</sup> diâi certamen. Ib. 10, 28.—3. Campanos iacie a vallo Appii *arcebant*<sup>33</sup>; ab alterâ parte Fulvium Hannibal et Pœni *urgebant*<sup>34</sup>. Ib. 26, 5.—4. Atrox prælium ortum est; ac primum multumque facile *expediebantur* Romani; assumpti<sup>35</sup> deinde auxiliis, *expediebant*<sup>36</sup> certamen. Ib. 32, 27.—5. Omnes vici atque omnia ædificia quæ quisque conspexerat *incendebantur*<sup>37</sup>, præda ex omnibus locis *abibat*<sup>38</sup>; frumenta tantâ multitudine jumentorum atque hominum *consumebantur*. Cæs. B. G. 6, 43.

#### 4) Imperfects of inner action.

##### A. Direct Predicates of inner action.

§ 582. Predicates denoting ACTIONS OF THE MIND (i. e., feelings and conceptions, cogitation, dispositions and affections, volition), have the following peculiarities in regard to their tense: 1) The use of the perfect or

<sup>1</sup> Left wing.—<sup>2</sup> they were hard pressing (supply *hostes*).—<sup>3</sup> to perceive.—<sup>4</sup> were breaking down, destroying.—<sup>5</sup> vanguard.—<sup>6</sup> to commence.—<sup>7</sup> the soldiers of Domitius.—<sup>8</sup> freely, impudently.—<sup>9</sup> to dispatch.—<sup>10</sup> to stop.—<sup>11</sup> prepared themselves.—<sup>12</sup> the dart-throwers.—<sup>13</sup> to place.—<sup>14</sup> assigned the center to them.—<sup>15</sup> clamorem tollere, to raise the battle-cry.—<sup>16</sup> reserves.—<sup>17</sup> with a dashing rush (or run).—<sup>18</sup> were carried, were advancing.—<sup>19</sup> having formed a tortoise (by holding their shields overhead).—<sup>20</sup> were drinking.—<sup>21</sup> in closed ranks.—<sup>22</sup> wild palm-tree.—<sup>23</sup> supported themselves.—<sup>24</sup> was drinking.—<sup>25</sup> to prolong.—<sup>26</sup> to the very last moment of the day.—<sup>27</sup> to ward off.—<sup>28</sup> to sively.—<sup>29</sup> to prolong.—<sup>30</sup> after reinforcements had arrived.—<sup>31</sup> they made the battle even on both sides.—<sup>32</sup> to burn.—<sup>33</sup> to drive.

imperfect, more than in external actions, depends on the INDIVIDUAL CONCEPTION of the author (Obs. 1. 2. 3). 2) External acts which, as such, are represented as complete at the given time, are frequently placed in the IMPERFECT if they have certain particular relations to actions of the mind. All predicates placed in the imperfect for either of these two reasons, are called IMPERFECTS OF INNER ACTION.

Obs. 1. The general principle which requires the use of the perfect or imperfect, according as the action is represented as complete or incomplete at a given time, is also observed in regard to actions of the mind. Thus predicates denoting resolutions, or sudden impressions of the mind are placed in the perfect, while predicates denoting actions which are represented as STATES of the mind indefinitely lasting, and mentioned in connection with a particular time, are always placed in the imperfect, as

1. PERFECT: Germanico bello confecto Cæsar *statuit* sibi Rhenum esse transeundum (Cæsar resolved, took the resolution). Cæs. B. G. 4, 14.—Sed me *primus dolor percussit*, Cotta quum est expulsus (*the first pang of grief struck me*). Cic. Brut. 89, 305.

2. IMPERFECT: Antonius ait se eloquentem vidisse neminem. *Insidēbat* videlicet in ejus mente species eloquentiæ quam, etc. (in his mind an ideal of eloquence *was planted* or *fixed*). Cic. Or. 5, 18.

It would be improper to use imperfects in the first two sentences, or a perfect in the last.

Obs. 2. But actions of the mind, from their nature, may often be conceived either as states lasting indefinitely, or as actions defined by the limits of the given time. Hence the tense in predicates of inner action very frequently is different in very similar sentences and connections:

1. *Putābat* and *putāvit*. (a) Cæsar, quod memoria tenēbat, L. Cassium consulem occisum ab Helvetiis, (hoc iter) concedendum non *putābat*. Cæs. B. G. 1, 7.—(b) Cæsar quum intelligeret, omnis fere Gallos ad bellum celeriter excitari, partiendum sibi exercitum *putāvit*. Ib. 3, 10. Madvig (transl. by Thacher, p. 292) assigns to *putābam* the meaning 'I was of opinion', and to *putāvi* the meaning 'I adopted the opinion'. But in the above sentences both *putābat* and *putāvit* have the meaning 'he adopted the opinion' (i. e., the opinion was caused by the emergency). In the same sense *putābam* is used B. G. 1, 46. On the other hand *putāvi* has the meaning 'I was of opinion' in Cic. Off. 3, 30, 110 (Regulus, quia hoc patriæ non utile *putāvit* [independently of the existing emergency], ideo sibi honestum sentire illa credidit). The difference in the tenses of all these predicates cannot be explained by anything except by the character of all inner actions expressing states or affections of the mind, which admit of two ways of conceiving them.

2. *Existimābat* and *existimāvit*. (a) Ob eam causam non cunctandum *existimāvit* quin pugna decertaret. Cæs. B. G. 3, 23. (b) His ad consilia capienda nihil spatii dandum *existimābat*. Ib. 4, 13. In these sentences the perfect *existimāvit*, and the imperfect *existimābat* have exactly the same force ('he thought *then* that something should *then* not be done'). Compare Ib. 3, 17; 4, 36; 5, 28; 6, 5 with 1, 23; 2, 17; 4, 5; 4, 6. If however *existimāre* means an abstract judgment about things, the perfect is rarely used (equitum recenti prælio perterritum esse *existimābat*. Cæs. B. G. 4, 13). So Ib. 1, 6; 1, 7; 1, 47; 6, 7; 7, 50; 7, 54; 7, 61.

3. *Afferēbat* and *attulit* (to cause). (a) Magnam hæc res Cæsari difficultatem ad consilium capiendum *afferēbat*. Cæs. B. G. 7, 10.—(b) Hæc res Cæsari non minorem voluptatem *attulit*. Ib. 1, 53.

4. *Voluit* (noluit) and *volēbat* (nolēbat). (a) Harum causarum illa fuit justissima quod Cæsar Germanos suis quoque rebus timere *voluit*. Cæs. B. G. 4, 16.—(b) Id eam maxime ratione fecit quod *noluit* eum locum vacare. Ib. 1, 28.—(c) Causa mittendi Galbam fuit quod iter per Alpīs patefieri *volēbat*. Ib. 3, 1.—(d) Quod sæpius fortunam temptare Galba *nolēbat*, postero die in provinciam proficisci contendit. Ib. 3, 6.—(e) Huic tu molestus esse *noluit* quem nunc respirare non sinis? Quem nunc interficere cupis, eum appellare *nolēbas*? Cic. Quinct. 11, 39. In all these examples the imperfects and perfects might have been interchanged with each other, being used in perfectly similar, and almost identical relations. In the quoted passage of Cicero, the tenses have evidently been varied for the sake of formal euphony.

5. *Dolōrem tulit* and *dolore afficebatur* (hefelt pain, was pained). (a) Eum dolorem Plancius *tulit* (at that time only) paulo apertius. Cic. Planc. 14, 31.—(b) Qua ex parte

homines bellandi cupidi magno dolore afficiebantur (permanently). Cæs. B. G. 1, 2.—*Dolore affectus est* has always the meaning of a periphrastic present.

6. *Statuit* (resolved) and *statuēbat* (held an opinion, considered). (a) Cæsar ubi intellexit frustra tantum laborem sumi, *statuit* expectandam classem. Cæs. B. G. 3, 14.— (b) Cæsar navibus transire neque sua, neque populi Romani dignitatis esse *statuēbat*. Ib. 4, 17.

7. *Congruerunt* and *congruēbant* (to be unanimous). (a) Ibi consilium advocatum, omniumque in unum *congruerunt* sententiæ, tempus esse id jam agi ut, etc. Liv. 25, 32.— (b) De nullâ re prius consules retulerunt, omniumque in unum sententiæ *congruēbant* agendum cum tribunis esse. Ib. 26, 2.

8. *Valuit* and *valēbat* (to have weight, value, strength). (a) Tantum temporibus illis iurandum *valēbat*. Cic. Off. 3, 31.— (b) Octavius tantum dicendo *valuit* (his words had such a weight) ut legem Sempronium abrogaverit. Ib. Brut. 62, 221.— (c) Antistius rem vidēbat acute, componēbat diligenter, memoriā *valēbat* (was strong in memory). Ib. 63.

9. *Scivi* and *sciēbam* (I knew). (a) *Sciēbam* me mortalem gennisse. Cic. Tusc. 3, 14.— (b) Ego, quum genui eum, moritūrum *scivi*. Sen. Cons. Pol. 30.—*Scivi* is used in the meaning 'I ascertained', as perfect of *sciscere*; De Natū ex tuis primum *scivi* litteris. Cic. Att. 1, 8, 3 (for *sciscere*, to ascertain, in the PRESENT, comp. Plant. Bacch. 2, 3, 68).

10. Sometimes the imperfect and perfect of the same verb are used in different significations. Thus *differebat* (not *distulit*) means 'there was a difference', while both *distuli* and *differebam* occur in all the other meanings of *differe*.

Obs. 3. In quoting the opinions, judgments, and tenets (philosophical, political, or personal) of persons *without regard to a particular time spoken of*, the PERFECT (or present, see Rem. 44) is the regular tense of the predicate, as:

1. Aristoteles omnia quæ moventur natura<sup>1</sup>, moveri *consuit* aut vi aut voluntate<sup>2</sup>. Cic. N. D. 2, 16, 44.— 2. Pythagoras *consuevit* animum<sup>3</sup> esse per naturam rerum omnem intentum<sup>4</sup> et commentem<sup>5</sup>. Ib. 1, 11, 27.— 3. Empedocles quatuor naturas<sup>6</sup> ex quibus omnia constare *consuevit*, divinus esse *vult*<sup>7</sup>. Ib. 1, 12, 29.— 4. Hiemis, non avaritiæ periculum majores nostri in sociorum tectis esse *volebant*. Ib. Leg. M. 13.

Wherever in this instance IMPERFECT predicates are used, the author either has in his mind a particular time when the opinion was uttered, or a passage of the treatise where the opinion occurs (which must be considered as equivalent to a particular time), or there is some special reason for the use of the imperfect, as:

1. Aristoteles eos qui valetudinis causâ<sup>8</sup> fuerunt<sup>9</sup>, *consuevit* habere aliquid in animis presagens<sup>10</sup>. Cic. Div. 1, 38, 81.— 2. *Fingebat*<sup>11</sup> Carneades in Chiorum lapideis saxo difisso caput extitisse Panisci. Ib. 1, 13, 23.— 3. Majores vestri ubicunque multitudo esset, ibi et legitimum rectorem<sup>12</sup> *censebant*<sup>13</sup> debere esse. Liv. 39, 15.— 4. Alexander non gratiæ causâ ab Apelle potissimum pingi et a Lysippo fingi<sup>14</sup> *collebat*<sup>15</sup>. Cic. Fam. 5, 12, 7.

### B. Indirect Predicates of inner action.

§ 583. Predicates denoting external acts are frequently placed in the imperfect on account of their REFERENCE to INNER ACTIONS or states. They either introduce actions with reference to their real merits, inner meaning, and significance (IMPERFECTS OF REFERENCE); or they represent an action as the result of a rule, principle, or habit (IMPERFECTS OF RULE AND HABIT).

<sup>1</sup> Which move from natural causes.— <sup>2</sup> either by external force or spontaneously.— <sup>3</sup> the mind.— <sup>4</sup> is extending over.— <sup>5</sup> pervading.— <sup>6</sup> elements.— <sup>7</sup> is of opinion. *Velle*, in this meaning, intimates that the opinion is a mere hypothesis.— <sup>8</sup> in consequence of mental disease.— <sup>9</sup> to rave.— <sup>10</sup> prophetically.— <sup>11</sup> Instead of: Quum in Chiorum lapideis (quarries) figura quedam in saxo difissa esset (was split out of the rocks), falso cidebat (= *fingebat*; imagined) id caput esse Panisci.— <sup>12</sup> a regular head.— <sup>13</sup> The existimabat (= *fingebat*; imagined) id caput esse Panisci.— <sup>14</sup> The contingent action to which the 'opinion' held by these ancestors refers, has evidently caused the use of this imperfect by a kind of enallage.— <sup>15</sup> This imperfect refers to a notorious order of Alexander: 'When he issued this order, he did not mean (non-volebat) by it a peculiar favor (gratiæ causâ).

### a. Imperfects of Reference.

§ 584. The sentences in which IMPERFECTS OF REFERENCE occur, have (a) either the form of a finite clause, generally introduced by *quum*; or (b) the action referred to is expressed in the form of an object; or (c) understood from the connection.

Rem. 69. If clauses with *quum* are used, the clause contains the action whose merits and character are designated by the predicate of the principal sentence. The predicates of such sentences are placed either both in the PERFECT or both in the IMPERFECT INDICATIVE, as:

Te sororis filius *notavit quum* tutorem liberis non instituit; Your own nephew branded you when he did not appoint you the guardian of his children (by not appointing; he meant the omission as a stigma; it was virtually a stigma). Cic. Sest. 52, 111.— *Quum* Collatino Brutus imperium abrogabat, poterat vidēri facere id injuste; Brutus, when he removed Collatinus from power (in that he removed him), might seem to have done it (to have acted) unjustly [the act of abrogation is characterized as a possible injustice]. Cic. Off. 3, 10.— *Quum* plebs tribuniciam potestatem poscebat, verbo illam poscere videbatur, re verâ iudiciū poscebat; When the people demanded the (establishment of the) tribunate, it seemed, by the words used, to demand this power, but virtually it demanded the judiciary. Cic. Verr. 1, 15.— See Ex. 1-8.

Obs. 1. Clauses of this kind have only the grammatical form of temporal clauses. They denote the INNER IDENTITY of two acts, and by the form of a temporal clause the actions are represented as if the one had happened at the same time as the other. Both predicates, in fact, denote only one action, which is twice mentioned, first by the clause by which it is introduced according to its outward appearance, and by the principal sentence which states its real or virtual meaning. This inner identity of the two acts is also expressed by the identity of the two moods and tenses. That either the perfect or the imperfect may be used, follows from the general principle applied to all predicates of inner action (§ 582, Obs. 2). This form of a temporal clause with *quum* occurs also when both predicates denote internal actions (Ex. 8).

Obs. 2. For the use of the subjunctive in clauses of this kind, see p. 654, 2, foll. In the following passage, the subjunctive *diceret* falls under the rule p. 654, Obs. 1: Declārant hoc huius tribuni contiones, quibus quotidie meam potentiam criminabatur, quum *diceret* senatum quod ego vellem decernere. Cic. Mil. 4, 12.

Obs. 3. In place of such *Quum*-clauses, sometimes clauses with *dum* and *quod* are used, *dum* taking a present, imperfect, or perfect (see p. 673, Obs. 5, 1): *Dum* nostram gloriam tuâ virtute augeri *expeto*, feci non sapienter; When I insisted (by insisting) upon our glory being promoted by your labor, I did not act wisely. Cic. Qu. Fr. 3, 1, 3 (Ex. 9).— *Quod* tandem novi matrōnæ fecerunt, quod in causâ ad se pertinente in publicum processerunt? What new thing did the women do in that they showed themselves in public in a matter concerning their interests? Liv. 34, 5.

Obs. 4. Frequently, in place of a clause with *quum*, the form of an adverbial object is used, in which case the predicate is almost always placed in the imperfect: *His verbis* etsi non nominabatur Cicero, tamen solus petebatur (i. e. Clodius, quum his verbis utebatur, Ciceronem non nominabat, sed solum petebat); By these words of Clodius, Cicero alone, although not mentioned by name, was aimed at. Vell. 2, 45 (Ex. 4, 10-13).

1. Omnia tu Dejotaro tribuisti<sup>1</sup> quum<sup>2</sup> et ipsi et filio nomen regium concessisti. Cic. Dejot. 13, 36.— 2. Non, quum signa receptui<sup>3</sup> dedi, frangere audaciam<sup>4</sup> vestram volui<sup>5</sup>. Liv. 25, 38.— 3. Gravissimum<sup>6</sup> iudiciū de meâ fide et de constantiâ tuâ fecisti<sup>7</sup> quum post mortem Cæsaris totum te ad amicitiam meam contulisti<sup>8</sup>. Cic. Fam. 11, 29.— 4. Non plus Africānus in excidendâ<sup>9</sup> Numantiâ reipublice profuit quam P. Nasica quum Ti. Gracchum interemisset<sup>10</sup>. Ib. Off. 1, 22, 76.— 5. Non Herculi Dejanira nocere voluit quum ei tunicam sanguine Centauri tinctam<sup>11</sup> dedit. Ib. N. D. 1, 28, 70.— 6. Desipiebam<sup>12</sup> quum<sup>13</sup> illas litteras mittebam tibi. Plant. Epid. 1, 2, 35.— 7. Me quum quæstorem

<sup>1</sup> You did for Dejotarus.— <sup>2</sup> by conceding, in conceding, when you conceded.— <sup>3</sup> the signal for retreat.— <sup>4</sup> weaken your courage, confidence.— <sup>5</sup> I meant.— <sup>6</sup> the most unequivocal.— <sup>7</sup> iudiciū facere, to pass judgment (we would rather say 'to bear testimony').— <sup>8</sup> se totum ad amicitiam conferre, to devote one's self wholly to one's friendship.— <sup>9</sup> in (by) destroying, § 540, No. 3.— <sup>10</sup> to kill.— <sup>11</sup> dipped in.— <sup>12</sup> I was insane.— <sup>13</sup> in that.

quæ egissem bene et feliciter evenire<sup>1</sup>. Cic. Fam. 4, 14.— 10. Omnia sic constitueram mihi agenda ut tu *admiraberis*<sup>2</sup>. Ib. 2, 13, 1.— 11. *Di tibi* Carneades, ne Apollinem quidem futura posse dicere nisi ea quorum causas natura contineret. Cic. Fato. 14, 2.— 12. Cato cellam penariam<sup>3</sup> reipublice nostrae Siciliam *commendabat*<sup>4</sup>. Ib. Verr. 2, 2, 2.— 13. Nuper Crassus *negabat* ullam satis magnam pecuniam esse ei cuius fructibus exercitum alere non posset. Ib. Off. 1, 8.— 14. Apelles pictores eos peccare<sup>5</sup> *dicebat* qui non sentirent quid esset satis. Ib. Or. 22, 73.— 15. Acusius Rhodo venerat VIII. Id. Quinct. Is *nuntiabat* Quintum ad Caesarem profectum. Ib. Att. 11, 23, 2.— 16. Terentia, quæ mihi obvia in foro fuit, L. Pontium sibi in Trebulano dixisse *narrabat* lebrim tuam decessisse<sup>6</sup>. Ib. Att. 7, 2, 2.— 17. Caesar *dixit* mihi, a se Scævolam esse conventum<sup>7</sup>, ex quo mira quædam se audisse *dicebat*. Ib. Or. 2, 3, 13.

Obs. 4. In many particular instances predicates in the imperfect imply special mental relations of the action expressed by the verb. Here belong most of the 'pregnant' imperfects mentioned Rem. 52 and 53. The inner action to which such predicates refer must often be inferred from the connection, as: Carthaginiensium acies de industria pedem *referebat* ut hostem... incautus pertraheret. Liv. 25, 15. The connection requires that a perfect *credidit* should have been used for *referebat*, the action being represented as complete at the time spoken of. But it appears that the whole narrative was only a feint, so that the '*pedem referre*' was not really meant for what it pretended to be. Hence *referebat* is equivalent to *simulabat*, *refere*, where *simulabat* as a predicate of inner action might be in the imperfect. Imperfects of a similar import are frequently mistaken by the interpreters.

#### b. Imperfects of Rule and Habit.

§ 585. Predicates denoting habitual actions, *i. e.*, actions regularly done, continued, or repeated, according to a certain RULE, are GENERALLY placed in the IMPERFECT.

Obs. 1. Habitual actions (in consonance with the general rules), are *always* placed in the imperfect if a particular time is assigned to them, and if they are represented as going on at that time. Thus when the time given is opposed to other times: *Erat* (not *fuit*) omnino tum mos ut faciles essent in suum cuique tribuendo; It was *then* a general custom that people were obliging as to leaving every one his own. Cic. Brut. 21, 85 (Ex. 4, 5, 6.) R. 71. But the imperfect is *not* used for habitual actions:

1) If no time can be attached to the habit, as: Semper oratorum eloquentiæ moderatrix *fuit* auditorum prudentia; The taste of the audience *has always been* the guide for the eloquence of the speakers. Cic. Or. 8, 24. By the writers of the silver age, however, habitual actions to which *no* time can be assigned, are frequently placed in the imperfect: Multa quam supervacua essent, non intelleximus nisi quum deesse cœperunt. *Ulebatur* enim illis non quia debebamus sed quia habebamus. Sen. Ep. 123.— Magni viri quidam sibi menstruas certis diebus feriis *dabant*; quidam nullum non diem inter otium et curas *dividebant*. Sen. Tranq. 15. Cicero, in such passages, would probably have expressed the predicates by the perfect of *solere*, or by oratio indirecta (*scimus dedisse—divideisse, or dare soliti sunt*).

2) In literary history, where the literary customs and habitual qualities, etc. of the different writers criticised, are the subjects of almost the whole composition, a frequent change of tenses is dictated by the requirements of formal euphony. Thus in Cicero's Brutus PERFECTS and IMPERFECTS of habit are promiscuously employed, as: Periculis suavitæ maxime hilaratæ Athenæ *sunt*; hujus ubertatem et copiam admiratæ, ejusdem vim dicendi terroremque *timuerunt*. Cic. Brut. 11, 44. But: Phalæreus *delectabat* magis Atheniensis quam *inflammabat*. Ib. 9, 37.— Thus: Versatus est in omnium doctrinarum meditatione *versabar*. Ib. 91, 308.— M. Piso *habuit* quoddam in natura genus acuminis. Ib. 67, 236; but: C. Carbonis naturalem quandam auctoritatem *habebat* oratio. Ib. 61, 221.

3) If habits are first mentioned in general terms, and subsequently specified by the details of these habits, it is customary to use the PERFECT for the predicate by which

<sup>1</sup> A frequent formula, 'That what I had undertaken might succeed'.—<sup>2</sup> in a previous letter.—<sup>3</sup> except those things (supply *diceret*), except in regard to those things.—<sup>4</sup> storehouse.—<sup>5</sup> probably referring to a passage in Cato's writings.—<sup>6</sup> refers to the antecedent *pecuniam*; 'with the revenues of which'.—<sup>7</sup> to blunder.—<sup>8</sup> that the fever had left you.—<sup>9</sup> that he had met Scævola.

the habit is designated in general terms, but the IMPERFECT for the predicates specifying the habit; as: Auditis oratoribus Græcis incredibili quodam nostri homines dicendi studio *flagraverunt*. *Excebat* eos magnitudo ac varietas causarum; *erant* huic studio maxima *exposita* præmia, etc. Cic. Or. 1, 4, 14, 15.— Deinde auguriis et reliqui reges *usi* (sunt), et exactis regibus nihil publice sine auspiciis *gerébatur*. Ib. Div. 1, 2, 3.— Vallo et Macedones et Græci *usi sunt*, sed usum... non *aplarerunt*; nam majores arbores *cædebant* quam... et quis *eminébant*, etc. Liv. 33, 5.— Tarquinius cum quibus *voluit* injussu populi *foedera fecit diremitque*; Latinorum sibi maxime gratiam *conciliabat*,... et affinitates *jungebat*. Liv. 1, 49.— *Habuit* Catilina permulta signa adumbrata virtutum. *Ulebatur* hominibus improbis multis, et quidem optimis se viris deditum esse *simulabat*, etc. Cic. Cæl. 5, 12.

4) If the author means to designate more the action itself than the habit which is implied by it, the perfect *may* be used, as: Apud Græcos eloquentissimi homines ad scribendam historiam se *applicaverunt* (where the weight is placed on 'ad scribendam historiam'). Cic. Or. 2, 13, 55.— Divus Augustus inter initia Sphinge *signavit* (sealed); duas in matris annulis invenerat; altera per bella civilia amfci *signavere* epistolas et edicta. Postea Alexandri Magni imagine *signavit*. Plin. H. N. 37, 4.— Aristoteles in hac quæstione adolescentis *exercuit*. Cic. Or. 14, 46.— Ægyptii et Babylonii, in camporum patentium æquoribus habitantes, omnem curam in siderum cognitione *posuerunt*. Cic. Div. 1, 42, 93. See Ex. 16 to R. 71.

Obs. 2. Predicates expressing habitual actions, always imply *two different actions*, one of which is the ACTION REALLY PERFORMED, and the other the IDEA OF HABIT or rule, which is always an inner state prompting or producing the action. From this double nature of predicates expressing habitual action, all the peculiarities in their treatment may be explained; namely 1) that imperfects of habit do not require the addition of a particular time, since the inner element always contains that indefinite *space of time* during which the external acts are represented to have happened; 2) that the perfect may always be used if the internal element is disregarded.— The language either expresses both these elements *separately*, or mentions only the *action as such*, leaving it to the reader to supply the *idea of habit*. (See Rem. 71.)

Rem. 71. If the *idea of habit* is designated by SPECIAL EXPRESSIONS, the action itself is variously added in the form of an OBJECT-INFINITIVE, of an INFINITIVE CLAUSE, or of a THAT-CLAUSE with *ut* (with later writers also *quod*). The verb expressing the *idea of habit* may be either in the PERFECT or IMPERFECT, but it *must* be in the imperfect if so required by the general rules, *i. e.* if a particular time of the habit is either expressed or necessarily understood.

Obs. 1. The expressions used to designate the IDEA OF HABIT, are: *Solere* (*solēbam* or *solitus sum*); *morem* or *more esse* (*mos erat* or *fuit*); *consuescere* in the pluperfect (*consueveram*), which takes the place both of the perfect and imperfect (the perfect *consuevi* meaning 'I am accustomed'); *institutum tenere*, to observe a habit. Here belong the adverbial expressions *vulgo* (*in vulgus*) and *semper* (customarily, generally, always). Some verbs combine the idea of habit and the action itself in *all their forms*, as *ut, se gerere* (to conduct one's self), and the intensive verbs in *itāre* and *sāre*, as *observitāre*, to observe habitually or usually; *facitāre*, to do habitually, etc. All these expressions, when they are verbs, admit both tenses, either the perfect or imperfect, unless (in accordance with the general rules) the addition of a particular time at which the *habit as such* was going on *requires* the imperfect (Ex. 3-6). But even in this last instance the perfect (though rarely) is sometimes used. (Ex. 8.)

Obs. 2. Habitual action is *always* designated by the addition of one of the expressions mentioned Obs. 1 if otherwise the connection would not clearly represent the action as an habitual or repeated one, as in the beginning of treatises, or new paragraphs unconnected with the previous sentences (see the beginning of Cic. de Am.) Ex. 1, 2. But frequently these expressions are chosen, even if no such necessity requires them.

A. SOLERE 1. Neque illud verum est quod Socrates *dicere solēbat*<sup>1</sup>, omnis in eo quod scirent, satis esse eloquentis. Cic. Or. 1, 14, 63.— 2. Curioni ita plausum est ut salvā republicā Pompējo *plaudī solēbat*<sup>2</sup>. Ib. Att. 2, 19, 3.— 3. In collēga meo sustinendo si

<sup>1</sup> *Dicebat*, instead of *dicere solēbat*, would not clearly express either habit or repeated action. Rem. 70, Obs. 3, No. 2.—<sup>2</sup> *Plaudēbatur* might be taken for a single continued action at the time spoken of; *plaudī solitum est* would not refer to the time expressly spoken of, although (rarely) it is thus sometimes used.

meam in illum indulgentiam *laudare solebātis*<sup>1</sup>, par prope laus P. Sestii esse debet. Ib. Sest. 3, 8.— 4. Hos *tum refutare solebāmus*<sup>2</sup>, quod pater multa nobis de ejus studio saepe narravit. Ib. Or. 2, 1, 2.— 5. *Tum* praetor in hac officina majorem partem diei cum tunica pulla<sup>3</sup> *sedere solebat* et pallio<sup>4</sup>. Ib. Verr. 2, 4, 24.— 6. Erat hoc factitatum semper etiam in Latinorum stipendio<sup>5</sup> *tum* quum illorum auxiliis *uti solebāmus*. Ib. 2, 5, 24.— 7. Hos libros Thucydides *tum* scripsisse dicitur quum, id quod optimo cuique Athenis *accidere solitum est*<sup>6</sup>, in exilium pulsus esset. Ib. Or. 2, 13, 56.— 8. Consuetudo quo quondam *solitus sum*<sup>7</sup> *uti* quum mihi in isto studio versari licebat. Ib. Or. 1, 30, 135.— 9. Hoc ne Thermodorus quidem faciebat, is qui Platōis libros *solitus est divulgare*<sup>8</sup>. Ib. Att. 13, 21, 4.— 10. Vester etiam D. Brutus, ut ex L. Accio *sum audire solitus, dicere non inculce solebat*. Cic. Brut. 28, 107. B. MOREM ESSE, etc.— 11. *Mos erat*<sup>9</sup> Faliscis eodem magistro liberorum et comite *uti*. Liv. 5, 26.— 12. Armati, ita *mos gentis erat*, in concilium venerunt. Ib. 21, 20.— 13. Nam, ut *mos fuit*<sup>10</sup> Bithyniae regibus, lectica octophoro<sup>11</sup> ferebatur. Cic. Verr. 2, 5, 11.— 14. Juba duo millia equitum, quos *sue custodiae causa*<sup>12</sup> circum se *habere consuevit*, Saburrae summisit<sup>13</sup>. Cæs. B. C. 2, 40.— 15. *Tenuit* Verres *hoc institutum* in<sup>14</sup> turibulis<sup>15</sup> omnibus quaecunque in Sicilia fuerunt. Cic. Verr. 2, 4, 21.— 16. Fuerat ille annus quum intentus arcus<sup>16</sup> est in me nnum, ut *vulgo* ignari rerum *loquebantur*. Ib. Sest. 7, 15.— 17. Clipeis<sup>17</sup> antea Romani *uti sunt*, dein scuta<sup>18</sup> pro clipeis fecere. Liv. 8, 8.— 18. Neque enim ita *se gessit* Verres in his rebus tamquam rationem<sup>19</sup> aliquando<sup>20</sup> esset redditurus. Cic. Verr. 2, 4, 22.— 19. Hic *se gerēbat* Atticus ut communis infimis, par principibus videretur. Nep. Att. 2.— 20. Neque solum deorum voces Pythagorē *observaverunt*, sed etiam hominum quae vocant omina<sup>21</sup>. Ib. Div. 1, 44, 102.— 21. Etiam Pomptidius multas privatas causas *actitavit*<sup>22</sup>. Ib. Brut. 70, 246.— 22. M. Bibulus *scriptitavit*<sup>23</sup> accurate. Ib. 77, 267.— 23. Timarchides Verri omnia decreta, imperia<sup>24</sup>, litteras<sup>25</sup> peritissime et callidissime *venditabat*<sup>26</sup>. Ib. Verr. 2, 2, 54.

*Rem. 72.* The idea of habit, if no doubt can arise as to the meaning of the imperfect, may always be expressed by the mere imperfect of the verb. Such imperfects comprise all actions which are represented as being done in consequence of a rule, by routine, or by any principle dictating or producing the same action under similar circumstances. These imperfects are generally rendered by the mere preterit; but sometimes in the same way as if *solere* were expressly used (*used to, was accustomed to*.) Imperfects of rule and habit denote:

#### A. Usages in the life, practice, and sentiments of nations.

1. Quid? nostri veteres versus ubi sunt quos 'olim Fauni vatesque canebant'<sup>27</sup>? Cic. Brut. 18, 71.— 2. Hostis<sup>28</sup> apud majores *is dicebatur* quem nunc peregrinum<sup>29</sup> dicimus. Ib. Off. 1, 123.— 3. Rudis adhuc antiquitas *credebat* et atrahi imbris cantibus et repellere. Sen. N. Qu. 4, 7.— 4. *Colebantur* ab Hernicis religiones<sup>31</sup> pie magis quam magnifice. Liv. 3, 57.— 5. Phalarica<sup>32</sup> *erat* Saguntinis hastili abiectione unde<sup>33</sup> ferrum<sup>34</sup> exstibat<sup>35</sup>. Id stuppa<sup>36</sup> *circumligabant*<sup>37</sup>, *lineabantque*<sup>38</sup> pice<sup>39</sup>. Ib. 21, 8.— 6. In Graecia *discēbant* omnes musicam. Cic. Tusc. 1, 2.

#### B. Habits of the Public.

7. Illa via qua (Appius Clodius) spectatum<sup>40</sup> ibat, Appia jam via *vocabatur*. Cic. Sest. 59, 126.— 8. Haec (Diane) statua ab omnibus advenis *visēbatur*<sup>41</sup>. Ib. Verr. 2, 4, 34.

<sup>1</sup> *Laudabātis* might be taken for a single (inner) action at the time when the 'sustinere' happened; *soliti estis* would not refer to such a time.— <sup>2</sup> *refutabāmus* might be taken for a refutation made on a single occasion.— <sup>3</sup> gray tunic, a garment worn only by the lower classes, and not fit for a praetor.— <sup>4</sup> Greek cloak, or gown (opposed to the toga).— <sup>5</sup> service.— <sup>6</sup> this was the case at all times; hence *solebat*, which would refer to the time spoken of, could not be used.— <sup>7</sup> *solēbam* should here be expected.— <sup>8</sup> published (without the author's permission).— <sup>9</sup> at the time spoken of.— <sup>10</sup> *not* at the time spoken of.— <sup>11</sup> a (sedan) chair with eight bearers.— <sup>12</sup> as a body-guard.— <sup>13</sup> sent to help.— <sup>14</sup> as to.— <sup>15</sup> censers.— <sup>16</sup> the bow was bent.— <sup>17</sup> shield.— <sup>18</sup> buckler.— <sup>19</sup> to render an account.— <sup>20</sup> ever.— <sup>21</sup> The so-called human forebodings (presages).— <sup>22</sup> attended to, acted in.— <sup>23</sup> wrote an accurate style (*accurate scribēbat*, would refer to the subjects of the composition).— <sup>24</sup> rules.— <sup>25</sup> papers (containing official decrees, grants, etc.).— <sup>26</sup> traded in; sold them to the parties.— <sup>27</sup> Quotation from Ennius.— <sup>28</sup> The term 'hostis' was applied to those whom.— <sup>29</sup> foreigner, stranger.— <sup>30</sup> by chants.— <sup>31</sup> religious ceremonies were celebrated.— <sup>32</sup> The Saguntians used a Phalaric (a kind of burning missile) with a shaft of pine-wood.— <sup>33</sup> at the top of which.— <sup>34</sup> the iron point.— <sup>35</sup> to stand out.— <sup>36</sup> tow.— <sup>37</sup> to wrap in.— <sup>38</sup> to smear, to paint.— <sup>39</sup> pitch.— <sup>40</sup> went to the spectacle.— <sup>41</sup> to visit.

— 9. Incoke, ut antea *demonstrabant* quid ubique esset, ita nunc quid ubique ablatum<sup>1</sup> sit ostendunt. Ib. 2, 4, 59.

#### C. Personal habits and qualities.

10. Cum pueris Socrates ludere non *erubescēbat*<sup>2</sup>, et Cato vino *larābat*<sup>3</sup> animum curis publicis fatigatum. Sen. Tranq. 15.— 11. Hannibal princeps in proelium *ibat*, ultimus conserto proelio<sup>4</sup> *excedēbat*<sup>5</sup>. Liv. 21, 4.— 12. Balbus Thorius ita *vivēbat* ut nulla posset inveniri voluptas qua non abundaret. Cic. Fin. 2, 20.— 13. Antiochus sellā eburneā<sup>6</sup> *jus dicebat*<sup>7</sup>, *disceplabatque* controversias minimarum rerum. Liv. 41, 20.— 14. Atticus mendacium neque *dicebat*, neque pati poterat. Nep. Att. 15.— 15. Atticus sic Graece *loquebatur* ut Athenis natus videretur. Ib. 4.

#### D. Occupations and professional activity.

16. Tantas clientelas<sup>8</sup> Appius *regēbat* cæcus<sup>9</sup> et senex. Cic. Sen. 11, 37.— 17. Philoctetes *propagābat*<sup>10</sup> vitam aucupio<sup>11</sup> pennarumque contextu<sup>12</sup> corpori tegumenta<sup>13</sup> *faciebat*. Ib. Fin. 5, 11.— 18. Hic quæstu<sup>14</sup> *se sustinēbat*<sup>15</sup>. Sen. Mort. Cæs. 3.— 19. Dionysius tyrannus, Syracensis expulsus, Corinthus pueros *docēbat*. Cic. Tusc. 3, 12.

#### E. Literary activity and merits.

20. Antonius *reperiēbat* quid dici opus esset, memoriæque ea *comprehendēbat*; *excellēbat* autem actione<sup>16</sup>. At Crassi magis *enitēbat*<sup>17</sup> oratio. Cic. Brut. 59, 215.— 21. P. Scipio omnis sale<sup>18</sup> facietisque<sup>19</sup> *superābat*<sup>20</sup>. Ib. 34, 128.

#### F. Actions regularly performed by order, or by natural necessity.

22. Calpurnius<sup>21</sup> eum interdum solutum<sup>22</sup> custodes *sequebantur*<sup>23</sup>, noctu clausum<sup>24</sup> *asservēbant*<sup>25</sup>. Liv. 24, 45.— 23. Poëta Antipater Sidonius omnibus annis uno tantummodo die, quo genitus<sup>26</sup> erat, febri *implicabatur*<sup>27</sup>. Val. Max. 1, 8, 16.

GENERAL REMARK about the use of the Imperfect in contrasting it with Perfects. By such an opposition both the imperfects and perfects are placed in a peculiar light, which can not often be imitated in English. The following passages may serve as examples:

1. Non *defuit* (militibus) quid responderetur; *deerat* qui daret responsum (*deerat* emphasizes 'just then', while *defuit* is not confined to the moment spoken of). Liv. 3, 50.— 2. *Favēbam* reipublice cui semper *favi*. Cic. Fam. 12, 7 (*favēbam*, then and there; *favi*, at all times).— 3. Quamquam te bonum timor *faciebat* (at that particular time), improbum *fecit* audacia (at all times except the particular time mentioned). Cic. Phil. 2, 36, 99.— 4. Deinceps fuit annus quo ego consulatum *petivi*; *petēbat* Catilina mecum. Cic. Cæl. 4, 10 (*petivi* is complete within the year; but also because the action was crowned with success: 'I obtained the consulship'. *Petēbat* is incomplete at the time of Cicero's candidature, but also because Catiline failed to carry the election).— 5. *Ælius scribēbat* orationes quas alii dicerent, ut Q. Pompejo Rufo (as for instance for Pompejus Rufus), quamquam is etiam ipse *scripsit* eas quibus pro se est usus. Cic. Brut. 56, 206. (The imperfect *scribēbat* represents the action as a professional activity, see R. 72, No. D.; but *scripsit*, although involving repeated action is represented as an occasional action.— 6. M. Scaurus non saepe *dicebat*. Latine vero inprimis eleganter *est locutus*. Cic. Brut. 35, 135. (*Dicebat* expresses habit; *est locutus* is in the perfect, because the imperfect *loquebatur* might be understood as limiting the action to the occasions when he 'dicebat').— 7. *Dicebat* melius quam *scripsit* Hortensius. Cic. Or. 38. *Dicebat* is an imperfect of habit; *scripsit* is not represented as a habit, but as the judgment of Cicero on the quality of Hortensius's writings. It is the main predicate, while *dicebat* has the force of a concessive clause. Cicero meant to say: 'Hortensius's writings are no good models for imitation'. But to soften the harshness of this criticism, he added that *whenever* Hortensius spoke, he spoke well. From urbanity the excuse is placed before the censure. This force of *scripsit* would be destroyed by *scribēbat*, or by placing *dicebat* in the perfect.— 8. Nec enim Deiotaro cornix canere potuit, recte eum facere quod populi Romani libertatem defendere pararet. Ipse hoc *sentiēbat*, sicuti *sensit*. Cic. Div. 37, 78. *Sentiēbat*, if not followed by *sicuti sensit*, on account of its opposition to *potuit*, would

<sup>1</sup> *Auferre*, to steal.— <sup>2</sup> did not blush; was not ashamed.— <sup>3</sup> to relax.— <sup>4</sup> after the battle had once commenced.— <sup>5</sup> was the last to leave.— <sup>6</sup> ivory chair.— <sup>7</sup> held court as well as discussed.— <sup>8</sup> bodies of clients.— <sup>9</sup> although blind.— <sup>10</sup> literally 'delayed his life', i. e., kept himself alive.— <sup>11</sup> bird-catching.— <sup>12</sup> by weaving feathers together.— <sup>13</sup> coverings for his body.— <sup>14</sup> by trade.— <sup>15</sup> made a living.— <sup>16</sup> by his delivery.— <sup>17</sup> Crassus was more distinguished by the substance of his addresses.— <sup>18</sup> wit.— <sup>19</sup> pleasantry.— <sup>20</sup> was superior to all.— <sup>21</sup> in the city of Cales.— <sup>22</sup> without fetters.— <sup>23</sup> accompanied.— <sup>24</sup> under lock.— <sup>25</sup> guarded.— <sup>26</sup> on which he was born, i. e., his birthday.— <sup>27</sup> was involved in, seized with.

have an hypothetical force (p. 730, 3): 'he would have felt this even without the cawing of the crow'. The perfect *sensit* means here completeness as *reality* and *actuality* (as he really and actually felt it).

For the Imperfect in letters see § 589.

#### IV. PLUPERFECT TENSE.

§ 586. The PLUPERFECT generally corresponds to the *English* pluperfect, except in the instances mentioned OBS. 3.

OBS. 1. The pluperfect is used (a) to denote an action which was complete *before* the time spoken of: Iter (Hannibalis in descensu de Alpibus) multo quam in ascensu fuerat difficilior fuit. Liv. 21, 35; (b) to denote an action which *had commenced before* the time spoken of, but was completed at the time spoken of. Such pluperfects are frequently co-ordinated with *historical imperfects*: Prima luce et nostri omnes erant transportati, et hostium acies cernebatur (before daybreak, i. e., before the time spoken of, the act of shipping the troops was not yet completed, but it had commenced; at daybreak the act was complete). Cæs. B. G. 7, 62; (c) to denote an action, commenced before the time spoken of, the effects and consequences of which are still *lasting at* the time spoken of. Such pluperfects have the force of periphrastic imperfects (p. 127, R. 134), with which they are frequently co-ordinated: Hunc omnem locum copiae Gallorum compleverant et maceriam sex in altitudinem pedum praeduxerant. Castra opportunitis locis erant posita (the place was still filled with troops, and the wall still existed at the time spoken of. *Erant posita* is a periphrastic imperfect). Cæs. B. G. 7, 69.—Ita uno tempore et longas navis aestus compleverat, et onerarias tempestas afflictabat; Thus the tide *had at* the same time filled the long ships, when the storm was injuring the freight-ships. Cæs. B. G. 4, 29 (aestus compleverat has the force of aestu completus erant).—Dum certamen in unam partem hostium oculos averterat, scalis capitur murus; While the combat *had turned* the looks of the enemy in one direction, the wall was taken by scaling ladders. Liv. 32, 24 (dum averterat has the force of averterat, et dum aversas tenebat, or rather dum—tenet).

OBS. 2. The ancient grammarians define the pluperfect as the tense denoting 'what happened a very long time ago', and hence Priscian strangely states that in such passages as 'Trojae qui primus ab oris venit (Virg. Aen. 1. 1)', and 'cecinit quae prima Aeneas (Ib. 8, 310)', the perfects *venit* and *cecinit* have the force of *pluperfects*. Sometimes, indeed, pluperfects occur which seem to be used in accordance with this definition, as: 'Iccirco genueram (filium) ut esset qui pro patria mortem non dubitaret occumbere'. Cic. Tusc. 1, 42, 102. But if the definition of the ancient grammarians were correct, a very great number of perfects would have the force of pluperfects, and a still greater number of pluperfects must be considered as faulty.

OBS. 3. Sometimes the pluperfect denotes an action happening *at the time spoken of*. By such pluperfects the author prepares the mind of the reader for a later past action to be mentioned afterwards; as: Dum elephantum trajiciuntur, Hannibal Numidas equites ad castra Romana miserat (this pluperfect refers to a skirmish of the Numidians with the Romans, which is reported directly afterwards). Liv. 21, 29.—Nam quum inambularem in xysto, et essem olivus domi, M. ad me Brutus venerat (referring to a conversation between Cicero and Brutus, narrated afterwards). Cic. Brut. 3, 10. See p. 320, OBS. 1.—While the pluperfect thus pregnantly foreshadows a later past action, it may even denote an action happening *after* the time spoken of, completely reversing the logical order of time: P. Cornelius consul triduo fere postquam Hannibal a ripa Rhodani movit, quadrato agmine ad castra hostium venerat. Liv. 21, 32. Here an *English pluperfect* should be used for the Latin perfect *movit*, and the Latin pluperfect *venerat* must be rendered by an *English preterite*. Thus in the following sentence: Jam aliquantum spatii ex eo loco ubi pugnatum est, aufugerat. Liv. 1, 25, 8.

OBS. 4. In the following instances the *English pluperfect* is expressed by a Latin imperfect: (a) in the case mentioned Rem. 59; (b) sometimes, to denote an action lasting without defined limits at some time *before* the time spoken of, as: Qui ne nostrorum quidem finium nobis per nos tuendorum jus antea dabant (inst. of *dederant*), nihil intercesserunt. Liv. 8, 4.—Latin PERFECTS are used with the force of *English pluperfects*: (a) after *postquam*, *ubi*, *simulac*, and sometimes after *quum* (see p. 659, foll.); (b) sometimes in CLAUSES, particularly relative clauses: Cognitis eis rebus quae sunt gestae in citeriore Hispania, bellum parabat. Cæs. B. C. 2, 18.—In eadem causa fuerunt Usipetes, qui compluris annos Suevorum vim sustinuerunt (which had happened *before* the time spoken of). Ib. B. G. 4, 9. See the Ex. quoted p. 307, OBS. 3 (domus quae regis Hieronis fuit). Sometimes such perfects occur in principal sentences: Dies haud ita multi intercesserunt (for *intercesserant*) quum legati ex Leontinis, praesidium orantes, venerunt. Liv. 24, 29.

OBS. 5. The *English preterit* corresponds to a Latin pluperfect in many clauses dependent on imperfects of contingent action. See R. 65.

OBS. 6. Frequently pluperfects are followed by clauses with *quum* having the force of a relative adverb (*quo tempore*). If in this instance the action in the clause with *quum* is represented to have *immediately* followed the action expressed by the pluperfect, certain adverbial expressions of time are attached to the pluperfect, as *vix* (scarcely), *commodum* (just), *tantum quod* (just a moment); *Vix* prior tumultus conticuerat quum Scipio vi majore urbem aggredi jubet (scarcely had the tumult subsided). Liv. 26, 45.—*Commodum* ad te miseram Demeam quum Eros ad me venit (I had just sent Demea to you). Cic. Att. 13, 30, 2 (See Ib. 13, 9, 1; 13, 19, 1).—*Tantum quod* ex Arpinati veneram, quum mihi a te litterae reddita sunt (I had just arrived a moment ago from my villa in Arpinum, when, etc.). Cic. Fam. 7, 23, 1. See p. 652, 16.

OBS. 7. Sometimes the pluperfects of DEPONENT VERBS take the auxiliary *fueram* instead of *eram*, the same as the periphrastic pluperfects of the passive (p. 128, R. 136). These forms are used (a) to denote actions happening *before* actions expressed by ordinary pluperfects, as: Huic Caesar, quod in omnibus bellis singulari ejus opera fuerat usus, majorem locum restituerat; To him Caesar *had restored* the place of his ancestors because he *had*, in all wars, made use of his special services. Cæs. B. G. 5, 25. (b) to represent the action as *complete* in certain particular senses, as: Convenire omnes praeterquam qui cedentes in arcem Romanos persecuti fuerant. Liv. 25, 10. The form *fuerant* intimates that the act of 'following' the fleeing Romans was complete and definite, so that they remained in the castle together with the Romans, a fact which would not be expressed by *persecuti erant*. In a similar way are used '*latatus fuerat*' (Liv. 25, 6), and *fuerant usi* (Cæs. B. G. 4, 38).

OBS. 8. For the use of the pluperfect indicative with hypothetical force, see B. VI. p. 730.—For the use of the pluperfect indicative with the force of a 'future-pluperfect' see R. 76, OBS. 8.

#### V. FUTURE TENSES.

§ 587. Both the future of the present system ('FUTURE-PRESENT' or 'FUTURE' without any addition, § 322, No. 3), and the future of the perfect system ('FUTURE-PERFECT', § 340), denote actions to happen *after the speaker's time*, or *after the moment of speaking*. The future-perfect represents a future action as *complete* (R. 74); the future-present represents an action simply as *future* without distinguishing its completeness or incompleteness (R. 73).

OBS. The views of the ancient Latin grammarians on the future-perfect are as vague and erroneous as their ideas on the pluperfect (§ 586, OBS. 2). They called this tense the 'subjunctive of the future tense' (Prisc. 8, 10, 55), being led to this erroneous view by the FORM of the future-perfect, which, except in the first person singular, is the same as that of the perfect subjunctive. To this similarity in form often corresponds a similarity in meaning, so that it may sometimes appear doubtful whether such forms (for instance, *negaveris*, *q̄irerint*, etc.) must be assigned to the perfect subjunctive, or to the future-perfect. See R. 75, OBS. 1.—But nobody now doubts that the form *amavero*, etc. is an indicative, although there are some grammarians who have enriched the language with a subjunctive of the future-present (*amaturus sim*), while one or two have introduced even a subjunctive of the future-perfect (*amaverim*). These evident errors, hardly need refutation.—Modern Latinists and grammarians have given to the future-perfect the name of '*Futurum exactum*,' or '*Futurum perfectum*,' both terms exactly corresponding to the nature of this tense, as expressing a *future complete* action.

§ 588. The two future tenses are either (a) ordinary futures (R. 73, 74); or (b) potential futures (R. 75); or (c) dependent futures (R. 76).

Rem. 73. The FUTURE-PRESENT, as ORDINARY-FUTURE (i. e. strictly referring to future time), corresponds to the *English future tense*, both with 'shall' and 'will.' Hence the ordinary future-present is used

(1) to represent an action as *predicted* by the speaker; (2) to represent a future action as *determined* and *willed* by the speaker (sometimes by other persons).

Obs. 1. If the future represents an action as *predicted* by the speaker, it corresponds to the English form, with 'shall' for the first person, and to the form with 'will' for the 2. and 3. persons, as: Solem præ jaculorum multitudine *non videbitis*... 'In umbrâ igitur *pugnabimus*;' 'You *will* not see the sun for the multitude of missiles...' 'We *shall*, then, *fight* in the shade.' Cic. Tusc. 1, 42, 101.—Ista lex *perferetur*, vult enim Cæsar; That law *will pass*, for Cæsar will have it so. Cic. Att. 13, 32, 4. (See Ex. 1-9.)

Obs. 2. If the future represents an action as *determined* by the speaker, it corresponds to the English future, with 'will' for the first person, and to the future, with 'shall' for the 2. and 3. persons, as: *Occidar* equidem, sed victus non *peribo*, I *shall be killed* (prediction), but I *will not perish* (determination) a vanquished man. Auct. Her. 4, 52.—Sella tibi *erit* tamquam hypodidascalo proxima: *sequetur* pulvinus; You *shall have* the next chair in your quality as sub-teacher; a cushion *shall follow*. Cic. Fam. 9, 18, 4. (i. e. I *will take care* that you have these things.) The first person of the future is rendered by 'shall,' or 'should,' if the action is determined by others than the speaker: *Classibus adversabimur igitur*? 'Shall' (should) we, then, oppose the fleets? Cic. Att. 10, 8, 4. Ex. 8-13.

Obs. 3. For rendering the English 'shall' in LAWS, see R. 75, Obs. 5.

Obs. 4. Sometimes the Latin uses a PRESENT tense when in English a future is required, namely:

(a) Often with verbs expressing a *present state*, which is to continue till another action will take place, especially with verbs of expecting and waiting, as *expectare*, *opperiri*, *teneri*, *commorari*: Romæ *teneor* dum a Dolabella procuratoribus exigam primam pensionem; I *shall be kept* (shall remain) in Rome till the first payment is due by Dolabella's agents. Cic. Fam. 6, 18, 5.—Itaque *expecto* Thessalonice acta Kal. Sext.; Therefore I *shall await* at Thessalonica what will (may) be done at the first of Sextilis. Ib. Att. 3, 15, 6. This present has the same nature as the present tense used for states that *have been* lasting for a certain time (R. 42).—But often the *future* is used in this instance in Latin as it is in English: Dum herus adveniat a foro, *opperiar* domi; I *shall wait* at home till the master arrives from the forum. Plaut. Pœn. 4, 2, 107. See Ex. 14-17. *Dum* (till) referring to future actions in this connection has its predicate either in the future-present or in the present indicative or subjunctive. See Cic. Fam. 16, 10, 1.

(b) Sometimes, with verbs of *going* and *coming*, if either an adverb or a clause distinctly shows that a future action is meant, or if the act is to be immediately performed (similar to the imperfect in the case of R. 53, Obs. 2). This usage, however, is confined to colloquial or epistolary style: Ego in ædem Venerisæo, I *shall go* (am going directly) to the temple of Venus. Plaut. Pœn. 1, 1, 62.—Lentulus hodie apud me (est), cras mane *vadit*; Lentulus is in my house to-day, he leaves (is going to leave) to-morrow morning. Cic. Att. 14, 11, 2.—Ego *abeo*; vale atque salve! I *must go*, good bye! Plaut. Curc. 4, 4, 32. Ex. 18.

(c) Sometimes in clauses with *antequam* and *priusquam*. See R. 76, Obs. 3, c.

Obs. 5. Certain verbs are idiomatically used in the future to increase the force of an affirmation, the same as 'swearing' particles. Here belong (a) *Moriar si* (I will die if; I pledge my word that...not); *Moriar si* præter te quem reliquum habeo; I will die if I have anyone left but you. Cic. Fam. 9, 15, 2.—(b) *Ita vivam* (as true as I live), used parenthetically, as: Sollicitat, *ita vivam*, me tua valetudo: Upon my life, your health makes me uneasy. Cic. Fam. 16, 20.—(c) *Amabo*, or *amabo te*, as parenthetical sentence, which is added both to imperative and interrogative sentences: Cogita, *amabo*, item nos perhiberi; Please consider that we are in the same predicament. Plaut. Pœn. 1, 2, 30.—Soror, parce, *amabo*; Sister, forbear, I beseech you! Ib. 1, 2, 39.—Eho, *amabo*, quid illo nunc properas? Halloa! Why, for the sake of your love, are you now hurrying there? Ib. 1, 2, 54.—*Amabo*, num hi falso oblectant gaudia nos? Dear me, do they amuse us with a false pleasure (hope)? Ib. 5, 4, 101.—*Amabo te*, quum dabis posthac aliquid donum litterarum, mei memineris; Please remember me if you, hereafter, should make any literary gift. Cic. Fam. 15, 17, 4.—*Amabo* in this connection literally means 'I shall be obliged to you if you do, or if you tell' what is expressed by the main predi-

<sup>1</sup> Most grammarians consider the expressions *moriar si*, and *ita vivam* as present subjunctives. Both forms have here exactly the same meaning, and in place of 'Sic me di amabunt' the form 'sic me di ament' is frequently found; but only 'amabo te' not 'amem te'.

cate.—Similar is the force of the expression 'Sic me di amabunt' (by the love of the gods), i. e., 'The gods shall love me as certainly as what is expressed by the main-predicate is true': Ita me di amabunt, haud propterea te rogo ut hoc proferam. Ter. Hec. 1, 2, 31.

1. Hodie apud inferos<sup>1</sup> fortasse *cenabimus*. Cic. Tusc. 1, 42, 101.—2. Hoc *assequemur* et tacendo et latendo<sup>2</sup>. Ib. Att. 13, 31, 3.—3. Nomen iudicium *amittemus* si ad causas<sup>3</sup> iudicia jam facta<sup>4</sup> domo *deferemus*<sup>5</sup>. Ib. Clu. 2, 6.—4. Quid ergo potissimum *scribam*? Quod velle te puto<sup>6</sup>, cito me ad te esse venturum. Ib. Fam. 9, 3, 1.—5. *Quæres* fortasse cur, quum hæc in urbe sint<sup>7</sup>, non absim, quemadmodum tu. Ib. 9, 2, 2.—6. Seditiōnis auctōres sanguine *luent*<sup>8</sup> quod admisērunt<sup>9</sup>. Liv. 28, 29.—7. Mihi crede, unus annus additus laboribus, multorum annorum lætitiā<sup>10</sup> nobis *offeret*<sup>11</sup>. Cic. Qu. Fr. 1, 1, 1.—8. Quamquam invitā<sup>12</sup> te *carēbo*<sup>13</sup>, animum ego *inducam*<sup>14</sup> tamen ut illud consulam<sup>15</sup>. Plaut. Cist. 3, 4, 3.—9. In sua terrā *cogam* pugnare Hannibalem, et Carthāgo præmium victoriæ *erit*. Liv. 28, 44.—10. De<sup>16</sup> Fadio *faciemus* studiōse quæ rogas. Cic. Fam. 15, 14, 2.—11. Quare negent Siculi sese te actore<sup>17</sup> ad iudicium adfuturos, ex me non *audies*. Cic. Div. Cæc. 9, 28.—12. Nostra<sup>18</sup> ad diem dictam<sup>19</sup> *fient*. Ib. Fam. 16, 10.—13. A nobis *agentur* omnia diligenter. Ib. 1, 5a, 3.—14. *Exspecto* dum ille venit. Ter. Eun. 1, 2, 126.—15. Ego in Arcano *opperior* dum ista cognosco. Cic. Att. 10, 3.—16. Tu istos abdicce intro<sup>20</sup>, nos hæc hinc *præstolabimur*<sup>21</sup>. Plaut. Pœn. 5, 3, 36.—17. *Opperiar* hominem hinc ut salutem<sup>22</sup>. Ter. Ad. 3, 3, 92.—18. Ego hos *conveniam*<sup>23</sup>; post huc *redeo*. Ib. 4, 7, 39.

Rem. 74. The (ordinary) future-perfect in independent sentences is used (a) with the force of an English future-perfect (Obs. 1); (b) with the force of an English future-present to represent actions as COMPLETE in the future (Obs. 2).

Obs. 1. While the English future-perfect is rarely used in independent sentences, and still more rarely in clauses, the Latin future-perfect most frequently occurs in clauses (R. 77), but also (similarly to the English) in independent sentences. But it is rarely used with the force of an English future-perfect. Where it occurs with the meaning of the English future-perfect, it is mostly qualified by clauses with *dum* (while, till), or by clauses with *si*, with *priusquam*, or by general relative clauses: *Dum* tu hæc leges, ego illum fortasse *convenero*; Perhaps I *shall have met* with that man *till* (before, when) you read this letter. Cic. Att. 9, 5.—*Præclare vixero si* quid mihi *prius acciderit quam* hoc tantum mali *videro*; I *shall have lived* happily if I die before seeing so great a calamity. Ib. Mil. 36, 99.—*Is bellum confecerit* qui Antonium opprēsserit; He who crushes Antonius, will have finished the war. Ib. Fam. 11, 12, 2. See R. 76, Obs. 4 (Ex. 1, 2).

Obs. 2. Frequently the Latin future-perfect is used with the force of an English future-present. This is the case if the predicate may be conceived as an act complete in the future, as: Per paucis diebus in Pompejanum; post in hæc Puteolana regna *renavigabo*; In a very few days I *shall start* for (my) Pompejanum; then I *shall return* by sail to these Puteolan realms. Cic. Att. 14, 16, 1. Here it is not the return-trip, but the return itself which is expressed by the future-perfect. The future *renavigabo* would mean 'I shall be on the return-trip'. (See Ex. 3-9). Thus generally 'videro' is used with the force of 'I shall see' (but also *videbo*). *Videro* implies the information derived from 'videre' as an accomplished act: Ego istæ recte ut fiant *videro*; I *shall see* to this being done properly. Ter. Andr. 2, 6, 25. Thus frequently 'Sed *viderimus*' as a detached sentence (but we shall see). Cic. Att. 4, 5, 3; Ib. 4, 6, 4, and often. But 'Sed *videbimus*' Ib. 10, 4, 11.—*Scrupulum abeunti, sed videbimus*; A poser for one that is going away, but we *shall see* (i. e., whether it will be feasible, representing the act as incomplete in the future). Ib. Fin. 4, 28, 80. See Ex. 10, 11. Hence sometimes future-perfects and future-presents (both equivalent to English common futures), are co-ordinate if the one denotes a complete act in the above sense, and the other an act without definite limits: Nusquam facilius hanc miserrimam vitam vel *sustentabo*, vel *abjecero*; Nowhere it will be easier to me either to *drag along* this most wretched life, or to *throw it off*. Cic. Att. 3, 19, 1. Ex. 12.

<sup>1</sup> In the other (lower) world.—<sup>2</sup> by silence and concealment.—<sup>3</sup> trial.—<sup>4</sup> formed.—<sup>5</sup> *deferre ad*, to bring to d. e., if we form our judgments at home before the trial.—<sup>6</sup> what I believe is your wish, namely that I, etc.—<sup>7</sup> is transpiring.—<sup>8</sup> expiate with their blood.—<sup>9</sup> to commit.—<sup>10</sup> happiness for many years.—<sup>11</sup> to give.—<sup>12</sup> with regret.—<sup>13</sup> to miss.—<sup>14</sup> *animum inducere*, to take care, to try.—<sup>15</sup> to attend to that matter.—<sup>16</sup> as to Fadius.—<sup>17</sup> *te actore*, when you are appointed manager of the trial.—<sup>18</sup> our duty.—<sup>19</sup> at the appointed day.—<sup>20</sup> *intro abducere*, to take into the house.—<sup>21</sup> to expect, to wait for.—<sup>22</sup> to salute him, to pay my respects to him.—<sup>23</sup> *aliquem convenire*, to see somebody (in order to speak with him).

Obs. 3. Sometimes future-perfects of deponents (but only in *clauses*) take the auxiliary *fuero* instead of *ero*, the same as periphrastic future-perfects of the passive voice: *Nunc proficiscemur ad reliqua, ei panca ante fuerimus a vobis deprecati*. Cic. Verr. 2, 3, 5.

1. *Bidnum<sup>1</sup> fueris in viâ dum in Cumânum<sup>2</sup> venis*. Cic. Fam. 16, 10, 1.— 2. *Si omnes occidimus<sup>3</sup>, ego omnibus exitio<sup>4</sup> fuero*. Ib. Qu. Fr. 1, 4.— 3. *Clamor et primus impetus castra cepit*. Liv. 25, 33.— 4. *Atque hoc idem in amfci re<sup>5</sup> aut periculo fecerit*. Cic. Off. 1, 43, 154.— 5. *Quis tibi primum illud concesserit præter Pyrrhônem?* Ib. Fin. 4, 18, 48.— 6. *Respirâro<sup>6</sup> si te videro*. Ib. Att. 2, 24, 5.— 7. *Multum ad ea quæ quærimus<sup>7</sup> explanatio tua profecerit<sup>8</sup>*. Ib. Fin. 3, 4.— 8. *Isto pretio nos<sup>9</sup> tuas<sup>10</sup> facile feceris*. Plaut. Pæn. 5, 4, 62.— 9. *Si pergis, abiero*. Ter. Ad. 1, 2, 47.— 10. *Quiesce<sup>11</sup>, istanc rem ego recte videro*. Ib. Merc. 2, 3, 111.— 11. *Quæ fuerit causa mox videro*. Cic. Fin. 1, 10.— 12. *Quæ quum magna ipsi habebimus<sup>12</sup>, tum demperimus<sup>13</sup> hostibus multo majôra*. Liv. 26, 43.

Rem. 75. The future (both present and perfect) is called POTENTIAL if not a future *time*, but particular *conceptions* of the speaker in regard to the predicate are expressed in the *form* of a future. The future is thus used 1) with the force of an IMPERATIVE (Obs. 1); 2) to represent the predicate as a CONCLUSION of the speaker from premises given or understood (Obs. 2, 4); 3) to designate the predicate as a RULE or LAW established by the speaker (Obs. 5); 4) to designate the predicate as an OPINION of the speaker (Obs. 6); 5) in verbs of saying and uttering as a modest form of the assertion (Obs. 7). The future-perfect is not used with potential force, except (c) as a DEPENDENT future (R. 76), (b) when it has the force of an imperative (Obs. 1). In all other instances of potential futures generally the *future-present* is employed.

Obs. 1. Both future tenses are used with the force of IMPERATIVES, being rendered by English imperatives: In omnibus rebus quid tantis honoribus debeas cogitabis; Consider in all things what you are owing to such honors. Cic. Qu. Fr. 1, 1, 10. Vos, milites, eos quorum vos modo arma texerunt, patrônes salutabitis; You, soldiers salute (will salute) those whose arms have protected you just now, as patrons. Liv. 22, 29.— Quare nihil properâris; Therefore be not in any hurry. Ib. Fam. 16, 3, 2.— In 'mei meminervis' (remember me), Cic. Fam. 15, 7, 4, meminervis may be taken for a subjunctive (perfect, with the signification of a present), or for a future. But also the future-perfects with imperative force of other verbs may generally be taken for perfect subjunctives. See § 594.— Ex. 1-5.

Obs. 2. The Latin likes to employ the form of the future-present in argumentative discourse to represent the predicate as a CONCLUSION from premises given or understood, or as a statement dependent on a SUPPOSITION made or understood by the author. In English such futures are sometimes rendered by a future with 'will', but more frequently by presents or some form of the potential (can, must, would): Aberit igitur a sapiente ægritudo; Hence grief will not dwell within the wise (cannot dwell, does not dwell). Cic. Tusc. 3, 8, 18.— Num igitur ignobilitas et humilitas sapientem beatum esse prohibebit? Can (will, would) therefore a low and humble station of life hinder the wise from being happy? Ib. 5, 36, 103.— Si considerâre volumus quæ sit in natûra hominis excellentia, intelligemus quam sit turpe delicatè ac molliter vivere; If we would perceive (if we are not blind to) the excellence in man's nature, we must comprehend the disgrace of a luxurious and effeminate life. Ib. Off. 1, 30, 106.— Frequently such futures dependent on suppositions (expressed or understood) are rendered by an English hypothetical period with 'would' or 'should': Si de re militari huic dicendum erit Sulpicio, quæret a C. Mario; If (for instance) Sulpicius should have to speak on military subjects, he would apply to C. Marius. Cic. Or. 1, 15, 66.— Quamobrem si quis universam oratôris vim definire vult, is erit orator meâ sententiâ qui, etc.; If, therefore, any one would define the ideal of an orator, I should say that he is an orator who, etc. Cic. Or. 1, 15, 64. (Here the future erit has the force of dicam cum esse).—Aristoteles istud non dabit, quippe qui, etc.; Aristotle would not concede this, since, etc. Ib. Fin. 4, 18, 49. (Here we supply 'si eum quæsieris'.)— See Ex. 6-9.

<sup>1</sup> Two days.— <sup>2</sup> my villa near Cumæ.— <sup>3</sup> to perish.— <sup>4</sup> abstract dative: ruin.— <sup>5</sup> affair.— <sup>6</sup> to take breath again, to be relieved.— <sup>7</sup> ad ea quæ quærimus, for our purpose.— <sup>8</sup> to contribute, to aid.— <sup>9</sup> us (female slaves).— <sup>10</sup> thy property.— <sup>11</sup> be quiet.— <sup>12</sup> while those things which we shall have, are great.— <sup>13</sup> to take away from.

Obs. 3. In all instances of potential futures the verbs expressing possibility, volition, and necessity, namely *posse, velle, debere, oportet, necesse est*, and the predicative gerundials, are frequently placed in the future with a potential force which is already contained in the verb itself. Such future predicates are generally rendered by some of the forms of the English potential: Si igitur (talis vir) non poterit bella gerere, etc., illa tamen præstare debebit quæ erunt in ipsius potestate; If, therefore, such a man cannot conduct wars, etc., he must certainly (is certainly bound) to perform those duties which are in his power. Cic. Off. 1, 33, 121.— Quid autem dici poterit si turpitudinem non ipsam per se fugiendam esse statuimus? But what can be said if we assume that turpitude is not detestable in itself? Ib. Fin. 3, 11, 38.— Ne respublica quidem hæc pro se suscipi volet; Not even the State would have such things done for it. Ib. Off. 1, 45, 159.— Et quidem hanc totam copiam jam Lucullo nostro notam esse oportebit; This whole treasure, too, must have been known already to our friend Lucullus. Ib. Fin. 3, 2, 8. See Ex. 10-13, 17, 19.

Obs. 4. Two particular forms of conclusions are very frequently expressed by potential futures, namely 1) the SYLLOGISM; 2) the DEDUCTIO AD ABSURDUM.

A. In SYLLOGISMS the present tense, or *necesse est* with a clause, may also be used in place of a future. In English we use (besides the present) the potential with 'must' or the future with 'will': (MAJOR PREMISE) Numquam sapiens est perturbatus; (MINOR PREMISE) at ægritudo perturbatio est animi; (CONCLUSION) semper igitur ægritudine sapiens vacabit (or vacat, or sapientem vacare necesse est); A wise man is never disturbed in his mind; but grief is a disturbance of the mind; hence a wise man must (will) always be free from grief. Cic. Tusc. 3, 7, 15. See Ex. 14.

B. The DEDUCTIO AD ABSURDUM is either clothed in the form of a clause with *si*, the principal sentence with the potential future containing the conclusion represented as false or absurd; or in the form of an independent sentence as premise, and a *question* with a potential future as conclusion. Such questions are always without interrogative particles. Both forms are usually rendered by a hypothetical period: Si nihil (a sapientiâ conficietur) nisi corpus, summa bona erunt illa, valetudo, vacuitas doloris, pulcritudo, cetera; If wisdom had only to deal with corporeal things, the highest goods would be health, freedom from pain, beauty, and the like. Cic. Fin. 4, 13, 35.— Timor igitur ab his ægritudinem potuit repellere, ratio ab sapienti viro non poterit? If fear was powerful enough to repel grief from these men, should not (must not) reason have the power to repel it from the wise? (or: Fear had the power to repel, etc., and reason should not, etc.) Cic. Tusc. 3, 27, 66. See Ex. 15, 16. The premises attached to such questions may also precede in the form of a relative clause, the interrogative sentence containing the antecedent: Cujus candelabri fulgore illustrari Jovis templum oportebat, id apud istum in ejusmodi convivii constituitur? A chandelier by whose lustre Jove's temple ought to have been illuminated, should be used in such kind of banquets by such a man? Cic. Verr. 2, 4, 32.— Sometimes the clause with *si* is understood, as: Quo quidem modo (i. e. si hoc ita erit) nec duces erunt utiles, nec magistratus, nec medicina, nec denique ipsa sapientia; In that way neither generals would be of any use, nor magistrates, nor the healing art, nor even wisdom itself. Quint. 2, 16, 5.

Obs. 5. RULES and LAWS laid down by the speaker are expressed 1) by the second form of the imperative; 2) by the subjunctive present; 3) by gerundials; 4) by *debere* or *oportet* (not *necesse* or *opus est*); 5) by the future-present; 6) by the present tense if the existing law is merely repeated.

A. THE SECOND FORM OF THE IMPERATIVE is used in the predicate containing the *injunction*, if the law itself is the speaker (corresponding to the English 'shall'). But this form is limited to the laws in the strict sense of the word, for instance to the laws of the XII Tables, and those laws which were constitutionally given by the people in the *comitia centuriata*. The pretorian law, the ordinances of the emperors, and the responses of the jurists were given in FUTURES (the two latter also in present subjunctives): Si intestatus moritur cui suus heres nec sit, agnatus proximus familiam habeto; If a person having no heir under paternal power die without a will, the next in kin of the male line shall have the estate. XII Tab. No. 5.— Lex Aquiliæ cavetur: Qui servum alienum occiderit, quanti in eo anno plurimi fuit, tantum aes dare domino damnas esto; Who shall have killed another person's slave, shall be bound to pay such damage to the master as shall be equal to the highest value of the slave in that year. Gaj. Dig. 9, 2, 2. See the law *de vere sacro* in Liv. 22, 10.— Ait prætor: Quod meius causâ gestum erit, ratum non habeto; The prætor says: What shall be transacted under compulsion, I shall not hold valid. Ulp. Dig. 4, 2, 1.

B. Rules and laws referring to ARTS and SCIENCE in the brief style of compends are frequently given in the second form of the imperative (2. or 3. pers.), interchanging with the other forms mentioned above: Fœnum ubi tempus erit secato, caretôque ne sero secas; Cut the hay as soon as it is time, and do not cut too late. Cato R. R. 53. But in

classical language the most usual form of rules is the *future*, whether the rule is declarative or prescriptive (*i. e.* containing an injunction or precept that or how something should be done); the former interchanging frequently with subjunctive presents, and the latter with the forms mentioned No. 2, 3, 4. The future of prescriptive rules is rendered by 'should' or 'must'; that of declarative rules by the present or the potential with 'may' or 'can'. (DECLARATIVE): Hæc et ad improbationem, et ad interrogationem testium *pertinebunt*; This is also true of (refers to) the rebuttal of the testimony, and of the examination of witnesses. Auct. Her. 2, 6, 9.—Hæc omnia tribus rebus assequi *poterimus*, arte, imitatione, exercitatione; All this we *may* (can) acquire in three ways, by art, by imitation, and by practice. Ib. 1, 3, 3.—(PREScriptive): Quod vitium effugere qui *volet*, *adhibebit* ad considerandas res et tempus et diligentiam; Whoever wishes to avoid this fault (in order to avoid this fault, we) *must apply* both time and diligence to the treatment of his subject. Cic. Off. 1, 6, 18.—Primum *considerabit* accusator num quando simile quid fecerit (consuetudo); First the accused *should inquire* (look) whether the accused has done anything similar before. Auct. Her. 2, 3, 5.—Reperit iudicationem omnem rationem totius orationis eo conferri oportet; After judgment, the whole pleading should be directed towards it. Ib. 1, 6, 26. [The injunction in this sentence may be thus changed: rationem conferri oportet; ratio conferri debet or debet; ratio conferenda est or erit; ratio conferetur; ratio conferatur.] It should be noted that the English 'should' in this sense *cannot* be expressed by an imperfect subjunctive, except in oblique clauses. See R. 85, Obs. 8, c. Ex. 17-19.

C. The English future with 'will' sometimes denotes an *objective rule, i. e.* a rule established by the person spoken of, for instance by habit or repeated action, as 'Kings *will* do as they please.' This form which closely corresponds to the 'would' of repeated past action (R. 54, Obs. 3) is generally expressed by *solere*; but sometimes by the future (in certain connections only), as, Poetæ quid quemque deceat, ex personâ *iudicabunt*, nobis autem personam imposuit ipsa natura; The (dramatic) poets *will judge* from the requirements of the part (role) as to what is proper for the person; but to us (philosophers) nature herself has dictated that part. Cic. Off. 1, 28, 97.—Alii rursus eisdem a principiis omne officium ad voluptatem referent; Others again, from the same principles, *will refer* every duty to pleasure. Ib. Fin. 5, 7, 19.—Aliquando malus homo *dicit* sic ut nihil sit requirendum; Sometimes a bad man *will speak* so that no fault can be found. Quint. 2, 20, 10. See Ex. 20, 21.

Obs. 6. Assertions advanced by the speaker as his own opinions or views are frequently placed in the future to distinguish them from general truths and statements universally acknowledged, which are placed in the present. Such futures are either rendered by a future with 'will' or by the present potential: Infirma *erit* ejus defensio qui negabit se fecisse quod cogeretur (unâ lege) *quum* altera lex permetteret; A defence *must be considered* as weak, by which the accused acknowledges to have disobeyed a compulsory law, and to have acted upon another law merely permissive. Auct. Her. 2, 10, 15.—*Falebuntur* Stoici hæc omnia dicta esse præclare; The Stoics *will* (unquestionably) acknowledge all this to be well said. Cic. Fin. 4, 8, 19.—Sed certe in bonis *enumerabis* amicos; But you *will*, surely, *count* friends among the 'blessings.' Ib. 5, 27, 81. Ex. 22, 23.

Obs. 7. Often verbs of SAYING by which the speaker introduces a statement, advice, or other assertion of his own, are placed in the future for the sake of politeness, and to avoid the harsher and more direct form of the present tense. Such futures, where we may supply a clause like 'If you permit', correspond to our potential with 'would': Tantum te *admonēbo*, si illi absenti salutem dederis, presentibus his omnibus te datūram; I *would* only remind you, if you are going to pardon him in his absence, to do it in the presence of this whole audience. Cic. Lig. 12, 38.—Tamen *audēbo* te ab hac Academia novâ ad illam veterem vocare; However I *would beg* to recall you from this New Academy to the Old one. Ib. Fin. 5, 3, 7. Ex. 24, 25.

1. *Scriptes*, et quidem confestim<sup>1</sup>. Cic. Att. 13, 33, 1.—2. *Facies* me certiorem de Idibus. Ib. 13, 33, 4.—3. Mihi, sicunde<sup>2</sup> potes, *erues*<sup>3</sup> qui decem legati Mummius fuerint. Ib. 13, 20, 3.—4. In ceteris *subvenies*<sup>4</sup> si me hærentem<sup>5</sup> vidēbis. Ib. Fin. 3, 4, 16.—5. Principio<sup>6</sup> amico filium *restituēis*. Ter. Andr. 3, 3, 38.—6. Si subitam<sup>7</sup> et fortuitam<sup>8</sup> orationem<sup>9</sup> commentatio et cogitatio<sup>10</sup> facile vincit<sup>11</sup>, hanc ipsam profecto assidua et diligens scriptura<sup>12</sup> *superabit*. Cic. Or. 1, 33, 150.—7. Num igitur *negabitur* deformem Pyrrhi pacem<sup>13</sup> cæcus ille Appius dicendi viribus diremisse<sup>14</sup>? Quint. 2, 16, 7.—

<sup>1</sup> And quickly, too.—<sup>2</sup> = *si cunde* (if you can from any place, *i. e.* anywhere). See p. 217, Obs. 3. and R. 5, No. 4, a.—<sup>3</sup> dig out, make out, find out.—<sup>4</sup> come to my aid.—<sup>5</sup> stopping (sticking).—<sup>6</sup> before all other things, first of all.—<sup>7</sup> extempore.—<sup>8</sup> unprepared.—<sup>9</sup> address.—<sup>10</sup> commentatio et cogitatio, a prepared and studied discourse.—<sup>11</sup> surpasses, excels.—<sup>12</sup> a carefully and diligently prepared paper.—<sup>13</sup> *deformis pax*, the transactions of an ignominious peace.—<sup>14</sup> to break up.

8. *Sequitur* igitur beata vita virtutem vel ad supplicium<sup>1</sup>, cumque eâ *descendet*<sup>2</sup> in taurum<sup>3</sup>, nec eam minis blandimentisve corrupta *deseret*. Cic. Tusc. 5, 31, 87.—9. Honestum<sup>4</sup> ergo si solum est<sup>5</sup> bonum, quid *habēbis*<sup>6</sup> præterea quod sequere<sup>7</sup>? Ib. Fin. 3, 4, 14.—10. Tertium<sup>8</sup> nisi tenebimus<sup>9</sup>, nihil oratori in quo magnus esse possit *relinquēmus*<sup>10</sup>. Ib. Or. 1, 15, 68.—11. Jam aut Callipho aut Diodorus quomodo *poterunt* tibi istud concedere? Ib. 4, 18, 50.—12. Si virtus præstat reliquis rebus, beatus esse *poterit* virtute unâ præditus<sup>11</sup>. Ib. 4, 18, 51.—13. Hoc te diligentissime percipere et meminisse *volam*. Ib. Fam. 11, 7, 2.—14. Quarum artium<sup>12</sup> summæ<sup>13</sup> crescere possunt, earum etiam contrariarum<sup>14</sup> summa poterit augeri; ad virtutis autem summam accedere<sup>15</sup> nihil potest; ne vitia quidem igitur crescere *poterunt*. Ib. Fin. 4, 24, 67.—15. Ergo histrio<sup>16</sup> hoc *videbit* in scenâ<sup>17</sup>; non *videbit* sapiens vir in vitâ? Ib. Off. 1, 31, 114.—16. Ergo in bestiis *erunt* secreta<sup>18</sup> a voluptate quædam simulacra<sup>19</sup> virtutum; in ipsis hominibus virtus nisi<sup>20</sup> voluptatis causâ nulla *erit*? Ib. Fin. 2, 33, 110.—17. Omne principium<sup>21</sup> rei totius quæ agitur<sup>22</sup> significationem<sup>23</sup> habere *debet*. Ib. Or. 2, 79, 320.—18. Defensor impulsione<sup>24</sup> aut nullam fuisse *dicit*, aut, si fuisse concedit, *extenuabit*, et parvulam<sup>25</sup> quamdam fuisse *demonstrabit*, aut non ex eâ solere hujusmodi facta nasci<sup>26</sup> *docēbit*. Ib. Inv. 2, 8, 25.—19. Suspicionem<sup>27</sup> et ex testimonio et ex rumore duci<sup>28</sup> *oportebit*. Ib. 2, 14, 46.—20. Vulgâris<sup>29</sup> orator, si in dicendo erit exercitatus<sup>30</sup>, hac ipsâ exercitatione istos (oratores) *verberabit*<sup>31</sup>, neque se ab eis contemni ac despici *sinit*. Ib. Or. 3, 21, 79.—21. Gravis et fortis civis et in republicâ dignus principatu, seditiones ac bella civilia *fugiet*<sup>32</sup> atque *oderit*, *tradetque* se totum reipublice, totamque eam sic *tuebitur*<sup>33</sup> ut omnibus consulat<sup>34</sup>. Ib. Off. 1, 25, 86.—22. Is demum vir *erit* cujus animum neque prospera fortuna<sup>35</sup> efferet<sup>36</sup>, nec adversa<sup>37</sup> infringet<sup>38</sup>. Liv. 45, 8.—23. Ac meâ quidem sententiâ nemo *poterit* esse omni laude cumulatus<sup>39</sup> orator nisi erit omnium rerum magnarum atque artium scientiam<sup>40</sup> consecutus<sup>41</sup>. Cic. Or. 1, 6, 20.—24. Piso. Exspecto quid ad id quod quærebam respondeas. CICERO. Respondēbo me non querere hoc tempore quid virtus efficere possit. Ib. Fin. 5, 27, 79.—25. Quare hanc oratoriam facultatem in eo genere *ponēmus*<sup>42</sup> ut eam civilis scientiæ<sup>43</sup> partem<sup>44</sup> esse dicamus. Ib. Inv. 1, 5, 6.

Rem. 76. If the time of the predicate in a clause is determined by a future time given in the principal sentence, the predicate of the clause is generally placed in one of the two future tenses. Such futures are called 'DEPENDENT FUTURES,' and are usually rendered by English PRESENTS (indicative or subjunctive), as:

Profecto nihil accipiam injuriæ si tu *aderis*; I, surely, shall not suffer any wrong if you are (be) present. Cic. Att. 5, 18, 3.—Ex isto morbo convalesces, sive *adhibueris* medicum, sive non *adhibueris*; From that disease you will recover, whether you employ a physician or not. Ib. Div. 2, 13.—Ob hanc rem tibi reddam operam ubi *voles*, ubi *jussieris*; For this favor I will return you my services wherever you choose, wherever you require [them]. Plant. Pæn. 4, 2, 31.

Obs. 1. As to the question, which of the two future tenses is to be used in the principal sentence, and in the clause, four combinations occur: (a) Both predicates may be in the future-present; (b) both predicates may be in the future-perfect; (c) the principal predicate may be a future-present, and the dependent predicate a future-perfect; (d) the principal predicate may be a future-perfect, and the dependent predicate a future-present. The first and second combinations are used if the two actions are represented as co-

<sup>1</sup> Scaffold.—<sup>2</sup> enter.—<sup>3</sup> the brass steer of Phalaris (in which, after it was heated, the condemned person was burned).—<sup>4</sup> honesty.—<sup>5</sup> if . . . were.—<sup>6</sup> would you have.—<sup>7</sup> *quod sequere*, to follow.—<sup>8</sup> the third point.—<sup>9</sup> retain.—<sup>10</sup> we *would* leave.—<sup>11</sup> *præditus* etc., a person having nothing but virtue.—<sup>12</sup> quality.—<sup>13</sup> *summa*, amount, intensity.—<sup>14</sup> *contrarium*, the contrary.—<sup>15</sup> to be added.—<sup>16</sup> a stage-player.—<sup>17</sup> stage.—<sup>18</sup> *secreta* a, different from.—<sup>19</sup> images, likenesses.—<sup>20</sup> *ripius nulla nisi*, no virtue except.—<sup>21</sup> preface, introduction.—<sup>22</sup> the whole subject to be treated.—<sup>23</sup> intimation.—<sup>24</sup> the motive (of the criminal in committing the crime).—<sup>25</sup> *parvulam quamdam*, a very weak one.—<sup>26</sup> that such actions are not usually begotten from it (the motive).—<sup>27</sup> grounds for suspicion.—<sup>28</sup> be taken, be derived.—<sup>29</sup> commonplace.—<sup>30</sup> if he has practice in speaking.—<sup>31</sup> to whip, to punish.—<sup>32</sup> detest.—<sup>33</sup> administer, govern.—<sup>34</sup> so as to consult the interests, to provide for the interests.—<sup>35</sup> *prospera fortuna*, prosperity.—<sup>36</sup> to elate.—<sup>37</sup> adversity.—<sup>38</sup> crush.—<sup>39</sup> literally; heaped with all praise, *i. e.* accomplished in every respect, an orator of the highest order.—<sup>40</sup> *omnium rerum magnarum atque artium scientia*, a knowledge of all great things and arts, *i. e.* every important field of knowledge.—<sup>41</sup> to acquire.—<sup>42</sup> *facultatem in eo genere ponēmus ut dicamus*, I would class the oratorial art as, etc.—<sup>43</sup> social science.—<sup>44</sup> a branch.

incident, or parallel in their temporal relations (Obs. 2). The third form is used if the dependent future is represented as preceding the action of the principal predicate (Obs. 3). The fourth form is rare, being used if the action of the principal predicate precedes that of the clause (see *Rem.* 74, Obs. 1). Dependent futures are used both as ordinary and as potential futures.

Obs. 2. In the first two combinations (equality of both tenses in the case of coincident action), both predicates may be placed in the future-perfect, if this tense may be used according to R. 74, Obs. 2, as: *Satis te matre videro si plane confirmatum videro*; I shall see you early enough, if I see you fully recovered. Cic. Fam. 10, 4, 1. (Ex. 1.) Both tenses generally are future-perfects, if both predicates refer only to one action, which, in the clause, is designated as such, while the principal predicate expresses the import and inner force of the action (see R. 69), as: *Per mihi gratum feceris si in hoc tam diligens fueris quam soles*; You will oblige me very much if, in this matter, you are as careful as you are wont (by being as careful, etc.). Cic. Att. 1, 20, 7. But: *Itaque sapienter facies si te in istam pacificationem non interpones*; Hence you will act prudently if you do not mix with this peacemaking business. Ib. Fam. 10, 27, 2. See Ex. 2-6.—In all other instances both predicates are future-presents, which, in the case of potential futures, is almost always the case: *Quod videbitur rectum esse, curabo*; I shall do what is right in my view. Cic. Qu. Fr. 3, 4, 5.—*Tu quod voles facies*; Do what you like. Ib.—*Minus id proderit in ediscendis quae orationis perpetuae erunt*; This will less avail in memorizing passages belonging to connected discourse. Quint. 11, 2, 24.—*Si genus causae dubium habebimus, a benevolentia principum constituemus*; If we have a case belonging to the dubious kinds, we should base our introduction on the good will (of the judges). Auct. Her. 1, 4, 6.—In clauses with *dum* = *as long as*, both predicates are always future-presents: *Dabitur a me argentum dum erit commodum*; Money will be given by me as long as it is convenient. Ter. Ad. 1, 2, 38. See Ex. 7-12.

Obs. 3. The third combination (Obs. 1), when the action of the clause is represented as preceding that of the principal sentence, is analogous to the two instances when perfects are dependent on presents (R. 43), and when pluperfects are dependent on imperfects (see *Rem.* 66, Obs. 4, 5). Future-perfects thus dependent on future-presents are either rendered by English *presents*, or by English *future-presents*, or by English *perfects* (rarely by future-perfects). The most usual forms of such clauses are the following:

(a) Conditional clauses with *si*: *Hoc assequar profecto si instituta perfecero*; I shall certainly gain this point if I accomplish my work. Cic. Div. 2, 2, 6.—*Nec omnis avaritias, si reque avaritias esse dixerimus, sequetur ut etiam aequas esse dicamus*; Nor does it follow that we should call all kinds of avarice equal (to each other) if we equally call them 'avarice.' Ib. Fin. 4, 27, 75.

(b) Temporal clauses with *quum*, *ubi*, *simulac*, etc.: *Ego in Epirum proficiscar quum primorum dierum nuntios excepero*; I will depart for Epirus, after receiving (when I have received, when I shall have received) the tidings of the first days (intelligence of what has been transacted in the first days). Cic. Att. 3, 23, 5.—*Effugiet ex urbe ubi erunt factae nuptiae*; He will flee from the city as soon as the marriage is accomplished. Plant. Trin. 2, 4, 196.

(c) Temporal clauses with *antequam* and *priusquam*: *Neque priusquam debellavero abistam*; Nor will I desist before I have (shall have) finished the war. Liv. 44, 39.—*Scribam ad Antonium, sed non antequam te videro*; I will write to Antonius, but not before I have seen you. Cic. Fam. 16, 23, 2.

(d) Comparative clauses with *ut*: *Ut sementem feceris ita metes*; As you sow, so will be your harvest. Cic. Or. 2, 65, 261.—Generally, however, comparative clauses require both predicates to be in the same tense: *Animam relinquam potius quam illas deseram*; Rather than desert these, I will lose my life. Ter. Ad. 3, 4, 52. (See Ex. 5, 18, 20).

(e) Relative clauses with *qui*, *quicumque*, *quidquid*, etc.: *Utar eo portu quam primum videro*; I will make the first port that offers (which I shall see). Cic. Att. 7, 7, 4.—*Quoquo modo nos gesserimus, fiet tamen illud quod futurum est*; In whatever way we may act, that which is to be, will happen. Ib. Div. 2, 8, 21. See Ex. 13-24.

Obs. 4. English clauses with 'before' referring to the future, take the following grammatical forms in Latin (the action which shall be done first before the other action is performed, being designated by 'Action A', and the action which is to be done after the first, by 'Action B'):

(a) 'Action A' may be made the principal predicate, and 'Action B' the predicate of the clause. If, in this instance, both predicates have the same subject, 'action A' is placed in the future-present, the clause being introduced by *antequam* or *priusquam* with its predicate in the present indicative, or subjunctive (p. 668): *Antequam de accusatione ipsa dico* (B), de accusatorum spe pauca dicam (A); Before speaking of the

charges, I will make some few remarks about the hope of the accusers. Cic. Dej. 2, 7.—*Antequam de republica dicam* (B), *expōnam* breviter consilium protectionis meae (A); Before I speak of the republic, I will briefly explain the motive of my departure. Cic. Phil. 1, 1.—See Ex. 25, 26.—If the subjects of the two predicates are different, both predicates are generally placed in the future-perfect, the principal predicate being rendered by an English future-perfect: *Hic prius se indicabit quam ego argentum confecero*; He will have declared his views before I have made up the money. Plant. Poen.—See Cic. Mil. 36, 99 (R. 74, Obs. 1).

(b) 'Action B' may be made the principal predicate, and 'action A' the predicate of the clause. In this instance the clause is either introduced by *si prius* (after first) with a future-perfect, or by *antequam* (priusquam) with a future-perfect; the principal predicate being a future-present. In the latter instance the principal sentence must always be negative: *Dicemus hoc, si prius eis de rebus quae viridi propiores sunt, dixerimus*; We will say this, after first speaking on those things which are more closely allied to virtue. Cic. Off. 2, 6, 22. See the Ex. Obs. 3 (c).

Obs. 5. The principal predicates to which dependent futures are attached, are not always grammatical futures, but may be in any tense which virtually means future time. Hence the principal predicates of dependent futures may be

(a) IMPERATIVES of the SECOND FORM: *Si me assequi poteris, aut sicubi nactus eris, ut tibi videbitur, sepelito*. Cic. Tusc. 1, 43, 103.—*Quae cum populo quaeque in patribus agerentur, modica sunt*; The affairs which shall be transacted by the people and by the senate shall be of a moderate amount. Ib. Leg. 3, 4.

(b) IMPERATIVES of the FIRST FORM: *Quam togā signum dederō, tum mihi undique turbam irradile, ac sternite omnia ferro*; As soon as I give the signal with my toga, rush from all directions on the crowd, and strike all with the sword. Liv. 24, 38.

(c) SUBJUNCTIVE PRESENTS with imperative force: *Quae si longior fuerit oratio cum magnitudine utilitatis comparatur*; If this discourse should seem too long, let it be compared with the range of its usefulness. Cic. Off. 2, 6, 20.—*Hanc similitudinem qui assequi vult, scribendo maxime persequatur*; Who wishes to attain to this likeness, should pursue (this aim) chiefly by writing. Ib. Or. 2, 23, 96.

(d) GERUNDIAL PRESENTS: *Quod si acciderit, facienda morum mutatio est*; If this happens, there should be a change of habits. Cic. Off. 1, 31, 120.

(e) PRESENTS OF POTENTIAL VERBS: *Quas litteras antequam te videro, attingere non possum*. Cic. Fam. 16, 14, 1.—*Ludo tui iſto quidem lecti, sed tam quam gravioribus seriisque rebus satis fecerimus*. Ib. Off. 1, 29, 103.

(f) PERFECTS implying a future: *Sin autem minus invenero quod placeat, decrevi habitare apud te*; But if (in the case that) I should not find what I like, I have made up my mind to live with you (i. e. I will live with you). Cic. Fam. 9, 15, 5.—*Si Brutus conseratus erit, vicimus*. Ib. Fam. 13, 6. (See p. 303, Obs. 2, and compare with Cic. Att. 7, 15, 3: *Fuerit enim Caesar si consul factus erit*.)

Sometimes an adjective, implying a clause with a future predicate, takes the place of the principal sentence: *Pompeius bellum comparat necessarium, satis tamen civibus exitalem* (i. e. quod exitale erit) *si vicerit, calamitosum etiamsi vicerit*. Cic. Att. 10, 4, 3.

Obs. 6. In place of a dependent future, not rarely presents are used, both with the force of a future-present and of a future-perfect, as: *Quibus si adversamur* (= adversabimur), *ordinem de nobis optime meritum a nobis dijungemus*. Cic. Qu. Fr. 1, 1, 11.—*Mortem virginis nisi signum traditur* (traditum erit). Ib. Verr. 4, 39.

Sometimes, instead of a clause with *si* and a future perfect, the form of an imperative sentence is used, the apodosis taking either the form of a future-present, or of a future-perfect: *Age nunc extra animo altitudinem virtutum* (i. e. si extraxeris): *jam non dubitabis quin eorum compotes homines semper sint beati*. Cic. Fin. 5, 24, 70.—*Tolle hanc opinionem* (i. e. si sustuleris): *luctum sustuleris*. Ib. Tusc. 1, 13. See Ib. Att. 5, 1. Ter. Ad. 4, 1, 22.

Obs. 7. If the time of predicates dependent on future-predicates is not determined by the latter, the dependent predicate may be in any tense required by the sense: *Multum ad ea quae quaerimus*; i. e. what we are now considering *explanatio tua profecerit*. Cic. Fin. 3, 4.

Obs. 8. Sometimes future actions are conceived to precede actions expressed by future-perfects. In such instances the PLUPERFECT is used with the force of a future-pluperfect, as: *Haec qui audierit, discidet nihilo firmiter ad dolorem ferendum quam venerat* (which would be *venerit* but for the future-perfect *audierit*). Cic. Fin. 4, 19, 52.—Rarely PERFECTS are used with the force of future-perfects: *Totum secundum eam naturam quae postea ei adjuncta est* (= *adjuncta erit*) *vivere*. Cic. Fin. 5, 11, 40.

1. Hæc comitia si gratuita fuerint<sup>1</sup>, plus unus Cato potuerit<sup>2</sup> quam omnes leges omnesque iudices. Cic. Qu. Fr. 2, 15, 4.—2. Quod valetudini tuæ maxime conducet si feceris<sup>3</sup>, maxime obtemperabis voluntati meæ. Ib. Fam. 16, 1, 2.—3. Non tantum ad id quod jam habere potes, si praelio viceris<sup>4</sup>, gloriæ<sup>5</sup> adjeceris, quantum ademeris si quid adversi eveniat. Liv. 30, 30.—4. Si judicaveritis sine dolo malo<sup>6</sup> posse hominem occidi<sup>7</sup>, omnibus facinorosis<sup>8</sup> eandem licentiam permiseritis<sup>9</sup>. Cic. Fragm. Tull. 3.—5. Optime autem societas hominum conjunctioque<sup>10</sup> servabitur<sup>11</sup> si, ut quisque erit conjunctissimus, ita in eum benignitatis plurimum conferetur<sup>12</sup>. Ib. Off. 1, 16, 50.—6. Id facillime facies si me omnibus rebus quas dices et facies interesse<sup>13</sup> putabis. Ib. Qu. Fr. 1, 1, 16.—7. Erit enim mecum si tecum erit. Ib. Fin. 5, 23, 86.—8. Cetera, quotiescunque volueris, vobis parata erunt. Ib. Tusc. 3, 34, 84.—9. Hæc si et ages<sup>14</sup> et senties, tum eris non modo consul, sed magnus etiam consul. Ib. Fam. 10, 6, 3.—10. Probabilis<sup>15</sup> erit narratio<sup>16</sup> si personis, si temporibus, si locis ea quæ narrabuntur, consentient<sup>17</sup>. Ib. Part. Or. 9, 32.—11. Hoc, dum erimus in terrâ, erit celesti vitæ simile. Ib. Tusc. 1, 31.—12. Numquam, dum ego adero, hic te tanget. Ter. Ad. 2, 1, 3.—13. Plura scribam si plus otii habuero. Cic. Fam. 10, 28, 3.—14. De eo dicere poterimus si ex quibus partibus just<sup>18</sup> constet<sup>19</sup> cognoverimus<sup>20</sup>. Auct. Her. 2, 13, 19.—15. Nemo me vestrum, quum hinc excessero<sup>21</sup>, sequetur. Cic. Tusc. 1, 43, 103.—16. Me ista sapientia, simulatque ad eam confugero<sup>22</sup>, in libertatem vindicabit<sup>23</sup>. Ib. Or. 2, 33, 145.—17. Ubi cum locum<sup>24</sup> omnem cogitatione sepeveris<sup>25</sup>, nihil te effugiet. Ib. Or. 2, 34, 147.—18. Hoc si rarius fiet quam tu exspectabis, id erit causæ quod non temere committere audeo litteras meas. Ib. Fam. 1, 7, 1.—19. Te in eis ipsis rebus quas a te didicerit, superabit. Ib. 1, 15, 66.—20. Hic, quæcunque res inciderit, prudenter, ornate<sup>26</sup>, et memoriter<sup>27</sup> dicet. Ib. 1, 15, 64.—21. Quidquid horum (malorum) discussimus<sup>28</sup>, quo majus ac terribilius erit, hoc majorem inibimus<sup>29</sup> gratiam. Sen. Ben. 1, 11.—22. Qui prior strinxerit<sup>30</sup> ferrum, ejus victoria erit. Liv. 24, 38.—23. Non erimus liberati<sup>31</sup> priusquam ita esse tu nos feceris certiōres. Cic. Fam. 10, 20, 2.—24. De Carthagine vereri non ante desinam quam illam exersum<sup>32</sup> esse cognovero. Ib. Sen. 6, 18.—25. De hac querela priusquam respondeo, pauca proponam. Ib. Fam. 11, 27, 1.—26. Antequam pro Muræna dicere instituo<sup>33</sup>, pro me ipso pauca dicam. Ib. Mur. 1.

## VI. THE USE OF TENSES IN EPISTOLARY STYLE.

§ 589. In epistolary style, the writer of the letter often uses tenses which he would use if narrating the events to the receiver of the letter at the time of reading it. Such tenses, which are called 'EPISTOLARY TENSES,' are always rendered by the corresponding tenses, ordinarily used in writing the letter :

Rem te valde bene gessisse rumor erat. Expectabantur litteræ tuæ de quibus erāmus jam cum Pompējo locuti; There is a rumor that you met with great success. We are expecting your letters, concerning which I have already spoken with Pompey. Cic. Fam. 1, 8, 7. If the writer would state these facts orally at the time of reading the letter, he would, even in English, use the same tenses as in the above Latin sentence.

Rem. 77. Epistolary tenses are used only to designate actions which (a) either transpire in the moment of writing, the letter being incomplete at that moment; or (b) which refer to the whole letter, the time of its writing being considered a moment, or a unit of time.

In regard to actions of the former kind, epistolary tenses can only be

<sup>1</sup> Come off without bribery.—<sup>2</sup> posse—to have power (it will be clear that Cato has greater power).—<sup>3</sup> if you do (by doing) what will be most conducive.—<sup>4</sup> i.e. by being victorious.—<sup>5</sup> belongs to tantum.—<sup>6</sup> malice.—<sup>7</sup> to assassinate.—<sup>8</sup> all inclined to do mischief.—<sup>9</sup> give permission.—<sup>10</sup> connection.—<sup>11</sup> to preserve.—<sup>12</sup> if on every person a greater liberality is bestowed according to the closer nature of his connections.—<sup>13</sup> to be present.—<sup>14</sup> to do.—<sup>15</sup> plausible.—<sup>16</sup> narrative.—<sup>17</sup> correspond to.—<sup>18</sup> the law.—<sup>19</sup> to consist.—<sup>20</sup> cognoscere, to learn; cognovisse, to know. The same difference in meaning is between the future-present and future-perfect.—<sup>21</sup> excedere ex loco, to leave a place.—<sup>22</sup> confugere ad aliquem, to take one's refuge with somebody.—<sup>23</sup> aliquem in libertatem vindicare, to restore one's freedom.—<sup>24</sup> subject.—<sup>25</sup> to embrace.—<sup>26</sup> elegantly.—<sup>27</sup> memoriter dicere, to speak without notes.—<sup>28</sup> discutere, to abate.—<sup>29</sup> gratiam inire, to be popular (the more popular it will be).—<sup>30</sup> ferrum stringere, to draw the sword.—<sup>31</sup> periphrastic conjugation.—<sup>32</sup> excidere, to destroy.—<sup>33</sup> to begin.

used if the clause 'quum hæc scribēbam' (while I was writing this) is either expressly added, or may be understood (Obs. 1). Hence such tenses must be either IMPERFECTS or PLUPERFECTS (R. 60, 65; § 586, Obs. 6). See Obs. 1, 4, 5.—Actions referring to the letter as such must be always placed in the PERFECT, since, when the contents of the letter are narrated at the time of reading, the writing of the letter must be considered a momentary, accomplished fact. See Obs. 2.

Obs. 1. The epistolary tense of actions PRESENT to the writer, is the IMPERFECT if this tense, according to the general rules (§ 573, foll.), would be used in narrating the action at the time of reading the letter. The TIME GIVEN is contained in the clause 'quum hæc scribēbam,' or its equivalent participle, either added or understood. The action must be either (a) a state, or (b) an action in progress, or (c) a repeated action, or (d) a habit, or (e) any of the idiomatic imperfects.

(a) STATE: D. Brutus parvis jam copiis obsidebatur, quod magno præsidio Bononiam tenēbat Antonius; D. Brutus is already being besieged by small forces, because Antonius is holding Bononia with a large garrison. Cic. Fam. 12, 5, 2.

(b) INTERNAL ACTION: Neque, hæc quum scribēbam, eram nescius quantis oneribus premere susceptarum rerum; Nor am I ignorant of the numerous engagements by which you are pressed (literally: Nor was I, while writing this, ignorant by how great burdens, etc.). Cic. Fam. 5, 12, 2.

(c) ACTION IN PROGRESS: Nunc publice litteras Romam mittere parābam; I am, now, preparing an official letter to be sent to Rome (literally: I was preparing to send a letter publicly to Rome). Cic. Att. 5, 20, 7.

(d) REPEATED ACTION: Clodius contiones miseræ habebat, in quibus Lucillum et Hortensium contumeliōse ledēbat; Clodius is holding wretched mass-meetings, in which he (regularly) abuses Lucullus and Hortensius in a disgraceful manner. Ib. 1, 14, 5.

(e) HABIT: Bibulus molestus non erat; de omnibus rebus scribēbat ad me potius; Bibulus does not trouble me personally; he 'will rather write' to me on every subject. Ib. 6, 5, 3.

(f) IMPERFECT ACCORDING TO R. 59, Obs. 5: Septimum jam diem Corcyræ tenebāmur; We have been kept already for seven days at Corcyra. Cic. Fam. 16, 7.

g) IMPERFECTS CORRESPONDING TO THE PRESENTS WITH FUTURE FORCE (R. 73, Obs. 4). Me tunc litteræ adhuc Thessaliorum tenebant; si accepero litteras, ad te me conferam; Your letters will keep me here still; when I shall receive any, I will proceed to you. Cic. Att. 3, 11, 1.

h) IMPERFECTS WITH FUTURE MEANING according to R. 53, Obs. 2: Capuam proficiscor hæc scribens; I am on the point of starting for Capua (literally: I was starting for Capua while I wrote this). Cic. Att. 7, 19. See Obs. 5, A.—Ex. 1-7.

Obs. 2. Epistolary PERFECTS with PRESENT force cannot, generally, occur, since what will be a complete action to the imaginary narrator of the letter at the time of the reading, is generally complete, also, in the moment of writing, and will be an ordinary perfect. Perfects with the force of a present, however, occur in the following instances:

(a) Remarks referring to the WRITING or DELIVERING (dare) of the letter are placed in the PERFECT (except in the clause 'quum' or 'quum hæc scribēbam', very rarely in the imperfect: Tertium ad te hanc epistolam scripsi eodem die in the beginning of the letter); This is the third letter I write you to-day (more correctly: I have already written you two letters to-day: this is the third). Cic. Att. 16, 6, 1.—Hæc dictavi ambulans; I am dictating this letter while walking. Ib. 2, 23, 1.—Ego etsi quid scriberem non habēbam, brevitate secutus sum te magistro (beginning of the letter); Although I have nothing to write, I (shall) try to be brief according to your example. Ib. Fam. 11, 25, 1.—Properantibus tabellariis alienis hanc epistolam dedi; I (shall) deliver [mail] this letter to the carriers of others, who are in a hurry. Ib. Att. 11, 17, 1.

(b) Expressions referring to what is sent together with the letter are given in PERFECTS (misi I enclose); Commentarium consulatus mei Græce compositum misi ad te; I enclose a treatise in Greek on my consulship. Cic. Att. 1, 19, 10.

(c) The date of the letter is always given in PERFECTS, while modern Latinists are in the barbarous habit of expressing it by imperfects: Ego has pridie Non. Quinct. proficiscens Athenis dedi; This letter is written on the 6th of July, while I am on the point of starting from Athens (literally: I handed (delivered) this letter, etc.). Cic. Att. 5, 11, 4.—Ded. d. e. dedi a. d. Kal. Novemb.; Given handed to the carrier on the first of November. Ib. Fam. 6, 29. See R. 78.

(d) Petitions, remarks, sentiments, which the writer designates as present acts, are often expressed by the perfect of a potential auxiliary with an infinitive or a clause containing the action. They are generally rendered by ordinary or potential PRESENTS:

*Scribendum ad te existimāvi* (one of Caesar's favorite circumlocutions); I write to you. *Cæs. in Cic. Att. 10, 8 B, 1.*—*Facere non potui quin tibi sententiam declarārem meam*; I must tell you my opinion. *Cic. Fam. 6, 13, 1.*—*Hæc tibi etsi andita esse arbitrābar, volui tamen notiora esse*; Although I think that you have heard this, I wish it to be still better known to you. *Ib. 10, 28, 3.*—*Quum mihi conscius essem quanti te facerem, non dubitavi petere quod petendum esset*; I unhesitatingly ask for what I must ask you. *Ib. 13, 8, 1.*

(e) Sometimes (rarely) perfects are used instead of imperfects, for instance (1) in predicates denoting inner actions (according to rule § 582, Obs. 1, 2): *De Dionysio sum admiratus*; Regarding Dionysius I am astounded. *Cic. Att. 9, 12, 2.* (2) Actions which should be in the present according to R. 42, and hence in the epistolary imperfect according to Obs. 1, No. f, are placed in the perfect if qualified by *adhuc* (the action being thereby designated as complete at the time being): *Nos adhuc in eâ orâ ita fuimus ut, etc.*; I am still on that coast so as to, etc. *Cic. Att. 8, 11 B, 1.*—(3) Instead of an imperfect with future force, according to Obs. 1, No. g, sometimes a perfect is used: *Ego sustinui me in Arcæo fratris, ut dum aliquid certius afferretur, occultiore in loco essemus*; I am in the Arcæo villa of my brother, and shall stay there to be concealed till something more definite will be reported. *Cic. Att. 10, 2, 1.*

The imaginary narrator at the time of the reading of the letter would deliver all these facts in PERFECTS, viewing them as complete facts at the time of writing the letter, which is here considered as a *moment* of time, whereas in the use of the imperfect (Obs. 1), when '*quum hæc scribēbam*' is supplied, it is considered as a *period* of time during which the action was incomplete (§ 578, R. 57, 58; R. 60.)—Momentary acts transpiring during the writing of the letter, are generally expressed by *ordinary perfects*, so that the fact is stated with the addition of '*Quum hæc scripsissem*.' In English we would use here a mere present without such addition: *Quum hæc scripsissem* a Curione mihi nuntiātum est eum ad me venire; At this moment (while I am writing) Curio sends me word that he will come to me. *Cic. Att. 10, 4, 3.* See Ex. 8-13.

Obs. 3. Present actions which do not refer to the moment of writing or to the time of the writing of the whole letter, but which refer, in general, to the speaker's time, and which would be expressed by presents even by the imaginary narrator of the letter at the future reading, can neither be expressed by epistolary perfects, nor by epistolary imperfects, but always remain in the present tense: *De Bruto valde tibi assentiōr* (not *assentiēbar*). *Cic. Fam. 11, 14, 2.*—*Itaque te non hortor solum sed etiam oro ut totâ mente in rempublicam incumbas*. *Ib. 10, 5, 2.* (It might be *hortandum existimāci*, but not *hortâtus sum* or *hortābar*).—*Pompējum scis* (not *sciēbas*) temporibus illis non multum in senātu fuisse. *Ib. 1, 7, 3.*—Even actions which are transpiring at the moment of writing cannot be placed in an epistolary tense if at the future reading of the letter they will, probably, still continue: *Magna est hominum expectatio de te* (where *erat* would involve a great impoliteness to the person addressed). *Cic. Fam. 1, 7, 9.*

Obs. 4. Ordinary imperfects (rarely perfects) are changed into epistolary PLUPERFECTS if the action may be conceived as complete at or before the moment of writing, so that either '*quum hæc scribēbam*' (or rarely '*antequam hæc scriberem*') may be supplied. Such pluperfects are rendered by English present-perfects (rarely by preterits): *Res, quum hæc scribēbam, erat in extremum adducta* dis-crimen; Things have been brought to extremities, (literally: Things, when I wrote this, had been brought, etc.). *Cic. Fam. 12, 6, 2.* See Ex. 14-17. Epistolary pluperfects corresponding to English preterits are used in the same instances where, with reference to the present time, perfects are employed: *Ad tuas omnis rescripseram* pridie; I yesterday answered all your letters. *Cic. Att. 9, 10, 1.*—*Pridie dederam* meâ manu longiorem (epistolam); I, yesterday, delivered a longer letter by myself. *Ib. 10, 3a, 1.*

Obs. 5. The two future tenses generally remain unchanged. But sometimes the future-present is changed into an epistolary IMPERFECT, and the future-perfect into a PERFECT.

A. The FUTURE-PRESENT is changed into the IMPERFECT of the verb, if the writer is on the point of doing the act (Obs. 1, No. h). Thus the imperfect *proficiscēbar* is frequently used if the writer is on the point of departing; but also the imperfects of other verbs, if the connection distinctly shows that the action did not yet happen at the time of the writing: *Hinc exercitum in hiberna deducendum Quinto fratri dabam*; I am now Laodicæam *recipiēbam*; Hence I will give to my brother Quintus the army to take it to winter-quarters; I myself will go back to Laodicæa. *Att. 5, 20, 5.* Ex. 18, 19.

B. Wherever the epistolary PERFECT is used in a future sense it takes the place of a FUTURE-PERFECT (which, however, according to R. 74, Obs. 2, frequently has the force of an English future-present): *Si recte ambulaverit is qui hanc epistolam tulit, in ipsum tuum diem incidit*; If he who carries (shall have carried) this letter, walks as he should, he will just arrive (will have arrived) at your birth-day. *Cic. Att. 9, 4, 3.* The imaginary narrator would use here perfects, the same as are used in the letter.—*Ipsc Capuam III. Non. profectus sum*, quum has litteras dedi (i. e. *profectus ero* = *proficiscar*, intimating

by the perfect = future-perfect, that he will arrive at the same day). *Ib. Att. 7, 18, 1.*—Such perfects (and imperfects) sometimes give rise to peculiar expressions, which cannot be imitated in English, as: *Paucis diēbus habēbam* (= *habituus eram*) certos homines quibus darem litteras. *Itaque eo me servavi*; I shall have in a few days reliable carriers to forward this letter. Hence if you receive this letter, it will be an evidence that I shall have lived a few days longer. *Cic. Att. 5, 17, 1.* Ex. 20, 21.

C. If such epistolary perfects or imperfects are used in clauses requiring the subjunctive, they are either in the imperfect, perfect, or pluperfect, according to the rules of consecution: *Etsi quum tu has litteras legeres putābam fore ut scirem jam quid Brundisii actum esset*; Although I think that I shall know what is (will have been) done at Brundisium when you will read this letter. *Cic. Att. 9, 1, 1.* (For a similar sentence expressed by ordinary tenses see R. 74, Obs. 1. *Cic. Att. 9, 5.*)—*Permagni interest quo tibi hæc tempore epistola reddita sit*; It makes a great difference, at what time this letter will be (will have been) handed to you. *Cic. Fam. 11, 16, 1.*—*Quod nbi audissem ego Arpinum cogitābam*; I intend to start for my villa at Arpi as soon as I shall have heard this. *Ib. Att. 8, 16, 2.* Ex. 22.

D. If a future act is contemplated or resolved upon at the time of writing, the IMPERFECT of the PERIPHRASTIC FUTURE is frequently used with the force of an English future: *Deiotarus ad me Laodicæam venturus erat*; Deiotarus will meet (is going to come to) me at Laodicea. *Cic. Att. 5, 20, 9.* Ex. 23, 24, 25.

E. Future actions contemplated by the writer are frequently expressed by *cogitābam* with an infinitive, which is the regular form in regard to contemplated movements, when the infinitive (*proficisci* or *esse*) is understood, the object of the motion being expressed by *in* with an accusative, but the object of *esse* by *in* with the ablative: *Nonis Majis in Ciliciam cogitābam*; On the Nones of May I shall depart for Cilicia. *Cic. Att. 6, 2, 6.*—*Eo die cogitābam in Anagnino, postero autem in Tusculano*; To-day I shall be in my villa near Anagni; to-morrow in that near Tusculum. *Ib. 12, 1, 1.* See Ex. 26.

Obs. 6. The use of epistolary tenses is far less frequent than that of the ordinary tenses, even if epistolary tenses might be properly used: *Nihil habeo quod ad te scribam* (epistolary tense: *habēbam*). *Cic. Att. 7, 19.*—*Laboratur vehementer; inclināta res est* (epistolary: *laborabatur; inclināta erat*). *Ib. Fam. 1, 1.*

1. Nos autem in Formiāno morāmur. *Cic. Att. 9, 1, 3.*—2. Pompējus erat apud me quum hæc scribēbam. *Ib. Fam. 16, 10, 2.*—3. Equidem, quum hæc scribēbam, aliquid jam actum putābam. *Ib. 6, 4, 1.*—4. Atque hæc mihi scribenti veniebat in mentem me esse eum<sup>2</sup> cuius tu desperationem accusare<sup>3</sup> solitus esses. *Ib. 6, 1, 5.*—5. Fama nuntiabat te esse in Syria; auctor erat nemo. *Ib. 12, 4, 2.*—6. Ut Athēnas a. d. VII. Kal. Quinct. veneram, expectābam ibi jam quartum diem Pomptinum. *Ib. Att. 5, 10, 1.*—7. Pedem<sup>4</sup> e villā adhuc egressi non sumus; ita magno et assiduo imbris habēdamus. *Ib. 13, 16, 1.*—8. Hæc dictari sedens in rhedā<sup>5</sup>. *Ib. 5, 17, 1.*—9. Quum Philogenes statim ad te navigaturum esse diceret, has ei litteras dedi, quibus ad eas rescripsi<sup>6</sup> quas acceperam a Bruti tabellario (beginning of the letter). *Ib. 6, 2, 1.*—10. Postridie senatusconsultum factum est quod ad te nisi. *Ib. 4, 2, 5.*—11. Quum T. Pomponius ad te proficisceretur, aliquid mihi scribendum putavi. *Ib. Fam. 5, 5, 1.*—12. Non dubitavi id a te litteris petere quod mihi omnium esset maxime necessarium. *Ib. Fam. 2, 6, 2.*—13. Cæsarem nunc defendit Curio? Quis hoc putaret præter me? Nam, ita vivam, putavi. *Ib. 2, 13, 3.*—14. Quæ impendere putārem, scripseram ad te. et jam tuas litteras expectābam. *Ib. Att. 8, 13, 2.*—15. Capuæ Nonis Febr. esse volēbam quia consules jusserant. *Ib. 7, 17, 5.*—16. Idibus Februarii forum<sup>7</sup> institueram<sup>8</sup> agere Laodicæe. *Ib. 5, 21, 9.*—17. Triginta dies erant ipsi quum has dabam litteras, per quos nullas a vobis acceperam. *Ib. 3, 21.*—18. Nihil habēbam quod scriberem, neque enim novi quidquam audieram, et ad tuas omnis rescripseram pridie. *Ib. 9, 10, 1.*—19. A. D. VI. Id. Maj., quum has dabam litteras, ex Pompejano proficiscēbar. Deinde cogitābam sine ullā morā iusta itinera<sup>9</sup> facere. *Ib. 5, 2, 1.*—20. Ad eum postridie mane vadēbam<sup>10</sup> quum hæc scripsi. *Ib. 4, 10, 2.*—21. Si ille cui mandavi satis scite<sup>11</sup> tempus ad te cepi<sup>12</sup> ad-eundi, confido me, quod velim, facile, a te impetraturum. *Ib. Fam. 11, 16, 1.*—22. Epistolam quam legisti, mane dederam. *Ib. Qu. Fr. 2, 1, 1.*—23. Hoc, quum hæc legeres, jam decedam arbitrābar fore. *Ib. Fam. 10, 10, 1.*—24. Consules nondum eperant, sed erant venturi. *Ib. Att. 7, 20, 1.*—25. Vidēbam omnia biduo triduo scilicet. *Ib. 7, 23, 3.*—26. Ego tabellarios ad vos postero die eram missurus. *Ib. 6, 3, 1.*—27. Quinto togam puram<sup>13</sup> Liberalibus<sup>14</sup> cogitābam dare. *Ib. 6, 1, 12.*—28. Beneventum cogitābam hodie. *Ib. 5, 3, 3.*

<sup>1</sup> My villa near Formiæ.—<sup>2</sup> that it was I.—<sup>3</sup> *alicujus desperationem accusare*, to charge somebody with despair.—<sup>4</sup> *pedem*... non, not a foot.—<sup>5</sup> carriage.—<sup>6</sup> to answer.—<sup>7</sup> *forum agere*, to hold a court.—<sup>8</sup> *institueram*, to intend.—<sup>9</sup> *iusta itinera*, regular day's journeys.—<sup>10</sup> to walk.—<sup>11</sup> skilfully.—<sup>12</sup> to choose.—<sup>13</sup> the toga virilis, being called *pura*, because it had not the ornaments of the boys' toga.—<sup>14</sup> the Liberalia, a Roman festival.

Rem. 78. The epistolary tenses are connected with peculiar expressions regarding 1) the date of letters; 2) the rendering of the adverbs to-day, yesterday, and to-morrow.

Obs. 1. The date is never placed at the head, and rarely at the end of the letter. If placed at the end, it is either the mere day with or without the name of the place, or the day in connection with *data* (i. e., *data est epistola*, the letter was delivered to the carrier), which is often abbreviated *D.*, as: *Data Non. Novembr., Narōnā.* Cic. Fam. 5, 10b.— *D. IV. Non. Mart.* Ib. 7, 13.— More frequently the date is contained in the text of the letter: *A. D. IV. Kal. Maj. iens in Pompejanum bene mane haec scripsi.* Ib. Att. 4, 9, 2.— *Scito Id. Maj. nos has dedisse.* Ib. 5, 5, 1.— Most frequently the clause '*quo die has litteras dedi*' is used, being attached to the day of the calendar which, in this instance, is rendered 'to-day'. *Trebatium VI. Kal., quo die has litteras dedi, expectabam*; I am expecting Trebatius to-day. Cic. Att. 9, 17, 1.— Sometimes the date is expressed by implication, and must be found by calculation: *Ut Athenas a. d. VII. Kal. Quinct. veneram, expectabam ibi jam quartum diem Pomptinum.* Cic. Att. 5, 10, 1.— This makes the date the IV of the Kal. Rarely the date thus indicated in the text is expressed by an imperfect, which is only the case in a clause, or if other epistolary imperfects are connected with it: *Haec autem scribebam pridie Nonas.* Cic. Att. 9, 1, 1.

Obs. 2. The adverbs *to-day*, *yesterday*, *to-morrow* may, even with epistolary tenses be expressed in the usual way, which, strictly speaking is illogical, since the imaginary narrator would not use these adverbs: *Hodie tuas litteras expectabimus matutinas*; I expect to-day your morning-letter. Cic. Att. 12, 53. So Att. 9, 11, 1 and often.— *Hec enim vesperi venerat*; For he came yesterday. Ib. 12, 16.— *Cras* (but not its equivalents; see the last sentence), always stands with the future.— But very frequently these words, in connection with epistolary tenses, are expressed by a reference to a given day or other time. If referring to the date of the letter, to-day is expressed by *eo die* (eodem die): *Eo autem die credo aliquid actum in senatu.* Cic. Att. 5, 5, 1. Most usually 'to-day' is expressed by the date with '*quum haec scribebam*', or '*quo die has litteras dedi*'.— Yesterday is expressed by *pridie* with reference to the date: *Venerat in Cumānum vesperi pridie, id est Idibus.* Cic. Att. 10, 4, 7.— *Pridie apud me Crassipes fuerat.* Ib. 9, 11, 3. Often it is expressed by the day of the calendar: *Ego me de Cumāno movi a. d. V. Kal. Maj. (the letter being of the IV. Kal.).* Ib. Att. 4, 9, 2. So Ib. 5, 3, 1 and often. To-morrow with epistolary tenses may be expressed by *postero die* or *postridie*: *Postero die cogitabam in Tusculano.* Cic. Att. 12, 1, 1.— Frequently it is expressed by *mane*: *Inde domum coenatum, ut sim mane praesto Milōni.* Ib. Att. 4, 12.— A peculiar combination of 'to-morrow' with the particular time of writing the letter is made by the circumlocution '*Postridie ejus diei qui erat tum futurus quum haec scribebam*' in Cic. Qu. Fr. 3, 2, 1: *Postridie ejus diei qui erat tum futurus quum haec scribebam ante lucem, erat apud Catōnem divinatio inter Memmium et Nerōnem futura*; To-morrow there will be a competition-trial for the public accusership between Memmius and Nero in Cato's chambers. I am writing this before daybreak (of the day before the trial).

Obs. 3. The epistolary tenses became obsolete about the time of the Emperor Nero. Pliny in his letters always uses ordinary tenses. Together with the epistolary tenses, some other ancient formalities in the writing of letters seem to have been abolished about the same time. Here belongs the frequent introductory formula '*Si vales bene est, ego valeo*'; 'If your health is good, it is well; I am well (abbr.: S. V. B. E. E. V.)'. Seneca (Ep. XV) speaks of this as an obsolete form which had been yet in use in his youth.

## ENGLISH EXERCISES.

I. PRESENT TENSE (R. 42, 43).— 1. Return to me that book, which I have missed<sup>1</sup> for a long time.— 2. Your brother Marcus has been living with us for three months.— 3. How long have you been living in this state?— 4. This law-suit<sup>2</sup> has already lasted two years<sup>3</sup>.— 5. Who<sup>4</sup> accommodates<sup>5</sup> to what nature exacts<sup>6</sup>, feels<sup>7</sup> neither poverty nor fear.— 6. Wheresoever<sup>8</sup> I cast<sup>9</sup> [my] eyes, I see all faces<sup>10</sup> full of courage<sup>11</sup> and

<sup>1</sup> Desiderare.— <sup>2</sup> Translate: In this trial (*judicium*) we have been engaged (*versari*) already, etc.— <sup>3</sup> biennium.— <sup>4</sup> is qui.— <sup>5</sup> se componere ad.— <sup>6</sup> exigere.— <sup>7</sup> Translate: is not only out of (*extra*) the sense of poverty, but out of fear.— <sup>8</sup> p. 218, (b).— <sup>9</sup> circumferre.— <sup>10</sup> all faces — *omnia*.— <sup>11</sup> animi.

energy<sup>1</sup>.— 7. When (*ubi*) we see that this plan<sup>2</sup> [will] not avail<sup>3</sup>, we summon<sup>4</sup> the authors of the damage<sup>5</sup> to the court.

II. ENGLISH PRESENT-PERFECTS AND LATIN IDIOMATIC PERFECTS (§ 569, R. 46).— 1. I shall never deny that [there] are some contrivances<sup>6</sup> in the possession<sup>7</sup> of those who have made these studies a specialty<sup>8</sup>.— 2. We have said enough<sup>9</sup> on the subject.— 3. We have come<sup>10</sup> now to the passage<sup>11</sup> where we stopped<sup>12</sup> the other day.— 4. Our people<sup>13</sup> have readily<sup>14</sup> adopted<sup>15</sup> this habit.— 5. The law<sup>16</sup> is a creature<sup>17</sup> of society<sup>18</sup>.— 6. Crassus has learned all he could.— 7. All those with whom I spent my youth<sup>19</sup>, are no more.— 8. Many have often tried<sup>20</sup> to become<sup>21</sup> suddenly<sup>22</sup> rich, but<sup>23</sup> few have [ever] succeeded.— 9. Those who take money for their votes, and those who buy them, are liable to legal punishment<sup>24</sup>.

III. IMPERFECTS OF STATE (R. 50).— When the Roman fleet approached, the ships of the Carthaginians were anchored<sup>25</sup> at<sup>26</sup> the island.— 2. Antonius increased the garrison, which was in the town, by three cohorts.— 3. At that time more than two legions were hiding<sup>27</sup> in the forests; but the army<sup>28</sup> arrived at<sup>29</sup> the wall of the town before the consul knew<sup>30</sup> that the enemy was present<sup>31</sup>.— 4. Caesar called out<sup>32</sup> the two legions which then were in winter-quarters<sup>33</sup> at<sup>34</sup> Aquilēja.— 5. When Caesar came<sup>35</sup> to Germany, the greatest part of that country was covered<sup>36</sup> with forests.— 6. The winter-quarters<sup>37</sup> of all these legions lay<sup>38</sup> within a circle of one hundred miles.— 7. The road which led to Acerræ was intersected<sup>39</sup> by a river which was passable<sup>40</sup> at several places by a ford<sup>41</sup>.— 8. The boundaries of the Helvetians extended at that time more than two hundred and forty miles in length.— 9. There I saw<sup>42</sup> Buchanan, the same (*is*) who later<sup>43</sup> was President<sup>44</sup> of the United States<sup>45</sup>.— 10. The whole army (*agmen*) stopped<sup>46</sup> here for several days; for the snows of Mount Cevenna hindered the march.

IV. IMPERFECTS OF PROGRESSIVE ACTION (R. 51–53).— 1. All these things compelled the king to call to his aid<sup>47</sup> the forces which were protecting the boundaries of Aetolia.— 2. At that time the castle of Tarentum<sup>48</sup> was held by the forces of Hannibal.— 3. When Caesar came to Brittany, its interior<sup>49</sup> was inhabited<sup>50</sup> by those who stated<sup>51</sup> that they were born on the island. But the sea-coast<sup>52</sup> was held by those who were crossing over and returning for the sake of plunder<sup>53</sup>.— 4. Cassivellaunus sent messengers to the four kings who ruled<sup>54</sup> over those regions.— 5. While at the right wing<sup>55</sup> the fight was going on<sup>56</sup> (see R. 60, Obs. 3), the second and third legions were defending<sup>57</sup> themselves with great bravery against the attacks

<sup>1</sup> Robur.— <sup>2</sup> ratio.— <sup>3</sup> not avail, *parum procedere*.— <sup>4</sup> to summon to the court, in *judicium vocare*.— <sup>5</sup> injuria.— <sup>6</sup> ars.— <sup>7</sup> in the possession, by the adj. *proprius*.— <sup>8</sup> Render: Who have placed all their study in knowing (*cognoscere*) these things.— <sup>9</sup> Render: enough much.— <sup>10</sup> pervenire.— <sup>11</sup> locus.— <sup>12</sup> subsistere.— <sup>13</sup> Render: We.— <sup>14</sup> libenter.— <sup>15</sup> acciscere.— <sup>16</sup> justitia.— <sup>17</sup> procreare.— <sup>18</sup> Render: The society of men has created the law.— <sup>19</sup> whom I used as a young man.— <sup>20</sup> velle.— <sup>21</sup> Render: to acquire (*comparare*) great often riches.— <sup>22</sup> brevi.— <sup>23</sup> Render: which however (*tamen*) have fallen to the lot of few (*paucis obtingere*).— <sup>24</sup> Render: Those who after receiving money have cast (*ferre*) [their] votes, and who gave the money, are held by the penalties of the law.— <sup>25</sup> to be anchored, *stare*.— <sup>26</sup> ad.— <sup>27</sup> latere.— <sup>28</sup> agmen.— <sup>29</sup> sub.— <sup>30</sup> subjunctive.— <sup>31</sup> adesse.— <sup>32</sup> arcessere.— <sup>33</sup> hiemare.— <sup>34</sup> ad.— <sup>35</sup> indicative.— <sup>36</sup> opertus.— <sup>37</sup> hiemare, pl. t.— <sup>38</sup> Render: were contained (*continere*) by 10,000 paces.— <sup>39</sup> prohibere.— <sup>40</sup> to be passable, *transiri*.— <sup>41</sup> vadum.— <sup>42</sup> convenire aliquem.— <sup>43</sup> postea.— <sup>44</sup> to be President, *praesesse*.— <sup>45</sup> the United States, *civitates nominis Americani*.— <sup>46</sup> subsistere.— <sup>47</sup> by the abstract dative.— <sup>48</sup> by an adjective.— <sup>49</sup> pars ejus interior.— <sup>50</sup> incolere.— <sup>51</sup> dicere.— <sup>52</sup> pars maritima.— <sup>53</sup> praeda.— <sup>54</sup> praesesse.— <sup>55</sup> cornu.— <sup>56</sup> by *pugnare*.— <sup>57</sup> to defend one's self against attacks, *impetum sustinere*.

of the enemy.—6. The army took<sup>1</sup> the road which leads<sup>2</sup> to the Lava-beds<sup>3</sup>; for there the savages<sup>4</sup> were said to be hidden.—7. Why, if he knew that it would cost him his life<sup>5</sup>, did he enter<sup>6</sup> the ship?—8. Why, since he did not know<sup>7</sup> the resources<sup>8</sup> of his adversaries, did he declare<sup>9</sup> that war?—9. While that<sup>10</sup> battle was going on at Bull Run<sup>11</sup>, General<sup>12</sup> Ignayus was with the greatest indifference<sup>13</sup> keeping<sup>14</sup> his forces in the camp which was no more than twenty miles distant.—10. Why did he not send<sup>15</sup> all his army to support<sup>16</sup> [his] hard pressed<sup>17</sup> [comrades]?—11. Epaminondas was already on the point of dying, when he was informed<sup>18</sup> that the Spartans had been defeated.

V. IMPERFECTS OF REPEATED ACTION (R. 54).—1. At that time almost all States of the South<sup>19</sup>, which then protected<sup>20</sup> by [their] laws the right of owning<sup>21</sup> slaves, were earnestly<sup>22</sup> deliberating<sup>23</sup> on the war; they sent<sup>24</sup> messengers and embassies around in all directions<sup>25</sup>; they made inquiries<sup>26</sup> how<sup>27</sup> and where<sup>28</sup> the war should<sup>29</sup> commence<sup>30</sup>, and almost daily held<sup>31</sup> mass-meetings<sup>32</sup> in the open air<sup>33</sup> in all the towns<sup>34</sup>. Everywhere great excitement prevailed<sup>35</sup>, and all were burning<sup>36</sup> with warlike spirit<sup>37</sup>.—2. Under the very<sup>38</sup> eyes<sup>39</sup> of the consuls drafts<sup>40</sup> of slaves were made, and the citizens were excited<sup>41</sup> to violence<sup>42</sup>, murder<sup>43</sup>, and plunder<sup>44</sup>. Under the eyes of the same consuls arms were openly<sup>45</sup> carried<sup>46</sup> into the temple of Castor, [and] the steps<sup>47</sup> of the same temple were being destroyed<sup>48</sup>; the forum and the meetings were under the control<sup>49</sup> of armed bands; murders were committed<sup>50</sup>, and men<sup>51</sup> were stoned to death; [there] was no Senate, no magistrates; one man wielded<sup>52</sup> the whole power<sup>53</sup>, domineering<sup>54</sup> with insults<sup>55</sup>, making use of promises<sup>56</sup> to some, and of intimidation<sup>57</sup> to others.—3. When Atticus was doing this, he was censured by several aristocrats<sup>58</sup> for<sup>59</sup> his lukewarmness in hating bad citizens.—4. At that place the King issued all his orders<sup>60</sup>; there all who would ask<sup>61</sup> him for anything went to see him<sup>62</sup>.

VI. HISTORICAL INFINITIVES (§ 575). [*Use historical infinitives wherever they are allowed*].—1. At Rome the fame of Scipio grew from day to day<sup>63</sup>, and [that] of Fulvius decreased<sup>64</sup>; to Marcellus public opinion<sup>65</sup> was even unfavorable<sup>66</sup>; because he was unsuccessful<sup>67</sup>. The tribune

<sup>1</sup> Sequi.—<sup>2</sup> on which it is gone.—<sup>3</sup> lava-beds, *reliques Cyclopæ, quos vulgo Lavaletos dicunt*.—<sup>4</sup> barbari.—<sup>5</sup> it costs my life, *mihi mortem costavit*.—<sup>6</sup> ascendere.—<sup>7</sup> ignore.—<sup>8</sup> render: How great were the resources (*opes*).—<sup>9</sup> indicare.—<sup>10</sup> by *ita ut* and *hanc rem*.—<sup>11</sup> Boospotamus.—<sup>12</sup> legatus.—<sup>13</sup> otium.—<sup>14</sup> continere.—<sup>15</sup> submittere.—<sup>16</sup> abstract dative.—<sup>17</sup> to be hard pressed, *laborare*.—<sup>18</sup> certorem fieri (by the indicative).—<sup>19</sup> civitates ultiores. (The States of the North would be *civitates ceteriores*, Mason's line being understood as the dividing line, according to the analogy of *Gallia* or *Hispania ceterior* and *ulterior*).—<sup>20</sup> tueri.—<sup>21</sup> habere.—<sup>22</sup> summo cum studio.—<sup>23</sup> or *Hispania ceterior* and *ulterior*.—<sup>24</sup> parare.—<sup>25</sup> explorare.—<sup>26</sup> qua ratione.—<sup>27</sup> consultare.—<sup>28</sup> to send around, *dimittere*.—<sup>29</sup> pars.—<sup>30</sup> explorare.—<sup>31</sup> qua ratione.—<sup>32</sup> unde.—<sup>33</sup> subjunctive imperfect of the verb proper.—<sup>34</sup> the war commences, *belli initium fit*.—<sup>35</sup> habere.—<sup>36</sup> contio.—<sup>37</sup> in locis publicis.—<sup>38</sup> omnibus foris et conciliabulis.—<sup>39</sup> great excitement prevails, by the verb *trepidare*.—<sup>40</sup> ardere.—<sup>41</sup> summa liabulis.—<sup>42</sup> by *ipse*.—<sup>43</sup> Render: [While] the consuls [were] inspecting (*inspiciendi*) the name (*copulmen*) from a stone (*lapideus*) wall. Render: having been hit (*ictus*), paid (*persolvere*).—<sup>44</sup> glans.—<sup>45</sup> Cancellovilla.—<sup>46</sup> armis petere (*with accus.*).—<sup>47</sup> demoliri.—<sup>48</sup> redicere.—<sup>49</sup> ex consilio.—<sup>50</sup> Common Council, *decuriones*.—<sup>51</sup> by *apud*.—<sup>52</sup> to attack and kill, *opprimere*.—<sup>53</sup> insidiator.

C. Bibulus was his<sup>1</sup> enemy, who accused not only him but the whole nobility.—2. Meanwhile the common people, which, desirous for a change of government<sup>2</sup>, were at first<sup>3</sup> in favor<sup>4</sup> of a war, changed<sup>5</sup> their minds, [and] execrated<sup>6</sup> the plans of Catiline, [and] raised<sup>7</sup> Cicero to the sky.—3. Antiochus invited<sup>8</sup> the prætor Verres to dinner; he displayed<sup>9</sup> all his things<sup>10</sup>, a great deal of silver, and not a few goblets<sup>11</sup> of<sup>12</sup> gold. Verres took<sup>13</sup> every<sup>14</sup> vase<sup>15</sup> in his hands, [and] praised, [and] admired [them]. The king was happy<sup>16</sup> that his banquet<sup>17</sup> gave pleasure<sup>18</sup> to a prætor of the Roman people. When Verres had come home, he thought of nothing else but<sup>19</sup> how he might<sup>20</sup> rob<sup>21</sup> and plunder<sup>22</sup> the king. He asked<sup>23</sup> for those vases, saying<sup>24</sup> that he wished<sup>25</sup> to show them to his artists<sup>26</sup>. The vases were sent. The king, at first, feared nothing, suspected nothing. One day passed<sup>27</sup>, [and] the next<sup>28</sup>, [and] more; they were not returned<sup>29</sup>. Then the king sent [a messenger], that<sup>30</sup> he might return<sup>31</sup> them if he would please<sup>32</sup>. Verres told<sup>33</sup> [the messenger] to call again<sup>34</sup>. It seemed strange<sup>35</sup> to the king. He sent again<sup>36</sup>. They were not returned. In one word<sup>37</sup>, Verres ordered the king to leave<sup>38</sup> forthwith the province before night.

VII. IMPERFECTS (OR PERFECTS) DETERMINED BY A POINT OF TIME (§ 577).—1. By this time the king was already on his way to the theatre of war<sup>39</sup>.—2. From here the king started<sup>40</sup> for Amphipolis, and arrived at the town in five days<sup>41</sup>. But at that very time the consul crossed the frontier with all [his] forces.—3. At the same time when (*quo*) this intelligence came<sup>42</sup> to my brother, the house which he owned<sup>43</sup> at Puteoli was destroyed<sup>44</sup> by fire<sup>45</sup>.—4. In the same night when Herostratus burned down<sup>46</sup> the temple of Diana at Ephesus<sup>47</sup>, Alexander the Great was born.—5. When Themistocles at a banquet<sup>48</sup> refused to play on the lyre<sup>49</sup>, his education was questioned<sup>50</sup>.—6. The king, when he met<sup>51</sup> the consul, was attended<sup>52</sup> by his two sons, the one of whom was three years older than the other<sup>53</sup>.—7. Jackson<sup>54</sup>, called the Stone-wall<sup>55</sup>, was hit<sup>56</sup> by a bullet<sup>57</sup> in the battle at Chancellorsville<sup>58</sup>, [and thus] paid the penalty to his country, against which he was arrayed in arms<sup>59</sup>.—8. Armed [bands] destroyed<sup>60</sup> the jail, which was being repaired<sup>61</sup> by order<sup>62</sup> of the Common Council<sup>63</sup>.—9. At that place, Servilius, the same (*is*) who was, the other day, in your house<sup>64</sup>, was attacked<sup>65</sup> [and] killed by [a band of] assassins<sup>66</sup>.—

<sup>1</sup> To him.—<sup>2</sup> rerum novarum cupidus.—<sup>3</sup> primo.—<sup>4</sup> favere.—<sup>5</sup> by ablatives absolute.—<sup>6</sup> execrari.—<sup>7</sup> tollere.—<sup>8</sup> vocare.—<sup>9</sup> exponere.—<sup>10</sup> copiare.—<sup>11</sup> poculum.—<sup>12</sup> § 443, No. 2.—<sup>13</sup> sumere.—<sup>14</sup> unusquisque.—<sup>15</sup> vasum.—<sup>16</sup> gaudere.—<sup>17</sup> convivium.—<sup>18</sup> jucundum ac gratum esse.—<sup>19</sup> nisi.—<sup>20</sup> by the subjunctive of the main verb.—<sup>21</sup> spoliare.—<sup>22</sup> expilare.—<sup>23</sup> rogare aliquid.—<sup>24</sup> finite verb (*ait*).—<sup>25</sup> velle.—<sup>26</sup> artifex.—<sup>27</sup> The predicate is omitted in Latin, making the sentence elliptical.—<sup>28</sup> alter.—<sup>29</sup> retere.—<sup>30</sup> ut.—<sup>31</sup> reddere.—<sup>32</sup> si videatur.—<sup>33</sup> jubere.—<sup>34</sup> Render: To return (*reverti*) to him at a later time (*posterius*).—<sup>35</sup> minus.—<sup>36</sup> iterum.—<sup>37</sup> Quid multa?—<sup>38</sup> decessit.—<sup>39</sup> theatre of war, *castra*.—<sup>40</sup> Render: Having started (*profectus*), he arrived.—<sup>41</sup> by *castra* (p. 270, *ch.*).—<sup>42</sup> an intelligence comes to somebody, *aliquid alicui nuntiatur*.—<sup>43</sup> habere.—<sup>44</sup> to be destroyed, *interire*.—<sup>45</sup> flammæ.—<sup>46</sup> incendio delere.—<sup>47</sup> by the adjective *Ephesus*.—<sup>48</sup> in epulis.—<sup>49</sup> Render: refused (*recusare*) the lyre (*lyra*).—<sup>50</sup> Render: He was considered (*habere*) rather unlearned (*by comparative*).—<sup>51</sup> obviam venire.—<sup>52</sup> was together (*undè*) with.—<sup>53</sup> Render: of whom the older preceded (*ante-*cedere) the younger by three years.—<sup>54</sup> Jaxo.—<sup>55</sup> Render: To whom his citizens gave (*centurie*) the name (*copulmen*) from a stone (*lapideus*) wall. Render: having been hit (*ictus*), paid (*persolvere*).—<sup>56</sup> glans.—<sup>57</sup> Cancellovilla.—<sup>58</sup> armis petere (*with accus.*).—<sup>59</sup> demoliri.—<sup>60</sup> redicere.—<sup>61</sup> ex consilio.—<sup>62</sup> Common Council, *decuriones*.—<sup>63</sup> by *apud*.—<sup>64</sup> to attack and kill, *opprimere*.—<sup>65</sup> insidiator.

10. Cæsar, because almost all the Gauls were under (*in*) arms, thought<sup>1</sup> that he should leave<sup>2</sup> the province at an earlier time<sup>3</sup> than it was his wont<sup>4</sup>. — 11. Although these warnings came<sup>5</sup> from the enemy, he nevertheless (*tamen*) believed that they should not be altogether<sup>6</sup> disregarded<sup>7</sup>. — 12. Early in the morning<sup>8</sup> the expedition<sup>9</sup> left<sup>10</sup> the camp. — 13. The undertaking<sup>11</sup> was much facilitated by a storm which kept the patrols of the enemy within the camp.

VIII. IMPERFECTS OR PERFECTS DETERMINED BY A PERIOD OF TIME (§ 578). (a) BY ADVERBIAL OBJECTS. — 1. Formerly I spoke in the confus<sup>12</sup>, which nobody did longer than I, but now nothing is left<sup>13</sup> to me but<sup>14</sup> these private<sup>15</sup> speaking exercises<sup>16</sup>. — 2. Once the actions<sup>17</sup> of that body<sup>18</sup> were guided<sup>19</sup> by widely different<sup>20</sup> considerations<sup>21</sup>. — 3. In that year [our] currency<sup>22</sup> fluctuated<sup>23</sup> so that nobody knew what<sup>24</sup> he had; at that time the civil war was still raging<sup>25</sup>, and yet trade<sup>26</sup> was looking up<sup>27</sup>, and flourished as if we were<sup>28</sup> in the deepest peace<sup>29</sup>. Congress<sup>31</sup> in the same year, passed<sup>32</sup> the law on the abolition<sup>33</sup> of slavery<sup>34</sup>, [and] in the wisest manner<sup>35</sup> strengthened<sup>36</sup> our amicable relation<sup>37</sup> to foreign<sup>38</sup> nations (*gens*). — 4. In our boyhood public opinion on this subject was very different from ours<sup>39</sup>. — 5. In my boyhood a similar miracle<sup>40</sup> occurred<sup>41</sup>. — 6. At Paris<sup>42</sup> I stayed about two years. There I finished<sup>43</sup> the reading<sup>44</sup> of Laplace's works<sup>45</sup>, which<sup>46</sup> study occupied<sup>47</sup> me a little longer than I expected, because my mind was distracted<sup>48</sup> by cares of the most varied kinds<sup>49</sup>. — 7. From that day to the beginning of the war the task<sup>50</sup> of completing the army was carried on with the greatest energy. Drafts were made<sup>51</sup> in all county-towns<sup>52</sup>, and mass-meetings were held to encourage volunteering<sup>53</sup>. — 8. Scipio observed<sup>54</sup> this habit to the last<sup>55</sup> day of his life to go<sup>56</sup> daily to (*in*) the Capitol, where he closed himself up<sup>57</sup> in Jupiter's temple. — 9. From that time up to Socrates, the Greek philosophers devoted<sup>58</sup> their study principally<sup>59</sup> to the observation of nature<sup>60</sup>. — 10. For three years the State was without laws and was controlled<sup>61</sup> by armed bands<sup>62</sup> of ruffians<sup>63</sup>. — 11. The second and third legions maintained the combat<sup>64</sup> with the greatest bravery till<sup>65</sup> the cohorts, sent<sup>66</sup> by Labienus, carried help<sup>67</sup> to our [soldiers] in distress<sup>68</sup>. — 12. In that state<sup>69</sup> Mallius had been living<sup>70</sup> for three<sup>71</sup> years, but he trusted<sup>72</sup> that

<sup>1</sup> Existimare. — <sup>2</sup> decedere ex. by the grounds. — <sup>3</sup> at an early time, *non tunc*. — <sup>4</sup> *ut* is my wont, *consuevi*. — <sup>5</sup> Render: Although these [things] were admonished by enemies. — <sup>6</sup> *propterea*. — <sup>7</sup> negligere (*irremedial*). — <sup>8</sup> *hinc prima*. — <sup>9</sup> *argueret*. — <sup>10</sup> *excedere aliquo loco*. — <sup>11</sup> Render: It helped *in* *opibus* them much that *quod* a severe storm *opibus* *tempestas* having arisen *ut* *abl. abs.*, kept the patrols *decurio* in the camp. — <sup>12</sup> *confusio*. — <sup>13</sup> *reliquis*. — <sup>14</sup> *quid*. — <sup>15</sup> *domestici*. — <sup>16</sup> *speaking exercises* *declamatio*. — <sup>17</sup> *consilia*. — <sup>18</sup> *collegium*. — <sup>19</sup> *etiam*. — <sup>20</sup> *alios longe*. — <sup>21</sup> *patibiles*. — <sup>22</sup> *nummus*. — <sup>23</sup> *in fluctu*. — <sup>24</sup> *factum*. — <sup>25</sup> by an interrogative clause. — <sup>26</sup> *libere*. — <sup>27</sup> *in gressu*. — <sup>28</sup> *oculos erigere*. — <sup>29</sup> *iniquum*. — <sup>30</sup> *saugmentum*. — <sup>31</sup> *summa* *etiam*. — <sup>32</sup> *summa* *republicam*. — <sup>33</sup> *conclium*. — <sup>34</sup> *terre*. — <sup>35</sup> by *ut* *ut*. — <sup>36</sup> *servitus*. — <sup>37</sup> *consequens*. — <sup>38</sup> *confutatio*. — <sup>39</sup> *Render: friendship with*. — <sup>40</sup> *alios*. — <sup>41</sup> *Render: While we were boys the opinions of men on that thing differed (differre) much from ours*. — <sup>42</sup> *prodigium*. — <sup>43</sup> *actio*. — <sup>44</sup> *Parisi*. — <sup>45</sup> *ad finem pervenire*. — <sup>46</sup> *lectio*. — <sup>47</sup> *the works of Laplace*, *Laplatus*. — <sup>48</sup> *quod quidem*. — <sup>49</sup> *tenere*. — <sup>50</sup> *distrahere*. — <sup>51</sup> by the adjective superlative *distissimus*. — <sup>52</sup> *Render: The greatest energy (studium) was poured (ponere) in the completing (complere) of the army*. — <sup>53</sup> *scribere* *in* *ut*. — <sup>54</sup> *conclium*. — <sup>55</sup> *Render: To call out (vocare) by a gerundial*. — <sup>56</sup> *those who should take (capere) such arms of their own accord (aut sponte)*. — <sup>57</sup> *servare*. — <sup>58</sup> *extremus*. — <sup>59</sup> by the gerundial *conferre*. — <sup>60</sup> *includere*. — <sup>61</sup> *ponere in*. — <sup>62</sup> *maxime*. — <sup>63</sup> *contemplatio rerum*. — <sup>64</sup> *apprehendere*. — <sup>65</sup> *manus*. — <sup>66</sup> *generatus*. — <sup>67</sup> *to defend the cause*, *se sustinere*. — <sup>68</sup> *usque ad quod*. — <sup>69</sup> *summittere*. — <sup>70</sup> *auxilium ferre*. — <sup>71</sup> by the participle pres. of *laborare*. — <sup>72</sup> *statue*. — <sup>73</sup> *versari*. — <sup>74</sup> by *ordinals*. — <sup>75</sup> *confidere*.

the end of his misery<sup>1</sup> was near at hand<sup>2</sup>. — 13. When the king arrived, the city had been besieged already four<sup>3</sup> months. — 14. At that time Crassus had been suffering of the gout<sup>4</sup> for a long time, so that he could not attend to his law-practice<sup>5</sup>. — 15. On the third of July I left<sup>6</sup> Paris, where I had been three months, and arrived at Berlin<sup>7</sup> on the fifth, where I stopped<sup>8</sup> till I received<sup>9</sup> your letter. — 16. Ever since the day when (*quo*) I stopped<sup>10</sup> those nefarious measures, I was singled out<sup>11</sup> by the weapons<sup>12</sup> of all bad<sup>13</sup> citizens.

(b) BY TEMPORAL CLAUSES DENOTING PERIODS (R. 60). — 1. When Crassus was living<sup>14</sup> [in] the greatest power<sup>15</sup> and wealth<sup>16</sup>, he did not know<sup>17</sup> that he had<sup>18</sup> to perish with ignominy beyond the Euphrates. — 2. When Marius had the city of Rome under his control<sup>19</sup>, neither the rights of peace nor [those] of war were left<sup>20</sup> to the citizens. — 3. When I was home at leisure<sup>21</sup>, and was walking<sup>22</sup> on the portico<sup>23</sup>, M. Brutus came to me. — 4. This letter was handed<sup>24</sup> to me, when I was a candidate<sup>25</sup> for the consulship. — While this was going on about the city, the citizens were already aware<sup>26</sup>, how foolishly<sup>27</sup> they had rejected the proffered armistice<sup>28</sup>. — 6. While some were giving way in consternation<sup>29</sup>, and others lingeringly<sup>30</sup> continued the advance<sup>31</sup>, the whole line<sup>32</sup> was thrown into confusion<sup>33</sup>. — 7. While they were treating<sup>34</sup> about the conditions of peace, and Ambiorix on purpose<sup>35</sup> entered<sup>36</sup> into a long conversation<sup>37</sup>, Sabinus was gradually surrounded<sup>38</sup> by the multitude, and killed. — 8. While I was promoting Appius's interests in the province in every manner<sup>39</sup>, I suddenly became the father-in-law of his worst<sup>40</sup> accuser. — 9. While I have been [staying] here in the capital (*in hac urbe*), I have, according to the custom, shaken hands<sup>41</sup> with the President, and have seen<sup>42</sup> almost all thy friends.

(c) BY TEMPORAL CLAUSES WITH *quandiu*, etc., AND BY INDEPENDENT SENTENCES (R. 61-63). — 1. As long as Athens was present, he prevented<sup>43</sup> the Athenians from erecting a statue to him; but in his absence<sup>44</sup> he could no [longer] hinder it. — 2. As long as Sulla staid at Athens, he had Pomponius about him<sup>45</sup>, being charmed<sup>46</sup> by the deportment<sup>47</sup> and knowledge<sup>48</sup> of the young man. — 3. As long as Epaminondas was at the head<sup>49</sup> of the republic, Thebes was the foremost State<sup>50</sup> of all Greece. — 4. As long as Sparta was without a wall, it protected itself by the bodies of the citizens, not by fortifications<sup>51</sup>. — 5. Nearchus was hiding as long in that city, as the king's emissaries were seeking for him. — 6. I heard that professor<sup>52</sup> as long as it was allowed; and (*autem*) it was allowed as long as — <sup>1</sup> *Miseria*. — <sup>2</sup> *to be near at hand*, *adesse*. — <sup>3</sup> *ordinals*. — <sup>4</sup> *to suffer of the gout*, *podagra*. — <sup>5</sup> *to attend to law practice*, *causas agere*. — <sup>6</sup> *proficisci with ablative*. — <sup>7</sup> *Berolinum*. — <sup>8</sup> *manere*. — <sup>9</sup> *Render: till (quo) your letter had been handed (reddere) to me*. — <sup>10</sup> *adversari*. — <sup>11</sup> *petere*. — <sup>12</sup> *telum*. — <sup>13</sup> *perditus*. — <sup>14</sup> *florere*. — <sup>15</sup> *opes*. — <sup>16</sup> *fortuna*. — <sup>17</sup> *ignoscere*. — <sup>18</sup> *gerundial*. — <sup>19</sup> *to have a city under one's control*, *urbem oppressam tenere*. — <sup>20</sup> *relictus*. — <sup>21</sup> *otiosus*. — <sup>22</sup> *ambulare*. — <sup>23</sup> *xy-tum*. — <sup>24</sup> *reddere*. — <sup>25</sup> *to be a candidate*, *petere with accus.* — <sup>26</sup> *sensire*. — <sup>27</sup> *Render: what folly (amentia)*. — <sup>28</sup> *the armistice proffered offered to them*. — <sup>29</sup> *repidus* *as accessory predicate*. — <sup>30</sup> *Render: to continue the advance*, *agere*. — <sup>31</sup> *agere*. — <sup>32</sup> *de industria*. — <sup>33</sup> *instituire with accus.* — <sup>34</sup> *longior sermo*. — <sup>35</sup> *turbare*. — <sup>36</sup> *to promote one's interests*, *aliquem ornare*. — <sup>37</sup> *omnibus rebus*. — <sup>38</sup> *Render: of him who accused him most fiercely (acer)*. — <sup>39</sup> *Render: I have saluted (salutare) the President (præses), and that (et quidem), as it is done (ut fit), after giving the right (hand)*. — <sup>40</sup> *convenire*. — <sup>41</sup> *Render: He resisted (resistere) lest (ne) any statue should be placed (ponere) to him*. — <sup>42</sup> *access*, *predicate*. — <sup>43</sup> *pecum*. — <sup>44</sup> *I am charmed*, *captus sum*. — <sup>45</sup> *humanitas*. — <sup>46</sup> *doctrina*. — <sup>47</sup> *præesse*. — <sup>48</sup> *the foremost State*, *caput*. — <sup>49</sup> *munitio*. — <sup>50</sup> *doctor*.

I felt that I made any progress<sup>1</sup>.— 7. We resisted these unwise<sup>2</sup> plans as long as we could.— 8. The general retained that legion [only] so long as he thought its presence<sup>3</sup> was necessary.— 9. I supported<sup>4</sup> him as long as he was living in my house<sup>5</sup>.— 10. The Romans excelled<sup>6</sup> all other nations in the arts of war<sup>7</sup> as long as they did their own fighting<sup>8</sup>.— 11. Brittany flourished as long as the Romans governed that island<sup>9</sup>; but after<sup>10</sup> the Roman rule<sup>11</sup> had ceased<sup>12</sup>, all traces<sup>13</sup> of humanity rapidly<sup>14</sup> vanished<sup>15</sup>.— 12. Canulejus kept his temper<sup>16</sup> in discussing<sup>17</sup> so long as those that debated<sup>18</sup> with him would submit<sup>19</sup> to his opinions.— 13. It was already day-break<sup>20</sup> when the first troops (*agmen*) of the enemy came in sight<sup>21</sup>.— Already noon was approaching<sup>22</sup> when the messenger returned to the camp.

IX. DESIGNATION OF TIME IN PREDICATES OF REPEATED ACTION (R. 64).— 1. I do not wonder that this happened, for I heard similar things from thy father.— 2. I heard that this orator often spoke to a very slim audience<sup>23</sup>.— 3. On these subjects<sup>24</sup> I have often had long conversations<sup>25</sup> with him, but could never induce<sup>26</sup> him to<sup>27</sup> adopt our views.— 4. Atinius often informed<sup>28</sup> the consul of these irregularities<sup>29</sup> of the soldiers.— 5. I have always liked<sup>30</sup> scholarship and scholars<sup>31</sup>.— 6. Themistocles, when he was a young man<sup>32</sup>, was much engaged<sup>33</sup> in judicial business<sup>34</sup>; he often attended<sup>35</sup> popular meetings, and no important<sup>36</sup> affair was done<sup>37</sup> without him.— 7. In those sad days I was often compelled to pawn my property<sup>38</sup>; often I borrowed<sup>39</sup> money at enormous interest<sup>40</sup>.— 8. That nation always came with arms to their public meetings.— 9. In those days C. Marius always appeared<sup>41</sup> on the streets in the garments of a suppliant<sup>42</sup>.— 10. Meanwhile Indutimārus hovered<sup>43</sup> almost daily with all his cavalry about Labienus's camp, partly to<sup>44</sup> reconnoitre<sup>45</sup> the locality, partly for the sake of creating alarm<sup>46</sup>; all the horsemen almost always (*plerumque*) threw<sup>47</sup> darts<sup>48</sup> over<sup>49</sup> the rampart.— 11. Meanwhile the hope for reinforcements daily increased<sup>50</sup>, and Labienus openly said that he would break<sup>51</sup> camp early at day-break on the next morning<sup>52</sup>.

X. IMPERFECT OF UNITED ACTION (R. 65).— 1. Caesar built<sup>53</sup> the bridge over<sup>54</sup> the Rhine in the following<sup>55</sup> manner: He combined<sup>56</sup> for each yoke<sup>57</sup> two eighteen-inch<sup>58</sup> posts<sup>59</sup>, [being] two feet apart<sup>60</sup> [from each other], and of a length adapted<sup>61</sup> to the depth<sup>62</sup> of the river. These he

<sup>1</sup> To make progress, *proficere*.— <sup>2</sup> imprudent. — <sup>3</sup> by a clause with *ut* (*adesse*).— <sup>4</sup> *adjuvare*.— <sup>5</sup> by *apud*.— <sup>6</sup> *præstare*.— <sup>7</sup> by *bellicus*.— <sup>8</sup> Render: As long as they fought themselves for themselves.— <sup>9</sup> Render: Held the empire of that island.— <sup>10</sup> ablative absolute.— <sup>11</sup> *imperium*.— <sup>12</sup> Render: had been upset (*tollere*).— <sup>13</sup> *vestigium*.— <sup>14</sup> *celer*.— <sup>15</sup> *evanescere*.— <sup>16</sup> *se retinere*.— <sup>17</sup> Render: in saying.— <sup>18</sup> *disputare*.— <sup>19</sup> Render: conceded what he said (*quæ diceret*).— <sup>20</sup> *prima lux*.— <sup>21</sup> to come in sight, *cerni*.— <sup>22</sup> *appetere*.— <sup>23</sup> Render: When very few (*perpauci*) were present (*subj.*).— <sup>24</sup> *res*.— <sup>25</sup> to have long conversations, *multum colloqui*.— <sup>26</sup> *adducere*.— <sup>27</sup> Render: That (*ut*) he acceded (*accedere*) to our views (*sententia*).— <sup>28</sup> *commonefacere*.— <sup>29</sup> *licentia* (*sing.*).— <sup>30</sup> *I like something*, *aliquid mihi placet*.— <sup>31</sup> *vir doctus*.— <sup>32</sup> *ineunte ætate*.— <sup>33</sup> to be engaged in something, *versari in aliquâ re*.— <sup>34</sup> *judicial business*, *judicia*.— <sup>35</sup> *prodire in contiones populi*.— <sup>36</sup> *major*.— <sup>37</sup> *gerere*.— <sup>38</sup> Render: I, compelled by necessity, pawned, (*oppignerari*) my property (*res familiaris*).— <sup>39</sup> *mutuari*.— <sup>40</sup> *ingeni cum versura*.— <sup>41</sup> to appear on the streets, *in publicum prodire*.— <sup>42</sup> the garments of a suppliant, *vestis sordida*.— <sup>43</sup> *vagari*.— <sup>44</sup> *ut*.— <sup>45</sup> Render: to ascertain (*cognoscere*) the site (*situs*) of the camp.— <sup>46</sup> to create alarm, *territare*.— <sup>47</sup> *conjicere*.— <sup>48</sup> *telum*.— <sup>49</sup> *intra*.— <sup>50</sup> *augeri*.— <sup>51</sup> *movere*.— <sup>52</sup> *postero die*.— <sup>53</sup> *facere*.— <sup>54</sup> *in*.— <sup>55</sup> *ad hunc modum*.— <sup>56</sup> *inter se jungere*.— <sup>57</sup> for each yoke must not be separately rendered, but is to be expressed by using distributives for the cardinal numbers.— <sup>58</sup> *sesquipedalis*.— <sup>59</sup> *tignum*.— <sup>60</sup> *intervallo*, with a genitive.— <sup>61</sup> Render: being measured (*dimensus*) according to (*ad*).— <sup>62</sup> *altitudo*.

drove<sup>1</sup> by machinery<sup>2</sup> slanting<sup>3</sup> into [the bottom of] the river, and placed opposite to them two posts<sup>4</sup> joined<sup>5</sup> in the same manner, at a distance<sup>6</sup> of forty feet from the former<sup>7</sup>. Beams<sup>8</sup> two feet thick<sup>9</sup>, corresponding to the interstices between each pair of posts<sup>10</sup>, were fastened<sup>11</sup> on top of them<sup>12</sup>. All these [beams] were connected<sup>13</sup> by timber laid lengthwise over them<sup>14</sup>, and covered over<sup>15</sup> with long rails<sup>16</sup> and fascines<sup>17</sup>.— 2. Pompey, to prevent Cæsar's soldiers from entering the town by force during the very embarkation of his army, ordered the following fortifications to be made<sup>18</sup>: The gates were barricaded<sup>19</sup>, and the streets<sup>20</sup> and squares<sup>21</sup> walled up<sup>22</sup>; the roads leading<sup>23</sup> to the city were intersected by trenches<sup>24</sup>; the roads and approaches<sup>25</sup> which led<sup>26</sup> to the harbor outside the city, were closed<sup>27</sup> by driving<sup>28</sup> [into them] immense logs<sup>29</sup> sharpened at the top<sup>30</sup>.— 3. At first our soldiers advanced (*incedere*) cautiously and with slow steps<sup>31</sup>. But when several of them fell<sup>32</sup>, [being] struck<sup>33</sup> by the darts of those who defended the breastwork<sup>34</sup>, they moved<sup>35</sup> at double quick (step)<sup>36</sup> against the fortifications. There they cut<sup>37</sup> the breastwork with [their] hatchets<sup>38</sup> at many spots<sup>39</sup> at the same time<sup>40</sup>, and the defenders, when they saw that a way was already opening<sup>41</sup>, fell back<sup>42</sup> on the upper<sup>43</sup> part of the town within the wall, while<sup>44</sup> our columns<sup>45</sup> were marching<sup>46</sup> through the breaches<sup>47</sup>.

XI. IMPERFECT OF CONTINGENT ACTION (R. 66).— 1. It is reported<sup>48</sup> that by the ancient Romans, according<sup>49</sup> to a law of king Numa, wars were declared<sup>50</sup> with the following ceremonies<sup>51</sup>: After<sup>52</sup> satisfaction had been demanded<sup>53</sup> without success<sup>54</sup>, the king consulted<sup>55</sup> the senate. When<sup>56</sup> the first [member] who by the king was asked for his opinion<sup>57</sup>, declared<sup>58</sup> that war should<sup>59</sup> be proclaimed, and the majority<sup>60</sup> of the [members] present<sup>61</sup> voted in the same way<sup>62</sup>, the war was [thereby] agreed upon<sup>63</sup>. Then a priest who was called 'fetialis' would carry a lance with an iron point<sup>64</sup> to the boundaries<sup>65</sup> of that people from whom satisfaction was demanded. There he would declare war by a solemn formula. When he had said these words, he would throw<sup>66</sup> the lance into their territory<sup>67</sup>.— 2. Whenever reckless<sup>68</sup> and audacious men were at<sup>69</sup> the helm of the government<sup>70</sup>, the worst<sup>71</sup> and most lamentable<sup>72</sup> shipwrecks<sup>73</sup> were made.— 3. Whenever (*si*) anyone either in the Senate or in<sup>74</sup> [addressing] the peo-

<sup>1</sup> Render: When he had driven (*defigere*), he placed (*statuere*).— <sup>2</sup> *machinationes*.— <sup>3</sup> *prone ac fastigatæ*.— <sup>4</sup> Render: He placed two opposite ones (*contrarius*).— <sup>5</sup> *jungere*.— <sup>6</sup> *intervallum*.— <sup>7</sup> *prior*.— <sup>8</sup> *trabes autem*.— <sup>9</sup> *bipedalis*.— <sup>10</sup> *corresponding . . . posts*, *Render: As much as quantum the juncture (junctura) was distant*.— <sup>11</sup> *immittere*.— <sup>12</sup> *on top of them*, *insuper*.— <sup>13</sup> *contexere*.— <sup>14</sup> Render: By lengthwise timber (*materia disposita*) laid over (*injicere*).— <sup>15</sup> *consternere*.— <sup>16</sup> *longitudo*.— <sup>17</sup> *crates*.— <sup>18</sup> Render: Pompey, that not once under (sub) the very starting protection of the ships Cæsar's soldiers might enter by force (*impetere*), fortified the town in this manner.— <sup>19</sup> *obstruere*.— <sup>20</sup> *viæ*.— <sup>21</sup> *platea*.— <sup>22</sup> *inedificare*.— <sup>23</sup> *which led* (*ferre*).— <sup>24</sup> Render: to the roads trenches cut.— <sup>25</sup> *præsepere*.— <sup>26</sup> *ducere*.— <sup>27</sup> *præsepere*.— <sup>28</sup> *defigere*.— <sup>29</sup> *trabes*.— <sup>30</sup> *sharpened at the top*, *præacutus*.— <sup>31</sup> *lento gradu*.— <sup>32</sup> *cadere*.— <sup>33</sup> *ictus*.— <sup>34</sup> *trabes*.— <sup>35</sup> *ad hunc modum*.— <sup>36</sup> *superius*.— <sup>37</sup> *cadere*.— <sup>38</sup> *dolabra*.— <sup>39</sup> *locus*.— <sup>40</sup> *etiam*.— <sup>41</sup> *aperire*.— <sup>42</sup> *se recipere ad*.— <sup>43</sup> *superius*.— <sup>44</sup> *quum interim*.— <sup>45</sup> *agmen*.— <sup>46</sup> *vadere*.— <sup>47</sup> *aperta intervallo*.— <sup>48</sup> *trudere*.— <sup>49</sup> *ex*.— <sup>50</sup> *indicare*.— <sup>51</sup> Render: By this (i.e. *modus*).— <sup>52</sup> *abl.*.— <sup>53</sup> *to demand satisfaction*, *res repetere*.— <sup>54</sup> *frustra*.— <sup>55</sup> *consultare*.— <sup>56</sup> *abl.*.— <sup>57</sup> *to ask somebody for his opinion*, *aliquem sententiam rogare*.— <sup>58</sup> *consensere*.— <sup>59</sup> *gerundial*.— <sup>60</sup> *major pars*.— <sup>61</sup> of those who were present.— <sup>62</sup> *to*.— <sup>63</sup> *consensere*.— <sup>64</sup> *in eandem sententiam ire*.— <sup>65</sup> *to agree upon a war*, *bellum consensu vote in eandem sententiam ire*.— <sup>66</sup> *in eandem sententiam ire*.— <sup>67</sup> *in eandem sententiam ire*.— <sup>68</sup> *in eandem sententiam ire*.— <sup>69</sup> *in eandem sententiam ire*.— <sup>70</sup> *in eandem sententiam ire*.— <sup>71</sup> *in eandem sententiam ire*.— <sup>72</sup> *in eandem sententiam ire*.— <sup>73</sup> *in eandem sententiam ire*.— <sup>74</sup> *in eandem sententiam ire*.

ple uttered<sup>1</sup> a syllable<sup>2</sup> referring<sup>3</sup> to liberty, the rods<sup>4</sup> and the axe<sup>5</sup> were immediately made ready<sup>6</sup> for<sup>7</sup> his own punishment and as a warning<sup>8</sup> for (the) others.— 4. The enemy attacked<sup>9</sup> now<sup>10</sup> the first column, now the last<sup>11</sup>, according as<sup>12</sup> the locality would give an opportunity.— 5. Whenever by chance<sup>13</sup> any one of those who had thrown<sup>14</sup> themselves into the river reached<sup>15</sup> the other shore by swimming, he was immediately seized<sup>16</sup> by the multitude, and killed with tortures.— 6. Daily the enemy endeavored to lead their troops against our ranks. But (ut) as soon as (simulac) they commenced their advance<sup>17</sup>, a formidable<sup>18</sup> hail-storm<sup>19</sup> would throw<sup>20</sup> their ranks into disorder. As soon as (ubi) they had returned<sup>21</sup> to camp, a marvelous<sup>22</sup> serenity and tranquillity<sup>23</sup> [of the weather] would ensue<sup>24</sup>.— 7. Whatever ship was bound<sup>25</sup> to Macedon was always either sunk<sup>26</sup> or plundered<sup>27</sup> by the prefect.— 8. If any one of the lieutenants<sup>28</sup> proposed<sup>29</sup> a different<sup>30</sup> view<sup>31</sup>, the general would not allow him even an opportunity to prove or explain it<sup>32</sup>.— 9. Wherever<sup>33</sup> [any] gaps<sup>34</sup> appeared<sup>35</sup> in the line<sup>36</sup> of the enemy, the Romans immediately would introduce<sup>37</sup> their columns<sup>38</sup>.— 10. Wherever<sup>39</sup> the elephants were placed<sup>40</sup> during (in) the march, they made<sup>41</sup> (that part of) the army (agmen) safe from attacks<sup>42</sup>, the enemy being afraid<sup>43</sup> to approach<sup>44</sup> [them].— 11. Whenever any one<sup>45</sup> was pointed out by the chief<sup>46</sup>, he was hurried away<sup>47</sup> for execution<sup>48</sup>.— 12. The better (plus) a man<sup>49</sup> had deserved of<sup>50</sup> the country, the<sup>51</sup> less was his chance<sup>52</sup> of receiving [any] honor or reward.— 13. Whomsoever the prætor designated by [a hint of his] eyes, the lictor seized<sup>53</sup> [him] and threw<sup>54</sup> [him] into prison<sup>55</sup>.— 14. Wherever<sup>56</sup> Decius made the attack<sup>57</sup>, they trembled<sup>58</sup> as if<sup>59</sup> struck<sup>60</sup> by supernatural power<sup>61</sup>.— 15. However often the enemy endeavored to break through<sup>62</sup> the lines, they always were repulsed<sup>63</sup> with great slaughter<sup>64</sup>.— 16. I made use of his advice as often as either necessity required<sup>65</sup>, or as some opportunity presented itself<sup>66</sup> to me.— 17. Our countrymen<sup>67</sup> devoted<sup>68</sup> themselves with so much greater zeal to natural science<sup>69</sup>, as high<sup>70</sup> rewards were held out<sup>71</sup> to those who had been most successful<sup>72</sup> in the one or other of its branches.— 18. The nearer I approached<sup>73</sup> the solution of that problem<sup>74</sup>, the farther it seemed to me that I was removing<sup>75</sup> from the point<sup>76</sup>.

<sup>1</sup> Mittere.— <sup>2</sup> vox.— <sup>3</sup> memor.— <sup>4</sup> virgæ.— <sup>5</sup> secūris.— <sup>6</sup> to make something ready, expedire aliquid.— <sup>7</sup> in.— <sup>8</sup> as a warning, in metum (with genitive).— <sup>9</sup> aggredi.— <sup>10</sup> modo... modo.— <sup>11</sup> novissimus.— <sup>12</sup> utcumque.— <sup>13</sup> si quando.— <sup>14</sup> projicere.— <sup>15</sup> to reach the shore by swimming. Render: to touch (attingere) land, having been carried (allatus) to the other shore by swimming (nare).— <sup>16</sup> excipere.— <sup>17</sup> by progredi.— <sup>18</sup> ingens.— <sup>19</sup> cum grandine tempestas.— <sup>20</sup> to throw into disorder, disturbare.— <sup>21</sup> se recipere.— <sup>22</sup> mirus.— <sup>23</sup> cum serenitate tranquillitas.— <sup>24</sup> oriri.— <sup>25</sup> to be bound for a place, locum petere.— <sup>26</sup> suppressere.— <sup>27</sup> spoliare.— <sup>28</sup> legatus.— <sup>29</sup> proponere.— <sup>30</sup> contrarius.— <sup>31</sup> opinio.— <sup>32</sup> Render: would not concede even a place of proving or explaining (disserere).— <sup>33</sup> quacunq̃ue (referring to the battle field; ubicunq̃ue would be 'everywhere').— <sup>34</sup> a gap, intervallum.— <sup>35</sup> to appear, dari.— <sup>36</sup> acies.— <sup>37</sup> insinuare.— <sup>38</sup> ordo.— <sup>39</sup> quacunq̃ue or ubicunq̃ue? and why?— <sup>40</sup> Render: 'stepped on' (incedere).— <sup>41</sup> præbere.— <sup>42</sup> singular (impetus having no plural).— <sup>43</sup> Render: Because to the enemy was fear.— <sup>44</sup> adire.— <sup>45</sup> ut quisque.— <sup>46</sup> dux.— <sup>47</sup> to hurry away, rapere.— <sup>48</sup> nex.— <sup>49</sup> By ut quisque.— <sup>50</sup> to deserve of the country, de republica meritum esse.— <sup>51</sup> ita.— <sup>52</sup> Render: The less was his name presented (edere) for (ad) receiving (ferre) an honor, etc.— <sup>53</sup> apprehendere.— <sup>54</sup> conficere.— <sup>55</sup> vincula.— <sup>56</sup> Quocunq̃ue? quacunq̃ue? or ubicunq̃ue?— <sup>57</sup> to make an attack (on horseback), invehi.— <sup>58</sup> pavere.— <sup>59</sup> haud secus quam.— <sup>60</sup> ictus.— <sup>61</sup> supernatural power, divinum quoddam numen.— <sup>62</sup> perumpere.— <sup>63</sup> repellere.— <sup>64</sup> Render: By great slaughter (cædes) of their [men].— <sup>65</sup> cogere.— <sup>66</sup> se præbere.— <sup>67</sup> civis.— <sup>68</sup> se dedere.— <sup>69</sup> by investigare naturam.— <sup>70</sup> amplius (comparative).— <sup>71</sup> proponere.— <sup>72</sup> Render: who had most (maxime) progressed (proficere, in the subjunctive) in each branch (disciplina)— <sup>73</sup> accedere ad.— <sup>74</sup> by quæstionem solvere.— <sup>75</sup> recedere.— <sup>76</sup> a line mihi proposito.

XII. DESCRIBING IMPERFECTS (§ 580).— 1. The aspect<sup>1</sup> of the triumphal procession<sup>2</sup> was most brilliant<sup>3</sup>. Paullus Æmilius himself, the triumphing general<sup>4</sup>, crowned with laurels<sup>5</sup>, rode<sup>6</sup> in a gilded<sup>7</sup> chariot<sup>8</sup> drawn<sup>9</sup> by four white horses. Behind him within<sup>10</sup> the wagon stood a public slave holding a golden crown over his<sup>11</sup> head. Next came<sup>12</sup> the lictors with their laureled<sup>13</sup> rods<sup>14</sup>. Next<sup>15</sup> to them marched<sup>16</sup> the victorious<sup>17</sup> army. The soldiers, likewise<sup>18</sup> laurel-crowned<sup>19</sup>, adorned with those<sup>20</sup> rewards of merit which each had received<sup>21</sup> in the campaign, sang<sup>22</sup> their own praises, and [those] of their general<sup>23</sup>.— 2. The spectacle was a most revolting<sup>24</sup> one. Mettius was surrounded<sup>25</sup> by his cutthroats<sup>26</sup>, who evidently<sup>27</sup> lorded<sup>28</sup> the assembly<sup>29</sup>. One of the Common Council presided. Not a voice of a decent<sup>30</sup> citizen (*plur.*) was heard.

XIII. HISTORICAL IMPERFECTS (§ 581). 1. The officers<sup>31</sup> were sitting<sup>32</sup> at the banquet, when suddenly a slave announced that the enemy had entered<sup>33</sup> the city.— 2. The conference<sup>34</sup> had scarcely ended<sup>35</sup>, when the first columns<sup>36</sup> of the enemy were in sight<sup>37</sup>.— 3. Themistocles had daily<sup>38</sup> conferences<sup>39</sup> with the ephori, in which he tried<sup>40</sup> to put off<sup>41</sup> the matter as long as possible, when in the meanwhile at Athens the fortification of the city and of the Piræus was pushed<sup>42</sup> with the greatest energy<sup>43</sup> and rapidity<sup>44</sup>.— 4. Bias was once on board a ship<sup>45</sup> with wicked<sup>46</sup> men. When during<sup>47</sup> a storm the ship was tossed<sup>48</sup> by the waves<sup>49</sup>, and the men (*isti*) invoked<sup>50</sup> the gods, he said<sup>51</sup>, 'Be silent, lest<sup>52</sup> the gods perceive<sup>53</sup> that you are here on board'.— 5. C. Vettius, the leader of the Marsi, was transported<sup>54</sup> to the Roman general. His slave drew<sup>55</sup> the sword [out of the scabbard], of the very soldier by whom he was conducted<sup>56</sup> and first killed his master; he then said<sup>57</sup>, 'I have emancipated<sup>58</sup> my master; it is now<sup>59</sup> time to attend to myself<sup>60</sup>'. And thus he ran the sword through his body<sup>61</sup>.— 6. When this was announced to the Consul, he ordered the army to stop<sup>62</sup>, and examined the locality [with his eyes<sup>63</sup>]. There was a marsh<sup>64</sup> to (ad) the right, on which a forest bordered<sup>65</sup>. Suspecting<sup>66</sup> that the enemy was hiding there, he sent three cohorts to<sup>67</sup> reconnoitre<sup>68</sup> the forest as to the presence and strength of any hostile forces.— 7. Meanwhile Cinna marched at the head of<sup>69</sup> five legions to the support of<sup>70</sup> his [troops], and his cavalry was approaching Sulla's<sup>71</sup> horsemen at the same time as<sup>72</sup>

<sup>1</sup> Aspectus.— <sup>2</sup> agmen triumphale.— <sup>3</sup> splendidus.— <sup>4</sup> the triumphing general, triumphator.— <sup>5</sup> Render: crowned by laurels, aureus, coronatus.— <sup>6</sup> vehi.— <sup>7</sup> auratus.— <sup>8</sup> currus (i. d.).— <sup>9</sup> in a chariot joined to four white horses.— <sup>10</sup> in the wagon itself.— <sup>11</sup> Render by the dative of the interested person.— <sup>12</sup> to come next, sequi.— <sup>13</sup> laureatus.— <sup>14</sup> fascos.— <sup>15</sup> proximus.— <sup>16</sup> incedere.— <sup>17</sup> victor.— <sup>18</sup> p. 252, Obs. 9.— <sup>19</sup> laureatus.— <sup>20</sup> by suis on account of quisque (§ 362, R. 19, No. 3, c).— <sup>21</sup> Render: with which they had been presented (donare) during the war.— <sup>22</sup> canere.— <sup>23</sup> imperator.— <sup>24</sup> atrox.— <sup>25</sup> circumventus.— <sup>26</sup> circumventus.— <sup>27</sup> haud dubie.— <sup>28</sup> dominari de.— <sup>29</sup> contio.— <sup>30</sup> bonus.— <sup>31</sup> dux.— <sup>32</sup> sedere.— <sup>33</sup> irrumperet in.— <sup>34</sup> by colloqui.— <sup>35</sup> finem aliquas rei facere.— <sup>36</sup> a men.— <sup>37</sup> conspectus.— <sup>38</sup> adverb.— <sup>39</sup> colloquium.— <sup>40</sup> sentire.— <sup>41</sup> to put off the matter as long as possible, tempus quam longissime ducere.— <sup>42</sup> Render: when the city, etc., was being fortified.— <sup>43</sup> acritas.— <sup>44</sup> celeritas.— <sup>45</sup> to be on board a ship, navigare.— <sup>46</sup> improbus.— <sup>47</sup> during a storm. Render: a storm (tempestas) having arisen, a cœlis.— <sup>48</sup> quater.— <sup>49</sup> ductus.— <sup>50</sup> invocare.— <sup>51</sup> inquit (to be placed after 'Be silent').— <sup>52</sup> ne.— <sup>53</sup> sentire.— <sup>54</sup> ducere.— <sup>55</sup> drew out (eduxit) the sword 'to' after 'Be silent'.— <sup>56</sup> inquit (after the first word of the next sentence).— <sup>57</sup> to have emancipated.— <sup>58</sup> inquit.— <sup>59</sup> to attend to one's self, sibi consulere.— <sup>60</sup> he pierced (transfixit) himself by the sword.— <sup>61</sup> consistere.— <sup>62</sup> Render: He looked around (circumspicere).— <sup>63</sup> palas.— <sup>64</sup> adiacere (p. 221, Obs. 8).— <sup>65</sup> Render: Having suspected.— <sup>66</sup> Render: who should reconnoitre (circumspicere).— <sup>67</sup> Render: ascertain (cognoscere) whether any and what kind of forces of the enemy were in the forest (whether any? equis, see R. 85, Obs. 10).— <sup>68</sup> Render: I did reconnoitre.— <sup>69</sup> abstract dative.— <sup>70</sup> by the adjective Sullanus.— <sup>71</sup> et.

the legions were seen<sup>1</sup> in order of battle<sup>2</sup> by the enemy, and all was suddenly changed. The one legion of Cinna<sup>3</sup> which was pressed by the enemy, encouraged<sup>4</sup> by the hope of relief,<sup>5</sup> made an attack on [their] adversaries. These, fearing for their communications in the rear<sup>6</sup>, set the example<sup>7</sup> of flight. The right wing<sup>8</sup>, having perceived<sup>9</sup> the fright<sup>10</sup> of the horsemen, gave way<sup>11</sup> to avoid<sup>12</sup> being made prisoners within [their] intrenchments<sup>13</sup>, and most of them threw<sup>14</sup> themselves from a height<sup>15</sup> of ten feet into the trenches. All was<sup>16</sup> disorder, panic<sup>17</sup>, and rout<sup>18</sup>. To remedy<sup>19</sup> these serious checks<sup>20</sup>, the following<sup>21</sup> expedients<sup>22</sup> offered themselves<sup>23</sup> to Sulla, which saved his army from destruction<sup>24</sup>.

XIV. DIRECT INNER ACTION (§ 582).— 1. Cæsar thought<sup>25</sup> the best plan would be<sup>26</sup> to collect<sup>27</sup> ships<sup>28</sup>, to cross the sea, and to follow Pompey; but he was afraid this would be slow work and would take a great time<sup>29</sup>. He did not wish<sup>30</sup> that in the meanwhile (*interea*) during<sup>31</sup> his absence more troops<sup>32</sup> should be enlisted<sup>33</sup> by the Pompeian party<sup>34</sup>, or that expeditions should be sent to Gaul<sup>35</sup> and Italy.— 2. Cæsar did not think it advisable<sup>36</sup> to subject<sup>37</sup> his passage over the sea<sup>38</sup> to the perils of the winter season<sup>39</sup>.— 3. Cæsar thought it advisable to conceal the intelligence he had received<sup>40</sup>.— 4. Cæsar did not think (*existimare*) that the enemy would cross that river.— 5. They thought that all were preparing [for] flight.— 6. Cicero thought (*statuere*) that this principle<sup>41</sup> in the administration<sup>42</sup> of the province was the correct<sup>43</sup> one.— 7. Cæsar resolved (*statuere*) to<sup>44</sup> carry out this plan in the administration of [his] province.— 8. Pompey's opinion greatly<sup>45</sup> differed from mine.— 9. The Peripatetics<sup>46</sup> and Academicians<sup>47</sup> differed in terminology<sup>48</sup>, [but] agreed<sup>49</sup> in substance<sup>50</sup>.— 10. Cæsar laid this matter<sup>51</sup> over<sup>52</sup> to (*in*) the next (*posterus*) day.— 11. Cicero knew that his departure<sup>53</sup> would offend Cæsar.— 12. The jury<sup>54</sup> did not agree.— 13. After<sup>55</sup> this address<sup>56</sup> had been made, the opinions of all agreed<sup>57</sup> at once<sup>58</sup>.— 13. Pythagoras believed that the world constituted<sup>59</sup> a numerical figure<sup>60</sup>.— 14. Posidonius believed that dying [persons] had the gift of prophecy<sup>61</sup>.— 15. Chrysippus thought that all things were made<sup>62</sup> for the sake of men.

XV. IMPERFECTS OF REFERENCE (TO INNER ACTION) § 584.— 1. When

<sup>1</sup> Cernere.— <sup>2</sup> in order of battle, by the adjective *instructus* (accessory predicate).— <sup>3</sup> by the adjective *Cinnatus*.— <sup>4</sup> confirmare.— <sup>5</sup> subsidium.— <sup>6</sup> Render: *Fearing for* (dative) *their retreat* (receptus).— <sup>7</sup> to set the example for something, *signum alicujus rei dare*.— <sup>8</sup> cornu.— <sup>9</sup> animadvertere (ablative absolute).— <sup>10</sup> terror.— <sup>11</sup> sese recipere.— <sup>12</sup> Render: *Lest* (ne) *they might be oppressed within*, etc.— <sup>13</sup> munitio.— <sup>14</sup> precipitare.— <sup>15</sup> Render: *from a breastwork* (munitio) *of ten feet*.— <sup>16</sup> Render: *was full of disorder* (tumultus).— <sup>17</sup> terror.— <sup>18</sup> fuga.— <sup>19</sup> Render: *For these checks*.— <sup>20</sup> Render: *these so great evils*.— <sup>21</sup> hic.— <sup>22</sup> subsidium.— <sup>23</sup> succurrere.— <sup>24</sup> Render: *which brought* (afferre) *safely* (salus) *to his army*.— <sup>25</sup> use the form of a concessive clause (*although he thought—yet*).— <sup>26</sup> Render: *Cæsar approved* (probare) *most* (maxime).— <sup>27</sup> cogere.— <sup>28</sup> Render: *after having collected ships* (ablative absolute) *to cross*, etc.— <sup>29</sup> Render: *He feared the delay* (mora) *of that thing, and the length* (longinquitas) *of time*.— <sup>30</sup> nolle.— <sup>31</sup> ablative absolute.— <sup>32</sup> more troops, auxilia.— <sup>33</sup> parare.— <sup>34</sup> the Pompeian party, Pompejani.— <sup>35</sup> Render: *that Gaul should be tempted* (temptare).— <sup>36</sup> by *existimare* with the gerundive of *subicere*.— <sup>37</sup> that the passage should be subjected.— <sup>38</sup> passage over the sea, navigatio.— <sup>39</sup> to the perils of the winter season = to winter.— <sup>40</sup> Render: *That those* (things) *which he had ascertained* (cognoscere) *should be concealed* (dissimulare) *by him*.— <sup>41</sup> ratio.— <sup>42</sup> by administrare.— <sup>43</sup> optimus.— <sup>44</sup> that this plan (*ratio*) should be carried out (*observare*) *by him in the administration*, etc.— <sup>45</sup> multum.— <sup>46</sup> Peripatetici.— <sup>47</sup> Academici.— <sup>48</sup> in terminology, vocabulis.— <sup>49</sup> consentire.— <sup>50</sup> re ipsa.— <sup>51</sup> res.— <sup>52</sup> to lay over, differre.— <sup>53</sup> profectio.— <sup>54</sup> Render: *The opinions* (sententie) *of the twelve men did not agree* (congruere).— <sup>55</sup> ablative absolute.— <sup>56</sup> oratio.— <sup>57</sup> in unum congruere.— <sup>58</sup> statim.— <sup>59</sup> constare ex.— <sup>60</sup> numerus.— <sup>61</sup> to have the gift of prophecy, divinare.— <sup>62</sup> to be made, nasci.

Muræna returned to the city, he intimated<sup>1</sup> [by it] that there he would be of greater use<sup>2</sup> to his country than anywhere else<sup>3</sup>.— 2. You acted unwisely<sup>4</sup> when you were a candidate<sup>5</sup> for the prætorship<sup>6</sup> against such a strong rival<sup>7</sup>.— 3. When Alexander declared war against (*Dat.*) Darius, he did not mean<sup>8</sup> to gratify<sup>9</sup> the Greeks, but his own ambition<sup>10</sup>.— 4. When the English<sup>11</sup> demanded<sup>12</sup> a tribute<sup>13</sup> from these provinces, they seemed, according to the letter, to demand<sup>14</sup> a tribute, but in fact<sup>15</sup> they demanded that we should impress<sup>16</sup> the mark<sup>17</sup> of servitude on<sup>18</sup> ourselves.— [R. 70]: 5. When the defendants had come to Syracuse, Apronius, who<sup>19</sup> was appointed<sup>20</sup> as judge by Verres, told [them] that they had acted<sup>21</sup> against the edict (*edictum*). They asked, 'In what respect<sup>22</sup>?' He answered that he would tell [them] at the trial<sup>23</sup>. Apronius took<sup>24</sup> Artemidōrus and Tlepolemus as complainants in the name of the people<sup>25</sup>. The defendants asked in what form he would rule<sup>26</sup> the question at issue. He answered, 'If it shall be proved<sup>27</sup> that [they] acted against the edict'. Timarchides advised<sup>28</sup> [the defendants] to compromise<sup>29</sup>. They peremptorily refused<sup>30</sup>.— 6. The complainant<sup>31</sup> asserted<sup>32</sup> that Manlius<sup>33</sup> was in possession of an estate belonging to him (*i. e.*, the complainant). The defendant denied [it]. He (*i. e.*, the defendant) said he would prove that he held that estate from the [real] owner<sup>34</sup>; he asked<sup>35</sup> for a referee<sup>36</sup>.— 7. That matter came up<sup>37</sup> in the Senate. Volcatius denied that the duumvirs had legally<sup>38</sup> that right<sup>39</sup> which they claimed<sup>40</sup>. The tribunes interceded<sup>41</sup>, [and] so the matter was dropped<sup>42</sup>. I [now] introduced<sup>43</sup> your affair; Hortensius made the report<sup>44</sup>. His report<sup>45</sup> was received<sup>46</sup> with loud cries of disapprobation by many. The consuls neither assented<sup>47</sup>, nor did they object<sup>48</sup> very much<sup>49</sup>. After<sup>50</sup> this debate<sup>51</sup> had been protracted<sup>52</sup> till nightfall<sup>53</sup> without<sup>54</sup> being finished<sup>55</sup>, the Senate adjourned<sup>56</sup>.— 8. If what Trebonius just now mentioned<sup>57</sup> is true, I believe that you will not make the journey<sup>58</sup> without great danger.— 9. You said correctly<sup>59</sup> that it is exceedingly difficult to disabuse<sup>60</sup> the soul from the habit of the eyes.— 10. In the same letter you asked<sup>61</sup> [me] not to<sup>62</sup> detain<sup>63</sup> these men [any] longer from [their] work, and added that you intended<sup>64</sup> to come over<sup>65</sup> yourself.— 11. Hortensius said that you were engaged<sup>66</sup> with writ-

<sup>1</sup> Significare.— <sup>2</sup> to be of greater use, plus prodesse.— <sup>3</sup> in any other place.— <sup>4</sup> imprudenter.— <sup>5</sup> petere, with accus.— <sup>6</sup> prætura.— <sup>7</sup> Render: *while so great and so powerful* (quærens) *a man was a candidate with thee*.— <sup>8</sup> velle.— <sup>9</sup> satis facere with dative.— <sup>10</sup> gloria.— <sup>11</sup> Angli.— <sup>12</sup> postulare.— <sup>13</sup> tributum.— <sup>14</sup> Render: *they demanded by the* (capitulum).— <sup>15</sup> Angli.— <sup>16</sup> postulare.— <sup>17</sup> tributum.— <sup>18</sup> Render: *they demanded by the* (capitulum).— <sup>19</sup> autem verum.— <sup>20</sup> imprimere.— <sup>21</sup> nota.— <sup>22</sup> dative.— <sup>23</sup> by participial construction.— <sup>24</sup> to appoint somebody as judge, aliquem judicem dare.— <sup>25</sup> facere.— <sup>26</sup> in what respect, quid (as object of facere).— <sup>27</sup> in judicio.— <sup>28</sup> ingerere imperfect, because it belongs to the judicial transaction, implying a verb of saying.— <sup>29</sup> complainants in the name of the people (in an action for the recovery of property), recuperatores.— <sup>30</sup> Render: *In what words* (in with the accus.) *he would give the judgment*.— <sup>31</sup> 'Si paret,' the beginning of every judicial rule (formula) given by the prætor.— <sup>32</sup> admonere.— <sup>33</sup> that (ut) they should compromise (decidere) the thing.— <sup>34</sup> to refuse peremptorily, pernegare.— <sup>35</sup> actor.— <sup>36</sup> contendere.— <sup>37</sup> Render: *That his estate* (fundus) *was possessed by Manlius*.— <sup>38</sup> dominus.— <sup>39</sup> petere with accus.— <sup>40</sup> arbiter qui rem cognosceret.— <sup>41</sup> Render: *Action was taken* (to take action = agere) *on this matter in the Senate*.— <sup>42</sup> according to the laws.— <sup>43</sup> potestas.— <sup>44</sup> which they assumed to themselves.— <sup>45</sup> intercedere.— <sup>46</sup> to be dropped, cadere.— <sup>47</sup> proponere.— <sup>48</sup> to make a report, referre.— <sup>49</sup> oratio.— <sup>50</sup> Render: *To his oration it was clamored* (reclamare) *violently* (vehementer) *by many*.— <sup>51</sup> concedere.— <sup>52</sup> resistere.— <sup>53</sup> valde.— <sup>54</sup> Ablative absolute (vehementer) *by many*.— <sup>55</sup> ducere.— <sup>56</sup> nox.— <sup>57</sup> by neque, p. 189, No. 3; p. 188, No. (b).— <sup>58</sup> conficere.— <sup>59</sup> to adjourn, dimitti.— <sup>60</sup> commemorare.— <sup>61</sup> to make a journey, proficisci.— <sup>62</sup> bene.— <sup>63</sup> abducere ab.— <sup>64</sup> petere.— <sup>65</sup> ne.— <sup>66</sup> prohibere.— <sup>67</sup> velle.— <sup>68</sup> hic.— <sup>69</sup> occupatum esse, with abl.

ing, and told<sup>1</sup> [me] that he had seen you twice<sup>2</sup> at Cumæ when you were burying<sup>3</sup> [your] brother Marcus.— 12. Attalus said that it was more pleasant to make a friend than to have one.— 13. Philip, Alexander's father, said that it was possible to take<sup>4</sup> any<sup>5</sup> fortress to which a donkey<sup>6</sup> laden<sup>7</sup> with gold could<sup>8</sup> climb up<sup>9</sup>.

XVI. PREDICATES OF HABIT WITH *solere*, etc. (§ 585).— 1. Julius Cæsar did not forget anything except<sup>10</sup> injuries [received].— 2. It was customary with the Spartans to use red tunics<sup>11</sup> in battle to<sup>12</sup> conceal<sup>13</sup> the blood<sup>14</sup> of [their] wounds.— 3. The ancient Massilians used to give to strangers<sup>15</sup>, who<sup>16</sup> were leaving<sup>17</sup> their city, loans in money<sup>18</sup> to<sup>19</sup> be returned to them in the lower world<sup>20</sup>.— 4. The Cimbrians had<sup>21</sup> the habit to exult<sup>22</sup> in battle, [but] to wail<sup>23</sup> in sickness.— 5. The Lacedæmonians, before they went<sup>24</sup> to battle<sup>25</sup>, used to arouse<sup>26</sup> [their] courage<sup>27</sup> by the sounds<sup>28</sup> of the flute<sup>29</sup>.— 6. The Persians observed the habit<sup>30</sup> not to<sup>31</sup> see<sup>32</sup> their children before these (*they*) had completed<sup>33</sup> their seventh year.— 7. In those times men used to talk more bravely for their liberty than they fought<sup>34</sup> for it.— 8. When Epaminondas had come into a company<sup>35</sup> in which either public affairs<sup>36</sup> or philosophical subjects<sup>37</sup> were<sup>38</sup> discussed<sup>39</sup>, he never used to leave it<sup>40</sup> before the discussion had<sup>41</sup> closed<sup>42</sup>.— 9. In those times the Athenians used to expel from the State by ostracism<sup>43</sup> those who seemed<sup>44</sup> to be dangerous<sup>45</sup> to the liberty of the republic.

XVII. IMPERFECTS OF HABIT WITHOUT *solere*, etc.— 1. Atticus so conducted himself<sup>46</sup> as<sup>47</sup> to seem on terms of equality<sup>48</sup> both with the lowest and with the greatest.— 2. The Lacedæmonians always had two kings from the two families of Procles and Eurysthenes. It was not allowed<sup>49</sup> that a member<sup>50</sup> of the one of these families should succeed in the place of a king of the other family. The oldest son of the last king in possession had the first claim<sup>51</sup> to succession. If a king<sup>52</sup> had deceased without male issue, then the next of kin was elected.— 3. At Athens those who were<sup>53</sup> condemned [to death] in a public trial<sup>54</sup> were delivered<sup>55</sup> to the board of eleven<sup>56</sup> for execution<sup>57</sup>.— 4. Whatever was asked of Atticus<sup>58</sup>, he [always] gave [his] promises<sup>59</sup> after mature reflection as to their

<sup>1</sup> Narrare.—<sup>2</sup> iterum (frequently used with the force of bis, because what has been done a second time must have been done twice).—<sup>3</sup> efferre.—<sup>4</sup> expugnare.—<sup>5</sup> Render: *All fortresses* (castellum).—<sup>6</sup> asellus.—<sup>7</sup> onustus.—<sup>8</sup> not rendered; the finite verb often including the meaning of posse.—<sup>9</sup> ascendere.—<sup>10</sup> nisi.—<sup>11</sup> tunica rubra.—<sup>12</sup> ad with gerundial.—<sup>13</sup> dissimulare.—<sup>14</sup> cruor.—<sup>15</sup> hospes.—<sup>16</sup> by a participle.—<sup>17</sup> egredi ex.—<sup>18</sup> pecuniæ mutue.—<sup>19</sup> Render: which were to be returned (subjunctive).—<sup>20</sup> apud inferos.—<sup>21</sup> By esse with dative.—<sup>22</sup> exultare.—<sup>23</sup> lamentari.—<sup>24</sup> descendere ad (subjunctive).—<sup>25</sup> by dimicare.—<sup>26</sup> inflammare.—<sup>27</sup> animi.—<sup>28</sup> concentu.—<sup>29</sup> tibia.—<sup>30</sup> institutum.—<sup>31</sup> ut.—<sup>32</sup> aspicere.—<sup>33</sup> implere (subjunctive).—<sup>34</sup> 'they fought' must be placed in the same form of the verb as 'to talk'.—<sup>35</sup> circulus.—<sup>36</sup> public affairs, respublica.—<sup>37</sup> philosophical subjects, philosophia.—<sup>38</sup> subjunctive.—<sup>39</sup> Render: it was disputed on public affairs, etc.—<sup>40</sup> discedere ex (inde).—<sup>41</sup> subjunctive.—<sup>42</sup> the discussion closes, sermo ad finem perducitur.—<sup>43</sup> ostracismus.—<sup>44</sup> subjunctive.—<sup>45</sup> Render: Those from (ex) whom the liberty of the republic seemed to be able to take (cupere) some damage (detrimentum; by partitive genitive).—<sup>46</sup> se gerere.—<sup>47</sup> ut.—<sup>48</sup> Render: that he seemed common (communis) to the lowest (infimus) and a peer (par) to the foremost (princeps).—<sup>49</sup> licere.—<sup>50</sup> Render: That (infin. clause) a king should be made out of the one (alter) of these [families] into the place of the other family.—<sup>51</sup> Render: In the first place (primum) consideration was had (rationem habere) of him who was (subjunctive) the oldest out of the children of the one (ille) who had deceased (decedere, subj.) [while] reigning (regnare).—<sup>52</sup> Render: If he (is) had not left (subjunctive) male issue (virilis sexus), then was elected who was (subj.) the next by relationship (propinquitas).—<sup>53</sup> participle.—<sup>54</sup> publice.—<sup>55</sup> tradere.—<sup>56</sup> See Part I., p. 44, 5.—<sup>57</sup> supplicium.—<sup>58</sup> This attribute of the clause must be made the grammatical subject of the principal sentence (Atticus promised what was asked—rogare).—<sup>59</sup> to give promises, promittere.

scrupulous fulfilment<sup>1</sup>.— 5. Dionysius, from fear<sup>2</sup> of razors<sup>3</sup>, used to burn<sup>4</sup> his<sup>5</sup> beard<sup>6</sup> by lighted<sup>7</sup> charcoal<sup>8</sup>.— 6. Scipio Africanus was wont to take<sup>9</sup> occasionally<sup>10</sup> a season of rest<sup>11</sup> from his magnificent<sup>12</sup> public labors<sup>13</sup>, and from the crowds of human beings<sup>14</sup>, to retreat<sup>15</sup> to solitude<sup>16</sup>, as if<sup>17</sup> to a port.— 7. The battle-order of the Roman army [always] consisted of three lines<sup>18</sup>. The first line<sup>19</sup> was called 'hastati', who entered into the combat<sup>20</sup> first of all. These were followed<sup>21</sup> by those who bore the name<sup>22</sup> 'principes'. The third line were the 'triarii', veteran<sup>23</sup> soldiers of tried<sup>24</sup> bravery. If the 'hastati' could not beat<sup>25</sup> the enemy, the 'principes' received<sup>26</sup> them into the places<sup>27</sup> left open for them in their ranks. Then the combat belonged<sup>28</sup> to the 'principes', and the 'hastati' formed the second line<sup>29</sup>. If neither the 'principes' were successful<sup>30</sup>, they gradually<sup>31</sup> fell back<sup>32</sup> on the line<sup>33</sup> of the triarii. Hence it was a proverb<sup>34</sup>, when anything was in a bad plight<sup>35</sup>, that<sup>36</sup> the matter<sup>37</sup> had come<sup>38</sup> to the triarii.— 8. The elder Pliny was of an almost incredible studiousness<sup>39</sup>. He began<sup>40</sup> to study by lamp-light<sup>41</sup> directly<sup>42</sup> after (a) midnight<sup>43</sup>. Before daylight<sup>44</sup> he reported<sup>45</sup> to the emperor Vespasianus, who likewise<sup>46</sup> made use of the night for his labors. Having returned<sup>47</sup> home, he devoted<sup>48</sup> the rest<sup>49</sup> of the day to studies. Even during<sup>50</sup> dinner he read a book, and took notes<sup>51</sup>; for he never read<sup>52</sup> anything without<sup>53</sup> taking notes. When he travelled<sup>54</sup>, a secretary<sup>55</sup> accompanied him<sup>56</sup> with a book and writing-tablets<sup>57</sup>, whose hands, in winter, were protected<sup>58</sup> by long sleeves<sup>59</sup>, that<sup>60</sup> not even cold weather<sup>61</sup> might interfere<sup>62</sup> with his studies. The works<sup>63</sup> which he left, comprised one hundred and sixty volumes<sup>64</sup>.

XVIII. ORDINARY FUTURE-PRESENT (R. 73).— 1. We shall know in two days what<sup>65</sup> is the matter<sup>66</sup>.— 2. We shall wander about<sup>67</sup> destitute<sup>68</sup> with our wives<sup>69</sup> and children.— 3. Shall I remain, or shall I depart? Surely<sup>70</sup> I shall effect nothing without money and without an armed force<sup>71</sup>.— 4. All this you will learn<sup>72</sup> from Pompey's letter.— 5. That time will come, and<sup>73</sup> rapidly<sup>74</sup> too.— 6. Thou, surely, wilt find nobody more adapted<sup>75</sup> to this purpose<sup>76</sup> than I am.— 7. Nothing will be done<sup>77</sup> in<sup>78</sup>

<sup>1</sup> The whole clause 'after . . . fulfilment' is rendered by the adverb *religiose*, a brevity of expression inadmissible in English.—<sup>2</sup> by *metuere* or cessare predi.—<sup>3</sup> culter, tonsor.—<sup>4</sup> igne.—<sup>5</sup> barba.—<sup>6</sup> by *metuere* or cessare predi.—<sup>7</sup> culter, tonsor.—<sup>8</sup> igne.—<sup>9</sup> capere.—<sup>10</sup> occasionally.—<sup>11</sup> by *metuere* or cessare predi.—<sup>12</sup> culter, tonsor.—<sup>13</sup> culter, tonsor.—<sup>14</sup> culter, tonsor.—<sup>15</sup> culter, tonsor.—<sup>16</sup> culter, tonsor.—<sup>17</sup> culter, tonsor.—<sup>18</sup> culter, tonsor.—<sup>19</sup> culter, tonsor.—<sup>20</sup> culter, tonsor.—<sup>21</sup> culter, tonsor.—<sup>22</sup> culter, tonsor.—<sup>23</sup> culter, tonsor.—<sup>24</sup> culter, tonsor.—<sup>25</sup> culter, tonsor.—<sup>26</sup> culter, tonsor.—<sup>27</sup> culter, tonsor.—<sup>28</sup> culter, tonsor.—<sup>29</sup> culter, tonsor.—<sup>30</sup> culter, tonsor.—<sup>31</sup> culter, tonsor.—<sup>32</sup> culter, tonsor.—<sup>33</sup> culter, tonsor.—<sup>34</sup> culter, tonsor.—<sup>35</sup> culter, tonsor.—<sup>36</sup> culter, tonsor.—<sup>37</sup> culter, tonsor.—<sup>38</sup> culter, tonsor.—<sup>39</sup> culter, tonsor.—<sup>40</sup> culter, tonsor.—<sup>41</sup> culter, tonsor.—<sup>42</sup> culter, tonsor.—<sup>43</sup> culter, tonsor.—<sup>44</sup> culter, tonsor.—<sup>45</sup> culter, tonsor.—<sup>46</sup> culter, tonsor.—<sup>47</sup> culter, tonsor.—<sup>48</sup> culter, tonsor.—<sup>49</sup> culter, tonsor.—<sup>50</sup> culter, tonsor.—<sup>51</sup> culter, tonsor.—<sup>52</sup> culter, tonsor.—<sup>53</sup> culter, tonsor.—<sup>54</sup> culter, tonsor.—<sup>55</sup> culter, tonsor.—<sup>56</sup> culter, tonsor.—<sup>57</sup> culter, tonsor.—<sup>58</sup> culter, tonsor.—<sup>59</sup> culter, tonsor.—<sup>60</sup> culter, tonsor.—<sup>61</sup> culter, tonsor.—<sup>62</sup> culter, tonsor.—<sup>63</sup> culter, tonsor.—<sup>64</sup> culter, tonsor.—<sup>65</sup> culter, tonsor.—<sup>66</sup> culter, tonsor.—<sup>67</sup> culter, tonsor.—<sup>68</sup> culter, tonsor.—<sup>69</sup> culter, tonsor.—<sup>70</sup> culter, tonsor.—<sup>71</sup> culter, tonsor.—<sup>72</sup> culter, tonsor.—<sup>73</sup> culter, tonsor.—<sup>74</sup> culter, tonsor.—<sup>75</sup> culter, tonsor.—<sup>76</sup> culter, tonsor.—<sup>77</sup> culter, tonsor.—<sup>78</sup> culter, tonsor.

that matter<sup>1</sup> against Caesar's will<sup>2</sup>.— 8. Afterwards<sup>3</sup> I shall write<sup>4</sup> many letters to our friends, in which I will most earnestly<sup>5</sup> commend<sup>6</sup> you and our Tullia.— 9. By my care thy father shall be relieved<sup>7</sup> from all fear.— 10. When, I pray you, and by whose order<sup>8</sup> has all this been changed?— 11. Please, do grant<sup>9</sup> this permission<sup>10</sup> to me<sup>11</sup>, to perform<sup>12</sup> this business in my [own] way<sup>13</sup>.— 12. I shall stay<sup>14</sup> here till my brother arrives.

XIX. FUTURE-PERFECT IN INDEPENDENT SENTENCES (R. 74).— 1. Your sail<sup>15</sup> will have lasted long enough if you return<sup>16</sup> home by the tenth of September.— 2. The enemy will have routed<sup>17</sup> our troops by the time (*dum*) the reinforcements arrive.— 3. By the time you read this letter I shall have made up my mind<sup>18</sup> on that subject<sup>19</sup>.— 4. That explanation<sup>20</sup> will not contribute<sup>21</sup> much to elucidating<sup>22</sup> the subject.— 5. My brother will return in two, or, at the farthest<sup>23</sup>, in three days.— 6. This will give<sup>24</sup> the greatest pleasure to all of us.

XX. POTENTIAL FUTURE. R. 75, (A) WITHOUT POTENTIAL AUXILIARIES. 1. Please<sup>25</sup> send word<sup>26</sup> to my brother Quintus that no letter of his<sup>27</sup> has yet<sup>28</sup> been handed<sup>29</sup> to me.— 2. Send my love to your wife<sup>30</sup>.— 3. Do not send any letter to me<sup>31</sup> till<sup>32</sup> you hear<sup>33</sup> from<sup>34</sup> me [again].— 4. If you look<sup>35</sup> at nature, you [can] not doubt that [there] is some maker<sup>36</sup> of the universe<sup>37</sup>.— 5. If you examine<sup>38</sup> the case attentively<sup>39</sup>, you [must] acknowledge<sup>40</sup> that the accused has been justly<sup>41</sup> condemned.— 6. Why, then<sup>42</sup>, would you attempt to prove an opinion which it is impossible<sup>43</sup> to uphold?

B. (WITH POTENTIAL AUXILIARIES).— 7. Neither friendship, nor justice can at all exist<sup>44</sup>, except<sup>45</sup> they are sought<sup>46</sup> for their own sake<sup>47</sup>.— 8. Since<sup>48</sup> Sulpicius refuses<sup>49</sup> to be retained<sup>50</sup> in this case, I would wish<sup>51</sup> that Antonius [might] be the attorney<sup>52</sup>.— 9. If this rumor should<sup>53</sup> be confirmed, we must depart for Syracuse as soon as possible<sup>54</sup>.— 10. It will be safe to say<sup>55</sup> that Tiberius is better<sup>56</sup> informed<sup>57</sup> about the matter than he<sup>58</sup> is willing to acknowledge<sup>59</sup>.

C. (WITH OR WITHOUT POTENTIAL AUXILIARIES).— 11. We ought<sup>60</sup> not to place faith in the words of those who have often<sup>61</sup> treacherously<sup>62</sup> deceived<sup>63</sup> us. But the Carthaginians have already very often deceived us. Hence it would (*will*) be the greatest folly to have [any] hope in their good faith<sup>64</sup>.— 12. If it were true that<sup>65</sup> man has been created by nature, nature itself must (*will*) be endowed<sup>66</sup> with a soul and reason.— 13. Even rude and illiterate<sup>67</sup> [men] acknowledge<sup>68</sup> a moral power and duty, [and]

<sup>1</sup> Res.—<sup>2</sup> voluntas.—<sup>3</sup> deinde.—<sup>4</sup> conscribere.—<sup>5</sup> diligenter.—<sup>6</sup> commendare.—<sup>7</sup> liberare.—<sup>8</sup> by whom [as] an author (*auctor*).—<sup>9</sup> praebere.—<sup>10</sup> venia.—<sup>11</sup> ut.—<sup>12</sup> perficere.—<sup>13</sup> ratio.—<sup>14</sup> commorari.—<sup>15</sup> Render: *You will have sailed long enough*.—<sup>16</sup> reverti (*future-present*).—<sup>17</sup> fugare.—<sup>18</sup> to make up one's mind, statuere.—<sup>19</sup> res.—<sup>20</sup> explanatio.—<sup>21</sup> proficere.—<sup>22</sup> illustrare (*gerundial*).—<sup>23</sup> summum.—<sup>24</sup> afferre.—<sup>25</sup> sis (contracted from *sivis*), to be placed, after the first words of the sentence.—<sup>26</sup> to send word to somebody, aliquem certiorem facere.—<sup>27</sup> ab eo.—<sup>28</sup> by *dum* in connection with 'no'. See § 408.—<sup>29</sup> afferre.—<sup>30</sup> Render: *You will salute your wife (materfamilias) by my name*.—<sup>31</sup> Render: *You will not have sent (dare) to me a letter*.—<sup>32</sup> dum.—<sup>33</sup> future-present.—<sup>34</sup> de.—<sup>35</sup> intuēri aliquid (in future-present).—<sup>36</sup> artifex.—<sup>37</sup> universus mundus.—<sup>38</sup> cognoscere (future perfect).—<sup>39</sup> diligentius.—<sup>40</sup> concedere.—<sup>41</sup> iure.—<sup>42</sup> igitur.—<sup>43</sup> which can (*posse* in the subjunctive) be upheld (*tuēri*) by no means.—<sup>44</sup> esse.—<sup>45</sup> nisi (with subjunct.).—<sup>46</sup> expectare.—<sup>47</sup> ipse per se.—<sup>48</sup> quoniam.—<sup>49</sup> negare.—<sup>50</sup> to be retained in a case, causam suscipere.—<sup>51</sup> velle.—<sup>52</sup> patronus.—<sup>53</sup> future-present.—<sup>54</sup> primo quoque tempore.—<sup>55</sup> by oportere.—<sup>56</sup> plus.—<sup>57</sup> to be informed about a matter, de re novisse.—<sup>58</sup> ipse.—<sup>59</sup> concedere.—<sup>60</sup> Render: *Who have...deceived us, to the speech of those we ought (debere) not to have faith*.—<sup>61</sup> saepenumero.—<sup>62</sup> per fidem.—<sup>63</sup> fallere.—<sup>64</sup> good faith, fides.—<sup>65</sup> Render: *If man has been created (procreare)*.—<sup>66</sup> praeditus.—<sup>67</sup> indoctus.—<sup>68</sup> concedere.

the wise would not<sup>69</sup>?— 14. The defence<sup>70</sup> should first prove<sup>71</sup> the integrity of the life<sup>72</sup> [of the accused] if [this] can be done<sup>73</sup>; if it cannot, the defender should proceed to show<sup>74</sup> [his client's] inexperience<sup>75</sup>, youth, and want of education<sup>76</sup>. If he is estopped<sup>77</sup> by the bad moral character<sup>78</sup> [of the man], he should first<sup>79</sup> try<sup>80</sup> to establish the fact<sup>81</sup> that false rumors were spread<sup>82</sup>, and should dwell<sup>83</sup> on the theme<sup>84</sup> of the unreliability<sup>85</sup> of rumors. If<sup>86</sup> none<sup>87</sup> of these [things] will avail<sup>88</sup>, he should make use (*uti*) of the last resort of a defender<sup>89</sup>, remarking<sup>90</sup> that he was not addressing a court of morals<sup>91</sup>, but [that he was speaking to] a court at law<sup>92</sup> about the charges<sup>93</sup> of [his] adversaries.— 15. Four<sup>94</sup> pecks<sup>95</sup> of beans<sup>96</sup> and five of wheat<sup>97</sup> should be sown<sup>98</sup> on an acre<sup>99</sup>, but in some localities<sup>100</sup> a little more<sup>101</sup> or less. Hence<sup>102</sup> farmers<sup>103</sup> should observe the custom<sup>104</sup> as to the quantity of seed in a given locality.— 16. A judge must not take<sup>105</sup> gifts from the parties<sup>106</sup>.— 17. We should (*oportere*) not accept favors<sup>107</sup> which we cannot return<sup>108</sup>.— 18. Boys will learn more (*plura*) in public schools<sup>109</sup> than by private instruction at home<sup>110</sup>; for at home they will learn only what<sup>111</sup> is taught<sup>112</sup> to THEM (*ipse*), [but] in schools also what [is taught] to others.— 19. A person<sup>113</sup> who is going to inflict punishment while in anger, will never keep that middle way<sup>114</sup> which is between too much and too little<sup>115</sup>.— 20. Such a knowledge<sup>116</sup>, in my opinion at least (*quidem*), is of no use<sup>117</sup>.— 21. He will be justly<sup>118</sup> called happy<sup>119</sup> whose<sup>120</sup> true pleasure is<sup>121</sup> the contempt<sup>122</sup> of pleasure.— 22. Only he<sup>123</sup> is a good citizen who observes<sup>124</sup> the laws, not in his<sup>125</sup>, but in [his] country's interest.— 23. With<sup>126</sup> the wise<sup>127</sup> wealth is a servant<sup>128</sup>, with the foolish<sup>129</sup> it is the master<sup>130</sup>.— 24. I would ask<sup>131</sup> you to place no<sup>132</sup> faith in that hope.

XXI. DEPENDENT FUTURE (R. 76).— 1. We shall take<sup>133</sup> any<sup>134</sup> provisions which we may find.— 2. If you publicly pronounce<sup>135</sup> these views, you will [thereby] attack<sup>136</sup> morality itself<sup>137</sup>.— 3. If you go to see<sup>138</sup> that [man], you will [thereby] set<sup>139</sup> the worst example to your countrymen<sup>140</sup>.— 4. You will do best if you altogether<sup>141</sup> shun<sup>142</sup> the company<sup>143</sup> of these men.— 5. You will oblige me best<sup>144</sup> by (*si*) taking better care<sup>145</sup> for your health.— 6. Who will bestow<sup>146</sup> benefits, should first give the necessary<sup>147</sup>, [and] afterwards<sup>148</sup> the useful<sup>149</sup>.— 7. If these [things] are evils, [the one]

<sup>69</sup> *non potest*—<sup>70</sup> defensor.—<sup>71</sup> demonstrare.—<sup>72</sup> integrity of life, *vita integra*.—<sup>73</sup> Render: *if he will be able*.—<sup>74</sup> to proceed to show something, *contingere ad aliquid*.—<sup>75</sup> inopudentia.—<sup>76</sup> *instructa*.—<sup>77</sup> Render: *If he will be very much vehemently hindered*.—<sup>78</sup> bad moral character, *turpitas et infamia*.—<sup>79</sup> prius.—<sup>80</sup> operam dare.—<sup>81</sup> to establish the fact, *ut dicat*.—<sup>82</sup> dissipare.—<sup>83</sup> uti.—<sup>84</sup> locus communis.—<sup>85</sup> unreliability of rumors.—<sup>86</sup> that it should (*oportere*) not be believed to rumors.—<sup>87</sup> sin.—<sup>88</sup> nihil.—<sup>89</sup> *non posse*.—<sup>90</sup> the last resort of a defender, *extrema defensoris*.—<sup>91</sup> dicere (*finite verb*).—<sup>92</sup> to address a court of morals, *de moribus apud censes dicere*.—<sup>93</sup> apud iudices.—<sup>94</sup> crimen.—<sup>95</sup> § 259.—<sup>96</sup> modius.—<sup>97</sup> faba.—<sup>98</sup> triticum.—<sup>99</sup> serere.—<sup>100</sup> jugerum.—<sup>101</sup> locus.—<sup>102</sup> amplius.—<sup>103</sup> quare.—<sup>104</sup> singular.—<sup>105</sup> Render: *how much in every region* (*gerundial*) has been the custom.—<sup>106</sup> accipere.—<sup>107</sup> litigantes.—<sup>108</sup> beneficium.—<sup>109</sup> to sow (*gerundial*) has been the custom.—<sup>110</sup> accipere.—<sup>111</sup> *intra parietes* teacher.—<sup>112</sup> referre.—<sup>113</sup> ludus.—<sup>114</sup> Render: *By a private within the walls* (*parietes*) teacher.—<sup>115</sup> *sa sola quae*.—<sup>116</sup> praecipere (*future present*).—<sup>117</sup> Render: *Never an angry one who will* (*sa sola quae*).—<sup>118</sup> *sa sola quae*.—<sup>119</sup> *sa sola quae*.—<sup>120</sup> *sa sola quae*.—<sup>121</sup> *sa sola quae*.—<sup>122</sup> *sa sola quae*.—<sup>123</sup> *sa sola quae*.—<sup>124</sup> *sa sola quae*.—<sup>125</sup> *sa sola quae*.—<sup>126</sup> *sa sola quae*.—<sup>127</sup> *sa sola quae*.—<sup>128</sup> *sa sola quae*.—<sup>129</sup> *sa sola quae*.—<sup>130</sup> *sa sola quae*.—<sup>131</sup> *sa sola quae*.—<sup>132</sup> *sa sola quae*.—<sup>133</sup> *sa sola quae*.—<sup>134</sup> *sa sola quae*.—<sup>135</sup> *sa sola quae*.—<sup>136</sup> *sa sola quae*.—<sup>137</sup> *sa sola quae*.—<sup>138</sup> *sa sola quae*.—<sup>139</sup> *sa sola quae*.—<sup>140</sup> *sa sola quae*.—<sup>141</sup> *sa sola quae*.—<sup>142</sup> *sa sola quae*.—<sup>143</sup> *sa sola quae*.—<sup>144</sup> *sa sola quae*.—<sup>145</sup> *sa sola quae*.—<sup>146</sup> *sa sola quae*.—<sup>147</sup> *sa sola quae*.—<sup>148</sup> *sa sola quae*.—<sup>149</sup> *sa sola quae*.

who is [involved] in them, cannot be happy<sup>1</sup>.— 8. You will obtain all you desire<sup>2</sup>.— 9. Will the wise [*sing.*] be happy if they lack [their] eyesight<sup>3</sup>? They will be even then.<sup>4</sup>— 10. I shall not be remiss<sup>5</sup> in anything<sup>6</sup> which it is possible to foresee.— 11. If you propose this, you will not make people believe it<sup>7</sup>.— 12. We shall make mistakes<sup>8</sup> as long as we live<sup>9</sup> on the earth.— 13. If the price of bread-stuffs should be higher<sup>10</sup>, you had better (*will best*) take<sup>11</sup> your city-establishment<sup>12</sup> over to [our] estate near Arpi<sup>13</sup>.— 14. I shall send you word as soon as (*si*) he has left<sup>14</sup>.— 15. I shall let you know<sup>15</sup> when I make up my mind<sup>16</sup> as to<sup>17</sup> meeting him on the road, or expecting him here.— 16. I will write you how I shall find matters<sup>18</sup> after my arrival<sup>19</sup> at Rome.— 17. Immediately after my return<sup>20</sup> to the city, I shall attend<sup>21</sup> to all that concerns your interest<sup>22</sup>.— 18. I will follow the advice which he may give me concerning (*de*) this affair<sup>23</sup>.— 19. Whatever quantity<sup>24</sup> you may add to it<sup>25</sup>, it will not be changed in kind<sup>26</sup>.— 20. Whatever<sup>27</sup> will be decreed about me, I shall bear<sup>28</sup> it with that mind<sup>29</sup> with which I ought (*debere*) to bear [it].— 21. I shall not touch<sup>30</sup> these [things] before I have seen you.— 22. I shall not depart before I have finished<sup>31</sup> this work.— 23. I shall have finished this work before you depart.— 24. I shall depart after first<sup>32</sup> finishing this work.— 25. Before I depart, I will first finish this work.— 26. Before I proceed<sup>33</sup> to defend myself, I will briefly state<sup>34</sup> those [things] from which all these charges<sup>35</sup> have arisen<sup>36</sup>.

XXII. TENSES IN EPISTOLARY STYLE § 589. [*Epistolary tenses to be used whenever admissible*].— 1. L. Clodius, the tribune elect<sup>37</sup>, is with me. It seems to me that he suspects, something<sup>38</sup> which you disliked<sup>39</sup> may have been insinuated<sup>40</sup> to you about him. But he speaks in the highest terms of you<sup>41</sup>, and<sup>42</sup> I would ask<sup>43</sup> you earnestly<sup>44</sup> to believe rather me than the one<sup>45</sup> that has slandered<sup>46</sup> him with<sup>47</sup> you. Your letter has just been handed to me<sup>48</sup>. I did not know Dolabella had so many troops with him<sup>49</sup>. I am on the point of starting for Capua. There I intend to stay tomorrow, when<sup>50</sup> I shall fully answer your letter. Beneventum on the 16th of September.

2. [MODERN LETTER, ADDISON No. LXXVI.]. October 13th, 1711. DEAR SIR: I am very much obliged to you for your last kind letter and invitation, which I heartily wish I could accept; but you know I have put my hand to the plough, and have already been absent from my work

<sup>1</sup> Beatus.— <sup>2</sup> velle.— <sup>3</sup> to lack one's eyesight, sensibus carere oculorum.— <sup>4</sup> they will be even then = etiam.— <sup>5</sup> to be remiss, falli.— <sup>6</sup> Render: in those [things] which will be able to be foreseen (providere).— <sup>7</sup> Render: You will not make faith.— <sup>8</sup> to make mistakes, errare.— <sup>9</sup> esse.— <sup>10</sup> If bread-stuffs (annona, sing.) will be dearer (carus).— <sup>11</sup> betake yourself (se conferre) with the family to, etc.— <sup>12</sup> familia (i. e., servi).— <sup>13</sup> fundus Arpinas.— <sup>14</sup> proficisci.— <sup>15</sup> certiorum facere.— <sup>16</sup> to make up one's mind, constituere.— <sup>17</sup> Render: whether (utrum) I shall meet (obviam procedere) him, or, etc.— <sup>18</sup> Render: what I shall have perceived (perspicere).— <sup>19</sup> when I shall have come to Rome.— <sup>20</sup> Render: As soon as (simulatque) I shall have returned.— <sup>21</sup> curare aliquid.— <sup>22</sup> Render: Those [things] which will belong (pertinere) to your advantage.— <sup>23</sup> what to me about this thing he shall have given advice, that I will follow.— <sup>24</sup> quantumcunque.— <sup>25</sup> eo (i. e., ad hunc locum, ad hanc rem).— <sup>26</sup> Render: It will remain in its kind (genus).— <sup>27</sup> quidquid.— <sup>28</sup> ferre.— <sup>29</sup> animus.— <sup>30</sup> attingere.— <sup>31</sup> perficere.— <sup>32</sup> prius.— <sup>33</sup> instituere.— <sup>34</sup> narrare.— <sup>35</sup> crimen.— <sup>36</sup> to arise, nasci.— <sup>37</sup> designatus.— <sup>38</sup> by infinitive clause.— <sup>39</sup> moleste ferre (subj.).— <sup>40</sup> to insinuate something to somebody, deferre aliquid ad aliquem.— <sup>41</sup> Render: He speaks and thinks (sentire) most friendly (amicus) of you.— <sup>42</sup> quare.— <sup>43</sup> petere ab aliquo.— <sup>44</sup> etiam atque etiam.— <sup>45</sup> than the one, quam illi nescio cui.— <sup>46</sup> male dicere alicui (subjunct.).— <sup>47</sup> apud.— <sup>48</sup> reddere.— <sup>49</sup> that Dolabella so much (adeo) abounded in troops.— <sup>50</sup> from where I shall more accurately answer (rescribere ad) your letter.

one entire month. I hope you will not think of staying in the country so long as you mention. Sure it will be worth your while to hear the peace treated in the house of Commons. If you will be my lodger, I will take a house in Kensington square, and furnish you a chamber. I send you enclosed a paper of Abel Roper's. We talk of nothing but peace. I am heartily glad you have your health, and question not but you would find the Kensington air as good as the Wortley. I am ever with the greatest sincerity, etc.

## PARAPHRASE.

Joseph Addison to his Wortley (*Josephus Addiso Wortlejo suo S. D.*)  
Know that thou hast greatly obliged me<sup>1</sup> that<sup>2</sup> thou by thy most pleasant<sup>3</sup> letter hast invited me into the hospitality<sup>4</sup> of thy Wortlejanum, whither O that it was allowed<sup>5</sup> to me to come! But thou knowest<sup>6</sup> how many and how great labors I have taken over me<sup>7</sup>, which indeed<sup>8</sup> interrupted<sup>9</sup> by a space of thirty days, have been lying down<sup>10</sup> too long, and are now<sup>11</sup> longing for<sup>12</sup> the master, as<sup>13</sup> a long neglected field for the plough<sup>14</sup>. I hope that thou wilt not be absent from the city so long as thou sayest that thou art going to be. For surely<sup>15</sup> thou wilt wish<sup>16</sup> to be present if it will be transacted<sup>17</sup> on the peace in the house<sup>18</sup> of the English<sup>19</sup> people. If thou shalt have resolved<sup>20</sup> to use my hospitality, I shall rent<sup>21</sup> a house<sup>22</sup> in the Kensington square<sup>23</sup>, a part of which, furnished<sup>24</sup> with what things it will be necessary<sup>25</sup>, thou mayest<sup>26</sup> have for thyself<sup>27</sup>. I have sent a paper<sup>28</sup> of Abel Roper's. We spoke of nothing<sup>29</sup> except<sup>30</sup> peace. That<sup>31</sup> thou art well<sup>32</sup>, I am very glad, nor do I doubt that<sup>33</sup> thou wilt breathe<sup>34</sup> equally<sup>35</sup> well at Kensington<sup>36</sup> as in thy Wortlejanum. Farewell. London (*Londinum*), October 13th.

<sup>1</sup> To oblige somebody greatly, gratissimum alicui facere.— <sup>2</sup> quod.— <sup>3</sup> jucundus.— <sup>4</sup> hospitium.— <sup>5</sup> O that it was allowed, utinam liceret.— <sup>6</sup> novisse.— <sup>7</sup> to take over one's self, sibi suscipere.— <sup>8</sup> quidem.— <sup>9</sup> intermittere.— <sup>10</sup> to lie down, jacere.— <sup>11</sup> jam.— <sup>12</sup> to long for the master, dominum desiderare.— <sup>13</sup> tamquam.— <sup>14</sup> aratrum.— <sup>15</sup> profecto.— <sup>16</sup> velle.— <sup>17</sup> agere.— <sup>18</sup> curia.— <sup>19</sup> Anglicus.— <sup>20</sup> constituere.— <sup>21</sup> conducere.— <sup>22</sup> aedes.— <sup>23</sup> vicus.— <sup>24</sup> instructus.— <sup>25</sup> opus esse.— <sup>26</sup> poteris.— <sup>27</sup> dative.— <sup>28</sup> libellus.— <sup>29</sup> Abēlus Roperus.— <sup>30</sup> nulla aliā re.— <sup>31</sup> nisi.— <sup>32</sup> quod.— <sup>33</sup> valere.— <sup>34</sup> quin.— <sup>35</sup> respirare (perfect subj.).— <sup>36</sup> æque.— <sup>37</sup> Censito.

## CHAPTER THIRD.

## USE OF THE SUBJUNCTIVE.

§ 590. The SUBJUNCTIVE is either POTENTIAL or DEPENDENT. The former (mostly occurring in independent sentences) has the force of the English potential, imperative, or of separate verbs conveying similar ideas. Rarely the Latin subjunctive has the force of an English subjunctive. The DEPENDENT subjunctive is determined by the relation of a predicate to another (principal) predicate, and exclusively occurs in CLAUSES.

Obs. The Latin subjunctive is in a great measure a conventional form of the predicate, the idea of which cannot be reduced to one general principle. The grammarians say, the subjunctive is the mood of 'conception', or the form for actions 'merely in the mind of the speaker'. But every mood expresses the conception of the speaker. And a large part of the dependent subjunctives denote real and actual facts, whereas the indicative frequently denotes actions 'merely of the mind' (definitions, causes, rules, suppositions, etc.). General statements of this kind, which are on y apt to mislead the student, are of no possible use, since every single instance in which this mood is required, must be learned from special rules.

## 1. POTENTIAL SUBJUNCTIVE.

§ 591. The potential subjunctive occurs either in declarative, or in interrogative, or in imperative sentences.

## A. DECLARATIVE SUBJUNCTIVE.

§ 592. The declarative subjunctive is most frequently used in conditional periods, both if the conditional clause is expressed, and if it is understood, as:

*Dies deficiat si velim numerare, etc.*; Time would fail if I should attempt, etc. Cic. N. D. 3, 32, 81.—*Tum me confitear non iudicium habuisse de utilitate reipublice*; Then I would confess not to have had any judgment on the interests of the republic. Cic. Planc. 39, 93.

For this class of subjunctives see B. VI. p. 717 foll.

*Rem.* 79. Aside from the subjunctive in conditional periods, a declarative potential subjunctive occurs (a) in the PRESENT OR PERFECT, as subjunctive of GUARDED STATEMENT, with the force of a potential future (R. 75, No. 6); (b) in a few passages as IMPERFECT OR PLUPERFECT subjunctive, being an equivalent of *oportuit* (ought to have); (c) in the SECOND PERSON SINGULAR of the present, perfect, and imperfect, to represent the subject of the action as an INDEFINITE PERSON.

Obs. 1. The subjunctive of modest or guarded statement in the present tense mostly occurs in the first and second persons, and is rendered by such expressions as 'I am inclined to', 'it seems to me', 'I should'; and in the second person by 'may' or 'will': *Ego non hoc querendum censeam*, sed, etc.; *It seems to me* (I should think) that this is not the question here, but, etc. Liv. 21, 18.—*Forsitan queratis qui iste terror sit*; *You will* (may) ask perhaps of what kind that terror is. Cic. Rosc. Am. 2, 5.—Ex. 1, 2.—More rarely this subjunctive occurs in the third person, almost always with *forsitan* (which being contracted from *fors ille an*, or *forte sit an*, 'it is the (by) chance or the question whether', always requires the subjunctive); *Matrem insimulare forsitan fas non sit*; Perhaps it would not be right to accuse one's own mother. Liv. 39, 10.

The second person singular, if used in this meaning, frequently denotes an uncertain person (R. 91, Obs. 4), implying that the predicate refers to any person under the stated circumstances: *Reperias multos quibus periculosa consilia quietis splendidiore videantur*; You (one, people) will find many to whom dangerous measures would seem more showy than peaceful ones. Cic. Off. 1, 24.

Obs. 2. The subjunctive perfect likewise occurs as subjunctive of guarded statement. It mostly occurs when the predicate is a verb of saying or thinking, and is limited to the singular number and to the active voice. Although it is evident that the kindred meaning and almost identical form of the future-perfect must have influenced in some way the usage of a perfect in the meaning of a qualified future, we cannot adopt Madvig's theory, who, on the strength of this fact, has invented the theory of a subjunctive of the future-perfect, to which he assigns, in the active, the same form as the perfect subjunctive. Since the future-perfect, even in the indicative, is not used with potential force, like the future present (except in the instances mentioned R. 75), and since he must himself acknowledge that the so-called future-perfect subjunctive has neither the meaning of a future-perfect, nor that of a subjunctive (Madvig's Gr. § 380), the expedient proposed by him is contradicted by the very reason which induced him to invent it. The fact that, according to Madvig's theory, we would have to admit a different consecution of tenses in regard to the future-perfect for the active and for the passive voice (Madv. § 379), and that it would, in other respects, impair the symmetry of the law of consecution, and of the modal relations of the two futures, is fatal to the whole theory.

The perfect subjunctive in this meaning seems to occur first in Varro and Cicero. It is best rendered by 'would', 'may', 'might' (negatively by 'could not'): *Hoc sine ulla dubitatione confirmaverim*; *I would assert* this without any hesitation. Cic. Brut. 6, 25.—*Plane quidem perfectum Demosthenem facile dixeris*; *Demosthenes you may safely call* simply perfect. Ib. 9, 35.—*Forsitan quispiam dixerit*; Perhaps somebody might (may, will, would) say. Ib. Off. 3, 6, 39. See Ex. 3-8.

Obs. 3. The second person sing. is often used to represent the subject as an UNCERTAIN PERSON (one, somebody, you), and, if so used, is almost invariably in the subjunctive. In independent sentences it is frequently thus used with the meaning mentioned (Obs. 1 and 2, and also in interrogative (§ 593) and imperative sentences (R. 80, Obs. 1); but mostly, to denote the impressions which a fact stated would make on eye-witnesses, or on those that hear of it. It, properly, is an elliptical conditional expression (implying: 'If you had been present, you would have said, thought, etc.'), and is mostly found in the imperfect subjunctive, being best rendered by the second person (*you*, in its indefinite meaning) in the potential pluperfect: *Patris Sullam venisse in Italiam non belli vincem, sed pacis auctorem*; You would have thought Sulla had come to Italy, not as an avenger in war, but as a bringer of peace. Vell. 2, 25.—*Quareres in iudiciis fortasse non nisi in re publica quod erat, esse iudices satis*; For the courts you would perhaps have asked for something better; but as to the republic you would have considered it enough. Cic. Brut. 7, 268.—*Pecunie aut famae minus parceret laud facile discerneres*; You would not easily have distinguished whether he was more economical with his money or with his fame. Sall. Cat. 25.—*Canes venaticos dixeris*; You would (might) have taken the dogs for hunting dogs. Cic. Verr. 2, 4, 13.—Often however the present subjunctive is used in the same sense in regard to a present fact, as: *Nihil horror in cultu*; *reuerentis occursum, non reformides*; There is nothing forbidding in his appearance; at a meeting you would look at him with awe, but not shrink from him. Plin. Ep. 1, 10.—This subjunctive of the second person denoting an indefinite subject, most frequently occurs in dependent sentences. See R. 91, Obs. 4.—Ex. 9-12.

Obs. 4. The subjunctive imperfect and pluperfect, as potential-declaratives, very rarely occur in the meaning of *oportuit* (ought to have): *Moreretur*, inquires. *Fecisset certe si sine maximo dedecore potuisset emori*; He ought to have died (voluntarily), you will say. He surely would have done so if he could have died without the greatest disgrace. Cic. Rab. 10, 29. See Ex. 13, 14. These subjunctives occur only if the connection makes this exceptional meaning fully clear; the other potential forms, expressing necessity (gerundials, *oportet*, *debere*), being far more usual. See Obs. 4, No. (d). If the sentence is negative, this class of subjunctives requires *ne*, instead of *non*. (Ex. 14.)

Obs. 5. Generally the English potential, expressing possibility and necessity, is in Latin expressed by the potential verbs (or their equivalents) in the indicative. This refers to all tenses of the English potential, even if they should seem to have a 'subjunctive' or contingent force. The subjunctives of the Latin potential verbs (with a potential force) generally occur only 1) in questions (§ 593); 2) if the predicate is qualified by a contingency expressed or understood, as: *Ei qui hunc accuset, possim aliquo modo iuvare*; *I might* (under certain circumstances) pardon the one who accuses this man. Cic. R. A. 20, 55; 3) if the second person is used as indefinite subject: *Ut non omnem tamen in omni agro reperire possis, sic non omne facinus in omni vita nascitur*. Cic. R. A. 27, 75. Hence

(a) The present potentials 'can', 'may', and 'must' are rendered (aside from the subjunctive of the verb proper in the instances mentioned above and below) by the indicatives *possum*, and *debeo*, or by the potential futures *potero*, *debeto*, or by the present indicative or future of the gerundials, but not by *possim*, or *debeam*: *Multos possum bonos viros nominare qui, etc.*; *I may* (can) mention many good men who, etc. Cic. Tusc. 2, 19. Often 'may' denoting permission is expressed by *licet*, as *Licet me id scire quid sit?* *May* I know what it is? Plaut. Pseud. 1, 1, 14. Instead of *debeo*, its equivalents (cp. 146, R. 163) may be used.

(b) The preterit of the potential (*might* and *could*), if it has a contingent force referring to the present time, is generally rendered by the present indicative (*possum*), as in the Ex. in No. (a), which may be rendered 'might' or 'could.' 'I should' is rendered according to R. 75. If these potentials have an hypothetical meaning they are rendered according to B. VI. (conditional clauses). If 'could' has the force of 'I was not able,' it is rendered by *potui* or *poterat*: *Hoc illud est quod Theophrastus sustinere non potuit*; This is the point which Theophrastus could not (was not able) to maintain. Cic. Tusc. 5, 9.

(c) The perfect potential with 'may have' or 'can have' generally requires a circumlocution in Latin ('I shall not deny that he has, etc.'): or 'it can happen that this was the case': as: *Potest fieri ut tu non recte intellexeris?* *You may* (can) have misunderstood him, have you not? Cic. Off. 2, 70, 285. Rarely it is expressed by the present of *posse* with a perfect infinitive of the main verb. See § 493.

(d) The pluperfect potential with 'might have' or 'could have' is rendered by the perfect, imperfect, or pluperfect indicative of *posse* (or its synonyms, *licuit*, *licebat*, etc.), and 'should have' or 'ought to have' is expressed by the indicative of the same tenses of *debere* (or its synonyms, *oportebat*, *oportuit*, *oportuerat*, etc.): *Debēbant di omnis bonos effici*; quidem hominum generi consulēbant; the gods ought to have made all men good, or else, etc. Cic. N. D. 32, 79.—*Nam si ista sequimur, nuper de republica debuit peritimescere*, etc.

illi meo scripsi: quo utinam susceptus non essem, aut ne quid ex eadem matre postea natum esset: I am writing this on my birthday. *Ne* *ut* my father had not taken me up on that day, or my mother had not borne afterwards! Cic. Att. 9, 9, 3. See Ex. 16-31.

Obs. 7. Often imperative predicates in the subjunctive have the force of a CONCESSION (let us grant this; even if we grant this, supposing it to be so). In this sense the present subjunctive refers to the present, and the perfect generally to the past, as: *Hæc sint falsa sane: invidiosa certe non sunt; granting that this is wrong (supposing this to be wrong, even if this be wrong) it certainly is not odious.* Cic. Acad. 2, 32.—*Fecerit* aliquid Philippus cur adversus eum hoc decerneremus: quid Persens meruit cur soli omnium hostes ei simus? *Granted that Philip may have done something why we should resolve this against him: but what has Perseus done that we alone of all should be hostile to him?* Liv. 41, 24. Ex. 32-38.

1. *Perperam* etiam et *hæc* *per* homines ex omni regione: eos *comoscas*, *appetis*, *cunctas*. Cic. P. Cons. 8, 3.—2. *Victoriam* hostibus *consequimur*, *consequimur* enim *omnis* civitas. Liv. 22, 22.—3. *Castra* cum *Fabio* *persequimur*? Liv. 22, 29.—4. *Veniam* ad *coram*, sed jam *matre* *persequor*: *sit* expediat, *sit* *persequor*: *Sacra* eis *tantum* *seminibus* *adhibet*: in his quoque *tenet* *modum*. P. Ep. 3, 12.—5. *Valeat* *proces* *apud* *te* *mea*? Liv. 22, 9.—6. *Quod* *omni* *Gai* *de* *juris* *est*, *idem* *et* *nobis* *est*. Or. 29, 101.—38. *Ne æquaveritis* Hannibali Philippum: Pyrrho certe æquabitur. Liv. 31, 7.

## II. DEPENDENT SUBJUNCTIVE.

§ 595. DEPENDENT SUBJUNCTIVES are those which derive their force either from their principal predicates, or from the conjunction which introduces the clause. They are either GENERAL or PARTICULAR subjunctives, according as they are common to all classes of clauses, or occur only in some particular kinds of them. The dependent GENERAL subjunctives are of two kinds: (a) SUBJUNCTIVES OF INDIRECT DISCOURSE; (b) SUBJUNCTIVES BY ATTRACTION.

Obs. 1. The following are examples of PARTICULAR subjunctives: *Sunt qui dicant*, etc.; There are people who say, etc.; where *dicant* is a particular subjunctive occurring only in relative clauses (p. 551). *Timeo ne veniat* (I am afraid lest he may come); where the subjunctive is determined by the conjunction *ne*. In *Si adsit sic loquatur* (if he were present, he would speak thus) the subjunctive *adsit* is peculiar to hypothetical clauses. All the particular subjunctives are treated in connection with the clauses to which they belong (B. VI.), only the general subjunctives belonging to the present chapter.

Obs. 2. Not every subjunctive occurring in a dependent clause can be considered as a dependent subjunctive in the sense defined above, such subjunctives often having an independent potential force (according to § 592 foll.), as: *Quodsi, id quod di omen avertant*, nunc quoque variaverit fortuna (which omen the gods may avert). Liv. 23, 13. Here the subjunctive *avertant* is potential (imperative, according to R. 80, Obs. 4), although it is in a dependent clause.—Sometimes a subjunctive has both the force of a potential and of a dependent subjunctive, as: *Mira fuit accuratio, sed ea ut citius veteratorem quam oratoriam diceret*; There was a remarkable nicety, but of a kind that you would call it so-phistical rather than oratorical. Cic. Brut. 67, 238. *Diceret* has the character of a potential subjunctive (R. 79, Obs. 3), and of a dependent subjunctive determined by *ut*. Sometimes even it may be considered doubtful whether the author has taken the subjunctive for potential or dependent, as: *Multi rumores (erant), quos cuperem veros*; There were many rumors which I should wish (or 'which I wished') to be true. Cic. Att. 16, 12. Here *cuperem* may be either taken for a potential subjunctive (R. 80, Obs. 6), or for a dependent subjunctive, peculiar to relative clauses (p. 560).

### A. SUBJUNCTIVE OF INDIRECT DISCOURSE.

#### 1. DIRECT AND INDIRECT STATEMENT IN GENERAL.

§ 596. Statements which the author represents as the conceptions (thoughts, utterances, feelings, perceptions, etc.) of persons introduced by him in the discourse, are either DIRECT or INDIRECT. They are direct if the author 'quotes' them, i. e. states them in the same form and words used by the person introduced (Ex. a). They are indirect if the author mentions them in his own words, making them dependent on a verb of saying, thinking, etc., expressed or understood (Ex. b and c). Indirect

<sup>1</sup> Let us suppose that it was not a present fear which averted our feelings from the Romans.—<sup>2</sup> to assert.—<sup>3</sup> æquare aliquem alicui, to consider somebody an equal to another; to compare him to another (supposing you cannot or will not compare, etc.). This perfect has the force of a future-perfect.

statements always have the form of DEPENDENT SENTENCES (clauses, being either INFINITIVE clauses (Ex. *b*), or FINITE CLAUSES with their predicate in the SUBJUNCTIVE (Ex. *a* and *c*)).

a. DIRECT STATEMENT. Dionysius, 'I'llinam ep.' inquit, 'tertius vobis amicus adscribere'; Dionysius said, 'O that I might be admitted the third in your friend-ship'. Cic. Tusc. 5, 22, 63. — (Indirect: Dionysius *profectus ut se ad amicitiam tertium ascriberet*; D. prayed that they might admit him as the third in their friend-ship. Ib. Off. 3, 45.)

45.)  
b. INDIRECT STATEMENT AS INFINITIVE CLAUSE. *Romulus dixit se deum esse. Cic.*  
Leg. 1, 3 = Direct: *Romulus: 'Ego', inquit, deus sum.*  
c. INDIRECT STATEMENT AS FINITE CLAUSE: *Philippus Alexandrum accedat quod*

c. INDIRECT STATEMENT AS FINITE CLAUSE: Philippus Alexandrum accusat *quod* *benivolentiam Macedoniae conseruit*; Philip accused Alexander of court-shiping the favor of the Macedonians by the use of money. (Cic. Off. 2, 33. [Direct: Alexander *filius meus*,' inquit, *benivolentiam Macedoniae conseruit*.])

Obs. 1. Direct statements containing quotations are generally introduced by the verb *inquam*, which must be inserted after one or more words of the statement. Frequently in the subject, and sometimes the person to whom the statement is made, are likewise incorporated in the sentence containing the statement, both being placed directly after *inquam* (ex. 2, 4, 6). Sometimes, however, the verb *dicere* is used to introduce direct statements, and must always be used in place of *inquam* if the construction requires those forms in which the latter verb is defective (ex. 5). See Cic. Tusc. 3, 14, 11. Indirect statements may be introduced by any verb of saying (*ejus, dicitur, narratur*, etc.) except *inquam*.

[illegible]

Obs. 2. The author may introduce *himself* as speaker or conceiver of the statement, in which instance the author's own assertions may assume a direct or indirect form, in the same as the statements of other persons: '*Ego vero*', inquam, '*faciam vobis satius*'; the same as the statements of other persons: '*Ego vero*', inquam, '*faciam vobis satius*'; But I said 'I will comply with your wishes'. Cic. Brut. 5, 21. (Indirect: *Ego vero me eiis satisfacturum esse ajebam*). All the statements which the author makes in his capacity as author (*i. e.*, every sentence in the treatise, except those of the kind mentioned above) are considered as *direct* statements.

Obs. 3. Indirect statements may also be assigned to 'indirect' persons, as: *Constituta est homines, postquam Tyrum venissent, lamentari coepisse*; *It was known to all, that those persons began to weep after coming to Tyre*. (Cic. Tusc. 3, 25, 66).

**Obs. 4.** Statements are not expressed in a direct, but only in an indirect form if the sentence containing them is dependent on a verb of believing, thinking or perceiving; except that the presents *puto*, *credo*, *opino* are often inserted in the author's statements to represent them as guarded opinions: Male, *credo*, mereretur de meis civibus si, etc.; I believe I would serve my countrymen badly if, etc. Cic. Fin. 1, 3.—*Opino*, sic crura *I believe* their legs would be broken if, etc. Ib. Rosc. A. 20, suffragantur quum, etc.;

§ 597. Clauses of indirect discourse are either *directly* or *indirectly* dependent on a verb (sometimes a noun) of saying, thinking, or perceiving (*verbum sentiendi et declarandi*) expressed or understood. If directly dependent on such verbs, they are called **OBLIQUE CLAUSES**, containing all those thoughts and utterances which the speaker introduced by the

<sup>1</sup> Fault.—<sup>2</sup> *præstare aliquid*, to be responsible for something.—<sup>3</sup> goblet.—<sup>4</sup> supply  
'*pertinet*' (it does not concern us).—<sup>5</sup> why (particle).—<sup>6</sup> inheritance.—<sup>7</sup> Thou electest  
nothing, O pain.—<sup>8</sup> however inconvenient.

author, if using his own words in direct statement, would express in the form of an *independent sentence* (Ex. a).

Clauses of indirect discourse *dependent on oblique clauses* are called **SUBOBLIQUE CLAUSES**, containing those utterances which the speaker, even in direct statement, conceives and expresses as *clauses* (Ex. b).

a. OBLIQUE CLAUSES: Democritus dicit *innumerabiles esse mundos*. Cic. Acad. 4, 55. (Direct: *Innumerabiles*, inquit, *sunt mundi*).—Veritus est *ne hostium impetum sustinere non posset*: He was afraid (= he thought) *he could not resist the attack of the enemy*. Cæs. B. G. 5, 47. (Direct: '*Hostium impetum*', inquit '*sustinere non posero*').—Quæsitit a medicis *quemadmodum se haberet*: He asked the physicians *what was the character of his disease*. Nep. Dion. 2. (Direct: '*Quemadmodum*', inquit, '*me habeo*'?).—Orabant *ut se cibo iuvarent*: They prayed *to help them to food*. Cæs. B. G. 7, 78. (Direct: '*Nos cibo*', inquit, '*adjuvate*'!).

7. 78. (Direct: '*Nos* adeo', inquit, '*adjuvate*!').  
 d. SUBOBLIQUE CLAUSES: Negat Epicurus jucunde posse vivi nisi cum virtute vivatur; Epicurus says that men cannot live happily unless they live virtuously. (Direct: 'Jucunde', inquit, 'vivi non potest nisi cum virtute vivitur'). Cic. Tusc. 3, 29.—Damocles exoravit Dionysium ut abire liceret, quod jam beatus nolle esse; Damocles implored Dionysius to let him depart because he did not care any longer to be happy. Ib. 5, 21, 62. (Direct: 'Licet mihi', inquit, 'abire, quod jam beatus nolo esse').

## 2) OBLIQUE CLAUSES.

§ 598. Oblique clauses are either declarative, imperative or interrogative (§ 378, 4). The declarative oblique clauses generally have the form of infinitive-clauses, but if dependent on certain verbs of saying or thinking they either must or may be finite (see Rem. 82-85). Imperative and interrogative clauses are always finite\*. *All finite oblique clauses have their predicates in the subjunctive.* For apparent exceptions see Rem. 82, Obs. 3.

*Rem.* 81. Oblique clauses have the form of an INFINITIVE CLAUSE if the indirect statement contained in them is declarative, *and* dependent on those verbs of saying, thinking, etc., which, according to the general rules (§ 393, R. 26), require the construction of an accusative with the infinitive. For examples see the Ex. to R. 86. For the instances when a nominative with the infinitive must be used, see § 492.

Obs. 1. In the historians, verbs of saying governing oblique clauses are frequently understood if easily supplied from the connection, as: *Ædii legatos ad Cæsarem mittunt rogatum auxilium: Illa se omni tempore de populo Romano meritos esse ut, etc.*; The Ædians sent envoys to Cæsar to apply for help: *They had at all times so well deserved of the Roman people that, etc.*, Cæs. B. G. 1, 11, (supply: *Who said (qui dicerent), they had, etc.*).—*Divitiacum Cæsarem obsecrâre cœpit ne quid gravius in fratrem statueret: Scire se illa esse vera, etc.*; Divitiacus began to implore Cæsar not to take any hard measures against his brother. *He said that he knew this to be true, etc.* Cæs. B. G. 1, 20. In both sentences verbs of saying are implied in the governing verbs *rogatum* and *obsecrâre*.

Obs. 2. The construction of ordinary verbs of saying and thinking with *quod* and the subjunctive instead of an infinitive clause belongs to late Latinity, especially that of the ecclesiastical authors. But some traces of this construction occur in ante-classical and classical writers. Thus Plautus construes *scio* with *quod* and the subjunctive in *Asin.* 1. 1. 70, and Cicero connects the same construction with *intelligere* in *Fin.* 5, 11, 30, and with *videre* in *Ac. Pr.* 2. 25, 81. In *Liv.* 3. 52. 2, almost all of the older editions gave *scituros quod non res rediri queant*; but without being supported by the codices, the readings of which are senseless.

\* For exceptions in regard to interrogative clauses in the *oratio obliqua* see p. 769, 6.

*Rem. 82.* Oblique declarative clauses take the form of a finite clause, in place of an infinitive clause, if the verbs of saying, feeling, etc., on which they are made dependent require to be construed with *ut* (*ne*, *quin*), or with *quod* (§ 393, R. 27, 28).

Obs. 1. Verbs of saying, etc., which require this construction, or admit of it (in which case either a finite clause or an infinitive clause may be used), always contain, *aside from the idea of saying, feeling, etc.*, some other idea referring to the character of the utterance, feeling, etc. Here belong

(a) A few verbs requiring *ut*, *ne*, or *quin* (the greatest part of the verbs of saying, etc., construed with these conjunctions govern *imperative clauses*, R. 83). Those which are used in connection with *imperative clauses*, are: *caute* and its synonym, *solicitemus* (to be anxious, etc.), which require *ut* or *ut* (R. 80); *non dubitare quare* (not to doubt *but that*); and those verbs of resolving which refer to the doings of the subject itself, as: *Procul* (Caesar *et* Ariovistus legatos *mittit*); *Caesar* *continuo* *et* *sendit* *envoys* *to* Ariovistus (Direct: Legatos *ad* Ariovistum *mittam*, I will send, etc.), *Caes. R.*, G. 1, 34. Since these conjunctions always require the subjunctive (if they mean 'that' or its equivalents), the separate classification of such oblique clauses is important only in regard to determining the mood of the *subjunctive clause* dependent on them (See R. 86). The reason that the conjunctions *ut*, *ne*, etc., always take the subjunctive in *That*-clauses (whether the clause is oblique or not), is probably their preëminent use in connection with actions disclosing the mind and intentions of the doer.

(b) Those verbs of saying, etc., which admit a *finis* clause with good, as verbs of praising, censuring, accusing, compensating, congratulating, honoring, pardoning, and verbs of emotion (*optare, dolere, beatificari*, etc.). The *Quotiens* clauses dependent on these classes of verbs are naturally introduced by causal clauses with 'because' or with 'for', 'why', or 'how', followed by a participial noun. But in Latin they are conceived as *finis* clauses, conveying the thoughts and notions of the subject as direct objects of these verbs, and not as 'reasons for the praise, etc.'. Hence they must be placed among the oblique clauses, the same as infinitive clauses, which may frequently be substituted for them (B. VI). See § 393, R. 23, 29.\*

Obs. 2. Quod-clauses dependent on the verbs of saying, feeling, etc., mentioned Obs. 1, almost always have their predicates in the *subjunctive*, if the logical subject is a person *different* from the *author*, since they generally represent the views, thoughts, or feelings of the person introduced, as : *Lucilius* Paratius *Mittem quod prodest auctoribus* ; Paratius praises Africanus *for being abstinent* ; in *Lucius* Sulpicius' *Compendium*, Cic. Off. 2, 32. (Direct : *Laudans Africanum* 'Abstinens,' inquit, 'sui').—*Cæsar* *gravior* *Ednos accusat quod ab eis non sublegetur* ; *Cæsar* earnestly *charged* the *Edui* *with leaving him without assistance*. Cæs. B. G. 1, 16.—*Cæsar* *mihi ignoscit per litteras quod non venerim* ; *Cæsar*, in his letter, *excuses me for failing to come* (my staying away). Cic. Att. 10, 34, 2. See Ex. 1-5.—Rarely the author, by such Quod-clauses, conveys facts from his own standpoint as author, in which instance the predicates are placed in the *indicative*, as : *Utrum reprehendis quod libertus patrum iudicat eum qui tum in miseriis erat* ? Do you find fault *with the fact that* the freedman *aided* his former, master who at that time was in distress ? Cic. Verr. 1, 47, 124. Here the character of the aid, namely that it was bestowed by a freedman on his former master in distress, is a reflection of the *author*, and not of the subject of *reprehendis*. Had Cicero used the mere names of the parties, the thought would have been represented as that of the subject, and the predicate would have been in the subjunctive (*iuvet*).—Often the indicative is used after *quod* in regard to present *actual facts* (Ex. 9). See pp. 590 and 598.

\* That the Latins did not conceive Quod-clauses, dependent on the verbs mentioned above, as 'causal clauses' is made evident by the fact that the use of *quid*, *quoniam*, or of the other causal conjunctions, is not admissible in such clauses. The conjunction *quod* in its original conception, means *ad quod* (the fact that), and *quod* *laudat*, *quod* *deprecatur*, *quod* *deprecatur* *sub.*, originally means 'Laudat *ad* *quod* *deprecatur* *sub.* *deprecatur* *sub.*, i. e. *dis* *propter* *deprecatur* *sub.*, i. e. 'He mentions with praise the fact that', etc. In Latin *propter* *quod* *laudat* is conceived, 'I feel with joy that you are well.' In English the conception of these clauses is widely different, no distinction being made between this kind of clauses and ordinary causal clauses. Hence, from the standpoint of the English conception, we would consider these clauses as 'sub-oblique' or 'quasi-sub-oblique' (R. 86; R. 88; Obs. 2.), which would not be correct for the Latin standpoint. This want of distinction in English, between the two kinds of clauses, may often cause ambiguities, as: 'He praises him *because* he is his friend,' which may mean, 'He praises him *for the fact* that he is his friend,' or 'He praises him for something, *from the reason* that he is his friend. The latter would require *quia* or *quoniam* in Latin, while the former would be expressed by *quod*.

Obs. 3. If the author introduces *himself* as the (logical) subject of those verbs of saying, etc., which require Quod-clauses, and the verb is in the present or future tense, the predicate is almost always in the indicative: *Gaudio quod te interpellavi*; I am glad that I have interrupted you. Cic. Leg. 3, 1, 1.—*Quod animadversum est in eos non debeat ipe reprehendere*; quod viris fortibus bonos habitus est laudo; I must not find fault with the fact that these men were punished; but I praise that honor was bestowed on brave men. Ib. Rosc. A. 47, 137.—*Molestissime vero quod te ubi visurus sim nescio*; I feel extremely vexed that I do not know where to look for you. Ib. Fam. 3, 6, 5. (Ex. 7, 8).—Whenever subjunctive predicates occur in such clauses, they have an independent potential force, as: *Ex te dupla nos officii curio*; do, quod e ipse republica careas, et illa te; On your account a two-fold solicitude affects me, that you should lack your country, and the country you. Cic. Brut. 97.—The subjunctive *careas* is 'a subjunctive of try, and the country you. Cic. Brut. 97.—The subjunctive *careas* is 'a subjunctive of NON-REALITY', pregnantly implying that it should not be so (Comp. p. 542, § 614; p. 543, R. 16; p. 612; 690, B.; p. 709; 717; 762, 12).

Obs. 4. If the person or thing represented as the object of verbs construed with a Quod-clause, is indefinite, the Quod-clause must often be changed into a relative clause, which takes the same mood as the Quod-clause would in its place, as: Epicurēi laudant eos qui æquo animo moriantur: The Epicureans praise those who die with equanimity. Cic. Tusc. 3, 29, 72. If the object (eos) is made definite, the statement would have the form of a Quod-clause (Epicurēi laudant Germanōs quod . . . moriantur). See Ex. 6.

1. Aeschines in Demosthenem *invehitur*<sup>1</sup> quod est septimo die post illius mortem hostias immolaverit<sup>2</sup>. Cic. Tusc. 3. 26. 62.—2. Princeps<sup>3</sup> decima legio Caesari gratias egit quod nec se optimum iudicium fecisset<sup>4</sup>. Cas. B. G. 1. 41.—3. Qui Isocratem mirantur, hoc in ejus summis laudibus perferunt<sup>5</sup> quod verbis solitis numeros primus adjunxerit<sup>6</sup>. Cic. Or. 52. 474.—4. Num quis, quod vir bonus esset, gratias dis egit unquam? Ib. N. Cic. Or. 52. 474.—5. Socrates *avocatus est quod curripuerit* juvenutem et novas superstitiones abegit<sup>7</sup>. Quint. 4. 4. 5.—6. Socrates *censorii* (de censorie) eum solabat qui prius *intemperaret*. Quint. 4. 4. 5.—7. Socrates *a jure separasset*. Cic. Leg. 1. 12.—8. Tibi gratulor quod nusquam antea *repperimus a jure separasset*. Cic. Leg. 1. 12.—9. Tibi gratulor quod nusquam antea *repperimus a jure separasset*. Cic. Leg. 1. 12.—10. In de provincia decemem *sensum laus*, et summa gratia<sup>8</sup> provinciae praecula est<sup>10</sup>. Id. Fam. 13. 14. 3.—11. Quod *ausus est, quod spirat esse*<sup>11</sup> apud tales viros aliquid posse, id ipsum *queror*<sup>12</sup>. Ib. Rosc. Am. 48. 141.—12. (Patrici) *quod spiratis*<sup>13</sup>, *quod vocem mittitis*<sup>14</sup>, quod formas hominum habetis, indignantur<sup>15</sup>. Liv. 4. 3.

**Rem. 83.** If the oblique clause dependent on a verb of saying, thinking, etc. (including verbs and nouns of command, entreaty, permission, volition, and advice) is, by its subject, conceived as an *imperative sentence* (this term comprising also the optative sentences), the clause is generally **FINITE**, taking its predicate always in the subjunctive, *either without any conjunction*, or with the conjunctions *ut*, *ne*, or *ut ne* (§ 415, R. 65). Such clauses, which in English are mostly rendered by object-infinitives, are called **IMPERATIVE CLAUSES**.

Have *admonished* their enemy *dilectumque fuit illi*: *He admonished him to march* cautiously and with care. CAES. B. G. 5, 19. — *Perdant in causā* Roscius periculum quod in omnis in-  
tenditur *propulsis*: *I beseech you to ward off in Roscius's trial the danger that threat-*  
ens all. CAES. ROSE. A. 3, 7. (DIRECT: *Propulsis periculum*. — *Hoc te rogo ne demittas*  
animū: I ask you not to lose your spirits. Ib. QU. FR. 1, 1. — (DIRECT: *Noli demit-*  
*tere*. — *Clodius animus his opacioribus habere ut in quas mimiciis residere in familiis*  
*hostis* *debetur*: *Impress* Clodius with the idea not to think that there is any enmity  
left in our families. Ib. AUL. 14, 13. — (DIRECT: *Noli ardebrāri*. O Clodii, etc.)

Obs. 1. For the construction of imperative clauses in the form of an infinitive clause (with *juhēre*, *imperāre*, etc.) see p. 596.

Obs. 2. Often imperative clauses are made dependent on ordinary verbs of saying, and sometimes they are co-ordinate with infinitive clauses containing declarative statements, as: *Scopas Simonidi dedit, se dimidium ejus quod pater esset daturum; reliquum* (with *habere*, to rebuke somebody, — *2 hostias im-*

<sup>1</sup> *Inveni in aliquem*, to have found at last somebody, to rebuke somebody. — <sup>2</sup> *hostias immolavit*, to offer a sacrifice. — <sup>3</sup> First of all. — <sup>4</sup> that he had pronounced so flattering an opinion of them. — <sup>5</sup> they place it among his greatest merits: virtually = *maxime laudant*. — <sup>6</sup> to words loosened, i. e., not bound to the metre = *to words in prose*. — <sup>7</sup> *nudum*, *nudum*, rhythmic movement. — <sup>8</sup> to attach. — <sup>9</sup> favor. — <sup>10</sup> to follow. — <sup>11</sup> this clause *no te*, rhythm, rhythmic movement. — <sup>12</sup> just that is the object of *ausus est*. This immodesty is a species of the 'Zeugma'. — <sup>13</sup> just that is the object of *ausus est*. This immodesty is a species of the 'Zeugma'. — <sup>14</sup> that you send my complaint: just to that I demur. — <sup>15</sup> that you are breathing. — <sup>16</sup> that you send forth the voice = 'that you know how to speak'. — <sup>17</sup> they feel provoked by the very fact that, etc.; they grudge you that, etc.

a suis Tyndaridis *peteret*; Scopas said to Simonides he would give him half of what he had bargained for; the rest he should take from his Tyndarides. Cic. Or. 2, 86, 352. See Ex. 1, 4.

Obs. 3. Often the governing verbs of command, etc., must be supplied from the connection, the same as verbs of saying with declarative oblique clauses: *Procumbunt ad pedes, ne pulcherrimam totius Gallie urbem suis manibus succedere cogentur*; They fall to their knees (*beseeching Vercingetorix*) *not to compel* them to burn the finest city in all Gaul with their own hands. Cæs. B. G. 7, 15. See Ex. 5.

Obs. 4. Oblique imperative clauses, if not introduced by a conjunction, have the same form as those independent imperative sentences which take their predicate in the subjunctive, except that the subjunctive of an independent imperative sentence is always in the *present* (sometimes in the perfect), whereas the subjunctive of the clause is subject to the law of consecution, and hence *may* be in the imperfect. See Ex. 1.

1. Caesar respondit, si quid vellent, ad Idus Aprilis reverterentur. Cæs. B. G. 1, 7.—  
2. *Potēbunt ne se et liberos hostibus dederent.* Ib. 7, 26.— 3. *Plerique censebant<sup>1</sup> ut noctu iter facerent.* Ib. B. C. 1, 67.— 4. *Vercingetorix dicit, perfacile esse factu trumentationibus<sup>2</sup> Romanos prohibere, æquo modo<sup>3</sup> animo sua ipsi frumenta corrumpant ædificiaque incendunt.* Ib. B. G. 7, 64.— 5. Legationem ad Crassum mittunt, si velit suos recipere, obsides sibi remittat. Ib. 3, 8. [For more examples see the Ex. 13 foll. to Rem. 86.]

*Rem.* 84. If an oblique clause dependent on a verb (or noun) of saying, etc., is conceived as an interrogation, the predicate is regularly (but see R. 85, OBS. 7) in the SUBJUNCTIVE, the oblique clause being called 'INDIRECT QUESTION' or 'INTERROGATIVE CLAUSE'. These clauses are introduced by the same particles, adjectives, and adverbs as the direct questions (§ 423; but see *Rem.* 85, OBS. 7).

Epaminondas *querir*it salvusne esset clipeus; Ep. *asked whether* his shield *was safe*. Cic. Fin. 2. 30.—Menedæmus *querēbat* cur de scribendis legibus littera nulla in eorum libris *invenir*etur; M. *asked why* in their writings not a word *was found* on the making of laws. Ib. Or. 1. 19, 86.—Clodius *interrogābat* suos *quis esset* qui plebem fame necāret; Clodius *asked* his gang *who it was* that was starving the people. Ib. Qu. Fr. 2, 3, 2.

*Rem.* 85. Indirect questions are divided into PROPER and IMPROPER ones. Proper interrogative clauses are those that are made dependent on a verb or noun of saying which implies the asking of a *question*, as *querere*, *quæstio*, *interrogare* and their equivalents, as in the examples to R. 84.—Improper interrogative clauses are those which depend on other verbs or nouns. These have only the grammatical form and construction of interrogative clauses without being conceived as questions actually asked by the subject introduced. See Obs. 1.

**Obs. 1.** Improper interrogative clauses are used in the following instances :

(a) If the clause contains actions represented as UNCERTAIN or UNKNOWN, and the principal predicate STATES THE KIND OF THIS UNCERTAINTY. Such predicates are *Dubitāre, dubium est, incertum est, non liquet, ambāgere, nescire, obliuisci, admirāri* (in the meaning 'I wonder how,' etc.), as : *Dubitō num idem tibi suādere quod mihi debeam; I doubt whether I ought to give you the same advice as [I would] to myself.* Plin. Ep. 6, 27. — *Incertum est quo te loco mors expectet;* It is uncertain at what place death waits for you. Sen. Ep. 26. — *Quid nobis agendum sit nescio;* I do not know what we shall do. Cic. Att. 12, 7. — *Hic Tarquinius, Prisci Tarquinii filius fuerit neposve, parum liquet;* It is not quite clear whether this Tarquinius was the son or grandson of Priscus Tarquinius. Liv. 1, 46. — *Hic ita negligens vobis videbitur, ut unde audierit obitus sit;* This man will appear to you as so negligent as to have forgotten where he heard [those things]. Cic. Planc. 23, 57. — *Admirāri* — *olēbam unde esset illa tanta tibi in causis diuinitas;* I used to wonder whence had come to you (how you had acquired) this transcendent fact (this inspiration) in judicial transactions. Cic. Or. 2, 89, 362. Ex. 1. 2, 22, 23, 29.

(b) If the principal predicate designates an action by which the uncertainty represented by the clause *is, was, or may be* removed or defined. The verbs governing such 'indirect questions' are, mostly, verbs of saying, knowing, learning, showing, teaching,

<sup>1</sup> *Censere*, if meaning 'to be of opinion that something *should* be done' (i. e., if the clause is imperative), may also take an infinitive clause with a gerundial predicate (*ut iter facerent*, or *iter faciendum esse*).—<sup>2</sup> foraging.—<sup>3</sup> they should only with good grace destroy, etc.

[illegible]

(c) Sometimes interrogative clauses, the same as direct interrogations, have the force of a NEGATIVE DECLARATIVE clause, as : Qui si di non sunt, *vereor quid agat Ino* ; If these gods do not exist, 'how will Ino fare?' (I am afraid what Ino would do ; I am afraid we could do nothing with Ino). Cic. N. D. 3, 19, 44.

Obs. 2. As in other oblique clauses, so in interrogative clauses the governing verb of saying, etc., is frequently understood, as : *Labiēnus litteras Cæsari remittit (i. e. in quibus scripsit) quanto cum periculo legionem ex hibernis educārus esset*; Labiēnus informed Cæsar by letter how dangerous it was to leave with his legion the winter-quarters. Cæs. B. G. 5, 47. Here belong those parenthetical clauses with the form of indirect questions in which such expressions as 'it is indifferent,' 'it is the same' (whether—or) must be supplied, as : *Fatēmur, acuti hebetesne, valentes imbecilline simus, non esse id in nobis*; *Whether we are quick or dull, whether strong or quick, we acknowledge that the cause is not in us.* Cic. Fat. 9. (Here we supply the impersonal 'nihil interest,' it makes no difference.)

Obs. 3. Frequently indirect questions are used as subject-clauses of impersonal predicates (§ 74, c), as *incertum est*, *dubium est*, *admirabile est*, *incredibile est*, *ambigitur*, *refert*, *interest* (§ 423, R. 72). In such constructions the interrogative clauses are the grammatical subjects of the predicates, but logically they depend on them as if they were their principal predicates: In oratoribus Græcis *admirabile est quantum inter omnis unus excellat*; It is remarkable how much, among the Greek orators, one is superior to all. Cic. Or. 6. The English expression 'It is the question why, whether, etc.' is rendered by *queritur* or *questio est*: *Di utrum sint necne queritur*; It is the question whether there are any gods or not. Cic. N. D. 3, 7.—*Questio est num pœnā videatur esse afficiendus qui civem patriæ conservandæ causā interemerit*; It is the question whether a person who has killed a citizen for the preservation of the country should be punished. Ib. Or. 2, 31, 134. Ex. 7. 21, 23, 29.

Obs. 4. Often indirect questions are attached to nouns of the same import as the verbs mentioned Obs. 1. In this instance the clause is in the grammatical relation of a prepositional or genitive attribute, as : *Error manet utrius populi Horatii, utrius Curiatii fuerint* ; *The doubt* (erring about) *to which* of the two nations the Horatii, *and to which* the Curiatii belonged, still remains (i. e. the doubt as to the nationality of the Horatii and Curiatii). Liv. 1, 24. See Ex. 6. 8. 10.

Obs. 5. Relative-interrogative clauses (*i. e.*, those introduced by interrogative adjectives or adverbs, § 421) frequently have the appearance of ordinary (declarative) relative clauses, being distinguished only by the mood of the predicate, the form of the introducing word being generally the same in both kinds of clauses except with *quis* instead of *qui*, and *quid* instead of *quod*, if the interrogative adjective is used absolutely (§ 357, 2; § 359), as :

1. INTERROGATIVE: *Ibi quæ ad Avaricum gererentur cognoscēbat*; There he took notice of what was going on at Avaricum. Cæs. B. G. 7. 38. (The clause is interrogative in Latin and relative in English).—RELATIVE: *Posteaquam illinc discessi quæ* *et c.*, *et quæ sentī g's's'a cognoscite*; Learn (hear) what happened after my departure. (Cæ. Vell. 2. 2. 66.)

2. INTERROGATIVE: HABETIS (i. e., dixi vobis de inveniendis rebus *quid sentiam*; I have told you *what I think* (i. e., my opinion) as to finding the materia. (for composition). Cic. Or. 2, 85, 350. (The clause is again interrogative in Latin, and relative in English).\*—RELATIVE: NAM TECUM APERTE *quod sentio loquar*; For with you I will sincerely speak *what I think* (i. e., I will speak as I think. Cic. Rep. 1, 10.

\* Our grammarians seem to take no notice of the fact that many clauses which are interrogative in Latin, are relative in English, since they mistake English clauses

In those instances where the predicate of a relative clause, by the general rules on sub-oblige clauses (§ 599), or by the special rules on relative clauses (B. VI.), is required to be in the *subjunctive*, a given clause may often be taken either for a relative or for an interrogative clause, because in this instance the grammatical forms of both entirely agree with each other, as: *Ut di legerent qui nomen novæ urbi daret*; In order that the gods might select (him) who should give a name to the new city. Liv. 1, 6. This sentence may be taken for a relative (= *ut di legerent eum qui daret*), where the subjunctive *daret* might be taken either for a subjunctive by attraction, or for a subjunctive peculiar to relative clauses (B. VI.); or it may be taken for an interrogative clause (that the gods should determine the question who was to give, etc.). Since both kinds of clauses precisely meet at this point, both in form and meaning, it is idle to speculate whether the author meant the clause to be an interrogative or a relative, just as if the question would be raised whether Livy in a given passage, meant the accusative *plebem* to be the accusative of *plebes* after the 5th declension, or of *plebs* after the third.—His rebus gestis Labieno relicto, ut quæ in Galliâ gererentur cognosceret, Cæsar navis solvit (after Labienus was left behind to keep himself informed of what was going on in Gaul). Cæs. B. G. 5, 8. The clause *quæ...gererentur* (in English a clear relative clause) may be taken for a quasi-subjunctive relative clause according to Rem. 89, Obs. 2 (ut ea quæ gererentur cognosceret), or for an interrogative clause (= *quid gereretur*, as in Cæs. B. G. 5, 48, quoted in Obs. 1, b). But according to the principle explained Obs. 6, the latter alternative must be considered correct.

Obs. 6. In which instances does the Latin language express a given thought in the form of an interrogative clause, and when must the form of a relative clause be used?—This question cannot be decided according to the usage of the English language, in which relative clauses are frequently required or preferred where the Latin language must employ an indirect question (Obs. 5).

(a) The form of interrogative clauses in Latin cannot be used otherwise than in the instances mentioned Obs. 1. Hence the interrogative form cannot be used (1) if the governing verb does not belong to the classes mentioned Obs. 1: *Terra numquam sine usura reddit quod accepit* (not *quid accepit*); The earth never returns without interest what it has received. Cic. Sen. 15, 51.—*Utrum tibi commodum est elige* (not *utrum...sit*); Choose either, whichever is convenient to you. Cic. Verr. 2, 2, 61. Here *utrum* is not an interrogative adjective, but a relative enclosing its own antecedent, and used with the force of *utrumcunque*, in the same way as the English 'what'.—(2) If the governing verb, belonging to the classes mentioned Obs. 1, does not represent the thought of the clause as doubtful or uncertain, nor removes such an uncertainty, as: *Cæsar querit ex solo ea quæ in conventu dixerat* (not *quæ dixerat*); Cæsar asked him privately about what he had said in the convention. Cæs. B. G. 1, 18. [The question was not 'What did you say in the convention?', which was known to both parties; but 'Are the things true which have been said in the convention?']—*Queramus* (i. e. *investigamus*) *ubi maleficium est et inveniri potest*; Let us make our inquiries (there, at the place) where the crime lies and where it may be detected. Cic. Rosc. A. 30. The question is not about the place of the crime, which was conceded by all parties to be certain. Interrogatively expressed (*ubi maleficium sit*), the clause would denote that the place was unknown, and was to be found out by the inquiry ('let us inquire at what place the crime was committed').—*Soles tu hæc studiose investigare quæ sunt in eo genere*; You are wont to investigate with zeal the things which belong to this class. Cic. Rep. 1, 11, 17. Here the 'things' are represented as certain, being assigned to a given class. If the clause is expressed interrogatively (*quæ sint* in eo genere; *What things* belong to this class?), the things would be represented as uncertain in regard to classification, this uncertainty to be removed by the 'investigare'.—In all these instances the English idiom perfectly coincides with the Latin.

(b) But if the clause answers to the requirements of the rule in Obs. 1, it must generally assume an interrogative form in Latin, while the English language prefers or requires a relative form whenever the antecedent of the connecting form-adjective or adverb may be made an object (prepositional or otherwise) of the governing verb; as: 1. *Cæsar quid vectigalis populo Romano Britannia penderet constituit*; Cæsar fixed a

unquestionably relative for interrogative clauses. Thus Madvig (in Thacher's paraphrase, p. 311) says: 'The beginner must avoid confounding dependent questions with those relative clauses which in English begin with *what*. *Dico quod sentio*, I say what I think, i. e. *what I say is my real opinion*; *Dicam quid sentiam*; I shall tell what I think, i. e. *I shall state what my opinion is*.' In the last sentence Madvig gives likewise the present *dico*, which his translator, from reasons best known to himself, has changed into *dicam*. The fact is, that both sentences are in English RELATIVE, and cannot, in the way they are given, assist the beginner 'to avoid confounding dependent questions with relative clauses.'

tribute which (less frequently 'determined what tribute') Britanny was to pay to the Roman people. Cæs. B. G. 5, 22.—2. *Nihil fuit turpius quam quod etiam in scriptis obliuiscatur quid paullo ante posuisset*; The most disgraceful thing was that even in writing he would forget what he had just stated before. Cic. Brut. 60, 218.—3. *Noli spectare quanti homo sit*; Do not look at what a man may be worth (i. e. at that which a man, etc.). Ib. Qu. Fr. 1, 2, 4.—4. *Ignari, quid in unaquaque re vitii sit, nequeunt judicare*; The ignorant cannot judge of (discover) the faults which things may have. Ib. Off. 3, 3, 15.—In all these examples the English clauses are relative, while in Latin they must be interrogative, since the clauses are represented as uncertain or unknown, and the actions of the governing verbs (belonging to the classes of Obs. 1) as either asserting these qualities of the clauses, or removing them.

(c) EXCEPTIONS TO RULE (b).—If the clause contains past or present actions which, although unknown to the person spoken to or spoken of, are represented as definite and certain facts, the relative form may be used; as: *Jugurtha (ea) quæ Metellus agbat ex nuntiis accepit*; Jugurtha learned from his messengers what Metellus was doing. Sall. Jug. 46. [Jugurtha did not know the doings of Metellus before he was informed by the messengers; but the doings of Metellus being stated in previous chapters, the author, by using the relative form, represents them as known to the reader, and as unquestionable and definite facts.]—*Videamus nunc strictim quæ post mortem Sex. Roscii abs te T. Rosci facta sunt*; Let us briefly survey what after Sextus Roscius's death was done by you, T. Roscius. Cic. Rosc. A. 34, 95. [The interrogative form might have been used; but the author preferred the relative form since the doings of Roscius had been proved by the examination of the witnesses.] From the same reason the form of the relative clause is used in the example quoted Obs. 5, 1 (*quæ sunt gesta cognoscite*).—Comp. Sall. Cat. 20, 5; 53, 2.—Sometimes the form of a relative clause is used to prevent an ambiguity which would be caused by the interrogative form, as: *Unum illud spectavi quod Chrysogonus agebat*; I solely observed what Chrysogonus was doing. Cic. Rosc. A. 21, 58. The interrogative form '*quid...ageret*' might be taken in the meaning 'what he would do.' In the example quoted Obs. 5, 2 (*loquar quod sentio*) the clause, having the force of *sicuti sentio* (I will tell the truth), is not represented as uncertain, since the person addressed would naturally presume the speaker to tell the truth. *Quid sentiam* would represent the speaker as uncertain as to what he would say. Thus: *De republica nihil scribere possum, nec enim quod sentio licet scribere* (for I rather would not write down what I feel: *scribere sicuti sentio*). Cic. Fam. 15, 16, 3.—Erumpat ali-quando ex me vera vox, et discipuli sine conatatione quod sentio; The word of truth WILL come out eventually, and I will, without hesitating, say what I think. Ib. Vat. 6, 15\*. Sometimes the form of a relative clause is used because the interrogative form could not be accommodated to the construction chosen, as: *Ciceronius, expositis quas in Corsica perdidit, in monte Albeno triumphavit*; Ciceronius after stating the acts which he had performed in Corsica, triumphed on the Alben mountain. Liv. 42, 21. The clause '*quas...res gessisset*' is a relative clause in which the antecedent '*rebus*,' implied in the ablative *expositis*, is incorporated in the clause (see Obs. 7, and B. VI.), so that it is equivalent to '*expositis rebus quas in Corsica gessisset*.' The relative form was required by the construction of the absolute, absolute were the participle '*expositis*' could not assume an absolute form, unless pronounced impersonal form *exposita* had been chosen (see § 599). Had the author used a finite clause (*postquam exposuit*), the clause '*quas...gessisset*' would have had the same form, but it would be an interrogative clause.

If a clause is represented to contain a future uncertainty, to be removed by future actions, the use of a relative form in Latin would be faulty, as: *Fac ut sciam quid de nobis futurum sit* (not *quod futurum est*); Let me know what will become of us. But if a future action is represented as a present necessity or as sure to happen, the relative form is often significantly used: *Quorum mens videt ante multo quæ sua futura*; whose mind often sees long before what it will happen. Cic. Div. 1, 50.—*Senatus qui sunt gerenda persequi*; I intend to the Senate what must not delay, should be done. Cic. Sen. 6, 18.

\* We must not infer from sentences like these that '*dico quod sentio*' always refers to the truth of a statement, and '*dico quid sentiam*' to the mere statement of an opinion, as Madvig asserts by the examples quoted above, as 'amended' by Thacher. The form of the sentence in both instances depends on the question whether the statement or its truth was known to, or presumed by, the person addressed or not. Thus Livy uses the interrogative form with reference to the truth of the statement, because he represents it as unconcealed the truth (what you 'really' think). Liv. 29, 1. Madvig would correct Livy's proper '*quid sentires*' into the improper '*quod sentiebas*.' In a similar sense '*Dicam tibi quod sentio*' (I will not conceal my opinion) occurs in Cic. Or. 2, 90, 365; where the relative form suggests that his telling the truth was not 'questioned.'

Obs. 7. *Is the indicative in clauses of this kind always a sure evidence that the clause is relative, and not interrogative?* This question is identical with the question 'whether ever the predicate of (indirect) interrogative clauses is found in the indicative?' Most grammarians deny this absolutely for classical prose (Madvig, p. 311, Thacher; Kühner, § 158, 14; Meiring, § 730; Public School Gr. § 162). But that clear and unquestionable indirect interrogative clauses in a very few passages of Cicero have their predicates in the indicative, cannot be disputed. The facts are these:

(a) According to Obs. 6, clauses which, by the general rules, must take an interrogative form, assume the form of relative clauses, if the author has an important reason to place the predicate in the indicative. Hence we quite often find clauses with predicates in the indicative where the introducing form-adjectives and adverbs on account of the lacking antecedent have at first sight the appearance of interrogatives; as: *Diligentiam nostram, aut quem ad finem adhuc res processit, cur praeferam?* Why should I not mention our own efforts or the results (finem) which (quem) we have so far achieved? *Cæs. B. C. 2, 32.* The speaker meant to represent these results as unquestionable facts, and did this briefly in the form of an indicative (*processit*, instead of *processerit*), which was grammatically allowable, since the sentence could pass for a relative clause with incorporated antecedent (p. 506), in place of: 'Cur finem ad quem res processit praeferam?'—Exactly in the same way the following passages must be interpreted: *Qui si reputaverint et quibus ego temporibus magistratum adeptus sum, et postea quæ genera hominum in senatum pervenerint, profecto existimabunt me merito iudicium animi mei mutasse;* If they consider the times in which I came into the government, and the kind of persons who afterwards came into the Senate, they will surely think that I had a right to change my views. *Sall. Jug. 4, 4.* Sallust represents his own accession to the government and the political character of that time as notorious facts, opposing it to the 'questionable' character of the men who obtained power under Cæsar, the names of whom he omits, treating them as a 'class'. Hence the first clause (instead of '*reputaverint tempora, quibus temporibus ego adeptus sum*') is relative, to enable the author to use an indicative predicate; the second clause remained interrogative, the subjunctive predicate answering the purpose of the author.—*Qua de causâ et quorum causâ ille hoc promulgavit, ostendi;* I have shown the reason for which (why) and for whose sake he promulgated this. *Cic. L. Agr. 3, 4, 15* (instead of: *ostendi causam de qua causâ et quorum causâ*)<sup>1</sup>.—*Nihil est in Fabio admirabilius quam quomodo mortem filii tulit;* Nothing is so admirable as the manner in which Fabius bore the death of his son. *Cic. Sen. 4* (for: *quam modis quo modo mortem tulit*).—*Vides enim in quo cursu sumus?* For you see the situation we are in. *Cic. Att. 1, 1, 4* (instead of *vides cursum in quo sumus*).

(b) The mentioned changes of interrogative into relative clauses are admissible as long as the noun connected with the interrogative form-adjective may be understood as an object of the governing predicate. But if there is no noun connected with the interrogative, or if the noun could not be connected as object with the governing verb, such a change is no longer admissible, and the predicate should remain in the subjunctive, even if there were logical reasons which might make the indicative mood more corresponding to the author's purposes. Nevertheless there are the following authenticated passages in Cicero, where the predicates of clauses which grammatically cannot be considered as relative, are placed in the indicative as if the clause were relative, and as if the introducing interrogative word had an antecedent:

1. *Meministis Q. Maximo et L. Mancino consulibus quam popularis lex de sacerdotiis videbatur;* You remember how popular the law on the priestly offices seemed to be in the year of Q. Maximus's and L. Mancinus's consulship. *Cic. Am. 25, 96.* The indicative '*videbatur*' was desirable to the author, since the subjunctive of the verb *videri* would impair the positiveness with which (as the connection shows) he meant to state the fact '*that it seemed so*'. Thus the author emancipated himself from a grammatical rule for the sake of a logical purpose, perhaps induced by the close analogy of those (originally interrogative) clauses which according to No. (a) may be conceived as relative<sup>2</sup>.

<sup>1</sup> This clause evidently stands on the dividing line where it may seem doubtful whether the sentence could pass for relative, or must be reckoned among the exceptions No. (b). Grammatically, however, there is no reason why the clause should not be considered as relative, although the form of a relative clause would be repugnant even to the English idiom. But this cannot be a reason for referring this passage to the exceptions No. (b), since the whole question consists of a strictly formal grammatical point.—<sup>2</sup> The reading *sumus* is against the codices.—<sup>3</sup> To take this passage, as our grammarians do, for a direct exclamation (*Meministis: 'Quam popularis lex videbatur!'*) means only to substitute a greater difficulty for a lesser one. This remedy would evidently be worse than the evil it intends to cure, since nobody has yet alleged a single passage of ancient authors in which direct exclamatory (or interrogative) sentences are found in such a connection with a *verbum sentiendi*. See § 596, Obs. 4.

2. *Vides propinquitatem quid habet;* You see what (conveniences) the nearness of residence affords. *Cic. Att. 13, 18.* The editors did not know any better means to get rid of the difficulty of the indicative '*habet*', than to change it into '*habeat*', and the grammarians readily acquiesce. But the manuscripts have uniformly *habet*. Cicero speaks of the '*propinquitatem*' and its conveniences as a thing positively known to the person addressed, and although the subjunctive *habeat* would not affect this meaning, we must assume rather that he disregarded in the easy epistolary style the strict rules of grammar, for the sake of using distinct language, than alter the authenticated text.

3. Similarly must be explained: *Vides quanto post unâ futuri sumus.* *Cic. Fam. 7, 4.*

4. *Videte, iudices, quantæ res his testimoniis sunt confectæ;* You see how important facts were done according to these testimonies (You see the importance of the facts which). *Cic. Mil. 18, 47.* Of this passage there is a reading *sint confectæ*, which, however, is supported by only two inferior codices.

5. *Quæro quæ tu (studia) esse majora intelligis;* I ask what studies you understand to be greater. *Cic. Rep. 1, 19.* Here the reading *intelligas* is perhaps better authenticated, and ought to be adopted, since Cicero had no possible reason to substitute an indicative for the regular subjunctive. So in *Fam. 2, 9, 1* (*Scis quem dico or dicam*).

6. Other passages in Cicero in which indicatives occur in such clauses may be interpreted as relative clauses according to No. (a), as *Cic. Verr. 1, 2, 53, 131; Tusc. 4, 36, 77* (*ostendit quæ sequuntur*).

(c) In anteclassical language (Plautus and Terence) the use of the indicative in interrogative clauses is quite frequent, as: *Scio quid ago.* *Plant. Bacch. 1, 1, 45.*—*Videte, quæro, quid potest pecunia.* *Ib. Stich. 3, 1, 9.* So in *Ter. Phorm. 2, 3, 11; Ad. 4, 5, 2.* *Ilec. 1, 2, 16*, and often. It is not probable that this usage was caused by the influence of the Greek language, which always in these clauses requires the indicative. It unquestionably was a colloquial inaccuracy, which found its way to the language of the comies. There are several passages in the authors of the silver age where indicatives occur in unquestionably interrogative clauses, as *Quid animi estis habituri queso.* *Rutil. Lup. 2, 6, p. 98.*—*Quæres a me quo jure mihi prætor dedit possessionem.* *Ib. 2, 8, p. 112.* Thus *Valer. M. 5, 7, ext. 1; 5, 6, ext. 5; Sen. Ep. 4; Ib. 34.*

(d) Several passages which, by some, have been placed under this rule, must be considered as direct questions after being correctly punctuated, as *Quid nobis faciendum est? Ignoro;* What is to be done by us? I do not know. *Cic. Att. 14, 13, 2.*

Obs. 8. The idioms of the Latin and English languages often differ when in Latin interrogative clauses are used, and the rendering of such clauses is often a matter of some difficulty.

(a) In many instances the English language requires or prefers the form of a relative clause, in which instance the Latin governing noun of the interrogative adjective is made the English antecedent, interrogative adverbs being, for this purpose, resolved into attributive phrases with or without prepositions. Absolute interrogatives must often be turned into English absolute relatives with a preposition as required by the governing verb, as: *Quid quisque me dixisse dicat, præstare non possum;* I cannot answer for what other people say that I have said (for the remarks which other persons place in my mouth). *Cic. Fam. 9, 16, 5.*—*Quid hostes consilii caperent expectabat;* He waited for the measures the enemy would take. *Cæs. B. G. 3, 24.*—*Ignoscetis mihi si modo quæ causa me ad hanc loquacitatem impulerit acceperitis;* You will excuse me if you hear the cause which has forced me into this loquacity. *Cic. Or. 2, 87, 355.*—*Athènes me delectant recordatione summorum virorum, ubi quisque habitare, ubi sedere, ubi disputare solitus;* Athens attracts me by the memory of her great men connected with the places where they lived, and where they were wont to sit and to speak. *Ib. Leg. 2, 2.* See Ex. 8-10.

(b) Frequently English nouns representing actions with the idea of uncertainty are expressed by Latin interrogative clauses. Thus the Latin does not say, 'I do not know the size of this land,' but 'I do not know how great this land is,' as: *Si quid est in me ingenii, quod quam sit exiguum sentio;* If there is any talent in me, the defects (insufficiency) of which I am well aware of, etc. *Cic. Arch. 1, 1.* [*Cujus exiguitatem senio* would be very poor Latinity.]—*Indutiomarus quæ fieri velit præcipit.* *Indutiomarus gave his (or the necessary) orders.* *Cæs. B. G. 5, 56.*—*Qualis sit animus ipse animus nescit;* The soul does not know its own qualities. *Cic. Tusc. 1, 2, 2.*—*Dicendi genus quod fuerit in utroque, orationes utriusque, etiam posteris nostris, indicabunt;* The orations of both will bear testimony to their (grand) style, even with our posterity. *Ib. Brut. 94, 324.*—*De solibus duobus studeo audire quid sentias;* I wish to hear your opinion on the two suns (lately seen). *Ib. Rep. 1, 17.*—*Armorum quantum quæque civitas efficiat, constituit;* He fixed the number of arms which every state should furnish. *Cæs. B. G. 7, 2.* There are other similar idiomatic uses of Latin interrogative clauses which must be learned by practical observation. Thus an interrogative clause with *vide* is used in colloquial style to impart any intelligence to the person addressed: *Vide quantæ in te sit suavitas;*

literally: See (look) how great an affability is in you. Cic. Fam. 16, 5, 1 (i. e. The following incident shows the affability of your manners). See Ex. 11-15, 18.

(c) Sometimes interrogative adjectives and adverbs are not immediately connected with the predicate of the interrogative clause, but with a participle (either in the form of an accessory predicate or of an absolute) or with an infinitive clause dependent on it. This is called 'INVOLUTION OF INTERROGATIVE CLAUSES,' a form of expression which always needs a recasting of the sentence before rendering it into English, as: Alii tradunt, Latini *percontatum* quid *quereretur* in agrum Latini *transisset*; Others report that Latini had asked them *for what purpose* (literally 'what seeking') they had come to the Latin territory. Liv. 1, 1.— *Videmus quibus extinctis oratoribus quam in paucis spes sit*; We see the small number of promising orators which the deaths of the great men (indicated by 'quibus,' which here means 'what kind of') we have mentioned has left to us (literally: We see after what kind of orators having died, in how few there is hope). Cic. Off. 2, 19.— Caesar milites edocet *quanto detrimento et quot virorum fortium morte necesse sit constare victoriam*; Caesar explained to his soldiers that victory must be bought at the price of great disadvantages, and by the death of many brave men (literally: 'showed what disadvantage and the death of how many brave men it would be necessary that victory would cost'). See Ex. 16, 17.

(d) Frequently the subject of an interrogative clause is taken out of the clause, and transferred to the principal sentence, generally as transitive object; but sometimes as subject or intransitive object. Such sentences must often be recast in English. This is called 'ECTHESIS': Nosti *Marcellum quam tardus sit*; You know the slowness of Marcellus. Cic. Fam. 8, 10, 3.— *Quidam saepe in parva pecunia perspicuntur quam sint leves* (instead of 'perspicuntur quam leves quidam sint'); The fickleness of many is often found out if the money at stake is but a trifle. Ib. Am. 17, 63.— *Diliberatur de Avarico incendio placere an defendi*; They held a deliberation whether Avaricum should be burned or defended. Cæs. B. G. 7, 15.— Ecthesis occurs also, but more rarely, in clauses which are not interrogative: *Rem frumentariam, ut satis commode supportari posset, timere dicebant*; They pretended to be afraid of the inconvenience in conveying the supplies to the army. Cæs. B. G. 1, 39. See Ex. 18-20.

(e) If interrogative clauses refer to the future, their predicates are rendered by 'will' or 'would' according to the tense of the principal predicate; and when the answer expected is a rule for the person asking (being an imperative sentence), the predicate is rendered by 'must,' 'to be to,' 'should'. If both the principal and the interrogative predicate have the same subject, the predicate of the clause is generally rendered by an English infinitive with 'to'. This rule is important if such English infinitives are to be rendered into Latin: (Vos eam potestatem habetis) ut *statuatis utrum nos semper laqueamus, an aliquando per vestram sapientiam remiserimus*; You have the power to decide whether we must always harass, or whether by your wisdom, we are at some future time to be released. Cic. Md. 2.— Omnes Galliae civitates *unde a Romanis bellum esset, explorabant*; All the States of Gaul inquired where the war was to be. Cæs. B. G. 5, 51.— *Id quomodo huiusmodi his satisfacies videris*; Look out how you will satisfy these (our friends). Cic. Or. 2, 86, 351.— *Quid affers quare id factum putamus*; What reason do you give why we should believe that this was the case. Ib. Rosc. A. 19, 54.— *Senatus decrevit qui Romae regnaret*; The Senate decided who should be king at Rome. Liv. 1, 17.— *Ego quid acciperim scio, quid dicam nescio*; I know what I have heard, but do not know what to say. Cic. Rosc. A. 21, 58.— *Quod sibi ipsi iudicassent quo procedendum aut quid agendum videretur*; Because they had assumed to judge where to proceed or what to do. Cæs. B. G. 7, 52.— Predicates of this kind are not generally placed in the periphrastic future. See Ex. 21-24.

(f) The English interrogative clause with an infinitive introduced by 'how' with which the verb 'to know' is construed, is expressed in Latin either by a mere object-infinitive or by an interrogative clause (with a finite predicate) introduced by *quomodo* or its equivalents, dependent on *scire*. A Latin interrogative clause with *quomodo* is used only if *scire* refers to the style or manner of performing the action; if it means a knowledge of the whole action, the English interrogative clause is expressed by a Latin object-infinitive: *Soli qui memoria viget sciunt quid, et quatenus, et quomodo dicturi sint*; Only those who have a strong memory know what, how much (= up to what point) and how to speak. Cic. Or. 2, 87, 355. But: *Puer antequam declinare sciat, before a boy knows how to decline* (not 'quomodo declinat'). Quint. 2, 1, 3.— *Docere sciunt, they know how to teach* (i. e. the art of teaching; *quomodo doceant* would be 'according to what method'). Quint. 10, 5, 19. See Ex. 25.

Obs. 9. Interrogative clauses dependent on 'nescio' are often parenthetically inserted with an ELLIPSIS of the interrogative predicate, and with the force of an indefinite form-adjective or adverb. The indicative predicates with which *nescio* in this case is often immediately connected, must not be taken for interrogative predicates: *Nescio quod magnum malum me celant* (i. e. *Magnum malum, nescio quod [malum] sit, me celant*);

They conceal some great evil from me (a great evil, I do not know which). Ter. Hec. 3, 1, 39.— *Lucus, nescio quo casu, nocturno tempore incensus est*; By some accident a grove was set on fire during the night (literally: 'A grove, I do not know by what accident,' etc.). Nep. Milt. 4.— *Sed, nescio quo pacto, ab eo quod erat a te propositum aberravit oratio*; But my remarks have wandered away from the subject suggested by you. *I do not know how it happened* (or: But somehow my remarks have, etc.). Cic. Tusc. 3, 33, 80. Hence *nescio quis* and *nescio quid* virtually have the meaning of *aliquis* and *aliquid*: *Prope me nescio quis loquitur*; Somebody is talking near me. Plant. Pers. 1, 3, 9.— *De lege agraria nescio quid voluisse eum dicere suspicabantur*; They supposed he had intended to say something on the agrarian law. Cic. Leg. Agr. 2, 5, 13. See Ex. 26-28.

Obs. 10. To the interrogative particles mentioned §§ 417-419, must be added *ec* and *si*. *Ec* (of uncertain derivation) is used as prefix with the indefinites *quis* and *qui* (*ecqui, ecquis, ecquid*), and with the indefinite adverbs *quo* and *quando* (*ecquo, ecquando*). It has the force both of *num* and *ne*, and is not especially rendered in independent interrogative sentences, as: *Ecquid fit*; Is anything going on? Cic. Fam. 7, 11.— *Ecquo te tua virtus proveri-set*? Would your own ability have raised you to any (position)? Ib. Phil. 13, 11, 24.— *Ecquando te rationem factorum tuorum redditurum putasti*? Did you believe that you would at any time be called to account for your deeds? Ib. Verr. 2, 17, 43.— In interrogative clauses *ec* means 'whether': *Quaris ecquae spes pacificationis sit*; You ask whether there is any hope for an amicable settlement. Cic. Att. 7, 8.— *Quero a tribuno ecquando nisi per XXXV tribus creati sint*; I ask the tribune whether they (the tribunes) at any time (ever) were elected otherwise than by the 35 tribes? Ib. Leg. Agr. 2, 7, 17. Sometimes *ecquis* is strengthened by the suffix *nam* (§ 421). Ex. 29.

*Si* is sometimes used with the force of 'whether' (the same as 'if' in English). It most frequently depends on verbs of trying and expecting; but it is not confined to these, as some grammarians assert: *Helvetio si percurrere possent conati sunt*; The Helvetians tried whether they could break through (the lines). Cæs. B. G. 1, 8.— *Temptata res est si primo impetu capi Ardea posset*; The attempt was made whether Ardea could be carried by the first assault. Liv. 1, 57.— *Statui expectandum esse si quid certius afferretur*; I resolved to wait whether (till) some more definite information would be given. Cic. Fam. 15, 1, 2.— *Philopœmen quæsit si Lycortas incolumis evasisset*; Philopœmen inquired whether Lycortas had safely escaped. Liv. 39, 50. Ex. 30-33.

In the historians very frequently interrogative clauses with *si* are so used that a governing verb of 'trying', or some equivalent expression, is understood. This is most frequently the case if the principal predicate is a verb of motion, and the clause denotes the object of the motion, so that the verb of 'trying' if expressed would be in the first supine (§ 351). *Dicunt clam ex castris exisse (i. e. temptatum, or 'ut viderent' si quid fragmenti in agris reperiri posset*; They stated they had secretly left the camp to see whether any food might be found in the neighborhood. Cæs. B. G. 7, 20.— *Hercules pergit ad speluncam, si forte eo vestigia ferrent*; Hercules proceeded in the direction of the cave, to see whether perhaps any tracks were leading there. Liv. 1, 7. Ex. 34-36.

#### EXAMPLES TO REM. 85, OBS. 1-10.

1. Si unquam dubitatum est, Quirites, utrum tribuni plebis vestra an sua causa seditionum semper auctores fuerint, id ego hoc anno desisse dubitari certum habeo. Liv. 5, 3.— 2. Dubium est uter nostrum sit veracior. Cic. Ac. 2, 41, 126.— 3. Cæsar ex captivis cognovit quo in loco hostes consedisent. Cæs. B. G. 5, 9.— 4. Eam conditionem misero ferunt ut optet utrum malit cervicem Roscio dare, an inutus in culeum vitam amittere. Cic. Rosc. A. 5, 30.— 5. Neque cognoscendi quid fieret, neque sui collegendi hostibus facultatem relinquunt. Cæs. B. G. 3, 6.— 6. Eo turba omnis sine discrimine locum in quo secessisset, perfracta. Liv. 1, 8.— 7. Queritur quare hieme nigrum, non gramineum, sen. Qu. N. 4, 4.— 8. Valerius sustentatur discalceatus quæ res pueris solent aut dolere. Cic. Off. 2, 21.— 9. Qui sit oratori memoria fractus. Ib. Or. 2, 87, 355.— 10. Exstet oportet vestigia ubi, qua ratione, quo tempore maleficium sit admissum. Ib. Rosc. A. 22, 62.— [RENDER THE SENTENCES NO. 11-15, 18, BY USING NOUNS FOR THE INTERROGATIVE WORDS IN COMBINATION WITH OTHER PARTS.]— 11. Panætiusque vix conjectura qualia sint possumus suspicari, sic affirmat ut oculis ea cernere videatur. Cic. Rep.

1 Modest.— 2 considerare, to pitch camp; consedisce, to be encamped.— 3 conditionem ferre, to leave (prescribe) to somebody a condition.— 4 to choose.— 5 cervicem dare, to surrender one's neck.— 6 sowed up in a sack, the usual punishment of parricides.— 7 all kinds of promiscuous crowds.— 8 distinction.— 9 whether they consisted of free persons, or of slaves. Liber does not grammatically refer to turba; understand: Liberne esset si qui fugeret, an servus.— 10 took their refuge.— 11 to show.— 12 to hail.— 13 by observing.— 14 [what are] for an orator the benefits of a good memory.— 15 a question with negative force = nihil me attinet dicere, I need not tell.— 16 traces.— 17 as to the place, etc.— 18 crime.— 19 conjecture.— 20 guess.— 21 that it seems as if.

1, 10, 15.—12. *Cæsar neque quanta esset insulæ magnitudo<sup>1</sup>, neque quæ<sup>2</sup> aut quantæ nationes incolerent, neque quem usum belli haberent, neque quæ<sup>3</sup> essent ad majorum navium multitudinem idonei portus reperire poterat.* Cæs. B. G. 4, 20.—13. *Producuntur<sup>4</sup> ei quos Litaviens edocuerat<sup>5</sup> quæ dici vellet<sup>6</sup>.* Cæs. B. G. 7, 38.—14. *Vita quam sit brevis cogita.* Plant. Most. 3, 2.—15. *Ex hoc intelligi potest quantus fuerit Hannibal.* Nep. Hann. 23.—16. *Cogitate quantis<sup>7</sup> laboribus fundatum<sup>8</sup> imperium una nox pæne delerit.* Cic. Cat. 4, 9, 19.—17. *Tum legatis dicendi potestatem quid petentes<sup>9</sup> venerint facit<sup>10</sup>.* Liv. 1, 22.—18. *Quæ<sup>11</sup> queruntur<sup>12</sup> qualia sint, innumerabilia sunt.* Cic. Or. 2, 32, 137.—19. *Tempus quamdiu<sup>13</sup> diceremus nobis præstituebas<sup>14</sup>.* Ib. Quinct. 9.—20. *Sanguinem, bilem<sup>15</sup>, ossa video posse dicere unde<sup>16</sup> conereta sint.* Ib. Tusc. 1, 24.—21. *In nostræ potestate est quid meminimus?* Ib. Fin. 2, 32, 104.—22. *Dionysius, quum bellum adversus eum Syracusani decrevisset, diu dubitavit imperiumne deponeret, an bello resisteret.* Just. 21, 2.—23. *Neque satis Bruto vel tribunis militum constabat<sup>17</sup> quid agerent, aut quam rationem pugnae insisterent<sup>18</sup>.* Cæs. B. G. 3, 14.—24. *Hæc volui per litteras (tibi scribere), ut haberes<sup>19</sup> quid diceret si quando in vituperatores<sup>20</sup> meos incidisses<sup>21</sup>.* Cic. Fam. 7, 3, 6.—25. *Lex naturæ vetat ullam rem esse<sup>22</sup> cuiusquam nisi<sup>23</sup> ejus<sup>24</sup> qui tractare et uti sciat.* Ib. Rep. 1, 17.—26. *Casu nescio quo in ea tempora ætas nostra incidit.* Ib. Fam. 5, 15, 3.—27. *Nescio quomodo ipsæ illæ litteræ excludere me a portu et perflugio<sup>25</sup> videntur.* Ib.—28. *Ille nescio quis<sup>26</sup>, qui in scholis nominari solet, mille et octingenta stadia quod<sup>27</sup> abesset videbat.* Ib. Ac. Pr. 2, 25, 81.—29. *Illud dubium est, ad id quod summum bonum dicitis, æquanam fieri possit accessio<sup>28</sup>.* Ib. Fin. 4, 24.—30. *Hanc paludem si nostri transirent, hostes expectabant.* Cæs. B. G. 2, 9.—31. *Centuriones nutu<sup>29</sup> vocibusque<sup>30</sup> hostis si introire<sup>31</sup> vellent vocare cepērunt.* Ib. 5, 43.—32. *De quo genere paullo plura dixi, ut hoc videretis si laudationes<sup>32</sup> essent in oratoris officio<sup>33</sup>.* Cic. Or. 2, 85, 398.—33. *Primum ab eis quæsit, si aquam hominibus jumentisque in totidem dies quot frumentum imposuisset (i. e. navibus).* Liv. 29, 25.—34. *Consul ad Gomnum castra movet, si potiri oppido posset.* Liv. 42, 64.—35. *Himileo secutus est Marcellum, si qua occasio pugnandi esset.* Ib. 24, 36.—36. *Reservatis<sup>34</sup> Aduis si per eos civitates recipere<sup>35</sup> posset, reliquos captivos exercitui distribuit<sup>36</sup>.* Cæs. B. G. 7, 89.

### 3 SUBOBLIQUE CLAUSES.

§ 599. SUBOBLIQUE CLAUSES are clauses DEPENDENT ON OBLIQUE clauses, and forming those parts of the indirect statement which the speaker introduced conceives in the form of clauses (§ 597). All sub-oblique clauses require their own predicates to be in the subjunctive. (For exceptions see R. 87.)

Rem. 86. SUBOBLIQUE CLAUSES may be dependent on any of the four forms of oblique clauses mentioned above, as:

#### 1) ON INFINITIVE CLAUSES:

Epicurus dicit, omnium rerum quas ad beate vivendum sapientia comparaverit, nihil esse majus amicitia; Epicurus says that of all means which wisdom has devised for a

<sup>1</sup> Magnitudo is redundant in this passage.—<sup>2</sup> quæ refers to the name, and quantæ to the number of the inhabitants.—<sup>3</sup> qui with idonei refers to the capacity of the harbors.—<sup>4</sup> producere, to bring forward.—<sup>5</sup> to teach.—<sup>6</sup> the witnesses were intended 'to play a certain part', by personating others.—<sup>7</sup> An interrogative sentence with 'how' must be used, which may be directly connected with delerit, quantis being changed into the corresponding demonstrative.—<sup>8</sup> founded.—<sup>9</sup> quid petentes venerint is dependent on dicendi.—<sup>10</sup> potestatem alicui facere, to give to somebody a permission.—<sup>11</sup> ea quæ.—<sup>12</sup> queri has here the meaning 'to be in doubt', 'to be unknown'.—<sup>13</sup> tempus quamdiu = per quod tempus.—<sup>14</sup> to determine beforehand, to prelimit.—<sup>15</sup> gall.—<sup>16</sup> the elements which constitute.—<sup>17</sup> Alicui aliquid constat, somebody is clear as to something.—<sup>18</sup> insistere rationem pugnae, to adopt a plan of battle.—<sup>19</sup> habere = scire.—<sup>20</sup> caviller.—<sup>21</sup> to fall in with, to meet with.—<sup>22</sup> to belong.—<sup>23</sup> except.—<sup>24</sup> supply esse (except to him).—<sup>25</sup> refuge.—<sup>26</sup> that somebody.—<sup>27</sup> See Rem. 81, OBS. 1.—<sup>28</sup> accessio fieri potest ad aliquid, something admits of an increase.—<sup>29</sup> by gestures.—<sup>30</sup> words.—<sup>31</sup> to come in.—<sup>32</sup> panegyrics.—<sup>33</sup> belonged to the province of an orator.—<sup>34</sup> Render: With the exception of the Aduans who were retained.—<sup>35</sup> recover. Cæsar is the subject understood.—<sup>36</sup> distribuere aliquid alicui, to distribute something among some persons. Here a distribution of the prisoners 'as slaves' is meant.

happy life, friendship was the greatest (nothing was greater than friendship). Cic. Fin. 1, 20, 65.—[The clause *quas...comparaverit* depends on an accusative with the infinitive; and the subject, Epicurus, if his own words were stated in a direct form, would express this thought in the form of a clause. Hence the clause is suboblique, and its predicate must be in the subjunctive].—It is the same if the infinitive clause has the form of a nominative with the infinitive (§ 192), as: *Cecidiss<sup>1</sup> de equo dicitur, et, posteaquam ad urbem venerit, paucis diebus esse mortuus*; He is said to have fallen from his horse, and, after he had come to the city, to have died in a few days. Cic. Clu. 62, 175. See Ex. 1-6, 8, 9.

#### 2) ON OBLIQUE THAT-CLAUSES with *ut*, *ne*, *quin*, and *quod*:

*Verbar ne, antequam tu in provinciam venisses, ego de provincia decederem*; I was afraid that I would leave (have left); see p. 354, OBS. 4) the province, before you had arrived there. Cic. Fam. 2, 19, 1. See Ex. 10-12.

#### 3) ON IMPERATIVE CLAUSES:

*Scribit Labieno, si reipublica commodo facere posset, cum legione ad finis Nerviorum venire*; He wrote to Labienus that he should come with his legion to the Nervian frontier, provided he could do it without a prejudice to the public interest (if it was compatible with the public interest). Cæs. B. G. 5, 46. See Ex. 12-17.

#### 4) ON INDIRECT QUESTIONS:

*Questio est, num potius videatur afflicendus (is) qui civem patria conservanda causâ interemerit*; It is the question whether a person who has killed a citizen for the sake of saving his country, should be liable to punishment. Cic. Or. 2, 31, 134. See Ex. 18, 19.

OBS. 1. Not all clauses dependent on oblique clauses are suboblique, but only those which form a part of the indirect statement, being conceived or uttered by the same person who makes the statement contained in the governing clause. If such clauses contain remarks which the author makes in his capacity as author, and which the speaker introduced could not have made if using his own words, they are not suboblique, but ordinary dependent clauses, and their predicate is in the indicative.

(a) DEPENDENT ON INFINITIVE CLAUSES: *Nuntiatum est Cæsari, Ariovistum ad occupandum Vesontionem, quod est oppidum maximum Sequanorum, contendere*; It was reported to Cæsar that Ariovistus was making forced marches to occupy Vesontio, which is the largest town of the Sequani. Cæs. B. G. 1, 38. The clause '*quod est...Sequanorum*' is not suboblique, because it does not belong to the report of the messengers, but is a remark of the author to explain the situation. See Ex. 20-24.

(b) DEPENDENT ON THAT-CLAUSES with *ut*, *ne*, *quin*, *quod*: *Quidam furti damnatus est, quod equo cuius usus illi usque Ariciam commodatus fuerat, ulteriorem ejus municipii clivo vectus esset*; Somebody was convicted of theft for having taken (stolen) a ride on a hill beyond the town of Aricia on a horse which had been lent to him to use up to that town. Valer. Max. 8, 2, 4. The clause '*cuius usus...fuerat*' is not suboblique, because it is an explanatory remark of the author, not belonging to the fact constituting the theft, which is stated indirectly, as if uttered by the condemning judge ('you have taken a ride on a hill, etc., and thereby have stolen the use of the horse').

(c) DEPENDENT ON IMPERATIVE CLAUSES: *Cæsar Labieno mandat, Germanos, qui auxilio a Belgis accessit dicebantur, si per vim flumen transire conentur, prohibeat*; Cæsar ordered Labienus to prevent the Germans, who were said to have been summoned by the Belgians to their aid, from crossing the river if they should attempt to force a passage. Cæs. B. G. 3, 1. Here the clause '*si...conentur*' is suboblique, because it forms part of Cæsar's order stated in an indirect form; but the clause '*quæ...dicebantur*' is an explanatory remark of the author. Ex. 25, 26.

(d) DEPENDENT ON INTERROGATIVE CLAUSES: *An vero dubitamus, quo ore iste homines inferiores, quo ore, quas nunquam liberis putavit, libertinos homines solitus sit appellare? Can we indeed have any doubt (as too with what front (i. e. impudence) that man was wont to address persons of the lower classes, or with what front he addressed) freedmen, whom he never considered as freemen?* Cic. Verr. 2, 1, 48. Here the clause '*quas...putavit*' is an additional remark of the author, forming no part of the indirect statement which is expressed in the form of an improper indirect question. Ex. 27.

OBS. 2. Sometimes explaining remarks of the author, given in the form of a relative clause, have SUBJUNCTIVE predicates, although they cannot be considered as part of the indirect statement contained in the oblique clause on which they depend. Generally such subjunctives must be considered as 'relative subjunctives with causal force' according to B. VI p. 566, as: *Ejus civitatis sapientissimum dicunt Solonem fuisse, eum qui leges, quibus hodie quoque utuntur, scripserit*; People say that the wisest man of that State was Solon, the same who wrote the laws whom they (the Athenians) use to

the present day. Cic. Rosc. A. 25, 70. Here the clause '*qui...scripserit*' forms no part of the indirect statement, and hence is *not* suboblique, and yet the predicate is in the subjunctive because the author represents it as the probable cause of the general opinion stated in the oblique clause. Hence the predicate *utuntur*, which is a remark of the author *without* such causal force, is in the *indicative*. See Ex. 28.—Sometimes, however, such predicates are in the subjunctive when no such causal force can be assigned to them (Ex. 7). These belong to the subjunctives by *quasi-attraction*. (See Rem. 91.)

The mentioning of Chrysogonus is not a part

ut celeritate<sup>1</sup> reliquas res conficeret, *quā pleraque erat consecutus*<sup>2</sup>. Cæs. B. G. 7, 12.—26. Hunc sibi ex animo scrupulum<sup>3</sup>, *qui se dies noctisque stimulat ac pungit*<sup>4</sup>, ut evellatis<sup>5</sup> postulat. Cic. Rosc. A. 2, 6.—27. Quæro abs te, iuerisne, *quod sine senatusconsulto tibi non licuit*, in regno Hiempsalis? Ib. Vatin. 5, 12.—28. Quum ex Socrate esset quæstum, Archelæum, Perdicæ filium, *qui tum fortunatissimus haberetur*, nonne beatum putaret, 'Haud scio,' inquit; 'numquam enim cum eo sum collocutus.' Ib. Tusc. 5, 12, 34.

Rem. 87. Suboblique clauses may have their predicates in the INDICATIVE, 1) if the indirect statement so far as it is contained in the suboblique clause, is ENDORSED by the author (Obs. 1); 2) if historians make use of the exceptional license of giving to suboblique clauses the same grammatical form in tense and mood, as they would have if their governing oblique clause had the form of a direct statement (Obs. 3).

Obs. 1. While the author may always (except in the *oratio obliqua* strictly so called, see B. VI.) add his own remarks to indirect statements in the form of a clause with an indicative (in which instance the clause is *not* suboblique; see R. 86, Obs. 1), the same mood is frequently used in clauses strictly suboblique, i. e., in those that are conceived by the same person who makes the indirect statement in the governing oblique clause. The author, by using the indicative in such clauses, implies that the statement of the person introduced as speaker represents at the same time his own view. Statements of this kind may

1) contain ACTUAL FACTS, as: Rectum putabat Roscius pro eorum honestate se pugnare propter quos ipse honestissimus inter suos numerabatur; Roscius considered it his duty to struggle for the honor of those on account of whom he was himself reckoned among the most honored of his townsmen. Cic. Rosc. A. 6, 16. (The subjunctive numerabatur would leave a doubt as to the correctness of Roscius's view in regard to the fact; by the indicative the author pronounces Roscius's supposition as correct).—Inita tandem ratio est ut, *quod viribus deerat*, arte æquaretur; The plan was finally adopted to supply by art what was wanting in strength. Liv. 26, 4. (The clause 'quod...deerat' is a necessary part of the resolution 'Arte æquemus quod viribus nostris deest'. Hence the subjunctive deesset would be correct; but by the indicative deerat the author declares that the strength was really deficient, although the subjunctive deesset would not intimate the contrary).—Quem ardorem studii censēdis fuisse in Archimede, qui, dum in pulvere quedam describit attentius, ne patriam quidem captum esse senserit? Cic. Fin. 5, 19, 50. See Ex. 1-3.

2) Or the statement may contain ideas which the author takes for granted on account of their 'objective' character, the criterion of which is that the statement cannot be disputed in the way it is presented; if for instance the mere idea of a substantive is represented in the form of a clause, or if the clause contains a fact acknowledged by all; as: Quis potest esse tam mente captus qui neget, hæc omnia quæ videmus deorum immortalium potestate administrari? Who can be so insane as to deny that all things which we see are governed by the power of the gods? Cic. Cat. 3, 9, 21. (The clause 'quæ videmus' has an 'objective' character, because the fact 'that we see' cannot be disputed).—Res hoc postulat ut eorum expectationi qui audiunt quam celerrime occurratur; Reason demands that we should as quickly as possible meet the expectation

of the statement introduced by 'animadverti,' but an independent remark of the author, who is here at the same time the speaker. The sentence is pregnantly expressed, and implies 'animadverti eum jocari, in quo usque eo versatus est dum Chrysogonum nominari.'—<sup>1</sup> by acting rapidly. See p. 243, Obs. 1, 1; Obs. 2.—<sup>2</sup> The clause 'quæ...consecutus' is not conceived to be uttered by the ambassadors. Cæsar intimates this by the indicative, and by not using *ea* in connection with *celeritate*. It is meant for a modest remark. 'My success is owing more to my rapidity than to any genius of mine.'—<sup>3</sup> distress, pang, remorse.—<sup>4</sup> The imperative (optative) clause 'ut...evellatis,' is irony. When the accuser asked for the death-penalty of the accused, Cicero represents him as if he meant by it to ask the court for relief from the legal steps that the accused would probably take against him. Hence the clause 'qui...stimulat ac pungit' (which distracts and cuts him) could not be placed in the mouth of the accuser. While Cicero makes the statement of this clause his own assertion by means of the indicative, he intimates by the reflexive form *se* (which grammatically would require a subjunctive predicate, p. 11, R. 8) that at the same time the accuser feels that the orator has correctly represented the state of his mind. It is one of those faults against strict grammar which are committed on purpose, and by which a genius proves that he is the lord even over the laws of language.—<sup>5</sup> to tear out, to remove.

of those who hear (i. e. of our audience). Cic. Or. 2, 77, 313.— *Quod debes, quære cui reddas*; Ask (for the person) to whom you may return *what you are owing* (i. e. 'your debt', if you have contracted one). Sen. Ben. 5, 19.— In all such clauses the subjunctive is less often used if, as in the examples above, the governing oblique clause is represented as an undeniable fact. If, on the contrary, the governing clause is represented as *untrue*, the indicative in suboblique clauses of this kind is unusual, as: *Nolite putare eos qui aliquid impie commiserint* agitari Furiarum tædis ardentibus; Do not believe that those who have committed an impious act (the doers of impious acts) are driven about by the burning torches of the Furies. Cic. Rosc. A. 21, 67.— But if the governing clause contains a doubtful fact, both moods are indiscriminately used, as: *Questio est num pœnâ videatur afficiendus qui civem patriæ conservandæ causâ interemerit* (or *interemît*) [= the slayer of a citizen, etc.]. Cic. Brut. 2, 31, 131. See Ex. 9-13.

3) Or the suboblique clause is attached to those oblique clauses where the author introduces *himself* as speaker. In this instance a distinction must be made, whether the author by the principal predicate of saying, commanding, etc., refers to his *former* sayings and conceptions, or whether by the principal predicate he introduces his *present* views. In the former case the statements of the author as speaker are treated like those of other persons, as: *Postulo* (= *postulavi*) ut Syracusanis liceret senatus consultum *quod pridie fecissent* mihi reddere; I demanded that the Syracusans should be permitted to return to me the senatorial decree which they had passed the day before. Cic. Verr. 2, 4, 66. But in the latter instance the indicative in the suboblique clause is more usual than the subjunctive, because such indirect statements are virtually direct, as: *Scio omnes qui adfuerunt* delectatos esse vehementer *quum a te est Popilia laudata*; I know that all present were greatly delighted when you delivered your laudatory speech on Popilia. Cic. Or. 2, 11, 44 (= omnes qui adfuerunt delectabantur *quum* Popilia a te laudata est).—Ego a te peto ut, *si tibi videtur*, disputes de hoc toto genere. Ib. 2, 57, 233 (= *Disputa, si tibi videtur*, etc.). See Ex. 14-20. In Ex. 21 the subjunctive mood is used.

Obs. 2. If 'improper' indirect questions do not contain indirect statements of a person introduced by the author, but have only the *form* of an interrogative clause (R. 85), the clauses dependent on them are virtually direct clauses, and the mood of their predicates is not determined by the rules above, as: *Videatis quam sit genus eorum qui sibi eruditi videntur* hebes atque impolitum; You may see how dull and illmannered is the tribe of those who imagine that they are learned. Cic. Or. 2, 31, 133 (= *Genus eorum qui sibi eruditi videntur* egregie hebes atque impolitum est).—Erit explicandum in laude iustitiæ quid cum fide, quid cum æquabilitate *is qui laudabitur* fecerit (= *Quæ is qui laudabitur fecit explicanda erunt*). Cic. Or. 2, 85, 345.

Obs. 3. The license, by which the historians give to the predicates of ordinary suboblique clauses the same tense and mood as if the governing oblique clause had the form of a direct statement, is mostly confined to the *oratio obliqua* in the strict sense of the word (B. VI.); but it also occurs in ordinary sentences with indirect statements. In either instance the use of this form is rare, but occurs in all the classical historians; as: *Constituit ut ei qui valetudine aut ætate inutiles sunt bello, oppido excedant*; They resolved that those who by their health or age were unfit for war, should leave the town. Cæs. B. G. 7, 6, 8. [If the clause '*qui...sunt bello*', were represented as the author's remark, it would be '*qui...erant*'; if it were treated as suboblique clauses should be according to rule, it would be '*qui...essent*'. The form '*qui...sunt*' has the same form as it would have if the governing oblique clause were represented as a direct command, '*Qui valetudine, etc., inutiles sunt bello, oppido excedant!*'.—Thus (in oblique discourse) in the speech of Mithridates to his soldiers (Trog. Pomp. in Just. 38, 6): *Ait Mithridates... ut ipsi Romani ferunt*, conditores suos lupæ uberibus altos, sic omnem illum populum luporum animos habere; Mithridates said... that, as the Romans themselves had the tradition that the very founders of their race had been nourished at the breast of a she-wolf, so had that whole people the souls of wolves.—*Tum senem, postquam convivium inerat*, exceptum poculum Druso tradidisse; (It was rumored) that thereupon the old man, after he had joined the banquet, had taken a goblet and handed it to Drusus. Tac. Ann. 4, 10. See Ex. 22-24.

Obs. 4. Sometimes the form of the indicative in suboblique clauses is used for particular reasons, as: C. Mario magna atque mirabilia portendi haruspex dixerat; proinde *quæ animo agitabat* fretus disageret; The haruspex had said that a great and astounding fate was destined to C. Marius; hence he might, trusting in the gods, carry out *what he was then revolving in his mind*. Sall. Jug. 63. Here *agitabat* can neither be considered as 'endorsed by the author' (no fact being given which the author could endorse), nor as an indicative according to Obs. 3 (which would require the present tense). But if Sallust had used the subjunctive, the clause '*proinde quæ animo agitaret*' would not have the meaning '*hence...what he was then revolving in his mind*', but '*whatever he henceforth might revolve in his mind*'. To make this understanding of the clause impos-

sible. Sallust used the indicative against the strict rules of grammar, thus preferring a questionable grammatical form to a faulty expression of his meaning.

1. Helvetii, *quum id ipsi diebus viginti ægerrime confecerant*, Cæsarem uno die confecisse intelligerent, legatos ad eum mittunt. Cæs. B. G. 1, 13.— 2. Intelligere debes, tibi tuendus esse illos viros a quibus initium libertatis confectum est. Cic. Fam. 9, 14, 8.— 3. Prudentissima civitas Atheniensium, *dum ea rerum polita est*, fuisse traditur. Ib. Rosc. A. 25, 70.— 4. Illam proscriptionem senatus suscipere noluit, ne quid aerius *quam more majorem comparatum est*, publico consilio factum (esse) videatur. Ib. 53, 153.— 5. (Roscius) rogat te, *si nihil de patris fortunâ in suam rem convertit, si nullâ in re te fraudarit*, ut sibi per te liceat innocenti vitam in egestate degere. Ib. 49, 144.— 6. Queris an verum sit *quod Stoici placet*, sapientiam bonum esse, ea-que bonum non esse. Sen. Ep. 117.— 7. Num dubium est quin ei obtulerint hanc præcæm Chrysogono *quod ab eum partem prædæ tulit*? Cic. Rosc. A. 31, 107.— 8. Petis a me ut scribam, an hæc pars philosophiæ *quæ nos præcipiam* dicimus, satis sit ad commendandum sapientiam. Sen. Ep. 95.— Prætores tunc putant obeundam esse provinciam *quum in arvis frumenta sunt*. Cic. Verr. 2, 5, 12.— 10. Scitis esse notissimum ridiculi genus *quum aliud expectamus aliud dicitur*. Ib. Or. 2, 63, 255.— 11. Nonnulli præcipiunt, ut verbum illud *quod causam facit* lucide breviterque uterque definiat. Ib. 2, 25, 108.— 12. Non queritur, quo beneficium ab eo, cui datum est, transferatur. Sen. Ben. 5, 19.— 13. Queris, cur pariter natis lata diversa sint, *maximæque ferunt spatia distent* *quorum inter ceteros minimum interest*. Ib. 7, 1.— 14. Credo tum *quum Sicilia florbat* magna artificia fuisse in eâ insulâ. Cic. Verr. 2, 4, 21.— 15. Naudum *quum in Asia res magnas periculi amiserant* scimus Romæ senatus improbi fidem concessisse. Ib. Leg. Man. 7, 19.— 16. Equidem omnia *quæ prætor ad usum civium comprehendenda* oratori esse puto. Ib. Or. 2, 16, 68.— 17. Peto a te ut tantum Hippie commodos *quantum tua fides dignitasque patitur*. Ib. Fam. 13, 37.— 18. Peto ut in causâ Roscii periculum, *quod in omnis intendit*, propulsaris. Ib. Rosc. A. 3, 7.— 19. Quæro ex te, *sine ex pauperimo dives factus* *ipse anno quo læba habuit* de pecuniis repetundis accerrima. Ib. Vat. 12, 29.— 20. Quæro abs te, *circumsessusne sis Lampsaci*, (et) *coperitne domum in qua deversabare* multitudo incendere. Ib. Verr. 2, 1, 78.— 21. Nihil prius constituto

1 With the greatest difficulty.— 2 The predicate is suboblique, but endorsed by the author, being stated, both in his own name, and as part of the reasoning of the Helvetians.— 3 by whom the way for liberty has been paved. The statement is suboblique, belonging to the sentiment which the person addressed ought to have; but it is likewise endorsed by the author, who asserts that the men he meant (Brutus and Cassius) were indeed the originators of liberty.— 4 as long as it held the supremacy. The clause forms a part of the 'tradition,' but is at the same time endorsed by the author.— 5 to be responsible for.— 6 lest harder measures should seem to be adopted.— 7 than it was warranted. This fact formed part of the motives of the Senate, but is at the same time endorsed as correct by the author.— 8 appropriated to himself. This and the next clause are part of Roscius's pleading; but the correctness of the facts is at the same time vouched for by the author.— 9 ut sibi per te liceat, to permit him.— 10 to spend.— 11 the fact that the assertion '*sapientiam bonum esse*,' etc., was one of the Stoic principles (so-called Stoic paradoxes), is endorsed by the author.— 12 who got out of him (received from him) part of the booty. Ferre is used in contrast to 'offerre.'— 13 i. e. *quæris a me*.— 14 which we call 'didactic' (including the moral philosophy).— 15 to obtain the highest degree of.— 16 to make a circuit in the province.— 17 when the corn is in the barns. The fact that this happened once every year is generally acknowledged.— 18 the most common species of the ludicrous.— 19 when we expect something else than what is mentioned.— 20 give the rule.— 21 on which the whole case rests (turns).— 22 placidly.— 23 both of the attorneys.— 24 is cui datum est, the receiver (for which there is no good Latin noun).— 25 quo beneficium transferatur, how the benefit bestowed, is applied.— 26 pariter natis, to those born in equal circumstances, in similar situations.— 27 and are as divergent as circumstances can be (literally: and are distant by the greatest intervals of circumstances).— 28 origin, birth.— 29 there is the least possible difference.— 30 great works of art.— 31 had incurred great losses, a notorious fact at that time.— 32 solutione impedita, by a suspension of payments.— 33 credit.— 34 to collapse.— 35 all that is of practical importance to the citizens.— 36 should comprise in his mind.— 37 to accommodate Hippas with so much.— 38 friendship.— 39 to allow.— 40 which threatens, which is aimed at.— 41 to ward off.— 42 that, having been in the most indigent circumstances, you became rich, etc. See § 444.— 43 legem ferre, to pass a law.— 44 on the embezzlement of public money.— 45 the most stringent.— 46 circumsedere, to besiege.— 47 deversari, to stay.— 48 I establish nothing earlier than, i. e. I determine before all other things.

quam quid sit illud<sup>1</sup> quo<sup>2</sup> mihi sit referenda omnis illa oratio<sup>3</sup> quæ sit propria<sup>4</sup> questionis<sup>5</sup>. Ib. Or. 2. 27. 114.— 22. Jugurtha postero die cum Aulo in colloquio<sup>6</sup> verba facit<sup>7</sup>: 'Tupe<sup>8</sup> si iussu cum ea re a te aperi<sup>9</sup> dicitur loci<sup>10</sup>, tamen se incolunt omnes sibi pugnam missurum.' Sall. Jug. 88. 9.— 23. Mithridates ait, Eumenei, ejus consilios Romæ a patre suo Is. in iussu<sup>11</sup> dicitur. Trog. Pomp. in Just. Persen domuerant<sup>12</sup>, pro hoste (a Romanis) haberi in esse, et quod<sup>13</sup> eum ipse forme<sup>14</sup> sibi putaverant, cum filio ejus Aristonico bellum gessisset. Trog. Pomp. in Just. 38. 6.— 24. Scapius inquit<sup>15</sup>, annum se tertium et octogesimum agere, et in agro<sup>16</sup> de quo agitur<sup>17</sup> militasse<sup>18</sup>. Liv. 3. 71.

#### 4. QUASI-OBLIQUE, AND QUASI-SUBOBLIQUE CLAUSES.

§ 600. If clauses contain indirect statements, conceived by the (logical) subject of the principal sentence, without being grammatically dependent on a verb of saying, thinking, etc., or on one of the oblique constructions mentioned § 599, they are *virtually oblique* or *suboblique*, and are called QUASI-OBLIQUE or QUASI-SUBOBLIQUE clauses according as they are analogous to the oblique or to the suboblique clauses. They regularly take their predicates in the *subjunctive* (for exceptions see R. 88, OBS. 2), and never have the form of an infinitive clause.

OBS. It is a common feature of the oblique (or suboblique), and the quasi-oblique (or quasi-suboblique) clauses that both are stated 'out of the mind of a person introduced by the author' (*ex aliâ mente cogitantur*), and there is no clause which may not be represented as the thought of another person by merely giving to the predicate the form of a subjunctive. The English language has no means to express the same distinction by the mere form of the predicate, as: Nocte ambulabat Themistocles *quod somnum capere non posset*; Themistocles walked about by night *because he could not sleep*. Cic. Tusc. 4. 19, 44. The predicate of the clause is placed in the subjunctive, since the cause which made Themistocles walk by night rests wholly on his own statements made to others. We must supply '*id quod se facere dicebat quod... non posset*.' This makes the clause 'quasi-suboblique,' as if dependent on an infinitive clause understood. Had the author used the indicative *poterat*, he would have stated the cause as his own remark, or as vouched for by him, which he probably did not think proper.— Plinius ascendit locum in (ex?) quo maxime illud miraculum conspici poterat; Pliny ascended to a place where that remarkable event *could be best observed*. Plin. Ep. 6. 16. The author, by using the indicative *poterat*, represents the clause as his own remark, implying that he knew the place, and that the view from there really was as stated. *Poterat* would make the clause *quasi-oblique* = *ex quo illud miraculum conspici posse sciebat*.

Rem. 88. QUASI-OBLIQUE CLAUSES are virtually equivalent to *oblique clauses*, i. e. they may be transformed into clauses *immediately* dependent on verbs of saying, thinking, etc., which must be supplied from the connection. In lieu of the verb of saying, etc., they take their predicates in the *subjunctive*. The governing verb thus understood is

1) either a verb expressing purpose and intention, or an equivalent accessory predicate (*eo consilio*), in which instance the clause is a 'FINAL CLAUSE,' introduced by the conjunctions *ut*, *ne*, or *quo* (generally used before comparatives with the force of *ut*), which always require the predicate to be in the subjunctive<sup>19</sup> (See B. VI.), as:

<sup>1</sup> *Quid sit illud* = the aim.— <sup>2</sup> *quo referenda sit*, to which should be directed.— <sup>3</sup> the discourse.— <sup>4</sup> refers to.— <sup>5</sup> subject, theme.— <sup>6</sup> conference.— <sup>7</sup> *cum Aulo verba facit*, opened his views to Aulus.— <sup>8</sup> = *etsi*.— <sup>9</sup> held... enclosed, i. e. had at his mercy.— <sup>10</sup> had crossed over.— <sup>11</sup> to subject.— <sup>12</sup> The relative clause must be placed after the infinitive clause.— <sup>13</sup> in regard to himself (Eumenes).— <sup>14</sup> improper.— <sup>15</sup> began (to speak).— <sup>16</sup> part of the country.— <sup>17</sup> *Res de qua agitur* was a legal formula, corresponding to the attributive phrase '*the subject under discussion*': 'QUA DE RE AGITUR' autem illud, quod multis locis in juris consultorum includitur formulis. Cic. Brut. 79. 275.— <sup>18</sup> to do military service, to serve.— <sup>19</sup> Clauses of purpose or 'final clauses' are not always conceived as indi-

Cæsar ex conspectu removit equos *ut spem fugæ tolleret*; Cæsar removed the horses out of sight *in order to* (that he might) *destroy the hope of flight*. Cæs. B. G. 1. 25; = 'intending to destroy', 'with the purpose of destroying'. *consilium habens*, or *eo consilio ut spem tolleret*. The force of this verb of intending is implied in the mere conjunction *ut*, and by the connection.— Themistocles angustias quærebat, *ne multitudinem circumdaretur*; Th. chose his position in the narrows of the sea *lest he might be outflanked by the superior number* [of the enemy's ships]. Nep. Them. 3 (= in order that not, *eo consilio adductus, ut ne*, etc.).— Nervii hoc fecerant *quo facilius equitatum hostium prohiberent*; The Nervii had made this (hedge) *to have a better defence against hostile cavalry*. Cæs. B. G. 2. 18 (= *consilio adducti ut*, etc.). See Ex. 8. 10. 11 to R. 89.

2) Or an ordinary verb of saying, commanding, or thinking, which, if expressed, would require the clause to be either in the form of an infinitive clause, or in the form of an imperative clause. The clauses which are thus made quasi-oblique are mostly *causal*, introduced by *quod*, *quia*, and *quoniam*, but also relative and conditional, as:

Antigonus *quod imperatoris advenire non posset*, flectit iter suum; Antigonus took another route *because he could not surprise* [the enemy]. Nep. Eum. 9. 6 (= *quod si imperatoris advenire non posse intelligebat*).— Morinorum ad Cæsarem legati venerunt, *qui prudentis advenire non posse intelligebat*; Envoys of the Morini came to Cæsar, *se de superioris temporis consilio excusarent*; Envoys of the Morini came to Cæsar, *who were to excuse them* on account of their former resolution. Cæs. B. G. 4. 22 (i. e. *qui de superioris temporis consilio excusarent*).— Impensius eis indignitas crescere, *si ne quibus illi mandaverant ut se excusarent*; Their indignation increased *when* [they considered that] *the throne would not even after Tarquin's death be returned to them*. Liv. 1. 40 (= *si considerabant regnum reditum non esse*).— Virum, a comitate quæ sine luxuriâ esset, non aversum (= *quam sine luxuriâ esse putabat*). Liv. 37. 7. Ex. 1-7.

OBS. 1. Sometimes the verbs of saying which must be supplied, according to R. 82, require a *Quod*-clause, as: *Invidia vulgi, quod tribus militibus fortuna publica commissa fuerit*, ingnium dictatoris corrumpit; The dissatisfaction of the people, because the fate of the State had been given in the hands of three soldiers, misled the dictator's mind. Liv. 1. 27 (= *invidia hominum qui vituperabant dictatorem quod tribus militibus, etc.*).

OBS. 2. The mood of the clause is *always* the subjunctive in the final clauses introduced by *ut*, *ne*, *quo*, and generally so in the clauses mentioned R. 88, 2, except if the indirect statement is *endorsed* by the author, in which instances the indicative may be used, as: Longius prosequi veritus est, *quod silva paludesque intercedebant*; He was afraid of continuing the pursuit because forests and marshes interfered. Cæs. B. G. 5. 52. See Ex. 8. 9.— If, however, such an assertion is represented as an *individual* (guarded) opinion of the author, the subjunctive is used according to R. 79, generally in connection with a parenthetical '*credo*', as: Demosthenis nuper inter imagines tuarum, *quod eum, credo, amares*, imaginem ex are vidi; The other day I saw Demosthenes's image among the images of your ancestors, *because, I think, you love him*. Cic. Or. 31. 10. The clause '*quod eum amares*' is not quasi-oblique; but a potential subjunctive (R. 79) employed in a clause where, by the law of consecution, it must be in the imperfect, while in an independent sentence it must be in the present or perfect. See Ex. 10.

OBS. 3. Often causal or relative clauses, conceived as indirect statements, instead of taking their predicates in the subjunctive, are made dependent on those verbs of saying, etc., which represent the act by which the subject expresses or conceives the thought, as: Hoc sibi solatii proponēbant, *quod se celeriter amissa recipiaturos confidebant*; They consoled themselves *because they trusted* (with the hope) that they would speedily recover their losses. Cæs. B. G. 7. 15. The clause *quod... confidebant* might have its predicate in the subjunctive without *confidebant* (*quod celeriter amissa recipiaturi essent*). But there are two peculiar and very frequent Latin idioms, which occur in clauses of this kind, and must be considered as a species of *enallage*, 1) that such verbs of saying and thinking are placed in the *subjunctive*, although not the verb of saying or thinking is indirectly stated, but the clause dependent on it, as: Helvetii quod Romanos decedere a se existimarent, nostros insequi cœperunt; The Helvetians began to follow our troops *because they thought* that the Romans were turning from them. Cæs. B. G. 1. 23; 2) that verbs of saying or thinking are even then added to these clauses (either in the indicative or—more frequently—in the subjunctive) if *not the act of saying or thinking*,

but clauses, since they are also used to designate a purpose conceived by the author, and not by the subject of the principal predicate, as: Vitandum est oratori utrumque, *ne aut scurrilis jocus sit aut mimicus*. Cic. Or. 2. 59, 239.

but the actions *said or thought* are conceived as the cause of the principal action; as: L. Trebonius, infestus (erat) patribus, *quod* se ab his in cooptandis tribūis fraude captum *ajēbat*; L. Trebonius had a grudge against the Patricians, *because he said* that they had played a trick upon him. Liv. 3. 65 (*i. e.* because, according to his statement, they had, etc.).—Ille contendit ut in Galliā relinqueretur *quod* religionibus sese impediri *diceret*; He demanded to be left in Gaul, *because he said* that he was kept there by religious reasons. Cæs. B. G. 5, 6 (*i. e.* because he was, according to his statement, kept there, etc.). See Ex. 11-16.

1. *Quoniam* gemini<sup>1</sup> essent<sup>2</sup>, nec etatis verecundia<sup>3</sup> discrimen facere posset, Palatium Romulus, Remus Aventinum ad augurandum templa capiunt<sup>4</sup>. Liv. 1. 6.—2. Miltiades *quoniam* ipse pro se dicere non posset, verba fecit<sup>5</sup> frater ejus Tisagoras. Nep. Milt. 7, 6.—3. Aristides nonne ob eam causam expulsus est patria, *quod* prater modum<sup>6</sup> justus esset? Cic. Tusc. 5, 39.—4. Si luce<sup>7</sup> quoque canes in Capitolio latent<sup>8</sup>, optior eis crura suffringantur<sup>9</sup> *quod* acres<sup>10</sup> sint<sup>11</sup> etiam tum quum suspicio nulla sit. Ib. Rosc. Am. 20, 56.—5. Sape aliquid ambigitur<sup>12</sup> *quod* aut verbum aut verba sint *pretermissa*<sup>13</sup>. Ib. Or. 2, 26, 111.—6. Tabulae<sup>14</sup> repertae sunt in quibus summa erat<sup>15</sup> Helvetiorum capitum millia CCLXIII; ex his qui arma ferre possent<sup>16</sup> ad millia XCII. Cæs. B. G. 1, 29.—7. Cæsar exploratores praemittit<sup>17</sup> qui<sup>18</sup> locum idoneum castris diligant. Ib. 2, 17.—8. Cæsar in Morinos proficiscitur *quod* inde erat brevis-simus in Britanniam trajectus<sup>19</sup>. Ib. 4, 21.—9. C. Flaminius Laelium socerum, *quia* cooptatus<sup>20</sup> in augurum collegium<sup>21</sup> non erat, non admodum diligebat. Cic. Brut. 26, 101.—10. Hortensius post consulatum—credo, *quod* vidēret ex consularibus<sup>22</sup> neminem esse secum comparandum, negligere<sup>23</sup> autem<sup>24</sup> eos qui consules non fuissent—illud studium remissit<sup>25</sup>. Ib. 93, 320.—11. Circiter hominum millia sex spe salutis<sup>26</sup> inducti, *quod* suam fugam occultari posse existimarent, e castris Helvetiorum egressi sunt. Cæs. B. G. 1, 27.—12. Alius alia<sup>27</sup> causa illa<sup>28</sup>, quam sibi ad proficiscendum<sup>29</sup> necessariam<sup>30</sup> esse diceret, petebat ut discedere liceat. Ib. 1, 39.—13. Quasiērat ex me Scipio quidnam sentirem de hoc *quod* duo soles visos esse constāret<sup>31</sup>. Cic. Rep. 1, 13, 19.—14. Hunc excusavit Terentius *quod*<sup>32</sup> eum brachium fregisse diceret. Ib. Or. 2, 62, 253.—15. Hi exponunt<sup>33</sup>, equites Aduorum interfectos (esse) *quod* collocati cum Arvernīs dicerentur. Cæs. B. G. 7, 33.—16. Verres nominat servum suum quem magistrum pecoris<sup>34</sup> esse diceret. Cic. Verr. 2, 5, 7.

Rem. 89. QUASI-SUBOBLIQUE CLAUSES are those which are virtually equivalent to suboblique clauses (§ 599), which is the case (a) if the governing verb implies an oblique clause (Obs. 1); (b) if the clause is dependent on a quasi-oblique clause (Obs. 2).

Obs. 1. Verbs or phrases, which imply oblique clauses, are the following: (a) many phrases with substantive objects, as *Causam reperio* = causam esse reperio; *polliceor* or *propōno aliquid* = polliceor me aliquid facturum esse; *posco* (flagito, peto) *aliquid* = impero (peto) ut aliquid detur, as: Cæsar hanc reperiebat causam quod apud Germanos ea consuetudo esset ut, etc.; Cæsar found out this reason that it was customary with the Germans to, etc. Cæs. B. G. 1, 50.—Magna propōnit eis qui eum occiderint premia; He promised great rewards to those who would kill him. Ib. 5, 8.—Cæsar quotidie Aduos frumentum quod essent polliciti flagitare; Cæsar daily demanded from the Adui the corn which they had promised. Ib. 1, 16.—(b) Those verbs of saying, thinking, etc., which are construed with an object-infinitive (§§ 489, 491) are often equivalent to a similar verb of saying, etc., with an infinitive clause, or a clause with *ut*. Hence the clauses dependent on these constructions are *quasi-suboblique* if conceived by the subject of the governing verb of saying, etc., as: Nec Hasdrubal alium quemquam *præficere malle* (malēbat) ubi quid fortiter ac strenue agendum esset; Nor did Hasdrubal like to place any one else

<sup>1</sup> Twins.—<sup>2</sup> *i. e.* quoniam geminos se esse considerabant.—<sup>3</sup> respect due to age.—<sup>4</sup> Romulus took the Palatine, and Remus the Aventine hill as observatories (templa) for the augural phenomena.—<sup>5</sup> acted as his defender because (understand; 'he considered that his brother', etc.).—<sup>6</sup> to excess.—<sup>7</sup> at daylight.—<sup>8</sup> would bark.—<sup>9</sup> their bones would be broken.—<sup>10</sup> sharp.—<sup>11</sup> *i. e.* *quod* existimarent eos acres esse, because they would consider them as sharp.—<sup>12</sup> is considered ambiguous.—<sup>13</sup> *i. e.* *quod* videtur verbum *pretermissum* esse.—<sup>14</sup> lists.—<sup>15</sup> *summa erat Helvetiorum*, the aggregate of the Helvetians was stated to be.—<sup>16</sup> *i. e.* who were designated in the lists as being able to bear arms.—<sup>17</sup> sent scouts in advance.—<sup>18</sup> *i. e.* quibus imperavit ut.—<sup>19</sup> passage.—<sup>20</sup> chosen.—<sup>21</sup> board of augurs (whose chairman was Laelius).—<sup>22</sup> exconsuls.—<sup>23</sup> lighted, took no account of them.—<sup>24</sup> and.—<sup>25</sup> gave up.—<sup>26</sup> induced by the prospect of liberty.—<sup>27</sup> See § 357. R. 6.—<sup>28</sup> to allege, to plead.—<sup>29</sup> for his departure.—<sup>30</sup> *causa necessaria*, a reason which forms a good excuse.—<sup>31</sup> *constat*, it is known.—<sup>32</sup> literally: because he said = by saying.—<sup>33</sup> to state.—<sup>34</sup> overseer of the herds.

in command wherever brave and energetic action was required. Liv. 21, 24 (*nec præficere malle* may be paraphrased by 'Negavit se præficere').—*Constituērunt* ea quæ ad proficiscendum *pertinērent comparare*; They resolved to prepare what was required for the march. Cæs. B. G. 1, 3 (= constituērunt ut compararent).—(c) Predicate-accusatives, governed by verbs of saying or thinking (§ 487, B.C.), are frequently equivalent to a similar verb of saying, etc., with an infinitive clause, as: *Leves milites qui* hanc tantum gerent *vocabantur*; Those who carried only a lance were called light-armed soldiers. Liv. 8, 8 (= dicebantur leves milites esse). [Compare the Ex. p. 202].—The imperfect of the periphrastic future often implies a verb of 'resolving', and clauses referring to such a resolution are *quasi-suboblique*, requiring the subjunctive, as: *Matri eam, quam primum per ipsam liceret, eram remissurus*; I was going (*i. e.* I had resolved) to send her back as soon as she would consent to it. Cic. Att. 11, 17. So the Ex. with *Si*-clauses, p. 714.—See Ex. 1-8.

Obs. 2. Clauses dependent on quasi-oblique clauses are *quasi-suboblique* according to the analogy of R. 86, 87, as: Minucius obtinuit ut legiones, *sicuti* consulibus mos esset, inter se dividerent; Minucius obtained (a decree of the senate) that they should distribute the legions among each other, as it was customary with consuls. Liv. 22, 27. 'Sicut... mos esset' is quasi-suboblique, because it depends on a quasi-suboblique (imperative) clause, 'ut legiones dividerent' (obtineat = efficit ut senatus decerneret).—Pluribus verbis tecum eri ut, *quoscunque* tibi ejus necessarios commendārem, haberes eos in numero meorum necessariorum; I have been rather explicit on this subject, in order that you may consider as my relatives, whomsoever of his relatives I would recommend to you. Cic. Fam. 6, 13. The clause 'quoscunque... commendārem' is quasi-suboblique, since it depends on the quasi-oblique (final) clause 'ut haberes,' etc.—Canes aluntur in Capitolio ut significant *si fures venerint*; In the Capitol dogs are kept to announce if thieves would come. Cic. Rosc. A. 20, 56. The conditional clause 'si... venerint' is quasi-suboblique, being dependent on the final clause 'ut significant.' See Ex. 9-12.

Obs. 3. Sometimes the governing final clause of a conditional or of an equivalent relative clause, or of a clause with *antequam* or *priusquam*, is elliptically omitted if it may easily be supplied from the text. In this instance the dependent clause is quasi-suboblique without any governing clause. Conditional clauses of this kind are in English introduced by 'in the event that' or 'in the case that,' as: Tullus tamen, *si vana afferantur* (a Mettio), in aciem edicit exercitum; Tullus, however, placed his army in battle-order, in the event that what Mettius proposed should be untrue. Liv. 1, 23. Here a clause of purpose must be supplied 'edicit exercitum ut pugnare possit ei,' etc.—Alii offerunt se, *si quo usui operærit*; Others offered themselves in the case that their assistance would be of any use. Liv. 26, 9 (Supply 'Ut senatus operā suā utatur si quo usui apparēbat, occupant bellum facere'; The Fidenates hastened to begin the war before the Romans had so much strength, as it seemed that they would have. Liv. 1, 14 (*i. e.* they began the war in order to compel the Romans to fight before they would have, etc.). See Ex. 13.

Obs. 4. For the tenses which any description of indirect predicates must assume, if they, in a direct form of the clause, would be in one of the future tenses, see § 607.

1. Scipio Corinthiis statuas pollicentibus eo loco ubi essent aliorum imperatorum, tumulū<sup>1</sup> dixit (sibi) displicere. Cic. Or. 2, 65, 262.—2. Vercingetorix *proditionis*<sup>2</sup> insimulatus est<sup>3</sup>, quod castra propius Romanos movisset. Cæs. B. G. 7, 20.—3. Cæsar obsides, arma, servos qui ad eos fugissent, poposcit. Ib. 1, 27.—4. Cæsar senatum omnem, et (eos) quos inter<sup>4</sup> controversia esset, ad se Decetiam evocavit<sup>5</sup>. Ib. 7, 33.—5. Vercingetorix capitis<sup>6</sup> poenam eis qui non paruerint<sup>7</sup> constituit<sup>8</sup>. Ib. 7, 71.—6. Carthaginenses quod primo majorem suorum fuisset<sup>9</sup>, deinde ab Syphace ad se pervenisset<sup>10</sup>, repetebant<sup>11</sup>. Liv. 40, 17.—7. Omnia senatus rejiciebat<sup>12</sup> nisi de me prius consules retulissent<sup>13</sup>. Cic. Sest. 31, 68.—8. Galli, nisi perfregerint<sup>14</sup> munitiones, de omni salute desperant<sup>15</sup>; Romani, si rem obtinuerint<sup>16</sup>, finem laborum omnium expectant<sup>17</sup>. Cæs. B. G. 7, 85.—9. Caduceator<sup>18</sup> eo regius venit ut inducere essent donec tollerentur ad

<sup>1</sup> A pun intended by Scipio; statues turmalēs meaning both 'equestrian statues,' and 'statues by squadrons.'—<sup>2</sup> treason.—<sup>3</sup> was accused. The phrase *proditionis insimulatus est* is equivalent to 'adhibuit, cum proditorem commisisse.' Thus the clause *furti damnatus est quod...* *factus esset* R. 96, Obs. 1, may be explained.—<sup>4</sup> = inter quos.—<sup>5</sup> summoned; evocavit = imperavit ut ad se veniret.—<sup>6</sup> death penalty.—<sup>7</sup> against those (§ 414, R. 47).—<sup>8</sup> who should not obey. See § 607.—<sup>9</sup> decreed. Constituit poenam = instituit ut poenā affererent.—<sup>10</sup> had been the property of.—<sup>11</sup> had been transferred to them from Syphax.—<sup>12</sup> repetebant quod, etc., = petebant ut illi redderetur quod; They asked for the return of what, etc.—<sup>13</sup> omnia rejiciebat = declarabat omnia postponenda esse.—<sup>14</sup> to report.—<sup>15</sup> unless they succeeded in forcing their way into the intrenchments. See § 607.—<sup>16</sup> de salute desperant, considered their lives as lost; = sciebant sibi moriendum esse.—<sup>17</sup> if they were successful.—<sup>18</sup> = sperabant finem adfore laborum.—<sup>19</sup> herald.

*publicum prodierat, omnium oculos in se converterat*). Nep. Alc. 3, 5. Sometimes, however, in such clauses, if introduced by a compound of *cumque*, the mood is not attracted, as in a sentence, quite similar to the last: *Captiva ad Scipionem adducitur virgo adeo eximia formâ ut, quacunque incedebat, converteret omnium oculos*. Liv. 26, 50. See Ex. 9-15.

(c) In those clauses introduced by *quum* or *dum* which require tenses and moods equal to those of their principal predicates because the two predicates denote inner identity of action (R. 69, OBS. 1, p. 339), as: *Quo fcebat ut Athenienses omnia minus prospere gesta Alcibiadis culpe tribuerent, quum eum aut negligenter aut malitiose fecisse loquerentur*: Thus it came that the Athenians attributed every ill success to Alcibiades's fault, when they said (inasmuch as they said, by saying) that he had acted negligently or maliciously. (INDEPENDENT: *tribuebant quum loquebantur*; When they spoke so, they thereby laid the blame to Alcibiades). Nep. Alc. 7, 2. Sometimes such clauses take the form of a conditional clause. See Ex. 16. The same is the case in clauses introduced by *quandiu* after *tandiu*, or their equivalents (See Rem. 61, OBS. 5).

OBS. 2. The predicate of clauses which cannot be separated from the governing predicate without destroying or affecting its meaning, must be attracted by the mood of the governing predicate. Here belong comparative clauses with *quam*, *atque*, *ac*, etc., which have no independent value, but only serve for qualifying the principal clause or sentence, as: *Quis gloriam tam unquam expetât quam ignominiam fugiat?* What man will (would) ever covet renown in the same measure as he shuns disgrace? Cic. Part. Or. 26, 91. The meaning of the principal sentence '*quis gloriam expetât*' would be wholly changed without the comparative clause, nor could the latter be conceived as an independent sentence. Hence the predicate *fugiat* could not be in the indicative as long as the principal predicate is in the subjunctive. Changing the latter into an indicative, the mood of *fugiat* must follow (*nemo tam expetât gloriam quam fugit ignominiam*). See Ex. 17-20. But the predicates of those comparative clauses which either contain historical facts (Ex. 21), or are merely added for the sake of describing the principal predicate, so as to have the nature of a 'parenthesis' (generally introduced by *quemadmodum*, *sicuti*, etc.), are generally not attracted, but retain their indicative, as: *Quid iratus Jupiter plus nocere potuisset quam nocuit sibi ipse Regulus?* What greater harm could angry Jove have done than *Regulus did to himself?* Cic. Off. 3, 28.—Iphicrates exercitum sic erudit ut, *quemadmodum quondam Fabiani milites Romani appellati sunt*, sic Iphicratenses apud Græcos in summâ laude fuerint; Iphicrates drilled the army in a manner that, *as once the Roman soldiers were called Fabians*, so the Iphicratians were held in the highest esteem by the Greeks. Nep. Iph. 12, 4. Clauses with the mere form of a comparative clause (*ante quam*, *post quam*) are either attracted or not; as: *De his rebus disputatum est in Hortensii villâ quum eo postridie venissemus quam apud Catulum fuissimus*; There was a discussion on this subject in Hortensius's villa when we had arrived there the day after our visit to Catulus. Cic. Ac. 2, 3. (See Ex. 22, 23.) But: (Hoc imperium) Dion ita facile percussit ut post diem tertium *quam Siciliam attigerat* Syracusas introiret; So easily did Dion crush that government that he entered Syracuse three (two) days after he had landed in Sicily. Nep. Dion. 5, 3. The same principle may often be applied to dependent clauses of any kind. See Ex. 24, 25.

OBS. 3. But the criteria given OBS. 1 and 2, are not always sufficient to determine the mood of the dependent predicate, and in many instances attractions are found in certain sentences, while in very similar sentences the predicates remain unattracted. This particularly refers to causal and relative clauses.

1) The predicates of causal clauses, although containing general truths, are often attracted in mood on account of their close logical connection with their governing predicates: *Fit autem ut, quia maxima quasi oratori scena videatur* conditionis, naturâ ipsâ ad ornatus dicendi genus excitemur; But it is certain that we are, by the very nature of circumstances, incited to a more elegant style because the platform of the people seems, as it were, an enormous stage for the speaker. Cic. Or. 2, 43, 333. In this example the clause *quia...videatur* has almost the character of an indirect statement, being represented as a cause dwelling in the imagination of the subject, and its predicate is attracted, although the clause contains a general truth. But such a conception cannot be found in the following sentence, the predicate of which remains unattracted: *Accedit ut eo facilius animus evadat ex hoc aere, quod nihil est animo v-locius*; To this must be added that the soul the more easily leaves the atmosphere of the earth, because there is nothing quicker than the soul. Cic. Tusc. 1, 19. Ex. 26.

2) Relative clauses are not subject to attraction if the statement contained in them is of an 'objective character' (the same as when they are suboblique, R. 87, OBS. 1, 2), when they denote, as it were, 'ready made ideas,' so that they often have the force of a mere substantive or adjective, as: *Omnis dicendi ratio tribus rebus est nixa, ut conciliemus nobis eos qui audiunt*; The whole plan of speaking is shaped by three points of

view, to conciliate our audience, etc. Cic. Or. 2, 27, 115.—*Epistolæ proprium est ut is ad quem scribitur de eis rebus quas ignorat certior fiat*; It belongs to the nature of a letter that the receiver is informed of what he does not know. Ib. Qu. Fr. 1, 1.—*Fieri potest ut id quod sentis polite ei qui non possit*; It is possible that he cannot express his thoughts smoothly. Ib. Tusc. 1, 3, 6. Ex. 27, 28.—But sometimes the predicates of such clauses are attracted by the governing predicate: *Multos videmus qui quod velint sine cuiusquam similitudine consequantur*; We see many who gain their ends without imitating anyone. Ib. Or. 2, 33, 98. See Ex. 25, 32. If the relative clause refers to facts which actually have transpired, the predicate always retains its own mood, as: *Di prohibeant ut hoc quod majores consilium publicum vocari voluerunt, præsidium sectorum existimetur*; Heaven forbid that the body which our ancestors ordered to be called 'Council of the People' should be considered the instrument (support) of the land-sharks. Cic. Rosc. A. 52, 151.—*Ita mihi erant cari ut eorum aspectu omnis quæ me angerebat cura cederet*; They were so dear to me that, at their sight, all the care that afflicted me ceased. Ib. Brut. 3, 10. Ex. 29-31. Thus if a present predicate denotes a past action, as: *Potest fieri ut quod te audisse dicis, numquam audieris*; It may be that you never heard the words which you say you have heard. Cic. Or. 2, 70, 85. If however the relative clause has the force of a contingent action (according to OBS. 1, b), or if it refers to an eventuality (as in Ex. 9, and 33), the predicate is attracted even if it belongs to the past, as: *Quo factum est ut Athenienses Attico omnis honores quos possent publice haberent*; Thus it happened that the Athenians publicly showed to Atticus all the honor they could. (INDEPENDENTLY: *Quocunque poterant honores habebant*.) Nep. Att. 3, 1.

3) In most instances where, according to OBS. 1 and 2, an attraction of mood should be expected, occasionally the mood remains in the indicative, as: *Non utar ista consuetudine, si quid est factum clementer, ut dissolite factum criminer*; *si quid vindictum est scire, ut ex eo crudelitatis invidiam colligam*. Cic. Verr. 2, 5, 8.

1. Agesilâus (in trajiciendo Hellesponto) tantâ celeritate usus est ut, *quod iter Xerxes anno vertente confecerat*, hic transierit trīginta diebus. Nep. Ag. 4, 4.—2. Huic uni contigit ut patriam in quâ erat natus, oppressam a tyrannis, liberaret. Ib. Timol. 1, 1.—3. Ita fcebat ut quos tu reipublicæ causâ læsseras, palam te oppugnarent. Cic. Fam. 1, 7, 1.—4. Neminem conveni quin omnes, quum te summis laudibus ad cælum extulerunt, mihi continuo maximas gratias agant. Ib. 9, 14, 1.—5. Quid potuit aliud si L. Brutus esset qui civilitatem dominatu regio liberavit? Ib. Planc. 25, 60.—6. Nemo est quin hanc affectionem animi probet quâ non modo utilitas nulla quaeritur, sed contra utilitatem etiam conservatur fides. Ib. Fin. 5, 22, 63.—7. Eiusmodi prolusio debet esse, ut ipsis sententiis quibus proluserint, pugnare possint oratores. Ib. Or. 2, 80, 325.—8. Quodsi luce quoque canes latent, quum deos salutatum aliqui venerint, eis crura suffragantur. Ib. Rosc. A. 20, 56.—9. Mos est Syracusis ut, si qua de re ad senatum referatur, dicat sententiam qui velit. Ib. Verr. 2, 4, 64.—10. Hoc maleficium ita raro existit ut, si quando auditum sit, portenti ac prodigii simile videatur. Ib. Rosc. A. 13, 38.—11. Nemo erat qui animum iudicis quocunque res postularet posset impellere. Ib. Brut. 93, 322.—12. Nullum bellum civile fuit in nostrâ republicâ in quo non, utracunque pars vicisset, tamen aliqua forma esset futura reipublicæ. Ib. ad Brut. 1, 15, 10.—13. Si, simulatque ortus esset, se quisque cognosceret, continuo videret quid esset summum bonum. Ib. Fin. 5, 15, 41.—14. Equidem soleo agere adversarii causam, ut discipulus agat suam, et quidquid de suâ re cogitarit in medium proferat. Ib. Or. 2, 24, 102.—15. Accedebat ut, quum scire ventus capissent, et se vento dedissent (naves), et tempestatem ferrent facilius, et in vadis consistenter tutius. Cæs. B. G. 3, 13.—16. Ego non committam ut, si defugerim, causam aliquam

<sup>1</sup> = *Dum annus vertit*, in the course of a year.—<sup>2</sup> to hurt.—<sup>3</sup> to attack.—<sup>4</sup> raised to the sky.—<sup>5</sup> that emotion.—<sup>6</sup> to approve.—<sup>7</sup> worldly advantage.—<sup>8</sup> is aimed at.—<sup>9</sup> contra utilitatem, with a disadvantage; at the sacrifice of worldly advantages.—<sup>10</sup> a duty is discharged.—<sup>11</sup> belongs to esse; must be so composed.—<sup>12</sup> introduction.—<sup>13</sup> thoughts.—<sup>14</sup> which they have used in the introduction.—<sup>15</sup> fight the adversary.—<sup>16</sup> in order to pay their respects to the gods.—<sup>17</sup> if any question is discussed in the Senate.—<sup>18</sup> dicat sententiam qui velit, anyone may volunteer his opinion; in Rome nobody being allowed to speak, except when invited by the chair (*sententiam rogare*).—<sup>19</sup> portenti... simile, like an event out of the regular course of nature.—<sup>20</sup> in whatever direction the case would require.—<sup>21</sup> turn the mind of the judge. *Possent* and in the next sentence '*esset futura*' are particular subjunctives peculiar to relative clauses.—<sup>22</sup> would have defeated the other, the pluperfect having the force of a future-perfect.—<sup>23</sup> was to be, i. e. in the contemplation of the party-leaders.—<sup>24</sup> ortus, to be born.—<sup>25</sup> directly.—<sup>26</sup> causam agere, to perform the part.—<sup>27</sup> case.—<sup>28</sup> in medium proferre, to bring forward.—<sup>29</sup> had committed themselves.—<sup>30</sup> storm.—<sup>31</sup> in low water.—<sup>32</sup> to stay.—<sup>33</sup> non committam ut dem, a circumlocution of the simple negative future (*I will not give; I will do no such thing as to give*).—<sup>34</sup> = *defugiendo*, by a withdrawal on my part.

tibi recusandi<sup>1</sup> dem. Cic. Or. 2, 57, 233.— 17. Quid habet populare oratio tua quum equam partem frumenti tu tibi sumpseris ac populo Romano miseris? Ib. Verr. 2, 3, 19.— 18. Macedones levibus bellis, quae exercerent<sup>2</sup> magis quam fatigarent<sup>3</sup>, sub assiduâ militiâ fuerant. Liv. 42, 5.— 19. Quum videam navem cursum tenentem suum, cum tempestate pugnem potius in profundum<sup>4</sup> ut ceteros conservarem, quam illos ad certam mortem adducam. Ib. Sest. 30, 15.— 21. Quo factum est ut Miltiades cum totidem navibus atque erat profectus<sup>5</sup>, Athenas rediret. Nep. Milt. 7, 4.— 22. Nihil habeam novi quod post accidissem quam dedi sem ad te Philogeni litteras. Cic. Att. 6, 8.— 23. Quid habet ars loci<sup>6</sup> (in hoc jocorum genere<sup>7</sup>), quum ante illud facite dictum<sup>8</sup> emissum haerere<sup>9</sup> debeat quam cogitari potuisse videretur? Ib. Or. 2, 59, 242.— 24. Quis enim ei regi non faveret (i. e. si in foro dicerem) ejus omnem aetatem in populi Romani bellis consumptam meminisset<sup>10</sup>? Ib. De J. 2, 6.— 25. Quum scribendi consuetudine ad dicendum venit<sup>11</sup>, hanc affert<sup>12</sup> facultatem ut, etiam subito<sup>13</sup> si dicat, tamquam quae dicantur<sup>14</sup> similia scriptorum<sup>15</sup> esse videantur. Ib. Or. 1, 33.— 26. Facio libenter ut<sup>16</sup>, quoniam intervallo locorum<sup>17</sup> diuncti sumus, per litteras tecum colloquar. Ib. Fam. 1, 7, 1.— 27. (Eloquendi vis)<sup>18</sup> efficit ut ea quae ignoramus discere, et ea quae scimus, alios docere possimus. Ib. N. D. 2, 59, 148.— 28. Asia tam optima<sup>19</sup> est et fertilis ut multitudo earum rerum quae exportantur facile omnibus terris antecellat<sup>20</sup>. Ib. Leg. M. 6.— 29. Adeo accensae<sup>21</sup> sunt spes, ut etiam qui obsidebantur Syracusis animos sustulerint<sup>22</sup>. Liv. 24, 35.— 30. Si reviviscant Platōis auditores qui fuerunt<sup>23</sup>, quid responderes? Cic. Fin. 4, 22, 61.— 31. Quibus rebus fidebat ut Miltiades non minus eorum voluntate imperium obtineret qui (eum) miserant<sup>24</sup>, quam illorum cum quibus erat profectus<sup>25</sup>. Nep. Milt. 2, 3.— 32. Quum habeas id quod malueris, noli desiderare id quod minoris putaris<sup>26</sup>. Cic. Plane. 20, 50.— 33. Quum tandem hoc fieri poterit, nisi homines ea quae ratione invenissent, eloquentia persuadere potuissent? Ib. Inv. 1, 2, 3.

Rem. 91. Predicates dependent on non-oblique infinitive clauses or on subject-infinitives, are sometimes placed in the subjunctive, as if by attraction, provided they stand in such a relation to the governing infinitive clause or subject-infinitive that their mood would be attracted by them if these infinitives were subjunctives. Such subjunctives may be termed subjunctives by QUASI-ATTRACTION.

Obs. 1. QUASI-ATTRACTION chiefly occurs if the governing infinitive clause takes the place of an (impersonal) subject with an impersonal predicate, such as *necesse est*, *satis est*, *difficile est*, *mos est*, or predicates containing impersonal predicate-genitives (§ 466, 2), as: *Difficile est*, in philosophia pauca esse ei nota, cui non sint aut pleraque aut omnia; It is difficult that in philosophy a few things should be known by him who does not know either most, or all. Cic. Tusc. 2, 1.— *Necesse est* ejus etiam partis propter se expeti, quod univ. um propter se expetatur; It is necessary that the parts of a thing should be desired on their own account if the whole (literally 'which as a whole') is desired for its own sake. Cic. Fin. 5, 17, 46.— *Mandare* quemquam litteris cogitationes suas qui eas nec disponere nec illustrare possit, hominis est intemperanter abutentis et otio et litteris; That a person should commit his thoughts to writing who can neither arrange nor explain them, is the mark of a man unduly wasting his time and paper. Cic. Tusc. 1, 3, 6.— We should notice that almost all these constructions are repugnant to the English idiom, and ought to be recast, which may easily be done with the above sentences. See Ex. 1, 2.

<sup>1</sup> Of excusing yourself.— <sup>2</sup> which rather kept them in practice. The subjunctive *exercerent* is peculiar to relative clauses.— <sup>3</sup> to weaken, to impair the strength.— <sup>4</sup> under continuous military routine.— <sup>5</sup> referring to *cursus*.— <sup>6</sup> follow the course, and accommodate to it.— <sup>7</sup> into the sea.— <sup>8</sup> as.— <sup>9</sup> to depart.— <sup>10</sup> what place (chance) is there left for art?— <sup>11</sup> in that class of jests.— <sup>12</sup> facite dictum, witty word.— <sup>13</sup> emissum haerere debeat, literally 'must stick after being sent forth', i. e. 'must have hit'.— <sup>14</sup> in this clause the hypothetical idea of the principal predicate 'favere' is very clearly continued, and the hypothetical clause (*si in foro dicerem*) may be applied to it in the same way, as with *favere*.— <sup>15</sup> proceeds to speaking.— <sup>16</sup> brings with him.— <sup>17</sup> extempore, without notes.— <sup>18</sup> = his words.— <sup>19</sup> like written ones.— <sup>20</sup> a circumlocution, instead of 'libenter colloquor'.— <sup>21</sup> intervallo locorum, by space.— <sup>22</sup> eloquence.— <sup>23</sup> rich.— <sup>24</sup> to excel.— <sup>25</sup> were inflamed, revived.— <sup>26</sup> kept up their spirits.— <sup>27</sup> = the hearers of Plato.— <sup>28</sup> ei qui miserant = his principals, the owners of the expedition.— <sup>29</sup> = his companions, the members of the expedition.— <sup>30</sup> This subjunctive is evidently chosen to correspond to the parallel clause 'quod malueris'. But it is also meant for a subjunctive of guarded statement.— <sup>31</sup> how.

Obs. 2. Subject-infinitives have the power of effecting a quasi-attraction, because they are always equivalent to infinitive clauses with indefinite persons understood as their logical subjects (§ 494), as: *Satis est id quod tradatur posse memoria custodire*; It is enough to be able to keep what is taught in one's memory. Cic. Or. 1, 24, 127 (i. e. *aliquem*.... *custodire*; That a person should be able to keep, etc.). See Ex. 3-5.

Obs. 3. The cause of quasi-attraction is the modal similarity in the conception of subjunctives and predicate-infinitives. Hence some languages often employ subjunctives when the Latin language makes use of a predicate-infinitive.

Obs. 4. Since clauses with predicates in the subjunctive of the second person with the meaning of an indefinite subject (R. 79, Obs. 3), may always be placed in the subjunctive, such subjunctives, wherever they occur in clauses, do not belong to any class of dependent subjunctives, but must be considered as *potential*, as: *Memoria minuitur nisi eam exerceas*; Memory is weakened unless you exercise it. Cic. Sen. 7 (Compare, however, p. 712, D).—Frequently they occur in clauses which require the subjunctive from other reasons, and in such instances these subjunctives have a two-fold force and meaning, as: *Tum illa ita scite in aureis poculis illigabat ut ea ad illam rem nata esse diceret*; At that time he inserted these things so skillfully in golden goblets, that one might have thought they were made for the purpose. Ib. Verr. 2, 4, 24. Thus such subjunctives occur where any predicate would have been in the subjunctive by attraction or quasi-attraction: *Neque est boni neque liberalis parentis, quem procreavis et educaeris, eum non et vestire et ornare*; Nor is it the mark of a good and liberal parent, to leave him whom he has begotten and brought up, without clothing and support. Cic. Or. 2, 28, 124. In the last example the indefinite person to whom the subjunctive of the second person refers, is a noun, where in English the third person must be used. But in Latin the second person may be used even in such connections, if the subjunctive is dependent on a subject-infinitive, since with a subject-infinitive the indefinite subject-accusative *aliquem* must always be supplied (§ 494), which may be replaced by 'te' in the meaning of *aliquem*. (That you should not clothe him whom you have begotten, is the mark of a bad parent.) See Ex. 6-13.

1. *Mos est* Athēnis, laudari<sup>1</sup> in contione eos qui sint in praeliis interfecti. Cic. Or. 44.— 2. *Cui proposita sit*<sup>2</sup> conservatio sui, necesse est huic partis quoque sui carae esse. Ib. Fin. 5, 13, 37.— 3. Si est oratoris, quaecunque res infinita posita sit<sup>3</sup>, de ea posse dicere, dicendum erit ei, quanta sit solis magnitudo etc. Ib. Or. 2, 15.— 4. Ingeniosi<sup>4</sup> videtur, vim<sup>5</sup> verbi in aliud atque ceteri accipiant<sup>6</sup> posse ducere. Ib. 2, 62, 254.— 5. Est boni consilis, quum cuncta auxilia<sup>7</sup> reipublicae lab. facturi videat, ferre opem patriae. Ib. Rab. 1, 3.— 6. Si in homines caros judicibusque<sup>8</sup> jucundos acerbis et contumeliosis<sup>9</sup> invehere<sup>10</sup>, nonne abs te iudices abalienes<sup>11</sup>? Ib. Or. 2, 75, 304.— 7. Non enim, sicut argumentum simulatque<sup>12</sup> positum est arripitur<sup>13</sup>, ita misericordiam<sup>14</sup> simulatque intuleris<sup>15</sup>, possis commovere. Ib. 2, 53, 214.— 8. Si, quum pro altero<sup>16</sup> dicas, causam relinquas<sup>17</sup>, nihilne nocuas<sup>18</sup>? Ib. 2, 75.— 9. Est<sup>19</sup> sive artis sive consuetudinis<sup>20</sup>, nosse regiones inter quas veneris<sup>21</sup>, ut<sup>22</sup> perestiges<sup>23</sup> quod queras<sup>24</sup>. Ib. 2, 34.— 10. Deligere oportet quem velis diligere. Auct. Her. 4, 29.— 11. Urbana dissimulatio<sup>25</sup> est quum alia dicuntur<sup>26</sup> ac sentias. Cic. Or. 2, 67, 269.— 12. Si ita non refellas<sup>27</sup>, afferendum<sup>28</sup> est quod sit<sup>29</sup> aut gravius<sup>30</sup> aut aeque grave. Ib. 2, 53, 215.— 13. Ita<sup>31</sup> dissimiles erant inter sese, statuere ut tamen non posses, utrius te malles esse similiorem. Ib. Brut. 40, 148.

<sup>1</sup> In English we use a subject-infinitive instead of the Latin infinitive clause. We may consider here the 'Mos,' as personified, laying down a rule according to which, etc. Thus the subjunctive by quasi-attraction passes over into a subjunctive of indirect statement.— <sup>2</sup> whoever is anxious of preserving his person (his 'Ego').— <sup>3</sup> indiscriminately on every subject that may be given.— <sup>4</sup> the mark of genius.— <sup>5</sup> vim verbi ducere in aliud, to apply a word to a meaning.— <sup>6</sup> aliud atque ceteri accipiant, different from the acceptance by others.— <sup>7</sup> all the resources.— <sup>8</sup> to be weakened, paralyzed.— <sup>9</sup> judicibus is an object of both caros and jucundos.— <sup>10</sup> rather abusively.— <sup>11</sup> to inveigh.— <sup>12</sup> alienate (the good will).— <sup>13</sup> at the same moment as it is introduced.— <sup>14</sup> to catch, to understand, to appreciate.— <sup>15</sup> misericordiam commovere, to awaken sympathy, or pity (with the accused) in the audience.— <sup>16</sup> at the same moment 'you have touched the string' (literally 'you have introduced it').— <sup>17</sup> another.— <sup>18</sup> relinquish, drop the case.— <sup>19</sup> it is a matter.— <sup>20</sup> experience, practice.— <sup>21</sup> = veneris.— <sup>22</sup> with the purpose of (dependent on *veneris*), or 'so as to' (dependent on *nosse*).— <sup>23</sup> perestigare, either 'to be successful in tracing up'; or 'to trace up in all directions', the prefix *per* having either meaning.— <sup>24</sup> what you are searching for.— <sup>25</sup> it is a species of elegant irony.— <sup>26</sup> supply: abs te.— <sup>27</sup> with the force of a potential future = si quis ita non refellet (refute your adversary).— <sup>28</sup> to bring forward, to offer.— <sup>29</sup> subjunctive of quality (B. VI.); a dependent future may be substituted.— <sup>30</sup> a reason of greater or equal weight.— <sup>31</sup> They were dissimilar, but so, etc.

(C) TENSES OF THE DEPENDENT SUBJUNCTIVE.

§ 602. Every independent subjunctive is placed in a particular tense, since those rules (§ 592-594) which regulate the use of the different classes of independent subjunctives, determine in each instance their tenses. But the tenses of all dependent subjunctives (whether they belong to the general or particular subjunctives, § 595), are determined by general rules referring to all of them. These rules comprise two different systems: 1) THE LAW OF CONSECUTION (*consecutio temporum*), which determines the tense of a dependent subjunctive by the tense of its governing predicate; or 2) the LOGICAL METHOD, which determines the tense of a dependent subjunctive by those rules which hold good for the tenses in the indicative mood. The tenses used according to the former system are called 'TENSES BY CONSECUTION'; those determined by the latter are 'LOGICAL TENSES'. The former are the rule; the latter the exception.

Ego meis rebus gestis hoc sum assecutus ut bonum nomen existimer; I have gained this point by my acts that I am considered a good name. Cic. Fam. 5, 6. Here the present tense of the subjunctive *existimer* is a LOGICAL TENSE, because the predicate is conceived as belonging to the author's time, and is placed in the present without any regard to the tense of the governing predicate 'sum assecutus'.—Ita vixi ut opinione vestra facile contentus essem; I have so lived that I am perfectly satisfied (that I can afford to be satisfied) with your opinion (of me). Liv. 28, 44. The imperfect tense of the subjunctive *essem* is a TENSE BY CONSECUTION, because, although it is conceived to belong to the time of the speaker, it is nevertheless placed in the imperfect by the influence of the governing perfect *vixi*.

1. Law of Consecution.

§ 603. 1. Predicates in non-preterite tenses (i. e. in the present, imperative, and the two futures) require their dependent subjunctives to be in the PRESENT OR PERFECT, the present being used if the dependent subjunctive denotes an action coincident in time with that of the governing predicate, or later than it; the perfect being used if the dependent subjunctive denotes an action preceding that of the governing predicate. This method is called 'PRESENT CONSECUTION', and hence the present and perfect are 'THE TENSES OF PRESENT CONSECUTION'. 2. Predicates in preterite tenses (i. e. perfect, imperfect, and pluperfect) require the subjunctives of their dependent predicates to be in the IMPERFECT OR PLUPERFECT, the imperfect and pluperfect being used with the same distinction as the present and perfect in the 'present consecution'. This method is called 'PRETERITE CONSECUTION', and hence the imperfect and pluperfect are called 'TENSES OF PRETERITE CONSECUTION'.

OBSERVATION. The rule about the distinction between the two tenses of the subjunctive, used in each of the two classes of consecution, must be qualified in regard to governing predicates in the future and in the pluperfect. 1. If the principal predicate is in the future, the dependent subjunctive denoting an action anterior to it, is not always in the perfect. This tense is used only if the action is at the same time anterior to the speaker's time (Ex. C. a, 1), or if it has the force of a subjunctive of the future-perfect:

else the present subjunctive must be used (Ex. C. a, 2). 2. Pluperfect subjunctives dependent on a governing pluperfect generally refer to a time prior to the latter; but in some rare connections they may refer to a subsequent or coincident time (p. 435, 3). Pluperfect subjunctives dependent on any preterite tense, if they have the force of a subjunctive of the future-perfect (p. 453, 2), always refer to a time subsequent to the time spoken of. Whether any predicate is to be considered as anterior to or coincident in time with the governing predicate, must often not be determined by the English use of tense, but by the Latin way of thinking. Both ways are sometimes different (see R. 42; R. 43; R. 60, Obs. 4, and Ex. under A, a, 2.)

§ 604. In the following sentences, examples of all the different combinations of finite predicates in regard to the law of consecution are given. It will be noticed that often the English tense applied to the dependent predicates is wholly different from that in which the Latin subjunctives are placed.

A. PRESENT as governing predicate.

(a, THE DEPENDENT SUBJUNCTIVE PRIOR TO THE GOVERNING PREDICATE.) 1. Scis quam graviter inimici illi Q. Scaevola faciant; You know how intensely inimical those men were to Q. Scaevola. Cic. Fam. 1, 9, 26.—2. Quidam numquam magis, quam quum erubuerint, timendi sunt; Many are never more formidable than when they blush (have blushed). Sen. Ep. 11.—(b, COINCIDENT TIME.) Tu, quum Hannibal in Italiâ sit, relin-quere Italiâ paras; You, however, are preparing to leave Italy while Hannibal is in Italy. Liv. 28, 42.—(c, THE DEPENDENT SUBJUNCTIVE BEING LATER.) Hortor te ut Ro-mam properes; I exhort you to hasten to Rome. Cic. Qu. Fr. 1, 3, 4.

B. IMPERATIVE as governing predicate.

(a, PRIOR.) Attende quae sunt consecuta; Hear what followed. Cic. Fam. 1, 9, 15.—(b, COINCIDENT.) Quum compar consilium tuum parentis tui consilio sit, reputa; Con-sider how similar your measures are to the measures of your parent. Liv. 28, 42.—(c, LATER.) Cura ut quam primum venias; Take care (do not fail) to come as soon as pos-sible. Cic. Fam. 4, 16.

C. FUTURE-PRESENT as governing predicate.

(a, PRIOR.) 1. De sacerdotio tuo quantum curam adhibuerim, cognosces ex eis litteris quas Thraseus dedit; How great care I took in your sacerdotal affair, you will learn from the letter I forwarded by Thraseus. Cic. Fam. 2, 7, 3.—2. Ostendam paullo post qui sit meus sensus; I shall show by and by what my sentiment is. Ib. 1, 9, 2.—(b, COIN-CIDENT.) Videmus uter vincat; We shall see which of the two will be the victor. Sen. Ep. 13.—(c, LATER.) Venerum tibi opellam quem tecum ex templo domum ducas; I will provide a substitute for you, whom you will directly take home with you. Liv. 29, 1.

D. FUTURE-PERFECT as governing predicate.

(a, PRIOR.) Si causam quae me impulerit acceperitis; If you will have heard the cause which has induced me. Cic. Or. 2, 87, 355.—(b, COINCIDENT.) Si Gaditanî seceverint de aliquo cive Romano ut sit civis Gaditanus; If the people of Gades pass a resolution in regard to a Roman citizen, that the same should be a citizen of Gades. Cic. Balb. 11, 27 (= if they pronounce him to be, etc.).—(c, LATER.) Si quem cui recte committam invenero; If I find a person whom I may safely entrust (with the letter). Cic. Fam. 1, 9, 23.

E. PERFECT as governing predicate.

(a, PRIOR.) Scipio in senatu disseruit quas gentes in ditionem populi Romani rede-cesset; Scipio reported in the Senate what nations he had brought under the rule of the Roman people. Liv. 28, 38.—(b, COINCIDENT.) 1. Agathocles, quum diu Sicilia bello ureretur, transgressus in Africam eei; Agathocles crossed over to Africa at a time when war had been raging in Sicily for a long time. Liv. 28, 43.—2. Lætatus sum quod mihi liceret recta defendere; I was glad that I was permitted to defend the right. Cic. Fam. 1, 9, 18.—(c, LATER.) 1. Commisi ut me vivo careres; I have acted so that you are de-prived of me although I am alive (i. e. that I am dead for you). Cic. Qu. Fr. 1, 3, 2.—2. Orgetorix civitati persuasit ut de finibus suis exirent; Orgetorix persuaded the in-habitants to leave (that they should leave) their country. Cies. B. G. 1, 2.—3. Reguli, priusquam tota circumveniretur acies, inter tumultum elapsi sunt; The princes escaped amidst the disorder before the whole army had been (was) surrounded. Liv. 28, 33.—4. Scipio paucos moratus est dies dum imperatam pecuniam Hergetes pernumerarent; Scipio stood a few days till the Hergetes had paid the whole sum to which they were condemned. Ib. 28, 34.

F. IMPERFECT as governing predicate.

(a, PRIOR.) Docuit Caesar ut omni tempore totius Galliae principatum Aedui tenuis-sent, prius etiam quam nostrum auxilium petissent; Caesar explained how the Aeduans in all times had held the supremacy over the whole of Gaul, even before they had ap-plied for our help. Cies. B. G. 1, 43.—(b, COINCIDENT.) 1. Sentiebat miser jam quid

*ageretur*; The unlucky boy felt already what was the matter. Cic. Qu. Fr. 1, 3, 3.— 2. *Paucis diebus eram missurus* (epistolary tense) domesticos tabellarios, ut totius aestatis res gestas ad senatum perscriberem; I am to send in a few days (a letter by) my private carriers, that I may comprise in the letter to the Senate the events of the whole summer. Cic. Fam. 2, 7, 3.— (c, LATER.) *Explorabant Galli unde belli initium fieret*; The Gauls were making inquiries where the war was to commence. Cæs. B. G. 5, 53.

G. PLUPERFECT as governing predicate.

(a, PRIOR.) *Quæ proposita fuerant nobis quum honoribus amplissimis perfuncti essemus*, ea jam sublata tota sunt; What had been our aims after we had been in the highest offices, all that is now wholly demolished.— (b, COINCIDENT.) *Quum inambularem in xysto, M. ad me Brutus venerat*; M. Brutus had come to me when I was walking on the portico. Ib. Brut. 3, 10.— (c, LATER.) 1. *Hannibal scalas quibus scanderet muros non attulerat*; Hannibal had not carried with him any ladders by which to scale the wall. Liv. 29, 7.— 2. *Præ recursum semper ad navis erat quam clamor agrestis conciret*; They had always returned to their ships before the alarm had been given to the country-people. Ib. 29, 28.

For the use of the 'present consecution' with predicates dependent on historical presents, see R. 45, OBS. 3.

§ 604. If subjunctives are next-dependent on a predicate which is again dependent on another predicate, they follow that kind of consecution which is required by the tense of the *next* (INTERMEDIATE) predicate on which they depend, not that consecution which may be required by the FURTHER (REMOTE) predicate by which the intermediate predicate is governed. This rule is peremptory if the intermediate predicate be FINITE (for particular exceptions see § 606, OBS. 4), as:

*Nihil ultra malorum est quam quod passi sumus* ut, ad ultimum, fidem vobis præstaremus; No evils are worse than those which we have suffered to keep our allegiance to you to the very last. Liv. 28, 39. The consecution of *præstaremus* is PRETERITE, being determined by the intermediate finite predicate *passi sumus*, not by the further predicate *est*.

But if the intermediate predicate is NON-FINITE (P. I., p. 227), the consecution of the dependent subjunctive is determined by the (logically) nearest *finite* predicate on which the non-finite predicate depends, *except* if in the intermediate non-finite predicate a *preterit* tense is implied. (Rem. 92 and 93.)

EXPLANATION. Grammatically every predicate is *finite* by necessity (§ 19); but logically all those words are considered as predicates which have virtually the functions of finite verbs, and may be represented by such. Here belong all predicate-infinitives, all accessory predicates, all predicate-ablatives, participles, supines, adjectives (§ 496), and verbal nouns.

Rem. 92. If subjunctives are next-dependent on object-infinitives, participles (either direct participles or ablatives absolute), supines, gerundial phrases, or gerunds absolute, their consecution is not determined by these 'intermediate' predicates, but by the finite predicate on which those intermediates depend. The same is the case if they depend on nouns, adjectives, or subject-infinitives.

*Cæsar quæ esset insule magnitudo reperire non poterat*; Cæsar could not find out what was the size of the island. Cæs. B. G. 4, 20. The imperfect of *esset* is a tense of *preterite* consecution, not according to the intermediate present object-infinitive *reperire*, on which it next depends, but according to the finite predicate *poterat*.—*Securi percussi sunt*, adeo torpentibus metu qui aderant ut ne gemitus quidem exaudiretur; They were beheaded, those that witnessed the execution being so paralyzed with terror that not even a groan was heard. Liv. 28, 29. The consecution of *exaudiretur* is not determined by the next participial predicate, but by *percussi sunt*, the finite predicate on which *torpentibus* depends. See Ex. 1-5.

But if the participle is a PERFECT, the consecution of the subjunctive dependent on it is not determined by the governing finite predicate, but the subjunctive takes the same tense which it would have if the perfect participle were a finite perfect (see OBS. 1).

OBS. 1. Hence subjunctives dependent on perfect participles have generally *preterite* consecution, as: *Mittuntur ad Cæsarem ab Cicerone litteræ magnis propositis præmiis si pertulissent* (not *pertulerint*); Letters are (were) sent by Cicero to Cæsar after great rewards were promised (to the messengers) in the event that they would safely deliver them. Cæs. B. G. 5, 40. Here the consecution of *pertulissent* (which has the force of a future-perfect) is not determined by the governing finite predicate *mittuntur*, which would admit of *present* consecution (*pertulerint*), but by *propositis*, which, if finite, would require *preterite* consecution.—*Quem cupiditatum incendiis inflammatum* in eis potendis quæ acerrime concupivisset, tantâ lætitiâ perfundi arbitramur quantâ Africanum Hannibale victo? What person inflamed by the fire of desires in gaining what he ardently wishes, do we think to be pervaded etc.? Cic. Fin. 5, 24, 70. The tense of the subjunctive *concupivisset* is not determined by the finite predicate *arbitramur* (as it would be according to the teachings of our grammarians, but which would require *concupiverit*), but by the perfect participle *inflammatum*. If the participle is changed into a finite perfect *inflammatus est*, it would, according to the general rule in Rem. 66, OBS. 5, require a *pluperfect* indicative, which, by being made a suboblique predicate must become a subjunctive, and hence according to the present rule a subjunctive of the pluperfect.

OBS. 2. If the perfect participle on which a subjunctive depends, is governed by an infinitive clause (as in 2d example OBS. 1), the subjunctive will be in the perfect if, *without the infinitive clause*, it would be a perfect indicative, as: *Volo autem hoc perspicere, omnibus conquestis qui in multitudinem dicere ausi sint, memoriâ dignos perpaucos fuisse*; But I wish this to be understood, that, if all be taken together who had the courage to address the people at large, there were but very few worthy of being remembered. Cic. Brut. 69, 244. The predicate *ausi sint*, if taken out of the infinitive clause, would be a perfect indicative (*sic omnes conquesti sunt qui ausi sunt*); being changed into a suboblique predicate, it must retain the same tense according to the rule above. For the reason of this rule see R. 93, OBS. 1. For an exception to it see R. 94, OBS. 6.

OBS. 3. Sometimes, but rarely, the *present* consecution is used with subjunctives next-dependent on present participles, if the governing finite predicate is a preterit, as: *Dictator sacrorum causâ Romam revocatus est*, consilio ac prope precibus agens cum magistro equitum ut plus consilio quam fortunæ confidat, et se potius ducem quam Sempronium imitetur. Liv. 22, 18.

1. *Neque cognoscendi quid fieret* neque sui colligendi hostibus facultatem relinquunt (hist. pres.). Cæs. B. G. 3, 6.— 2. *Hannibal cum equitibus Numidis circumquiritat* (hist. pres.) urbem ad visendum<sup>1</sup> qua maxime<sup>2</sup> parte<sup>3</sup> aggrediretur. Liv. 29, 7.— 3. *Hannibal corâs in aciem eduxit*, hancquâquam dubius quin (but that) multo minus exercitum Romanum sustineret<sup>4</sup>. Ib. 25, 19.— 4. *Legati venerunt questum<sup>5</sup> quod Hannibales finis eorum popularentur*. Cæs. B. G. 1, 37.— 5. *Servius Romam rediit haud dubius rex<sup>6</sup>, seu patrum<sup>7</sup> seu plebis animos periclitaretur<sup>8</sup>*. Liv. 1, 42.— 6. *Hannibal, nuntio premisso<sup>9</sup>, ut sui prælium consererent<sup>9</sup> dum ipse urbem aggrediretur*, ceptam invenit pugnam. Liv. 29, 7.

Rem. 93. The same principle is applied to subjunctives dependent on INFINITIVE CLAUSES.

1. If the predicate-infinitive is NON-PRETERITE (present, or the future infinitive *fore*) the consecution of the dependent subjunctives is determined by the governing *finite* predicate, being the *present* consecution if the latter is non-preterite, and the *preterite* consecution if the latter is preterite.

*Credo ego, mirari vos quid sit quod ego potissimum surrexerim*; I believe you wonder what is the reason that just I should have arisen. Cic. Rosc. Am. 1, 1.— *Non dubitari id a te per litteras petere quod mihi omnium esset maximum*; I have not hesitated

<sup>1</sup> To examine.— <sup>2</sup> maxime aggrediretur, should make the chief attack.— <sup>3</sup> side.— <sup>4</sup> to compare.— <sup>5</sup> accessory predicate; supply *futurus*; unquestionably the future king.— <sup>6</sup> Patricians.— <sup>7</sup> whether he would try the disposition of, etc.; whether he would apply to, etc.— <sup>8</sup> to send in advance.— <sup>9</sup> to commence the battle.

(do not hesitate) to ask of you by letter what, for me, is the most important object of all. Ib. Fam. 2, 6, 2. See Ex. 1-7.

2. If BOTH the predicate-infinitive and the governing finite predicate are PRETERITES, the consecution of the dependent subjunctive is regularly the *preterite* consecution (for exceptions see OBS. 7), as:

Neminem ad eam diem triumphasse qui sine magistratu rem gessisset, constabat; It was known that up to that day nobody had triumphed (to nobody a triumphal entry was granted) who had conducted the war without being in (a curule) office. Liv. 28, 38. Ex. 8.

3. If the predicate-infinitive is PRETERITE, the governing finite predicate being NON-PRETERITE, the subjunctives dependent on the former have the same tense as they would have if their governing perfect infinitive were changed into a FINITE PERFECT. See OBS. 1.

OBS. 1. In order to apply Rule No. 3 correctly, all the subjunctives dependent on a predicate-infinitive must be divided into 'ORIGINAL SUBJUNCTIVES' and 'MERELY SUBOBLIQUE'. The former comprise all those subjunctives which would be in this mood even if their governing infinitive were a finite perfect, as all predicates of dependent interrogative or imperative clauses, all those governed by conjunctions requiring the subjunctive (*ut, ne, quo, quin, quum* causal, *quum* temporal in certain connections, *quoniam, licet*, etc.), and all other 'particular' subjunctives (B. VI.). The latter are those which are placed in this mood merely because, as suboblique predicates, they are made dependent on an infinitive clause, and which, but for this reason, would be in the indicative. All 'original' subjunctives, when dependent on predicate-infinitives in the perfect, are strictly treated according to the law of *preterite* consecution, whereas the 'merely suboblique' subjunctives retain that tense in the subjunctive which they would have in the indicative if the infinitive clause be changed into a finite sentence. Tenses treated according to this method may have the appearance of a *preterite* consecution (if the original tense of the dependent predicates is an imperfect or pluperfect), or it may be virtually a *present* consecution (if their original tense is a present or perfect)\*.

Mihi quidem Homerus hujusmodi quiddam vidisse videtur in eis que de Sirēnum cantibus finxerit; It seems to me that Homer has seen something of the kind in that which he states (in his fictions) on the Siren songs. Cic. Fin. 5, 18, 49. Here 'finxerit' is a 'merely suboblique' subjunctive, being an 'original' perfect-indicative; 'Homerus vidit quiddam ejusmodi in eis que finxit.' This perfect finxit is changed into its own subjunctive by being made suboblique, without any regard to the governing finite predicate. It would be the same if it had assumed *present* consecution.— Illud miror adduci te potuisse, qui me penitus nosse deberes, ut existimares me tam improvidum; I wonder that you, who ought to know me entirely, could (should) have been induced to believe me so imprudent. Cic. Fam. 1, 16, 1. Debères is 'merely suboblique,' since the independent construction would be 'Adduci potuisti (tu) qui me penitus nosse debebas (R. 79, OBS. 5). Hence debebas is changed into its own subjunctive debēres, which gives to it the appearance of *preterite* consecution, which it is not. Since in place of debebas the indicative might have been either debuisti or debueras (R. 79, OBS. 5, d), it would have been as proper to use debueris or debuisses instead of debēres, the former of which would have given it the appearance of *present* consecution. On the other hand existimares, being a particular or 'original' subjunctive, governed by ut, is subject to the law of *preterite* consecution in consequence of the perfect potuisse. It would have the same tense and the same mood in independent construction, 'Adduci potuisti ut existimares.'— Dico Luculli adventu urbem Cyzicēnorum obsessam esse quam L. Lucullus liberavit, pat-factumque nostris legionibus esse Pontum, qui antea populo Romano clausus fuisset; I say that at the time of Lucullus's arrival the capital

\* The reason for this difference in the treatment of the two classes of subjunctives is plain. The 'merely suboblique' subjunctives are 'original indicatives', and their relation to the tense of their governing predicate is an 'indicative' relation; hence their governing infinitive can affect their tense so far only as it would in the indicative; whereas the 'original' subjunctives take the mark of tense from their governing predicates by the same grammatical act as they take the mark of mood, a linguistic fact which the language represents under the grammatical form of *tense-consecution*. Hence the tenses of the 'merely suboblique' subjunctives are not tenses by *consecution*, but *logical* tenses. They strictly do not belong to the law of consecution, but to the next section, being treated here merely on account of their close connection with *tense-consecution*.

of the Cyzicēni, which L. Lucullus released, was besieged, and that Pontus was opened to our legions, which had been closed to the Roman legions before. Cic. L. Man. 8, 20. The independent construction would be: 'Cyzicēnorum urbe, quam Lucullus liberavit, clausa est; Pontus patefactus est qui clausus fuerat or fuisset.' Hence the perfect liberavit must take its own subjunctive liberārit, and fuerat its own subjunctive fuisset, the former having the appearance of *present* consecution, and the latter that of *preterite* consecution; but fuisset may be taken as an 'original' subjunctive of 'pregnant relative construction' (see B. VI.), and would then be a tense 'by consecution.' See Ex. 9-20.

OBS. 2. Sometimes, as in the second example of OBS. 1, the tense of the dependent subjunctive may be as properly a perfect as an imperfect (or sometimes even a pluperfect), namely if in independent construction the indicative of either tense would be admissible, or both a subjunctive or an indicative would be correct: Doleo me, priusquam confectum iter sit, in hanc reipublice noctem incidisse; I am grieved that I have fallen into this night of the republic before my journey is at its end. Cic. Brut. 96, 230. The subjunctive confectum sit may be properly changed into confectum esset or conficeretur, since in independent construction either mood would be correct, 'Incidi priusquam iter confectum est (perf.) or priusquam confectum esset (both as periphrastic imperfect, or with the force of a subjunctive of the future-perfect), or priusquam conficeretur' (see B. VI.). Ex. 22-25.

OBS. 3. If the clause does not depend on the predicate-infinitive, but directly on the governing finite verb, the tense of the subjunctive is, of course, determined by the finite predicate, and not by the predicate-infinitive. But often such subjunctives are so arranged that they have the external appearance of predicates dependent on the infinitive clause; I triumpho falsum est, et ob vacationem pretium datum esse, quum immūnis nemo fuerit, I triumph because a bribe should have been paid for the exemption, since no one was exempt, and (that a bribe was paid) for the approbation, since many items did not pass probatum. Cic. Font. 8, 17. Here both clauses, 'quum... fuerit,' and 'quum... improba sint' are dependent on 'falsum est,' not on 'pretium datum esse'. Hence they are determined by *present* consecution. If dependent on 'datum esse' they would have required the *pluperfect*, quum causal requiring the subjunctive. See Ex. 21.

OBS. 4. If the predicate-infinitive is a passive, and must be considered as a periphrastic present (p. 128, R. 128), the rule of R. 93, No. 3, does not apply, and the tense of the dependent subjunctive is solely determined by the governing finite present according to R. 93, No. 1, as: Argat Demosthenes in eo positus esse fortunam Græciæ, hoc an illo verbo usus sit, hoc an illic manum porrexit; Demosthenes says that the fate of Greece does not depend on what kind of words he used, or on the direction which he gave to his hand in speaking. Cic. Or. 8, 27. If positus esse were a perfect infinitive, the dependent subjunctives usus sit and porrexit, as 'original' subjunctives of indirect question would be in the *pluperfect*. See Ex. 26.

OBS. 5. The rule R. 93, No. 3, applies only to subjunctives immediately dependent on perfect infinitives, and not to subjunctives which depend next on a clause with a present-infinitive, which again is dependent on a clause with a perfect-infinitive. To these the *preterite* consecution is applied: Paulo post esse ferunt nuntiātum Simonidi, juvenes stare ad januam duo quosdam, qui eum magnopere evocarent; It is reported that two young men at the door who soon afterwards Simonides was informed that there were two young men at the door who urgently wished him to be called out. Cic. Or. 2, 86, 353. Here the subjunctive evocarent is not made suboblique by nuntiātum est, but by the clause 'juvenes stare,' and thus in reference to 'nuntiātum est' is an 'original' subjunctive. Hence it must have *preterite* consecution according to OBS. 1. See Ex. 27.

OBS. 6. Perfect-verbs with present signification (§ 242) require the tenses of their dependent predicates to have *present* consecution. But memini, which takes its dependent infinite clauses, referring to past actions, with predicate-infinitives in the present, is in this instance considered as a real perfect, and requires the subjunctives directly or indirectly dependent on such present-infinitive clauses to have *preterite* consecution, according to R. 94, No. 2 (first rule), as: Tum illum mihi respondere memini, illud im-probasse hominibus, quod narrant ei pro quo quisque dicere: I remember that he then answered that it was the mark of a wicked man to say what might be injurious to his client's defence; to the one for whom he was pleading. Cic. Or. 2, 73, 297. See Ex. 29.

OBS. 7. There are several instances in which tenses are used that deviate from those tenses which should be expected according to the rules in Rem. 93:

(a) In OBLIQUE DISCOURSE (oratio obliqua, B. VI.), all the predicates dependent on infinitive clauses (both with *present* and with *perfect* predicate-infinitives) may be placed

in those tenses which the speaker introduced would use in direct discourse, as: *Tantum (dicēbant) esse furōrem ut ne Suesiones quidem, qui eodem jure utantur, deterrēri potuerint*; *They said...* that their madness was such that not even the Suesiones, who were using the same laws, could be kept from, etc. *Cæs. B. G. 2, 3.* Here, according to *Rem. 93, No. 1.* preterite consecution should have been used; but the subjunctives *utantur* and *potuerint* are in the present and perfect, because the speakers, in direct discourse, would have said *utuntur* and *potuerunt*.—Tradidēre quidam, *responsū* ab senātu esse... tunc Rhodios legationem misisse post quam transgressos in Macedoniam Romanos audierint; Some have reported, that the answer was given by the Senate... the Rhodians had sent ambassadors at a time when they had heard that the Romans had crossed the Macedonian frontier. *Liv. 45, 3.* The perfect subjunctive *audierint* is used because the Senate in direct discourse would have said *audierunt*. According to *R. 93, No. 2,* *audissent* should have been used. See *B. VI.*

(b) The latitude allowed in oblique discourse (*No. a*) is often extended to ordinary indirect statements, not strictly belonging to oblique discourse. This usage is frequently found in the historians, but very rarely in Cicero, and other philosophical writers: Dictator Manlius *jure casum (esse) pronuntiavit*, etiamsi regni crimine insons fuerit, qui vocatus a magistro equitum ad dictatorem non *venisset*; The dictator declared that the killing of Manlius was legal, although he might have been innocent of high treason, since he had not obeyed the summons of the vice-dictator (literally: who had not come summoned by the master of the horse). *Liv. 4, 15.* [In direct statement, the dictator would have said: *Jure casus est, etiamsi insons fuit, qui (= quum) non venisset* (or *renerat*). The rule in *Rem. 93, No. 2,* would require *fuisse* or *esset*]—Qui docere vellet nihil ita signari in animis nostris a vero posse, quod non eodem modo possit a falso; Who intended to show that nothing can be thus imprinted in our souls by truth which cannot likewise be imprinted by falsehood. *Cic. Acad. 2, 22, 71.* [According to rule *Rem. 93, No. 1,* 'possit' is required; but 'possit' is likewise correct, since the direct statement would be 'nihil signari potest quod non eodem modo potest, etc.'].—Sometimes this exceptional 'consecution' is used where, at first sight, the tense employed might seem strangely out of place, when on closer examination the exceptional form appears to be used with great significance and perfect consistency: Ego hac omnia Chrysogonum fecisse dico, ut *ementiretur*, ut malum civem Roscium fuisse fingeret, ut eum apud adversarios occisum esse diceret, ut hisce de rebus a legatis Amerinorum doceri L. Sullam passus non sit; I assert that Chrysogonus committed all these misdeeds, namely to lie, to say against his better knowledge that Roscius was a bad citizen, to say that he had been killed in the enemy's camp, and not to allow Sulla to be informed of these affairs by the Amerian embassy. *Cic. Rosc. A. 44, 127.* Here the perfect *passus sit* is a stumbling block to our interpreters, and Ernesti corrected '*pateretur*.' But Cicero, in this whole passage, did not use tenses according to (preterite) consecution, but logical tenses. In direct statement he would have said: Chrysogonus *ementiebatur* (imperf. of repeated action), malum civem R. fuisse fingebat (imp. of progressive action), eum apud adversarios occisum dicebat (according to *R. 70, Obs. 3,* doceri Sullam *passus non est* (a momentary act with reference to a point of time). The same tenses are used with perfect consistency and significance in giving to these sentences the form of indirect statement. By using grammatical consecution, the difference in the nature of these actions would have been completely effaced. *Ex. 29-32.*

(c) Logical tenses of the dependent subjunctives may be used in this construction (*R. 93*), if the use of such tenses would be admissible according to the general rules in *Rem. 94.* Thus we find a present consecution, where, according to the rules of *R. 93,* a preterite consecution should be expected, if either the governing finite preterite, or the preterite predicate-infinitive logically includes a present tense, *R. 93, Obs. 2,* as: *Cæsar ad me scripsit* (i. e. scripsit et nunc judicat) *gratissimum sibi esse quod quærim* (the grammatical consecution would have required *quæressem*); *Cæsar* has written to me that my remaining inactive was (had been) very satisfactory to him. *Cic. Att. 8, 11.*—*Credo ego vos audisse* (i. e. audisse et nunc scire), quemadmodum presidia Romana ab Siculis circumventa et oppressa sint per hos dies (STRICT GRAMMATICAL CONSECUTION: *circumventa essent*, as periphrastic imperfect, or *circumvenirentur*, as ordinary imperfect); I believe that you have heard how the Roman garrisons during these days have been entrapped and surprised by the Sicilians. *Liv. 24, 38.* It is very rare, that, aside from these instances (*No. a, b, c*), logical tenses are used in clauses dependent on predicate-infinitives, as: In Alcibiade, natura quid efficere possit (instead of *posset*) videtur experita. *Nep. Alc. 1.*

1. Difficile est amicitiam manēre si a virtute defeceris. *Cic. Am. 11, 37.*—2. Ego non de-pēro, fore aliquem aliquando qui, quum se ad audiendum, legendum, scribendumque dederit, persistat talis orator, qualem querimus. *Ib. Or. 1, 21, 95.*—3. Valde sus-

<sup>1</sup> Deficere ab aliquā re, to fall away from something, to abandon, to forsake something. —<sup>2</sup> to devote one's self. *Dederit* has the force of a subjunctive of the future-perfect. See § 607.—<sup>3</sup> as we are seeking, i. e. as we want (need).

picor fore ut *infringatur* hominum improbitas consiliis tuorum amicorum. *Ib. Fam. 1, 6, 1.*—4. Responsum est, in ditionem ita accipi eos si belli concitores tradidissent. *Liv. 29, 3.*—5. Numquam mihi defuturam orationem, qua exercitum meum alloquerer, credidi. *Ib. 28, 27.*—6. Nonnulli Cæsari nuntiabant, quum castra moveri jussisset, non fore dicto audientes milites. *Cæs. B. G. 1, 39.*—7. Non speraverat Hannibal fore ut tot in Italia populi ad se deficerent. *Liv. 28, 44.*—8. Cæsar cognovit. Considium quod non vidisset pro viso sibi renuntiasset. *Cæs. B. G. 1, 22.*—9. At mens familiaris, eandem causam Alexandrinis fuisse cur laudarent Gabinium quæ mihi fuerit quum eundem defenderem. *Cic. Rab. Post. 12, 32.*—10. Equam civitatem pulchris (illo tempore) pacatam fuisse, quæ (nunc) locuples sit? *Ib. Leg. Man. 23, 67.*—11. Conflatis necesse est, te opinionem multum fefellisse quod existimaris me causam Cluentii lege defensurum. *Ib. Clu. 61, 169.*—12. Ipse se insanisse conflatur quod suam pecuniam regi crediderit. *Ib. Rab. Post. 9, 25.*—13. Tu non vides, ipsum illum Aristotelis discipulum, postquam rex appellatus sit, superbum, crudēlem, immoderatum fuisse? *Ib. Att. 13, 28, 3.*—14. Illud dico, me, ut primum in contione provinciam deposuerim, statim, quemadmodum eam tibi traderem, cogitare cœpisse. *Ib. Fam. 5, 2, 3.*—15. Ne illud quidem intelligunt, ita memoriæ proditum esse, quum Demosthenes dicturus esset, ut concursus audiendi causā ex tota Græciā fierent. *Ib. Brut. 84, 289.*—16. Dionysium ferunt edixisse, ut quod quisque de sacris haberet, id ante diem certam in suum quidque fanum referret. *Ib. N. D. 34, 54.*—17. Medeam prædicant, in fugā fratris sui membra in eis locis qua se parens persequeretur dissipavisse. *Ib. Leg. Man. 9, 22.*—18. Eam suspicionem propter hanc causam credo fuisse quod Fannius in mediocribus oratoribus habitus esset, hæc oratio autem vel optima esset omnium. *Ib. Brut. 26, 100.*—19. Sunt qui propter adjectum Equorum Volcorumque bello Vejens bellum, quia duo consules obire tot simul bella nequeunt, tribunos militum trīs creatos esse dicant. *Liv. 4, 7.*—20. Socrates dicit, Periclem præstitisse ceteris oratoribus, quod is Anaxagoræ fuerit auditor, a quo cum, quum alia præclara quædam didicisset, fuisse gnarum quibus orationis modis quæque animorum partes pellerentur. *Cic. Or. 4, 15.*—21. Cnidum, Colophonem, aliasque urbis captas esse commemorare, quum vestros portus in prædonum fuisse potestare scitis? *Ib. Leg. Man. 12, 33.*—22. Videtis mihi tantum juris civilis scire voluisse, quantum satis esset oratori. *Ib. Brut. 45, 150.*—23. Quum tu Solem quia solus esset appellatum esse dicas, Soles ipsi quam multi a theologis proferuntur! *Ib. N. D. 21, 54.*—24. Nisi forte censes, Gracchum beatiorē fuisse quam filium, quum alter stabi-

<sup>1</sup> Infringi, to receive a blow, to be checked.—<sup>2</sup> abettors.—<sup>3</sup> plup. subj. with the force of a subjunctive of the future-perfect. See § 607.—<sup>4</sup> language.—<sup>5</sup> = future-perfect.—<sup>6</sup> ad aliquem deficere, to desert to somebody, i. e. to join somebody after deserting another (the Romans).—<sup>7</sup> as if he had seen it.—<sup>8</sup> to report.—<sup>9</sup> friend.—<sup>10</sup> the Romans called a city or country 'pacata', when it was in their power, or subjected by them.—<sup>11</sup> locuples esset would be an original subjunctive referring to the time of *fuit*, according to the rules of 'relative subjunctives' (*B. VI.*); independently: Quæ (nulla) civitas, quæ locuples esset, pacata fuit? 'Locuples sit' is merely suboblique (independently: civitas, quæ nunc locuples est). The sense is: 'No city, then in our power, is now rich.'—<sup>12</sup> opinio me multum fallit, my opinion deceives me much; i. e. it is a great mistake on my part.—<sup>13</sup> under the law, i. e. with reference to the existing laws (opposed to 'equity').—<sup>14</sup> insanire, to be insane.—<sup>15</sup> credere alicui pecuniam, to loan somebody money without security.—<sup>16</sup> regem appellari, to be called king, i. e. to be acknowledged as king, to become king.—<sup>17</sup> as soon as, requiring the perfect indicative in direct statement.—<sup>18</sup> provinciam in contione (i. e. militum) deponere, to lay down the government of the province before the assembled army, i. e. to deliver one's farewell address to the army.—<sup>19</sup> was to speak.—<sup>20</sup> how.—<sup>21</sup> concursus fuit, literally 'gatherings are made', i. e. people flock together, gather in crowds.—<sup>22</sup> sacra, sacred things, i. e. objects belonging to religious worship.—<sup>23</sup> suum quidque fanum; That temple to which each thing belonged.—<sup>24</sup> The writers extol the fact (with regard to Medea's ingenuity).—<sup>25</sup> relative locative adverb of the 4th case, instead of 'per quæ'.—<sup>26</sup> The indicative dependent on *dissipabat* would be 'persequeretur' (with a future force, *Rem. 53, Obs. 2*). It might also be taken as 'suboblique' from the 'mind' of Medea instead of 'qua se persequi existimaret', in which instance the subjunctive would be an 'original one'. The use of *se* shows that the author probably took the clause in this way.—<sup>27</sup> to disperse.—<sup>28</sup> among the orators of middle rank.—<sup>29</sup> See p. 199, *Obs. 3.*—<sup>30</sup> Vejentian.—<sup>31</sup> tot simul bella obire, to have so many wars on their hands at once.—<sup>32</sup> an 'involved' relative construction (See *B. VI.*). A quo refers only to 'didicisset', not to 'gnarum fuisse'. Render by a co-ordination: 'And he believes that, while he had learned from him, etc., he was in possession of the knowledge (he knew by what etc.)'—<sup>33</sup> rhetorical means.—<sup>34</sup> each faculty of the soul.—<sup>35</sup> to incite, to operate upon.—<sup>36</sup> Sol (the god).—<sup>37</sup> the principal sentence is elliptical (I must answer that a great number of Soles are mentioned by the theologians).

ire rempublicam studuerit<sup>1</sup>, alter evertere. Ib. Fin. 4, 24, 65.—25. *Scis me quodam tempore Metapontum venisse tecum, neque ad hospitem ante devertisse<sup>2</sup> quam Pythagoras ipsum illum locum ubi vitam ediderat<sup>3</sup>, sedemque viderim.* Ib. 5, 2, 4.—26. *Nego rem esse ullam in quemquam objectam<sup>4</sup> quae Fidiculanio objecta non sit, aliquid fuisse in Fidiculanii causâ quod idem non esset in ceterorum.* Ib. Clu. 41, 113.—27. *Responsum esse ferunt per Atialum regem, Romanos compotes<sup>5</sup> ejus fore quod peterent.* Liv. 29, 11.—28. *Te memini, quum cuîdam clarissimo atque optimo viro supplicationem<sup>6</sup> non decerneret<sup>7</sup>, dicere te decretum si referretur<sup>8</sup> ob eas res quas is consul in urbe gessisset.* Cic. Fam. 15, 4, 11.—29. *Legati venerunt nuntiantes, Philippum primum Apolloniam temptasse<sup>9</sup>, deinde, ut ea res tardior spe fuerit, ad Oricum exercitum admovisse.* Liv. 24, 40.—30. *Scipio nequâquam eodem animo se ire professus est ad vindicandum<sup>10</sup> id scelus quo<sup>11</sup> civilem errorem<sup>12</sup> nuper sanaverit<sup>13</sup>.* Ib. 28, 32.—31. *Legati venerunt nuntiantes se sustinere vim Macedonum non posse, nisi praesidium militatur Romanum.* Ib. 24, 40.—32. *Respondērunt legati, ejus quanta gratia esset apud imperatorem, expertos esse quum tribunos in vincula conjecerit.* Ib. 29, 19.

## 2. Logical Tenses.

§ 605. LOGICAL TENSES of dependent subjunctives are those which are not determined by the tense of the governing predicate, but by the logical relation of the time which they designate, *i. e.* by those rules which determine the use of tense in the indicative.

Hi (Attici qui de ridiculo scripsērunt) ita insulsi existērunt ut nihil aliud eorum nisi ipsa insulitas rideatur; These (*i. e.* the Attics who made theories of the 'laughable') became so insipid that nothing else is laughable in their writings but their own insipidity. Cic. Or. 2, 54, 217. The present tense of the subjunctive *rideatur* is not determined by *existērunt*, but by its own logical relation to the speaker's time ('the insipidity is now laughable'). If the imperfect *videretur* had been used, it might still refer to the speaker's time; this relation, however, would not be indicated by the tense, but solely by the connection.

Obs. The tenses of dependent subjunctives determined by consecution may be at the same time logical tenses. This is generally the case in the tenses of present consecution (§ 603), and in the preterite consecution if pluperfect subjunctives or imperfect subjunctives are used with the meaning of the same tenses in the indicative, as in some of the examples given above, as: *Sentebat quid ageretur* (= *id quod agebatur*), § 603, No. F; *lertatus sum quod mihi liceret* (= *quod licebat*), § 603, No. E; *Scipio disseruit quas gentis redegerat* (= *de gentibus quas redegerat*), § 603, No. E. But often the tenses by consecution are in conflict with the logical meaning of the tense (in the indicative), as: *Lentulus ostendit quanta conscientiae vis esset*; *Lentulus* showed how great the power of conscience is. Cic. Cat. 3, 5. Here the imperfect *esset* logically denotes present time.—*Factum est ut statim terga verterent*: It happened that they directly turned to flight. Cæs. B. G. 3, 19. Here *verterent* has the force of a perfect indicative. The predicates in clauses of purpose (which, except in very rare instances, are always either in the present or in the imperfect tense) are almost always in conflict with the logical relation of their time, which refers to the future. On the other hand logical tenses are frequently in conflict with the law of consecution (§ 606).

§ 606. The instances in which logical tenses are in conflict with the law of consecution mostly occur when subjunctives of present consecution (present and perfect) are made dependent on preterite predicates.

Such subjunctives may be used in certain circumstances (R. 94, 95.) if the action designated by the subjunctive is determined from the stand-point

<sup>1</sup> Independently expressed: *Gracchus beatus fuit quum studuit* (p. 339, Rem. 69).—<sup>2</sup> gone to. *Devertere* is technically used of the stopping of strangers with their guest-friends, or in public houses.—<sup>3</sup> *vitam edere*, to live.—<sup>4</sup> *objecta est*, present of the periphrastic participle (that any objection is made against Fidiculanus; any fault is found with him).—<sup>5</sup> *compotem alicujus rei esse*, to obtain something.—<sup>6</sup> a thanksgiving.—<sup>7</sup> *non decerneret aliquid*, to vote against something (if the vote refers to a decree). See p. 341, Obs. 2.—<sup>8</sup> if the report (in the Senate) referred to what he had done as consul.—<sup>9</sup> attempted to take Apollonia.—<sup>10</sup> to punish.—<sup>11</sup> as.—<sup>12</sup> = *civium suorum errorem*, the offence committed by his fellow-citizens.—<sup>13</sup> to correct.

of the speaker's (author's) time, without any regard to the time of the principal predicate.—Rarely subjunctives of preterite consecution (imperfect and pluperfect) are made dependent on non-preterite predicates (R. 96).

Obs. 1. The time of the action determined from the speaker's time (in the instances where this is permitted), is either a time present to the speaker (as in the example to § 605), or a time past in regard to the speaker. In the latter instance the perfect is used, as: *Ardebat Hortensius (dicendi) cupiditate sic ut in nullo unquam flagrantius studium viderim*; nullum enim patiebatur esse diem quin aut in foro diceret, aut meditaretur extra forum; Hortensius burned with such a desire for speaking that I never saw in any more ardent zeal; for he did not allow any day to pass without either speaking in the forum, or studying outside of it. Cic. Brut. 88, 302. Here the clause *ut... viderim* has no reference to the time of *ardebat*, being represented as past in regard to the author's own time. But the time of *diceret* and *meditaretur* refers to the time of the principal predicate *patiebatur*, and hence cannot assume a tense of present consecution. *Dixerit* and *meditatus sit* would be as improper as *viderem* or *vidissem*.

Obs. 2. Often relative clauses have the logical value of independent sentences, having only the grammatical form of clauses. If such clauses have predicates in one of the potential subjunctives, these latter are not subject to the law of consecution, but retain the tenses which they must have according to the rules of their class (§ 592-594). Such instances are no real exceptions to the law of consecution, since relative clauses of this kind, logically, must be considered as co-ordinate sentences, as: *Rem commovisti novâ disputatione dignam, quam in aliud tempus differamus (not differemus)*; You have introduced a subject worthy of a new discussion, which we had better postpone to another time (literally 'which let us postpone'). Cic. Brut. 87, 297.—*Quidam non adiecere numerum, inter quos me ipse poni malim*; Some did not add the number, among whom I myself would like to be placed. Liv. 29, 25. The former of these subjunctives is imperative (§ 594), and the latter a subjunctive of guarded statement (Rem. 79), neither of which, in independent sentences, can assume a tense of preterite consecution.—Here belong relative parenthetical clauses, restricting an assertion of the author to his 'best knowledge,' as: *Fuit Sulpicius omniū, quos quidem ego audiverim (as far as I have heard) grandis orator.* Cic. Brut. 55, 203. See p. 560.

Obs. 3. If a clause with a potential subjunctive can not be considered as being virtually an independent sentence, it generally follows the law of consecution. But sometimes such subjunctives keep their own tenses, whether they are dependent on preterite or on non-preterite predicates, as: (a) *Hypothetical periods* which are made dependent on other sentences, in some instances keep their own tenses, and in others follow the law of consecution. (See R. 96).—(b) *Interrogative subjunctives*, if made dependent on preterites, may be placed in the perfect to preserve the peculiar meaning of the interrogative subjunctive according to § 593, which they would lose by assuming the tenses of preterite consecution, since in this instance they would not be distinguishable from ordinary interrogative clauses, as: *Quae fuit causa cur cuncta civitas Lampsacensium de contione domum tuam concurrerit?* What was the reason that the whole community of the Lampsaceni, after the mass-meeting, should have repaired at once to thy house? Cic. Verr. 2, 1, 31. (Independently: *Quid concurrerit civitas?* Why should they repair, etc.; *i. e.* there was no good reason why they should do so, except, etc.).—*Qui in illâ re quid facere potuerit non habebat*; Who did not know what he could do in the premises. (Independently: *Quid facere potuerit?* What could he have done? *i. e.* nothing.) See Ex. Cic. Rosc. A. 22, 61, to R. 94, Obs. 4 (c), and Ex. 1.—(c) *Oblique Quod-clauses* (R. 82), and *oblique clauses with imperative subjunctives* (R. 83), if made dependent on preterite predicates, sometimes keep the tenses which they would have in direct discourse, according to the principle explained R. 93, Obs. 7, (a): *Respondit ab armis discedant*; He answered they should lay down their arms (Independently: *ab armis discedatis*). Sall. Cat. 34, 1.—*Cato ad Popilium scripsit ut secundo filium suum obliget<sup>1</sup> sacramento*; Cato wrote to Popilius to administer to his son a renewed military oath. Cic. Off. 1, 11, 36. *Seniores eorum nimiam lenitatem populi Romani castigaverunt quod eos homines qui in alieno solo edificare oppidum conati sint, impunitos dimiserint*; Those of advanced age found fault with the excessive leniency of the Roman

<sup>1</sup> Some (inferior) codices have *concurrerent*, which stands in most of our editions. *Concurrerent* is evidently a later correction by those who (like the editors) did not understand the force of this perfect.—<sup>2</sup> The reading *obligaret* is a mere conjecture, without being supported by the codices. From the connection of this passage it appears that Cicero used the present *obliget* in place of the imperfect *obligaret* to distinguish the imperative clause from a hypothetical construction. See for this passage Rem. 96, Obs. 7.

people for *having failed* to punish those who had dared to build a town on a soil not their own. Liv. 39, 55. This form of imperative clauses most frequently occurs in Sallust (Ex. 2-5), but also in Caesar. (Ex. 6).—Sometimes oblique clauses of this kind are in tenses determined by the law of preterite consecution, while the *suboblique* clauses dependent on them are logical tenses: Procumbunt ad pedes, ne pulcherrimam totius Galliae urbem, *quæ præsidio et ornamento sit civitati*, suis manibus succendere cogentur. Cæs. B. G. 7, 15. (Independent: Ne cogamur urbem succendere *quæ est*, etc.). Ex. 7.

Obs. 4. Sometimes a non-preterite governing predicate is left out by ellipsis, in which instance the subjunctives of present consecution dependent on such non-preterites understood, often seem to depend on the preterite next to them: Quæ mea cohortatio ne tibi sine causâ suscepta *videatur*, illa me ratio *movit* ut te admonendum *putarem* ut considerares, etc. Cic. Fam. 1, 7, 9. Here the sentence '*illa me ratio movit*' has the force of '*illud dico hanc me rationem movisse*,' *videatur* being dependent on '*dico*' understood, not on *movit*. (Lest this my exhortation should seem causeless to you, *I remark* that this (the following reason) *induced* me to admonish you, (namely) that you should consider, etc.) Such instances cannot be considered as exceptions to the law of consecution. See Ex. 8, 9.

1. Quid *erat* quod (T. Roscius) Capitulum primum<sup>2</sup> scire *voluerit*? Cic. Rose. Am. 35, 99.—2. Legatus *procepit* ut studium<sup>3</sup> conformationis vehementer<sup>4</sup> *simularet*. Sall. Cat. 41, 5.—3. His præcepit, omnis mortalis<sup>5</sup> pecuniam *apprehendat*. Id. Jug. 38, 1.—4. Regi *profecti*, quod<sup>6</sup> *pollicitus* senatum non in gratiam habiturum<sup>7</sup>. Id. 111, 1.—5. Legatus Romanum mittit quibus *procepit* ut amicos inimicis *exprobat*. Id. 12, 6.—6. Cælius legem *promulgavit* ut sexenni die<sup>12</sup> sine usuris<sup>13</sup> creditæ pecuniæ<sup>14</sup> *solvantur*. Cæs. B. C. 3, 20.—7. Cæsar Labiæno imperat, si sustinere<sup>16</sup> non *possit*<sup>17</sup>, deductis<sup>18</sup> cohortibus<sup>19</sup> eruptione<sup>20</sup> *pugnaret*. Cæs. B. G. 7, 86.—8. Idem a te nunc *pelo* quod superioribus litteris (*i. e. petivi*), ut, si quid in perditis rebus<sup>21</sup> dispiceret<sup>22</sup> quod mihi putares faciendum, me *monderes*<sup>23</sup>. Cic. Att. 11, 16.—9. Non ego tecum ita *jocabor* ut eisdem rebus (*i. e. feci*) quum L. Murænam te accusante *defenderem*. Id. Fin. 4, 27, 74.

Rem. 94. In the following instances, subjunctives dependent on preterites *may* (or *must*, see OBS. 1, 2., etc.) assume the tenses of *present* consecution (*i. e.* logical tenses) if the time of the action *may* or *must* be considered as referring to the *speaker's* time, either as present to it, or as past before it: 1) If by using the tenses of preterite consecution there *would* be a conflict with other grammatical rules, or with the laws of logical congruity or perspicuity (OBS. 1); 2) If the governing preterite predicate contains a *present predicate by implication* (OBS. 2, 3, 4, 5); 3) If the principal predicate is a preterite referring to the *time-period of the speaker*, but *preceding* another action referring to the same time-period, according to Rem. 43 (OBS. 6); 4) If the principal predicate is a *perfect subjunctive* (OBS. 7); 5) Rarely if the principal predicate is a *hypothetical preterite* (OBS. 8, 9); 6) If the clause in which the subjunctive stands is a *Quum-clause* followed by an apodosis with *tum* (OBS. 10); 7) If the clause in which the subjunctive stands is introduced by *ut*, *quin*, or *equivalent relatives*, describing the modality of the principal action (MODAL UT-CLAUSES). See Rem. 95.

In most of these instances it is *optional*, either to *observe* the law of consecution, or to set it aside by the use of *logical tenses*, the usage of the language inclining more towards the former than towards the latter.

<sup>1</sup> What was the reason that (why).—<sup>2</sup> to be the first to know (namely the assassination of Sex. Roscius).—<sup>3</sup> Independently: '*Quamobrem voluerit*'? why should he have wished, etc. (*i. e.* he could not have wished so if he had been innocent of the crime).—<sup>4</sup> their sympathy with the conspiracy.—<sup>5</sup> carefully.—<sup>6</sup> to conceal.—<sup>7</sup> every living being.—<sup>8</sup> approach (try) with money.—<sup>9</sup> = id quod.—<sup>10</sup> that it would not be acceptable to the Senate.—<sup>11</sup> to stuff, cram with gifts.—<sup>12</sup> *sexenni die* = *sexenni tempore*, in six years time.—<sup>13</sup> interests.—<sup>14</sup> *creditæ pecuniæ*, all debts in money.—<sup>15</sup> to pay.—<sup>16</sup> maintain his position (*i. e.* within the intrenchments).—<sup>17</sup> instead of *posset*. Independently: Pugnato, si sustinere non *potes*.—<sup>18</sup> *deducere cohortes*, to place one's self at the head of one's cohorts.—<sup>19</sup> See p. 181, R. 226.—<sup>20</sup> *eruptione pugnare*, literally 'to fight by means of a sortie', *i. e.* to meet the enemy outside the entrenchments.—<sup>21</sup> In my desperate condition.—<sup>22</sup> to discover, to find out.—<sup>23</sup> to let me know.

method (OBS. 2, 8.). But *final clauses denoting purpose* (final Ut-clauses), almost always are subject to the *law of consecution*, and their predicates (except in very rare instances) do not assume tenses of *present consecution* if dependent on *preterites* (see OBS. 5, A. 1; OBS. 6); and in many other instances falling under the above-mentioned heads, only the one, not the other system is admissible (see the Observations). But the use of logical tenses is limited to the instances enumerated above, and to those mentioned § 606 (OBS. 1-3). If a dependent subjunctive cannot be assigned to one of these exceptional instances, it must always follow the law of consecution.<sup>1</sup> For the tenses which must be used if a hypothetical period is made dependent on predicates requiring the subjunctive, see R. 96.

Obs. 1. If the tenses of preterite consecution would be in conflict with other grammatical rules, or would obscure the meaning of the author, or produce a logical incongruity (Rem. 94, No. 1), the dependent subjunctive, if denoting past time, *must* be placed in the *perfect*; the action being thus represented as *past in regard to the author's time*, and its tense as *logical*<sup>2</sup>. Such perfect subjunctives are most frequent in *relative clauses*, and in clauses introduced by *quum* and *quamvis*, and in all cases enumerated No. 2, 3, 4, and 5 of Rem. 94 (in which logical tenses *may* always be used without any particular reason, but *must* be employed if one of the above-mentioned reasons coexist):

(a) Relative clauses often require a predicate in the subjunctive if they are 'pregnant', *i. e.* if a subordinating conjunction is latent in them (Book VI.). If such predicates according to particular grammatical rules absolutely require a perfect tense, the subjunctive must assume this tense, even if the law of consecution requires an imperfect or pluperfect; or in other words: *The law of consecution must yield to 'prohibitory' grammatical rules*. Thus a clause falling under the rule Rem. 69 (according to which a clause containing an action whose merits and character are designated by the principal predicate, must take a predicate in the same tense as that of the principal predicate) must have its predicate in the *perfect subjunctive* if it is expressed in the form of a relative clause, and the principal predicate is in that tense. According to the law of consecution it would be in the *imperfect*; but this law must yield to the higher law of R. 69: In M. Bruto magnum *fuit*, Brute, dedecus generi vestro, *qui* . . . accusationem *facilitaret*; M. Brutus was a great disgrace to your family, O Brutus, *who* (inasmuch as he) made 'public accusing' a regular business. Cic. Brut. 31, 130. (Expressed by *quum*: In Bruto . . . dedecus *fuit*, quum accusationem *facilitaret*.)<sup>3</sup>—Tubero paullo etiam (*fuit*) durior, *qui* quidem in triumphatu *judicaverit* vacationem augures non habere; Tubero was even a little harder, *who* (inasmuch as he) declared in his triumphship that the augurs had no exemption (from judicial duties). Cic. Brut. 31, 117. With *quum*: Tubero durus *fuit* . . . quum *judicavit*. See Ex. 1, 2.

<sup>1</sup> Some grammarians have strangely misunderstood the subject of logical tenses by introducing such rules as these: 1) The *perfect subjunctive* is used in *historic* (*i. e.* preterite) consecution '*whenever the sense requires that tense and mood*' (Publ. School Gramm. p. 406). [If the word '*the sense*' is taken in the 'English sense', the rule is decidedly false; if taken in the 'Latin sense' the rule is *useless*, since it is just the question *when* the Latin linguistic intuition requires the perfect subjunctive.] 2) When a clause subordinated to a historic [= strictly preterite] tense contains a proposition generally true without reference to time, such a clause *may* stand (*sic*) in the present subjunctive: as *Olim ignorabatur quam magnum veffigat sit parsimonia* (Publ. Sch. Gr. p. 407). [The author has overlooked the fact that his rule is only true under *certain* circumstances (namely those enumerated R. 94), and hence we cannot wonder at the grammatical blunder (*sic* instead of *esset*) which he made in his example, by which he ruined a passage in Cic. Par. 6, 3, 49. We may say that by the above-mentioned two rules almost the whole law of consecution is set aside, or surrendered to the license of the writer.] —<sup>2</sup> Examples of such perfect subjunctives are not very numerous, since generally such 'conflicts' may be avoided by recasting the sentence. But they occur in the very best authors, and are far too frequent to pronounce them, as some grammarians do, as 'marks of negligent style', or even to amend the text, as many editors have done, by substituting tenses of preterite consecution.—<sup>3</sup> The sentence, with *quum*, according to R. 69 might have also taken the form *dedecus erat quum facilitabat*; and hence the author might have used *facilitaret* in connection with the relative *qui*, if he had used *erat* instead of *fuit*. Thus the conflict with the law of consecution might have been avoided. But in this instance the peculiar force of this whole form would have been made irrecognizable, since the imperfect would have the appearance of a preterite by consecution, not of a tense denoting identity of action according to R. 79. See § 606, OBS. 3.

1. The issue was the law of consecration must yield to the prohibitory rule R. 58, and the question was whether, in determining a time on the question, "how long?" combat is to be considered as continuing until the sun goes down, or until the sun has set, or until the sun has set and the moon has risen. See, for both points, quotation in *War*, supra, at 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 90

(c) Often the predicates of concessive, causal, and temporal clauses, introduced by *quoniam*, *quum*, or equivalent relatives, must be placed in the perfect subjunctive contrary to the law of transference 1 to show that the time of the clause is *not* meant to be the same time as that of the principal predicate, 2 to distinguish causal and concessive *quoniam* from temporal *quum*. The former always denotes either the 'cause' as a 'subjective reasoning' of the author, which naturally transfers the 'stand-point of time' away from the principal predicate to the author's own time, and to the moment of writing: *Saepe enim laudare oratores A. Cornelii qui postea quum pater in forum ventum, neque ibi unquam diutius quam quæstor abfuertim* (For how often I often have heard the A. Cornelian orators, since (i. e. considering that) I came 'to the forum' in my boyhood, and never was absent from there any longer than during my quaestorship? (Cic. Or. 2, 90, 315). Here *quum*... *ventum* would represent the time of *audire patrem* and of *ventum* as coincident (how could I hear them at the time when I came to the forum). *Quum ventum* would be a temporal clause with the meaning 'after' (how could I hear them after coming to the forum). It is at once removed every doubt by representing the time of the 'coming' as past in regard to the speaker's time, and the clause as causal. The same applies to 'abfuertim.'—*Hic ille natus, quamvis patrem nunquam vidisset, lamen in patris erubescit nomine* (from *deductio ad*): Being a son of that man, he was led into (erubescit) something like the paternal weakness, although he never saw his father. (Cic. Rab. Post. 2, 1. *vidisset* would confine the action of seeing his father' to the time before 'he was led', while the author meant that he never at any time saw his father, which could not be properly expressed otherwise than by representing the time of 'vidisset' as past in regard to the author's time, i. e. by putting it in the perfect.—*Ab omnium domine severitas consilia solent atque quædam in mentem verba nunquam sanctorum* (It is sometimes severe from all men, and certain words are uttered in the mind of the censorious officer who is attacked, while (although, and yet) you at the time never with a word intimated your views. Cic. Pis. 4, 9. The predicate of the clause *quum*... *significâris*, if placed in the imperfect subjunctive (or perfect indicative), would, according to R. 60, Obs. 2, represent the clause as a time-clause, while it is meant to be a concessive clause with the force of an adverbial proposition (p. 656). Hence the time of 'significâris' had to be referred to the speaker's time by means of the perfect subjunctive. Logical tenses of this kind are quite frequent in clauses dependent on hypothetical predicates (Obs. 83, See Ex. 3, 4. We must, however, not infer that, for instance, concessive clauses, introduced by *quum*, always take logical tenses. This is only the case if the sense of the passage would thereby be affected. Tenses by consecution are always used in clauses of this kind, if the author does not mean to refer the action to his own time, or to represent it as his own reflection, but as that of the subject at the time spoken of, as: *Eos (captivos) senatus non censuit redimendos, quum id parva pecunia fieri posset* (The Senate was not of the opinion that these prisoners should be redeemed, although it could be done at a small expense. Cic. Off. 3, 32, 115. This *Quam*-clause is conceived as subobjective, being stated 'out of the soul' of the Senate. By changing *posset* into *poterat*, the act would be represented as the author's own reflection (the predicate requiring a perfect indicative with *et si* or *quampotius*, which would destroy the point of the clause.

(d) In general, logical tenses must be used if the principal predicate contains no time to which the time of the dependent subjunctive could be attached without impairing logical correctness, as: Cn. Flavius ante decemviros non *fuit*, quippe qui aedilis curulis *fuerit*, qui magistratus multis annis post decemviros institutus est; (n. Flavius did not live before the time of the decemvirs, since he was a curule aedile, which office was established many years after the decemvirs. Cic. *Att.* 6, 1, 8. *Fuerit* would place Flavius's aedileship *before* the decemvirs; *fuit* would seem to denote an action *arising* at some time mentioned before, while Flavius's aedileship was meant to be designated as an uncertain time-point of a *post period*, i. e. of a period past 'at the author's time'.

Obs. 2. Logical tenses may (or must) be used if the governing preterite predicate contains a present predicate by implication (R. 94, No. 2). This is the case (a) if the governing predicate is understood to hold good also at the speaker's time (i. e. at the moment of speaking), as *quærit*, I have asked and still am expecting an answer; *judicat*, he

judged (and still judges, i. e. is of opinion) : *fuit*, it was and is still; *vidimus*, we saw (and still see) : (b) if the governing preterite is introduced, not for its quality as a past action, but for the consequences resulting from it which are represented as present at the speaker's time, as *audisti*, you have heard (and hence know) : *scripsit*, he wrote (and still is of opinion) : *veni*, I have come, and hence 'am present' : *cognovi*, I learned (and hence 'know') : (c) if a preterite is represented as having always or never held good as holding or not holding now, as *numquam dubitavi*, I have never doubted (nor do I doubt now) : *semper crediderunt*, they always believed (and are believing now).

Subjunctives dependent on such predicates are treated in the following manner:

(a) If the action of the subjunctive is represented as *present* to the speaker, it may be either expressed as a *logical tense* in the *present*, or as a tense by preterite consecution in the *imperfect* (except in the instance mentioned OBS. 5), as: (PRESENTS) *Quod genus hoc militum sit iudicavit* Bibulus (qui noluerit etc.). What kind of soldiers this is Bibulus *judged* (when he refused etc.). Cic. Fam. 15, 1, 5 (He judged *then*, and would judge *n-w* if asked).—*Vidimus* cum quantâ ceremoniâ non vestros solum colâtis deos, sed etiam externos accipiatis; *We have seen* (and see *now*) with what solemnity *you worship* not only your own gods but also *admit* foreign deities. Liv. 29, 18. See EX. 5-9.—(IMPERFECTS): *Mihi sumpsi* hoc loco doctrinam quandam juventûti, qui *essent* optimâtes; *I have treated* (and am still considering) in the interest of our young men the question 'who *belong* to (who constitute the class of) the optimâtes'. Cic. Sest. 59, 119. See EX. 10-13.—Sometimes both methods are combined in the same sentence: Non ego ignarus quid *responditur* facturuse *esses* quæstiri, quippe quum præ te *feras* temptare te magis quam consulere senatûm; *I asked that question* (and still am waiting for an answer), not because *I did not* (and do not) *know* what *your answer or action would be*, seeing that (since) *you openly show* that you are rather trying (making an experiment with) than consulting the Senate. Liv. 28, 45. Here *facturus esses* refers to the thoughts of the speaker in the (past) moment of actually asking the question, and *præ te feras* to a state present and lasting in the moment of *speaking*.

(b) If the action contained in the subjunctive is coincident with the governing preterite, the subjunctive dependent on it is placed either in the *imperfect* or in the *perfect*. The IMPERFECT is used if, by changing the governing preterite into an actual present, the subjunctive would be a PRESENT. But the PERFECT must be used, if by thus changing the principal predicate, the dependent subjunctive would be a PRETERITE, as : Num quis quod bonus vir *esset* (not *sit* or *fuisset*) gratias dis *egit* unquam ? Did ever a man *thank* the gods for being a good man ? Cic. N. D. 3. 36. 87. (Changed into a present : ' Nemo gratias dis *agit* quod vir bonus *sit* ' ; hence : *egit* quod *esset*). But : Quis unquam *dubitavit* quin in republica nostra primas eloquentia *tenuerit* semper ? Who ever *doubted* (and who does now doubt) that eloquence always *has held* the most prominent place in our country ? Cic. Or. 40. 141. (Changed into a present : Nemo *dubitavit* quin *tenuerit* ; hence *tenuerit* cannot be changed into *teneret*).—Hæc pugna indicio *fuit* (et nunc *est*) quos milites *gesserint* animos ; This battle *furnished* (and now furnishes) a proof of the courage with which the soldiers *behaved*. Liv. 7. 23. (Changed into a present : Indicio *est*, quos animos *gesserint*). By the imperfect *gereret* the fact would be represented as appearing so to those present at the battle, which the author did not mean.—Sometimes of two very similar sentences the one, according to the above-mentioned rule requires the subjunctive in the *imperfect*, and the other in the *perfect*, as : Perfusus nostri juris nemo unquam qui hanc civitatem retinere *vellet*, in aliam se civitatem *dediit* ; No person versed in our law, if *desirous* to retain the right of citizenship in this city, ever *has accepted* the citizenship of another. Cic. Balb. 12. 30. (Changed into a present : Nemo qui retinere *velit*, se *dicat* ; hence : *vellet*, not *voluerit*) ; but : Me dicentem qui *audierit* nemo unquam tam sui despicieus *fuit* quin *speraret* eodem modo se posse dicere ; Nobody who *has heard* me speaking ever *underrated* himself so as not to *hope* that he might speak as well. Cic. Or. 2, 89. 361. [Changed into a present : Nemo, qui me dicentem *audierit* (*audivit* according to p. 300, R. 43) tam sui despicieus *est* quin *speret* etc. Hence : *audierit*, not *audiret* ; and *speraret*, not *speraverit*]. We cannot but admire the remarkable tact with which the classical authors, although not guided by any grammatical rules, almost invariably used the proper tenses in relations where so delicate distinctions must be made. Our modern Latinists, even the best (as Murætos, Erasmus, Ernesti, Wyttienbach) frequently offend against this rule. Several conventional phrases, properly falling under the rule mentioned above, always require an *imperfect*. Here belongs the frequent formula : (Sæpe) *audiri* (or *audiebam*, *audtum est*) quum *diceret* ; I have often heard him say. See p. 326, OBS. 3. 4.—Ex. 14-16.

<sup>1</sup> Predicates of this kind must be distinguished from the expressions mentioned *R.* 42, implying an uninterrupted duration of a state. Such predicates are always in the present.—<sup>2</sup> Madvig (in Thacher's translation p. 342) considers *gesserint* an 'inaccurate' expression.

(c) If the action designated by the subjunctive is represented as *a priori* to the governing preterite (implying a present), the tense of the subjunctive is always treated as logical i.e. the subjunctive is placed in the PERFECT, unless the time before which the action occurred is expressly named; Accipis quibus rebus adductis quamvis causam defendere[m]; You have heard (and hence you know); from what motives I defended each case. Cic. Fam. 1, 9, 21 (not defendisset, although the 'defendere' is anterior to each case). — Itatio ab accusatore reddita non est quam ob causam patrem filius occiderit; There has been no reason alleged by the accuser why the son should have killed his father. Cic. Ro.c. Am. 22, 61 (occidisset would be faulty from two reasons: first according to the present rule, and secondly according to § 606, Obs. 3.b.). But: Tota quaesens usque ad Vili. Kal. Jun., cognovi ex tuis literis; I have learned from your letter all the transactions (what was transacted, or what had been transacted) before up to the 25th of May. Cic. Att. 3, 10. If the pluperfect acta essent being necessary, since the action is represented to have occurred before an expressly added time anterior to the governing predicate. Hence a perfect subjunctive used according to this rule must be changed into a pluperfect if a time before which the action occurred is added; Caesar ad me scripsit, si pluperfect it a time before which the action occurred is added; Casar hunc gratissimum sibi esse quod quierim; Casar has written to me that he is very much gratified by my having kept quiet so far. Cic. Att. S. 14, 5. But by adding 'usque ad' with a fixed point of a past time-point, quierim must be changed into quiescentem. If, however, designation of a past time-point, quierim must be changed into quiescentem. If, however, the governing preterite is a purely historical tense, such subjunctives always require a pluperfect, as: Quum res in summâ expectatione esset, audivimus quæ Corinî acta essent (not sint). Cic. ad Pompëjum (in Att. 8, 11 D. 3.); since audivimus belongs to a narrative in which the author relates what formerly had happened on a certain day (I heard on that day = audiebamus).— Frequently these dependent subjunctives are of the same nature as their governing predicates, reaching in their results the time of the speaker (as Ex. 17-19). But the use of the perfect subjunctive is not limited to this case, as in the first two of the above mentioned examples, and in Ex. 20.

[The Latin subjunctive forms corresponding to English conditionals]

Obs. 3. Governing preterites of this kind (Obs. 2) are *not* *admiratives* equivalent to English present-perfects, nor can the logical tenses, either allowed or required with these preterites, be considered as a proof that the Latin perfect has the double nature of an historical preterite and an English present-perfect. The latter *always* includes the idea of a present, while in Latin the idea of a present tense belongs not to the perfect tense *as such*, but to the connection which it has in *every given instance*. This connection with the idea of a present (which must always be *separately* understood) is not peculiar to the perfect alone, but *may* even occur with an *imperfect*, and no grammarian has yet gone so far as to invent an *imperfect-present* tense for the purpose of explaining such combinations, as: *Quæ ferè hec tunc die Cn. Pompei gravissimè in d. c. c. p. perspicuè admiratione vestra declarata celebrata sunt*; and: *et nunc præteritum desideramus*; What force yesterday Pompey's speech had, *seemed* to be declared (and *seems* to have been declared) by the evident admiration with which you listened to him. Cic. Barb. 1, 2. *claud'* by the evident admiration on which you listened to him, *contains* a present by implication, but it has not even a similarity with an English present-perfect.\* Thus *perfects* which do *not* correspond to English present perfects often unquestionably belong to those preterites which, according to Obs. 2, may require or admit logical tenses, as: *Questus es plures te testis habere de Voltiniâ quam quot in eâ tribu puncta tuleris*; *You complained* (then and there, and so you do *now*) of having more witnesses from the Voltinian tribe than you *had carried* votes there. Cic. Planc. 22, 54.—*Tunc id veritus es ne ego, iracundiâ aliquâ aduenis, pueros ad te sine litteris miserim?* *Did you indeed fear* (not: 'Have you feared', but: 'Did you fear then, and do you, perhaps, fear now?') that I *may have sent* messengers to you without any letters? Cic. Qu. Fr. 1, 3, 1, *et miserum* would be a just rule in Obs. 2, *et*—*Id quæto saluti fuisset universæ Græciæ, bello cunctis est Persico*; How important this *was* for the welfare of the whole of Greece, *was seen* (and is now seen) in the Persian war. Nep. Them. 2, 4. [Both *esset* and *fuisset* would be wrong; the fact must be viewed from the standpoint of the speaker's time.] Thus *judicavit* (in Obs. 2, a), '*indicio fuit*' (Obs. 2, b); *reperi sunt* (Obs. 5, B), and many of the perfects in the examples to R. 95, cannot be taken for equivalents of English present perfects.

Obs. 4. The preterites mentioned Obs. 2, must not be confounded, as our grammarians generally do, with the *present* of the *perfect* as a *condition* with passive participles. These denote a PRESENT STATE, the action of the verb *being* represented as a state

\* Madvig (p. 342, Thacker) considers the perfect *fuert* as another 'inaccuracy', assuming that Cicero, when he said (or rather wrote) *fuert*, meant to close the sentence by '*memorati sumus*', but forgot when, after a few words, he arrived at that point, that he had said '*fuert*'. The learned grammarian, however, does not say, why not with '*celebratur*' a present tense might be as correctly understood, as with any other perfect predicate. Cicero, at least, must have thought so, or he would have corrected the blunder.

(p. 127). and hence are *real presents*, not corresponding to English *present-perfects*, but to English *present*. Therefore they require the tenses of *present* consecution: Nos a patria p̄vocal, itaſque reſegatū ſumus, ubi ſenſe ſimus in exilio: We are banished (are living in exile) far from our country, and from Italy, in a place where we may grow old in exile (or 'so that we are growing old'). Liv. 25, 6. Whenever on a passive of this form subjunctives of *preterite* consecution are dependent, they will, on closer examination, be found to be *perfects*, as: Homines sunt hac lege generati qui tuerentur terram: Man has been created with the purpose to inhabit the earth. Cic. Rep. 6, 15. See Ex. 21. 22.

OBS. 5. EXCEPTIONS to OBS. 2.

**A.** In the following instances the subjunctives dependent on the kind of preterites mentioned Obs. 2, *must* be placed in tenses of PRETERITE CONSECUTION:

[illegible]

2. *Epistolary imperfects*, although they virtually are presents, always require the *preterite* consecution: *Non dubitabamus quin tu jam Brundisium pervenisses, nobisque heri et omnino interfectum fides habemus*, neque minus nos esse captos quam qui Cornifici fuisset. Cic. Att. 8, 11 D, 4.

1. With perfects, according to § 572, p. 305, as: *Alius accipit fastidiosè, tamquam qui dicat* etc.; Another *receives* (benefits) fastidiously, as if he *said* etc. Sen. Ben. 2, 24.—For Ex. of preterite consecution see p. 305.

For Ex. of preterite consecution see p. 305.

2. With *inventi (reperi) sunt qui* = 'There are persons who'; *tu solus inventus es qui*, 'you are the only one who'. With these expressions the dependent subjunctive (see p. 551 foll.) may be in the present, or perfect, but is more usually in the imperfect. Whenever these expressions have a strictly preterite force (no present being understood), either the imperfect or perfect is used, but more usually the former: Sex. Titio damnato qui istam (imaginem) habere auderet (or ausus sit) *inventus est nemo*; *There was nobody after Sex. Titus's condemnation, who dared to have this image in his possession.* Cic. Rab. Perd. 9, 25.—*Pauci reperi sunt qui nullis premiis propositis vitam suam hostium telis objecerint* (or *objecerent*); *There have been (are) few who, without the promise of rewards, expose their lives to the weapons of the enemy.* Cic. Balb. 10, 26.—*Pompejus unus inventus est quem socii in urbis suas cum exercitu venisse gaudent*; — *Pompey is the only one whose coming to the cities of our allies with an armed force, is (still) remembered with joy by these.* Cic. Leg. M. 23. [The present *gaudent* is necessary here, because *gauderent* or *gravis sint* may be taken as referring to the time of the coming.]—*Inventus est scriba quidam Cn. Flavius qui fastos populo proposuerit* (or *propone-ret*); *There was a certain clerk, Cn. Flavius, who exposed the (secrets of the) calendar to the people.* Cic. Mur. 11, 25. See Ex. 25-28.

Obs. 6. If subjunctives are dependent on those perfects with indefinite subjects which represent an action as preceding another action, while both belong to the speaker's time (p. 300, R. 43), they always take *tenses of present consecution*. Even final clauses attached to such perfects, have their predicates in the *present subjunctive*: Ubi quis ex principibus in concilio dixit se ducem fore, qui sequi *velint* profiteantur, consurgunt ei qui et causam probant et hominem; Whenever anyone declares in council that he is going to be the leader of an expedition, and requests those, who *wish* to follow him, to *enroll their names*, all those arise who approve of both the cause and the man. Caes. B. G. 6, 23. — Quam *miserum*

qui afferat agnum quem immolemus, num is mihi agnus affertur qui etc.? When we send (have sent) anybody for a lamb to sacrifice it, will a lamb be brought which etc.? Cic. Div. 2, 17.—Quis est tam cupidus in cognoscendâ rerum naturâ ut, si ei contemplanti res dignissimas subito sit altitum periculum patriæ, cui subvenire possit (not possit), non ille omnia relinquat atque abjiciat? Cic. Off. 1, 43, 154.—If such perfects take the form of an *ablative absolute*, the clauses dependent on them, likewise take tenses of *present* consecution, forming thus an exception to the rule R. 92. as: Qui plurimos ex his interfecerunt, *relatis* in publicum cornibus, quæ *sint* testimonio, magnam ferunt laudem; They are greatly praised *after giving* (when they give) the horns to the community, so as to serve as evidence. Cæs. B. G. 6, 28. See Ex. 43.

Obs. 7. Subjunctives dependent on a *perfect subjunctive* (R. 94, No. 3), *always* assume logical tenses (of present consecution) if the perfect subjunctive has a potential present force according to R. 79, Obs. 2, as: *Vix ullius gentis hominem inveneris cuius felicitatem fortunæ Metelli compares*; You will hardly find a man in any nation (= hardly a man can be found etc.), whose happiness you *could* compare with Metellus's fortune. Vell. 1, 11.— *Utrum poetæ Stoicos depravārint an Stoici poetis dederint auctoritatem non facile dixerim*; I *would not like to say* (it is difficult to decide) whether the poets *spoiled* the Stoics, or whether the Stoics *influenced* the poets. Cic. N. D. 3, 38, 91.— But when the governing subjunctive perfect has the force of a preterite (except, of course, if it implies a present according to Obs. 2), the tense of the dependent subjunctive, according to the general rules, should be determined by *preterite* consecution, which, indeed is frequently the case, as: *Quærendum est num tanta egestas eum oppresserit ut sacrum suum spoliāret, ut deos patrios venderet*; We should examine whether he was in such straits that he *should have robbed* his sanctuary and *should have sold* the gods of his fathers. Cic. Verr. 2, 4, 6.— But often such subjunctives are, likewise, placed in the perfect subjunctive, thus agreeing with their governing predicate in tense by *attraction*, as: *Restat ut hoc dubitemus, uter potius Sex. Roscium occiderit, is ad quem morte ejus divitiæ venerint, an is ad quem mendicitas*; It remains for us to consider which of the two more probably *killed* Sex. Roscius, he to whom wealth *came* by his death, or he to whom beggary (came). Cic. Rosc. Am. 31, 88. Sometimes (Ex. 33) such subjunctives are placed in the *present*, if represented as present to the speaker.— Ex. 29-33.

Obs. 8. *Hypothetical imperfect subjunctives* are logically presents (*diceret si viveret = nunc diceret si nunc viveret*); and *hypothetical pluperfect subjunctives* are logical *perfects* or *imperfects* (*dixisset = dictūrus fuisset* or *erat*). Hence it should seem that subjunctives dependent on preterite hypotheticals, according to the principle explained in Obs. 2, ought to admit of *logical* tenses (in the present and perfect). But this is generally not the case. *Subjunctives dependent on preterite hypotheticals take the tenses of preterite consecution*. In order to know whether an *imperfect* or a *pluperfect* must be chosen, we must conceive the hypothetical imperfect or pluperfect changed into a *perfect* or *imperfect indicative*, and give to the dependent subjunctives in the hypothetical period the same tenses as they would take in *this* connection; but so that for a *present* or *perfect* indicative, which the clause may take outside the hypothetical framework, an *imperfect* subjunctive must always be substituted, as: *Si solos eos diceret miseros quibus moriendum esset, neminem tu quidem eorum, qui viverent, exciperes*; If you would call unhappy those only who *must die*, you would except none of those that are living. Cic. Tusc. 1, 5. [CHANGED according to rule: *Dixisset miseros eos quibus moriendum est, exciperet eos qui vivunt*; hence: *moriendum esset, viverent*.]—*Qui fieri potuit nisi homines ea quæ ratione invenissent, eloquentiâ persuadere potuissent?* How could this be the case if men had not been able to make plausible by their eloquence what they have derived by their reason? Cic. Inv. 1, 2. [CHANGED: *Homines persuadere poterant quæ ratione invenerant* (this pluperfect is required according to p. 330, Obs. 4 and 5); hence: *invenissent*.]—*Ego si me non improbiissime Dolabella tractasset, dubitarem fortasse utrum remissior essem, an summo jure contenderem*; If Dolabella had not treated me most outrageously, I would, perhaps, have doubted whether to *restrain myself*, or *to engage in a strife* to the full extent of my right. Cic. Att. 16, 15, 1. [*Dubitabam utrum contenderem*, according to R. 85, Obs. 8, e.].—If the hypothetical predicates are expressed by *presents* (with the force of hypothetical imperfects; see B. VI.), *the consecution must be present*: *Si forte quaereretur quæ esset ars imperatoris, constituendum putarem quis esset imperator; . . . si grammaticus, si poeta quaeratur, possum similiter explicare quid eorum quisque proficteatur*. Cic. Or. 1, 48. 210–212. See Ex. 34–39.

Obs. 9. The rule Obs. 8 is often set aside for the reasons mentioned Obs. 1. Clauses with *quum* (= *seeing that*, or *since*) if the predicate were placed in the imperfect subjunctive would frequently be mistaken for hypothetical clauses (*quum* being often = *si* in hypothetical periods); and hence such clauses regularly have predicates with *present* conjugation: Tu istud nisi fingeres, sic ageres? praesertim *quum* alienorum pericula defendere acerrime soles, tuum negligeres? Would you proceed thus if it were not a ficti-

tious case? Considering that you *will*, with the greatest energy, *defend* strangers under a cond., *would* you *neglect* your own affairs (i. e. *niſi fingeres*)? Cic. Brut. 80. 278. See Ex. 40-42.—In Ex. 42 *ſed* Cat. 7, *ſuſpect* and *aperit* are used in lieu of *ſuſpect*, be-  
cause else it would seem as if they were the predicates of a hypothetical principal sen-  
tence belonging to *ſi* (which immediately follows). This would appear like a grotesque  
absurdity. — Aside from these instances in which logical tenses are required by the rule  
Ons. 1, the present consecution in clauses dependent on hypothetical preterites is ex-  
tremely rare, as: *Cresceret mihi ex eo ipſo fiducia quod poſſit* (instead of *poſſet*) in homi-  
ne unius virtute tantum momenti eſſe; My confluence *would increase* by the very fact  
that so much *can depend* on one man's ability. Liv. 28. 43.—Qua diſtinctione sub-  
ſtā, quam habere in Corā... notam quæ falſa eſſe non poſſit? If this diſtinction were  
ſet aside, what mark *would be* here in Corā which *might not be* falſe? Cic. Acad. 2. 23.  
§ 47 For the treatment of hypothetical periods in regard to the tenses of their predi-  
cates, if the period is made dependent on other sentences, see Rem. 96.

OBS. 10. If a *Quam*-clause is followed by an apodosis with *tum*, the predicate of the *Quam*-clause, if in the subjunctive according to the rules p. 657, may in certain circumstances assume a *logical tense*. If the *Quam*-clause is a more *temporal* clause, the adverb introducing the apodosis being redundant (being merely used for the sake of emphasis) — *tum quamo*, the mood's are subject to the law of consecution, being strictly treated according to the rules of temporal clauses, as: *Qui quam Catilinae breviter tractatus, statim discessit, ... tum ille subito, scelere demens, quanta conscientiae vis esset ostendit*; When (after) these had briefly answered Catiline's question, (then) the latter, blinded by criminal passion, suddenly showed the power of conscience. Cic. Cat. 3. 5. 11.— Generally, however, the connection *quam-tum* is a 'pregnant' grammatical form, combining the idea of a temporal clause with a merely logical idea, and representing both propositions as the exponents of the same thought. Such clauses have the force 1) of a temporal clause, and 2) of propositions co-ordinated by 'non solum... sed etiam' (cf. ... *Atque*), and the author is at liberty to treat the subjunctive of the clause either according to the rules of the former *&c.*, to apply the law of consecution, or according to the rules of the latter *&c.* to apply logical tenses as in all co-ordinate propositions: as: 1) Sex. Roscius *quam* omni tempore nobilitatis factor *fuisse*, *tum* hoc tumultu proximo praeter ceteros in ea vicinitate eam partem causamque *defendit* que etc.: As (while) Sex. Roscius had favored at all time the cause of the nobility, so he sided in the last civil war, more than any one in that neighborhood, with that party and cause which etc. (Cic. Rosc. Am. 6. — 2) Itaque *quam* cum antea tu similis in dicendo *videris*, *tum* vero, nunc a doctissimo viro instructum, *notum* *viditum* similiorem: Therefore, while I had been more similar to you now that he had been under the instruction of one of the most able teachers. (Cic. Brut. 71. 249. — 3) Drimius C. Verrem *quam* multa in deos hominesque nefarie *fecerit*, *tum* praeter quadragesime sestertium ex Sicilia contra leges *absulisse*; (because) he had done, *tum* praeter quadragesime sestertium ex Sicilia contra leges *absulisse*; We assert that, while C. Verres in general made himself guilty of many crimes against gods and men, he moreover illegally abstracted 40 millions of sesterces from Sicily. Cic. Verr. 1. 18. 56.— In the first example *fuisse* is treated according to the rules of temporal clauses, since the author meant to represent the time of the apodosis as following *fuisse*, since the author meant to represent the action expressed by '*defendit*' belonging to former period in the life of Roscius, the action expressed by '*defendit*' belonging to the latter, but not to the former period. But *fuerit*, as a logical tense, might have been substituted for *fuisse*. — In the second example, the author, from the same reason, might have used '*viditum*', as a tense by consecution, in place of '*videris*', since the '*Antea*' have used '*viditum*' and '*similis in viro*', likewise, mark two successive periods; but he has '*videris*' and '*similis in viro*', as common to both periods, and the priority of the latter used a logical tense, since the '*videris*' is common to both periods, and the priority of the former is sufficiently marked by *antea*. — In the third example, however, the logical tenses '*fuerit*' could not have been replaced by '*fuisse*', since the robbing of the treasury, and the other 'godless acts' did not belong to different periods, which is expressly intimated by '*praeter ea*'. *Fuerit* might have been used, according to the law of consecution, but the author preferred to use the logical tense *fuerit*, marking the actions rather as logically, than as temporally connected. — Frequently the *imperfect* subjunctive in *Quam*-clauses of this kind must be considered as a *logical tense*. This is the case if it has the same function as an *imperfect indicative*, in which instance, of course, the perfect subjunctive is not admissible, as: Crassus *quam* peracutus *esset* ad excogitandum, *tum* verbis *erat* mirabiliter aptus: While Crassus was most ingenious in the conception of thoughts, he was remarkably able in expressing them. Cic. Brut. 39. 145.

Ib. Brut. 26, 100.—42. Memorare *possem* quibus in locis maximas hostium copias populus Romānus parvā manu<sup>26</sup> *fuderit*<sup>27</sup>, quas urbis munitas<sup>28</sup> *ceperit*, nisi<sup>29</sup> ea res longius nos ab incepto traheret<sup>30</sup>. Sall. Cat. 7, 7.—43. Galli liberos suos, nisi<sup>31</sup> quum (ita) *adolescerent*<sup>32</sup> ut munus militiae sustinere<sup>33</sup> *possint*, palam<sup>34</sup> ad se adire<sup>35</sup> non patiuntur. Cæs. B. G. 6, 18.

*Rem. 95.* The predicates of MODAL CLAUSES introduced by the conjunctions *ut* (*ut, ut non*) and *quin*, or by equivalent RELATIVE adjectives (*Obs. 9*), frequently take LOGICAL tenses even if their governing predicate is a preterite, since modal relations of a predicate of a past action are often described either by their *present effects*, or by effects in no connection with the time of the principal predicate:

A. LOGICAL tenses, in such predicates, *must* be used:

1. if the predicate of the clause is a 'NECESSARY PERFECT', which is the case if the past action expressed by it contains a *present action by implication* according to *R. 94, Obs. 2* (See *Obs. 4*); 2. if the predicate is a 'NECESSARY IMPERFECT', *i. e.* if the action is such that, according to the general rules § 573 foll., it would be in the imperfect if in the indicative (for instance if it expresses a state, a continued or repeated action, habit etc. determined by the time of the principal action). In this instance the dependent subjunctive is always in the *imperfect*; but such imperfects are *logical* tenses, although agreeing with the law of consecution (*Obs. 5*).

B. LOGICAL tenses are *generally* used if the predicate of the clause de-

<sup>1</sup> Hint.—<sup>2</sup> avert.—<sup>3</sup> *infestum ferri*, = *scire*, to act fiendishly against one's own.—<sup>4</sup> *non nosse quæstum*, to be unacquainted with the art of making money, or 'not to care to make money'.—<sup>5</sup> in prosperity.—<sup>6</sup> to consider, to take into account.—<sup>7</sup> *asperius in-rehi*, to treat rather roughly, to handle without mercy.—<sup>8</sup> by the madness of whose misdeeds, instead of 'by whose insane misdeeds'.—<sup>9</sup> corresponding to '*scelerum furōre*', instead of '*voce liberā*', in free (*i. e.* plain) language.—<sup>10</sup> rebuke.—<sup>11</sup> in vain.—<sup>12</sup> to create, to make.—<sup>13</sup> *quemadmodum... perveniretur* how to come, or 'the way to come' according to *R. 85, 8, b*.—<sup>14</sup> veins.—<sup>15</sup> vicissitudes of his old age.—<sup>16</sup> abstract dative (p. 83) 'to whom it was for a good' *i. e.* who profited by it.—<sup>17</sup> a Mysian, *i. e.* orator.—<sup>18</sup> a Phrygian.—<sup>19</sup> *exagitetur ut putidus*, is criticised as 'rotten', *i. e.* is obnoxious to their tastes.—<sup>20</sup> would have withheld his opinion as to Persius's authorship (of a certain oration).—<sup>21</sup> had criticised him in regard to Menelaus of Marathus.—<sup>22</sup> the more as (understand: 'This argument is the more conclusive because etc'.)—<sup>23</sup> The pluperfect '*habitus esset*' would represent the clause as temporal, like '*quum... objectisset*' (= after he had been held).—<sup>24</sup> speechless, without language = 'as unable to make a speech'.—<sup>25</sup> with a small force.—<sup>26</sup> to rout.—<sup>27</sup> *urbs munita*, large fortress.—<sup>28</sup> = *nisi*.—<sup>29</sup> would lead us too far.—<sup>30</sup> except.—<sup>31</sup> *adolescere*, to grow to maturity.—<sup>32</sup> *munus militiae sustinere*, to endure military service.—<sup>33</sup> in public.—<sup>34</sup> to approach them, to be in their company.

notes an action happening at the *speaker's* time (Obs. 6), and *often* in clauses of intensity (Obs. 8), or to make certain logical relations of the clause more prominent (Obs. 8, *c*), and in negative modal clauses introduced by *quin*, or a *relative* (Obs. 10); but perfect subjunctives are *rarely* used in CONJUNCTIVE CLAUSES, and in CLAUSES OF MANNER and COINCIDENT ACTION (Obs. 8).

C. LOGICAL tenses are *never* used if the clause is represented as *determined* by the action of the *subject* (OBS. 12)\*.

Obs. 1. MODAL clauses are those which designate the adverbial relations of MODALITY (§ 551 foll.). The modal relations of MANNER and QUANTITY (intensity) are either expressed by *Ut*-clauses, or by comparative clauses (p. 743). CLAUSES OF COINCIDENT ACTION (§ 554 foll.) are expressed by *Ut*-clauses, or by clauses introduced by the equivalents of *at quā*, or a relative; but also by clauses with '*quā*' and '*dum*' (see p. 673). — In the relation of CAUSE and EFFECT (§ 563), the *cause* is expressed by *causal clauses*, and the *effect* by *Ut*-clauses. *Ut*-clauses describing 'effect' are either CONJUNCTIVE, if the effect is represented as a '*result*', or FINAL if the effect is represented as a '*purpose*' of the subject (see Obs. 12). Consecutive clauses have the force of sentences introduced by *utquā* (see § 385) or by equivalent expressions (*quo factum est* etc.). Hereby they are easily distinguished from clauses of manner. Hence modal *Ut*-clauses are of five kinds: 1) causes of manner; 2) of intensity; 3) of coincident action; 4) consecutive clauses; 5) final clauses.

\* Our grammarians have failed to establish any principle by which the question what tenses must be used in modal *if*-clauses, may be decided. They neither distinguish between the different kinds of modal *if*-clauses (reaffirming 'consecutive clauses' with clauses of manner and intensity), nor between the instances in which the use of logical tenses is necessary, or optional, or forbidden. ZUMPT says: 'If the clause does not refer to the particular points of the main action, but to the result, the governing preterite requires a *present*'. To refuse this badly-expressed rule, it is only necessary to peruse part of our examples (for inst. in Obs. 6 and 7). — MADVIG says: 'The perfect is used instead of the imperfect in consecutive clauses if the action of the clause is stated as an historical fact, for the sake of the fact as such, and not merely in regard to the main action or to a particular time-point'. — [THACHER, following the version of his English prototype, renders Madvig's words: 'If the statement in the subordinate proposition is conceived and expressed GENERALLY as a distinct historical fact'. By 'generally' the German '*überhaupt*' is rendered, which, however, in this passage means 'as such'. Thus Madvig's rule is made all but unintelligible by a bad rendering.] For the refutation of this rule see Obs. 7. — ENGLMANN says: 'In consecutive clauses, the *perfect* is used instead of the imperfect if the action is conceived without a reference to the principal sentence, being represented as an *existing remarkable fact*'; which is refuted by the same reasons as Madvig's rule. — BIERL to Nepos Milt. 5, 1 says: 'The *perfect* in clauses of this kind is used if both predicates refer to the same fact', which clause Rem. 480 to REINIG'S *Lat. Sprachwissenschaft* says would be more correct if it were said of the *imperfect*. — KÜHNER says in substance: 'In consecutive clauses the perfect and present are used after preterites, if the clause refers to the time of the speaker, but the tenses are determined by consecution if they are expressed as a thought of the subject, as *Rom. lat. tunc fortiter percontabatur ad hostes plane derelictum*'. The first part of this rule, even if it were true, leaves the chief question unsettled, namely in which instances preterite predicates may be referred to the speaker's time'. In the last part of the rule, Kühner evidently confounds consecutive and final clauses; and moreover, there are many instances, in which the predicate *neither* refers to the speaker's time, *nor* contains a thought of the subject. For these instances Kühner gives no rule. — MEIRING says: 'In consecutive clauses the *imperfect* is used if the result is considered as coincident with the time of the main action [which is refuted by innumerable examples in which the *imperfect* is used if the result is subsequent to the main action, and by many examples in which the *perfect* is used in the case of coincidence]; the *perfect* is used if it is conceived as "now complete" [which, if it means anything, must mean 'if it is past in regard to the speaker's time' which leaves the main point unsettled, the same as Kühner's rule], and the *present* is used if it is occurring now'. (See Obs. 6). The author of the 'Public Lat. in School Grammar', says 'If in historic (i. e. in preterite) consecution the fact itself is to be brought out very distinctly, then the perfect subjunctive is used instead of the imperfect: Ita miseri erant ut fletum, they were so wretched as to weep: ita miseri fuerat ut flevissent, they were so wretched that they (actually) wept'. — For such absurdities (which easily might be multiplied by quoting other grammarians) Madvig's rule alone is responsible.

**OBS. 2.** All the modal clauses may be indicated in the principal sentence by one of the demonstrative (definite) FORM-ADVERBS (pp. 239. 261. 271. 280. 281), which are called ‘ANTECEDENTS’ of the clause’. Clauses of manner and coincident action have the antecedents *sic* and *ita*; clauses of intensity are preceded by *tam*, *adeo*, *usque eo*, *ita*, and precedents *sic* and *ita*; clauses of intensity are preceded by *tam*, *adeo*, *usque eo*, *ita*, and precedents *sic* and *ita*; clauses of intensity are preceded by *tam*, *adeo*, *usque eo*, *ita*, and precedents *sic* and *ita*; clauses of intensity are preceded by *tam*, *adeo*, *usque eo*, *ita*, and precedents *sic* and *ita*. These form-adverbs are often merged in the qualitative and quantitative form-adjectives *talis*, *hic*, *ille*, *is*, and *eiusmodi* (= *talis*) are used as antecedents represented as a ‘quality’, *talis*, *hic*, *ille*, *is*, and *eiusmodi* (= *talis*) are used as antecedents represented as a ‘quantity’, *talis*, *hic*, *ille*, *is*, and *eiusmodi* (= *talis*). If manner generally in consecutive, and final clauses; but also in clauses of manner and coincident action, rarely in clauses of intensity, as: Mons altissimus impendebat ut perpauci prohibere possent (CONSECUTIVE CLAUSE = quo factum est ut etc.); A very high mountain was in the way, so that a very small force could defend the pass. Cæs. B. G. I, 6.—The antecedents may also be placed between the principal sentence and the Ut-clause, which in almost all instances is placed after the principal sentence, as: Tibicines Tibur abierunt, adeo ut nemo in urbe esset qui sacris præcineret (A CONSECUTIVE CLAUSE, adeo ut being = quo factum est ut, or = itaque with an indicative); The flute-players wandered out to Tibur, so that there was nobody in town to perform the sacred music. Liv. 9, 30. In final clauses are rendered by ‘in order’ followed by ‘that’ or ‘to’, e.g., Tibicines Tibur abierunt, ut nemo in urbe esset qui sacris præcineret.

being = *quo facium erat*, or = *augere*.  
out to Tibur, *so that there was* nobody in town to perform the sacred music. Liv. 3. 30.  
The antecedents in final clauses are rendered by 'in order' followed by 'that' or 'to';  
sometimes by 'so that'. In the other modal Clauses the antecedents whether ex-  
pressed or understood, are rendered by 'so' (-such) or 'in such a manner', 'in such a de-  
gree', followed by 'that', or, if both propositions have the same subject, by 'as to';  
E.g. *quantia ita peregrinata tota Asia est ut se externis oblineret moribus* (a CLAUSE of  
'COINCIDENT ACTION' = 'se oblinens'); (Greek) eloquence made its circuit through  
the whole of Asia *so as to* shape itself according to the foreign manners. Cic. Brut. 13,  
51.—Frequently however it is better to recast the clause in English (most frequently  
clauses of coincident action, and consecutive clauses), as: In castris Pompeji vidēri li-  
cuit trichas structas etc., *ut facile existimāri posset* nihil eos de eventu ejus diē timu-  
isse (a CONSECUTIVE clause, *ut* = hence); In Pompey's camp might be seen costly cot-  
tages etc., *which goes to show* that they had no concern as to the issue of that day. Cæs.  
B. C. 3, 96.—(Ei qui pecunias imperabant) dictabant se domo patriāque expulsos om-  
nibus necessariis rebus egēre, *ut* honestā præscriptione rem turpissimam tegerent (a  
clause of coincident action = *tegentes*); Those who made requisitions in money stated  
that, being banished from their own country, they were in want of the necessities of  
life, *thus using* an official requisition as a cover for a most disgraceful act. Cæs. B. C. 3,  
32.—Miltiadi *talis* honor tribūtus est quum pugna depingeretur *ut* prima ejus imāgo pone-  
rētur [a clause of manner]; The honor shown to Miltiades consisted in placing his image  
first in the picture of the battle. Nep. Milt. 6. 3. See Ex. 21.—Frequently clauses of  
coincident action pregnantly contain an adversative proposition, and are then in English  
introduced by 'but so that', or 'while': Antonius *ita* se recipiēbat *ut* nihil nisi de rei-  
publice perniciē cogitāret; Antonius retreated, *but so that* (or 'while') *he thought of*  
nothing but the destruction of the republic. Cic. Phil. 4, 2.

Obs. 3. In modal Ut-clauses the *imperfect* is the only tense of preterite consecution, the pluperfect being excluded by the nature of these clauses which never denote an action anterior to the principal predicate. Very rarely the pluperfect subjunctive is used in modal Ut-clauses, denoting a time *coincident* with that of its governing predicate, if the latter is likewise a pluperfect subjunctive, being dependent on another principal predicate: Atticus, quum tantā prosperitate usus esset valetudinis at annis triginta medius, Cū non indigisset, meus est morbum. Nep. Att. 21.—Periphrastic imperfections, which are occasionally used in clauses of this kind, must not be mistaken for pluperfects, as: In balneatis assa *lūa erat* postq̄ ut eorum vaporum non *esset subiectum* cubiculis; In the bathing apartments the sweating compartment *was so placed* that the fumes *were* under the lounges. Cic. Qu. Fr. 3. 1. 2.

ONS. 4. In *all* modal *Ut*-clauses the predicate is in the PERFECT SUBJUNCTIVE if it expresses a past action the results or effects of which are still lasting at the speaker's time, so as to contain by implication a present tense of another, or of the same verb. The functions of the perfect *indicative* (p. 503 R. 46) are thus transferred to the perfect *subjunctive*, which function would be lost by using the imperfect subjunctive. It makes here no difference whether the principal predicate is likewise a perfect with the same force, or not, as: *Ita traxit ordo rerum orationem ut jam ad minores perperam* (consecutive clause); The (observation of) historical order has so shaped my discourse that *I have already arrived* at the younger [orator-]. (Cic. Brut. 65, 232.—*Æmilius Paulus tantum in ærarium pecuniæ iniecit ut unus imperatoris præda finem attuleret tributorum* (clause of intensity); *Æmilius Paulus placed so large a sum in the coffers of the State, that one commander's booty has put an end to the taxes.* Cic. Off. 2, 22 [the state of 'immunity from taxes' was still lasting when the author wrote these words. This feature would

not be expressed by 'afferret'.] See Ex. 1-4.—Here belong actions represented as having always or never happened up to the speaker's time, as: *Tantum exarsit bellum ut numquam pari periculo fuerit Carthago*; So great a war was kindled that Carthage has never been in an equal danger. Nep. Hann. 4, 3. See Ex. 5-7.—If the principal predicate of a modal Ut-clause is a perfect including a present by implication, the tense of the predicate of the clause is determined by the rules Rem. 94, Obs. 2, foll., being either a present or imperfect if represented as happening at the speaker's time, and a perfect, if represented as past in regard to the speaker's time, as: *Tanta superstitio mentis omnium Siculorum occupavit ut, quaecunque acciderent incommoda, propter eam causam evenire viderentur*; So great a superstition has seized the minds of the Sicilians that, whatever misfortune occurs, seems (to them) to happen from that cause. Cic. Verr. 2, 4, 51.—*Equidem sic jam obduri ut animo aequissimo audirem Laberii poemata*; I have already become so callous, that I hear Laberius's poems with the greatest equanimity. Cic. Fam. 12, 18, 2. (Ex. 8-11.)

Obs. 5. The imperfect subjunctive is used in all the modal Ut-clauses as a logical tense, if the predicate denotes habit, or any of those actions which would require an imperfect if they were in the indicative. The use of a perfect in such predicates would be faulty, because the perfect, in this instance, would be neither a logical tense, nor a tense by consecution: *Oratio ita libere fluēbat ut nusquam adhæresceret* (imperf. of HABIT); His language was so fluent, that it stopped at no point. Cic. Brut. 79, 274.—*Fossam pedum viginti directis lateribus duxit, ut ejus fossæ solum tantumdem paleret quantum summæ fossæ labra distarent* (imperf. of STATE); He built a canal twenty feet deep with perpendicular sides, so that its bottom had the same measure in width as the distance of the edges at the top. Cæs. B. G. 7, 72. By examining the tenses of modal Ut-clauses in the different passages of classical authors, it will appear that among the imperfect subjunctives used in them, a large majority fall under this rule.—See Ex. 11-15.

Obs. 6. If the predicate of the Ut-clause is represented as happening at the time of the speaker, it is placed either in the present, or in the imperfect, but more usually in the former tense, as: *Curio multa dixit et illustria, ut eum mirer consulem non fuisse*; Curio spoke in many cases, and his speeches were celebrated, so that I wonder he had not been consul. [CONSECUTIVE clause.] Cic. Brut. 32, 124.—*Trajanus rempublicam ita administravit ut omnibus principibus merito præferatur*; Trajanus administered the State in such a manner that he is justly preferred to all emperors. [CLAUSE OF MANNER.] Eutr. 8, 2.—*Themistocles adeo eruditus est litteris Persarum, ut multo commodius dicatur apud regem verba fecisse quam hi qui in Perside erant nati*; Themistocles was so proficient in Persian literature, that he is said to have more fluently addressed the king than those who were born in Persia. [CLAUSE OF INTENSITY.] Nep. Them. 10, 1.—See Ex. 16-18. But: *Horum oratorum tanta multitudo fuit, tanta laus, ut quum summa mirarēmur, inferiora tamen probarēmus*; These orators were so many, and so excellent, that while admiring the best, we yet approve of the inferior [both *mirarēmur*, and *probarēmus*, are present acts of the speaker, and would be presents if in an independent sentence]. Cic. Or. 2, 5.—*Reddita est ei tum a majoribus statua pro vitâ, quæ (= ut ea) nunc ad tantæ familiæ memoriam sola restaret*; A statue was then erected to him, by our ancestors, in return for his life, which statue (so that it) is now alone left as memorial for such a family. Cic. Phil. 9, 2, 5.—*Qui plus opibus, armis, potentiâ valent, profecisse mihi tantum videntur stultitiâ adversariorum ut etiam auctoritatē jam plus valerent*; Those who prevail by wealth, by their arms, and power, seem to have been so much benefited by the folly of their adversaries that they are now prevailing even by authority. Cic. Fam. 1, 7, 10. See Ex. 19-21.

Obs. 7. Aside from the instances mentioned Obs. 4-6, the perfect subjunctive often occurs in modal Ut-clauses in place of an imperfect, but it is impossible to reduce this usage to a general rule, all the attempts of the grammarians to establish such a principle having proved futile. Madvig's rule (see foot-note p. 434), according to which the predicate of modal Ut-clauses is in the perfect, and not in the imperfect subjunctive if, besides its reference to the principal predicate, it is also represented as a distinct historical fact, is not warranted by the usage of the Latin authors, aside from the impossibility of making the 'distinctness' or 'non-distinctness' of an historical fact available as a criterion. Madvig's chief passage by which he means to prove his rule (Cic. Off. 2, 22, quoted Obs. 4) requires the perfect for a reason very different from that which he has proposed (see Obs. 4), and the same is the case with his other passages (Cic. Verr. 2, 5, 10; and Fin. 2, 20. See Obs. 8). There are a large number of passages in which the imperfect is used in an Ut-clause, although the fact stated in it is not only a 'distinct' historical fact, but even the main action, so that the principal sentence may be altogether omitted without affecting the sense; and on the other hand there are passages with perfect subjunctives, containing facts without any historical value, only serving to illustrate a high degree of the principal action: [IMPERFECTS containing the main fact, so that the principal predicate may be

omitted.] *Tanta fuit omnium expectatio visendi Alcibiadis ut ad ejus triremem vulgus conflueret*. Nep. Alc. 7, 11 (= When Alcibiades arrived, the whole population flocked to his ship to receive him).—*Adeo loci opportunitate profecit uti ad Pompējum litteras mitteret, navis reliquas subdaci et reflecti juberet*. Cæs. B. C. 3, 23 (= Having obtained an opportunity, he sent a message to Pompey to have the rest of the ships placed on shore etc).—*L. Gellius ita diu vixit ut multarum ætatum oratoribus implicaretur* (= L. Gellius belonged to several rhetorical periods). Cic. Brut. 47, 174.—*Adeo ea res subita fuit ut prius Anio nem transirent hostes quam obviam ire Romānus posset*. Liv. 1, 36 (where the passage over the Anio is evidently the main fact, the principal sentence having only the logical value of a causal clause).—[PERFECTS, merely illustrating the degree of the principal predicate.] *Quibus rebus adeo ille est commotus ut nonnumquam vide finem facere voluerit*. Nep. Timol. 1, 6 (= By these facts he was greatly affected).—*Tantum exarsit interitum bellum ut numquam pari periculo fuerit Carthago*. Nep. Ham. 2, 1 (= A most terrible civil war arose).—*Aristides in tantâ paupertate decessit ut, qui effertur, vix reliquerit*. Nep. Arist. 3, 2 (= Aristides died in the greatest poverty).—*Cælius talis tribunos fuit ut nemo a bonorum causâ steterit constantius*. Cic. Brut. 79, 273 (= Cælius constantly stood in the tribunate). How little the Latin authors considered historical prominence (or 'distinctness') as influencing the tense of an Ut-clause, appears from a large number of similar passages, in one of which the predicate containing a distinct historical fact is placed in the perfect, while in the other passage an imperfect is used:

## Imperfects

*Etrusci prolium inveni adeo raptim ut abjectis missisque stragem gladios vadentes in hostem*. Liv. 9, 35.

*Tanta vi in Pompēji equites impetum fecerunt ut eorum nemo pariteret*, omnesque montis altissimos perierunt. Cæs. B. C. 3, 93.

*Tanta fuit in capiendis castris celeritas ut Teutomatus rex, s. portio corporis parte nuda, vix se ex manibus militum eriperet*. Cæs. B. G. 7, 46.

*Tantus imperator fuit Lucullus ut Mithridates hunc a se magis decem annorum quam quinquaginta annorum fateretur*. Cic. Ac. 2, 1, 3.

*Horum in imperio tanta commutatio facta est ut Lacedæmonii pacem peterent*. Nep. Alc. 5, 5.

*Tempestas lavis Rhodias afflixit ita ut nemo sedem naufragio intrinset*. Cæs. B. C. 3, 13.

*Ita tum ab his patens aquaibus causa ita dicta est ut eloquentium juris peritissimus Crassus, juris peritorum eloquentissimus Scævola peteretur*. Cic. Brut. 39, 145.

*Statim Metropolim venit sic (= tanta celeritate) ut multos expugnati oppidi famamque antecederet*. Cæs. B. C. 3, 80.

## Perfects

*Temporis tanta fuit exiguitas ut non modo ad insignia accommodanda, sed etiam ad guicas induendas tempus defuerit*. Cæs. B. G. 2, 21.

*Singulas navis nostri consecrati expugnaverunt ut perpaucæ ex omni numero ad terram pervenerint*. Cæs. B. G. 3, 15.

*Tantus terror omnis occupavit ut ipse rex prope semitidus, vix decem habitum, ad flumen navisque perferret*. Liv. 24, 40.

*Talem se imperatorem præbuit ut eo tempore omnibus appareret, nisi ille fuisset, Spartam futuram non fuisse*. Nep. Ages. 6, 1.

*Quibus malis adeo sunt Peni perterriti ut auxilia ad Romānis pollicerent*. Nep. Ham. 2, 3.

*Imber ingens ita utramque aciem turbavit ut vix annis retentis in castra sese receperint*. Liv. 26, 11.

*Adeo excellēbat Aristides ut, unus post hominum memoriam, cognomine Justus sit appellatus*. Nep. Arist. 1, 2.

*Tanta celeritate usus est ut prius in Asiam cum copiis pervenerit quam regii satrapæ cum scirent profectum*. Nep. Ages. 2, 2.

Obs. 8. The usage of the Latin writers in regard to the perfect subjunctive in modal Ut-clauses aside from the general rules in Obs. 4-6 is defined by the following rules:

A. The perfect subjunctive is rarely used in clauses of manner, and in consecutive clauses (where *ut* has the force of *itaque* or of *quo factum est ut*); but it often occurs, in place of an imperfect, in clauses of intensity. The imperfect is likewise the regular tense in clauses of coincident action, except when they are introduced by *quin* or a relative with a negation in place of *ut non* (see Obs. 10); Hinc sic adjunxit octavam lectionem ut factum ex clausis appareret; To this lesson he added the eighth, so as to form just one lesson out of two. Cæs. B. C. 3, 89.—Est propositum colligere eos qui hoc numero in civitate facti sunt ut fuerint oratorum locum; We have proposed to give a list of those who had such a position in the community as to be classed among the acknowledged speakers. Cic. Brut. 36, 137.—If in Ut-clauses not belonging to those of inten-

\* Thus a perfect of intensity is expressly opposed to an imperfect of manner in the passage Cic. Verr. 2, 5, 10, by which Madvig supports his 'distinct-historical-fact' theory: *Verres ita vivebat hibernis menseibus ut cum non facile extra tectum quisquam vi-*

eity a perfect subjunctive occurs in place of the regular imperfect subjunctive, it generally belongs either to the 'necessary perfects' (Obs. 4), or to those which, according to No. C are used from particular reasons. But sometimes, though rarely, perfects occur in such clauses without any assignable reason, as: Murena maximo in bello sic est versatus ut hic multas res et magnas sine imperatore gesserit, nullam sine hoc imperator; Murena gave such a report of himself in one of the greatest wars, that he performed many and great acts without his chief, (while) the chief did nothing without him. Cic. Mur. 9, 20\*.— Sometimes clauses of INTENSITY take the antecedents properly belonging to the clauses of MANNER, in which instance the perfect is used in the same way as if they had their proper antecedents, as: Hannibal odium adversus Romanos sic (i. e. tantā constantiā) conservavit ut prius animam quam id deposuerit. Nep. Hann. 1, 3. Thus 'talem imperatorem' in the passage Nep. Ages. 6, 1 (quoted Obs. 7) has the force of tantum imperatorem.— Often the antecedent is omitted, and in this instance the subjunctive is very rarely in the perfect, as: Cuius adventus Pompejanos compressit, nostrosque firmavit, ut se ex maximo terrore colligerent (so that they recovered from a formidable panic). Cæs. B. C. 3, 65.— Domitius aperte absolvit ut omnes viderent; Domitius cast his vote for acquittal openly, so that all saw it. Cic. Qu. Fr. 3, 4, 1.

B. In clauses of INTENSITY the use of the perfect or imperfect is optional with the writer.\*\* But perfects, in the following instances, are more frequently used than imperfects: 1) if the Ut-clause has the value of an INDEPENDENT SENTENCE, and the principal sentence may be replaced by a CAUSAL CLAUSE, or by an adverbial object of cause, as: Tanto favore ad suffragium ferendum in tribus discursum est, ut tribuni repente incepto desisterint: The people repaired with so much satisfaction to their respective polling places in order to cast their votes, that the tribunes suddenly changed their tactics. Livy, 25, 2 (i. e. The tribunes changed the tactics because they saw that the people etc.).— Id adeo superbum visum est Hannibali ut extemplo tabernas argentarias, quæ circa forum Romanum essent, jussit vendere; This seemed so impudent to Hannibal that he immediately gave orders to sell at auction the banker's stands at the Roman forum. Liv. 26, 11 (Hannibal gave orders because he considered this as impudent). Here belong the passages Cæs. B. G. 2, 21; Nep. Hann. 2, 3; Liv. 26, 11; quoted Obs. 7. See Ex. 22, 23.— 2) If in the principal sentence a QUALITY of the subject, or a trait of character is predicatively stated, and the Ut-clause contains an actual fact from which the intensity of the quality is to be inferred, as: Octavius tantum auctoritate valuit, ut legem Semproniam frumentariam abrogaverit; Octavius had so powerful an influence, that he repealed (succeeded in repealing) the Sempronian corn-law. Cic. Brut. 62, 22 (ut abrogaret would

deret; quum autem ver esse cœperat, dabat se itineribus, in quibus eo usque se præbebat impigrum, ut eum nemo unquam in equo sedentem viderit; Verres, in the winter-months, lived in such a manner that hardly any one saw him out doors; but when spring commenced, he applied himself to his journeys, in which he showed himself to such a degree active that no one ever saw him riding on horseback.— In the first clause the imperfect *videret* is used, because it is the usual tense in a clause of MANNER; in the last clause the author has changed the tense into the perfect *viderit*, partly because it is a clause of intensity, but chiefly because it denotes an action which never happened (Obs. 4). The reason by which Madvig accounts for this perfect (that it contains a 'distinct' historical fact) would apply with exactly the same strength to the first clause, in which the imperfect *videret* is used. The same may be said of his additional remark, that the imperfect *videret*, if used in the second clause, would mean 'habit'. From this remark (which is the more strange because Mr. Madvig confines in his rules about the imperfect, the idea of habit to the imperfect indicative) it would follow that *videret* in the first clause does mean habit, which it evidently does not; and if it did mean habit, *viderit* in the second clause would likewise mean habit, since the predicates of the two clauses are perfectly alike in regard to the nature of the action.

\* Some interpreters have ventured the opinion that the perfect is used in this clause, because the principal sentence contains no real fact, the Ut-clause alone containing the fact of the sentence. But they overlook that just in constructions of this kind (if a verb of doing is used as a mere grammatical form, while the substance of the action is expressed by the Ut-clause) the tense of the clause almost invariably is the imperfect. See No. C.

\*\* Some grammarians state that 'some historians, especially Nepos, use perfect subjunctives in consecutive clauses where the imperfect would be more usual (Madvig), which statement seems to be made only for the sake of having something to account for the many passages which prove the unsoundness of Madvig's theory. Nepos, in a very few passages, (see No. D) uses improper perfects. But his usage, in general, agrees with that of Livy and Cæsar. This author, however, employs the form of Modal Ut-clauses altogether too often (in the average about three times on each page), and often when other writers would have made use of different forms.

impart a different force to the sentence, intimating that Octavius had then so much authority as to repeal that law, while *abrogaverit* places the principal action in the light of a general quality).— See Ex. 24, 25. If, however, the predicate in the Ut-clause does not denote an actual fact, but an action falling under the rules of the imperfect tense (§ 573 foll.), the imperfect subjunctive must be used, as: Fuit etiam disertus, ut nemo ei Thebanus par esset. Nep. Ep. 5, 1. Thus in the passage Cic. Ac. 2, 1, 3, quoted Obs. 7. See Ex. 25-27.

C. The perfect subjunctive in modal Ut-clauses is frequently used with the force of a PERFECT INDICATIVE to designate the action as a complete act, being expressly opposed to 'non-complete' acts. This occurs 1) if the predicate of the Ut-clause is opposed to other co-ordinate predicates which, being represented as 'incomplete at the given time', are placed in the imperfect according to Obs. 5; as: Zeno nullo modo is erat qui, ut Theophrastus, nervos virtutis incidere, sed contra qui omnia in unā virtute poneret; Zeno phrastus, nervos virtutis incidere, sed contra qui omnia in unā virtute poneret; Zeno was by no means the man (= such a man as) to cut, like Theophrastus, the sinews of virtue, but on the contrary such a man as to refer everything to virtue alone. Cic. Ac. Post. 1, 10. [Here *incidere* represents a single act, and *poneret* designates Zeno's views as a lasting state.] See Ex. 28. With a similar force the perfect subjunctive is opposed to imperfect indicatives, as: Venerat ad me Brutus cum T. Pomponio, homines mihi ita cari, ut eorum aspectu omnis quæ me angerebat de republica cura consederit; that, at the sight of them, all the care which was pressing upon me in regard to the republic, subsided. Cic. Brut. 3, 10. [Here the author designates by the perfect subjunctive *consederit* the act both as instantaneous, and as momentary, while *consederet* would, according to Obs. 5, impart to the action an idea of non-completeness, corresponding to *angerebat*.]— 2) In the same way the perfect subjunctive is used in modal Ut-clauses with the idea of a 'complete' action, if the predicate of the Ut-clause is represented as the COMPLETING ACT and FINAL RESULT of the principal predicate, as: Apud Romanos tantum vulnere fuit ut plures post prælium cauci decederent quam ceciderant in acie; On the side of the Romans there were so many wounds that more soldiers died from their wounds after the battle than had fallen in the battle. Liv. 9, 33.— Adeo ne fugæ quidem iter patuit ut ex tanta multitudine vix mille evaserint; So little room was there for flight that out of so great a number scarcely one thousand escaped. Liv. 25, 19.— Here belongs the passage Cæs. B. G. 3, 15, quoted Obs. 7.— But if the result is not a final one, the predicate denoting a non-complete action, the imperfect is used, as in the passage Cæs. B. C. 3, 93, quoted Obs. 7, where *consederant*, and *perierant* are in the imperfect as non-complete acts. But in a similar passage Nepos uses a perfect: Adeo perterruerunt hostes, ut Persæ non casis, sed navis perierint (Milt. 5, 5), where the perfect *perierint* expresses the idea that the Persians really reached their ships.— 3) Sometimes perfect subjunctives are used in modal Ut-clauses to express that the action was not confined to the time spoken of, as: Iphicrates exercitum sic omni disciplina militari erudit, ut Iphicratenses apud Græcos in summa laude fuerint. Nep. Iph. 3, 4. Here 'essent' would be understood as referring to Iphicrates's time, while the author intended to state that the name 'Iphicratenses' remained after Iphicrates's time.

D. In Ut-clauses not belonging to the modal clauses, the perfect subjunctive can only be used if, according to R. 94, No. 1-5, logical tenses may or must be employed. This, particularly, refers to predicate clauses (in which the Ut-clause fills up the blank idea of a verb of 'doing'; see p. 483). But, very rarely, a perfect subjunctive occurs in predicate clauses as if the clause were a modal one, as: Quo factum est ut plus quam colligæ Miltiades valeret. Nep. Milt. 5, 1, where the imperfect *valeret* would represent the idea of the verb *valere* as a quality of Miltiades, while the author meant that Miltiades's counsels prevailed on a certain occasion. But the language does not permit the use of logical tenses in clauses of this kind, nor is the doubt about the meaning of the predicate removed by the use of a perfect (which by no means refers the action to the time spoken of). Hence '*valeret*' in the above passage must be considered a solecism. The sentence should have been recast.

Obs. 9. If the subject or object of a modal clause has a substantive in the principal sentence for an antecedent, so that a personal pronoun (= *is*) would be used in English, the clause often assumes a relative form in Latin (p. 560), in which instance the relative *qui* has the force of *ut is*, being placed in that case which the pronoun is would have if it had been used in connection with *ut*. The same substitution is made for *ejus*, or *eorum*, which is changed into *cujus* or *quorum* (that his or their etc.). The predicates of such relative clauses (always requiring the subjunctive) take the same tenses as the Ut-clause would take, as: XXV. iudices ita fortes fuerunt ut vel perire maluerint quam perdere omnia; XXXI. fuerunt quos (i. e. ita turpes ut eos) famis magis quam fama commoverit; Twenty-five (of the) judges were so brave as to prefer death rather than lose everything (i. e. their honor); but thirty-one were such (i. e. so corruptly) that 'famine' influenced them more than fame. Cic. Att. 1, 16, 5.— Here belong the passages Cic. Ac. 1, 10, and Cic. Phil. 9, 2, 5 (quoted Obs. 8, No. C., and Obs. 6).

Obs. 10. NEGATIVE clauses of COINCIDENT ACTION which have a NEGATIVE ANTECEDENT (or an antecedent virtually negative, as, *Num quid est?* = *nihil est*) in the principal sentence, almost always, take the relative form (*nemo qui non*, *nullum quod non* etc.; instead of *nemo talis ut non*, *nihil ejusmodi ut non*), being often rendered by 'WITHOUT' before a participial noun (see p. 189, No. 3). In place of *qui non* (the relative being the subject\*), the conjunction *quin* is frequently used, being rendered in the same way as the relative with the negation. In such relative and Quin-clauses the predicate (which is always in the subjunctive), is more frequently placed in the perfect than in the imperfect, as: *Neminem pratermisi, quem quidem ad te perventurum putarem, cui litteras non dederim*; I did not let anyone pass, provided I thought he would reach you, to whom I did not give a letter (*without handing him a letter to you*). Cic. Fam. 2. 1. 1.— *Nemo Lilybaei fuit quin viderit, nemo in Sicilia quin audierit*; Nobody was at Lilybaeum who did not see it; nobody was in Sicily who did not hear it. Cic. Verr. 2. 5. 54.— *Quam tu domum, quam urbem adisti, quod fanum, quod non eversum atque extersum reliqueris?* What house, what city did you enter, what temple, without leaving it despoiled and cleaned out? Cic. Verr. 2. 2. 21. See Ex. 29-33.

Obs. 11. Sometimes, in constructions with modal Ut-clauses, the remarkable idiom occurs that the clause which has the grammatical form of an Ut-clause, has no logical connection with the principal sentence, while a relative or a Quin-clause dependent on the Ut-clause, is the one by which logically the modality of the principal sentence is described. The two modal clauses thus combined must be considered as one single Ut-clause, and may often be contracted into one clause. But frequently they must be rendered by making the first Ut-clause an independent sentence, and by changing the principal sentence into a temporal clause. The predicates of the two modal clauses must always be in the same tense, which, if the principal predicate is a preterite, may be either an imperfect or a perfect, as: *Balbus ita vivebat ut nulla tam exquisita voluptas qua non abundaret*; Balbus lived so that no pleasure could be found so exquisite that he did not abound in it (i. e. that he had the greatest abundance of the most exquisite pleasures that could be found). Cic. Fin. 2. 20. 63.— *Alcibiades sic verba fecit, ut nemo tam ferus fuerit quin ejus causam lacrimaret*; Alcibiades spoke in such a manner that nobody was so inhuman that he did not shed tears over his fate (i. e. Nobody was so inhuman as not to shed tears etc., when Alcibiades spoke). Nep. Alc. 6. 4. See Ex. 34, 35.

Obs. 12. The predicate of a modal Ut-clause must be always placed in a TENSE BY CONSECUTION (i. e. in the imperfect in the case of preterite consecution) if the clause must be considered as *suboblique*, which is the case if the action of the clause is represented as being determined by a mental act of the (logical) subject of the principal sentence. Here chiefly belong FINAL clauses; but any other modal relation may thus be referred to the intention or will of the subject. Predicates of this kind are rendered by a potential with 'should' or an equivalent expression ('was to' etc.): *Ita inter se munera belli partiti sunt ut Epicydes praesentem (not praefuerit) custodiam urbis, Hippocrates bellum adversus consulem Romanum gereret*; They thus (in such a manner) divided among each other the functions in the war, that Epicydes was to have the guarding of the city, and Hippocrates to conduct the campaign against the Roman consul. Liv. 24. 35.— If such clauses refer to intensity, 'tantus...ut' has the meaning 'only (just) so much...as to', as: *Servius mihi videtur tantum eloquentiae assumpsisse ut jus civile facile posset tueri*; It seems to me that Servius employed only so much eloquence (or just eloquence enough) as to be able to treat with facility the points of civil law. Cic. Brut. 40. 150. 'That not' in modal clauses of this kind is rendered by *ne* or *ut ne*.— Ex. 36, 37.

Examples to Rem. 95, Obs. 4-12.

1. *Murēna Asiam sic obiit ut in ea neque avaritiae neque luxuriae vestigium reliquerit*. Cic. Mur. 9.— 2. *Huic oratori in inventendis componendisque rebus mira accuratio fuit, ut non facile in ullo diligentiore maioremque cognoverim*. Ib. Brut. 67. 238.— 3. *Ea gressimus, ut omnibus potius quam ipsis nobis consulerimus*. Ib. Fin. 2. 19.— 4. *Quibus causis tu, Brute, etiam praesto fuisti, ut, qui non satis diu vixerit, Hor-*

\* *Quin* is NOT employed for *ut non* with oblique cases of *is*. See p. 548.

1 Went through Asia in such a manner.— 2 that state in which he left Asia continued at the speaker's time ('no traces can now be found').— 3 in the collection and arrangement of his material.— 4 accuracy.— 5 a clause of intensity. *Mira* is used with the force of *tanta*.— 6 a more careful and comprehensive one. (We would say in English 'That I have not easily known any more careful etc. speaker'.)— 7 I have acted in such a manner.— 8 *consulere omnibus*, to consult the interests of any one else.— 9 *Causis praesto fuisti*, you were present when these cases were transacted.— 10 a consecutive clause, *ut* having the force of *itaque*.— 11 *qui* has here concessive force = although.—

tensius tamen hunc cursum confecerit. Ib. Brut. 94. 324.— 5. *M. Caelius talis tribunus plebis fuit, ut nemo a senatu et a bonorum causa steterit* constantius. Ib. 79. 273.— 6. *Ardebat Hortensius dicendi cupiditate sic ut in nullo unquam flagrantius studium viderim*. Ib. 88. 302.— 7. *Hoc itinere Hannibal adeo gravi morbo afficitur oculorum, ut derim*. Ib. 88. 302.— 8. *Natura corpus hominis postea numquam dextero aequo bene usus est*. Nep. Hann. 4. 8.— 9. *Natura corpus hominis sic et quod et formavit, ut alia in primo ortu perficeret*, alia progrediente natura sic et quod et formavit, ut alia in primo ortu perficeret. Cic. Fin. 5. 21.— 10. *Multis (Siculis) saepe praesentibus Ciceris maximum auxilium fuisse*. Cic. Fin. 5. 21.— 11. *Multos annos in causis publicis ita sum versatus ut defensor*. Ib. Verr. 2. 4. 49.— 12. *Multos annos in causis publicis ita sum versatus ut defensor*. Ib. Div. in Cae. 1.— 13. *In Hortensii oratione audierim multos, laetum neminem*. Ib. Div. in Cae. 1.— 14. *In Hortensii oratione audierim magna, vocis parva contentio* (erat, omnia fere ut) similiter atque uno modo dicerentur. Ib. Brut. 66. 233.— 15. *Ad eum pervenit tam opportuno tempore, ut simul Domitium exercitus pulvis cerneretur*, et primi antecursores Scipionis viderentur. Cic. B. C. 3. 26.— 16. *Erat summa inopia pabuli adeo ut foliis ex arboribus strictis equos alerent*. Ib. 3. 58.— 17. *Non ita fracti animi civitatis erant, ut non sentirent* incellui se insulae parvae littoribus. Liv. 45. 25.— 18. *Portus (Atheniensis) mentibus circumdatus est ut ipsam urbem dignitate aequiparet*, utilitate superaret. Nep. Them. 6. 3.— 19. *Divico respondit. Ita Helvetios a maioribus suis institutos esse* ut obsides accipere, non dare consueverint. Cic. B. G. 1. 14.— 20. *Ea vestra merita erga nos fuerunt ut nos cladum nostrorum non periret*. Liv. 38. 39.— 21. *In Lucullo tanta prudentia fuit in constituendis civitatibus, ut hodie sit Asia*, Luculli institutis servandis. Cic. Ac. Pr. 2. 1. 3.— 22. *Habebat Antonius aptum quiddam ad misericordiam commovendam, ut verum videretur in hoc illud quod Demosthenem ferunt respondisse* etc. Ib. Brut. 98. 142.— 23. *Ita laudavisti quosdam oratores ut imperitos posses* in errorem inducere. Ib. 85. 293.— 24. *Verius nihil est quam quod hesterno die ipse dixit Pompeius, ita Cornelium de fortibus omnibus dimicare* ut nulla in delicti crimen caperetur. Cic. Balb. 2. 5.— 25. *Xerxes ubi Augusto mari condixit ut ejus multitudine maxime explicaret non potuit*. Nep. Them. 4. 4.— 26. *Hac victoria Lysander ciuitatis suae sibi induxit ut ejus opera in maximum odium Graeciae Lacedaemonii perveniret*. Ib. Lys. 1. 3.— 27. *Epaminondas Lysii praecipi suo, sic fuit deditus, ut eum omnibus aequationibus suis in familiaritate adoperaret*. Ib. Ep. 2. 2.— 28. *Balbus ita non superstitiosus erat ut fana condempneret*, ita non timidis ad mortem ut in acie sit ob rempublicam interficiat. Cic. Fin. 2. 20. 63.— 29. *Epaminondas ubi veritatem diligens, erat ut ne joco quidem moreretur*. Nep. Ep. 2. 2.— 30. *Curionis memoria ita fuit nulla*, ut aliquoties, tria quam proposuisset, aut quantum addidit, aut tertium quateret. Cic.

1 Has completed this career referring to the fact that judicial speaking virtually ceased directly after his death.— 2 *derim* *steterit*, to stand by the Senate. The clause implies that never up to the speaker's time any tribune was more consistent in his attachment to the Senate.— 3 *derim*, to create.— 4 a clause of manner.— 5 at the moment of its origin.— 6 that it perfects some of its parts.— 7 in the progress of its growth.— 8 to form, to add.— 9 *praesentibus*, *audierim*, help in person.— 10 Render 'by Ceres'.— 11 *audierim* *offerre*, to offer help or assistance. The perfect *audierim* contains a present by implication, either 'et hunc offerre' being understood, or the idea 'that the Sicilians are now remembering these benefits'.— 12 a consecutive clause.— 13 to protect.— 14 *in* are now remembering these benefits.— 15 a concessive clause.— 16 manner of speaking.— 17 *audierim* *offerre*, to act in criminal cases.— 18 *audierim* *offerre*, modulation of voice.— 19 clause of manner.— 20 *audierim* *offerre*, monotonously.— 21 imperfect of habit according to p. 345. *D*— 22 imperfect according to p. 344. Obs. 2.— 23 the heads of Scipio's advance-guard.— 24 stripped.— 25 imperfect of repeated action.— 26 broken down.— 27 courage.— 28 a divine.— 29 as not to notice: imperfect of inner action.— 30 imperfect of state (so that if equalled in grandeur).— 31 that the Helvetians had been thus trained by the institutions of their forefathers.— 32 *consuevit* = *socio*, being used with the force of a present.— 33 *R. 4*.— 34 that we do not regret.— 35 by observing.— 36 seems. Render: so that to him may be applied what Demosthenes is said etc.— 37 that you may lead into an error the inexperienced, i. e. in such a manner that the inexperienced may misunderstand your meaning.— 38 that Cornelius must struggle for his whole existence, i. e. in the criminal proceeding instituted against him.— 39 *ita ut...coram*, a clause of coincident action.— 40 *in crimine vocatus*, with a concessive meaning: 'being called to account for no offence whatever' = Cornelius is compelled to defend himself as a criminal, although he has committed no offence. *Vocatur* has a present meaning = 'he is called to account'.— 41 in so narrow a part of the sea.— 42 *confligere*, to give battle.— 43 to extend, to deploy.— 44 elated.— 45 was so reckless in his conduct.— 46 by his acts, by his fault.— 47 made themselves most odious to.— 48 companion, associate.— 49 as to the intimacy of his intercourse.— 50 See p. 264, Obs. 5.— 51 temples.— 52 held in contempt, had no respect for.— 53 so little afraid of death.— 54 devoted to.— 55 so wretched.— 56 Literally: When he had proposed three things, he added a fourth, or sought for the third (= did not know what the third was); i. e. when he had mentioned three things, he afterwards spoke of four or two.

Brut. 60, 217. — 28. Exercitus summā difficultate rei frumentariae afflictebatur<sup>1</sup> usque eo ut complurēs dies frumento milites caruerint<sup>2</sup>, et pecore<sup>3</sup> extrēmam famem sustentarent<sup>4</sup>. Cies. B. G. 7, 17. — 29. Nemo Agrigentis neque<sup>5</sup> atātē tam affecta<sup>6</sup>, neque viribus tam infirmis<sup>7</sup> fuit quā non illā nocte surrexerit<sup>8</sup> telumque<sup>9</sup>, quod cuique fors<sup>10</sup> offerēbat, arripuerit<sup>11</sup>. Cic. Verr. 2, 4, 43. — 30. Nemo meā restitutionē letatus est, nemo iniuriā<sup>12</sup> doluit, quā non Plancii in me misericordia grata fuerit. Ib. Plauc. 10, 25. — 31. Ecquod in hac urbe majus<sup>13</sup> unquam incendium fuit cui non consul subveniret. <sup>4</sup> Ib. Pis. 11, 26. — 32. Ex hac provinciā consulari imperio nemo<sup>14</sup> rediit, qui incolomis fuerit<sup>15</sup>, quin triumphārit<sup>17</sup>. Ib. 16, 33. — 33. Nemo fuit militum quin vulneraretur. Cies. B. Cic. Verr. 2, 5, 10. — 35. In Mittide<sup>19</sup> erat mira comitas ut nemo tam humilis esset cui non additus<sup>20</sup> ad eum palat. Nep. Milt. 8, 4. — 36. Dixit Caesar, sic belli rationem esse divīsam<sup>21</sup>, ut illi<sup>22</sup> classe navis auxiliaque sua<sup>23</sup> impedirent, ipse ut aquā terraque eos prohiberet. Cies. B. C. 3, 17. — 37. Societatem ab Romānis ita volēbant<sup>24</sup> peti ut nulum de eā re scitum populi fereat, aut<sup>25</sup> litteris mandarēt. I v. 45, 25.

*Rem. 96.* The tenses of *preterite consecution* are in two instances used as *logical tenses* if the governing predicate is *non-preterite*: 1) if hypothetical preterites are made dependent on non-preterite predicates (Obs. 1-4); 2) if, exceptionally, the subjunctive of the *imperfect* is used in place of a *perfect* (sometimes instead of a present) subjunctive to mark particular relations of the action which, in the given connection, would not appear if the regular tenses of present consecution were used (Obs. 5-7).

Obs. 1. Hypothetical subjunctives (§ 350) in both the principal and the dependent proposition, generally retain their preterite tenses (imperfect or pluperfect), whether they are made dependent on preterite, or on non-preterite predicates. A subordination of hypothetical periods occurs in two instances: 1) if the THESIS (*i. e.* the principal hypothetical sentence, See B. VI.) takes the form of a dependent clause (Obs. 2), in which instance the HYPOTHESIS (*i. e.* the hypothetical clause introduced by *si* or *ntsi*) is frequently understood; 2) if the HYPOTHESIS is made directly dependent on another sentence, the thesis being understood (Obs. 4).

Obs. 2. If the **THESIS** has the form of a dependent clause, the hypothetical *imperfect subjunctive* in both the thesis and the hypothesis, and the *pluperfect-subjunctive* in the hypothesis, always retain these forms, the same as they would have in an independent hypothetical period. No regard is, in this instance, paid to the law of consecution, and it makes no difference whether the clause as such requires a subjunctive or not, as: Hoc apparet quia verbum aliquod altius transferatur, et in oratione humili ponitur, quod idem in aliâ (i. e. 'si in aliâ poneretur') deceret: This is evident when, in ordinary style, some uncommon word is used which would be proper in higher style. Cic. Or. 25. 82. [The relative clause quod... deceret, but for its hypothetical meaning, would require the indicative; the predicate retains its hypothetical imperfect, the same as if the hypothetical period were independent 'Verbum deceret, si... poneretur'. The law of consecution would require a present or perfect.]-- Nec dubitat quin ego a te miti hoc consequi possem, etiamsi edificaturus esses: Nor does he doubt that I could obtain this of you by a mere hint, even if you were going to build. Cic. Fam. 13, 1, 5. [The clause 'quin...

<sup>1</sup> Suffered exceedingly from want of provisions.—<sup>2</sup> the perfect is used according to R. 58.—<sup>3</sup> the meat of cattle.—<sup>4</sup> satisfied their extreme hunger. *Sustentarent* is an imperfect of habit. See p. 318, OBS. 1.—<sup>5</sup> See § 409, R. 56.—<sup>6</sup> Nobody at Agrigentum was of so helpless an age.—<sup>7</sup> *vires infirmæ* = infirmities, the form *viribus infirmis* being used because ablatives of quality and number require the addition of an attribute (p. 50; p. 243, No. 24.—<sup>8</sup> to rise.—<sup>9</sup> weapon.—<sup>10</sup> chance.—<sup>11</sup> to seize.—<sup>12</sup> supply *meat*—<sup>13</sup> *mutis incandiam*, a sedition of any importance.—<sup>14</sup> literally: in regard to which the consul did not help, *i. e.* where the consul did not interfere.—<sup>15</sup> *consensit imperator* = he, nobody with consular power, *i. e.* no proconsul.—<sup>16</sup> *qui incensus fuerit* = if his army was intact (had suffered no great losses).—<sup>17</sup> without being admitted to the honor of a triumph.—<sup>18</sup> *tam magna tempestâte*, abl. of quality, = so stormy.—<sup>19</sup> = *Mibiades tam mirâ comitate erat* (of an admirable affability, so that).—<sup>20</sup> access.—<sup>21</sup> the way of conducting the war was so divided (*i. e.* among the two belligerents). The chance of war must be taken here for the logical subject, which, as it were, decreed that these should be the parts of the belligerents.—<sup>22</sup> namely the army of Pompejus.—<sup>23</sup> *his, i. e.* Cæsar's.—<sup>24</sup> It was their will that a treaty of alliance should be proposed to the Romans, but so that etc.—<sup>25</sup> a loosely construed sentence. Livy meant to say '*neve quidquam litteris mandaretur*', nor should anything be committed to paper.

*consequi possem*' would require a subjunctive even if *not* hypothetical: but the predicates *possem* and *edificaturus essem* retain their hypothetical forms without any regard to the governing present predicate *dubitat*; the same as in the first example.]\*— *Horum licentia nisi Carneades restitisset, haud scio an soli jam philosophi judicarentur*; *Had not Carneades resisted the license of these, I do not know but that they would (i. e. they probably would) be alone acknowledged as philosophers.* Cic. Div. 2. 72. 150.— If hypothetically periods of this kind are dependent on preterite predicates, they have the same grammatical form as ordinary conditional sentences, and can only be distinguished from the latter by the connection, as: *Ita legatus sum a Pompeio ut nulla re impediret quo minus, proci vellem mihi esset integrum*; *I have been appointed Pompey's lieutenant, with the proviso that I am free to resign the commission, if I wish so.* Cic. Att. 4, 2, 6. [Independently: *'Integrum mihi erit, si volam.'*] But if dependent on non-preterites, hypothetical periods may be always recognized by the imperfect or pluperfect subjunctive, while ordinary conditional sentences, in this instance, must assume tenses of present consecution. If the tense of the thesis is a *pluperfect*, the language has provided several forms by which both classes of conditional periods may be distinguished from each other (OBS. 3). See Ex. 1-3.

Obs. 3. If the thesis of an independent hypothetical period has a predicate in the *pluperfect subjunctive*, the tenses of the two hypothetical predicates, if the period is subordinated to another predicate, are treated according to the following rules:

1. The hypothesis (hypothetical clause) always retains its hypothetical tenses unchanged (See the Ex. below).

2. The thesis (principal hypothetical sentence) likewise retains its own form if the clause in which it is incorporated *does not* as such require the subjunctive. In this instance the predicate of the thesis takes one of the forms which an independent hypothetical thesis referring to the past may assume according to p. 717 foll., i. e. (a) the PLUPERFECT SUBJUNCTIVE as the regular form; but often (b) the INDICATIVE of the three past tenses of the periphrastic future is used in this connection with hypothetical force (p. 729, 27); as: In illo ipso malo Lucullus, qui tamen aliquā ex parte eis incommodis mederi fortasse potuisset (i. e. si in imperio mansisset). vestro jussu coactus partem militum dimisit; In this bad situation Lucullus, who, however, (= although he) might perhaps have remedied these defeats (i. e. if he had remained in command), was compelled by your order to dismiss part of the troops. Cic. Leg. Man. 9, 26. [The same form 'potuisset' would have been used, if the hypothetical period had been independent.]—Quia, si agendo armentum in spoliis compulsiisset, vestigia dominum eo deductura erant; Because, if he had driven the herd to the cave, the footprints would have given the clue to the owner. Liv. 1, 7. [Independently expressed the hypothetical period would have exactly the same form.]—Sometimes however the law of consecution is, in this instance, applied to the predicate of the thesis, as: Mitto quod pericula, si per me licuisset, subire paratissimus fortis; I do not mention the fact that you, if I had allowed you, would have been a most ready to undergo the dangers. Cic. Fam. 15, 4, 12. [INDEPENDENTLY: paratissimus fortis, or fortis, si per me licuisset. To the predicate fortis, on account of the governing predicate 'mitto,' the law of present consecution is applied.]

3. If the thesis assumes the form of a clause which *as such requires the subjunctive*, the two forms, mentioned No. 2, are likewise applied to the predicate, but so that (a) either the hypothetical subjunctive of the pluperfect is retained without any change, as : *Atque haud scio an par principibus esse potuisset* (i. e. si voluisset); And, to my view, he *might* have been equal to the first (literally: I do not know but that he might have been etc.). Cic. Brut. 41, 151. This method however is rare (See Ex. 4).— (b) Or the predicate may assume the *periphrastic form* (according to No. 2, b), in which instance the indicative tense which it has in the instance No. 2, is changed into a subjunctive *with a tense by consecution* according to the general rules, but subject to the exceptions of Rem. 95. Hence, if the governing predicate is *non-preterite*, the *perfect subjunctive* of the *periphrastic future* is used, as : *Quum hæc reprehendis, ostendis qualis tu, si ita forte accidisset, fueris illo tempore consul futurus*; When you find fault with this, you *show* what sort of a consul you *would have been* at that time, if by chance it had happened so. Cic. Pis. 7, 14. [INDEPENDENTLY : *Talis tu consul futurus fuisti, si ita forte accidisset.*] See Ex. 5, 7, and the example 20-22 quoted p. 133.— But if the governing predicate is *preterite*, the *periphrastic future* according to the law of consecution, is in the *pluperfect*, as : *Apparuit quantum civitatis mola vera fuisset claudes* (i. e. clades si vera fuisset); It be-

\* Preterite subjunctives like those in the following passage (quoted by Madvig and Meiring in support of the above-mentioned rule) are *not* hypothetical periods, but *regular imperfect subjunctives by concession*: Postulābant homines nobilissimī, qui ita *regerent* imperiū, ut si quidam dicerent, nemo *esset* qui non *sequeretur* praeiū, Cic. Rosc. Am. 41, 119. (INDEPENDENTLY: *Nemo est* qui non *sequitur* praeiū, which, evidently, is *not* against reality, and hence not hypothetical, but a sentence containing ordinary predicates of contingent action.)

came evident what an uproar *would have been caused* by a real defeat. Liv. 28, 24.—Id agi apparēbat ut integra sibi omnia apud Romanos essent, conciliatā apud regem gratiā, quod acceptūri fuissent venientem; It was evidently intended that their relations to the Romans should remain in their previous state, while the good will of the king was conciliated by the fact that *they would have received him if he had come*. Liv. 36, 5.—See Ex. 8.—The predicate, however, *may be* and almost always *is*, in the *perfect subjunctive*, as a *logical tense*, if it is allowed, or required by the rules in Rem. 94 and 95, although the rules in Rem. 94 are rarely applicable to hypothetical predicates. But in *modal Ut-clauses* (R. 95) the *subjunctive perfect* as hypothetical tense of the thesis, may be considered as the *rule\**, as: Virgines eo cursu se ex sacrario proripuērunt, ut, si effugium patuisset, impletūre urbem tumultu fuerint; that, if an escape had been open, they *would have filled* the whole city with tumult. Liv. 24, 26. So also, if the thesis is introduced by *quin* after *non dubito*. See Ex. 9, and p. 132, 2; p. 133. Ex. 23. Or (c) the predicate may take a non-periphrastic tense of the verb, subject to the law of consecution, the same as in No. 2, so that it is in the pluperfect, or in the perfect subjunctive, according as the governing predicate is a preterite or a non-preterite. If it is thus in the *pluperfect*, it cannot be distinguished from the form mentioned No. (a). If it is in the *perfect*, the tense of the hypothetical clause, according to R. 94, Obs. 7, is often *attracted*, as: Sequuntur illa . . . inter eorum vitam et improbiſsimorum nihil omnino interesse, ut Plato, si sapiens non fuerit, nihilo melius quam quivis improbiſsimus nec beatius vixerit; Next *will* this follow, that *there is no difference* at all between the lives of the former and those of the most wicked, so that Plato, *if he had not been wise, would not have lived* any better or happier than the very worst men. Cic. Fin. 4, 9, 21. [INDEPENDENTLY: Plato, si sapiens non fuisset, nihilo melius virisset (or vixerat).] See Ex. 10, 11.—This method is chiefly employed with a copula added to a predicate-adjective, or predicate-noun (as in Ex. 9 and 10), or if the verb does not form a verbal adjective in *ūrus*. In the above-mentioned example, the form *victūrus fuerit* has not been employed by the author on account of the ambiguity which would have arisen from the equality in form of the verbal adjective *victūrus* of the verb *vincere*. This form of the ordinary perfect subjunctive is most frequently applied to the periphrastic gerundial, to *posse* and *debere* (ought to), and certain impersonals, all of which, according to p. 727 foll., are used in the *perfect indicative* with the force of a hypothetical pluperfect subjunctive, as: Queris quid potuerit amplius assequi Plancius si Cn. Pompeji fuisset filius; You ask *what more* Plancius *could have* obtained if he had been Cn. Pompey's son. Cic. Planc. 24, 60. Very frequently these perfect subjunctives (*potuerit* and *deberet*) are used as logical tenses in modal *Ut-clauses* (according to R. 95) if the governing predicate of the hypothetical period is a *preterite*, as: Ejusmodi pactiōnes in coitione candidatōrum consularium facte sunt ut nemo bonus interesse deberet; Such compacts *were made* in the meeting of the consular candidates that no decent person *ought to have* staid there. Cic. Qu. Fr. 3, 1, 16. See Ex. 12-15.—The perfect subjunctive of *posse* is also used if the thesis has the form of a *Quin-clause* not strictly belonging to the modal-clauses, mostly if the governing predicate is *non dubitavi* or an equivalent expression, as: Haud dubium fuit quin, nisi ea mora intervenisset, castra eo die Punica capi potuerint; There *was no doubt* but that on that day the Punic camp *might have been* taken if that delay had not interfered. Liv. 24, 42.

4. If the predicate of the thesis is in the passive voice, the hypothetical forms mentioned above are generally not directly used, but, whenever the sense permits it, circumlocutions by *posse* with a passive object-infinitive, or by a *predicative gerundial* are employed, both of which are placed in the perfect subjunctive according to No. 3, c. as: Tantum pavōris iniecerunt ut, si in plano castra posita essent, haud dubie primo impetu capi potuerint; They *caused* so much terror that the camp *would* (literally '*could*') *have been* unquestionably taken if it had been erected on level ground. Liv. 25, 13.—In eos versa peditum acies haud dubium fecit quin, nisi firmata extrēma agminis fuissent, ingens in eo saltu accipienda clades fuerit; The fact that the foot-soldiers had to meet the attack of these, *made it evident* that a formidable defeat *would have been suffered* in these mountains, if the rear of the army had not stood their ground. Liv. 21, 34 [literally 'it would have been necessary to suffer', the periphrastic gerundial having evidently the force of an ordinary hypothetical passive]. See Ex. 12, 14, 15. If such a circumlocution is not admitted by the connection, the predicate of the thesis is placed in the past participle with *forem* (p. 130, R. 140; p. 137, R. 152), which, in this connection, imparts to the passive a hypothetical character, the same as the periphrastic future to the active, as: Quam vere de Lysandro foret iudicatum (i. e. si iudices eum condemnassent), oratio indicio fuit quae post mortem in domo ejus reperta est; How just the sentence against Lysander *would have been* (literally: 'how justly it would have been judged on Lysan-

\* The reason of this usage of the periphrastic form in preference to an ordinary pluperfect subjunctive, is to be found in the fact, that the connection of modal *Ut-clauses* with pluperfects is adverse to their nature. See Rem. 95, Obs. 3.

der'), was proved by the speech which after his death was found in his house. Nep. Lys. 3, 5.\*

Obs. 4. Sometimes the *thesis* of a hypothetical period dependent on another predicate, is understood. In this instance the hypothesis (hypothetical clause) takes the same form as it would have if the *the-is* were expressed, so that, if the governing predicate is non-preterite, the law of consecution is excluded in the same way as in the above-mentioned instance: Sed me vera pro gratis loqui, etsi meum ingenium non moneret, necessitas cogit; But necessity *compels* me to make rather a true than a pleasant statement, even if my feelings *would not prompt* me to do so. Liv. 3, 68. (i. e. Necessitas cogit, et cogeret si meum ingenium non moneret).—Vide ne religio nobis tam adhibenda sit quam si testimonium diceremus; Take care that *we must not apply* to it (i. e. to your statement) the aid of religion in the same manner as if we were giving a testimony. Cic. Brut. 85, 293 [= quam adhiberemus si testimonium diceremus]. See Ex. 16.

Obs. 5. The use of an *imperfect* as *logical tense*, if the subjunctive depends on non-preterite predicates, is not frequent. Such imperfects are used: 1) to give the dependent subjunctive some particular force which would be lost by a tense of present consecution (Obs. 6); 2) if the governing predicate contains a *past tense by implication*, analogous to the similar case when tenses of present consecution refer to a present contained by implication in the governing predicate (R. 94, Obs. 2). See Obs. 7.

Obs. 6. Imperfect subjunctives dependent on non-preterites refer to a particular force of the action 1) to designate the predicate as a potential interrogative subjunctive (§ 593), as: Quæro a te cur C. Cornelium non defenderem? I ask you *why I should not have defended* C. Cornelius. Cic. Vatin. 2, 5. Neither *defendam*, nor *defenderim* would express this meaning. *Defendam* would mean 'why I do not defend', and *defenderim*—'why I did not defend'. 2) Or they pregnantly refer to a 'supposition', either by representing some member of the clause as an hypothesis against reality, or implying any other supposition the force of which would not appear by using regular tenses of present consecution. Some of these imperfects strictly fall under the rule in Obs. 2. But the hypothetical reference is not always clear by the sentence itself, as it is in the passages quoted in Obs. 2, nor could it always be conveniently expressed by a regular hypothetical period. Verisimile non est ut Hejus religioni suae pecuniam anteponeret; It is not probable that Hejus *would* (not '*should*') *have held* money higher than his religion. Cic. Verr. 2, 4, 6. Here the object '*pecuniam*' has the force '*si quis ei pecuniam offerret*'. The perfect subjunctive '*anteposuerit*' would intimate that money was really offered to him (in which case we would render by '*should have held*'), while the connection shows that the money offered was a merely nominal sum, which fact the author intimates by the hypothetical form of the predicate.—Verisimile non est ut (Sulla), quem in otio semper secum habuisset, hunc in eo tumultu quem ipse comparabat, ab se dimitteret; It is not probable that, while Sulla was engaged in that rebellion which he himself was planning (= is represented as having planned), *would* (not '*should*') *have dismissed* a man whom he always had about him in quiet times. Cic. Sull. 20, 57. Here the object '*in eo tumultu*' has a hypothetical force (= si tunc in tumultu fuisset quem ipse comparasset), referring to facts which are *denied* by the speaker. If '*dimiserit*' had been used, the expression '*in eo tumultu quem comparabat*' would have been represented as containing a true fact.—Sittius is homo est ut . . . sibi nefarium bellum contra patriam suscipiendum putaret? Is Sittius a man of that character that he *would have thought* it his duty to arouse (as agent of Sulla) a nefarious war against his country? Cic. Sull. 20, 58. [Supply: '*si Sulla eum ob talem causam amandasset*', if Sulla had dispatched him for such a purpose.] '*Putaret*' would represent the '*suscipere bellum*' as referring to the real war planned at the time, which fact is *denied* by the speaker.—Video causas esse permultas quæ (= ejusmodi ut) istum impellerent; I see that *there are* many causes which *might have induced* him (i. e. Ti. Roscius to assassinate Sex. Roscius). Cic. Rosc. Am. 33, 92. ['Causas esse quæ impellerent' has the force of 'Causas satis magnas esse ut en-

\* All these substitutions prove that the Latin considered the form of an ordinary pluperfect subjunctive as generally insufficient to designate the predicate as hypothetical in the case that the clause as such requires the subjunctive. And since, in the passive, the expedient of the periphrastic future was unavailable, other forms had to be devised by which the hypothetical meaning might be clearly designated. Thus in the above-mentioned passage of Nepos, the pluperfect *esset iudicatum* would have imparted to the sentence the meaning 'How true *was* the sentence passed upon Lysander', which would mean exactly the contrary of what the author meant to say, since he intended to convey the idea that the sentence on Lysander was *not* correct.

† Compare the passages Cic. Sest. 36, 78; Rosc. Am. 41, quoted p. 612, in which the perfect subjunctives used after *verisimile non est* denote facts not qualified by suppositions of any kind.

impellere possent si crimen perpetravit; many reasons which would have been a sufficient inducement for him, provided that he was the murderer. This meaning of 'impellerent' would neither have appeared by using the construction 'Causas fore quae eum impellerent', nor by 'causas esse quae eum impellerent' since both ways would represent the predicate *impellerent* as an inducement to a crime *ready* committed by Ti. Roscius (= many causes which have induced him.\* Although the author himself held this opinion, he did not mean to assert this at that place, merely representing the facts alleged by him as 'possible inducements'.]

Obs. 7. Imperfect subjunctives, dependent on presents which contain a preterite by implication, occur in the following instances: 1) if the governing predicate is an historical present (p. 301, Obs. 3); 2) if the present of a verb of saying (or writing) is used to quote remarks or opinions formerly stated by others (item. 4b, as Chrysippus disputat (= disputavit), athena esse eum quem homines Jovem appellarent; Chrysippus asserts that the 'ether' is what men call 'Jupiter'; Cic. N. D. 1. 15; 3) if the predicate is *sub-oblige* (§ 599), and the governing oblique clause, according to § 606, Obs. 3, c, has assumed a present tense with the force of a preterite subjunctive, as it in direct discourse, as: Respondit, si quid ab senatu petere velent, ab armis discedant; He answered that as they should lay down their arms if they wished to petition the Senate. Sall. Cat. 31. 1.—they should lay down their arms if they wished to petition the Senate. Sall. Cat. 31. 1.—Mandat (= mandavit), quibus rebus possent, opes Lictionis emendat; He ordered them to promote the resources of the faction by all they could. To. 32. 2.—Cato ad Popilium scripsit ut, si filium patitur in exercitu remanere, secundo eum obdici sacramento; Cato wrote to Popilius he should bind his son by another oath if he permitted him to remain in the army. Cic. Off. 1. 11. 36.—In the same way imperfect subjunctives are used if the clause is quasi-suboblige (p. 405 No. 2); Quia multi sunt orationum genera de quibus nemo fere praecipit, totum hunc locum separatim; I separated this whole subject because there are many styles in speaking on which almost nobody has given any rule. Cic. Or. 2. 81. 311. [Here 'multi sunt genera' contains the imperfect *erant* (i. e. *erat*).] Here 'multi sunt genera' contains the imperfect *erant* (i. e. *erat*). Some-times imperfect subjunctives, in clauses of direct statement, are dependent on present predicates which have the force of preterites, as: His tu comperas hominem Tusculanum nondum suspicantem quale esset copiose et ornate dicere; With these great orators you compare a Tusculan, who did not even suspect yet what it meant to speak with a full command of the language, and with elegances. Cic. Brut. 85. 294 [suspiciantem = qui suspiciabatur, the perfect participle 'suspiciatus' being unusual in this meaning. The imperfect subjunctive *esset* is used for the very purpose to represent the participle *suspiciantem* as equivalent to a relative clause with a preterite; else the present *sit* would have been used].—Cujus maleficii tanta ista poena est ut (Antonius) dicere in hoc ordine auderet, se disturbatum domum meam? For what crime is so great a penalty provided in the laws that Antonius should have dared to say within your body, that he would etc. Cic. Phil. 1. 5. 12. [Poena est has the force of 'poena constituta est.' The perfect 'ausus sit' would have represented Antonius's action as anterior to the law; *auderet* would represent

\* Madvig considers 'impellerent' in the above-mentioned passage as an inaccurate (i. e. faulty) expression, adding that the author had, in saying 'causas esse', at the same time thought of 'causas fuisse', which would place this imperfect under the rule in Obs. 7, and must, even then, be considered a legitimate construction. Similarly: Ejus precepti (i. e. ut nosmet ipsos nosceremus) tanta sententia est ut ea, non homini, sed deo tribueretur (= est et fuit). Cic. Leg. 1. 22. In some passages, however, such imperfects seem to be 'inaccurately' used by mere oversight, as: Dicit solent, perfre eum non posse, nisi ei crura fracta essent (instead of *sint*). Cic. Phil. 13. 12. — *ut sciret*. Equitum a me dicit, ob eam rem tibi haec scribo (Ib. Fam. 13. 47); as if 'scripsi' had been used, which so regularly occurs in such connections, that perhaps 'scripsi' is the correct reading in this passage (see Cic. Fam. 13. 46; 13. 67, and often. Comp. p. 357).

† The variation of tense in the passages of Sallust is made without any assignable reason; but in the passage Cic. Off. 1. 11, the author probably meant to avoid an ambiguity which might arise from the use of the imperfect *auderet*, which could be understood in a hypothetical sense: 'Cato wrote to Popilius how he (Cato) would bind his son if he (Cato) would allow him to remain in the army'. This ambiguity might also be avoided by adopting the reading 'patitur' of one inferior codex, or by reading, with several codices, 'patitur', which would likewise exclude a hypothetical meaning, and which would answer the rule p. 402, Obs. 3. The documentary authority of both readings 'patitur' and 'patitur' is about equal. But the usage of suboblige indicatives of this kind occurs only in historians, while the use of imperfect subjunctives in similar connections is found in several passages of Cicero. Hence the vulgata 'patitur' seems to deserve preference.

‡ Perhaps the reading of this passage is wrong, since 'ista' is very strangely used. I presume that Cicero wrote 'dicta' in place of 'ista', which would make the imperfect *auderet* a regular tense by consecution.

sent the action as present at the moment of speaking.]—5) The use of the imperfect subjunctive, dependent on non-preterites, is a necessity in some particular instances where the language lacks available forms to satisfy the grammatical requirements of the law of consecution, as: Concedamus famae hominum ut genere etiam putarentur, non solum esse ingenio divino; Let us allow this to the fame of (great) men that they should have been believed to be not only of divine mind, but also of divine extraction. Cic. Rep. 2. 2. 4. The imperative clause *ut... putarentur* could not assume a perfect (*putati sint*) as predicate, which would represent the action 'permitted' as anterior to the permission. The governing present 'concedamus' implies a preterite, since the writer, by using this expression, places himself with his mind in a past time, as if giving the permission at the time where such beliefs prevailed, being, as it were, an *ex post facto* permission. For such conceptions neither the Latin nor the English language has invented a particular form, (there being no 'past imperatives' as in Greek), and hence the present forms must be used, but with the force of a preterite.—6. Sometimes the preterite on which dependent subjunctives are dependent is understood, (as in the examples mentioned p. 424, No. 8, 9), as: Jam vero illud quam incredibile (i. e. est), quam absurdum (i. e. fuisse), qui Romae caedem facere, qui hanc urbem inflammare vellet, eum familiarissimum suum dimittere; How incredible (is it), and how absurd (would it have been) that he, who proposed to make laughter at Rome, and to burn this city, should send away his most intimate friend. Cic. Sull. 20, 57.

1. Honestum tale est ut, vel si ignorarent id homines, vel si obmutuissent, sua tamen pulcritudine esset laudabile. Cic. Fin. 2. 15.—2. Ego Brutum rem, sic ago ut eum ipse non ageret. Ib. Att. 5. 18. 4.—3. Hos viros doleo in suspitionem populo Romano venire, non modo metus, quod ipsum esset turpe, sed alium alia de causa deesse dignitati suae. Ib. Phil. 1. 6. 15.—4. Eloquentia nescio an Gracchus habuisset parem neminem. Ib. Brut. 33. 126.—5. Dic quidnam facturus fueris si eo tempore censor fureses. Liv. 9. 33.—6. Non dubito quin Antistius se praestaturus fuerit acerrimum propugnaculum communi libertatis si occasioni potuisset occurrere. Brut. ad Cic. 1. 11.—7. Quis dubitat quin, si Saguntinis tullissemus opem, totum in Hispaniam bellum aversum fuisset? Liv. 31. 7.—8. Dixit Caesar, se, quod in longiorem diem collatum fuisset, repraesentatum, et proximam nocte castra moturum. Caes. B. G. 1. 40.—9. Adeo inopia est coactus Hannibal ut, nisi eum fugae specie abendum timuisset, Galliam repetiturus fuerit. Liv. 22. 32.—10. Quantum periculum ab illis populis fuerit si Capitolium ab exsulis obsesum scissent, suspicari de praeterito quam re ipsa experiri est melius. Ib. 3. 19.—11. Nihil ex commentibus superabat, omni frumento in urbis munus convecto, ut Hispanorum transitu parata fuerit si maturitas temporum expectata foret. Ib. 22. 40.—12. Ibi clamor trepidationem fecit ut, si hostes longius insecuti essent, magna clades accipi potuisset. Ib. 42. 66.—13. Haec res sua sponte scelerata et nefaria est ut, etiamsi lex non esset, magnopere vitanda fuerit. Cic. Verr. 1. 42. 108.—14. Tantus exstitit pavor ut, si admotus extemplo exercitus foret, capi castra potuerint. Liv. 43. 4.—15. Ventum erat eo ut, si hostem similem antiquis Macedonum regibus habuisset consul, magna clades accipi potuisset. Ib. 44. 4.—16. Proficiscamur ad eum cui gratior noster adventus erit quam si una fuisset. Cic. Att. 9, 192.

### 3. Conversion of Tenses.

§ 607. Since the two futures have no subjunctives, they must be converted into other tenses, if the construction requires predicates, referring to the future, to be in a dependent subjunctive. For this purpose two methods are used, the method of ORDINARY TENSES, and the method of PERIPHRASTIC TENSES.

<sup>1</sup> Morality.—<sup>2</sup> both if... and.—<sup>3</sup> obmutui, I am mute (have become mute).—<sup>4</sup> creditable, estimable.—<sup>5</sup> the affairs.—<sup>6</sup> to conduct.—<sup>7</sup> ut non ageret, si ageret.—<sup>8</sup> Dat. of the interested person.—<sup>9</sup> supply: in suspitionem.—<sup>10</sup> which would be disgraceful by itself (i. e. si nihil aliud accederet).—<sup>11</sup> that each, from a different reason, is compromising his dignity.—<sup>12</sup> § 423, R. 78.—<sup>13</sup> i. e. si vita ei longior fuisset.—<sup>14</sup> praesto me aliquem, I prove to be something. p. 101, A.—<sup>15</sup> the most zealous champion.—<sup>16</sup> if he could have met an opportunity.—<sup>17</sup> to ward off.—<sup>18</sup> postpone to a later day.—<sup>19</sup> i. e. nisi illa accidissent.—<sup>20</sup> to anticipate.—<sup>21</sup> appearance.—<sup>22</sup> to return to.—<sup>23</sup> supplies.—<sup>24</sup> superare, to be left.—<sup>25</sup> to convey.—<sup>26</sup> ut Hispani transire parati fuerint (to desert).—<sup>27</sup> if the 'fulness' of time had been expected (i. e. if they had waited for the right time).—<sup>28</sup> caused consternation.—<sup>29</sup> by itself.—<sup>30</sup> ought to have been carefully avoided.—<sup>31</sup> so great was the discouragement.—<sup>32</sup> things had come to that pass.—<sup>33</sup> if we had been in each other's company.

By the method of ordinary tenses, the future-present is treated as if it were an *ordinary present*, being converted into a present or imperfect subjunctive according to the law of consecution (R. 97). The future perfect is treated as if it were an *ordinary perfect*, being converted into a perfect or pluperfect subjunctive according to the law of consecution (R. 98).

By the method of periphrastic tenses the future-present is turned into the subjunctive of the present or imperfect tense of the *periphrastic future* (pp. 130, 131, R. 141, 142), according to the law of consecution (R. 97, Obs. 1). Since the subjunctives of the *perfect* and *pluperfect* of the periphrastic future are appropriated by the hypothetical preterites (R. 96, Obs. 3, 3), this method cannot be applied to the *future-perfect*; nor can it be applied to the *passive voice* of either future, since a periphrastic future of the passive does not exist (R. 97, Obs. 3).

EXPLANATION. Conversion of 'future tenses' in the subjunctive is the method of expressing those subjunctive predicates which are conceived as happening at a future time to the *SPEAKER*. The speaker may be either the author or a person introduced by the author, in which instance the clause is oblique or suboblique. Actions conceived as happening after the time spoken of without being future in regard to the speaker's time (as for instance, the predicates of consecutive Ut-clauses), do not belong here, because they do not represent the action as future in the sense of § 587, and cannot assume a future tense if the clause, in which they stand, be expressed as an independent sentence. Thus in the sentence quoted above: 'Tibicines Tibur abiērent ut nemo in urbe esset qui *præcineret*,' Liv. 9, 30, the consecutive clause *ut... præcineret*, if expressed independently, would take its predicate in the *imperfect*, and not in the future. Hence sentences of this kind do not belong to those in which the conversion of a future tense is required. But if the same clause is conceived as a *final* clause (they went away *in order that* nobody should be in the city etc.), the 'tibicines' would be introduced as *subjects* of the clause, and the predicate would be a *future* if the action be independently expressed, as conceived by the subject (If we go, there *will be* nobody who etc.). Hence the predicate of every final clause is a 'converted' future, but such as must be treated according to the method of 'ordinary tenses' (See R. 97, Obs. 1).

Rem. 97. In converting a FUTURE-PRESENT into a subjunctive, ORDINARY TENSES are used 1) if the predicate stands to its principal predicate in the relation of a DEPENDENT FUTURE, so that, by taking both predicates out of the subjunctive connection, it would be a dependent future as defined by the rule p. 353, R. 76; 2) if the action is represented as a future necessity or duty, or as the object of a command or wish.— PERIPHRASTIC tenses are used 1) in relations not belonging to those mentioned, *i. e.* if the action implies nothing but futurity independent of other relations, or of other future actions; 2) in all the instances when the clause, expressed independently, would have a predicate in the PERIPHRASTIC FUTURE in its proper meaning, *i. e.* if the action is represented both as future, and as *conceived* at the speaker's time (§ 507, R. 139).

Obs. 1. These principles are thus applied to the different classes of clauses:

A. OBLIQUE CLAUSES. 1) Imperative clauses always require ordinary tenses according to the second rule in R. 97. (See the Ex. to R. 83.) Hence the *subjunctive* in these clauses is *always* a present or imperfect (never a perfect or pluperfect, except in denoting wishes against reality), and can never be placed in any tense of the periphrastic future.

2) Oblique clauses dependent on *parvum* and its equivalents (R. 82, Obs. 1, a) *always* take ordinary tenses, although, according to the English conception, it might be expected that they should take periphrastic tenses. But the Latin conceives them as verbs of believing, implying the idea of a *wish* adverse to the future act (p. 539), and hence they assume the conjunctions belonging to the imperative sentences, which always require

ordinary tenses. Thus it must be explained that verbs of fearing take *ordinary* tenses, as: Non vereor ne non scribendo te *expleam* (not *expleturus sim*); I am not afraid that I *will not* (be able to) *satisfy* you with my letters. Cic. Fam. 2, 1, 1.— It seems, however, that periphrastic tenses were colloquially used in clauses dependent on verbs of fearing. Thus we read in Marius's letter to Cic. (Fam. 11, 28, 8): Non *vereor* ne meæ vitæ modestia *parum valitura sit* in posterum contra falsos rumores (inst. of *valeat*); I am not afraid that my modesty, in the future, *will be of insufficient strength* against false rumors.— Frequently the futurity of the action is intimated by the form *forem* in place of *essem* (in the historians): Timor in exercitum incidit ne simul cum rege et Carthaginiensibus *forem* bellandum; The fear befell the army lest it *might be necessary* to fight at the same time with the king and with the Carthaginians. Liv. 29, 24.— See Ex. 1-3.

3) Oblique clauses with *quin* after *non dubito* and its equivalents (p. 388, Obs. 1, a) generally take periphrastic tenses, except if the predicate is represented as an action which *should be done*, in which instance ordinary tenses are used: Mihi *non est dubium quin ventura non sint* legiones; It is not doubtful to me but that the legions *will come*. Cic. Fam. 2, 17, 5.— Quam nec mihi nec fratri *dubium esset quin Brundisium contenderemus*; when neither I nor my brother *had any doubt* but that we *should proceed* to Brundisium. Ib. Att. 8, 11 D, 3. [The predicate *contenderemus* of the *Quin*-clause is represented as a rule for the speaker's future conduct.] Often, however, ordinary tenses are used in these clauses: (Dixerunt) *se non dubitare quin Ariovistus de omnibus obsidibus gravissimum supplicium sumat*; they *did not doubt* but that Ariovistus *would inflict* the severest punishment on all the hostages. Cæs. B. G. 1, 31. (About the use of the present consecution see p. 419, 420, Obs. 7, b and c): Sometimes both methods are combined in the same sentence, as in Ex. 7. See Ex. 4-10.

4) Oblique clauses containing *dependent questions* referring to the future, generally take periphrastic tenses, as: Nec ubi, nec quando te *sim visurus* possum suspicari; I have no idea where, or when I *shall see* you. Cic. Att. 11, 13, 2.— Lacedæmonii quasivērunt num se etiam *esset mori prohiberetur*; The Lacedæmonians asked whether he *would prohibit* them also to die. Ib. Tusc. 5, 42. [Independently: Num *prohibebis* etc.] But if the answer expected on a dependent question referring to the future, is a *rule* for the person asking (p. 396, e), ordinary tenses must be used according to the second rule in R. 97: Hannibal circumquirit urbem ad visendum qua maxime parte *aggrederetur*; Hannibal took a ride around the city to see where *he should make* the chief attack. Liv. 29, 7.— Statueram *quid facerem*; I had made up my mind *how to act*. Cic. Att. 11, 9, 1.— Pater roseo *quid agam*; I absolutely do not know what to do. Ib. 9, 14, 2.— Hence the same interrogative sentence has a different sense according as periphrastic or ordinary tenses are used: Otenens te pendere quamnam rationem *sim* Casari *allaturus* profectiois meæ; You show that you are trying to guess what reason I *will give* to Cæsar in regard to my departure. Cic. Att. 11, 12, 1. [By changing *sim allaturus* into *afferam*, the passage would have the meaning 'that you are weighing the question what reason I *should give* to Cæsar'.— Deviations from this rule occur (a) if the use of an ordinary tense in questions implying a future rule would be *ambiguous*, in which instance periphrastic tenses are preferred, as: Eo minus habeo necesse cogitare *quid sim factururus*; The less it is necessary that I should think of 'how to act' (i. e. that I should decide now on a plan of action). Cic. Att. 10, 1, 1. [Here *quid facerem* might be taken for an actual present = 'of my present actions' = *do*. On the other hand if it is intimated by other expressions in the clause that the action is meant to be a future one, *ordinary* tenses may be used in place of the regular periphrastic future, as: Videamus hoc quorsum *cedat*; Let us see how this *will come out*, where the adverb *quorsum* = up to what end, refers to future time, so that the futurity of the action need not be designated by the form of the verb). Cic. Att. 9, 18, 4.— Hence if the futurity of the action is implied in the governing verb, ordinary tenses may be used in place of the periphrastics, which is *always* the case if an interrogative clause is made dependent on *expectare*, as: Orat ut quid in Hispaniā *geratur expectem*; He beseeches me to wait (till I know) *what will be done* in Spain. Cic. Att. 10, 8, 1.— Quid hostes consilii *caperent expectabat*; He waited (to know) what plan the enemy *would follow*. Cæs. B. G. 3, 24.— See Ex. 12-19.

5) Quasi-oblique final clauses always take ordinary tenses according to the second rule of R. 97, since the purpose in the mind of the doer of an action always represents his wish. For Ex. See p. 405, 408.

B. SUBOBLIQUE CLAUSES. If the action is represented to occur *after* the time of speaking, thinking, etc. expressed in the governing predicate, should, according to R. 97, take periphrastic tenses. But periphrastic tenses are only used if the clause is *relative, causal, or a modal Ut-clause*, as: Multos esse arbitror *qui ad Casarem delatari sint*; I believe there are many who *will inform* Cæsar. Cic. Att. 11, 7, 5.— Romulus docebat virgines Subinas, eo meliores viros *usuras quod adniscurus sit* pro se quisque ut parentum expleat desiderium; Romulus explained that they would have so much better husbands, *because* every one *would strive* to efface by his own conduct their longing for their parents. Liv. 1, 9.— Ego eis ita mandāram ut, *quum* tam longe *absuturus essem*, ad me ne referrent; I

had directed them not to report to me, since I would be absent for so long a time. Cic. Fam. 2. 12. 2. [If *quum*, in this sentence, were temporal, it would not admit of a periphrastic tense: *quum tam longe abessem, ubi I would be absent so long.*] Dixit non ita se a juveni Hannibalem gessisse ut in senectute dominum latius deditur cor sit, esset; He said, Hannibal had not acted in his youth so that he would seem to submit to a master in his old age. Liv. 35. 12. See Ex. 20. 21. In all other kinds of suboblique clauses the connection itself generally makes it clear if they are meant to refer to the future; hence ordinary tenses are used in them. Thus in suboblique and quasi-suboblique *si*-clauses, denoting 'in the event that', or 'with the proviso that' (p. 407, Obs. 3), and in all kinds of conditional, and temporal clauses (introduced by *si*, *quum*, *dum*, *prinsquam*) ordinary tenses must be used if they are suboblique, even if their predicates do not belong to the dependent futures, as: Isidorus Demetriadem, si forte eo deferret legem, trajecit; Isidorus crossed over to Demetrius in the event that the king in his flight should pass that place. Liv. 36. 20. — Decreverunt patres ut hoc sic ratum esset si patres auctores fierent; The Senate decreed, that this should be valid under the proviso that the Senate would ratify it. Liv. 1. 17. — Dicebant nihil esse negotii, quum reliquae legiones magnum spatium abessent (not abfuturæ essent), hanc legionem sub sarcinis adoriri; They said that it was (would be) an easy matter to attack that legion under their baggage while the other legions would be at a great distance. Cæs. B. G. 3. 5. — Nisi forte ei potest persuadere ut, dum oratores eant redeant, quiescat; Unless perhaps he can induce him to suspend his operations while the negotiators are (will be) going to and fro. Cic. Att. 10. 1. 3. — Cæsar, antequam plures civitates conspirarent, latius sibi distribuendum exercitum putavit; Cæsar thought it best to distribute his army over a wider space before a greater number of states would join the conspiracy. Cæs. B. G. 3. 10. [In an independent connection, antequam and prinsquam cannot take the future; hence in oblique connection, the periphrastic future is not admissible. See p. 354, Obs. 4, a; p. 666, § 621 foll.] See Ex. 22-27.

C. DEPENDENT FUTURES, i. e. those which derive their force as futures from their principal predicates with which they are represented to be coincident (p. 355, Obs. 5), take always ORDINARY TENSES if they are placed in the subjunctive, whether their governing predicate is made oblique, or whether their mood is attracted by the subjunctive mood of the governing predicate, as: (Arrius dixit) nisi Cæsar exercitum dedit, se illum pro hoste habebit; Arrius said, if Cæsar did not give up his army, he would consider him to be in war with him. Cæs. B. G. 1. 44. [Independently: Nisi dedisset, te pro hoste habebit.] — Commemoravit quantum esset periculi aditus si in Africam trajicerem; He has mentioned the great danger I would incur, if I crossed over (would cross over) to Africa. Liv. 28. 43. [Independently: Magnum periculum aditus si in Africam trajicies.] — Jussit eos rex deliberare ne id consilium caperent ejus extemplo penitenteret; The king asked them to consider the matter, lest they might take measures of which they would instantly repent. Liv. 36. 9. [Independently: Ne cupitis consilium ejus penitere.] — Mater eam, quum primam perisam dedit, eam mississimam; I was about to send her to her mother as soon as she would agree to it. Cic. Att. 11. 17. 1. [Independently: Eam ad matrem mittam quum primam dedit.] — Ita patris servatus ut quæque videret affectum corpus suum; He calculated that each of them would feel at the pain as their wounded bodies would permit. Liv. 1. 26. [Independently: Servatus ut corpus suum.] See Ex. 28-32. — If dependent futures, in independent connections of their governing predicates, are in the future tense of the periphrastic future, so that the periphrastic future is used with its own force (§ 507, R. 147, and Ex. p. 134), they take the periphrastic present or imperfect, if required to be in the subjunctive, as: Magna est quaestio, veniendum sit in consilium tyranni si aliquando de re bona deliberationis sit; It is an important question whether we must participate in the counsel of a tyrant if the same on a certain day is to have a deliberation on a laudable subject. Cic. Att. 10. 1. 3. [Independently: Veniendumne est in consilium, si tyrannus deliberaturus erit? = if he (shall have) appointed a day for deliberation. The present conception is here separated from the future act, the present conception being represented by the copula (§ 507, R. 139). But even the copula must be in the future, because the conception represented by it has the relation of a dependent future. If required to be in the subjunctive, the copula erit is turned into a present according to rule.]

D. ALL OTHER CLAUSES whose predicates are represented as future in regard to the speaker's time, must take periphrastic tenses, as: [Relative clause] Itaque qui ad id tempus fortunam esset in consilio habiturus, is extemplo ad M. Bæbium misit; And thus he who would, up to this time, shape his course according to circumstances (i. e. although he was to decide about his plan of action), sent instantly word to M. Bæbium. Liv. 36. 8. — [Modal Ut-clause] In eam rationem vitæ nos fortuna deduxit ut sempiternus sermo hominum de nobis futurus sit; Our fate has placed us in such a condition of life, that there will be a perpetual comment of the public about us. Cic. Qu. Fr. 1. 1. 13. — Non intelligo cur Rullus quemquam tribunum intercessurum putet, quum intercessio stulti-

tiam intercessoris significatura sit, non rem impeditura; I do not understand why Rullus should be of the opinion that any tribune will veto the measure, since a veto would (will) only betray the stupidity of him who vetoes, but not prevent the measure. Cic. Leg. Agr. 2. 12. — See Ex. 34-36. — But in colloquial style ordinary tenses are often employed where the rule would require a periphrastic, as: Ergo hoc quidem est profectum ut non modo tuto, verum etiam palam navigaremus; Hence so much, at least, has been effected that we shall depart not only safely, but also openly. Cic. Att. 10. 4. 10. [Here, according to rule, and for the sake of clearness, a periphrastic tense, or the addition of posse would have been required, since, as the clause is expressed, the predicate navigaremus must be understood as a past, or as a present act. But as the receiver of the letter could not mistake the sense of the writer, the latter allowed himself the use of the brief, though ambiguous, form.] — If hypothetical preterites refer to the future, periphrastic preterite tenses are used both if the hypothetical period is independent, and if it is made dependent on other predicates, as: Consilium istud esset prudens, si nostras rationes ad Hispaniensem casum accomodaturi essemus; That plan would be wise if we were going to shape our action according to the issue of the Hispanic affair. Cic. Att. 10. 8. 2. — Quid enim essem de pace dicturus, dixi; For I have said what I would be going to say (i. e. si legationem suscepturus essem, If I were going to accept the appointment; the writer being resolved not to accept it). Cic. Att. 10. 1. 3.

Obs. 2. In place of the imperfect subjunctive of the periphrastic future, the form with forem is sometimes used by the historians, as: Incertum erat quo missuri classem Carthaginienses forent; It was uncertain where the Carthaginians would send their fleet. Liv. 30. 2. — Forem is sometimes used in place of essem if a predicate, being in the relation of a dependent future, is represented as uncertain, as: Dixit Tullus usum se eorum operæ si bellum cum Vejentibus foret; Tullus said he would accept their aid if there should be a war with the Vejentians. Liv. 1. 26.

Obs. 3. Since the periphrastic future does not exist in the passive form, this voice cannot, generally, be used if the predicate, according to the above-mentioned rules requires a periphrastic tense. In this instance the sentence must be recast by turning the passive construction into an active one. But, sometimes, ordinary passive presents or imperfects are used where the rules require periphrastic tenses (which, of course, occurs only if the future meaning of the predicate is made clear by the connection), as: Dixit Curio, nihil esse certius quam ut omnes, qui lege Pompejæ condemnati essent, restituerentur; Curio said that nothing was so certain, as the rehabilitation of those (literally 'more certain than that those would be rehabilitated') who have been condemned under the Pompejan law. Cic. Att. 10. 4. 8. [Independently: Restituentur ei qui condemnati sunt. If the predicate were active, it would require a periphrastic tense; but the change into an active construction would be awkward, and hence the author preferred the ordinary passive imperfect, although this tense might, grammatically, be understood to be coincident with the time of 'dixit'.] Sometimes a passive predicate referring to the future may be turned into a predicate-infinitive paraphrased with fore ut and an ordinary passive subjunctive, as: Qui dubitare de eventu possim quum his nunc fore videam ut ipsi oppugnentur; How can I doubt about the issue, since they will be themselves attacked by those who etc. Liv. 36. 7. [Here by introducing 'videam' as governing predicate, the clause has assumed the form of an infinitive clause, so that the regular circumlocution with fore ut may be applied to it.] Some grammarians assert that to passive future predicates a circumlocution by means of the finite impersonal 'futurum est ut' may always be applied, so that for instance the above-mentioned passage might have been expressed 'quum futurum sit ut ipsi oppugnentur'. But examples of such a usage do not occur in the classical authors, although there would, theoretically, be no other objection against this circumlocution but the awkwardness of its form. A future predicate which is periphrastic by its own force can neither be expressed by the finite circumlocution with futurum est ut, nor by the infinitive circumlocution with fore ut, since in both circumlocutions the copula is in the future while the verb itself is in an ordinary tense; whereas the periphrastic future if used in its proper sense requires the copula to be in an ordinary tense and the verb to be in a future form. (See § 507, R. 139.)

1. Quum timērent ne vi captis nulla apud victorem venia esset, dederunt se. Liv. 36. 9. — 2. Hasdrubal veritus est ne parvum vinculum<sup>1</sup> eae nuptiæ<sup>2</sup> essent<sup>3</sup>. Ib. 29. 23. — 3. Periculum erat ne vera emanarent<sup>4</sup>. Ib. 29. 24. — 4. Plane dubitare non possum quin tibi amplitudo<sup>5</sup> ista sollicitudo<sup>6</sup> futura sit. Cic. Fam. 3. 10. 3. — 5. Non dubito quin Cæsar lenis<sup>7</sup> in Quintum futurus sit. Ib. Att. 11. 12. 3. — 6. Dubita, si potes<sup>8</sup>, quin ille eadem facturum sit. Ib. 10. 14. 3. — 7. Dubium non est quin Bæoti et Thessali ad con-

<sup>1</sup> A weak tie. — <sup>2</sup> nuptials. — <sup>3</sup> might prove to be. — <sup>4</sup> vera emanant, truth leaks out. — <sup>5</sup> that magnificence. — <sup>6</sup> an annoyance; a rare construction, instead of the more usual abstract dative (sollicitudini). — <sup>7</sup> lenient. — <sup>8</sup> virtually = 'dubitare non potes'.

attack this legion *when* the first legion *would have arrived* in the camp. Cæs. B. G. 2, 17. See Ex. 5-7, 9.

(c) TEMPORAL CLAUSES with *donec* (dum), *antequam*, *priusquam*: *Placuit, omnis qui consules fuissent cum imperio esse, donec recessisset a muris hostis*: It was resolved that all who had been consuls should be invested with the highest military power till the enemy *would have withdrawn* from the wall. Liv. 26, 9.— *Se non ante cepturum dixit quam ignem in regis castris conspexisset*: He said he would not begin before he *would perceive* (would have perceived, had perceived) the fire in the royal camp. Liv. 30, 5. [Clauses with *antequam*, and *priusquam* strictly follow the rules of tense for the indicative mood. See p. 354, Obs 4.] See Ex. 8.

(d) RELATIVE CLAUSES: *Cæsar eis qui primi murum ascendissent præmia proposuit*: Cæsar promised rewards to those who *would be* the first to scale the wall. Cæs. B. G. 7, 27. See Ex. 10, 11.

Obs. 3. If the clause of a dependent future-perfect assumes the form of a suboblique clause, the perfect subjunctive is frequently used in place of a pluperfect subjunctive according to the rules p. 419 foll. Obs. 7, as: (*Direrunt*), si hæc *enuntiata* Ariovisto *sint*, non dubitare quin gravissimum supplicium sumat: They said that if this *would be* (would have been) *betrayed* to Ariovistus, he would take the severest revenge. Cæs. B. G. 1, 31.— Sometimes, on the other hand, *pluperfect subjunctives* (with the force of future-perfects) are used in place of a perfect subjunctive, when the law of consecution requires a tense of present consecution, as: *Quod te mecum, quodcumque cepissem* (instead of *ceperim*), consilii polliceris fore; That you *promise* to be with me, whatever plan I *would have adopted*. Cic. Fam. 5, 9, 1.

Obs. 4. The historians frequently use the passive subjunctive pluperfect with *forem*, instead of *essem*, as a subjunctive of the future-perfect of the passive voice, as: *Si pax non impetrata ab senatu foret*, obsides reddi Philippo receptum est; It was agreed upon, that the hostages should be returned to Philip in the case that peace *would not be granted* (would not have been granted) by the Senate. Liv. 33, 13. See Ex. 12, 13.

Obs. 5. Both perfects and pluperfects with the force of a subjunctive of the future-perfect require the predicates dependent on them to be in tenses of *preterite* consecution, although the future-perfect in the indicative requires tenses of present consecution, as: [CONSECUTION OF THE FUTURE-PERFECT IN THE INDICATIVE:] *Mihi ignoscetis si, quæ causa me ad hunc loquacitatem impulerit, acceperitis*: You will pardon me if you *will have heard* what cause *has induced* me to be so loquacious. Cic. Or. 2, 88, 361. [Here the future-perfect *acceperitis* takes the perfect subjunctive *impulerit* as tense of present consecution.] But the same sentence being made oblique by the author, *preterite* consecution is required by the pluperfect subjunctive *cognovissemus*, used in place of the future-perfect *acceperitis*: *Dixisti fore ut tibi ignosceremus, si cognovissemus quæ te causa in sermone impulisset*: You have said that we *would pardon* you if we *would have learned* what cause *had induced* you to discuss this subject. Cic. Or. 2, 89, 363.— *Eominus habeo necesse cogitare quid facerem si acciderit ut legarer*: The less it is necessary for me to think of what I ought to be going to do if it *should happen* (literally: if it should have happened) that I *am appointed*. Cic. Att. 10, 1, 4. Here the perfect subjunctive *acciderit*, according to the general rules, takes *legarer* as a tense of *preterite* consecution, although it has the force of a future-perfect\*.

1. Quæritur, si Carthaginem reliquerimus incolumem<sup>1</sup>, num quid incommodi sit ad rempublicam perventurum? Cic. Inv. 1, 8, 11.— 2. Uterque idem renuntiat<sup>2</sup>, qui prior has angustias occupaverit, ab hoc hostem prohiberi nihil esse negotii<sup>3</sup>. Cæs. B. C. 1, 66.— 3. Galli, nisi<sup>4</sup> perfregerint munitiones de omni salute desperant<sup>5</sup>; Romani, si rem obtinuerint<sup>6</sup>, finem laborum omnium expectant. Ib. B. G. 7, 35.— 4. Dixit Ariovistus, si discessisset<sup>7</sup> Cæsar, magno se illum premio remuneraturum. Ib. B. G. 1, 44.— 5. De horum audacia tum me dictum pollicitus sum quum Erucii crimina<sup>8</sup> diluissim<sup>9</sup>. Cic. Rosc. Am. 28, 78.— 6. Nonnulli Cæsari nuntiabant, quum castra moveri ac signa ferri<sup>10</sup> jussisset, non fore dicto audientis milites. Cæs. B. G. 1, 39.— 7. Scipio ubi commissa<sup>11</sup> pugna esset, Lælium cum equitatu impetum facere jubet. Liv. 28, 33.— 8. Cæsar respondit se civitatem conservaturum<sup>12</sup> si prius quam murum aries teligisset se deditis-

\* The editors, because *acciderit* would be a future-perfect if the clause were not sub-oblique, have changed *legarer* into the present subjunctive *leger*, although supported by no manuscript. They call such changes 'EMENDATIONS.'

<sup>1</sup> Unharmed, in its integrity.—<sup>2</sup> reported, namely etc.—<sup>3</sup> *nihil est negotii*, it is an easy matter.—<sup>4</sup> *nisi perfregerint*, and *si rem obtinuerint* are quasi-oblique clauses according to Rem. 89, Obs. 1.—<sup>5</sup> *desperant* of their lives.—<sup>6</sup> *rem obtinere*, to be successful.—<sup>7</sup> to withdraw, i. e. from Gaul.—<sup>8</sup> the charges.—<sup>9</sup> to refute.—<sup>10</sup> *signa ferri jubere*, to give the order to charge the enemy.—<sup>11</sup> to begin.—<sup>12</sup> i. e. *esse*; with an infinitive *fuisse*, which would be required to be expressly added, the next clause would be hypothetical.

sent. Cæs. B. G. 2, 32.— 9. Fabius milites, ubi quartæ vigiliæ signum cecinisset<sup>1</sup>, ad eum locum scalas jussit ferre. Liv. 24, 46.— 10. Scipio dixit, Romam mitterent legatos; quam<sup>2</sup> senatus æquam censuisset, eam fortunam habituros. Ib. 29, 8.— 11. Edictum imperatoris erat, ipsum militatrum<sup>3</sup> qui ita non fecisset. Liv. 29, 1.— 12. Carmen<sup>4</sup> inventum erat, quandocumque<sup>5</sup> hostis Italiæ bellum intulisset, eum vinci posse si mater Idæa<sup>6</sup> Romam advenclat<sup>7</sup> foret. Ib. 29, 10.— 13. Sentiabant, si Lycia et Caria adempta ab<sup>8</sup> Romanis forent, includi se insule parvæ litoribus. Ib. 45, 25.

<sup>1</sup> *Signum canit*, the signal is sounded.—<sup>2</sup> *quam...*, *eam fortunam*, = *eam fortunam* (fate) *quam*. The sentence contains a circumlocution of the thought 'their fate would be decided by the Senate'.—<sup>3</sup> that the one who (= every one who)...would (= must) himself do military service. The infinitive clause has the force of an imperative clause, which is rare. But Livy conceives the clause as if it were independently expressed by an imperative future (ipse militabit qui ita non fecerit).—<sup>4</sup> an oracle (oracles always being given in verse).—<sup>5</sup> whenever.—<sup>6</sup> the Idæan mother, i. e. the image of Cybele.—<sup>7</sup> *advenclare*, to convey.—<sup>8</sup> *by*, not *from*. The latter preposition would be expressed by a dative in Latin.

## ENGLISH EXERCISES.

I. DECLARATIVE SUBJUNCTIVE. (§ 592, R. 79).— 1. In this matter, indeed<sup>1</sup>, I am inclined to dissent<sup>2</sup> from you.— 2. I should refer<sup>3</sup> to all affections<sup>4</sup> what Panætius asserts<sup>5</sup> in regard to<sup>6</sup> pain.— 3. You may find many who will have the same opinion.— 4. You may doubt this, perhaps; but I shall easily prove it.— 5. To some, both things<sup>7</sup> seem to be the same; but I should [like to] ask this: What force<sup>8</sup> is<sup>9</sup> [there] in the word '*sapere*'?— 6. You are the only [one] who—let me make this remark<sup>10</sup> with the leave<sup>11</sup> of these [friends]—have left no hope for (of) praise to the other orators.— 7. You could not easily repeat<sup>12</sup> this too often.— 8. Epicurus, indeed, may (might) perhaps say this, even<sup>13</sup> in Phalaris's steer, but I, on my part<sup>14</sup>, cannot assign<sup>15</sup> so great a power<sup>16</sup> to wisdom.— 9. Clodius arrived, inflamed with anger; you (one) would have pronounced<sup>17</sup> him raving<sup>18</sup>.— 10. You (one) would have thought, some companion<sup>19</sup>, or some unimportant<sup>20</sup> retainer<sup>21</sup> was present, [and] not the lord<sup>22</sup> over<sup>23</sup> your life and death<sup>24</sup>.— 11. You might have distinguished<sup>25</sup> a remote<sup>26</sup> cloud<sup>27</sup> of dust, rising<sup>28</sup> at the horizon<sup>29</sup>.— 12. Of that kind<sup>30</sup> of property<sup>31</sup> you may easily be deprived<sup>32</sup>.— 13. I might mention considerably<sup>33</sup> more [examples], but the shortness of time warns<sup>34</sup> me not to<sup>35</sup> go any farther.<sup>36</sup>— 14. The war might have been finished<sup>37</sup> in the same year.— 15. He could have easily prevented<sup>38</sup> that rebellion<sup>39</sup>.— 16. You certainly might have shown<sup>40</sup> greater energy<sup>41</sup> in<sup>42</sup> the pursuit<sup>43</sup> of the enemy.— 17. But at that time (tum) we ought to have returned without any hesitation to the place we had started from<sup>44</sup>.— 18. It seems that Titius had reached a point<sup>45</sup> which no<sup>46</sup> Latin orator without [a knowledge of] Greek literature<sup>47</sup> could have overstepped<sup>48</sup>.— 19. What had been done<sup>49</sup>, ought not to have been ratified<sup>50</sup>.— 20. You ought to have pardoned me at least, since<sup>51</sup> I

<sup>1</sup> Quidem.—<sup>2</sup> dissentire ab aliquo.—<sup>3</sup> referre ad.—<sup>4</sup> affectus.—<sup>5</sup> dicere.—<sup>6</sup> de.—<sup>7</sup> utrumque.—<sup>8</sup> vis.—<sup>9</sup> to be in = *inesse in*.—<sup>10</sup> Render: I would remark (*dicere*) this.—<sup>11</sup> by *par*.—<sup>12</sup> dictitare.—<sup>13</sup> vel.—<sup>14</sup> *I, on my part*, ego.—<sup>15</sup> tribuere.—<sup>16</sup> vis.—<sup>17</sup> dicere.—<sup>18</sup> furere.—<sup>19</sup> comes.—<sup>20</sup> parvulus.—<sup>21</sup> assectator.—<sup>22</sup> arbiter.—<sup>23</sup> genitive.—<sup>24</sup> nex.—<sup>25</sup> cernere.—<sup>26</sup> remotus.—<sup>27</sup> nubecula.—<sup>28</sup> nasci.—<sup>29</sup> at the horizon, procul.—<sup>30</sup> genus.—<sup>31</sup> bona.—<sup>32</sup> exspoliare.—<sup>33</sup> multo.—<sup>34</sup> dehortari.—<sup>35</sup> ne.—<sup>36</sup> to go any farther, longius progredi.—<sup>37</sup> to finish the war, debellare.—<sup>38</sup> prohibere.—<sup>39</sup> seditio.—<sup>40</sup> uti.—<sup>41</sup> alacritas.—<sup>42</sup> ad.—<sup>43</sup> by *persequi*.—<sup>44</sup> Render: Whence we had started (*proficisci*), thither without any hesitation (*dubitatio*) we ought to have returned.—<sup>45</sup> Render: Titius seems to have arrived (*pervenire*) at that place which.—<sup>46</sup> Render: which a Latin orator could not.—<sup>47</sup> litteræ.—<sup>48</sup> transgredi.—<sup>49</sup> agere.—<sup>50</sup> to be ratified, ratum esse.—<sup>51</sup> quoniam.

did<sup>1</sup>, whatever I did, against my own will<sup>2</sup>.— 21. That pirate ought to have been kept in jail<sup>3</sup> at Syracuse.— 22. It would have been more desirable<sup>4</sup> for Milo to offer<sup>5</sup> [his] throat<sup>6</sup> to Clodius, than to be throttled<sup>7</sup> by you.— 23. It would have been fair<sup>8</sup> to forbear<sup>9</sup> a little longer with this our helplessness<sup>10</sup>.— 24. For your safety<sup>11</sup>, and your interest<sup>12</sup>, it would have been best to leave your companions alone<sup>13</sup>; but honor<sup>14</sup>, and [your] pledged<sup>15</sup> word<sup>16</sup> forbade<sup>17</sup> [this course].

II. INTERROGATIVE SUBJUNCTIVES. (§ 593).— 1. Who would not justly<sup>18</sup> admire this, and think<sup>19</sup> that he ought<sup>20</sup> to devote<sup>21</sup> all his energy to it?— 2. Why should not the rainbow<sup>22</sup> be, as well<sup>23</sup>, placed<sup>24</sup> among the gods?— 3. What would you do with [ablat.] such a simpleton<sup>25</sup>?— 4. Should I deny this, who could never be convinced<sup>26</sup> that it is false?— 5. Would Bibulus slander<sup>27</sup> those very [men] who were influential enough<sup>28</sup> to prevent his recall from the province?— 6. How should those obey the laws, who by these very laws were forbidden<sup>29</sup> to<sup>30</sup> have<sup>31</sup> the rights of men?— 7. If I believe Archytas what he says of others, should I not believe what he says of himself?— 8. If any king, if any nation had committed<sup>32</sup> any such thing<sup>33</sup> against Roman citizens, would we not avenge<sup>34</sup> [it] by war? [And] should we permit<sup>35</sup> this crime<sup>36</sup>, this degradation<sup>37</sup> of the Roman name to pass unchallenged?

III. IMPERATIVE SUBJUNCTIVES. (§ 594).— 1. Allow<sup>38</sup> me, I beseech you<sup>39</sup>, to be [your] second in command<sup>40</sup>, and all the others to keep<sup>41</sup> their former ranks<sup>42</sup> [in the army].— 2. Be always in arms<sup>43</sup>, and on the alert<sup>44</sup>, and neither miss your own chance<sup>45</sup>, nor allow the enemy to have any<sup>46</sup>.— 3. Do not believe, soldiers, that victory will be as<sup>47</sup> difficult as the dimensions<sup>48</sup> of this war are great.— 4. Select<sup>49</sup> a hundred men out of the whole (omnis) infantry<sup>50</sup>, and as many out of the cavalry<sup>51</sup> and come with them to me by the first night-watch.— 5. Let us remember that justice must be observed<sup>52</sup> even towards the lowest<sup>53</sup>.— 6. Let us love our country, let us obey the Senate, let us disregard<sup>54</sup> present advantages<sup>55</sup>, and do everything<sup>56</sup> for the glory of [our] posterity<sup>57</sup>.— 7. Let every one show himself<sup>58</sup> a severe<sup>59</sup> judge both of his [own] good<sup>60</sup> and bad<sup>61</sup> qualities.— 8. Let there be [at least] a pause<sup>62</sup> in our hate<sup>63</sup> during<sup>64</sup> peace, even if<sup>65</sup>

<sup>1</sup> Agere. The two preterites 'I did' must be rendered by the same verb, but by different forms.— <sup>2</sup> invitus.— <sup>3</sup> to keep in jail, custodire.— <sup>4</sup> optabilis.— <sup>5</sup> dare.— <sup>6</sup> jugulum.— <sup>7</sup> jugulare.— <sup>8</sup> æquus.— <sup>9</sup> parcere.— <sup>10</sup> impotentia.— <sup>11</sup> salus.— <sup>12</sup> utilitas.— <sup>13</sup> to leave alone, deserere.— <sup>14</sup> honestas.— <sup>15</sup> dare.— <sup>16</sup> fides.— <sup>17</sup> repugnare.— <sup>18</sup> jure.— <sup>19</sup> arbitrari.— <sup>20</sup> gerundial.— <sup>21</sup> to devote all one's energy to something, summe in aliquā re elaborare.— <sup>22</sup> Arci species.— <sup>23</sup> as well, æque.— <sup>24</sup> to place among something, in numero alicujus rei reponere.— <sup>25</sup> truncus.— <sup>26</sup> persuadere.— <sup>27</sup> calumniari.— <sup>28</sup> Render: In whose power (potestas) it was lest (ne) he should be recalled (revocare) from etc.— <sup>29</sup> prohibere (subjunctive).— <sup>30</sup> ne.— <sup>31</sup> uti.— <sup>32</sup> facere.— <sup>33</sup> any such thing, aliquid ejusmodi.— <sup>34</sup> vindicare.— <sup>35</sup> to permit something to pass unchallenged, aliquid inultum dimittere.— <sup>36</sup> injuria.— <sup>37</sup> ignominia.— <sup>38</sup> jubere.— <sup>39</sup> quæso.— <sup>40</sup> second in command, magister equitum; the person addressed being compared to a dictator.— <sup>41</sup> tenere.— <sup>42</sup> Render: each (singular) their own ranks (ordines).— <sup>43</sup> armatus.— <sup>44</sup> on the alert, intentus.— <sup>45</sup> to miss one's own chance, occasione suæ deesse.— <sup>46</sup> to allow somebody to have any chance, alicui suam occasionem dare.— <sup>47</sup> as... as, tum... quam.— <sup>48</sup> Render: as of great name the war is.— <sup>49</sup> deligere.— <sup>50</sup> pedes. Render: out of the whole (omnis) infantry and cavalry; but in order to render in this way, the numeral must assume that form, by which it may be clear that it refers to each of the two troops. See P. 1, § 259.— <sup>51</sup> eques. Both pedes and eques remain in the singular.— <sup>52</sup> servare.— <sup>53</sup> infimi.— <sup>54</sup> negligere.— <sup>55</sup> fructus.— <sup>56</sup> to do everything for something, alicui rei servire.— <sup>57</sup> posteritas.— <sup>58</sup> se præbere.— <sup>59</sup> acer.— <sup>60</sup> good qualities, bona.— <sup>61</sup> bad qualities, vitia.— <sup>62</sup> Render: In peace, even if the hatreds are not ended, let [them] be interrupted (intermittere).— <sup>63</sup> odium (pl.).— <sup>64</sup> in.— <sup>65</sup> etiamsi.

it is not ended.— 9. Let the excess<sup>1</sup> of our former<sup>2</sup> good works<sup>3</sup> make up for the shortcomings in our present duties.— 10. I wish you would ask Petronius what happened<sup>4</sup> to him in my house<sup>5</sup>.— 11. I wish you would add some remarks<sup>6</sup> concerning the modern<sup>7</sup> poets.— 12. I wish that all were present whom we saw here in our last assembly<sup>8</sup>.— 13. I wish you had been<sup>9</sup> my companion in this journey.— 14. Would that I could find truth<sup>10</sup> as easily as I can prove<sup>11</sup> a falsehood<sup>12</sup>!— 15. Would that the people were always [good] judges<sup>13</sup> of the worth<sup>14</sup> [of persons]! Perhaps it is sometimes<sup>15</sup> [the case] but very<sup>16</sup> rarely.— 16. Would that Crassus had seen that day!— 17. Granted that he is a good citizen, and that he is most wise and most learned: all this, in my opinion<sup>17</sup>, will not be sufficient to govern<sup>18</sup> the republic well.— 18. Supposing this claim<sup>19</sup> is a just one, the expenses of the law-suit<sup>20</sup> will certainly be<sup>21</sup> so great that you will be a loser<sup>22</sup> even if you gain<sup>23</sup> [your suit].— 19. Granted that slavery<sup>24</sup> was useful either to the masters<sup>25</sup>, or to the slaves, or to both<sup>26</sup>: it certainly never was just; but what is not just, cannot even be useful.— 20. Do not wonder<sup>27</sup> that the proceeds<sup>28</sup> of this property<sup>29</sup> are so small<sup>30</sup>.— 21. Do not blame<sup>31</sup> ME, but thyself for failing<sup>32</sup> in this undertaking.— 22. Do not do this<sup>33</sup>, but examine<sup>34</sup> everything before you proceed<sup>35</sup> any farther<sup>36</sup>.— 23. Would that I had not been present!— 24. I should wish<sup>37</sup> you had not done this.— 25. Would that you would not meddle<sup>38</sup> in this business!— 26. Granted that Titius had no success<sup>39</sup>; could you derive from<sup>40</sup> this fact<sup>41</sup> any hope of finishing the war<sup>42</sup>?

IV. INDIRECT AND DIRECT STATEMENTS IN GENERAL. (§ 596).— 1. While the combat was fiercely raging<sup>43</sup> at<sup>44</sup> the intrenchments<sup>45</sup>, T. Pullo said, 'Why do you hesitate<sup>46</sup>, Vorenus, or do you expect that there will be<sup>47</sup> any better occasion to prove your courage?'— 2. Whenever the emperor Titus had bestowed no favor<sup>48</sup> on any one during<sup>49</sup> a whole day, he used to say 'I have lost<sup>50</sup> a day, O friends!'.— 3. If that should happen<sup>51</sup>, you will say to me, 'Did I not predict<sup>52</sup>, that just this<sup>53</sup> would happen?'— 4. Scipio used to say<sup>54</sup> 'He wished rather to save one citizen than to kill a thousand hostile soldiers<sup>55</sup>'.— 5. When they met<sup>56</sup> me by chance<sup>57</sup> in the forum, they said<sup>58</sup> to me, 'Are you the one<sup>59</sup> who intend<sup>60</sup> to starve<sup>61</sup> the common people<sup>62</sup>?'— 6. Whenever any one remarked<sup>63</sup>, that it was impossible for them<sup>64</sup> to return alive<sup>65</sup> from<sup>66</sup> that hazardous undertak-

<sup>1</sup> The accumulation (cunctus) of our former good works may fill up (explere) what has been ceased (cessare, impersonal pass.) in duty (officium).— <sup>2</sup> prior.— <sup>3</sup> benefacta.— <sup>4</sup> accidit.— <sup>5</sup> apud me.— <sup>6</sup> aliquid addere.— <sup>7</sup> the modern poets, hujus ætatis poëtæ.— <sup>8</sup> Render: whom we saw the last time (proxime) here assembled (congregatus).— <sup>9</sup> Render: You had been present to me [as] the companion of this journey.— <sup>10</sup> vera.— <sup>11</sup> convincere.— <sup>12</sup> falsa.— <sup>13</sup> sing. in Latin.— <sup>14</sup> dignitas.— <sup>15</sup> nonnumquam.— <sup>16</sup> by per.— <sup>17</sup> Render: I deny that all this is sufficient etc.— <sup>18</sup> ad with gerundial.— <sup>19</sup> nomen.— <sup>20</sup> impensæ in litem.— <sup>21</sup> Render: expenses will have to be made.— <sup>22</sup> jacturam facere (in the perfect-subjunctive with the force of a future-perfect).— <sup>23</sup> vincere.— <sup>24</sup> servitus.— <sup>25</sup> dominus.— <sup>26</sup> uterque in the plur.— <sup>27</sup> by the subjunctive.— <sup>28</sup> fructus.— <sup>29</sup> fundus.— <sup>30</sup> exiguus.— <sup>31</sup> reprehendere.— <sup>32</sup> Render: because thou hast proceeded (proficere) too little (parum) in this thing.— <sup>33</sup> by the subjunctive.— <sup>34</sup> investigare.— <sup>35</sup> progredi, in subj.— <sup>36</sup> ulterius.— <sup>37</sup> by nolle.— <sup>38</sup> se in aliquā re interponere.— <sup>39</sup> to have success, vincere.— <sup>40</sup> capere.— <sup>41</sup> inde.— <sup>42</sup> debellare.— <sup>43</sup> The combat is fiercely raging, acerrime pugnatur.— <sup>44</sup> ad.— <sup>45</sup> munitio.— <sup>46</sup> dubitare.— <sup>47</sup> Render: What occasion (locus) of proving (probare) thy courage (virtus) dost thou look for (spectare).— <sup>48</sup> to bestow no favor, nihil præstare.— <sup>49</sup> abl.— <sup>50</sup> perdere.— <sup>51</sup> evenire, future-perfect.— <sup>52</sup> prædicere.— <sup>53</sup> hoc ipsum.— <sup>54</sup> by ajo.— <sup>55</sup> hostile soldier, hostis.— <sup>56</sup> obviam venire.— <sup>57</sup> casus.— <sup>58</sup> by the historical present.— <sup>59</sup> Tunc is es.— <sup>60</sup> velle.— <sup>61</sup> fame necare.— <sup>62</sup> plebs.— <sup>63</sup> Render: There, whenever any one (ubi quis) had said.— <sup>64</sup> Render: That it could not be done that (ut) they should return.— <sup>65</sup> vivus.— <sup>66</sup> ex.

ing<sup>1</sup>, they would say, 'The greater<sup>2</sup> will be our glory!'—7. When one of the younger chiefs of the legions<sup>3</sup> asked Metellus what he was going to do, he answered, 'If I knew that this coat were privy to that, I would instantly pull it off and cast it into the fire'.

V. OBLIQUE DECLARATIVE, AND IMPERATIVE CLAUSES. (R. 82, 83).—1. Scipio praised<sup>4</sup> [his] soldiers because neither<sup>5</sup> the sortie<sup>6</sup> of the enemy, nor the height<sup>7</sup> of the wall, nor the unknown<sup>8</sup> depth of the pond, nor the high situation<sup>9</sup> of the castle, nor its great strength<sup>10</sup>, were obstacles to their valor<sup>11</sup>.—2. All returned<sup>12</sup> thanks to all for<sup>13</sup> having spared them on the previous day, when they were seized by a panic.—3. Agesilāus bewailed<sup>14</sup> the fate<sup>15</sup> of Greece that<sup>16</sup>, by the perverse policy of his adversaries, his victories had cost so many lives.—4. The prefects of the king of Persia sent ambassadors to Athens to complain<sup>17</sup> that Chabrias, being<sup>18</sup> a citizen of Athens, had accepted<sup>19</sup> the command of the Egyptian fleet, and, [in this quality], was making war<sup>20</sup> against the king.—5. Xerxes thanked Demarātus for being the only one that had told him the truth (*verum*).—6. Many charged<sup>21</sup> Plancius with<sup>22</sup> his excessive popularity.—7. Alcibiades used to boast<sup>23</sup> that his actions<sup>24</sup> had always surprised every body.—8. I praised your brother because he had creditably acquitted<sup>25</sup> himself.—9. I think you are right<sup>26</sup> that you are in no hurry as to your suburban villa.—10. The Lacedaemonians accused Themistocles of having conspired<sup>27</sup> with the king of Persia to<sup>28</sup> oppress<sup>29</sup> Greece.—11. I congratulate<sup>30</sup> you on<sup>31</sup> the universal praise you met with when vacating [your] magistracy.—12. I thank you for writing me frequently.—13. I greatly<sup>32</sup> approve<sup>33</sup>, and am glad of<sup>34</sup> your, continued stay<sup>35</sup> at Brundisium.—14. I thanked him for<sup>36</sup> his magnificent entertainment of my son Quintus.—15. Valerius has written to me to<sup>37</sup> inform<sup>38</sup> you as quickly as possible<sup>39</sup>, that he had arrived on the 12th [of this month; i. e., March] at Laodicæa, and that he would write you in a few days.—16. I ask you<sup>40</sup> earnestly<sup>41</sup> to carry out<sup>42</sup> our oral understanding in regard to

<sup>1</sup> Hazardous undertaking, *conatus*.—<sup>2</sup> tanto major.—<sup>3</sup> Render: Metellus to a younger (junior) chief of the legions (*tribūnus militum*) asking (*percontari*) what he was going to do, 'Of this thing,' said, 'if I knew that this coat (*tunica*) was privy (*consciū*), I would cast (*conferre*) the pulled off one (*exuere*) into the fire'.—<sup>4</sup> collaudare.—<sup>5</sup> neither...nor...nor, = non...non...non.—<sup>6</sup> eruptio.—<sup>7</sup> altitudo.—<sup>8</sup> Render: The unexplored (*inexploratus*) fords (*radum*) of the pond (*stagnum*).—<sup>9</sup> Render: A castle (*castellum*) situated (*situs*) on a high hill (*tumulus*).—<sup>10</sup> Render: Nor the strongest (*munissimū*) fortification (*arx*).—<sup>11</sup> were obstacles to their valor = eos deterruit.—<sup>12</sup> agere (hist. present).—<sup>13</sup> Render: That they had spared (*parcere*) them, the terrified ones (*perterritus*) on the day before (*pridie*).—<sup>14</sup> commiserari.—<sup>15</sup> fortuna.—<sup>16</sup> Render: That so many defeated by him had perished (*conciderē*) by the fault (*vitium*) of [his] adversaries.—The sentence, if rendered '*quod victorie suae tot vitis constitissent*' would refer to the lives sacrificed in Agesilāus's own army, *constāre* always implying an equivalent paid by the *duy-r*. Since Agesilāus meant the lives lost on the side of the enemy, a recasting of the sentence is necessary.—<sup>17</sup> queri (first supine).—<sup>18</sup> quum esset.—<sup>19</sup> Render: 'having been placed at the head (*præponere* with dat.) of the fleet'.—<sup>20</sup> bellum gerere.—<sup>21</sup> accusare.—<sup>22</sup> that he was agreeable (*gratus*) beyond measure (*præter modum*).—<sup>23</sup> gloriari.—<sup>24</sup> Render: that whatever he did (*quæcumque ageret*) had deceived (*fallere*) of all always the opinion.—<sup>25</sup> to acquit one's self creditably, rem bene gerere.—<sup>26</sup> Render: 'On account of (*de*) the suburban villa that thou not hurriest (*properare*). I praise'.—<sup>27</sup> to conspire, societatem facere.—<sup>28</sup> ad with gerundial.—<sup>29</sup> opprimere.—<sup>30</sup> gratulari.—<sup>31</sup> Render: That the praises of all followed (*prosequi*) you abdicating the magistracy (*magistratū se abdicare*).—<sup>32</sup> valde.—<sup>33</sup> probare.—<sup>34</sup> quod.—<sup>35</sup> by '*adhuc morari*'.—<sup>36</sup> Render: That he had most liberally (*munificentissime*) received (*excepere*) my son Quintus.—<sup>37</sup> ut.—<sup>38</sup> certiorē facere.—<sup>39</sup> quam primum possem.—<sup>40</sup> rogare ab aliquo.—<sup>41</sup> vehementer.—<sup>42</sup> Render: That you accomplish (*conferre*) what we have made out (*cavēre*) orally (*coram*) on our things.

our affairs.—17. The consul directed<sup>1</sup> the quæstor not to obey the tribune of the people.—18. The consul exhorted<sup>2</sup> the soldiers to behave<sup>3</sup> with the same bravery<sup>4</sup> as<sup>5</sup> they were wont to do.—19. I have written to Curio that he should give [you] what you would wish<sup>6</sup>.

VI. INTERROGATIVE CLAUSES IN GENERAL. (R. 84, 85, Obs. 1-5).—1. It was the question whether those remedies were of any use<sup>7</sup>, or not.—2. It is the question whether knowledge<sup>8</sup> has been more beneficial<sup>9</sup> or injurious to mankind<sup>10</sup>.—3. The authorities do not agree<sup>11</sup> [as to] where, and at what distance<sup>12</sup> from the Rhine Cæsar defeated<sup>13</sup> Ariovistus.—4. It is not certain (*liquet*) whether Themistocles came to Persia during the reign<sup>14</sup> of Xerxes, or during that of Artaxerxes.—5. I was doubtful<sup>15</sup> whether I should instantly depart<sup>16</sup> for Pompey's camp, or whether I should wait<sup>17</sup> for your letter.—6. Write to me [about] what you see, what you feel, [and] what you think<sup>18</sup> that our prospects<sup>19</sup> are, or our plans<sup>20</sup> ought to be.—7. It will depend on you<sup>21</sup>, which [of the two] statuettes<sup>22</sup> I [shall] let you have<sup>23</sup>, and by what carrier<sup>24</sup> I [shall] send it.—8. Cæsar found out<sup>25</sup>, by asking<sup>26</sup> the prisoners, what was the cause of the delay<sup>27</sup>.

VII. RELATIVE OR INTERROGATIVE CLAUSES? (R. 85, Obs. 6, 7, 8, a) [Use the interrogative form wherever it is admissible; sentences which may be relative or interrogative, to be rendered in both ways.]—1. I cannot give you an answer<sup>28</sup> to<sup>29</sup> what you have asked me<sup>30</sup>.—2. What Quintus is doing<sup>31</sup>, I cannot tell.—3. You may have what you like<sup>32</sup> best<sup>33</sup>.—4. He wished<sup>34</sup> to ascertain<sup>35</sup> what I liked best.—5. It is uncertain what his real opinion was<sup>36</sup>.—6. I shall tell what my true opinion is.—7. I cannot tell my true opinion.—8. I wish to hear<sup>37</sup> what your opinion is on this subject<sup>38</sup>.—9. I did not expect to hear what his true opinion was.—10. I shall know at the same time what to do<sup>39</sup>.—11. The officers<sup>40</sup> deliberated<sup>41</sup> as to the best plan<sup>42</sup> to follow in their defence against the attack of the enemy.—12. The country<sup>43</sup> from which these tribes<sup>44</sup> came<sup>45</sup> to Italy, is not known<sup>46</sup>.—13. It is not known<sup>47</sup> from what part of the world<sup>48</sup> the Indian tribes<sup>49</sup> came<sup>50</sup> to this continent<sup>51</sup>.—14. I do not remember what information<sup>52</sup> I gave you of the projects<sup>53</sup> of Quintus.—15. For a general<sup>54</sup>, to do what is not allowed is no lighter offence than not to know<sup>55</sup> what is allowed.—16. Cicero learned<sup>56</sup> from Fulvia what Catiline was doing<sup>57</sup>.—17. Jugurtha sent spies<sup>58</sup> to learn<sup>59</sup>

<sup>1</sup> *Præcipere*.—<sup>2</sup> *conhortari*.—<sup>3</sup> *rem gerere*.—<sup>4</sup> *virtus*.—<sup>5</sup> Render: Which they had been wont *conferre*, subj. to use.—<sup>6</sup> Render: What thou hast said (plup. subj. with the force of a future perfect, *Rem. 98*).—<sup>7</sup> *to be of any use*, *prodesse*.—<sup>8</sup> *litterarum studium*.—<sup>9</sup> Render: Has brought (*afferre*) more benefit (*beneficium*) or injury (*detrimētum*).—<sup>10</sup> *humānum genus*.—<sup>11</sup> Render: 'It is not agreed (*non constat*) among the authors'.—<sup>12</sup> Render: 'At how great (p. 221, No. 3) from the river Rhine interval'.—<sup>13</sup> *devincere*.—<sup>14</sup> p. 181, R. 229.—<sup>15</sup> *dubitare*.—<sup>16</sup> *proficisci*.—<sup>17</sup> *expectare aliquid*.—<sup>18</sup> *existimare*.—<sup>19</sup> *our prospects are*, *aliquid expectandum est nobis*.—<sup>20</sup> *our plans ought to be*, *aliquid agendum nobis est*.—<sup>21</sup> *something depends on somebody*, *aliquid in alicujus potestate est*.—<sup>22</sup> *statuam*.—<sup>23</sup> *to let somebody have something*, *aliquid alicui relinquere*.—<sup>24</sup> *tabellarius*.—<sup>25</sup> *invenire*.—<sup>26</sup> *querere ex aliquo*.—<sup>27</sup> *mora*.—<sup>28</sup> *respondere*.—<sup>29</sup> *ad*.—<sup>30</sup> *querere ex*.—<sup>31</sup> *agere*.—<sup>32</sup> *by* *querere* (p. 361).—<sup>33</sup> Render: 'must'.—<sup>34</sup> *velle*.—<sup>35</sup> *scire*.—<sup>36</sup> *by* *sentire*.—<sup>37</sup> *scire*.—<sup>38</sup> *res*.—<sup>39</sup> *facere*.—<sup>40</sup> *dux*.—<sup>41</sup> *deliberare*.—<sup>42</sup> Render: by what chiefly *p. m. ratione* they [might] sustain the attack etc.—<sup>43</sup> *regiones*.—<sup>44</sup> *gens*.—<sup>45</sup> *descendere*.—<sup>46</sup> *by* *ignotus*.—<sup>47</sup> *no. constat*.—<sup>48</sup> *part of the world*, *regiones*.—<sup>49</sup> Render: the wild *gentes* nations which they call Indian (*Indiānos*).—<sup>50</sup> *transire*.—<sup>51</sup> *continens*, i. e. *e. terræ*.—<sup>52</sup> *to give information*, *tradere*.—<sup>53</sup> *consilium*.—<sup>54</sup> Render: It is no lighter offence than not to know *in* that a general should do (infinitive clause) what is not allowed (*licet*, in the subj. a. than etc.).—<sup>55</sup> *eminē nescire*.—<sup>56</sup> *cognoscere ex*.—<sup>57</sup> *agere*.—<sup>58</sup> *explo-rator*.—<sup>59</sup> *cognoscere*.

what was going on<sup>1</sup> in Rome.—18. Verres said<sup>2</sup> he could not judge what that statue was worth<sup>3</sup>.—19. Labienus wrote to Cæsar what had been done in Gaul.—20. I will write you to-morrow what I believe ought to be kept secret<sup>4</sup>, and what may be divulged<sup>5</sup>.—21. You know Pompey's infatuation<sup>6</sup>; you know his way of considering<sup>7</sup> cruelty a virtue; you know his suspicion<sup>8</sup> that I am always railing at him.—22. Hannibal sent five hundred horsemen in the direction<sup>9</sup> of the Roman camp to reconnoitre<sup>10</sup> whether there<sup>11</sup> were any hostile forces, what their strength was, and their plans<sup>12</sup>.—23. About the number of troops<sup>13</sup> that Hannibal had after his passage over the Alps, the authorities differ.—24. I cannot tell<sup>14</sup> the exact number<sup>15</sup> of the hostages.—25. The general ordered an account to be taken<sup>16</sup> of the number of prisoners belonging to each nation.—26. I wonder<sup>17</sup> that there is any doubt<sup>18</sup> about the route which<sup>19</sup> he took in crossing the Alps.

VIII. IDIOMATIC INTERROGATIVE CLAUSES. (R. 85, Obs. 8, b).—1. I am sensible of the scandal I have given by my loose writings, and make what reparation I am able<sup>20</sup>. (DRYDEN).—2. Before Cæsar left<sup>21</sup>, he gave his orders<sup>22</sup> about the winter-quarters<sup>23</sup>.—3. The ancients<sup>24</sup> did not know the properties of the atmospheric air<sup>25</sup>.—4. The Gauls were uncertain about the direction<sup>26</sup> to be followed by them.—5. Pelops neglected to teach his son the rules on moral duties<sup>27</sup>.—6. The Carthaginians did not under-rate the decrease of their strength by the loss of New Carthage<sup>28</sup>.—7. Is there anything known to you about the nationality of these emigrants<sup>29</sup>?—8. I wonder that there should be any doubt as to the object of these men in applying for a railroad charter<sup>30</sup>.—9. You have informed me of<sup>31</sup> the date of your arrival at Athens; now<sup>32</sup>, let me know<sup>33</sup> how many days later<sup>34</sup> you left<sup>35</sup> that city.—10. It is doubtful from<sup>36</sup> what reasons Augustus sent Ovid into exile.—11. You see how many and how great dangers they had to meet<sup>37</sup> before they arrived at the camp.—12. It is not known by what bribe these men were induced to change their votes<sup>38</sup>.—

<sup>1</sup> Fieri.—<sup>2</sup> by *negare*.—<sup>3</sup> see p. 267, Obs. 4.—<sup>4</sup> celare (gerundial).—<sup>5</sup> divulgare (gerundial).—<sup>6</sup> Render the three objects of 'you know' (*scis*) by interrogative clauses. *Infatuation* = how infatuated (*fatuus*) P. is.—<sup>7</sup> how he thinks (*putare*) cruelty etc.—<sup>8</sup> how much (*quam*) he suspects that he is always derided (*derisum esse*) by me.—<sup>9</sup> ad.—<sup>10</sup> speculari (first supine).—<sup>11</sup> Render: Where and how great [there] were hostile forces.—<sup>12</sup> Render: What they were preparing.—<sup>13</sup> Render: How many troops were to Hannibal having crossed (*transgredi*) the Alps, it is by no means (*nequāquam*) agreed (*convenit*) among the authors.—<sup>14</sup> ignorare.—<sup>15</sup> Render: how great was the number.—<sup>16</sup> Render by an interrogative clause with *ecthesis*: That the prisoners should be counted (*recensere*) how many belonged (*esse* with *gen.*) to every people.—<sup>17</sup> the seventeen words in this sentence must be rendered by five Latin words, employing an interrogative clause.—<sup>18</sup> ambigi.—<sup>19</sup> by what [route] he crossed.—<sup>20</sup> Render: Since (*quandoquidem*) I have written many things (*multa*) rather loosely (*levius*), which how much (*quam*) they are to the offence (*offensio*) of men, I feel, I shall not refuse (*recusare*) to expiate [it] (*quin expiam*) by the reparation by which I can (*quibus possim placulis*).—<sup>21</sup> proficisci (subj.).—<sup>22</sup> what he wished to be done.—<sup>23</sup> hiberna.—<sup>24</sup> vetus.—<sup>25</sup> Render: Of what kind (*qualis*) was the air which floats around (*circumfundere*) our earth.—<sup>26</sup> what direction (*pars*) should be followed (gerundial).—<sup>27</sup> Render: 'How far (*quatenus*) everything (*quidque*) must be attended to (*curare*, gerund).—<sup>28</sup> Render: Were by no means ignorant (*haudquāquam ignāri erant*), how much to them of strength (*vires*) had gone off (*decidere*) after having lost (*amittere*) New Carthage.—<sup>29</sup> Render: 'Canst thou state (*statuere*) anything of what nation (*gens*) are those immigrants (*atrena*)?'—<sup>30</sup> Render: I wonder that it is doubted what seeking (*querere*) those men have wished (*velle*) that a law on a railroad (*via ferrea*) should be passed (*ferre*) in their interest (*dat. of the interested person*).—<sup>31</sup> Render: You have written on what day you arrived at Athens.—<sup>32</sup> jam.—<sup>33</sup> fac ut sciam.—<sup>34</sup> Render: 'How many days having been placed between (*interficere*; see p. 180, Obs.)—<sup>35</sup> *decidere* with ablat.—<sup>36</sup> induced (*adducere*) by which things.—<sup>37</sup> after having met (*superare*) how many and how great dangers (*abl. abs.*), they arrived.—<sup>38</sup> having received (*accipere*) how much (great) money, those men changed their votes (*de sententiā decedere*).

13. You know how important the money-matters were which L. Sergius had transacted<sup>1</sup>.—14. When I asked him<sup>2</sup> on what day I should break camp<sup>3</sup>, he answered, 'On the next<sup>4</sup>, if I thought<sup>5</sup> it to be consistent<sup>6</sup> with the public interest'.—15. I do not know where<sup>7</sup> to get the means to accomplish this work.—16. You know yourself how to satisfy<sup>8</sup> in the best way the expectation of your [friends].—17. I shall know at the same time what to do.—18. He regretted exceedingly<sup>9</sup> that<sup>10</sup> he did not know how to play<sup>11</sup> on the piano<sup>12</sup>.—19. When I was loitering<sup>13</sup> on the Appian road, some unknown<sup>14</sup> person<sup>15</sup> addressed<sup>16</sup> me.—20. There will be trouble of some kind<sup>17</sup>.—21. He asked, whether<sup>18</sup> any one of<sup>19</sup> the captives was inclined<sup>20</sup> to participate<sup>21</sup> as a combatant in the fighting of the others.—22. We will have to examine<sup>22</sup> whether<sup>23</sup> there is any way to oppose these plans.—23. Let us see now whether<sup>24</sup> Sex. Roscius had<sup>25</sup> any opportunity<sup>26</sup> of committing<sup>27</sup> the crime<sup>28</sup>.—24. Gajus sent his brother to me to try<sup>29</sup> whether he could secure my co-operation.—25. Was there ever any<sup>30</sup> difficulty<sup>31</sup> among his neighbors which that [man] did not do his best<sup>32</sup> to adjust<sup>33</sup>?

IX. SUBOBLIQUE CLAUSES. (§ 599, R. 86, 87).—1. You acknowledge<sup>34</sup> that Balbus, by his birth<sup>35</sup>, belonged to the best families in his native city<sup>36</sup>.—2. Hannibal thought<sup>37</sup> Scipio to be a prominent<sup>38</sup> man from the very fact<sup>39</sup> that he, in preference to others<sup>40</sup>, was chosen<sup>41</sup> the leader against him.—3. The ambassadors tried to make Cæsar believe<sup>42</sup> that they would accept that condition which he proposed.—4. Hannibal was most anxious<sup>43</sup> not to lose<sup>44</sup> any time as long as<sup>45</sup> the enemy<sup>46</sup> [still] consisted<sup>47</sup> of raw recruits<sup>48</sup>, and the better<sup>49</sup> of their commanders was unfit for service from his wound.—5. The two generals had concluded a convention<sup>50</sup> that (at) what party<sup>51</sup>, in exchanging<sup>52</sup> the prisoners, received more [prisoners] than it gave, should pay<sup>53</sup> two pounds<sup>54</sup> and a half<sup>55</sup> of silver for<sup>56</sup> each<sup>57</sup> soldier.—6. He prayed<sup>58</sup> to the gods that, if he deceived<sup>59</sup> [them], they might so slaughter<sup>60</sup> him, as<sup>61</sup> he himself had slaughtered the lamb<sup>62</sup>.—7. The consul asked Sempronius, whether he was still<sup>63</sup> ready to fulfill<sup>64</sup> what he had promised to do the day before.—8. Cicero was of opinion<sup>65</sup> that Pythagoras lived<sup>66</sup> at the<sup>67</sup> time when<sup>68</sup> L. Brutus

<sup>1</sup> Render by *ecthesis*: You knew L. Sergius, the transaction (*negotia*) of how much money he had made.—<sup>2</sup> *plur. subj.*—<sup>3</sup> *castra movere*.—<sup>4</sup> *proximus*.—<sup>5</sup> *existimare*.—<sup>6</sup> *consistent with the public interest, e. republicā*.—<sup>7</sup> Render: Whence to get [the means] (that, by which I may accomplish (*conferre*) etc.—<sup>8</sup> Render: In what chiefly (*quid maxime*) manner you may satisfy etc.—<sup>9</sup> *modestissime ferre*.—<sup>10</sup> *quod*.—<sup>11</sup> *canere*.—<sup>12</sup> *clavichordam* (see p. 95, R. 62).—<sup>13</sup> *ambulare*.—<sup>14</sup> *nescio quis*.—<sup>15</sup> *homo*.—<sup>16</sup> *salutare*.—<sup>17</sup> *Render*.—<sup>18</sup> *It will be, I do not know what, of trouble (negotium)*.—<sup>19</sup> *by equis*.—<sup>20</sup> *ex*.—<sup>21</sup> *verie*.—<sup>22</sup> *Render*: To fight (*ferri decertare*) together (*cum*) with the others.—<sup>23</sup> *querere*.—<sup>24</sup> *whether in any (quid) manner it can be opposed (obstare) to these plans*.—<sup>25</sup> *by ee*.—<sup>26</sup> *whether in any (quid) manner it can be opposed (obstare) to these plans*.—<sup>27</sup> *Render*: Gajus sent his brother to me, if he could persuade me that I might promise him my work (*opera*).—<sup>28</sup> *by ee*.—<sup>29</sup> *querere*.—<sup>30</sup> *adjuvare*.—<sup>31</sup> *suscipere*.—<sup>32</sup> *malicium*.—<sup>33</sup> *Render*: Gajus sent his brother to me, if he could persuade me that I might promise him my work (*opera*).—<sup>34</sup> *by ee*.—<sup>35</sup> *by ee*.—<sup>36</sup> *Render*: In the city in which he was born.—<sup>37</sup> *credere*.—<sup>38</sup> *prestant*.—<sup>39</sup> *eo* place.—<sup>40</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>41</sup> *sol*.—<sup>42</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>43</sup> *sol*.—<sup>44</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>45</sup> *sol*.—<sup>46</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>47</sup> *sol*.—<sup>48</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>49</sup> *sol*.—<sup>50</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>51</sup> *sol*.—<sup>52</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>53</sup> *sol*.—<sup>54</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>55</sup> *sol*.—<sup>56</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>57</sup> *sol*.—<sup>58</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>59</sup> *sol*.—<sup>60</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>61</sup> *sol*.—<sup>62</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>63</sup> *sol*.—<sup>64</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>65</sup> *sol*.—<sup>66</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.—<sup>67</sup> *sol*.—<sup>68</sup> *Render*: They made the show (*ostendere*) that they would accept that condition which he proposed (*ferri*) by Cæsar.

delivered<sup>1</sup> the city of Rome from royal rule<sup>2</sup>.— 9. Do you think that the Stoics, because<sup>3</sup> they held<sup>4</sup> that all sins<sup>5</sup> were equal, therefore<sup>6</sup> believed that the same penalty should be provided<sup>7</sup> for every crime<sup>8</sup>?— 10. You ask me, in your letter, whether the opinion<sup>9</sup> of the Stoics is true, that everything that is produced<sup>10</sup> on the earth, is created<sup>11</sup> for the use of men.— 11. I ask of you that you allow<sup>12</sup> me a year's time concerning<sup>13</sup> those things which I wish<sup>14</sup> to discuss<sup>15</sup> with you.

X. QUASI-OBLIQUE, AND QUASI-SUBOBLIQUE CLAUSES. (R. 88. 89).— 1. After the battle of Plateae<sup>16</sup> the Lacedaemonians sent Pausanias with a fleet to the Hellespont to drive<sup>17</sup> the Persian<sup>18</sup> garrisons out of that part<sup>19</sup> of the country.— 2. Here the enemy established<sup>20</sup> a chain of fortifications<sup>21</sup> to exclude<sup>22</sup> our troops from all points.— 3. Caesar resolved to build a wall all around Pompey's camping ground<sup>23</sup> to make the conveyance<sup>24</sup> of corn and supplies for the army less dangerous.— 4. Pompey prohibited the making<sup>25</sup> of camp-fires<sup>26</sup> to conceal<sup>27</sup> the more easily his arrival.— 5. Pausanias, because he did not choose<sup>28</sup> to return to Sparta, betook himself to Colōnæ, which place was situated<sup>29</sup> in the district of Troy.— 6. Miltiades, because he was afraid lest the fleet of the Persians might arrive, returned to Athens to<sup>30</sup> the great dissatisfaction<sup>31</sup> of his countrymen<sup>32</sup>.— 7. Lysander, to effect<sup>33</sup> this purpose<sup>34</sup>, first consulted [the oracle of] Apollo at Delphi<sup>35</sup>, because the Lacedaemonians had the habit of consulting<sup>36</sup> the oracle on everything.— 8. Pompey crossed over to Greece, because the republic, as he said<sup>37</sup>, could be defended there<sup>38</sup> better than in Italy.— 9. The king instantly sent Speusippus to prison<sup>39</sup>, whom, as he said<sup>40</sup>, the gods themselves had delivered<sup>41</sup> into his<sup>42</sup> hands as a hostage for the fidelity<sup>43</sup> of [his] father.— 10. Cicero had not received any letter from Crassus in five days, because he was, as he thought<sup>44</sup>, besieged<sup>45</sup> by the enemy.— 11. The Athenians attributed<sup>46</sup> these calamities<sup>47</sup> to their own fault<sup>48</sup>, because they had expelled Alcibiades from the State.— 12. At that time almost all States of Greece were anxious<sup>49</sup> for an alliance with the Athenians, to have<sup>50</sup> a better protection against the Persians in the case that<sup>51</sup> they, perhaps, would<sup>52</sup> renew the war.— 13. The king reminded<sup>53</sup> the Rhodians of the ships with which they had promised<sup>54</sup> to assist him.— 14. The consul resolved<sup>55</sup> to nail<sup>56</sup> to the cross all the marauders<sup>57</sup> who would be captured by the soldiers.— 15. The king demanded of Verres the return<sup>58</sup> of the statue which he had lent him some

<sup>1</sup> Liberare.—<sup>2</sup> dominatus.—<sup>3</sup> quoniam.—<sup>4</sup> putare.—<sup>5</sup> peccatum.—<sup>6</sup> ideo.—<sup>7</sup> constituere (gerundial).—<sup>8</sup> delictum.—<sup>9</sup> Render 'what pleases the Stoics.'—<sup>10</sup> to produce, gignere.—<sup>11</sup> creare.—<sup>12</sup> dare.—<sup>13</sup> de.—<sup>14</sup> velle.—<sup>15</sup> to discuss something, colloqui aliquid.—<sup>16</sup> Plateensis.—<sup>17</sup> depellere.—<sup>18</sup> barbarorum.—<sup>19</sup> Render: 'Out of those regions'.—<sup>20</sup> efficere.—<sup>21</sup> a chain of fortifications, munitiōnes perpetuae.—<sup>22</sup> Render: 'lest any place our troops could not enter.'—<sup>23</sup> to build a wall, . . . camping ground, circumvallare Pompējum.—<sup>24</sup> Render: 'In order that with less danger the corn and supplies (commeatus) could be conveyed (supportare) for (dat.) the army.'—<sup>25</sup> infinitive clause.—<sup>26</sup> ignis.—<sup>27</sup> Render: 'that the more secret (occultus) his arrival (should) be.'—<sup>28</sup> velle.—<sup>29</sup> esse.—<sup>30</sup> p. 259, Obs. 4.—<sup>31</sup> offensio.—<sup>32</sup> = fellow-citizens.—<sup>33</sup> ad with gerundial.—<sup>34</sup> res.—<sup>35</sup> Delphicus.—<sup>36</sup> to refer (referre) all to the oracles.—<sup>37</sup> Render: 'in every allowable way.'—<sup>38</sup> inde.—<sup>39</sup> in vincula conjicere.—<sup>40</sup> Render by all the methods admissible.—<sup>41</sup> dare.—<sup>42</sup> dative of the interested person.—<sup>43</sup> fides.—<sup>44</sup> putare; to be rendered by all the methods admissible.—<sup>45</sup> obsidere.—<sup>46</sup> tribuere.—<sup>47</sup> malum.—<sup>48</sup> culpa.—<sup>49</sup> to be anxious for an alliance with somebody, se ad aliorum societatem applicare.—<sup>50</sup> Render: 'in order to protect (tutari) themselves the more easily against the Persians.'—<sup>51</sup> in the case that, si.—<sup>52</sup> preterite of renovare.—<sup>53</sup> admonere de.—<sup>54</sup> Render: 'which they had promised to send to his aid (subsidium)'; by the abstract dative.—<sup>55</sup> statuere.—<sup>56</sup> ad crucem adigere.—<sup>57</sup> Render: 'all that would be seized (comprehendere, in a preterite tense) by the soldiers while plundering (predari, in the form of an accessory predicate).—<sup>58</sup> to demand the return of something, reposcere aliquid.

days before.— 16 Titius was to remain<sup>1</sup> with two cohorts in town, if the disposition<sup>2</sup> of the citizens should seem<sup>3</sup> suspicious<sup>4</sup> to him.— 17. The consul sent a detachment of<sup>5</sup> two cohorts in advance<sup>6</sup> to Declea in the event<sup>7</sup> that the king had taken this direction in [his] flight.

XI. SUBJUNCTIVE BY ATTRACTION AND QUASI-ATTRACTION. (§ 601).— 1. Antonius was so popular<sup>8</sup> a speaker that the public made use of his legal services<sup>9</sup> whenever they had a chance<sup>10</sup>.— 2. Thus it came<sup>11</sup> that he was open<sup>12</sup> to all if his advice or influence<sup>13</sup> was needed<sup>14</sup>.— 3. Thereby<sup>15</sup> Alcibiades effected that, in whatever country<sup>16</sup> he staid (esse), he was considered the foremost<sup>17</sup>, and treated with the greatest affection<sup>18</sup>.— 4. This sovereign<sup>19</sup> was of such mendacity that, when he said he wished<sup>20</sup> peace, he seemed to be preparing for war.— 5. There was nobody who<sup>21</sup> did not mourn over the death of that man rather than rejoice at the victory for which<sup>22</sup> he paid with his life.— 6. Such<sup>23</sup> was the greatness<sup>24</sup> of Epaminondas that, as long as he<sup>25</sup> was at the helm<sup>26</sup> of the republic, Thebes was the head of all Greece.— 7. So great was [the power of] his eloquence that those who were present shouted that arms ought to be instantly taken up<sup>27</sup>.— 8. If Brutus had been present, he would not have approved<sup>28</sup> your resolutions<sup>29</sup>.— 9. The heart of a hearer<sup>30</sup> would never be set on fire by a speech, if there were no fire in it to be communicated to him.— 10. It is the custom in our republic to commit<sup>31</sup> to prison those who are accused of any offence, unless they give satisfactory security for their appearance in court.— 11. An irreproachable life is necessary for a comfortable death<sup>32</sup>.— 12. We lose<sup>33</sup> the power<sup>34</sup> of thinking and of properly expressing<sup>35</sup> our thoughts<sup>36</sup>, unless we<sup>37</sup> daily exercise [it].— 13. It is the mark of an unprincipled<sup>38</sup> man to backbite<sup>39</sup> those with whom<sup>40</sup> he<sup>41</sup> is in daily intercourse.— 14. Nothing is more foolish than to trust<sup>42</sup> those who have once deceived<sup>43</sup> us<sup>44</sup>.

XII. THE LAW OF CONSECUTION IN CONFLICT WITH OTHER GRAMMATICAL LAWS, OR WITH LOGICAL CLEARNESS. (R. 94, Obs. 1).— 1. The Senate did all it could do<sup>1</sup> for the illustrious stranger, by inviting him to the floor of the house.— 2. You have given the strongest<sup>2</sup> evidence<sup>3</sup> of your

<sup>1</sup> Imp. pempt. fut. with the force of: 'It was resolved that he should remain.'—<sup>2</sup> fides.—<sup>3</sup> proterite tense.—<sup>4</sup> suspectus.—<sup>5</sup> cohortes expedita. implying that they were sent without any baggage impedimenta.—<sup>6</sup> to send in advance, praemittere.—<sup>7</sup> Render: 'If the flight had carried (ferre) the king hither.'—<sup>8</sup> popularis.—<sup>9</sup> legal services, patrocinium.—<sup>10</sup> to have a chance, licet.—<sup>11</sup> quo factum est ut.—<sup>12</sup> nemini deesse.—<sup>13</sup> auctoritas.—<sup>14</sup> opus esse.—<sup>15</sup> his rebus.—<sup>16</sup> apud quoscunque.—<sup>17</sup> to consider somebody the foremost, aliquem principem ponere.—<sup>18</sup> to treat somebody with the greatest affection, aliquem carissimum habere.—<sup>19</sup> princeps.—<sup>20</sup> velle.—<sup>21</sup> Nemo inventus est quin (with subj.).—<sup>22</sup> Render: 'which he redeemed (redimere) by his blood.'—<sup>23</sup> tantus.—<sup>24</sup> praestantia.—<sup>25</sup> Render: 'What you would be.'—<sup>26</sup> arma capere.—<sup>27</sup> probare.—<sup>28</sup> Render: 'Never, he who hears, would be have ordered (jussit) that it shall be done.'—<sup>29</sup> Render: 'burning (ardere) to him.'—<sup>30</sup> Render: 'That (disjunctive clause) those who have been accused of (de) some offence set on fire (accendit) unless the speech came (pervenire) burning (ardere) to him.'—<sup>31</sup> Render: 'That (disjunctive clause) out of fetters (vincula) unless they have (delictum), defend themselves (causam dicere) in court (iudicio sistendi causa).—<sup>32</sup> Render: 'It is necessary to have lived well if you wish (velle) to die well. [Render in both ways, by the second person, and by si quis].—<sup>33</sup> Render both by the first person plur., and the second person singular.—<sup>34</sup> tacitas.—<sup>35</sup> convenienter.—<sup>36</sup> exprimere.—<sup>37</sup> Render: 'The thought (things)'.—<sup>38</sup> See No. 33.—<sup>39</sup> levissimus.—<sup>40</sup> de fama eorum detrahere.—<sup>41</sup> Render: 'Whose habit (consuetudo) he uses.'—<sup>42</sup> Render in all persons admissible.—<sup>43</sup> credere.—<sup>44</sup> fallere.—<sup>45</sup> Render both literally, and by changing into a passive construction with the second person, using the verb decipere.—<sup>46</sup> Render: 'The Senate attributed (tribuit) everything to the dignity of the most illustrious stranger (hospes), in as much as it (= qui, with subjunct.) conceded to him a seat within the bar (intra carceres).—<sup>47</sup> gravissimus.—<sup>48</sup> testimonium.

guilt by<sup>1</sup> opposing<sup>2</sup> a regular investigation into the matter.—3. Caesar did more than he promised, in as much<sup>3</sup> as, in lieu of making the tenth legion his body-guard, as he promised, he made them cavaliers<sup>4</sup>.—4. Cicero said that Caesar had committed a capital crime<sup>5</sup> in as much as he had wished<sup>6</sup> to be king of the Roman people and the lord<sup>7</sup> of all nations, and had accomplished<sup>8</sup> it.—5. During<sup>9</sup> this whole march<sup>10</sup> we could not see<sup>11</sup> [any] hostile<sup>12</sup> forces, although<sup>13</sup> we searched<sup>14</sup> all the forests<sup>15</sup> and hiding places<sup>16</sup> from seven o'clock till midnight<sup>17</sup>.—6. It was impossible for the accused<sup>18</sup> to have committed that murder<sup>19</sup>, since he came to this country after<sup>20</sup> the perpetration of the crime, and never<sup>21</sup> was longer than one day absent<sup>22</sup> from his [former] home.—7. He complained<sup>23</sup> without good reason<sup>24</sup>, since our courts<sup>25</sup> have always held this law<sup>26</sup> to be unconstitutional.—8. There was no good reason<sup>27</sup> why you should sell<sup>28</sup> those stocks<sup>29</sup> at a discount<sup>30</sup>, considering that the government<sup>31</sup> has always redeemed them at par.—9. This number was large, considering that their own cavalry<sup>32</sup> amounted to no more than eight hundred.—10. The number of these was five thousand<sup>33</sup>, while<sup>34</sup> their own cavalry amounted to less than [one] thousand.

XIII. PRETERITE CONSECUTION, OR LOGICAL TENSES, DEPENDENT ON PRETERITES CONTAINING PRESENTS BY IMPLICATION. (R. 94, OBS. 2-6).—1. I have sufficiently explained<sup>35</sup> how<sup>36</sup> the idea of duty<sup>37</sup> [must] be derived<sup>38</sup> from the idea of morality<sup>39</sup>.—2. Nobody has, as yet<sup>40</sup>, asked me whether I had any message<sup>41</sup> for Rome.—3. Have not the decemvirs carried<sup>42</sup> in this very year the law<sup>43</sup> that<sup>44</sup> there shall be no intermarriage between Patricians and Plebeians?—4. I have placed<sup>45</sup> all [my] hope in you since, besides<sup>46</sup> you, I have no one in whom I trust<sup>47</sup>.—5. We have been asking<sup>48</sup> you, for a long time<sup>49</sup>, every day whether there is<sup>50</sup> any hope to save the life of the accused.—6. You have not yet learned what may<sup>51</sup> be effected by wisely using the means<sup>52</sup> given to us by nature.—7. We have never doubted that<sup>53</sup> there are [but] few Fabriciuses in this country<sup>54</sup>.—8. I have very often<sup>55</sup> considered the question<sup>56</sup> whether

<sup>1</sup> Qui.—<sup>2</sup> by *nolle*. Render: 'Who didst not wish that the thing should be investigated (cognoscere) by a just question'.—<sup>3</sup> Render: 'Who, when he had promised that it was to be (fulvum esse) his praetorian cohort; 'his' to be rendered by the dative of the interested person).—<sup>4</sup> to make some person a cavalier, aliquem ad equum rescribere (a term taken from the promotion to the equestrian rank, in the census).—<sup>5</sup> to commit a capital crime, capitalem esse.—<sup>6</sup> concupiscere.—<sup>7</sup> dominus.—<sup>8</sup> perficere.—<sup>9</sup> abl.—<sup>10</sup> iter.—<sup>11</sup> cer- nere.—<sup>12</sup> hostium.—<sup>13</sup> quum, with subjunct.—<sup>14</sup> perscrutari.—<sup>15</sup> saltus.—<sup>16</sup> latebrae.—<sup>17</sup> multa nox.—<sup>18</sup> Render: How (qui) could it be done that (ut) the accused committed.—<sup>19</sup> cades.—<sup>20</sup> Render: 'Since he came later (postea) into this republic than the crime (male- fectum) had been perpetrated'.—<sup>21</sup> Render: 'nor that [one] was longer etc.'.—<sup>22</sup> abesse.—<sup>23</sup> queri.—<sup>24</sup> nullo jure.—<sup>25</sup> Render: 'since it has always been judged (cognoscere)'.—<sup>26</sup> Ren- der: 'that this law, without prejudice to the constitution (salva lege perpetua), could have not been made (ferri)'. *Lex perpetua* = constitution, is according to the analogy of 'edic- tum perpetuum'. See also Cic. N. D. 1, 15, 40; Or. 2, 33.—<sup>27</sup> Quid erat quod.—<sup>28</sup> transferre.—<sup>29</sup> publica illa chirographa (nom. plur.).—<sup>30</sup> cum versura.—<sup>31</sup> Render: 'Since, from the treasury (aerarium) itself, they have always been redeemed (redimere) at the same price [see p. 270, R. 35, 2] as they were written' (the auxiliary to be used only once at the end).—<sup>32</sup> Render: 'Since they themselves had no more than eight hundred horse- men'.—<sup>33</sup> genitive.—<sup>34</sup> quum.—<sup>35</sup> explicare.—<sup>36</sup> quemadmodum.—<sup>37</sup> the idea of duty, officia.—<sup>38</sup> ducere.—<sup>39</sup> the idea of morality, honestas.—<sup>40</sup> adhuc.—<sup>41</sup> Render: 'Whether I wished (velle) anything to Rome' (according to the rules about the cases of the names of cities).—<sup>42</sup> ferre.—<sup>43</sup> Render: 'that not (ne) [there] should be intermarriage (connubium) to the patricians with the plebs'.—<sup>44</sup> ponere.—<sup>45</sup> praeter.—<sup>46</sup> Render: 'to whom I trust (confidere, subjunct.) I have nobody'.—<sup>47</sup> querere ex.—<sup>48</sup> jamdiu.—<sup>49</sup> Render: 'whether any (by ee) [there] is to the accused hope of safety (salus)'.—<sup>50</sup> posse.—<sup>51</sup> Render: 'by the forces (vires), given to us by nature, wisely to be used' (reversed phrase).—<sup>52</sup> quoniam.—<sup>53</sup> Render: 'that few are in this State Fabriciuses'.—<sup>54</sup> saepe ac multum.—<sup>55</sup> to con- sider the question, cogitare.

civilization<sup>1</sup> has been a blessing or a curse to mankind.—9. You have heard<sup>2</sup> how arrogantly and haughtily<sup>3</sup> the envoys answered your ques- tion<sup>4</sup>.—10. Lucilius has departed for Gaul, not because<sup>5</sup> he feels himself unsafe<sup>6</sup> in Italy, but in order to pay a visit<sup>7</sup> to his relatives<sup>8</sup>.—11. No<sup>9</sup> citizen of this republic, being<sup>10</sup> of a sane mind and good character<sup>11</sup>, ever has betaken himself [for good] to a country<sup>12</sup> where he cannot<sup>13</sup> exercise the natural rights of man<sup>14</sup>.—12. Many [people] give offence<sup>15</sup> while<sup>16</sup> they mean<sup>17</sup> to flatter<sup>18</sup>, and flatter when they mean to give offence.—13. I have often heard Titus say that this man could not govern<sup>19</sup> our re- public.—14. You have heard the objections<sup>20</sup> that the defendant has made against our argument.—15. No motive<sup>21</sup> has been alleged<sup>22</sup> which [could] have induced<sup>23</sup> the accused<sup>24</sup> to commit so heinous<sup>25</sup> an offence<sup>26</sup>.—16. I have explained to you the motives<sup>27</sup> which induced me to act as attorney in this case.—17. I was yesterday informed<sup>28</sup> why<sup>29</sup> our [friend] Gajus has<sup>30</sup> stopped his payments.—18. I have informed<sup>31</sup> you of the doings<sup>32</sup> of Quinctius up to that day when<sup>33</sup>, on his return<sup>34</sup> from Gaul, he arrived<sup>35</sup> at this city.—19. I have retired<sup>36</sup> to this place in order to be, as it were, in a safe port, after being tossed about by many storms.—20. I have made these arrangements<sup>37</sup> in order that no one<sup>38</sup> may say I promised from fear<sup>39</sup> what I refused<sup>40</sup> to a prayer.—21. There have always been persons who<sup>41</sup>, for a consideration<sup>42</sup>, are ready to perpetrate the most wicked crimes<sup>43</sup>.—22. There are people who<sup>44</sup> believe, that this Senator did not change his vote<sup>45</sup> without some weighty<sup>46</sup> reason.

XIV. TENSES OF SUBJUNCTIVES, DEPENDENT ON PERFECT SUBJUNC- TIVES, ON HYPOTHETICALS, AND SENTENCES WITH *quum*—*tum* (R. 94, OBS. 7-10).—1. You could not easily tell<sup>47</sup>, which of the two men<sup>48</sup> esteemed<sup>49</sup> the other<sup>50</sup> most<sup>51</sup>.—2. I believe that you know with what zeal Crassus devoted<sup>52</sup> himself to speaking when he thought that he would gain dis- tinction by it<sup>53</sup>.—3. This speaker should be praised<sup>54</sup> because he thought<sup>55</sup> it proper to omit<sup>56</sup> what could not be said without giving<sup>57</sup> offence to many.—4. Do you know the number<sup>58</sup> of soldiers<sup>59</sup> that Hannibal had

<sup>1</sup> Render: 'whether of good (bonae) or of evil more to men have given (afferre) the arts of humanity'.—<sup>2</sup> accipere.—<sup>3</sup> superbus.—<sup>4</sup> Render: 'answered to you'.—<sup>5</sup> non quo.—<sup>6</sup> of humanity.—<sup>7</sup> accipere.—<sup>8</sup> superbus.—<sup>9</sup> Render: 'he feels (existimare) himself less safe' (minus must not directly follow quo).—<sup>10</sup> Render: 'to pay a visit to, convey, aliquem.—<sup>11</sup> propinquus.—<sup>12</sup> Render: 'No (nemo) ever of this republic citizen'.—<sup>13</sup> qui quidam with esse in the subjunct.—<sup>14</sup> those [things] which concern him.—<sup>15</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>16</sup> those [things] which concern him.—<sup>17</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>18</sup> those [things] which concern him.—<sup>19</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>20</sup> those [things] which concern him.—<sup>21</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>22</sup> those [things] which concern him.—<sup>23</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>24</sup> those [things] which concern him.—<sup>25</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>26</sup> those [things] which concern him.—<sup>27</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>28</sup> those [things] which concern him.—<sup>29</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>30</sup> those [things] which concern him.—<sup>31</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>32</sup> those [things] which concern him.—<sup>33</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>34</sup> those [things] which concern him.—<sup>35</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>36</sup> those [things] which concern him.—<sup>37</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>38</sup> those [things] which concern him.—<sup>39</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>40</sup> those [things] which concern him.—<sup>41</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>42</sup> those [things] which concern him.—<sup>43</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>44</sup> those [things] which concern him.—<sup>45</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>46</sup> those [things] which concern him.—<sup>47</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>48</sup> those [things] which concern him.—<sup>49</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>50</sup> those [things] which concern him.—<sup>51</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>52</sup> those [things] which concern him.—<sup>53</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>54</sup> those [things] which concern him.—<sup>55</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>56</sup> those [things] which concern him.—<sup>57</sup> Render: 'where it is not allowed' (est, in subj.).—<sup>58</sup> those [things] which concern him.—<sup>59</sup> Render: 'where it is not allowed' (est, in subj.).

before he crossed<sup>1</sup> the Alps?— 5. I would read<sup>2</sup> to you many [passages] of his letters, if I were not afraid that this kind of argument<sup>3</sup> is at variance<sup>4</sup> with the practice of this court<sup>5</sup>.— 6. Would you deny [it] if I repeated<sup>6</sup> on what help you relied<sup>7</sup> when you attacked me?— 7. What would prevent<sup>8</sup> me from becoming<sup>9</sup> a Darwinian<sup>10</sup> if I approved of Darwin's principles<sup>11</sup>?— 8. Epicurus, surely, would not reason<sup>12</sup> thus if he<sup>13</sup> had learned his multiplication table<sup>14</sup>.— 9. With what delight<sup>15</sup> would you hear Sempronius, since your Titius, whom you praise so much, with us, is by no means considered an orator of the first rank<sup>16</sup>.— 10. I would mention<sup>17</sup> the advantages which<sup>18</sup>, at that time, Lucullus's advice had<sup>19</sup> for me, if I could do this<sup>20</sup> without speaking of myself.— 11. As<sup>21</sup> the Saguntians were at all times most attached<sup>22</sup> to the Roman people, so<sup>23</sup> in the catastrophe when<sup>24</sup> Hannibal put an end to the existence<sup>25</sup> of the whole people, they kept<sup>26</sup> their faith up to their last agony<sup>27</sup>.— 12. While<sup>28</sup> Pompey had already<sup>29</sup> understood<sup>30</sup> that Cæsar was estranged<sup>31</sup> from him, he understood this much more distinctly<sup>32</sup> when he found<sup>33</sup> that Hirtius, who was Cæsar's most intimate friend<sup>34</sup>, had not called on him<sup>35</sup>.

XV. TENSES OF THE SUBJUNCTIVE IN MODAL CLAUSES. (R. 95).— 1. The administration of that governor was so disgraceful as to leave that State which, when he entered office, was most prosperous, utterly ruined and poor<sup>36</sup>.— 2. Yesterday your ambassador declared<sup>37</sup> that he would not return to you, [so] that I have come myself to<sup>38</sup> conclude<sup>39</sup> peace with you, if possible<sup>40</sup>.— 3. Sempronius's speech was received<sup>41</sup> with marked<sup>42</sup> favor<sup>43</sup>, [so] that I have hardly ever heard any orator who, in a like<sup>44</sup> manner, commanded the attention of [his] audience<sup>45</sup>.— 4. Washington administered the government<sup>46</sup> so faithfully and prudently<sup>47</sup>, that he has always held<sup>48</sup> the first place<sup>49</sup> in the hearts<sup>50</sup> of his countrymen.— 5. So great was the wisdom of our forefathers<sup>51</sup> in framing<sup>52</sup> the constitution of the government, that it has remained intact, although<sup>53</sup> a most formidable<sup>54</sup> civil war was kindled<sup>55</sup> in order to destroy<sup>56</sup> it.— 6. That man bore<sup>57</sup> [his] poverty in a manner that never any one heard him utter a complaint<sup>58</sup>.— 7. Balbus has written that he is suffering<sup>59</sup> under a bad

<sup>1</sup> Transgredi.—<sup>2</sup> recitare.—<sup>3</sup> genus orationis.—<sup>4</sup> to be at variance with, abhorre ab.—<sup>5</sup> hujus loci mos.—<sup>6</sup> narrare.—<sup>7</sup> Render: 'relying (fretus) on what help (auxilia) you attacked me'.—<sup>8</sup> prohibere.—<sup>9</sup> evadere.—<sup>10</sup> Darwinianus.—<sup>11</sup> Render: 'if I approved (probare) what that [one] says (subj.)'.—<sup>12</sup> dicere.—<sup>13</sup> nec.—<sup>14</sup> Render: 'if he had learned how much are twice two (P. I, § 259, EXPLAN.)'.—<sup>15</sup> Quo tandem animo.—<sup>16</sup> to consider somebody an orator of the first rank, aliquem in primariis oratoribus numerare.—<sup>17</sup> dicere.—<sup>18</sup> Render by an interrogative clause.—<sup>19</sup> to have advantages for somebody, aliquem prodesse.—<sup>20</sup> Render: 'If I would not have (gerundial) to speak of myself'.—<sup>21</sup> Saguntini quum.—<sup>22</sup> to be most attached to somebody, aliquem summam amicitiam præstare.—<sup>23</sup> tum vero.—<sup>24</sup> in illâ calamitate qua.—<sup>25</sup> universam gentem tollere.—<sup>26</sup> colere.—<sup>27</sup> ad ultimam eam perniciem.—<sup>28</sup> quum... tum.—<sup>29</sup> antea.—<sup>30</sup> intelligere.—<sup>31</sup> alienare ab.—<sup>32</sup> certius.—<sup>33</sup> videre.—<sup>34</sup> Render 'who was most intimate (familiāris) to that [one]'. The clause is represented as a reason of Pompey.—<sup>35</sup> to call on somebody, aliquem convenire.—<sup>36</sup> Render: 'That man so disgracefully (turpis) administered (gubernare) the republic, that what State he received (accipere) most flourishing (florens), that [one] he left (relinquere) utterly (penitus) destroyed (evertere) and poorest'.—<sup>37</sup> by negare.—<sup>38</sup> ad, with gerundial.—<sup>39</sup> componere.—<sup>40</sup> with you if possible; render: 'if it will have been allowed (licet) through you'.—<sup>41</sup> excipere.—<sup>42</sup> in-ignis.—<sup>43</sup> gratia.—<sup>44</sup> par.—<sup>45</sup> to command the attention of an audience, animos audientium commovere.—<sup>46</sup> rempublicam gubernare.—<sup>47</sup> with so much faith (fides) and prudence.—<sup>48</sup> tenere.—<sup>49</sup> Render: 'the first in the hearts of his citizens place'.—<sup>50</sup> animi.—<sup>51</sup> majores.—<sup>52</sup> Render: 'that the law by which those willed (velle) that the republic should be for ever (in perpetuum) governed, has remained (manere) intact (incolumis)'.—<sup>53</sup> quum.—<sup>54</sup> maximum.—<sup>55</sup> inflammare.—<sup>56</sup> evertere (gerundial after ad).—<sup>57</sup> ferre.—<sup>58</sup> to utter a complaint, queri (partic. as accessory predicate).—<sup>59</sup> Render: 'that he is oppressed (periphrastic participle) by so great hoarseness (raucitas)'.

attack of hoarseness so that he cannot speak.— 8. Crassus held the first place among the speakers of his time<sup>1</sup>, and Scævola among the jurists, which positions<sup>2</sup> however<sup>3</sup> were in a certain measure<sup>4</sup> common between both, so that each<sup>5</sup> appropriated<sup>6</sup> part of<sup>7</sup> the other's praise, but<sup>8</sup> [held] his own wholly.— 9. While I was addressing the people<sup>9</sup>, they wept<sup>10</sup>, and the cries of agony were intense, so that it seemed as if the whole city<sup>11</sup> were in the deepest mourning.— 10. The state of affairs at that time was such<sup>12</sup> that the Æduans were acknowledged<sup>13</sup> as the foremost by far<sup>14</sup>, [and that] the Remi held<sup>15</sup> the second place.— 11. He was [in the habit of] taking<sup>16</sup> such exercises<sup>17</sup> as to come both hungry<sup>18</sup> and thirsty<sup>19</sup> to his meals<sup>20</sup>.— 12. Athens<sup>21</sup> had so risen in the estimation of Greece<sup>22</sup> that Sparta<sup>23</sup> was aware<sup>24</sup> that a war with that power<sup>25</sup> for the supremacy was only a question of time.— 13. So evenly balanced were the merits of these [two] men<sup>26</sup>, that it is difficult to judge<sup>27</sup> which of them<sup>28</sup> was superior<sup>29</sup> to the other<sup>30</sup>. [Render both dependent predicates in all allowable tenses. There will be three variations in rendering].— 14. So large was the forces of the enemy that it seems almost miraculous<sup>31</sup> that they should<sup>32</sup> have been defeated by so small<sup>33</sup> a force<sup>34</sup> of the Greeks.— 15. There was such a scarcity<sup>35</sup> of prominent<sup>36</sup> writers in that period<sup>37</sup> that, while<sup>38</sup> we are satisfied<sup>39</sup> with a few, we entertain<sup>40</sup> no great admiration for any<sup>41</sup>.— 16. That general might have destroyed<sup>42</sup> almost the whole hostile<sup>43</sup> army if he had pursued<sup>44</sup> it<sup>45</sup> with energy<sup>46</sup>, [so] that to him may be applied<sup>47</sup> what Cæsar is said<sup>48</sup> to have remarked<sup>49</sup> of Pompey, that he<sup>50</sup> knew how to defeat [the enemy], [but] not<sup>51</sup> how to make use<sup>52</sup> of his victory.— [The clauses in the sentences 17. 18. to be transformed into Ut-clauses of intensity]. 17. Pompey left abruptly<sup>53</sup> the city because Cæsar approached<sup>54</sup> Rome with the greatest<sup>55</sup> rapidity<sup>56</sup>.— 18. The king desisted<sup>57</sup> from the undertaking<sup>58</sup> because there was very little<sup>59</sup> hope of raising<sup>60</sup> the siege of the city.— 19. L. Brutus was so faithful in his duties to his country<sup>61</sup>, that he placed<sup>62</sup> the freedom of his countrymen<sup>63</sup> higher than the life<sup>64</sup> of his son.— 20. Pompey was of such integrity<sup>65</sup>, that he never<sup>66</sup> accepted a gift from allied States<sup>67</sup>.— 21. Alcibiades united<sup>68</sup> so great virtues with so great

<sup>1</sup> Render: 'Crassus among the contemporaries (contemporarii) held the first place in the art of speaking (dicere), but (autem) Scævola in the civil law (jus)'.—<sup>2</sup> loca.—<sup>3</sup> quidem.—<sup>4</sup> quodammodo.—<sup>5</sup> alter.—<sup>6</sup> habere.—<sup>7</sup> ex.—<sup>8</sup> Render: 'but (autem) both'.—<sup>9</sup> Render: 'to address the people, in contione (interque) his (i. e. praise) wholly'. (see p. 251, OBS. 7).—<sup>10</sup> Render: 'so great weepings and wailings (gemitus fletusque) were made that'.—<sup>11</sup> Render: 'that the bitterest [in] the whole city to prevail (versari) mourning etc'.—<sup>12</sup> Render: 'The thing was [in] that then state (status)'.—<sup>13</sup> haberi.—<sup>14</sup> Render: 'The thing was [in] that then state (status)'.—<sup>15</sup> Render: 'The thing was [in] that then state (status)'.—<sup>16</sup> Render: 'The thing was [in] that then state (status)'.—<sup>17</sup> Render: 'The thing was [in] that then state (status)'.—<sup>18</sup> Render: 'The thing was [in] that then state (status)'.—<sup>19</sup> Render: 'The thing was [in] that then state (status)'.—<sup>20</sup> Render: 'The thing was [in] that then state (status)'.—<sup>21</sup> Render: 'The thing was [in] that then state (status)'.—<sup>22</sup> Render: 'The thing was [in] that then state (status)'.—<sup>23</sup> Render: 'The thing was [in] that then state (status)'.—<sup>24</sup> Render: 'The thing was [in] that then state (status)'.—<sup>25</sup> Render: 'The thing was [in] that then state (status)'.—<sup>26</sup> Render: 'The thing was [in] that then state (status)'.—<sup>27</sup> Render: 'The thing was [in] that then state (status)'.—<sup>28</sup> Render: 'The thing was [in] that then state (status)'.—<sup>29</sup> Render: 'The thing was [in] that then state (status)'.—<sup>30</sup> Render: 'The thing was [in] that then state (status)'.—<sup>31</sup> Render: 'The thing was [in] that then state (status)'.—<sup>32</sup> Render: 'The thing was [in] that then state (status)'.—<sup>33</sup> Render: 'The thing was [in] that then state (status)'.—<sup>34</sup> Render: 'The thing was [in] that then state (status)'.—<sup>35</sup> Render: 'The thing was [in] that then state (status)'.—<sup>36</sup> Render: 'The thing was [in] that then state (status)'.—<sup>37</sup> Render: 'The thing was [in] that then state (status)'.—<sup>38</sup> Render: 'The thing was [in] that then state (status)'.—<sup>39</sup> Render: 'The thing was [in] that then state (status)'.—<sup>40</sup> Render: 'The thing was [in] that then state (status)'.—<sup>41</sup> Render: 'The thing was [in] that then state (status)'.—<sup>42</sup> Render: 'The thing was [in] that then state (status)'.—<sup>43</sup> Render: 'The thing was [in] that then state (status)'.—<sup>44</sup> Render: 'The thing was [in] that then state (status)'.—<sup>45</sup> Render: 'The thing was [in] that then state (status)'.—<sup>46</sup> Render: 'The thing was [in] that then state (status)'.—<sup>47</sup> Render: 'The thing was [in] that then state (status)'.—<sup>48</sup> Render: 'The thing was [in] that then state (status)'.—<sup>49</sup> Render: 'The thing was [in] that then state (status)'.—<sup>50</sup> Render: 'The thing was [in] that then state (status)'.—<sup>51</sup> Render: 'The thing was [in] that then state (status)'.—<sup>52</sup> Render: 'The thing was [in] that then state (status)'.—<sup>53</sup> Render: 'The thing was [in] that then state (status)'.—<sup>54</sup> Render: 'The thing was [in] that then state (status)'.—<sup>55</sup> Render: 'The thing was [in] that then state (status)'.—<sup>56</sup> Render: 'The thing was [in] that then state (status)'.—<sup>57</sup> Render: 'The thing was [in] that then state (status)'.—<sup>58</sup> Render: 'The thing was [in] that then state (status)'.—<sup>59</sup> Render: 'The thing was [in] that then state (status)'.—<sup>60</sup> Render: 'The thing was [in] that then state (status)'.—<sup>61</sup> Render: 'The thing was [in] that then state (status)'.—<sup>62</sup> Render: 'The thing was [in] that then state (status)'.—<sup>63</sup> Render: 'The thing was [in] that then state (status)'.—<sup>64</sup> Render: 'The thing was [in] that then state (status)'.—<sup>65</sup> Render: 'The thing was [in] that then state (status)'.—<sup>66</sup> Render: 'The thing was [in] that then state (status)'.—<sup>67</sup> Render: 'The thing was [in] that then state (status)'.—<sup>68</sup> Render: 'The thing was [in] that then state (status)'.—<sup>69</sup> Render: 'The thing was [in] that then state (status)'.—<sup>70</sup> Render: 'The thing was [in] that then state (status)'.—<sup>71</sup> Render: 'The thing was [in] that then state (status)'.—<sup>72</sup> Render: 'The thing was [in] that then state (status)'.—<sup>73</sup> Render: 'The thing was [in] that then state (status)'.—<sup>74</sup> Render: 'The thing was [in] that then state (status)'.—<sup>75</sup> Render: 'The thing was [in] that then state (status)'.—<sup>76</sup> Render: 'The thing was [in] that then state (status)'.—<sup>77</sup> Render: 'The thing was [in] that then state (status)'.—<sup>78</sup> Render: 'The thing was [in] that then state (status)'.—<sup>79</sup> Render: 'The thing was [in] that then state (status)'.—<sup>80</sup> Render: 'The thing was [in] that then state (status)'.—<sup>81</sup> Render: 'The thing was [in] that then state (status)'.—<sup>82</sup> Render: 'The thing was [in] that then state (status)'.—<sup>83</sup> Render: 'The thing was [in] that then state (status)'.—<sup>84</sup> Render: 'The thing was [in] that then state (status)'.—<sup>85</sup> Render: 'The thing was [in] that then state (status)'.—<sup>86</sup> Render: 'The thing was [in] that then state (status)'.—<sup>87</sup> Render: 'The thing was [in] that then state (status)'.—<sup>88</sup> Render: 'The thing was [in] that then state (status)'.—<sup>89</sup> Render: 'The thing was [in] that then state (status)'.—<sup>90</sup> Render: 'The thing was [in] that then state (status)'.—<sup>91</sup> Render: 'The thing was [in] that then state (status)'.—<sup>92</sup> Render: 'The thing was [in] that then state (status)'.—<sup>93</sup> Render: 'The thing was [in] that then state (status)'.—<sup>94</sup> Render: 'The thing was [in] that then state (status)'.—<sup>95</sup> Render: 'The thing was [in] that then state (status)'.—<sup>96</sup> Render: 'The thing was [in] that then state (status)'.—<sup>97</sup> Render: 'The thing was [in] that then state (status)'.—<sup>98</sup> Render: 'The thing was [in] that then state (status)'.—<sup>99</sup> Render: 'The thing was [in] that then state (status)'.—<sup>100</sup> Render: 'The thing was [in] that then state (status)'.—<sup>101</sup> Render: 'The thing was [in] that then state (status)'.—<sup>102</sup> Render: 'The thing was [in] that then state (status)'.—<sup>103</sup> Render: 'The thing was [in] that then state (status)'.—<sup>104</sup> Render: 'The thing was [in] that then state (status)'.—<sup>105</sup> Render: 'The thing was [in] that then state (status)'.—<sup>106</sup> Render: 'The thing was [in] that then state (status)'.—<sup>107</sup> Render: 'The thing was [in] that then state (status)'.—<sup>108</sup> Render: 'The thing was [in] that then state (status)'.—<sup>109</sup> Render: 'The thing was [in] that then state (status)'.—<sup>110</sup> Render: 'The thing was [in] that then state (status)'.—<sup>111</sup> Render: 'The thing was [in] that then state (status)'.—<sup>112</sup> Render: 'The thing was [in] that then state (status)'.—<sup>113</sup> Render: 'The thing was [in] that then state (status)'.—<sup>114</sup> Render: 'The thing was [in] that then state (status)'.—<sup>115</sup> Render: 'The thing was [in] that then state (status)'.—<sup>116</sup> Render: 'The thing was [in] that then state (status)'.—<sup>117</sup> Render: 'The thing was [in] that then state (status)'.—<sup>118</sup> Render: 'The thing was [in] that then state (status)'.—<sup>119</sup> Render: 'The thing was [in] that then state (status)'.—<sup>120</sup> Render: 'The thing was [in] that then state (status)'.—<sup>121</sup> Render: 'The thing was [in] that then state (status)'.—<sup>122</sup> Render: 'The thing was [in] that then state (status)'.—<sup>123</sup> Render: 'The thing was [in] that then state (status)'.—<sup>124</sup> Render: 'The thing was [in] that then state (status)'.—<sup>125</sup> Render: 'The thing was [in] that then state (status)'.—<sup>126</sup> Render: 'The thing was [in] that then state (status)'.—<sup>127</sup> Render: 'The thing was [in] that then state (status)'.—<sup>128</sup> Render: 'The thing was [in] that then state (status)'.—<sup>129</sup> Render: 'The thing was [in] that then state (status)'.—<sup>130</sup> Render: 'The thing was [in] that then state (status)'.—<sup>131</sup> Render: 'The thing was [in] that then state (status)'.—<sup>132</sup> Render: 'The thing was [in] that then state (status)'.—<sup>133</sup> Render: 'The thing was [in] that then state (status)'.—<sup>134</sup> Render: 'The thing was [in] that then state (status)'.—<sup>135</sup> Render: 'The thing was [in] that then state (status)'.—<sup>136</sup> Render: 'The thing was [in] that then state (status)'.—<sup>137</sup> Render: 'The thing was [in] that then state (status)'.—<sup>138</sup> Render: 'The thing was [in] that then state (status)'.—<sup>139</sup> Render: 'The thing was [in] that then state (status)'.—<sup>350</sup> Render: 'The thing was [in] that then state (status)'.—<sup>351</sup> Render: 'The thing was [in] that then state (status)'.—<sup>352</sup> Render: '

vices, that all wondered that so different traits of character<sup>1</sup> should be found<sup>2</sup> in one man.—22. Antonius was stimulated<sup>3</sup> by so violent<sup>4</sup> hatred against Cicero that he was not only hostile<sup>5</sup> to the latter<sup>6</sup>, but also to all of his friends.—23. James the Second was not the man to<sup>7</sup> pardon<sup>8</sup> injuries received, but of such a character that he<sup>9</sup> would<sup>10</sup> rather lose his crown<sup>11</sup> than forego<sup>12</sup> his vengeance against<sup>13</sup> those who, on a certain occasion<sup>14</sup>, had treated him with disrespect<sup>15</sup>.—24. I never uttered the slightest remark in behalf of Cæsar<sup>16</sup> which he did not receive<sup>17</sup> with evident<sup>18</sup> satisfaction<sup>19</sup>.—25. Nobody ever returned from that country without being affected in health<sup>20</sup>.—26. Thraso was not so illiterate<sup>21</sup> as not<sup>22</sup> to understand the sense of Cicero's words<sup>23</sup>.—27. [There] was nobody present<sup>24</sup> without feeling<sup>25</sup> compassion for the accused.—28. What services did you demand of me<sup>26</sup> in which I did not surpass<sup>27</sup> your expectation by my zeal<sup>28</sup>.—29. They entered into a copartnership<sup>29</sup>, but so that the one was to attend to the in-door business<sup>30</sup>, and the other to travel for the concern<sup>31</sup>.—30. They compromised the matter<sup>32</sup> so that Sempronius was to receive an indemnity<sup>33</sup> of 60,000 sesterces, but was to give security for future damages to Balbus<sup>34</sup>.—31. He left only so much of a garrison in the town, that the inhabitants could not carry out any treacherous plan<sup>35</sup>.

XVI. TENSES OF DEPENDENT HYPOTHETICAL PERIODS. (R. 96.) (*Use in every sentence every admissible form of the hypothetical preterite.*)—1. We are not always allowed to do<sup>36</sup> what would be proper<sup>37</sup> with<sup>38</sup> others<sup>39</sup>.—2. Alexander, being struck<sup>40</sup> by an arrow at<sup>41</sup> the siege<sup>42</sup> of some city, received a wound which, as<sup>43</sup> he himself said, would proclaim<sup>44</sup> him to be a man, if<sup>45</sup> he were not Jove's son.—3. It is to no purpose to ask<sup>46</sup> what I would do if these [things] had not happened.—4. The prosecutor<sup>47</sup> says that Pompey has done what he had no right to do<sup>48</sup>, which is a more serious<sup>49</sup> [charge] than if he said that he did<sup>50</sup> what he ought<sup>51</sup> not [to have done].—5. Either I must<sup>52</sup> say many [things] which I could not suppress<sup>53</sup> if I were present, or [I] must not go<sup>54</sup>.—6. It is the question, whether Alexander the Great<sup>55</sup>, if he had crossed over to Italy with an army, would have defeated the Romans, or not.—7. I do not doubt but that Sempronius, with great pleasure<sup>56</sup>, would accept this offer<sup>57</sup> if he were not<sup>58</sup> pre-

<sup>1</sup> So different traits of character, tam diversa natura.—<sup>2</sup> esse.—<sup>3</sup> to be stimulated against, ferri in.—<sup>4</sup> tam ferox.—<sup>5</sup> inimicus.—<sup>6</sup> by is.—<sup>7</sup> the man to, is qui.—<sup>8</sup> facile injurias acceptas remittere.—<sup>9</sup> but of such a character that he, sed qui.—<sup>10</sup> velle.—<sup>11</sup> regnum.—<sup>12</sup> deponere.—<sup>13</sup> vengeance against, ira in.—<sup>14</sup> aliquando.—<sup>15</sup> to treat somebody with disrespect, parum alicui verecundiae tribuere. The clause is quasi-subjunctive.—<sup>16</sup> Render: 'No slightest (minimum) remark (dictum) of mine (P. 1. p. 191, R. 3) interfered (intercedere) for Cæsar'.—<sup>17</sup> accipere.—<sup>18</sup> illustris.—<sup>19</sup> gratia.—<sup>20</sup> to be affected in health, valetudine laborare.—<sup>21</sup> in locis.—<sup>22</sup> quia.—<sup>23</sup> Render: 'What Cicerone means to mean, sibi velle'.—<sup>24</sup> praesto.—<sup>25</sup> to feel compassion for some one, misericordia pro aliquo commoveri.—<sup>26</sup> Render: 'What did you order (mandare) me?'.—<sup>27</sup> vincere.—<sup>28</sup> diligentia.—<sup>29</sup> to enter into a copartnership, societatem inter se contrahere.—<sup>30</sup> Render: 'that the one (alter) should care those [things] which were to be done (gerere, gerundial with the walls (paries)).—<sup>31</sup> Render: 'the other should always be on the roads (iter) for the society'.—<sup>32</sup> to compromise the matter, rem decidere.—<sup>33</sup> Render: 'receive (accipere) by the name of damage (damnum 60,000 sesterces)'.—<sup>34</sup> Render: 'give security (cautio) for the not done damage (pro damno facta)'.—<sup>35</sup> Render: 'that not anything in quod perfidius could be moved by etc.'.—<sup>36</sup> Render: 'Not always is allowed (licet) what?'.—<sup>37</sup> to be proper, decere.—<sup>38</sup> in.—<sup>39</sup> sing.—<sup>40</sup> iustus.—<sup>41</sup> in.—<sup>42</sup> obsidio.—<sup>43</sup> ut with indicative.—<sup>44</sup> clamare.—<sup>45</sup> if not, nisi.—<sup>46</sup> nihil attinet querere.—<sup>47</sup> accusator.—<sup>48</sup> he has a right to do something, aliquid ei facere licet.—<sup>49</sup> gravis.—<sup>50</sup> that that [had been] done by him which etc.—<sup>51</sup> oportet.—<sup>52</sup> gerundial.—<sup>53</sup> silere aliquid.—<sup>54</sup> venire.—<sup>55</sup> Render by ctesias: de magno illo Alexandro, si etc.—<sup>56</sup> with great pleasure, libentissime.—<sup>57</sup> conditio.—<sup>58</sup> if not, nisi.

vented by the most important<sup>1</sup> reasons.—8. I am greatly embarrassed<sup>2</sup> by the absence of those friends by whose zeal<sup>3</sup> I would have obtained<sup>4</sup> everything (*i. e.* if they were present).—9. Clodius left<sup>5</sup> the forum at an early hour<sup>6</sup>, because he would have been in great danger if he had staid<sup>7</sup> [any] longer.—10. [There] were six cohorts distributed all over<sup>8</sup> the province, which I would have ordered<sup>9</sup> to the support<sup>10</sup> of Domitius if I had had [them] at one place.—11. You have done things of such a kind<sup>11</sup> that the Senate, if it were free, would have placed you under trial for your life<sup>12</sup>.—12. Cæsar explained<sup>13</sup> to the soldiers the danger<sup>14</sup> in which the army would have been if the enemy had known by how small a force<sup>15</sup> the fortifications were held.—13. It is not probable that (*ut*) the enemy would have remained quiet<sup>16</sup> if they had been informed<sup>17</sup> of our departure<sup>18</sup>.—14. There is no doubt but that the citizens<sup>19</sup>, if they had not been thoroughly demoralized<sup>20</sup>, would have been able soon<sup>21</sup> to recover<sup>22</sup> their losses<sup>23</sup>.—15. The ambassadors answered that they had executed the commands of the king<sup>24</sup>, although<sup>25</sup> they would not have dared [to do so] without his authority<sup>26</sup>.—16. They marched<sup>27</sup> with so great rapidity that, if the care for the wounded<sup>28</sup> had not delayed<sup>29</sup> them, they would have reached the city<sup>30</sup> before<sup>31</sup> the news<sup>32</sup> of their defeat<sup>33</sup> had been known<sup>34</sup>.—17. So negligently was the city guarded<sup>35</sup> that the enemy could have easily taken the whole garrison<sup>36</sup>, if they, at night, had scaled<sup>37</sup> the wall by ladders<sup>38</sup>.—18. The ambassadors said that the Æduans had deserved so well of<sup>39</sup> the Roman people that their country<sup>40</sup> ought<sup>41</sup> not to have been devastated almost in sight<sup>42</sup> of the Roman army.—19. So great was the want<sup>43</sup> of provisions that it would, unquestionably<sup>44</sup>, have been necessary<sup>45</sup> to capitulate<sup>46</sup>, if the enemy had not suddenly given up<sup>47</sup> the siege.—20. The conflagration of the city made so rapid progress<sup>48</sup> that, if the wind had commenced to blow<sup>49</sup>, nothing at all would have been saved.—21. So suddenly did the enemy attack our troops on the march<sup>50</sup> that the whole baggage<sup>51</sup> of the army would have been lost if the rear<sup>52</sup> had not held their ground<sup>53</sup> with the greatest firmness<sup>54</sup>.—22. There is no hope of relief<sup>55</sup> even if we could break through<sup>56</sup> the circle of iron<sup>57</sup> by which the enemy has invested<sup>58</sup> us.

XVII. CONVERSION OF THE FUTURE-PRESENT INTO A SUBJUNCTIVE. (R. 97.)—1. I am afraid the tribunes will eagerly<sup>59</sup> seize<sup>60</sup> this opportunity<sup>61</sup> to propose<sup>62</sup> the law on the consular provinces.—2. [There] was the ut-

<sup>1</sup> Gravis.—<sup>2</sup> impediri.—<sup>3</sup> zelus.—<sup>4</sup> consequi.—<sup>5</sup> discedere with ablat.—<sup>6</sup> matura (comparative).—<sup>7</sup> morari (in the imperfect in place of a pluperfect).—<sup>8</sup> per totam provinciam.—<sup>9</sup> mittere.—<sup>10</sup> subsidium (abstract dative).—<sup>11</sup> things of such a kind, ea.—<sup>12</sup> to place some one under trial for his life, aliquem ad necem postulare.—<sup>13</sup> edocere.—<sup>14</sup> Render by an interrogative clause (in what danger etc.).—<sup>15</sup> exiguum praesidium.—<sup>16</sup> to remain quiet, quiescere.—<sup>17</sup> certiores fieri (by forem).—<sup>18</sup> profectio.—<sup>19</sup> civitas (= cives).—<sup>20</sup> they are thoroughly demoralized, animi fracti sunt.—<sup>21</sup> brevi.—<sup>22</sup> recipere.—<sup>23</sup> they are thoroughly demoralized, animi fracti sunt.—<sup>24</sup> to execute the commands of the king, facere quæ rex.—<sup>25</sup> Render: 'the lost [things]'.—<sup>26</sup> to execute the commands of the king, facere quæ rex fieri voluit.—<sup>27</sup> quamquam.—<sup>28</sup> Render: Unless strengthened (firmare) by the authority of himself.—<sup>29</sup> iter facere.—<sup>30</sup> Render: the care (cura) of the wounds.—<sup>31</sup> impedire.—<sup>32</sup> ad urbem pervenire.—<sup>33</sup> citius quam.—<sup>34</sup> nuntius.—<sup>35</sup> of the received (accipere) defeit.—<sup>36</sup> percrebrescere.—<sup>37</sup> custodire.—<sup>38</sup> to take the whole garrison, praesidium opprimere.—<sup>39</sup> ascendere.—<sup>40</sup> scale.—<sup>41</sup> to deserve so well of some one, ita de aliquo meritum esse.—<sup>42</sup> agri.—<sup>43</sup> by delere.—<sup>44</sup> conspectus.—<sup>45</sup> exiguitas.—<sup>46</sup> sine ulla dubitatione.—<sup>47</sup> by gerundium.—<sup>48</sup> arcem tradere.—<sup>49</sup> relinquere.—<sup>50</sup> to make rapid progress, celeriter procedere.—<sup>51</sup> hoc.—<sup>52</sup> our troops on the march, nostri impediti.—<sup>53</sup> totius agminis impedimenta.—<sup>54</sup> necessarium agmen.—<sup>55</sup> impetum sustinere.—<sup>56</sup> constantia.—<sup>57</sup> salus.—<sup>58</sup> periculum.—<sup>59</sup> egerunt ille terrens.—<sup>60</sup> to take interest somebody, aliquem circumcissum habere.—<sup>61</sup> avidus.—<sup>62</sup> arripere.—<sup>63</sup> occasio.—<sup>64</sup> tempus gerundial after ad.

most<sup>1</sup> danger that the reinforcements, on [their] march, would be attack-  
ed<sup>2</sup> by the enemy, and [hence] would not arrive early<sup>3</sup> enough<sup>4</sup> at the  
camp.—3. Hannibal was afraid that the king would not fulfill his prom-  
ise<sup>5</sup> of making war against the Romans.—4. I have not the slightest  
doubt<sup>6</sup> that the Senate<sup>7</sup> will grant your petition.—5. It is not doubtful<sup>8</sup>  
to me but that you should immediately return to Rome.—6. Cæsar did not  
doubt that almost all the Gauls would join the conspiracy<sup>9</sup>.—7. Nobody  
doubted that Pompey, with all his forces, would come to the relief<sup>10</sup> of  
Domitius.—8. The Helvetians did not doubt that the Allobroges would  
be persuaded to allow<sup>11</sup> them a passage<sup>12</sup> through their territory<sup>13</sup>.—9. I  
see what will happen<sup>14</sup> to us if they persevere<sup>15</sup>.—10. Many perished,  
not knowing<sup>16</sup> what direction<sup>17</sup> to take or to avoid.—11. It was decided<sup>18</sup>  
by the delegates how many ships, and how much money each State  
should contribute<sup>19</sup>.—12. Valerius Procillus said, they had deliberated<sup>20</sup>  
in his presence<sup>21</sup>, whether he should be immediately burned alive<sup>22</sup>, or  
whether his punishment<sup>23</sup> should be delayed<sup>24</sup>.—13. Sempronius did not  
know with how many<sup>25</sup> troops, or by what route<sup>26</sup>, the enemy would  
come<sup>27</sup> to the camp.—14. Cicero was waiting<sup>28</sup> at Brundisium for the  
decision of his fate by Cæsar.—15. I have written to your brother to  
send me a copy of the paper<sup>29</sup> which he is going to read<sup>30</sup> in the Senate.  
—16. We have been warned<sup>31</sup> to be on our guard<sup>32</sup>, lest we may be inter-  
cepted<sup>33</sup> by Cæsar, because he<sup>34</sup> had marched<sup>35</sup> in the same direction in  
which our journey lies, and would arrive there sooner than we could.—  
17. I am absolutely unable to do anything<sup>36</sup> in your affair, since the Presi-  
dent will be absent almost during the whole summer.—18. The memory  
of this man is so much revered<sup>37</sup> by his townsmen<sup>38</sup>, that almost all will  
make contributions<sup>39</sup> towards the erection of his statue.—19. A pardon  
was granted<sup>40</sup> to Domitius with the proviso<sup>41</sup> that he should leave<sup>42</sup> the city  
in the same night.—20. There was a danger lest<sup>43</sup> that [whole] party<sup>44</sup> might  
be captured or killed<sup>45</sup>, if they should fall in with<sup>46</sup> a larger force<sup>47</sup> of the  
enemy.—21. The delegates remarked, that if Hannibal should lose the  
fleet, the loss would be the same<sup>48</sup>, as if<sup>49</sup> [the fleet] were lost by<sup>50</sup> [any]  
other commander; and if any success would be obtained<sup>51</sup>, it would re-  
bound<sup>52</sup> to the glory of Hannibal, not [to that] of the king.—22. I can

<sup>1</sup> Summus.—<sup>2</sup> Render: 'that the reinforcements, having been attacked (*excipere*) on the march (*iter*) by the enemies, would not arrive.'—<sup>3</sup> maturus.—<sup>4</sup> Render both by *satius* and *parum*, which adverbs require different expressions for the conjunction.—<sup>5</sup> Render: 'would not fulfill (*præstare*) what he had promised concerning (*de*) the making of war (*bellum gerere*) against the Romans.'—<sup>6</sup> omnino non dubitare.—<sup>7</sup> Render: 'that thou wilt obtain (*impetrare*) from the Senate that which thou art seeking (*petere*).—<sup>8</sup> dubius.—<sup>9</sup> join the conspiracy, ad conjurationem accedere.—<sup>10</sup> subsidium (abstract dative).—<sup>11</sup> dare.—<sup>12</sup> iter.—<sup>13</sup> fines.—<sup>14</sup> esse.—<sup>15</sup> perseverare.—<sup>16</sup> incertus.—<sup>17</sup> to take or to avoid a direc-  
tion, aliquid petere aut vitare.—<sup>18</sup> constituere.—<sup>19</sup> præstare.—<sup>20</sup> Render: 'that it was deliberated (*consulere*).—<sup>21</sup> See p. 184, R. 231, OBS. 1.—<sup>22</sup> to be burned alive, igni necari.—  
<sup>23</sup> supplicium.—<sup>24</sup> in aliud tempus differre.—<sup>25</sup> quantus.—<sup>26</sup> itinera.—<sup>27</sup> pervenire.—  
<sup>28</sup> Render: expected what of a resolution (*consilium*) Cæsar would take (*capere*) con-  
cerning him.—<sup>29</sup> exemplum libelli.—<sup>30</sup> recitare.—<sup>31</sup> admonere.—<sup>32</sup> to be on one's guard,  
cavere.—<sup>33</sup> to intercept, excipere.—<sup>34</sup> quod is.—<sup>35</sup> Render 'having marched into the same  
places which we are seeking (*petere*), would come thither more quickly than we could'.—  
<sup>36</sup> Render: 'In thy thing I can do absolutely (*omnino*) nothing'.—<sup>37</sup> tanto honore habetur  
apud.—<sup>38</sup> cives sui.—<sup>39</sup> to make contributions towards the erection of a statue, pecunias  
in statuum conferre.—<sup>40</sup> to grant a pardon, impunitatem concedere.—<sup>41</sup> ita.—<sup>42</sup> decedere.—  
<sup>43</sup> ne.—<sup>44</sup> manus.—<sup>45</sup> to be captured or killed, opprimi.—<sup>46</sup> to fall in with, incidere in.—  
<sup>47</sup> majores copie.—<sup>48</sup> Render: 'that it would be the same [amount] of loss (*damnum*)'.—  
<sup>49</sup> ac si.—<sup>50</sup> per.—<sup>51</sup> Render: 'if anything prosperous would happen (*evenire*)'.—<sup>52</sup> esse  
with abstract dative.

assure<sup>1</sup> you that I came to the reading<sup>2</sup> of this bill<sup>3</sup> with the purpose<sup>4</sup>  
to<sup>5</sup> second it<sup>6</sup> if I would think<sup>7</sup> its passage to be in your interest<sup>8</sup>.—  
23. The consul thought<sup>9</sup> that, before he would weigh anchor<sup>10</sup>, he should  
expect<sup>11</sup> the return of the ambassadors.—24. Cæsar directed Labienus to  
move his troops from winter-quarters<sup>12</sup> as soon as<sup>13</sup> the season<sup>14</sup> of the year  
would permit.—25. I wish you would give up that plan<sup>15</sup>, since that law  
will never be repealed<sup>16</sup>.

XVIII. CONVERSION OF THE FUTURE-PERFECT INTO A SUBJUNCTIVE.  
(R. 98).—1. You say, that we will be<sup>17</sup> defeated if we ever would come  
to war<sup>18</sup> with that nation.—2. Sempronius writes that he will return as  
soon as<sup>19</sup> you will allow (*i. e.* will have allowed) him<sup>20</sup>.—3. The Senate  
resolved<sup>21</sup> that, if within five days<sup>22</sup> no action would be taken<sup>23</sup> concern-  
ing me, I should return to the country<sup>24</sup> restored to all my rights<sup>25</sup>.—4. The  
consul raised<sup>26</sup> his hands to heaven, and, with a loud<sup>27</sup> voice, vowed<sup>28</sup>  
a temple to Jupiter Stator, if the flight of the Roman army would be  
checked<sup>29</sup>, and, after renewing the battle<sup>30</sup>, the legions of the Samnites  
would be defeated and crushed<sup>31</sup>.—5. The consul ordered<sup>32</sup> a squad<sup>33</sup> of  
horsemen to spur<sup>34</sup> their horses with all their might<sup>35</sup> towards<sup>36</sup> the enemy  
when<sup>37</sup> they would see him shake<sup>38</sup> [his] javelin<sup>39</sup>.—6. The captives held  
out<sup>40</sup> the hope that they would deliver the castle into their hands<sup>41</sup>, if they  
[*i. e.* the captives] would be exchanged<sup>42</sup> and sent back<sup>43</sup> to their gar-  
rison.—7. Themistocles said to the ephori, that their ambassadors would  
not return to them before<sup>44</sup> they would send himself back<sup>45</sup> to Athens.—  
8. Verres decided<sup>46</sup> that the disposition over these funds should belong to  
that person<sup>47</sup> whom he himself would appoint<sup>48</sup>.

<sup>1</sup> Confirmare.—<sup>2</sup> gerundial.—<sup>3</sup> lex.—<sup>4</sup> hoc animo.—<sup>5</sup> ut.—<sup>6</sup> to second the bill of a law,  
legis auctorem esse.—<sup>7</sup> intelligere.—<sup>8</sup> the passage is in your interest, utile vobis est.—  
<sup>9</sup> existimare.—<sup>10</sup> to weigh anchor, navis solvere.—<sup>11</sup> gerundial.—<sup>12</sup> exercitum ex hibernis  
educere.—<sup>13</sup> quum primum.—<sup>14</sup> tempus.—<sup>15</sup> de consilio decedere.—<sup>16</sup> abrogare (Render  
by '*pado fore ut*').—<sup>17</sup> fore ut.—<sup>18</sup> in certamen venire.—<sup>19</sup> quum primum.—<sup>20</sup> you allow  
him, per te licet.—<sup>21</sup> censere ut.—<sup>22</sup> ablat.—<sup>23</sup> to take action concerning somebody, de  
aliquo agere.—<sup>24</sup> patria.—<sup>25</sup> Render: 'after all dignity has been recovered' (*recuperare*,  
abl. abs.).—<sup>26</sup> attollere. Render: 'raising his hands to heaven, he vowed'.—<sup>27</sup> clarus.—  
<sup>28</sup> vocare.—<sup>29</sup> Render: 'if the Roman army (*acies*) would stop (have stopped, *consistere*)  
[in the] flight, and would defeat etc.'.—<sup>30</sup> primum redintegrare (abl. abs.).—<sup>31</sup> cadere.—  
<sup>32</sup> precipere.—<sup>33</sup> turma.—<sup>34</sup> concurare.—<sup>35</sup> Render: 'with as great power [as] they could'.  
in the participle as accessory predicate.—<sup>36</sup> cuspis, GEN. cusp. dis.—<sup>37</sup> quare.—  
<sup>38</sup> in the participle as accessory predicate.—<sup>39</sup> cuspis, GEN. cusp. dis.—<sup>40</sup> facere.—<sup>41</sup> Ren-  
der: 'that they would deliver (*tradere*) to them the castle (*castra*)'.—<sup>42</sup> permutare.—<sup>43</sup> re-  
mittere.—<sup>44</sup> prius quam, 'prius' to be separated from *quam*, and to be placed in the  
principal oblique clause.—<sup>45</sup> remittere.—<sup>46</sup> precipere.—<sup>47</sup> Render: 'that [he] should  
treat (*tractare*) these moneys'.—<sup>48</sup> to appoint, ei negotio præficere.

languages, generally connect the different periods also grammatically, either by syndetic or by pronominal coördination, in which instance the connectives mostly open the sentence, as: '*Huc quum venisset*' (rarely '*Quum huc venisset*').—*Ad eas res conficiendas biennium sibi satis duxerunt*. *Cæs. B. G. 1. 3.* (The arrangement '*Biennium sibi ad eas res conficiendas satis duxerunt*' would be useful for particular reasons only.)—*Hæc Cæsar ita respondit*: *Cæsar thus replied to them*, i. e. the ambassadors' *Ib. 1. 14* (not '*Cæsar his ita respondit*').—The English language mostly prefers the *asyndetic* connection of periods, and hence a rendering of the Latin connectives of periods is mostly repugnant to the English idiom. Many of the Latin connectives (as for inst. *nam, autem, quod in quodsi, etiam, vero, igitur*) appear to those who view them from the English standpoint as mere expletives\*. A more accurate treatment of this subject belongs to Latin 'rhetoric.'

Obs 5. Of the different kinds of coördination, the *copulative* (*et, ac, atque, neque*, etc.; see P. I., p. 277 foll.), the *adversative* (*sed, autem, vero, at*, etc.), and the *disjunctive* (*aut, vel, sive*), are chiefly employed to coördinate the parts of the *same period*; while the *causal* (*nam, enim*), and *consecutive* (*itaque, ergo, igitur*) coördinations, and the *pronomin-*  
*al* combinations are used to connect *different periods*.

Obs. 6. Sometimes periods are connected by CLAUSES, in which instance the whole clause has the force of a periodical connective, or coördinating conjunction. Such clauses have the nature of formulas, being used in the same typical form by all writers. Here belong 1) the clause *Quoniam ea ita sunt* or *Quia quoniam ita sunt*, having either the meaning of 'hence,' or 'nevertheless,' as: *Quia quoniam ita sunt, iste homo alia modum ratione putat: Hence that man has adopted a different plan of defence of Italy's rights with me in another manner*). Cic. Verr. 1, 1, 6. — *Quoniam ea ita sunt, tamen se cum eis pacem facturum; Nevertheless he would make peace with them*. Cæs. B. G. 1, 14.— 2) The clause: *Dum hæc (ea) geruntur*, with the force of *interea* (see p. 321, Obs. 7).— 3) The clause *Quo factum est ut* with the force of *itaque* (thus, or therefore): *Quo factum est ut* omnis imparatus imprudensque offenderet; Thus he surprised them all while they neither were prepared, nor had expected him. Nep. Ages. 2, 3.— Here belong those Quod-clauses in which *quod* has the meaning 'as to the fact that,' or 'regarding that.' See p. 521.

Obs. 7. A sentence may be *coordinated* with another sentence, and, at the same time be *subordinated* to a third. In this instance, the second coordinate is almost always dependent on the same governing sentence as the first coordinate, belonging to the same subordinating conjunction or relative, which, in the second coordinate, is either expressed or understood, as: His rebus flicbat *ut* et minus late vagarentur, et minus facile finitimis bellum inferre possent (or 'et *ut*...*vagarentur*, et *ut*...*possent*'); Thus it happened *that* they went less far in their raids, and (*that they*) could less easily make war on their neighbors. Cæs. B. G. 1, 2.— Sometimes, however, the second coordinate has *grammatically* the form of an *independent* sentence, although it has the same logical relations to the principal sentence as its first coordinate, as: Præ me tuli, nihil malle quam pacem, *non quia* eadem timērem quæ illi, *sed ea bello civili leviora ducēbam* (inst. of 'sed *quod* ea bello civili leviora ducērem'); I openly showed that I wished nothing more urgently than peace, *not because* I did *not* fear the same events as the others, *but I considered* them as preferable to a civil war. Cic. Att. 8, 11 D. 7. This kind of coordination, which evidently is used to give to the statement the character of greater positiveness, has become one of the typical forms for coordinating causal clauses with other causal clauses which are introduced by *non quod*, or *non quo* (p. 690). But, except in this kind of causal clauses, and in relative clauses (see below), it is extremely rare.

The form of *independent* coordination of logically dependent sentences sometimes occurs in the coordination of *relatives*. A sentence coordinate with a relative clause may assume the form of an independent sentence *if the relative adjective in the second coordinate would require a case different from the case of the first relative*. In this instance, the second relative is replaced by the corresponding demonstrative, as: Omnes tum fere, *qui* nec extra urbem hanc vixerant, *nec eos* aliqua barbaries domestica infusca-

\* Compare the following schemes of the coordination of periods: Cic. Or. 1, 1: *Ac fuit... Quam spem... Nam qui... Neque vero... Nam prima... Sed tamen... Tibi vero... Nam neque... —* Ib. Fam. 4, 10: *Cura igitur... Venit enim... Quodsi nullum... Sed quoniam... Me tamen... —* Thus the brief letter of Cic. Fam. 13, 14, which may be considered as a model for the idiomatic connection of periods: Titio... familiarissimæ uxor. Omnia mihi cum eo intercedunt jura... necessitudinis. Huic... pecuniam debet P. Cornelius. *Ea res* a Volcatio... rejecta in Galliam est. Peto a te— *Id* et mihi gratissimum erit... *Quod* ut tibi cure sit... etiam atque etiam rogo.— Some authors of the silver age, especially Seneca, by affectation, neglect the use of connectives.— Quintilian (Inst. Or. 7, 10, 6) teaches: *Sensus (the sentences) non modo ut sint ordine collocati laborandum est, sed ut inter se juncti atque ita coherentes ne commissura pelluceat; corpus sit, non membra.*

verat, recte loquebantur: At that time almost all spoke correctly *who* had *not* lived with-  
out this city, and *where* domestic barbarity had not obfuscated. (Cic. Brut. 74, 258.—  
Ipsius in mente insculptis species puritudo, *quam intus, in cœque defixis*, ad illius  
lucis, Jovis similitudinem artem et munus dirigebat: In his (Phidias's) mind lived an  
*id. e.* Jovis similitudinem artem et munus dirigebat: In his (Phidias's) mind lived an  
idea of deity *which he held before his eyes, and on which he was fixed*, when he directed  
his art and hand to the expression of Jove's image. (Cic. Or. 2, 97.— But frequently rela-  
tive causes with different cases or forms of the introducing relative, are coördinated  
without a change to a demonstrative. This coördination is either asyndetic, or *que*  
without a change to the second relative: as: Horum fortissimi sunt Belge, propterea quod  
is suffixed to the second relative: as: Horum fortissimi sunt Belge, propterea quod  
proximi sunt Germanis *qui trans Rhenum credunt, quibusum confidunt bellum gerunt*,  
Cæs. B. G. 1, 1.— *Quam* qui-que in *perem* cum devent, *que*que prima signa conspexit,  
at ad hoc constitit: Every one stopped at that *place* to *which* he came by chance, and at  
those *standards* *which* he first saw. (Cæs. B. G. 2, 21.— Sequens *qui* intra fuit suos  
Arriovistum recepissint, *quam* oppida omnia in potestate ejus essent, omnes cruciatus  
essent perferendi. Cæs. B. G. 1, 33.

**OBS. 8.** Dependent sentences (except in *oratio obliqua*) are not coordinated by connectives used only for periodical coordination (neither by *nam, enim;* nor by *itaque, ergo, igitur*; nor by any demonstrative form-adjectives or adverbs). Hence the co-ordination of dependent clauses is either COPULATIVE, ADVERSATIVE, OR DISJUNCTIVE. In place of a dependent clause there must be employed, instead of the consequential co-ordination, a causal subordination must be employed, and instead of the consequential co-ordinations *itaque, ergo,* and *igitur*, the relative connectives *quare, quoniamobrem, quia* etc.; Simonides saw that sight is the keenest of all our senses, and that, therefore, our perceptions are best held by the mind if also etc. Cic. Or. 2, 87.

Ques. 9 In the co-ordination of CLAUSES the following rules are observed.

Ops. 9. In the co-ordination of CLAUSES the following rules are observed:

1. Causes cannot, generally (see No. B), be co-ordinated with each other, unless they are both dependent on the same sentence, and introduced by the same connective (which is generally not repeated with the second co-ordinate). Hence in such co-ordinations both predicates regularly have the same mood (for exceptions see No. D): as : *Neque bonitas, neque liberalitas, neque comitas esse potest si hoc non per se expetantur, sed ad utilitatem referantur*; Neither goodness, nor liberality, nor affability can exist, if they are not assumed for their own sake, but for reasons of utility: *but are referred to expediency*. Cic. Off. 3. 33.— *Principes Acarnanum valuerunt ut Archelaus et Bionor proditiōnis damnarentur, et Zeuxidas imperium abloqueretur*; The chiefs of the Acarnanians prevailed (that) Archelaus and Bionor were sentenced for treason, and that the command was taken (that) Zeuxidas.

Liv. 39. 16.— *Secuta sunt tempestates quae et nostros in castris conflixerunt, et hostem a pugna prohiberent*; Storms followed which ( = so that they) confined (us), and prevented the enemy from fighting.

Caes. B. G. 4. 34.— *Si te curae tuae timērent atque odissent mihi, neque eos ulla ratione placare posset, ab eorum occuribus aliquo concederes*; If your parents dreaded and hated you, and you could not reconcile them by any means, you would withdraw out of their sight, and go somewhere else.

Cic. Cat. 1. 7. 17.

Cic. Cat. 1, 7, 17.

*B.* Clauses introduced by *different* conjunctions may be co-ordinated with each other: 1) if they belong to the *same class* of clauses, and the one is *negative* while the other is *affirmative*. Thus final or imperative clauses introduced by *ut* may be co-ordinated with final or imperative clauses introduced by *ut*, as: Ipsos induxi loquentis, *ne* 'in-  
with final or imperative clauses introduced by *ut*, as: Ipsos induxi loquentis, *ne* 'in-  
quid' et 'inquil' sapienter interponeretur, atque ut tamquam a presentibus coram haberi  
semo *videtur*: I have introduced them as speaking in their own name, *lest* the words  
'said I', and 'said he' be too often *inserted*, and that the dialogue *might seem* to be  
spoken by them in person and in your presence. Cic. Am. 1. 3.— 2) Causal clauses may  
be adversatively co-ordinated with final clauses, but rarely otherwise than if at least  
one of the clauses is *negative*, as: Nemo prudens punit *quā* peccatum est, sed *ne* peccato-  
rum: No wise man punishes *because* a fault has been committed, but *lest* a fault may be  
committed. Sen. Ira. 1. 16.— Tantū sum cupiditate incensus ad reditum ut mihi nulli ne-  
que remi neque venti satisfacerent, *non* quo mihi ad tempus non occurrerem *putarem*,  
I was so much inflamed by greediness that I was bent on returning, *not* that I might not  
be met by either rowers or winds, *as I thought* that I might not be met by either rowers or winds.

\* This use of a demonstrative in place of a relative is repugnant to the English conception of relative adjectives. But the Latin distinctly felt in the relative the force of a conjunction combined with a demonstrative. Thus in the first of the above-mentioned examples the Latin conceives the construction '*qui nec riserant, nec eos infuscaverat*,' very much as we would conceive a construction with a conditional conjunction (*si ei nec riserant, nec eos infuscaverat*). From this difference of conception several peculiarities in the use of relative constructions must be explained, especially the use of *qui* with the force of *ut is, quum is, quod is, si is*, and the whole theory of 'relative involution'. See p. 534.

by *ut*, *ne*, *quoniam*, and *quod* more frequently follow than precede their principal sentence, as: *Huic magnis praeiis persuadet ut ad hostis transeat*; He persuaded him to go to the enemy's camp. *Cæs. B. G. 3. 18.* If this clause were inserted between *praeiis* and *persuadet*, the two predicates would be in immediate succession (see Obs. 1). But it might be inserted between *huic* and *magnis*. If placed before *huic*, it would destroy the force of the pronominal connective. In a similar sentence the *ut*-clause is inserted: *Dumnorigi... ut idem conaretur*, persuadet, etque filiam suam in matrimonium dat. *Cæs. B. G. 1. 3.* Here the two finite predicates stand in immediate succession, but this arrangement was preferred to the regular one, on account of the subsequent coordinate sentence, which, by placing the *ut*-clause after *persuadet* would have been separated from the sentence with which it is coordinated.

Obs. 4. Dependent questions are most usually inserted, even if its predicate, and that of the principal sentence follow each other in immediate succession: *Ariovistus respondit jus esse belli ut qui vicissent, eis quos vicissent, quemadmodum vellet, imperarent* (a masterly arranged period). *Cæs. B. G. 1. 36.*—Ita ut oculis, in utram partem fluat, iudicari non possit. *Ib. 11, 12.* But if the interrogative clause consists of many members, it often precedes or follows its principal sentence, as: *Qualis esset natura montis, et quibus ascensus qui cognoscerent misit*; He sent a detachment to examine the local character of the mountain and of its ascent (of what character the mountain was etc.). *Cæs. B. G. 1. 21.*—Credo ego vos, iudices mirari, quid sit quod etc. *Cic. Rosc. Am. 1. 1.*

Obs. 5. Relative clauses generally follow their antecedents, as: *Interea ea legione quam secum habebat, militibusque qui ex provincia contenerant, a lacu Lemanno, qui in flumen Rhodanum influat, ad mortem Iuram, qui fuit Segundorum ab Helvetiis abscidit, murum perfecit.* *Cæs. B. G. 1. 8.*—But they generally follow the whole sentence on which they are dependent, if the two predicates would be in immediate succession, as: *Ut omnibus commodis una cum eis fruatur quorum se amicitie dederint (not cum eis quorum se amicitie dederint fruatur)*; to enjoy all the advantages in communion with those to whose friendship they have devoted themselves. *Cæs. B. G. 3. 22.* If a great stress is laid on the relation of the relative clause to its governing sentence, so as to express that just that relative idea corresponds to just that antecedent in the principal sentence, the relative clause is placed before its antecedent, which, in this instance, is always designated by a demonstrative, the proper antecedent being incorporated in the relative clause as the governing noun of the relative adjective, as: *Ira, quae pars civitatis Helvetiae insignem calamitatem populo Romano intulerat, ea princeps penas persolvit*; Thus that part of Helvetia (literally 'what part of Helvetia') which had inflicted a signal disaster on the Roman people, paid (literally 'that one paid') the first penalty (was first punished). *Cæs. B. G. 1. 12.*

Obs. 6. Of the adverbial clauses, the causal clauses, and the modal *ut*-clauses (see p. 434, Obs. 1) generally follow their principal sentence (see the Ex. p. 437); but often causal clauses (and sometimes also modal *ut*-clauses) are inserted in the principal sentence: *Tamen, ut spatium intercedere posset dum etc., legati respondit diem se ad deliberandum sumpturum.* *Cæs. B. G. 1. 7.*—*Cæsar, quod memoriam tenebat, L. Cassium occisum (esse) ab Helvetiis, concedendum non putabat.* *Ib.*—*Ariovistus respondit, Aduos sibi, quoniam belli fortunam temperasset, stipendiarios esse factos.* *Ib. 1. 36.*—*Quod praeceptum, quia majus erat quam ut ab homine videretur, iccirco assignatum est deo.* *Cic. Fin. 5, 16. 44.*

Obs. 7. TEMPORAL clauses with *quoniam* and its equivalents (*ubi*, *ut*, *simulac*, *postquam*), CONDITIONAL, CONCESSIVE (by *quamquam* and *etsi*), and COMPARATIVE clauses containing a *simile* (introduced by *ut* or *quemadmodum... sic*), generally precede their principal sentences. A clause, belonging to these categories, if preceding its principal sentence, is called PROTASIS, while the succeeding principal sentence is called APODOSIS; as: *Ubi ea dies, quam constituerat cum legatis, venit, et legati ad eum reverferunt*, negat se posse iter ulli per provinciam dare, et, si vim facere conentur, prohibendum ostendit; *When that day*, which he had appointed with the delegates, arrived, and the delegates returned to him, he declared that he could not allow any one a passage through the province; (and) he showed that he would prevent them if they used force. *Cæs. B. G. 1. 8.*—*Ut ad bella suscipienda Gallorum alacer ac promptus est animus, sic mollis ac minime resistens ad calamitates perferendas mens eorum est*; As the character of the Gauls is quick and apt to commence wars, so their mind is yielding, and without any power of enduring calamities. *Ib. 3. 19.*—If both, protasis and apodosis, have the same subject, the subject generally precedes the clause: *Cæsar, ubi intellexit frustra tantum laborem sumi, statuit expectandam classem*; When Cæsar understood that so great a labor was performed in vain, he resolved to wait for the fleet. *Cæs. B. G. 3. 11.*

Obs. 8. Dependent clauses preceding their governing clause are often elegantly placed so that the predicate of the principal sentence of the governing clause, stands between

the dependent, and the governing clause, thus giving to the dependent clause the appearance of a direct dependence on the governing sentence, as: *Id si fieret, intelligebat magno cum periculo provinciae futurum ut homines bellicosos finitimos haberet*; He knew that, if this should happen, the province would be greatly endangered by having warlike men for its neighbors. *Cæs. B. G. 1. 10* [The clause *id si fieret* is not dependent on *intelligebat* but on *magno cum periculo futurum (esse)*].

Obs. 9. If two clauses introduced by conjunctions are subordinate to each other, they are most frequently so arranged that the dependent clause is inserted immediately after the conjunction by which the principal clause is introduced. Thus the two conjunctions of the clauses stand in immediate succession, as: *Graviter eos accusat quod, quoniam neque emi neque ex agris sumi posset frumentum, ab eis non sublevetur*; He earnestly reproached them for failing to aid him when corn could neither be bought, nor etc. *Cæs. B. G. 1. 16.*—*Propter quod, quoniam ipse plurimum, ille minimum per adolescentiam posset, per se crederet*; For the reason that (his brother Dumnorigi) had grown through his own influence was great, and his brother's very small on account of his youth. *Ib. 1. 20.*—*Quoniam, priusquam ad coniectum teli veniret, advertisset hostes*; Since he had obliged the enemy to fall back before it had come to a dart-throw. *Liv. 22. 15.*—Thus sometimes three connectives belonging to different clauses follow each other in immediate succession; (Censuit) grandem regem ut, quoniam, quod maximum fuerit, ipse vindeat Græcia venerit, copias quoque terrestres arcessat; He thought the king should be asked to bring along his land-troops, since he had come himself as the champion of Greece, which was, indeed the most important fact. *Liv. 35. 45* [The clauses are: 1) *ut... arcessat*; 2) *quoniam... venerit*; 3) *quod... fuerit*].

Obs. 10. The subordinating conjunctions by which a clause is connected, generally, precede the clause; but sometimes they are placed after the first word, or phrase of the clause, as: *Priusquam ab his sit concessum, arma uti capiant, et ad castra contendant*; Before they had given them the permission to arm themselves, and to proceed to the camp. *Cæs. B. G. 3. 18.* This is almost always the case if the clause is connected with a preceding period by pronominal connection (p. 473, Obs. 2), as: *Hi quoniam de principatu inter se contenderet, factum esse ut ab Averni Germani arcesserentur.* *Cæs. B. G. 1. 31.*—Sometimes, relative connectives have the same arrangement after a word or a phrase of the clause, as: *In tantâ libertate nemo potest esse, in magis famulâ qui neque servum neque libertum improbum habeat.* *Cic. Rosc. Am. 8. 22.*

Obs. 11. In order to understand and render the combination of the clauses within a given period, the whole sentence must be dismembered into its constituent clauses and propositions. This, generally, is not without difficulty for a beginner if, in a period, inserted clauses occur, because by these the sentence in which they are inserted is divided into two parts, which it is not always easy to connect. Periods are thus dismembered by first constituting the governing sentence separately from all its clauses, and afterwards constituting every clause separately in succession. The governing sentence is constituted by finding first its finite predicate (in oblique discourse the predicate-infinitive), and combining it with the subject-nominative (or subj. et accusative), adding to it all its other adjuncts. The practical rule for finding the predicate is, to read the sentence from the beginning, and to stop at the first conjunction or relative. All the words preceding these belong to the principal sentence. If there is no predicate among these words, it is an evidence that there are inserted clauses. The beginner must guard against combining the predicates of these clauses with the parts of the principal sentence already read. After passing over all the inserted clauses, the next predicate generally belongs to the principal sentence. In the same way each clause, and coordinate proposition must be separately examined. Having separately rendered each sentence belonging to the period, it is generally not difficult to find out the relation which the different clauses have to each other. All the participial constructions and ablatives absolute, in an analysis of this kind, must be likewise considered as clauses. See p. 176, Obs. 2.

The same method must be observed in rendering English periods into Latin (of course such as are paraphrased and accommodated to the Latin way of thinking, for a rendering of English text into Latin is more injurious than beneficial). The English period must be dismembered in the same way, as the Latin period in translating from the Latin into English. Each proposition must be separately rendered and be provided with the proper connective. Then, the arrangement of the clauses must follow by either inserting them in the principal sentence, or placing them before, or after it, according to the rules given in Obs. 1-10.

\* The art of paraphrasing a given English sentence into a sentence accommodated to the Latin way of thinking belongs to Latin rhetoric. But almost in every chapter of this grammar some of the many differences of idioms are considered. An admirable practice, for acquiring this art, is the rendering of good English translations of Latin authors back into Latin, comparing them, when rendered, with the Latin text.

*Rem. 3.* The connectives applied to the clauses, and their grammatical forms in general, are different according to the classes enumerated in R. 2.

*A.* SUBJECT-CLAUSES, and completing OBJECT-CLAUSES take the following forms: 1) the form of an INFINITIVE-CLAUSE; 2) of a clause introduced by *ut*, or its equivalents (*ut, quin, quominus*); 3) of a QUOD-CLAUSE; 4) of an INTERROGATIVE CLAUSE.—The first three of these clauses are comprised by the term 'COMPLETING THAT-CLAUSES'. See OBS. 1-7.

*B.* PREDICATE-CLAUSES take the form of an Ut-clause, or of a relative clause with *qui*. See OBS. 8-11.

*C.* ADVERBIAL Object-clauses are either introduced by conjunctions or by relatives. 1) The CONJUNCTIONS used are the following: (a) The ORIGINAL CONJUNCTIONS *si*, and its compounds *nisi* (*si*), *siu*, *sive*, *etsi*, *etiamsi*, *tametsi*, *ac si*, *quasi*, *siquidem*; with *dum*, and *dum* (and its compounds *dummodo* and *adum*), the origin of which is unknown; (b) the ORIGINAL (relative) ADVERBS *ut*, with its compounds *utut*, *prout*, *sicut*, *velut*, *utcumque*, *utpote*; *quando* and its compound *quandoquidem*; *simul*; and the comparative adverb *quam* with its compounds *quamquam*, *quamvis*, *quamdum*, *tumquam*, *postquam* (*posteaquam*), *antequam* (*priusquam*, *antequam*), *præterquam*; (c) CONJUNCTIONS variously derived from the RELATIVE ROOT *qu* (*cu*): *quum*, *quod*, *quia*, *quoniam*, *quo*, *quin* (inst. of *quæ ne*), *quoad*, *quippe*; (d) CONJUNCTIONS originally CO-ORDINATING, and used to introduce certain COMPARATIVE clauses: *et*, *ac*, *atque*, with their compounds *simulac*, and *simulatque*; (e) the IMPERSONAL VERB *licet*, which is used with the force of a concessive conjunction.—All these conjunctions (a-e) are called 'ADVERBIAL CONJUNCTIONS'. See OBS. 12. — 2) If adverbial clauses take the form of a relative clause, they are introduced either by the relative adjectives *qui*, *quod*, *quandus*, *quæ* (compounds: *quisquis*, *quicumque* etc.), or by one of the four locative cases of relative adverbs (*ubi*, *unde*, *quo*, *qua*).

*D.* ATTRIBUTIVE CLAUSES take 1) the form of relative clauses introduced by relative adjectives if the governing substantive is the logical antecedent of one of the members of the clause. See OBS. 13, 1. 2) They take the same form as completing object-clauses (No. 4) if their governing substantive has the same relation to the clause as a verb to a completing object-clause (OBS. 13, 2). 3) Sometimes clauses introduced by the adverbial conjunctions *quum*, *si*, *ut*, and by the locative relative adverbs *ubi* etc. are used as attributes of substantives (OBS. 13, 3).

*E.* There is a GENERAL FORM for all the clauses which express the IDEA OF A FACT. These may be used in all the relations in which a substantive is employed, either as subjects; or as transitive, intransitive, or prepositional objects; as genitive or prepositional attributes; or as predicate-nouns. These clauses are introduced by the conjunction *quod* (sometimes by *ut*), being generally connected with a demonstrative antecedent (*is* etc.), corresponding to 'the fact that'. They are called FACT CLAUSES, or SUBSTANTIVE QUOD-CLAUSES, (SUBSTANTIVE UT-CLAUSES). See OBS. 14.

OBS. 1. COMPLETING OBJECT-CLAUSES complete the idea of a verb in the principal sentence, according to the analogy of object-infinitives or of substantive objects (§ 476, 471, 488). They either take the form of a That-clause or that of an interrogative clause, according to the idea conveyed by the governing verb (p. 390, R. 85, OBS. 1). The form of the THAT CLAUSE is either an INFINITIVE CLAUSE, or an UT-CLAUSE (with its equivalent

lent forms '*ne, quin, quominus*'), or a QUOD-CLAUSE, according to the rules p. 588 foll. Hence both That-clauses and interrogative clauses are analogous either to TRANSITIVE or to INTRANSITIVE objects (§ 458).

(a) INFINITIVE CLAUSES, IMPERATIVE CLAUSES, the INTERROGATIVE CLAUSES dependent on transitive verbs, and the FACTITIVE UT-CLAUSES (i. e. those dependent on a verb of doing, see p. 593), are analogous to the transitive objects (ALIQUID *dicere, credere, sentire, imperare, petere, facere* etc.), as: *Cæsar cognovit montem a suis teneri* (Cæs. B. G. 1, 22) = *cognovit occupationem montis*.—*Imperat Lælio ut per collis circumducatur equites* (Liv. 28, 33) = *Imperat Lælio circumductionem equitum*.—*Faciam ut ejus dii semper meminerit* (Plaut. Capt. 4, 2, 20) = *Faciam eum ejus dii memorem*.—*Civitati persuasit ut de finibus suis exirent* (Cæs. B. G. 1, 2) = *Civitati protectionem de finibus persuasit*.—But in some conventional constructions clauses of this kind are analogous to intransitive objects, as in the construction of *certiorem facere*, and *operam dare*. The former is constructed with an infinitive clause, although we say '*certiorem aliquem facere de aliquo re*'. [The proper grammatical construction would be '*certiorem facere de eo quod*'; but the frequency of its use, and the awkwardness of the regular construction was the reason that this verbal expression assumed the construction of its synonym *nuntiare*.]—*Operam dare* is constructed with a completing Ut-clause in place of an intransitive dative-object, as: *Dedit operam ut quam longissime tempus duceret* (Nep. Them. 7, 1), analogous to the construction '*alicui rei operam dare*'. That-clauses dependent on *operam dare* originally are conceived as final clauses (= 'he took pains in order to etc.'). But from the frequent connection of such clauses with *operam dare*, the original conception was forgotten, and the clause was treated as completing, the expression *operam dare* assuming the force of our verbs 'to try', 'to endeavor'.—Thus an infinitive clause is sometimes used in place of a dative of the interested person, in the construction of the abstract dative (§ 469, R. 33), as: *Ipsa humilitas eorum maximo argumento est, me neminem adversatum esse*; their very humbleness is the best argument that I did not repel anyone. Liv. 26, 31. [The clause '*me... adversatum esse*' has the force of 'in my favor' = *huic rei*, or *mihi*. In the English rendering the same clause must be considered as an attributive clause, = an argument 'for my not repelling any one']. See the Ex. Cic. Phil. 2, 16, quoted p. 83, R. 33.

(b) Ut-clauses dependent on VERBS OF FEARING are conceived as intransitive datives (vereri alicui rei). Thus '*navibus veritus*' (Cæs. B. G. 5, 9) = '*ne quid navibus accideret*'; '*receptui suo timebat*' (Cæs. B. C. 3, 69) = '*ut se recipere posset*'.

(c) Clauses introduced by *quin* or *quominus*, are analogous to intransitive ablative objects, or to objects with prepositions, but also to certain transitive objects: *Nec ætas impedit quominus agri colendi studia teneamus*. Cic. Sen. 17, 60 (= *ab agris colendis*).—*Non ea res me deterruit quominus litteras ad te mitterem*. Cic. Fam. 6, 12, 1 (*deterrière aliquem de or ab aliquo re*). Thus *non dubito quin* = *non dubito de*.

(d) Oblique Quod-clauses are analogous to the construction with an objective genitive, dative, or prepositional object (*laudo aliquem quod* = *laudo aliquem propter aliquam rem*; *ignosco quod* = *ignosco alicui rei*; *accusare aliquem quod prodat* = *accusare productionis*).

OBS. 2. SUBJECT-CLAUSES have the same grammatical form as completing object-clauses, the language conceiving them as 'indeclinable neuters', which do not change their form, whether they are used in the relation of a subject nominative, or in that of an oblique case. Sometimes a clause introduced by one of the adverbial conjunctions (R. 3, C), is used as a subject-clause (the same conjunctions being occasionally used to introduce a completing object-clause), as: *Dixere, minime esse mirandum si tanta ignominia esset accepta*; They said, it was by no means to be wondered at if (that) so great a disgrace had been met with. Cic. Verr. 2, 5, 38.—*Non temerarium est ubi dives blande appellat pauperem*; It is not for nothing when (that) a rich man kindly addresses a poor one. Plaut. Aul. 2, 2, 7. (Compare: *Ignoscite si (= quod) appello talem virum sapius*. Cic. Leg. Agr. 2, 18, 49).—Subject-clauses are used: 1) as subjects of those PASSIVES which, in the active voice, take the same kinds of clauses as completing objects (OBS. 3); 2) as subjects of ACTIVE predicates (OBS. 4). Both kinds of subject-clauses always have impersonal predicates. Hence the predicate-adjectives, participles, and gerundials belonging to the predicate of the principal sentence must always be in the neuter singular (§ 477).

OBS. 3. All the verbs which, in the active voice, require clauses as completing objects (OBS. 1), take the same clauses as impersonal subjects if they are in the passive voice. There is no distinction made, in this respect, whether the object-clause is conceived as a transitive, or intransitive object, while substantive objects, if intransitive, cannot be turned into passive subjects (§ 477). Hence if any active verb, with a completing object-clause, is turned into a passive, it must take an impersonal form, the object-clause becoming a subject-clause, without any change of form, as: *Allatum est hostis adventare*; It was announced that the enemy was arriving. Liv. 25, 21 (actively expressed: *Afferre*

bant hostis adventare, where 'hostis adventare' is an object-clause; while in 'allatum est hostis adventare', the same clause is a subject-clause.—Eidem praetori mandatum est ut duas decumas frumenti exigeret; It was ordered 'to the same praetor' (i. e. the same praetor was ordered) to collect two tenths of corn. Liv. 36. 2.—Dubitandum non est quin nunquam possit utilitas cum honestate contendere; It must not be doubted that expediency can never be in conflict with morality. Cic. Off. 3. 3, 11.—Iniquissime comparatum est quod in morbis corporis medicus optimus queritur, in periculis capitis deterrimus patronus adhibetur; It is most unfairly established (i. e. it is exceedingly inconsistent) that in diseases of the body the best physician is called, but that in capital trials the most indifferent counsel is employed. Cic. Clu. 20. 57.—Romae non mediocri cum admiratione laudatur quod ut accipiendum non putari; At Rome 'it is praised' with not a little admiration that I have thought I should not accept that (donation). Cic. Qu. Fr. 1. 1, 9.—Quum querebatur equi Campanum bene meritis de republica nostra esset; When it was inquired (i. e. when inquiries were made) whether any of the Campanians had well deserved of our republic. Liv. 26. 33.—The nature of these clauses may be best seen if they are coördinate with substantive subjects; as: Valerio triumphus, Manlio ut ovans ingrederetur urbem (= oratio) decretum est. (To triumphus the personal predicate decretum est must be supplied.) Liv. 5. 31.—The only exception to the above-mentioned rule is the instance when infinitive clauses must assume the form of a NOMINATIVE WITH THE INFINITIVE (p. 106, R. 86. 87). But even in this instance, impersonal subject-clauses are sometimes used where the rule would require a personal construction with a nominative and infinitive, as: Eam gentem traditur famam, dulcedine frugum captam Alpibus transisse; It is reported by fame that this nation had crossed the Alps, because they were captivated by the sweetness of our fruits. Liv. 5. 33. [The clause 'gentem transisse' is an impersonal subject-clause, in place of the regular nominative with the infinitive 'Ea gens traditur transisse'.]—Sometimes it may be doubtful whether an Ut-clause, connected with an impersonal passive predicate, must be considered a subject-clause, or a final clause as adverbial object of the impersonal predicate, so that the latter, according to § 460, No. 2, is used without any subject: Omni contentione pugilum est ut his haec capitis aestimaretur. Cic. Clu. 41. Here 'ut... aestimaretur' is either a final clause (= there was a hard struggle in order to), or a subject-clause according to p. 599 (= they strove to make this trial a capital one). See p. 638, Obs. 1.

Obs. 4. The impersonal predicates of subject-clauses of the second class (Obs. 2), are either ordinary ACTIVE VERBS, impersonally used, or PREDICATE-ADJECTIVES (in the neuter singular), or predicate nouns with the impersonal copula (est). With both kinds of predicates the subject-clause is either an interrogative clause, or a That-clause (the same as in the instance mentioned Obs. 3), as:

(a) INTERROGATIVE CLAUSES: Duo praetores (personae) quidvisissent; Huiusmodi Campanos, i. e. Campanos is of opinion that there are two classes of praetores. Cic. Ac. Pr. 2. 31. [SUBJECT-CLAUSE: duo esse praetores visissent; IMPERSONAL PREDICATE: praetores.] Interest hostium, Etruriam quae acies habet; It is our interest that the resources and strength of the Etrurians be weakened. Liv. 36. 31.—Fatum fuit, exercitum populi Romani ad lacum Trasimenum interire; It was [destined by] fate that the army of the Roman people should be destroyed at lake Trasimenum. Cic. Div. 2. 8. 21.—Accusatores multos in civitate esse, utile est; It is useful that there should be many public accusers in the community. Cic. Rosc. Am. 20.

(b) CLAUSES INTRODUCED BY *ut*, *ne*, *quin*, *quominus*: Restat ut de imperatore deligendo dicendum esse videatur; It remains to speak (literally: that it should seem that it be spoken) of selecting a commander. Cic. Leg. Man. 10. 27.—Est mos hominum ut nolint eundem pluribus excellere; It is the habit of men to dislike that one man should be distinguished in several accomplishments. Cic. Brut. 21. 84.—Dionysio ne integrum quidem erat ut ad justitiam remigraret; It was not even in Dionysius's power to return to justice. Cic. Tusc. 5. 21, 62.—Si diem proferimus, periculum est (= verendum est) ne omnes copiae conveniant; If we postpone the matter, there is danger that all the forces may unite. Liv. 25. 38.—Stetisse per Trebonium, quominus oppido potirentur, videbatur; It seemed to be Trebonius's fault that they did not capture the town. Caes. B. C. 2. 13 [Stetisse being an impersonal infinitive dependent on videbatur = stetit per Trebonium quominus potirentur].—Non est dubium quin beneficium sit etiam invito prodesse; There is no doubt that it is (must be considered) a benefit to be useful to a person even against his will. Sen. Ben. 5. 19. [Here a subject-infinitive 'prodesse' is the impersonal subject of the impersonal predicate 'beneficium sit', and this sentence, in the form of a Quin-clause, is made the impersonal subject of 'non est dubium'.]

(c) QUOD-CLAUSES: Pungit me quod scribis esse te istic libenter; It gives me a pang (it afflicts me); literally 'it stings me', that you write you like to be there. Cic. Fam. 7. 15. 1.—Illud admodum ridiculum est, quod negas Dejotarum auspiciis illorum penitere; It is extremely ridiculous that you deny Dejotarus to be sorry for those auspices. Cic. Div. 2. 37, 78.—Magnum beneficium naturae est quod necesse est mori; It is a great benefit of nature that we must die. Sen. Ep. 101.

(d) INTERROGATIVE CLAUSES: Ea vos rata habeatis necne, reipublicae magis interest quam mea; Whether you ratify this, or not, is more a question of public interest than of my own. Liv. 26. 31.—Ne in proximam quidem noctem, ubi custodiretur expedirebat; It was not even arranged (i. e. no arrangements had been made) for the next night, where the place of his confinement was to be. Liv. ib.—Admirabile est quantum inter omnes unus excellat; It is wonderful, how much one man is superior to all. Cic. Or. 6.

Obs. 5. The active verbs that may be used as impersonal predicates of subject-clauses (Obs. 4), are limited to about thirty-five. These verbs (including those which are construed with a subject-infinitive (§ 494), and those which do not take any grammatical subject (tonat, fulgurat, etc.) are called 'PROPER IMPERSONALS'. For these verbs, and for the kind of subject-clauses which each of them requires, see p. 615 foll.—Predicate-adjectives, and predicate-nouns with the copula, may be construed with subject-clauses (according to the rules p. 609 foll.) whenever the idea of an adjective or noun admits of an action as subject. Frequently FACT-CLAUSES (substantive Quod-clauses) are used in place of the subject of a sentence. These clauses are not confined to the 'proper impersonal predicates', but may be used as subjects of any verb which would admit of an ordinary substantive-subject, denoting an action. See Obs. 14.

Obs. 6. If the impersonal predicate dependent on a subject clause, is a finite verb, the subject-clause is in the relation of a subject nominative, as in the examples quoted Obs. 3, and 4. But often a sentence with an impersonal predicate and with an infinitive clause as its subject, is itself an infinitive clause, in which instance the impersonal predicate must be placed in the infinitive (as an impersonal predicate-infinitive), and the subject-clause must be conceived as a subject-accusative, as: Constituerunt, optimum esse, domum suam quemque reverti; They resolved that it was best that each should return to his own home. Caes. B. G. 2. 10. [Here the infinitive clause 'domum... reverti' would be in the relation of a subject-nominative if the impersonal predicate were finite (optimum est); but since the sentence is made an object-clause of 'constituerunt', the predicate 'optimum est' is made an impersonal predicate-infinitive (optimum esse), and the subject-clause 'domum suam quemque reverti' assumes the relation of a SUBJECT-ACCUSATIVE (= domum reditorem optimum esse).]—Fuere qui dicerent, nihil attinere, omnis tumultu concitari; There were those who said, it was of no use that all should be alarmed in a tumultuous manner. Liv. 36. 11 [INDEPENDENTLY: 'nihil attinet, omnis concitari', the clause 'omnis concitari' being conceived as the subject-nominative of the impersonal predicate 'attinet'. Being made an object-clause of 'dicerent', the predicate 'attinet' becomes an impersonal predicate-infinitive, and the clause 'omnis concitari' is in the relation of a SUBJECT-ACCUSATIVE (= concitationem omnium nihil attinere).]—Such subject-clauses may consist of an impersonal passive of that class which are used without any subjects (§ 460, No. 2), the subject-accusative being understood as if an impersonal 'it' (p. 72, R. 11, 2). In this instance the same impersonal infinitive has two relations: 1) that of a predicate-infinitive of its own clause; 2) that of a subject-accusative to another predicate-infinitive; as: Conclamant omnes, ad castra ire oportere, (literally: All shouted 'that it was necessary' that 'it should be gone' to the camp, i. e. 'that all must proceed to the camp'.) Caes. B. G. 3. 18. [Iri represents an infinitive-clause, being at the same time its predicate, and corresponding to the finite predicate 'itur' (it is gone, they go); it is, also, the subject of oportet, which being changed into a predicate-infinitive, it must be considered its subject-accusative.] Thus: Non dicam ne illud quidem, in hominem honestissimum tam graviter animadverti causam indictam non oportuisse; I will not even mention that so severe a punishment ought not to have been inflicted, without a hearing, on a most respectable man. Cic. Verr. 2. 5. 8 [animadvertitur, = poena irrogatur; hence 'animadverti oportuit' = poenam irrogari oportuit].

Obs. 7. In the same manner any finite subject-clause may be in the relation of a subject-accusative if its impersonal predicate assumes the form of a predicate infinitive, as: (Dixit) Pompeji summam fuisse semper voluntatem ut componeretur atque ab armis discederetur; He said that it had always been the earnest desire of Pompey that a compromise should be made, and that they should disarm. Caes. B. C. 3. 16 (= 'compositionem' et 'dissensionem ab armis' semper fuisse voluntatem).—Caesar omnibus consiliis antevertendum existimavit ut Narbonem proficisceretur; Caesar thought he must prevent by all means that he should march to Narbo. Caes. B. G. 7. 7 [= protectionem (ad) Narbonem antevertendam esse].—Illud memineris, convenisse ut ne quid dotis mea ad te afferret filia; Remember that 'it has been agreed' (= we have agreed) that my daughter will not bring you any dowry. Plaut. Aul. 2. 2. 80 [= non-ationem (if such a substantive existed) dotis convenisse].—Caesar cognovit per Afranium stare quominus prelio dimiceretur; Caesar learned that it was Afranius's fault that there was no fighting. Caes. B. C. 1. 1. 41.—Quum nostri quid sine imperatore efficere possent perspicere cuperent; Since our soldiers wished 'that it should be seen' what they could do without the chief-commander. Caes. B. G. 3. 21.

Sometimes two and more subject-clauses are thus made dependent on each other: Quum

has been adopted are four hundred).—In a similar passage the predicate-clause has the form of an *Ut*-clause: *Videsne igitur minus quadringentorum annorum esse hanc urbem ut sine regibus sit?* Do you see, then, that this city (*by ecthesis*, see p. 396, d) has been less than 400 years without kings? Cic. Rep. 1, 37, 58. (p. 526, c).

Obs. 10. Predicate clauses dependent on *facere*, and its synonyms, as abstract predicates, have the form of an *Ut*-clause emphasizing either the *predication*, as referring to a 'doing' of the subject, or an adverbial adjunct of the predicate proper. This construction is both personal and impersonal, as: *Fac tibi* (i. e. *ut tibi*) *legis Aciliae veniat in mentem*; Recall the Acilian law to your mind (literally: *Make that you recall* etc.). Cic. Verr. 1, 1, 17.—*Invitus facio ut recorder* ruinas reipublicae; I reluctantly recall the ruin of the republic. Cic. Vatin. 9, 21.—*Facio libenter ut per litteras tecum colloquar*; I like to converse with you by letter (= *libenter colloquor*). Cic. Fam. 1, 7, 1.—*Quo feci libentius ut eum sermonem mandarem litteris*; The more willingly have I committed this dialogue to paper. Cic. Or. 2, 2, 7.—*Prope factum est ut in jussu praetoris in aciem exirent*; It almost 'happened' that they went to battle without the praetor's orders (i. e. They almost went to battle etc.). Liv. 25, 21.—*Egit ille nihil aliud illo exercitu nisi ut urbs depopularetur*; He did nothing with this army but devastate cities (i. e. he only devastated cities with this army). Cic. Pis. 17, 41.—*Faciendum mihi putavi ut his litteris breviter responderem*; I thought that I ought briefly to answer this letter. Cic. Fam. 3, 8.—*Negavi me esse facturum, ut de periculo publico non ad consilium referrem*; I said that I must refer to the public council in a matter of public danger. Cic. Cat. 3, 3.—Here belong the impersonal expressions *fit ut*, *contingit ut*, *accidit ut*, as: *In eis fit ut aequè quisque altero delectetur ac se ipso*; Between such persons ('it happens that') each finds as much pleasure in the other, as in himself. Cic. Off. 1, 17.—*Timoleon magnus omnium iudicio vir exstitit; namque huic contigit ut patriam in qua erat natus, oppressam a tyranno, liberaret*; Timoleon was a great man according to the judgment of all; for he liberated his native country from tyranny (literally 'it happened to him', 'it fell to his lot' that he liberated etc.). Nep. Timol. 1, 1.

Obs. 11. Often verbs of saying, asking, and commanding, on which oblique clauses are dependent (p. 387 foll.) must be considered as *abstract predicates*. This is the case if, by such verbs, the author designates *his own present* assertions, questions, or commands, separating thus the *predication* (i. e. the idea of assertion, question, or command), from the *predicate*, i. e. the substance of the command, which is contained in the oblique clause. '*Dico Epicurum errare*' is a mere circumlocution of the simple sentence '*Epicurus errat*'; the difference between both being that in the former the predication (a declaration) is separated from the predicate declared. Hence oblique clauses of this kind, although they have the external form of object-clauses, are virtually predicate-clauses, the governing verb being an *abstract predicate*; as: *Dicimus, C. Verrem quadringenties sestertium ex Sicilia abstulisse*; We assert that C. Varro abstracted 40 millions of sesterces from Sicily (= *Verres... abstulit*). Cic. Verr. 1, 18, 56.—*Volo ut respondeas* (= *responde*). Cic. Vatin. 7, 18.—*Quero servavistine fidem*; I ask whether you have kept your promise (= *Servavistine fidem?*) Cic. Vat. 6, 15.—*Peto ut periculum propulsatis* (= *propulsate periculum*). Cic. Rosc. Am. 3, 7.

Obs. 12. ADVERBIAL CLAUSES are of three forms. They are 1) either introduced by *adverbial conjunctions* (R. 3, C), or 2) by *relative adjectives* or *adverbs*; or they take 3) the form of *participial clauses*, either in the form of *ablatives absolute*, or in that of a *direct participial construction* (p. 174, R. 218).

Those adverbial clauses which are introduced by conjunctions, likewise assume three forms: 1) the direct adverbial; 2) the conditional; 3) the comparative forms.

A. In the DIRECT ADVERBIAL form, the different adverbial relations of the principal sentence (§ 516 foll.), except that of PLACE (which always assumes the form of a RELATIVE clause), are directly expressed by conjunctions, denoting the relation. These are (a) TEMPORAL conjunctions (*quum*, *quando*, *dum*, *quoad*, *donec*); (b) the MODAL conjunctions *ut*, and its equivalents *quo*, *quin*, *quominus*; (c) the CAUSAL conjunctions *quod*, *quia*, *quoniam*, including the concessive conjunctions *quamquam*, *etsi*, *quoniamvis*.

B. The CONDITIONAL form represents the PREDICATION of the principal sentence (p. 480) as dependent on a CONTINGENCY whose existence or non-existence is represented as *uncertain*. This contingency is expressed in the form of a *conditional clause*, which is introduced by the conjunction *si* (*nisi*, *ni*), or by other adverbial conjunctions, implying the conjunction *si* (*dummodo* etc., *ubi quis* etc., see § 579, R. 66). Hence conditional clauses as such do not express adverbial relations of the principal predicate, but they may imply them. The kind of adverbial relations which is thus contained by implication in the conditional form of the clause may always be recognized if the *uncertainty* expressed by the conditional form is removed, i. e. if the condition is made *real*. Thus in the following conditional clauses the relation of CAUSE is implied: *Si diem profecturus*, periculum est ne omnes copiae conveniant; If we postpone the matter, there is danger lest all the forces may assemble. Liv. 25, 38 [By making the condition real: *Omnes copiae conveniunt quia diem protulimus*; The troops assembled because we

postponed the matter].—*Illud perspicuum est, si neque amens pater, neque deperditus filius fuerit*, neque odii causam patri, neque sceleris filio fuisse; It is clear, that if neither the father was insane, nor the son was a villain, neither the father had any reason to hate, nor the son, to commit the crime. Cic. Rosc. 14, 41 [If made real: The father had no reason etc., since he was not insane; the son had no reason etc., since he was no villain].

—In the following clauses the relation of TIME is implied: *Si praelium committeretur*, propinquit castorum celerem superatis ex fuga receptum dabit; If (in the case that) a battle should be fought, the nearness of the camp would allow to the defeated party a quick retreat. Cæs. B. C. 1, 82 [If made real: *Quum praelium commissum esset*, propinquit castorum... dabit].—Significant canes et an-eres *si qui noctu in Capitolium venerint*; The dogs and geese give the alarm if any one comes by night to the Capitol [If made real: When a certain person came, they gave the alarm]. Cic. R. A. 20, 56.—*Si quis collegam appellasset*, ita discedebat ut etc.; If any one had appealed to a magistrate of equal power, he came so off that etc. Liv. 3, 36 [If made real: When a certain person had appealed etc., he came so off that etc.].—In the following passage Cicero gives to a conditional clause the form of a temporal clause by removing the uncertainty implied in the condition: *Si damnatus eris*, atque adeo *quum damnatus eris* (*nam dubitatio damnationis quae poterat esse?*), virgis te ad necem caedi necesse erit; If you will be condemned, or rather when you will be condemned (for what doubt can there be of your condemnation?), it will be necessary to whip you to death; Cic. Verr. 2, 3, 29.—In the following clauses the relation of COINCIDENT ACTION is implied: *Facis injuriam si majorem spem in hujus critio ponis quam etc.*; You are wrong if you place a greater hope in his death than etc. Cic. R. A. 50, 146 [If made real: *Injuriam facis quod... ponis* (or *quum... ponis*); You are wrong when (in as much as) you place etc.].—*Satis prosum si perficio ut nolint obesse qui possunt*; I am useful enough if I effect that those do not harm us who have the power to do so. Cic. Att. 2, 1, 8 [If made real: *Satis prosum, quod* (or *quum*) *perficio* (or *perficiendo*); in as much as I effect (by effecting)].—But not every conditional clause implies an adverbial relation, and any member of a sentence may assume the form of a conditional clause, if it contains an uncertain action on which the reality of the predication depends. Thus frequently conditional clauses, by removing the condition, may become equivalent to subject-clauses, to object-clauses, to relative, to interrogative clauses, or even to mere affirmative particles, as: *Minime est mirandum si mors acerba fuit*; There is no wonder if his death was lamented. Nep. Cim. 4, 4 [Making the condition real: '*quod mors acerba fuit*', or '*mortem acerbam fuisse*', as subject-clause].—*Ignosce si ejus viri auctoritati Dejotarus cessi*; Pardon if Dejotarus obeyed the authority of that man. Cic. Dej. 4, 12 [If made real, the conditional clause becomes an oblique *Quod*-clause].—*Si pecuniam tibi aliquis donaverit*, beneficium vocabis; If somebody presents you with money, you will call it a benefaction. Sen. Ben. 4, 6 [Here the conditional clause has the force of a transitive accusative, on which a factitive predicate depends (§ 487, R. 74), = *donationem beneficium vocabis*].—Non utar ista consuetudine, *si quid est factum clementer*, ut dissolvi factum criminer; I will not adopt the habit of stigmatizing as reckless if anything is performed with clemency. Cic. Verr. 2, 5, 8 [Here the clause '*si quid est factum*', if the uncertainty is removed, becomes RELATIVE: '*id quod est factum clementer*'.—Nunc, *si me amas*, enitere ut scida ne qua deperat; Now, if you love me, see to it that not a single sheet is injured. Cic. Att. 1, 20, 4 [Here the conditional clause has the force of an adjuring particle 'by your love', *per amorem tuum*].—Hence interrogative clauses, in which the predication is represented as uncertain, frequently assume a conditional form. See p. 397, Obs. 10.—If the reality of the predicate is made dependent on a condition which cannot be made real, the conditional clause cannot be expressed in any other form but in that of a condition, containing no relation except that to the predication. Such conditional periods are called 'hypothetical', as: *Alexandro si vita data longior esset*, Oceanum transvolasset; If a longer life had been given to Alexander, he would have crossed the Ocean. Auct. Her. 4, 22, 31 [The clause '*si vita... esset*' cannot be replaced in the form of any other clause, even if assumed as real, in which instance it must be altogether omitted. This is the practical criterion of hypothetical clauses].

C. THE COMPARATIVE FORM as such does not denote any of the adverbial relations of the principal sentence. It is a peculiar kind of coördination for which language has established a specific grammatical form; but it may, like the CONDITIONAL form (into which it passes over by means of the conjunction *nisi*, which is both conditional and comparative), imply the different adverbial relations of the principal sentence. The nature of this adverbial relation is always evident from the *syndetic antecedent* of the comparative conjunction (Obs. 15), which frequently is blended with it into one single word. The comparative conjunctions (aside from the adjective forms *quantus*, *qualis* etc.) are: *quam*, *ut*, and the coördinating conjunctions *atque* and *ac* (sometimes *et*). These refer (a) to the relation of INTENSITY (with the antecedents *tam* and *plus*, which is often implied in the form of the comparative of descriptive adjectives, *tam* being

blended with the comparative conjunction in the form *tamquam*; (b) to the relation of MANNER (with the antecedents *sic* and *ita*, being blended with the comparative conjunction in the form *sicut* or *sicuti*); (c) to the relation of TIME, in which relation the comparative conjunctions are generally blended with the antecedents (*postquam*, *antequam*, *præquam*, *simulac*, *simulacque*, the comparative conjunction *ut* being used without any antecedent, with the force of 'as soon as'). If the comparative form is used for any other adverbial relation, the relation must be generally expressed by combining the required adverbial clause in its *own form* with the comparative conjunction, as in the relation of CAUSE: Mercatoribus est aditus magis eo ut quæ bello cepissent quibus vendant habeant, *quam quo* ullam rem ad se importâri desiderant; They allow access to merchants more in order to have persons to whom to sell their booty *than because* they like anything to be imported to their country. Cæs. B. G. 4, 2.—So in reference to the relation of PLACE: Non longius hostes aberant *quam quo* telum adfici posset; The enemy was no farther *than to reach the place* by missiles (literally: 'than to which place a missile could be thrown'. Cæs. B. G. 2, 21. Even the relations of *intensity* and *manner* are frequently *separately expressed*, although these relations are sufficiently expressed by the antecedents, as: Si *plus* edidisset *quam quantum* natum esset; If he had assessed *more* (corn) *than* had been raised. Cic. Verr. 2, 3, 29. Here the relation of intensity is *twice* expressed, by *plus...quam*, and by *quantum*, which might have been omitted, as in the passage immediately following: Quid si *minus* dedisset arator *quam* poposcisset Apollonius? Ib.

The comparative form is not merely applied to adverbial relations, but, like the conditional form, is a general grammatical form which may refer to any kind of relations, and to all kinds of clauses and phrases. Thus the comparison of 'qualities' or 'numbers' assumes a *relative* form, as: Tu, Jupiter, qui *eisdem* in quibus hæc urbs auspiciis a Romulo es constitutus; Thou, O Jupiter, who hast (*i. e.* whose worship has) been instituted by Romulus under the *same* auspices (*i. e.* of the same kind or quality) as this city (*i. e.* was instituted). Cic. Cat. 1, 13, 33.—*Totidem* quot capita originis erant coloniis missi: So many colonies having been sent, as there were mother-cities. Liv. 5, 33.—Thus the comparison by *quam* is applied to subject-clauses, and object-clauses of any form: Mori maluit *quam* de his rebus Sullam doceri; He would die rather than have Sulla informed of these things (literally: than \* that Sulla should be informed'). Cic. Rose. A. 9, 26.—Plus interfuit reipublice, castellum capi Ligurum *quam* bene defendi causam *M. Curii*; It was more in the interest of the republic that a castle of the Ligurians should be captured *than that the trial of M. Curius should be well conducted*. Cic. Br. 66, 234.

Hence the adverbial clauses are treated in five sections: 1) LOCAL CLAUSES; 2) TEMPORAL; 3) MODAL; 4) CONDITIONAL; 5) COMPARATIVE clauses.

Obs. 13. ATTRIBUTE-CLAUSES are those whose governing word is a NOUN. They are analogous to all kinds of an ordinary attribute, and may be conceived as attributive adjectives, as attributive genitives, as prepositional attributes, or as appositions. Attribute-clauses assume 1) the form of a RELATIVE CLAUSE, if the governing noun is at the same time the grammatical antecedent of one of its members, as: *Ea pars Oceani quæ est ad Hispaniam*. Cæs. B. G. 1, 1. Here the attribute clause is relative, because the noun *pars*, a member of the principal sentence, is the antecedent of its subject. The clause is analogous to an attributive adjective (the *Hispanic* part of the Ocean). In '*Condrû-i, qui sunt Trevirôrum clientes*', the clause has the force of an apposition (the Condrusi, the clients of the Trevirians).

2) If the governing noun of the clause is *not* the grammatical antecedent of one of its members, the clause either takes the same form as completing clauses (Obs. 1-7), or as adverbial clauses (Obs. 12). The former is the case if the governing noun implies an *action* such as would require to be completed by a subject-clause, or an object-clause if it had the form of a *verb*, as Crebri ad Caesarem *rumores* afferbantur *omnibus* Belgis *conjurare*. B. G. 2, 1. *Rumores*, implying a verb of SAYING, takes its attribute clause (= de conjuratione) in the form of an infinitive clause, because the same clause would be required if an equivalent *verb* were used in its place (*nuntiabitur, omnibus Belgis conjurare*).—Capiunt necessarium *consilium* ut *suscipiant ipsi negotium* (= negotium ab ipsis suscipiendi). Cic. Verr. 2, 1, 54. Here *consilium* takes an Ut-clause as attribute, because a verb expressing the idea of a 'plan' (as *statuere*) would take the same clause in the form of an object-clause.—Judicavit Tubero *vacationem* augures *quominus* *iudiciis* *operem* *darent* (= vacationem ab iudiciis) non habere; Tubero declared that the augurs had no immunity from serving as judges. Cic. Brut. 31, 17. Because verbs of exempting take a completing object-clause with *quominus* (see p. 602, 5), the noun *vacatio*, in the meaning 'exemption', takes an attribute-clause in the same form. For examples of attribute-clauses in the form of an interrogative clause, see p. 391, Obs. 4.

3) Clauses introduced by **ADVERBIAL** conjunctions may be made the attributes of those nouns (or of their equivalents) which represent the different adverbial relations, as *tem-*

*purs, modus, causa, consilium* (purpose). In this instance the clause almost always has a determinative form-adjective as syndetic antecedent, which, being attached as attribute to the governing noun shows the attributive nature of the clause; as: *Accēpit agrum temporibus eis quum jacerent pretia prædiōrum*; He obtained the field *in those times when* the prices of real estate were down (at the time of *low prices*). Cic. Rosc. C. 12.—*Secutum est illud tempus quum me ad Pompējum proficisci officium meum cōegit*; Then followed the *time when* my duty compelled me to repair to Pompey (= *tempus protectiōnis officiōsæ*). Cic. Fam. 11, 27.—*Voluptātis partīs hoc modo describunt ut*\* *malevolentia sit voluptas ex malo alterius; benevolentia etc.*; They divide pleasure *in this way* (thus) *that* malice is (defined as) pleasure derived from another person's misfortune; benevolence etc. (= *modus definiendi voluptātem etc.*). Cic. Tusc. 4, 9. 20.—*Erant ejusmodi* (= *ejus modi*) *situs oppidōrum, ut* neque pedibus aditum haberent, neque navibus; The sites of the town were of *that kind* (such) *as* to have neither an access by land nor by water. Cæs. B. G. 3. 12 (= *hoc modo sita erant ut etc.*).—*Mansit in pacto usque ad eum finem dum iudices rejecti sunt*; He abided by the agreement *up to the time-point that* (literally 'till') the judges were rejected. Cic. Verr. 1, 6, 16. The clause *dum...sunt* is an attribute of *finis* (end-point of time), the conjunction *dum* (till) being used to express the adverbial relation designated by '*finis*'. The words '*usque ad eum finem*', might have been omitted, or be replaced by '*usque eo*'. In either instance the clause would be *adverbial*; but being made dependent on the governing noun *finem*, the exponent of its adverbial relation, it has assumed the grammatical form of an attribute-clause.

The noun *locus*, as exponent of the relation of 'place', and all nouns represented as localities, frequently take attributive clauses in the form of adverbial relative clauses (introduced by one of the locative adverbs). See § 616.

Obs. 14. Any sentence expressing the idea of a **FACT** may be treated in every respect like an *ordinary substantive*, and be placed in every grammatical relation and form of which a substantive is susceptible. These sentences, which are called **FACT-CLAUSES**, are generally introduced by *quod* (but sometimes by *ut*, see p. 605), taking the syndetic antecedent (Obs. 15) *id* (sometimes *hoc. illud, ea res, illa res, illa causa*). To these antecedents of the fact-clause all the different kinds of inflection are applied which a substantive would take if used in place of the fact-clause. Hence fact-clauses may stand in the relation 1) of a **SUBJECT** (in which instance the predicates are *not* confined to the regular impersonal verbs, Obs. 4, but may consist of *any verb*); 2) of a **TRANSITIVE, INTRANSITIVE, OR PREPOSITIONAL OBJECT**; 3) of a **SUBSTANTIVE-ATTRIBUTE**. The syndetic antecedent (*id, hoc, illud*) may be left out when the clause is in the relation of a subject, a transitive object, or of an attribute. Fact-clauses are mostly rendered by 'the fact that', or by a simple *That*-clause.

1. SUBJECT FACT-CLAUSES: *Curam accebat quod* adversus Latinos bellandum erat; *The fact that a war must be waged against the Latins, made their anxiety intense.* Liv. 8, 6. — *Suspectum Alexandrum fecit quod* Pelusii validum presidium relictum erat; *The fact (if) made Alexander suspected that a strong garrison had been left at Pelusium.* Liv. 45, 11. — *Quod tota Sicilia, quod omnes Siculi . . . Romae sunt, nihilne id valebat?* *Is it of no importance, that the whole of Sicily, that all the Sicilians . . . are at Rome?* Cic. Verr. 1, 7. — *Non ea res me deterruit quod tu ad me nullas literas miseris;* *The fact that you had sent no letter to me did not deter me.* Cic. Fam. 6, 22, 1. — *Datum hoc nostro generi est ut luendis periculis publicis piacula simus;* *It is the fate of (literally: it is given to) our race to be (that we are) the sin-offerings for expiating public dangers.* Liv. 10, 28.

2. FACT-CLAUSES AS TRANSITIVE OBJECTS: *Miserere nostrae tribus quod a Vibōne decessimus*; Attribute to our unhappy condition *the fact that we left Vibo* (or 'our leaving Vibo'). Cic. Att. 3, 4.—*Nisi hoc indignum putas quod vestitum sedēre in iudicio vides quem te a patrimonio expulisti*; Unless you think *it* an indignity *that* the man whom you have driven from his property, is sitting (still) with clothes in the Court. Cic. Rosc. A. 50 [Here the clause '*quod...vides*' is the transitive object of *putas*, and at the same time the logical subject of the attributive predicate '*indignum*', according to p. 102, C]. *Idem vero a iudicio prodeun quod C. Servilius Ahala Sp. Maelium manu sua occidit*; *I found the two of them* *fact that* C. Servilius Ahala killed Sp. Maelius with his own hand. Cic. Cat. 1, 1, 3. If is the adjective *indignus* is an attribute to the fact-clause, as if the

\* The grammarians generally consider Ut-clauses of this kind as governed by 'hoc'; but the demonstrative adjective governs the *Ut*-clause as little as it governs the *Quum*-clause and the *Dum*-clause in the other passages quoted. The clauses evidently depend as attributes on the nouns which are the exponents of those adverbial relations that are expressed by this same kind of clauses. With the form '*hoc modo*', the *Ut*-clause is an attribute-clause; but if its equivalent *ita* is used in its stead, the clause is an *adverbial* modal clause, in the same way as *forti* in '*forti modo pugnāre*' is an attribute, but in the form '*fortiter pugnāre*' becomes an *adverb*.

latter were an ordinary substantive; the syndetic antecedent *illa*, with which *antiqua* agrees, having assumed the form of a neuter plural].— Si tibi fortuna non dedit ut patre certo nascere, at natura certe dedit ut humanitatis non parum haberes; If fate did not grant you (the chance) to be born of a legitimate father, nature at least has granted you (the gift) of sufficient education. Cic. Rosc. A. 16, 46.

3. FACT-CLAUSES AS ABLATIVE OBJECTS: Cum magno assensu auditus est, non magis eo quod multitudinem noxam levabat, quam quod culpam in auctores verterat; He was heard with great favor, as much (no more) from the fact (cause) that he relieved the people from a grievance, as (from the fact) that he had brought home the fault to its authors. Liv. 45, 10. [From this form of the Fact-clause (*eo quod*), the origin of the causal Quod-clauses must be derived, which is made evident by the above-mentioned passage.]—Hoc eo (= *ut id*) spectabat ut Pythiam a Philippo corruptam diceret; This referred to the fact that Pythia, according to his opinion, was bribed by Philip. Cic. Div. 2, 57, 118.

4. FACT-CLAUSES AS PREPOSITIONAL OBJECTS: Hoc ex eo intelligi potest quod vos de ea re iudicare non debetis; This may be understood from the fact that you should not take cognizance in this matter. Cic. Cae. 35, 102.— Videt sibi de eo quod consenserit causam esse dicendam; He sees that he will be placed under trial for the fact that he conspired (for conspiring, which could not be expressed by 'de consentiendo', because the gerundial would not refer to a past fact).— Avitus pro eo quod se suorum municipum commodis novum esse arbitrabatur, voluntati Larinatum deesse noluit; Avitus, in accordance with the fact that he thought himself to be born for the interests of his townsmen, did not wish to oppose the wishes of the Larinians. Cic. Clu. 15, 43.— Gratiam qui refert habet, et qui habet, in eo ipso quod habet, refert; Who returns thanks feels thankful (has thanks), and who feels thankful returns thanks in the very fact that he feels thankful. Cic. Planc. 28, 68\*.

5. ATTRIBUTIVE FACT-CLAUSES: Etiam hanc molestiam assimo quod mihi non solum pro Plancio dicendum est, sed etiam pro me; I assume also the burden of being obliged to speak not only for Plancius, but for myself. Cic. Planc. 1, 3 [In attributive fact-clauses, the antecedent agrees in gender, number, and case with the governing noun of the fact-clause, which, as an attribute, generally means 'consisting in the fact that'].— Num etiam recentium injuriarum quod iter per provinciam per vim temptassent, memoriam deponere posse? Could he also forget their recent wrongs (consisting in the fact) that they had violently attempted the march through the province? Cae. B. G. 1, 14.

Obs. 15. SYNDETIC ANTECEDENTS of a clause are those form-adjectives or form-adverbs of the definite form, which mark the grammatical function of the clause as member of a phrase of the principal sentence. These demonstrative form-words represent, as it were, their clauses in the principal sentence, and always have the same grammatical relation (as subject, object, attribute) to the members of the principal sentence, as the clause of which they are the antecedents. Hence the relation of the clause may be always determined by that of the syndetic antecedent. Since the syndetic antecedents are identical with their clause, they have not to them the relation of a governing word to its dependent word in a phrase, and must be distinguished from the grammatical antecedent of a relative clause, which generally is at the same time its governing noun. Thus in 'eo die quo aderat', the noun 'die' is the grammatical antecedent, and the governing noun of the attributive clause 'quo aderat'; but *eo* is its syndetic antecedent, which by its form as attribute of *dies* represents the clause as attributive\*\*.

1. SUBJECT and completing OBJECT-CLAUSES take the neuter absolute demonstratives (*id*, *hoc*, *illud*) as syndetic antecedents: Non id spectandum est quid dicat; we must not regard what he says. Cic. Off. 3, 33 (an interrogative subject-clause, different from the relative 'id... quod dicit').—Hoc tibi numquam criminis fore putasti, celeberrimo loco tibi edificari navem? Did you never think (that) it would be made a charge against you that, at a most frequented place a ship was built for you? Cic. Verr. 2, 5, 18.— An hoc dubitabit quisquam quin is venalem in Sicilia jurisdictionem habuerit qui etc.? Will anyone doubt that he had a venal jurisdiction in Sicily who etc.? Cic. Verr. 2, 2, 48.— In place of the neuter absolute a noun of general import (*res*, *ratio* etc.) may be used, in which instance the demonstrative agrees with it in gender, case, and number, as: Non ea res me deterruit quod (inst. of 'Non id me deterruit quod'). Cic. Fam. 6, 22, 1. Sometimes the absolute neuter demonstratives are used in the plural: His subsidiis ea cum

\* The oblique Quod-clauses (p. 388, Obs. 1, b) must be considered as original Fact-clauses, which is evident from the following passage: Sunt qui in eo quoque audaciam ejus reprehendant quod, quantum commodum fuerit frumenti, detraxerit. Cic. Verr. 2, 1, 4.

\*\* The syndetic antecedents of relative clauses are generally called 'correlatives', but their nature is in no respect different from that of the other syndetic antecedents, and there is no reason why they should be designated by a separate name.

assecutus ut ex alienissimis sociis amicissimos...redderem; By these resources I succeeded in making our most reluctant allies our most attached friends (literally: I obtained these things that I made etc.). Cic. Fam. 15, 4, 14.— Not rarely both subject and object-clauses take the adverbial antecedents *sic* and *ita* with the force of *hoc* and *illud*, which is a grammatical anomaly, but sanctioned by usage, as: Sic a majoribus suis acceperant, tanta populi Romani in Siculos esse beneficia ut etc.; They had received this tradition from their ancestors that the benefits which the Roman people had conferred on the Sicilians were so great that etc. Cic. Verr. 2, 2, 3.— Sic ego existimo, in summo imperatore quatuor res esse oportere; I hold that a great captain must have four qualities. Cic. Leg. M. 10, 28. So with interrogative clauses: A vobis ita arbitror spectari oportere, quanti haec eorum iudicio, qui studiosi sunt harum rerum, aestimentur; I believe that you must take that price into consideration at which these things are valued by experts. Cic. Verr. 2, 4, 7 (literally 'at what price these things are valued by those, who apply themselves to those things').— Generally, the subject-clauses and the completing object-clauses are used without any syndetic antecedents.

2. ADVERBIAL CLAUSES OF PLACE take the demonstrative (definite) forms of the four cases of locative form-adverbs as syndetic antecedents (*ibi*, *inde*, *eo*, *ea* etc.). See p. 216, No. 2, and p. 575.

3. ADVERBIAL CLAUSES OF TIME if introduced by *quum* take the antecedent *tum*, as: Tum quum bello sociorum tota Italia arderet, C. Norbanus in summo otio fuit; When (literally Then when) all Italy was in flames during the social war, Norbanus lived in the deepest peace. Cic. Verr. 2, 2, 5. The combination *tum... quum* sometimes involves a comparative relation (= *eodem tempore quo*) as: Quibus in provinciis omnia fana depopulatus est tum quum in Cn. Dolabellam scelus suum renovavit quaestorium; In these provinces he despoiled all temples at the same time when he repeated against Dolabella that crime which he had committed as quaestor. Cic. Verr. 1, 4, 12. If *quum* refers to the time of the speaker, it takes the antecedent *nunc* in place of *tum* (*nunc... quum* = now that), as: Nunc vero quum sit unus Cn. Pompejus qui etiam antiquitatis memoriam virtute superavit, quae res est etc.; But now that there is only the one Pompey who has surpassed by his great qualities even the deeds of antiquity etc. Cic. Leg. M. 10, 27.— Dum and quoad (in the meaning till) take the antecedent *usque* or *usque eo*, as: Usque eo se tenuit quoad a Pompejo ad eum legati venerunt; He held himself (up to the time) till ambassadors came to him from Pompey. Cic. Dej. 4, 11. Dum in the meaning 'as long as' takes the antecedent *tandem*, and sometimes *usque*, as: Ne tandem quidem dominus erit dum de patris morte quaeratur? Can he not be the owner (of his house) even so long as the investigation on his father's death is lasting? Cic. Rosc. A. 28, 78.— Usque dum per me licuerit; As long as I shall allow. Cic. Verr. 2, 1, 5.— Those temporal conjunctions which are properly comparative, take their antecedents according to the rules of comparative clauses, as *tandem... quamdum* (see 'comparative clauses'). According to these rules *postquam*, *antequam*, *priusquam*, *simulatque* etc. should not take any antecedents because in 'postquam' *post* itself is the antecedent of *quam* (= later than). But this original meaning of *postquam* was not felt, and hence *postquam* not rarely takes the antecedent *tum*, which strictly is an ungrammatical and illogical combination. *Postquam*, however, always precedes this antecedent in the form of a protasis, so that *tum*, whenever it is used, introduces the apodosis, as: Postquam non resisti videt, et haud dubiam lassitudinem esse, tum collectis omnibus subsidiis legiones concitavit; After (when) he saw that no resistance was made, and that their state of indolence was unquestionable, (then) he roused the legions after collecting all the auxiliary troops. Liv. 10, 29. Compare: Liv. 25, 10; 26, 5; 1, 54; 22, 48; 28, 48. The other temporal conjunctions of the comparative form take no other antecedents but those contained in themselves.

4. For the antecedent of MODAL CLAUSES see p. 435. Obs. 2.— If modal clauses of manner or intensity are in the relation of an ATTRIBUTE, their antecedents, as those of all the attributive clauses, take the form of an adjective (the demonstratives *is*, *hic*, *ille*, *talis*, being used in clauses of manner, and the quantitative *tantus* in clauses of intensity); as: Illa definitio iudiciorum aequorum retineatur ut et sine invidia culpa plectatur, et sine culpa invidia ponatur; Let that character of equity-trials be retained, that guilt be punished without hate, and hate be stopped without guilt. Cic. Clu. 2, 5.— Hoc iure sunt socii, ut eis ne deplorare quidem de suis incommodis liceat. Cic. Verr. 2, 2, 27.— Talem acceperant injuriam quam (i. e. ut eam; qualem) would make the clause comparative) nulla lege satis digne persequi possent. Cic. Verr. 2, 1, 32. Instead of *talis* frequently the form of a qualitative genitive with *modus* and the demonstrative *is* (*ejusmodi*) is used, where *ejus* is the syndetic antecedent of the clause and 'modi' its governing noun: Statuisti exemplum ejusmodi quod (= ut id) acerbum omnibus atque intolerandum videretur. Cic. Verr. 2, 2, 45. This form of the qualitative genitive is frequently used predicatively, like ordinary predicate-genitives, where the *ut*-clause logically has the force of a predicate-genitive, but grammatically is the attribute of 'modi', *ejus* being its

syndetic antecedent: *Quamvis* respublica debet esse ad inimicos neque deesse nocenti possit, neque obesse innocenti. Cic. Verr. 2, 3, 64. Frequently the demonstratives *is*, *hic*, and *ille* are used with the force of the predicate-relative *quomodo*, agreeing with the subject, so that modal clauses are connected with them. The grammatical relation of such clauses is the same as if the governing predicate-relative were expressed: Campi Leontini species *habe* erit *ut* quam obsidum vidisses, and *ut* certum non vererere; The quality of the Leontini land was *such that*, when seen painted, no fear of high corn-prices was entertained. Cic. Verr. 2, 3, 18. — *Ita* C. C. equis modis conditio tibi aratorum, *ut* secum praedicta qui arbitrentur, si viros agros Apronio tradere liceret; The condition of the farmers was *such that* they thought themselves excellently treated if they could convey the unreserved property of their lands to Apronius. Cic. Verr. 2, 3, 39. For the antecedents of causal clauses (*quoniam*, *quod*, *quia*, *quod* etc.) see p. 145. Concessive clauses take the antecedent *tamen*, but only if they form the protasis. See p. 602.

5. Conditional clauses referring to *cause* take no antecedents, except *pl* or *tamen*, if they form the protasis (see 'Conditional clauses'). But, if merely qualifying the predication, they sometimes take the antecedent *ita*, and if referring to *time*, the antecedent *tum*, as: Hoc vehementer te rogo, sed *ita* si, quod ego gessi, non contemnendum videbitur; This I ask earnestly of you, *but on the condition that* (if, = provided that) you do not consider my acts as indifferent. Cic. Fam. 14, 4, 14. — Id ego si fallo, *tum* te quaeso, Amphitruoni ut semper iratus sis; If I deceive, *then* I pray thee to be always angry with Amphitruo. Plaut. Amph. 3, 2, 52. — Hae si ages et senties, *tum* eris magnus consul. Cic. Fam. 10, 6. — Sin, quum potuero, non venero, *tum* erit inimicus. Ib. Att. 9, 2a, 2. — *Tum* ad te scribam plura si erit bellum. Ib. 7, 17, 4. — *Tum* nequicquam Capitolium servaverim si civem meum in servitum duci videam. Liv. 6, 14. Comp. Cic. Att. 7, 18, 3. Div. 1, 44. Rosc. Am. 7; ib. 49. — If conditional clauses are at the same time *comparative*, and refer to *time*, the forms *ut*, *quod*, *quia*, *quod* etc., sometimes occur: Adificis omnibus *ut* peperit, *quod* ad ea defendenda cum exeret, non oppugnanda venisset; He spared all public buildings *in a manner as if* he had come with an army to defend, and not to attack them. Cic. Verr. 2, 4, 54.

For the antecedents of relative and comparative clauses see § 611, R. 4, and p. 714.

6. The syndetic antecedents of PREDICATE-CLAUSES are those general verbs *esse*, *facere*, *dicere* etc.) which form the grammatical predicate of the principal sentence (Obs. 9, 10, 11). They both denote the grammatical function of the clause as that of the *predicate*, and indicate the *general kind* of the action designated by the clause, by anticipating the general verbal idea of the clause, in the same way as the adjective and adverbial antecedents indicate the general idea of the adverbial relation of their clauses. Hence the term *form-verbs* may be applied to these verbs in the same manner as the other antecedents are termed *form-adjectives*, and *form-adverbs*.

## CHAPTER SECOND. RELATIVE CLAUSES.

### I. CLASSIFICATION OF THE RELATIVES, AND RELATIVE CLAUSES.

§ 611. RELATIVE CLAUSES are those which are introduced by a relative adjective or adverb (§ 612), the former belonging to the ATTRIBUTIVE (R. 3, OBS. 13), and the latter to the ADVERBIAL CLAUSES (R. 3, OBS. 12)\*.

\* Relative clauses have a double nature, because every relative adjective or adverb involves two elements: 1) that of a *connective*, namely the relative (originally 'interrogative') root *cu*; and 2) that of a *form-adjective*, or *form-adverb*. In determining the grammatical relation of relative clauses, the 'connective' element must be disregarded, and the question whether relative clauses are to be classed as attributive or as adverbial clauses must be decided by the adjective or adverbial element, and not by the connective element of the relative word. Hence clauses introduced by relative *adjectives* (as far as they belong to the *regular* relative clauses; see Obs. 2) must be classed as *attributive* clauses, since they, grammatically, are directly dependent on a noun expressed or understood, which appears as a *grammatical antecedent*. This is even then the case if the connective element of the relative performs the function of an adverbial *conjunction* (Obs. 2). On the other hand, relative clauses introduced by *adverbs* (except in the case mentioned Obs. 1), must

Every ATTRIBUTIVE relative clause is dependent on a SUBSTANTIVE (noun, or pronoun) of the principal sentence as its grammatical antecedent, by which it is governed like an ordinary attribute. The ADVERBIAL relative clauses are dependent on the PREDICATE or on a non-finite verb of the principal sentence, chiefly denoting the adverbial relation of PLACE, and exceptionally the relations of TIME, and MANNER (§ 616).

OBS. 1. If relative clauses, introduced by relative *adverbs*, are dependent on a NOUN, the introducing adverb always has the force of a relative *adjective* after a preposition. Such relative clauses, being governed by a *noun*, are considered as *attributive*, and not as adverbial, the same as attributive clauses introduced by temporal or modal conjunctions (Rem. 3, OBS. 13), as: Romulum Remumque cupidus cepit in eis locis ubi (= in quibus) expositi erant, urbis condendae. Liv. 1, 6. See 'Local clauses'.

OBS. 2. Clauses introduced by a relative adjective which has the force of an *adverbial conjunction* combined with a *demonstrative adjective* (as *qui* = *ut is*), are grammatically attributive clauses, although they are logically adverbial, as: Verres Messaniam sibi urbem delegerat quam (= *ut eam*) haberet adiutricem scelerum; Verres had chosen the city of Messana for the purpose of having it as assistant in his crimes. Cic. Verr. 2, 5, 62. The Latin conception of the relative adjectives and adverbs was different from ours, in as much as they felt, more distinctly than we do, the two elements contained in the relative (namely the connective, represented by the root *qu*, and the determinative, represented by *is*), as two different relations. From this fact several apparent anomalies must be explained: 1) the ability of the language to assign to the connective element the force of different conjunctions; 2) in that construction which is called 'involution of the relative', in which the connective and the determinative element refer to *different clauses* (see R. 13); 3) in the capacity of the language to use relatives in certain instances without substantive antecedents (R. 8), and even without *any* antecedents

for the following reasons be classed as *adverbial* clauses. Relative clauses introduced by adverbs express the *adverbial idea of place* (§ 546 foll.) (exceptionally also that of time and manner), which is attached to a *verb* (generally the predicate) of the principal sentence. This makes the clause an *adverbial object* of that verb, in the same manner as an *ordinary adverb of place, time, etc.*, according to the definition of adverbs given p. 215, R. 1. Since the grammatical class of the clause is determined by its relation to its governing word in the principal sentence, it follows that clauses introduced by relative adverbs must be considered as adverbial (object-)clauses (R. 2). It is true that in their *syndetic antecedents* (*ibi*—*ubi*) a noun of general import (denoting 'place') is always involved as the exponent of the adverbial idea represented by the clause, and hence it might seem that such relative clauses should be considered as 'attributes' of that noun, as: *Ibi* constitit *ubi* signa aspexit, = *eo loco in quo* signa aspexit. But such nouns, as the exponents of the adverbial idea, and conceived as being in an adverbial case (according to the explanation p. 215, R. 1) are involved in *every* ordinary adverb. If we consider this kind of clauses as *attributes* of the noun representing its adverbial idea, then every ordinary adverb must be likewise considered as an *attribute* of this noun. This would neither be in accordance with the phrase-theory followed in this grammar, nor in accordance with the different logical and grammatical character of attributive and adverbial adjuncts. — From these arguments it will appear that the *relative adverbs* perform the same grammatical function in regard to the relation of the clause, as the *adverbial conjunctions* (*quum*, *ut*, *dum* etc.), and, indeed, some grammarians have classed *every* relative adverb among the conjunctions. From a merely logical standpoint these grammarians are perfectly right, the distinction between both classes of words being a merely formal or grammatical one (*quum* having the force of *eo tempore quo*, and *ut* of *eo modo quo*). But there is this grammatical difference between both classes of connectives, that the *relative adverbs* are always *members of their own clause*, being the adverbial objects of the governing verb in the clause (while the *whole clause* is the adverbial object of a verb in the *principal sentence*). This is not the case with the adverbial conjunctions *quum*, *dum* etc., which are merely connectives, containing no recognizable determinative element, nor forming an *object* in the clause which they introduce. Originally they may have been relative (or rather interrogative) adverbs, and some of them (as *ubi*, *quando*, *ut*) are actually used both as adverbs, and as conjunctions. But in the literary period of the language, the character of these connectives as *adverbs* was no longer felt, and a distinguishing line was drawn between them in the conception of those that used the language. Hence adverbial conjunctions cannot, as the relative adverbs, be used as *interrogative* adverbs, unless they have actually preserved the double nature of *conjunctions and adverbs* (as *quando*, *ubi*, *ut*).

(R. 8, Obs. 7), in which instance the relative sentences lose the nature of clauses, passing over into that of independent sentences.—Adverbial clauses of place are sometimes introduced by relative adverbs which have the force of an *adverbial modal conjunction* blended with a locative demonstrative adverb. Such clauses, being always dependent on nouns, must be grammatically considered as attributive local clauses (like those mentioned in Obs. 1), but logically as adverbial modal clauses, as: Rex Themistocli *Lampsacum* donārat unde (= ut inde) vinum sumeret; The king had presented Themistocles with the city of *Lampsacus* in order to take his wine from there. Nep. Them. 10.—Unum iter erat per Sequanos, angustum et difficile, vix quā singuli carri ducerentur; The one road lay through the territory of the Sequani, narrow and impracticable, so that only one vehicle could pass it at a time. Cæs. B. G. 1, 6 [The locative adverb quā, with its determinative element (ed) refers to the antecedent iter; but its connective element refers to the predicate 'angustum erat', describing its modality].

Obs. 3. Comparative clauses form a subdivision of the relative clauses, and belong, according to the relative by which they are introduced, either to the attributive, or to the adverbial relative clauses. Since they have many peculiarities which are not found in the ordinary relative clauses, they are treated in a particular chapter, being considered here only so far as they are subject to the same general rules pertaining to all relative clauses.

Rem. 4. Relative adjectives belong to any of the five classes of form-adjectives (P. I., § 241; § 369), and relative adverbs to the first four classes. They are: 1) DETERMINATIVE class: *qui*; 2) NUMERAL class: *quot*; 3) QUANTITATIVE class: *quantus*, and its diminutive *quantulus* (always implying a small amount); 4) QUALITATIVE class: *qualis*; 5) POSSESSIVE class: *cujus*, *a*, *um*. These relatives are either doubled, or compounded with *cunque*, to introduce the 'indefinite' relative clauses (see Obs. 7 foll.), corresponding to the English compounds with 'ever', as *quisquis*; (who-soever), *quidquid* (whatsoever), *quotquot*, *quantusquantus*, *qualisqualis* (postclassical); *quicunque*, *quotecunque*, *quantuscunque*, *quodiscunque*, (an indefinite possessive being not formed from *cujus*). To the first four of these classes correspond relative adverbs, namely 1) in the DETERMINATIVE class: the locative form-adverbs *ubi*, *unde*, *quo*, and *qua* (with the compounds *quorsum* and *quatenus*, *ubicunque*, *ubiubi* and the similarly formed compounds of the other locatives), and the compounds *quomodo* and *quemadmodum*, with the indefinite relatives *quomodocunque* and *quocumodo*; 2) for the NUMERAL class *quoties* and *quotiescunque*; 3) for the QUANTITATIVE class the neuter adverbial forms *quantum*, with the compound *quantopere*; 4) for the QUALITATIVE class the rare *qualiter* (not occurring in classical prose).

To these belong as SYNDETIC ANTECEDENTS (correlatives) the different form-adjectives and form-adverbs of the definite form, namely 1) the DEMONSTRATIVES *is*, *hic*, *ille*, *iste*, and *idem*, and the locative adverbs of the definite form (p. 216, No. 2); 2) the NUMERALS *tot*, *totidem*, and the adverb *toties*; 3) the QUANTITATIVES *tantus*, *tantusdem* with the adverbs *tantum*, *tantundem*, and *tantopere*; 4) the QUALITATIVES *talis*, and the postclassical and rare adverb *taliter*.

Obs. 1. The determinative relative *qui* corresponds to the English relatives *who*, *which*, and *that*, except if *qui* has the antecedent *idem*, when it is rendered 'as' (see 'Comparative Clauses'). An omission of the relative, as in English when the relative is in the objective case, is not admissible, as: Dum milites quos imperaverat convenirent; Till the soldiers he had ordered would assemble (not 'milites imperaverat convenirent'). Cæs. B. G. 1, 7.—For the rendering of the relative 'what' see R. 6, Obs. 2.

Obs. 2. The dual form *uter* is relatively used only with the force of *utercunque* (which or whosoever of the two), as: Horum utro uti volumus, altero est utendum; *whichever* of these two we refuse to use, we must use the other. Cic. Sest. 42.—*Utrum* eorum accideret, verum oraculum fuisset; *Whichever* of the two alternatives would have happened, it would have been a true oracle. Cic. Div. 2, 56.

Obs. 3. The relatives of the numeral, quantitative, and qualitative classes (and sometimes the determinative *qui*, chiefly belong to comparative clauses, being always expressed by the English comparative conjunction 'as'. But sometimes, if the noun denoting the general idea of their class (number, quantity, quality) is understood as their governing noun, they are used with the force of an English ordinary relative, as: Navi, quæ circum LXXX onerandis contractis, quæ = *quam numerum* satis esse ad duas transportandas legiones existimabat; Having collected about eighty transport ships, *which* (number) he considered sufficient for conveying two legions. Cæs. B. G. 4, 22.

Obs. 4. As in place of the qualitative *talis* the qualitative genitives *cujus modi* are frequently used (R. 3, Obs. 15, No. 4), so their relative form *cujusmodi* occurs as equivalent of *quæ*, always including its syndetic antecedent *cujusmodi*, and rendered by 'such as': Antilem *cujusmodi* de ipso jure civiti hesternio die Crassus componi posse dicebat; An artificem *hæc* = *hæc artificum quæ*, or *cujusmodi artificum* *cujusmodi* Crassus yesterday said might be devised even in regard to the civil law. Cic. Or. 2, 19, 83. Similarly in place of the postclassical qualitative adverb *qualiter*, the determinative compounds with *modus* (*quomodo*, *quemadmodum*) are used.

Obs. 5. The relative adjective of the possessive class, *cujus*, *a*, *um* (rendered by the possessive case *whose*) is sometimes used in anteclassical language, and in old legal formulas, with the force of the genitive *cujus* of the relative *qui*, as genitive of the possessor (§ 466), generally with the syndetic antecedent *is*, as: Illa consuetudo, in prædiis vendendis, omnium consulum, censorum, prætorum, ut in optimâ conditione sit *is* *cujus* res, *cujus* periculum; That usage, at the public sale of real-estate, of all consuls, censors, and prætors, that *he to whom* the property, *to whom* the risk belongs, is in the 'best condition' (i. e. is favored by the law). Cic. Verr. 2, 1, 54.—Argentum, pro ambabus, *cujus* erant domino dedi; I have given the money for both (female slaves) to the master to whom they belonged. Plaut. Rud. 3, 4, 40. Comp. Plaut. Pseud. 4, 4, 5.—It is also used by Plautus in connection with the ablative *causâ* (*cujâ* *causâ*, for whose sake), and in Cic. Fragm. Var. (probably in the language of an old legal formula) as ablative of interest (*cujâ* *interfuit*, whose interest it was).

Obs. 6. In the INFLECTION of the relative (and interrogative) adjective *qui*, the forms of the second declension are mingled with those of the third. The original characteristic of the second declension appears in the forms *quo* (abl. sing.), *quorum* (gen. plur.), *quos* (acc. plur.), and in the anteclassical forms *quæus* (inst. of *cujus*), and *quæi* (inst. of *cui*).—In place of the ablative sing. *quo* (rarely for the feminine *quâ*) the form *quî* is sometimes used, mostly with the preposition *cum* (*quicum* = *cum quo*). Archaic forms after the third declension are found in the nominative and accusative plural (*ques* or *quæis*, inst. of *qui* or *quos*), and in dat. and abl. plur. (*quîs* or *quæis* instead of *quibus*, sometimes found in Sallust).—If the relative *qui* is used as prepositional object, it sometimes precedes the preposition, as *Causa, quâ* de ante dictum est; The subject 'of which' it has been spoken before' (i. e. the subject mentioned before). Cic. Inv. 2, 23, 70.—De eo crimine *quo* de arguitur; On the crime concerning which the accusation is made (i. e. on the crime charged). Cic. Inv. 2, 11, 37.—Ille *quem* contra veneras; He against whom you had appeared. Cic. Mur. 4.—Leges *quas* contra nemo est facere cõatus; The laws against which nobody dared to act. Cic. Vatin. 7.—Illius periculum *quem* propter hæc ipsa studia diligebat; That man's danger for the sake of whom he loved these very pursuits. Cic. Cæl. 22, 54.—This order of the words is frequent if the relative is used as the attribute of a prepositional noun, and the preposition is monosyllabic, as: *Quorum* in finis Romani exercitus introduxissent; In whose territory the Romans had introduced an army. Cæs. B. G. 2, 10.—*Quo* in loco Ambiorix esse dicebatur; In which place Ambiorix was said to be. Cæs. B. G. 6, 30.—(Ei) *quorum* de pœnâ agebatur; Those whose punishment was in question. Liv. 5, 36.—*Quibus* de rebus ad me scripsisti; On which things you have written to me. Cic. Att. 12, 34.—Here belong the coordinating adverbial expressions *quâ* de causâ, *quam* ob causam, *quamobrem*, *quemadmodum*.—The preposition *cum* is mostly attached to the relative as a suffix (*quocum* or *quicum*, inst. of *cum quo*; *quibuscum*, instead of *cum quibus*). Rarely the common order *cum quo*, and *cum quibus* is met with (as in Liv. 1, 58; Nep. Att. 5; Liv. 4, 5).

Obs. 7. Those relatives which are either doubled, or compounded with *cunque*, are called 'INDEFINITE RELATIVES', and the clauses introduced by them are called 'INDEFINITE RELATIVE CLAUSES'. These clauses are exponents of the idea 'all' or 'every', as applied to circumstances given, or to things or persons mentioned, and represent the principal predicate as holding good if any of the single acts contained in the general idea 'all' or 'every' is assumed as real or true. Hence these clauses always imply a 'contingency', and perform the same part among the clauses of the relative form, as the conditional clauses among the clauses introduced by *conjunctions*. They correspond to English clauses introduced by the different relative or interrogative compounds with 'ever' (whosoever, whichever, whatever; how much soever, whenever etc.), as: (Lacedæmon

bonis regibus uti non potuit) quum esset rex habendus *quicumque* genere regio natus esset; Lacedaemon could not have good kings since, *whoever* was born of royal blood was to be made king (to be had as king). Cic. Rep. 1, 33, 50. [The principal predicate, 'the having as king' holds good in regard to every person in whom the condition of royal blood existed, = *if* any was born etc.] *Quoscumque* de te queri audi, *quacumque* potui ratione placavi; *Whomsoever* I heard complain of you, I appeased in *whatever* way I could. Cic. Qu. Fr. 1, 2, 2 [The '*placare*' holds good in regard to any person complaining (*if* any person complained), and in regard to any method applied for the purpose of '*placare*'].—Quod, *quibuscumque* verbis dixeris, facitum tamen est, re continetur; What is witty in *whatever* words you may express it, is a witticism contained in the subject itself. Cic. Or. 2, 62 [= *if* you choose *any* of the different forms of expression possible; or '*although*' you change your expression in every possible manner].—Ego, *quidquid* est in me studii, *quidquid* auctoritate possum, vel omne tibi defero; *Whatever* zeal is in me, *whatever* I can do by my influence, even all this I place at your disposition. Cic. Leg. M. 24, 69 [= *sive* multum possum, *sive* non multum; *Whether* my influence is small or great, or '*although* my influence may be small'].

Obs. 8. The indefinite relative clauses differ in several respects from ordinary relative clauses:

1) The introducing relatives have the nature of both *relative* and *indefinite* adjectives and adverbs. Wherever the form of the relatives is different from that of the interrogatives, they almost always follow in their formation the interrogative, not the relative form, the same as the indefinite *quis*. *Quisquis* and *quidquid* have, like the indefinite *quis*, the form of the INTERROGATIVE *quis*, not that of the relative *qui*, lacking the feminine, and the form *quod*, although *quicumque* takes the relative form *quodcumque*, not the interrogative form *quidcumque* if used absolutely. Thus the composition with *cumque* is applied to the adverbs *quando* (*quandocumque*\*), and *ut* (*utcumque*), which occur only as *interrogative*, not as relative adverbs (and as adverbial conjunctions), as: *Aequis Volscisque, quandocumque* se moverint, ab tergo erimus. Liv. 7, 30. Hence both, the compounds of *cumque*, and those with doubled forms, occur as pure indefinites without any junction as connectives, as: *Bestiae, ut quidquid* (= *ut quidque*) objectum est, non querunt amplius; Animals, when *anything* is thrown to them, do not look any further. Cic. Tusc. 5, 34, 98.—Ita odorabantur omnia et pervestigabant ut, ubi *quidquid* esset, aliqua ratione invenirent; They scented and rummaged all things in a manner that they found out in some way where *everything* was (or: that, where there was *anything*, they were sure to find it). Cic. Verr. 2, 4, 13.—*Quidquid* erit igitur *quacumque* (= *ullo*) ex arte, *quocumque* (= *ullo*) de genere, id orator dicet melius quam ipse ejus rei inventor; Whatever there will be, pertaining to *any* art, or to *any* sphere, an orator will express it better than even the inventor. Or. 1, 12, 51.

2) The indefinite relatives have in so far the nature of ordinary relatives, as the interrogative (or indefinite) element *qu* is used as a *connective* with the force of a conjunction; but the indefinite relative *adjectives* differ from ordinary relative *adjectives* in regard to the *antecedent*. The latter always depend on their principal sentence by means of their grammatical *antecedent*, which is a member of the principal sentence, while the *indefinite* relative *adjectives* do not require a grammatical antecedent, being directly dependent on the *predication* which they qualify in the manner of *conditional clauses* (Obs. 7; R. 3, Obs. 12, B); as: (Frater meus) mihi, *quascumque* res gerit, tuendus est; I must take the part of my brother *whatever* things he may do (whatsoever his actions may be). Cic. Fam. 1, 9, 18. Here *res*, the governing noun of *quascumque* cannot be made the antecedent of the latter, and cannot, in any form, be conceived to be a member of the principal sentence. The clause '*quascumque* res gerit' performs the same functions as a conditional clause (= at all events, *sive* hoc, *sive* aliud quid agit; *even if* he acts unreasonably). Both, conditional and indefinite relative clauses belong to the clauses expressing a 'contingency', the former expressing *either* a definite or indefinite (*si quis*) contingency; and the latter only an *indefinite* contingency. Hence both kinds of clauses may be *coordinated* with each other, which, according to p. 475, No. B, is only admissible if both clauses belong to the same class, as: Fateor me oratorem *si modo* sim, aut etiam *quicumque* sim, ex Academiæ spatiis exstitisse; I acknowledge that I, as an orator, *if I am such*, or I may even say '*whatever* orator I am', have proceeded from the halls of the Academy; (= that I am owing whatever I am as an orator to what I have learned in the Academy). Cic. Or. 3. Here the *conditional* clause leaves the question 'whether he is an orator or not' undecided; the *indefinite relative* clause removes this uncertainty, but leaves the question 'about his rank among the orators' undecided. By removing *even* this uncertainty, the clause must assume an ordinary relative, or a concessive form.

\* The use of *quandocumque*, however, is rare, and generally '*quocumque tempore*', or '*quoquo tempore*' is used in place of it as: *Quocumque tempore* mihi potestas praesentis tui fuerit tu eris moderator consiliorum meorum. Cic. Fam. 1, 9, 22.—*Quoquo tempore* fuerit. Cic. Att. 9, 2.

3) On account of the different grammatical nature of ordinary and indefinite relative clauses, the latter do not follow the rules of the former in regard to the *mood* of their predicate (§ 614). The mood of the indefinite relative clauses is almost *always* the *INDICATIVE*, as in conditional clauses proper (in which the condition is represented as an undecided fact), unless the subjunctive is required by the general rules on dependent subjunctives (p. 385 foll.), while in English the *potential* is generally used. See Ex. Obs. 9.

Obs. 9. The two forms of the indefinite relatives by *cumque* and by doubling the simple indefinite are thus distinguished:

1. *Quisquis* and *quidquid* in the nominative and accusative are only used *ABSOLUTELY*, being either in the masculine or neuter gender, according as the noun of general import understood is a person or thing (§ 354)\*; but *quicumque* is used absolutely, disjunctly (§ 364, 367), and attributively with its governing noun expressed, as: *Quicumque* is est, ei me profiteor inimicum; *Whoever* he is, I profess myself his enemy. Cic. Fam. 10, 31, 3.—Fiet *quodcumque* volent qui valébunt, valébunt autem semper arma; *Whatever* those wish who have the power, will be done; but the power will always be with the arms (arms will always have the power). Cic. Fam. 9, 17, 8.—Plus attulit huic populo dignitatis, *quisquis* est ille, si modo est aliquis, qui etc.; He who etc., *whoever* he is, if else he is anyone, conferred more dignity on this people etc. Cic. Brut. 73.—*Quidquid* ei commendaveris, erit id mihi gratum; *Whatever* you will recommend to him, will be acceptable to me. Cic. Fam. 13, 16, 4. Both, *quodcumque* and *quidquid* may take *partitive genitives*, meaning either '*whatever*' or '*all*' with the Latin partitive genitive as governing noun, or literally '*whatever part of*', when the proviso '*if any*' is often understood, as: Te hoc existimare volo, *quidquid* in eum officii contuleris, id ita me accipere ut in me ipsum te putem contulisse; I wish you would rest assured that, *whatever service* (every service, if any) you may do to him, will be so taken by me that I consider it as done to myself. Cic. Fam. 10, 1, 4.—Vos hortor ut *quodcumque* militum contrahere poteritis, contrahantur; I exhort you to collect *whatever soldiers* (all soldiers, if any) you can collect. Pompej. ad Cic. (Att. 8, 12, A, 4).—Principibus Gallorum placuerat, non omnia concremari tecta, ut *quodcumque* superesset urbis, id pignus ad flectendos hostium animos haberent; The chiefs of the soldiers had resolved not to have all the houses burnt, that *whatever part* of the city would be left, might be a pledge in their hands (literally: 'they might have whatever part etc. as a pledge') to bear on the resolutions of the enemy. Liv. 5, 42. See Ex. 1-3. The ordinary relative *quod* is likewise used with a partitive genitive in the meaning '*all*', but without the accessory idea of '*if any*', and without any uncertainty about the amount, as: Ex ipsa Diana *quod* habebat auri detractum esse dico; I assert that from the very statue of Diana *all the gold* it had was taken off. Cic. Verr. 2, 1, 20.

2. *Quidquid* is never used in any oblique case except the accusative, and never in the plural; *quisquis* is never used in the feminine, and never in the genitive or dative singular; nor is it used absolutely in the ablative singular (except sometimes in postclassical language); but it frequently occurs in this case as attribute of nouns denoting things (not persons), as: Quis est qui, *quoquo modo* quis interfectus sit, puniendum putet; Who is there that holds the opinion that a punishment should be inflicted, in *whatever manner* a person may have been killed. Cic. Mil. 3.—Gabinus illud, *quoquo consilio* fecit, fecit certe suo; With *whatever intention* Gabinus may have done this, he has certainly done it with his intention. Cic. Rab. Post. 8. For the use of *quocumque modo* and *quomodocumque* see No. 10.—*Quisquis* is never used in the plural, except in a single passage of Livy as an ordinary indefinite: Liberos suos *quibusquibus* Romanis mancipio dabant; They gave their children into slavery to the *first Roman that would offer*. Liv. 41, 8\*\*. In all the cases in which *quisquis* is excluded, *quicumque* is used; but there are no examples extant of the form *quorumcumque*.—Sometimes the suffix *cumque* is separated by one or two words from *qui* (also from *qualis* and *quantus*. Ex. 16), as: Socrates omnium testimonio, *quam se cumque* in partem dedisset, omnium fuit facile princeps; Socrates unquestionably was the foremost of all, in *whatever direction* he might apply himself. Cic. Or. 3, 16, 60.—*Quicumque* is rarely used as an ordinary indefinite, without the force of a connective, mostly as adverbial ablative with *ratio* and *causa*, but also in other connections (Ex. 12), as: Quae sanari poterunt, *quacumque ratione* sanabo; What can be healed, I shall heal in every way possible (where *potero* must be supplied). Cic. Cat. 2, 5.—Qui de *quacumque causa* aspernati nostra auxilia estis; Who despised our help from some reason or other (= *nescio quā causā*, or '*de causā aliqua, quacumque ea erat*).

\* In anteclassical language *quisquis* is sometimes used attributively with *homo*.

\*\* In the passage in Cic. Sext. 45, which is generally used in the lexicons to prove the use of *quisquis* in the nom. plur., the reading *quique* rests on no other authority but an old printed edition of Cicero's works, where it first occurs. The manuscripts give *qui*.

Liv. 45, 23.— Si quid erit, magnum est adjumentum, sin minus, *quacunque ratione* contendamus; If there will be anything, it will be a grand help; if not, we will shift along in one way or other. Cic. Att. 12, 29, 2.

3. *Utercunque* (but not *uteruter*) is used as an indefinite relative in the meaning 'whichever of the two', as: Nullum bellum civile fuit, in quo bello non, *utracunque* pars vicisset, tamen aliqua forma esset futura rei publicae. Cic. ad Brut. 1, 15, 10.— Copiae ita paratae ad dimicandum esse dicuntur ut, *utracunque* vicerit, non sit mirum futurum. Cic. Fam. 6, 4, 1.— In place of the lacking *uteruter* frequently the single *uter* is used with the force of *utercunque*, as: Senatus a se rem ad populum rejecit; *utri* eorum dedicatio jussu populi data esset, eum praesse annuae jussit; They decreed that to *whomsoever* of the two the dedication would be given, the same should be prefect of provisions. Liv. 2, 27.— Facile convenit inter Romanos Latinosque, *utrius* partis T. Manlius dux fuisset, ejus futuram haud dubie fuisse victoriam; The Romans and Latins perfectly agreed, that *which so ever* of the two parties T. Manlius would have commanded, the victory would have unquestionably belonged to it. Liv. 8, 10. See Ex. 13.

4. Both *quotquot* and *quotecunque* (being indeclinable) occur in the meaning 'how many soever', 'however many or few', 'whatever number of'; but both are extremely rare, as: Si leges duae, aut *quotquot* erunt, conservari non possint; If two laws, or *how many soever* there will be, cannot be preserved. Cic. Inv. 2, 49.— *Quotecunque* occurs only once in the language of the law: *Quotecunque* senatus creverit, tot sunt. Cic. Leg. 3, 3. In place of *quotquot* and *quotecunque* the neuters *quidquid* and *quodcunque* with partitive genitives (even of persons) are generally employed: *Quidquid* in castris perditurum fuit; Whatever number of desperadoes was in the camp. Cic. Fam. 10, 23.— See No. 1, and Ex. 4, 11.— The adjective *quotuscunque* occurs only in the meaning of an ordinary indefinite without any connective force; it is extremely rare, and only poetical.

5. Of the quantitatives, the forms *quantusquantus*, *quantuscunque* (both in the meaning 'how much so ever', 'how great so ever'), and *quantuluscunque* (how little so ever) are in use, *quantusquantus* being rare. They occur both as attributes, and in the neuter singular with partitive genitives, according to the general rules on quantitative adjectives (§ 264). The doubling of *quantulus* belongs to Apuleian Latinity. Dejotari copias, *quantulacunque* sunt, nostras esse duco; Dejotarus's troops, how much so ever there is of them (see P. L., p. 187 R. 4, 5), I believe to be ours. Cic. Fam. 15, 1, 6.— Decius *quantumcunque* virum habuit, primo certamine effudit; How great soever Decius's strength may have been, he spent it in the beginning of the battle. Liv. 10, 28.— *Quantumcunque* humoris est; How much liquid soever there may be. Col. 12, 25.— Procura, *quantulacunque* est, Precianam hereditatem; Take care of the Precius estate, left to me by will, how small so ever it may be. Cic. Att. 6, 9, 2.— *Quantiquanti* (i. e. emitur), bene emitur quod necesse est; What is necessary, is bought cheaply (is cheap), at whatever (how so ever great) price it may be bought. Cic. Att. 12, 23, 3.— See Ex. 14-16.— Frequently *quantumcunque* occurs with *possum* (= *quantumcunque* *facere* *possum*) as a formula of modest assertion (as much as I can, to the best of my ability) in place of the simple relative *quantum*, to represent the ability of the speaker as an unknown and questionable 'quantity', as: Debeo, *quantumcunque* possim, in eo quoque elaborare; I should devote my work, as much (as far) as I am able, also to this subject. Cic. Fin. 1, 4, 10.— The idea 'however great' may also be expressed in the form of a concessive clause (see p. 693) with *quamvis* *magnus* (in place of *quantuscunque*), which always requires the predicate in the subjunctive: Expectatio *quamvis* sit magna, tamen eam vinces; *However great* our expectation may be, you will still surpass it. Cic. Rep. 1, 23.— This form of the concessive clause must be always used if the quantitative idea 'how so ever' refers adverbially to the intensity of adjectives. See No. 9.

6. In the qualitative class, *qualisqualis* belongs to late Latinity, but *qualiscunque* is classical, occurring in the meaning 'of whatever quality, character, nature, or kind'. It is often replaced by *quicunque*. Primum quidque, *qualiscunque* erit, continuo scies; You shall know the very first news, of *whatever kind* (nature) it may be. Cic. Att. 10, 12, 6.— Is est Epicureus non penitus illi disciplinae, *quaecunque* est, deditus; This Epicurean is not wholly given to that system, of *what kind soever* it may be (i. e. *whatever* may be its character).— Ex. 17, 22.— Instead of *qualiscunque* sometimes the qualitative genitive *cuiusmodi* (instead of *cujuscujusmodi*, which is not found) occurs, as: Cogitandum tibi fuit, Romae, *cuiusmodi* res essent, an Rhodi malle vivere; You had to consider, whether you would rather live at Rome, *whatever the condition* of affairs might be (literally: of whatever kind the affairs might be), or at Rhodes. Cic. Fam. 4, 7, 4.— *Cuiuscunque modi* with the meaning of *qualiscunque* is used *attributively*, while *cuiusmodi* only occurs *predicatively*; as: *Cuiuscunque* enim *modi* animal *constitueris*; For 'an animal of whatever kind' you may assume (= whatever kind of an animal you may assume). Cic. Fin. 4, 11, 28.

7. The LOCATIVE ADVERBS formed from the determinative *qui* (*ubi*, *unde*, *quo*, and *qua*),

if used as indefinite relatives, mostly occur in composition with *cunque* (*ubicunque* etc.), but also (though rarely) in the doubled forms *ubique*, *quoquo*, *quaque*. Neither *unde*, nor *undecunque* occur in classical prose, instead of which, attributive phrases (*ex quocunque loco*) are used. The locative adverbs are used in these forms according to the rules of the locative cases (p. 217 foll.), being rendered like the simple relative adverbs with the addition 'soever': *Ubicunque* Patricius habitat, ibi carcer privatus est; *Where-soever* a Patrician lives, there is a private jail. Liv. 6, 36.— *Ubiubi* sit animus, certe quidem in te est; *Wheresoever* the soul may be, it is certainly in you. Cic. Tusc. 1, 29.— *Quocunque* te ratio reipublicae ducet, sequar; I shall follow you *whithersoever* (i. e. to any place so ever to which) the interest of the republic will lead you. Cic. Fam. 10, 16, 2.— *Amoris tui, quoquo* me verti, vestigia (i. e. video); I see the footprints of thy love *whithersoever* (in what direction soever) I may turn. Cic. Fam. 7, 24, 1.— *Romam se ire significabant, quicunque* (not *ubicunque*) ibant, immensum obtinentes loci; They expressed by their gestures that they were marching on Rome occupying an immense space *wherever* they marched. Liv. 5, 37.— See Ex. 18.— Sometimes the accusative neuter *quidquid* is used as an accusative of place to express the indefinite relative adverbial idea 'how far soever': *Quidquid* progrediebantur, magis magisque turbatos hostes cernebant; *How far soever* they came on their march, they perceived the enemy more and more in disorder (perceived the gradually increasing disorder of the enemy). Liv. 8, 39. See Liv. 7, 32.— Sometimes the interrogative adverb *quando* is compounded with *cunque* in the meaning 'whensoever', (*quandocunque*), but this compound is not found in classical prose, the idea 'soever', applied to time, being generally not expressed by the form of the adverb, but by the tense and mood of the predicate (see p. 329, Obs. 1), so that the same temporal conjunctions (*quum*, etc.) are used for the designation of both definite and indefinite time. Whenever it is required to place a particular stress on the idea 'soever', attributive phrases with *quocunque tempore* or *quoquo tempore* are used, as: *Quocunque tempore* mihi potestas praesentis tui fuerit, tu eris omnium moderator consiliorum meorum; At *what time soever* (whensoever) it will be possible for me to see you, you will be the guide of all my actions. Cic. Fam. 1, 9, 22. See Ex. 7.

8. In the NUMERAL class, the adverb *quotiescunque* (not *quotiesquoties*) frequently occurs in the meaning 'how often soever', as: Litteras ad me mittas *quotiescunque* habebis cui des; Send me letters *how often soever* you may have somebody by whom to forward them. Cic. Fam. 16, 11, 3. See Ex. 19. The simple adverb *quoties*, likewise, has always the meaning of an indefinite relative, but is used with less stress than *quotiescunque*.

9. In the QUANTITATIVE class, indefinite relative adverbs are not formed by composition with *cunque*. If the idea 'however much' is applied to *quantum* as an adverbial idea (intensity), the clause takes the form of a 'concessive clause', the quantitative interrogative adverb *quam* being not compounded with *cunque*, but with *vis* (*quamvis* instead of *quancunque*, which is used in every respect like a conjunction; see Obs. 11). The adverb *quam* in the doubled form (*quamquam*) which, according to the analogy of the other indefinite relative adverbs, should have the meaning 'how ever much', is only used as an ordinary concessive conjunction, meaning 'although'.—*Quamvis* (however much) always requires its predicate to be in the subjunctive.

10. The QUALITATIVES *qualitercunque* and *qualiterqualiter* are postclassical. In their place the interrogative adverbs of manner *quomodo* and *ut* are used in the following forms: 1) *quoquomodo* (see No. 2); 2) *quocunque modo*; 3) *quomodocunque*; 4) *utcunque*; 5) *utut* (more rarely than *utcunque*), all with the meaning 'in what manner, way, or style soever', 'how soever', as: Hoc quum in amicitia dicitur, *quomodocunque* dicitur, intelligi tamen quid dicatur potest; If this be said with reference to friendship, we can at least understand what is meant, in *whatever manner* it may be said (i. e. even if it were not quite properly expressed). Cic. Fin. 5, 11, 30.— *Utcunque* haec inciderint, bonum animi habet; *How so ever* this will happen, be cheerful! Liv. 45, 8.— *Utut* sit res, casus consilium nostri itineris iudicabit; *How so ever* this is (be it as it may), chance will dictate the plan of our journey. Cic. Att. 15, 25, 1.— *Utut* (others read a simple *ut*, which would not be proper in the passage) est, indulge valetudini; *Be it as it may*, take care of your health. Cic. Fam. 16, 18, 1.— Often *utcunque* is used in the comparative meaning 'according to', denoting uncertainty of the chance, as: *Utcunque* res postularet, *according as* circumstances would require. Cic. Fin. 5, 4, 11.— Ad hac revocetur oratio, sed *utcunque* aderunt; To these subjects our discourse must return, but *according as* the audience (qui aderunt) is. Cic. Off. 1, 37.— *Utcunque* in alto ventus est, exin velum vortitur; *According as* the wind is on sea, (according to that) the sail is turned. Plaut. Ep. 1, 1. Thus *utcunque* in the passages Hor. Od. 4, 4, 35; 2, 17, 11; 3, 14, 29 must be understood, although in these passages it is generally interpreted = *quandocunque*.

11. Adverbs of CAUSE are not used as indefinite relative adverbs, this relation, if the cause is represented as indefinite, being expressed by attributive phrases with *quicunque* (*quacunque ratione*, *quacunque de causa*, *quocunque consilio*).

Obs. 10. In indefinite relative clauses four grammatical forms may be distinguished :

1. Those clauses which have *grammatical antecedents* in the principal sentence. In these the indefinite relative agrees with its antecedent according to the rules in regard to ordinary relatives (§ 612), as: *Ego vos in omni fortūnā, quaecunque erit oblata, complectar*; I shall embrace you in every *fortune*, *whatsoever* will be offered. Cic. *Sest.* 63, 146. [The indefinite relative *quaecunque* agrees with its antecedent *fortūna*, as if it were an ordinary relative: *fortūna quæ erit oblata*.] — *Ut animos eorum ad quemcunque causâ postulabit motum vocemus*; That we may call their hearts to *whatever* emotion the case will require (ad motum quemcunque causâ postulabit). Cic. *Or.* 2, 27, 115. — The antecedent may be *understood* as a noun of general import (persons or things in general), in which instance it may or may not be implied in an absolute form-adjective in the principal sentence, as: *Quoscunque de te queri audivi... placavi* (= homines, quoscunque nudavi, placavi); I appeased *every person* complaining of you. Cic. *Qu. Fr.* 1, 2, 2. — *Ut, quodcunque maxime probabile occurrat, id no- tro jure liceat defendere*; That we have a right to defend *whatever* truest thing (= whatever truth) may present itself; (= rem probabilem, quæcunque occurrat). Cic. *Off.* 3, 4. The grammatical antecedents of the nominatives and accusatives of *quisquis* and *quidquid*, in classical language, are always conceived as nouns of general import, either understood or implied in the syndetic antecedent, *id*, as: *Promitto, quidquid erit a te factum, id senatum comprobaturum*; I promise that the Senate will approve of whatever will be done by you (= omnis res quæ a te factæ erunt). Cic. *Fam.* 10, 16, 2. — *Posthac quidquid scripsero, tibi preconium deferam*; Whatever I may write hereafter, I will let you do the advertising of it (= ejus rei or libri, quæcunque or quemcunque scripsero). Cic. *Att.* 13, 12, 2.

2. The grammatical antecedent, logically belonging to the principal sentence, may be taken over into the clause as the governing noun of the indefinite relative (the same as in ordinary relative clauses). In this instance the relative clause *always* precedes the principal sentence, the principal sentence being almost always introduced by a *syndetic* antecedent (*is, hic, ille* etc.) of the indefinite relative, which agrees with the governing noun of the relative in number and gender, but is placed in that case which the *grammatical* antecedent would require if it were expressed in the principal sentence: *Sapientia aciem in omnis partibus aciem intendit, ut, quemcumque casum fortuna invexerit, hunc apte et quiete ferat*; A wise man has so keen an eye for all eventualities that he decently and quietly bears *whatever chance* fate will entail (= *hunc casum quemcumque, or omnem casum quem*). Cic. Tusc. 4, 17, 38. See Ex. 20. 21.

3. The governing noun of the indefinite relative may *not* belong to the principal sentence, so that the clause is *without any grammatical antecedent*, simply referring to the *reality of the principal predicate*, representing the latter as true in whatever way the uncertainty implied in the clause may be verified. Such clauses, which cannot be represented, even by a syndetic antecedent, in the principal sentence, have a strong resemblance in their form with clauses introduced by conjunctions, passing over into conditional and concessive clauses (Obs. 11): Ut *quaecunque dissidentium philosophorum sententia de finibus sit*, tamen virtus satis habeat ad vitam beatam praesidii; So that, *whatever the opinions of dissenting philosophers may be on the limits (of good and evil)*, virtue has sufficient power (is a sufficient stronghold) for a happy life. Cic. Tuscul. 5, 29 (= *Quamvis philosophi dissident, tamen etc.*; *However much philosophers may dissent; or: Although their opinions are extremely diverging, it will always be true that etc.*).

4. The fourth form of indefinite relative clauses is the adverbial form, if they are introduced by indefinite relative *adverbs*. Such clauses have in every respect the same nature as those introduced by the corresponding simple relative adverbs, only that the adverbial relation is always represented as an indefinite contingency.

Obs. 11. All indefinite relative clauses, since they express a contingency both as indefinite and uncertain, partake of the nature 1) of **CONDITIONAL** clauses, which express a contingency as uncertain, and *either* as definite or indefinite; 2) of **CONCESSIVE** clauses which express a contingency either as definite and certain, or as indefinite and uncertain. Hence each of these three kinds of clauses pass over into each other, and often the same thought may be expressed in the form of any of these three clauses. Here belong conditional clauses with *si quis*, or with *si maxime*; the disjunctive clauses introduced by *sive... sive*, which belong to both the conditional and concessive clauses; and concessive clauses introduced by *quoniam*, as: *Que si maxime meminissem, tamen illius temporis similitudinem jam sequi deberem*; *If I remembered this ever\* so well,*

\* This particle 'ever' is evidently the same indefinite 'concessive' particle which is used in the rendering of all indefinite relative clauses. Many grammarians and authors, not comprehending the force of this particle, have substituted for it the absurd negative particle 'never'. These would render: 'If I remembered this *never* so well', making thus 'never' an adverb of *time*, which would introduce in this construction a relation wholly foreign to it.

would nevertheless now be bound to follow the precedents of that time. Cic. Att. 9, 13, 3. [The clause '*quæ si maxime meminissem*' may be expressed in the form of a concessive clause '*quamvis ea meminissem*', which, according to Obs. 9, 9, has the force of an indefinite relative clause. The clause may also be expressed as an indefinite relative clause in the form '*Quidquid de ea re meminissem*'.—Errant *si qui* in bello omnis secundis rerum eventus expectent. Cæs. B. G. 7, 29 (= *quicumque* expectant).—Tu melius existimâre vidêris de eâ, *si quam* nunc habemus, facultâte. Cic. Brut. 87 (= de eâ. *quamcunque* habemus, facultâte). The difference between clauses with *si quis* and *quicumque* or *quisquis* may be seen from the following passage : Scribas *si quid*, vel potius *quidquid* veniet in mentem; I wish you would write *if* you think of anything, or rather *whatever* you can think of. Cic. Att. 9, 19, 4.—Sed sint *quamvis* boni, non essent meliôres quam nos. Cic. Att. 9, 13, 6 (= *quamvis* sint boni, or *si maxime* boni sint, or *sive* boni sint, *sive* minus ; or *qualescunque* sint).—*Quamvis* prudens ad cogitandum sis, tamen, nisi magnæ tibi curæ essent, nunquam ea res tibi tam belle in mentem venire posset. Cic. Att. 12, 37, 2 (= *si maxime* sapias ; or *quantacunque* tua prudentia sit ; or, expressed without indefiniteness : *Quamquam* es prudentissimus).—Veniet tempus mortis *sive* retractâbis, *sive* properâbis. Cic. Tusc. 1, 31 (= veniet *si* retractâbis, veniet *si* properâbis ; or veniet *quamvis* retractâbis, or *quidquid* facies ut retractes aut properes).—Hence clauses with *sive*—*sive* are used as explanatory coördinated or indefinite relative clauses : Sed *ulcunque* (i. e. sit), seu injuncta seu suscepta foret militia, finem aliquem militandi fieri æquum esse (dixit) ; But *be this as it may, whether* the military service was a compulsory, or a voluntary one, etc. Liv. 32, 3.—On account of this logical identity of concessive and indefinite relative clauses, concessive clauses with *quamquam* (by doubling the interrogative *quam* in the manner of an indefinite relative), have even the same external form as indefinite relative clauses, while those introduced by *elsi* borrow the form of conditional clauses.

Obs. 12. The regular mood of indefinite relative clauses is the INDICATIVE, the rules on the mood in ordinary relative clauses (§ 614) being not applicable to this kind of clauses; while in English the potential with *may* or *might* is regularly used in these clauses. But the subjunctive is used 1) if such clauses may be resolved into hypothetical clauses with preterite subjunctives, as : *Ubicumque essem*, unā cum eis victus essem; *Wherever I were*, I would be defeated together with them. Cic. Att. 7, 3, 2. [If the indefiniteness is removed from this clause, it becomes a hypothetical clause '*Si ibi essem*, victus essem.] See Ex. 20.— 2) Sometimes subjunctives are used in clauses introduced by doubled relative adverbs (*utut*, *ubiubi*), according to the analogy of concessive clauses introduced by *quamvis*, as in the passage, Cic. Tusc. 1, 29 (quoted Obs. 9, 7); and Att. 15, 25 (quoted Obs. 9, 10).— 3) In post-Ciceronian Latin the subjunctive is frequently used in all clauses denoting an indefinite past contingency, as : *Quemcumque* licitor prehendisset, tribunus mitti jubebat. Liv. 2, 11. See p. 331.— In some passages, the subjunctive rests on inferior readings, as in the passage Cic. Top. 21, where the vulgata '*quicumque de re sint*', according to the manuscripts, must be changed into *sunt*.

These exceptional subjunctives must be distinguished from those subjunctives which, according to the general rules (p. 385 foll.), must be used in *all* dependent clauses. Thus a quasi-oblique subjunctive occurs in the passages Cic. Or. 3, 16, 60 (quoted Obs. 9, 2); suboblique subjunctives in Liv. 2, 27 (quoted Obs. 9, 3), and in Ex. 13, 14; quasi-suboblique subjunctives in Cic. Fin. 1, 4, 10 (quoted Obs. 9, 5). Subjunctives by attraction occur in Cic. ad Brut. 1, 15, 10 (Obs. 9, 3); Fam. 6, 4, 1 (Obs. 9, 3); Tusc. 5, 29 (Obs. 10, 3), and in Ex. 1, 20, 21; a subjunctive of the second person in Cic. Fin. 4, 11, 28 (Obs. 9, 6).

1. *Mal'a spolia praeferebantur*, ut, *quidquid interduci temporis*<sup>2</sup>, hoc omne victo-  
rium nostri videtur ut. Cae. B. C. 2, 30. — 2. Ergo hic, *quidquid* est, qui modificatione et  
constantia quidem animo est, subinde in se paratus<sup>3</sup>. Is est sapiens quem quatuor<sup>4</sup>,  
is est bonus. Cic. Tusc. 4, 17, 27. — 3. *Quidquid* facturus est ille praeceptor, liberatus<sup>5</sup> tem-  
pora sua impendunt<sup>6</sup> uni videtur, quam si eadem in pluri partiatur<sup>7</sup>. Quint. 1, 2, 2.  
— 4. *Omnia libera capita*<sup>8</sup>, *quidquid* Rhodiorum virorum feminarum est, cum omni  
pecunia nostra Romam veniunt, et omni auro et argento, *quidquid* publici<sup>9</sup>, *quidquid*  
privati est, in vestibulo curiae<sup>12</sup> vestre cumulat<sup>13</sup>, corpora<sup>14</sup> nostra vestrae potestati<sup>15</sup>  
permittimus. Liv. 45, 23 — 5. Caesar de Bruto solitus est dicere: *Magni refert hic quid*  
*velit, sed quidquid* volt<sup>16</sup>, valde volt<sup>17</sup>. Cic. Att. 14, 1, 2. — 6. *Quidni, quoquomodo* se  
res habet<sup>18</sup>, profecto resistimus<sup>15</sup>. Id. Fam. 1, 5, 2. — 7. Hoc illi, *quoquo* tempore fiet

<sup>1</sup> Were shown.—<sup>2</sup> *tempus intercedit*, a delay intercedes. intervenes, is interposed.—<sup>3</sup> calm.—<sup>4</sup> in peace with himself.—<sup>5</sup> whom we propose.—<sup>6</sup> generous; a predicative advb. see p. 338 (Obs. 1). p. 339.—<sup>7</sup> by the singular, in English.—<sup>8</sup> to devote.—<sup>9</sup> to divide among.—<sup>10</sup> persons.—<sup>11</sup> partitive genitive: supply *auri et argenti*; render: *whatever* (how much so ever) *there is*, joining the adjectives *publici et privati* with the antecedent.—<sup>12</sup> house.—<sup>13</sup> deposit (in a heap).—<sup>14</sup> persons.—<sup>15</sup> *potestati alicujus permittere*, to place at one's disposition.—<sup>16</sup> colloquial, instead of *vult*.—<sup>17</sup> *res se habet*, it is; or 'circumstances are'.—<sup>18</sup> with the force of a future: 'we will unquestionably oppose'.

erit *ἀσμένειστος*<sup>1</sup>. Ib. Att. 9, 10, 9.— 8. *Quemcumque* hæc pars perditurum<sup>2</sup> letatum morte Caesaris putabit, hunc in hostium numero habebit. Ib. Att. 14, 13, 2.— 9. Te ita existimare volo, *quibuscumque* officiis<sup>3</sup> Atticum obstrinxeris<sup>4</sup>, eisdem me tibi obligatum<sup>5</sup> fore. Ib. Fam. 13, 18, 2.— 10. Ego bonos viros, aut eos *quicumque* dicentur boni, sequar, etiamsi ruent<sup>6</sup>. Ib. Att. 7, 7, 7.— 11. Samnites *quodcumque* roboris<sup>7</sup> fuerat ex omnibus populis<sup>8</sup> contraxerant<sup>9</sup>. Liv. 10, 14.— 12. Harum rerum aliquid agentibus<sup>10</sup> *cujuscumque* interventus<sup>11</sup> impedimento est. Quint. 1, 2, 12.— 13. Prætor egregio consultum<sup>12</sup> genti ajebat; nam *ultrius* partis<sup>13</sup> melior fortuna belli esset, ad ejus societatem inclinatos<sup>14</sup>. Liv. 31, 32.— 14. Memineris<sup>15</sup>, *quantecumque* tibi accessiones<sup>16</sup> sient fortunæ et dignitatis, eas te non potuisse consequi, nisi meis puer olim consiliis paruisses. Cic. Fam. 2, 1, 2.— 15. Deneget<sup>17</sup>, *quantumquantum* ad eum erit delatum<sup>18</sup>. Plant. Pœn. 3, 4, 28.— 16. Ex eo quod dico<sup>19</sup>, *quantulum id cunque est*, quid faciam judicari<sup>20</sup> potest. Ib. Or. 2, 23, 97.— 17. *Qualescumque* sumus, tamen hæc quæ passi sumus pati non debuimus<sup>21</sup>. Liv. 29, 17.— 18. Virtutem qui adeptus erit, *ubicunque* erit gentium<sup>22</sup>, a nobis diligetur. Cic. N. D. 1, 44.— 19. Hic puer, *quotiescumque* me viderit, ingemiscet<sup>23</sup>, ac pestem<sup>24</sup> suam et patris sui sese dicit videre. Ib. Sest. 69, 146.— 20. Afranius se in castra recepit, sic paratus ut, *quicumque* accidisset casus, hunc quieto et æquo animo ferret. Cæs. B. C. 1, 75.— 21. Licet videre, *qualescumque* summi civitatis viri fuerint, *talem* civitatem fuisse; *quæcumque* mutatio morum<sup>25</sup> in principibus<sup>26</sup> exstiterit<sup>27</sup>, *eandem* in populo secutam. Cic. Leg. 3, 14, 31.

## II. ANTECEDENTS OF RELATIVE CLAUSES.

§ 612. The grammatical antecedent of a clause, introduced by a relative adjective is either a NOUN, or a (personal) PRONOUN, expressed or understood. The relative adjective agrees with its antecedent in GENDER and NUMBER (for exceptions see OBS. 3, and R. 10, OBS. 2. 3). The CASE of the relative is determined by the construction of the relative clause (§ 613, R. 10, OBS. 1, foll.).

OBS. 1. The grammatical antecedent is always conceived as a member of both, the relative clause and the principal sentence. In the CLAUSE, the relative adjective either takes its place, or is its attribute. In the principal SENTENCE it may have a syndetic antecedent of the relative as an attribute. To understand the form of the relative adjective, the clause must be separated from the principal sentence, and the relative adjective must be replaced by its grammatical antecedent, as: *Arbores* serit agricola, *quarum* aspiciet baccam ipse numquam; A farmer plants trees, the fruit of which he will never see. Cic. Tusc. 1, 14, 31. The two constituent sentences are: 1) *Arbores* serit agricola; 2) *Arborum* baccam aspiciet ipse numquam. Either of the two sentences may be made dependent on the other in the form of a relative clause, and the relative takes in regard to gender, number, and case, the grammatical form which the common word has in that sentence in which the relative is substituted. If introduced in the first sentence, it must be placed in the accusative (*Quas* serit agricola *arborum* baccam aspiciet etc.; or *Agricola arborum* *quas* serit baccam etc.). If introduced in the second sentence, it must be in the genitive plural, the sentence taking the form, as quoted above. In either way, the relative takes the same number and gender, namely that of its antecedent, but its case is different according to the case which the noun *arbor* would have in the same sentence.

OBS. 2. If the relative adjective refers to several co-ordinate antecedents, it is in the plural, and, if the antecedents have different genders, is placed in the masculine if the antecedents are persons. If the antecedents are things, the relative is either in the neuter

<sup>1</sup> Most acceptable.—<sup>2</sup> desperados.—<sup>3</sup> services.—<sup>4</sup> obstringere, to lay under obligations.—<sup>5</sup> obligatum esse aliquā re to be bound for something.—<sup>6</sup> to fall; to perish.—<sup>7</sup> robur is technically used of the 'serviceable' part of a population, i. e. of that part which is capable of military duty.—<sup>8</sup> the whole population.—<sup>9</sup> to collect, to draft.—<sup>10</sup> to those which are engaged in anything of that kind.—<sup>11</sup> interference.—<sup>12</sup> i. e. esse; impersonal passive: 'that it was excellently consulted to the people' = that the people was placed in an excellent position by these resolutions.—<sup>13</sup> party.—<sup>14</sup> they would 'gravitate' towards the alliance with that of the two parties etc.—<sup>15</sup> see, p. 350, OBS. 1.—<sup>16</sup> Render by 'will be added to'.—<sup>17</sup> to deny.—<sup>18</sup> aliquid delatum est ad me, I have received something.—<sup>19</sup> from what I say.—<sup>20</sup> a conjecture may be formed as to what I am doing.—<sup>21</sup> p. 379, OBS. 5, d.—<sup>22</sup> The locative adverbs frequently take the partitive genitive *gentium* or *terrarum* in the meaning 'where in the world' (= quo terræ loco).—<sup>23</sup> to groan.—<sup>24</sup> the destroyer.—<sup>25</sup> morals.—<sup>26</sup> rulers.—<sup>27</sup> to take place, to occur.

(which gender is often used, even if the antecedents are of the same gender) or it agrees with the last co-ordinate. Often the relative, in this instance, takes the form '*quæ res*' in the plural. If the antecedents are partly persons, and partly things, the relative generally takes the gender of the persons. See Ex. 1-5.

OBS. 3. If the antecedent is a COLLECTIVE noun, comprising many individuals, the relative is sometimes placed in the plural, as if the antecedent were a plural denoting the individuals comprised in the collective. But this is generally the case only if the predicate of the clause denotes an action which does not refer to the collective idea, but to the single persons. See Ex. 6-8.— Sometimes if the antecedent represents a person by the name of a thing, or by a noun of a gender different from that of the person meant, the relative is placed in the gender required by the person. Ex. 9, 10.

1. *Grandis natu<sup>1</sup> matres*, et parvuli liberi quorum utrorumque ætas misericordiam nostram requirit<sup>2</sup>. Cic. Verr. 2, 5, 49.— 2. *Huic otium<sup>3</sup> atque divitiæ, quæ prima mortales<sup>4</sup> putant<sup>5</sup>, affluēbant<sup>6</sup>*. Sall. Cat. 36, 4.— 3. Attali regis legatus postulabat, *navis captivosque<sup>7</sup>, quæ* ad Chium navali prælio capta essent, restitui. Liv. 32, 33.— 4. Rhodiis oppida, vici, castella, agri, qui ad Pisidiam vergunt<sup>8</sup>, (dati sunt). Ib. 37, 56.— 5. Mihi numquam veniret in mentem, *furorē et insaniam* optare vobis in quam incidistis. Cic. Pis. 20, 46.— 6. In gratiam et favorem nobilitatis Jugurtha venit, *quorum* pars spe, alii præmio inducti nitebantur ne gravius in eum consuleretur<sup>9</sup>. Sall. Jug. 13, 8.— 7. Cæsar equitatum omnem quem ex omni provinciâ coactum habebat, præmittit, qui videant, quas in partibus hostes iter faciant. Cæs. B. G. 1, 15.— 8. Ait, vehementer errare eos qui dicant ab *Academia* sensus eripi<sup>10</sup>, a quibus numquam dictum sit, aut saporem<sup>11</sup>, aut colorem, aut sonum<sup>12</sup> nullum<sup>13</sup> esse. Cic. Ac. 2, 32, 103.— 9. Illa Furia (i. e. Clodius), qui non pluri fecerat Bonam Deam<sup>14</sup> quam tris sorores<sup>15</sup>, impunitatem est illorum<sup>16</sup> sententiis asecutus. Ib. Fam. 1, 9, 15.— 10. Habebam inimicum non C. Marium, sed duo importuna<sup>17</sup> prodigia<sup>18</sup>, quos egestas, quos æris alieni<sup>19</sup> magnitudo, quos levitas, improbitas, tribuno plebis constrictos addixerat<sup>20</sup>. Ib. Sest. 17, 38.

Rem. 5. If the antecedent is a NOUN, it is expressed (a) either in both, the relative clause, and the principal sentence, or (b) only in the principal sentence, or (c) only in the clause.

OBS. 1. The regular method is, to express the grammatical antecedent only in the principal sentence, in which instance the relative is a *disjunct adjective* (§ 365), and treated as such. But the antecedent is sometimes expressed in both propositions, so that it appears both as the antecedent of the relative clause, and as the governing noun of the relative adjective. In this instance the relative must be considered and treated as an ordinary attributive adjective. This form of the relative clause may be used (a) if the antecedent is a common noun, while if the antecedent is a proper name, its repetition as a governing noun of the relative is not admissible: (b) if the antecedent and the relative are in different cases. If both the relative and the antecedent are in the same case, the repetition of the antecedent in the clause is unusual: as: In castris Helvetiorum tabule reperiuntur, *quibus in tabulis* nominatum ratio confecta erat, etc.; In the camp of the Helvetians lists were found, in which (lists) a particular account was rendered etc. Cæs. B. G. 1, 29.— Hostes ab milibus passuum duobus castra (accus.) posuerunt, *quæ castra* (nom.) amplius milibus passuum octo in latitudinem patebant. Ib. 2, 7.— See Ex. 1-4.

OBS. 2. The antecedent is expressed in the clause only. (a) generally if, for the sake of emphasis, or other rhetorical reasons the relative clause is placed before the principal sentence. In this instance the syndetic antecedent of the relative (i. e. a demonstrative adjective) remains in the principal sentence, and agrees with the grammatical antecedent in gender and number, assuming that case which the antecedent would take if expressed in the principal sentence, as: *Quam quæque* norit artem, in hæc se exerceat; Every one should exercise himself in that art which he knows. Cic. Tusc. 1, 18, 41. Ex. 5-8.— The syndetic antecedent is often strengthened by *idem*, as: *Quæ pœna* ab dis immortalibus perituræ, *hæc eadem* mendaci constituta est; That (the same) punishment which, by the immortal gods, is decreed against a perjurer, is also decreed against a liar. Cic. Rosc. Com. 16.— The syndetic antecedent may be omitted if it is in the same case (or governed by the same preposition) as the relative, as: *Quibus bestiis* erat is cibus ut

<sup>1</sup> *Grandis natu*, aged.—<sup>2</sup> to charm.—<sup>3</sup> peace.—<sup>4</sup> men.—<sup>5</sup> aliquid primum putare, to place something first.—<sup>6</sup> mihi aliquid affluit, I have something in abundance.—<sup>7</sup> the captives, as slaves, are considered as things, and are here treated grammatically so, which is rarely the case.—<sup>8</sup> which are situated on the Pisidian side.—<sup>9</sup> gratias in aliquem consilere, to pass severe resolutions against somebody.—<sup>10</sup> that the senses (i. e. their existence) are denied.—<sup>11</sup> taste.—<sup>12</sup> sound.—<sup>13</sup> nullum esse, not to exist.—<sup>14</sup> the good goddess, i. e. Cybele.—<sup>15</sup> his three sisters, i. e. Furias.—<sup>16</sup> i. e. judicium.—<sup>17</sup> untoward.—<sup>18</sup> monster.—<sup>19</sup> debts.—<sup>20</sup> had delivered up with bound hands.

*tum*, in which instance the syndetic antecedent *tantum* is generally expressed in the principal sentence, as: *Is collis tantum* in latitudinem patēbat quantum loci acies instructa occupare poterat; This hill contained so much ground as an army drawn up for battle could occupy. Cæs. B. G. 2, 8.— See Ex. 20-25.

1. *Tantum bellum*, tam diuturnum, tam longe latēque dispersum<sup>1</sup>, quo bello omnes gentes premebantur, Pompējus extrēmā hieme apparāvit<sup>2</sup>, mediā aestate confēcit. Cic. Leg. M. 12.— 2. Erant omnino itinera duo, quibus itineribus domo<sup>3</sup> exire possent. Cæs. B. G. 1, 6.— 3. *Ante fundum*<sup>4</sup> Clodii, quo in fundo facile mille hominum versabantur<sup>5</sup>, superiorem se putarat Milo? Cic. Mil. 20, 53.— 4. Tanti malefici<sup>6</sup> crimen<sup>7</sup>, cui maleficio tam insigne supplicium est constitutum<sup>8</sup>, probare te censes posse tuius viris? Ib. Rosc. Am. 26.— 5. *Quam quisque in partem*<sup>9</sup> casu devēnit, quæque primo signa conspexit, ad hæc constitit<sup>10</sup>. Cæs. B. G. 2, 21.— 6. Himerā<sup>11</sup> delictā, quos civis belli calamitas reliquos fecerat<sup>12</sup>, ei sese Thermis<sup>13</sup> collocarant<sup>14</sup>. Cic. Verr. 2, 2, 35.— 7. Homines sapientis, ex quibus rebus maxime respublica laborat<sup>15</sup>, eis maxime mederi convenit<sup>16</sup>. Ib. Rosc. Am. 53, 154.— 8. Vincas<sup>17</sup>, ei hoc statueris<sup>18</sup>, quarum laudum gloriam adamāris<sup>19</sup>, quibus artibus eæ laudes comparantur, in eis elaborandum<sup>20</sup> (tibi esse). Ib. Fam. 2, 4, 2.— 9. Eo die, quo consuebat<sup>21</sup> intervallo, hostis sequitur. Cæs. B. G. 1, 22.— 10. Nostri non longius quam quem ad finem<sup>22</sup> porrecta<sup>23</sup> loca aperta pertinebant, cedentis<sup>24</sup> insequi audēbant. Cæs. B. G. 2, 19.— 11. Foras<sup>25</sup> educite quam introduxisistis fidicinam<sup>26</sup>. Plaut. Most. 2, 2, 74.— 12. Nunc disturbe quas statuit<sup>27</sup> machinas. Ib. Pseud. 1, 5, 137.— 13. Quas herbas pecudes non edunt, homines edunt. Ib. Pæn. 3, 3, 31.— 14. Quum venissem ad Amamum, qui meus mihi cum Bibulo communis est, Cassius noster feliciter ab Antiochæa hostem rejecerat. Cic. Fam. 2, 10, 2.— 15. Quum Syrnadis<sup>28</sup>, quum Philomeli<sup>29</sup>, quum Iconii<sup>30</sup> essem, quibus in oppidis omnibus commoratus sum, omnes jam festus generis legationes erant constitutæ<sup>31</sup>. Ib. 3, 8, 5.— 16. Firmi et constantes amici eligendi sunt, cujus generis est magna penuria<sup>32</sup>. Ib. Am. 17, 62.— 17. Helvetii legatos ad Cæsarem mittunt nobilissimos civitatis, cujus legationis Naminus<sup>33</sup> et Verucletius principem locum obtinebant. Cæs. B. G. 1, 7.— 18. Cæsar, in Carnates<sup>34</sup>, Andes<sup>35</sup>, Turonesque<sup>36</sup>, quæ civitates propinquæ his locis erant, ubi bellum gesserat, legionibus in hibernacula deductis, in Italiam profectus est. Ib. 2, 35.— 19. P. Crassus prefectos tribunosque militum compluris in finitimas civitates frumentandi causâ dimisit, quo in numero erat T. Terrasidius. Cæs. B. G. 3, 7.— 20. Utraque civitas quod roboris<sup>37</sup> in juventute<sup>38</sup> erat armavit, misitque. Liv. 35, 38.— 21. Rhodii quod floris, quod roboris in juventute fuerat, amiserant. Ib. 37, 12.— 22. Quod auri, quod argenti, quod ornamentorum in urbibus Siciliae fuit, id Verres abstulit. Cic. Div. Cæc. 5.— 23. Litteræ L. Metelli hoc, quantum est ex Sicilia frumenti hornotini<sup>39</sup>, exaraverunt<sup>40</sup>. Ib. Verr. 2, 3, 18.— 24. Triginta tyranni<sup>41</sup> tria millia sibi satellitum constituerunt, quantum<sup>42</sup> ex tot cladibus nec<sup>43</sup> civium superfuera. Just. 5, 8.— 25. Quod cuique temporis ad vivendum datur, eo debet esse contentus. Cic. Sen. 19, 69.

Rem. 6. The grammatical antecedent is generally understood if it is a noun of general import (denoting the general idea of persons or things § 353 foll.). Such antecedents are either implied in an absolute form-adjective (*omnis, multi, unus, duo, aliquis* etc.), which may be the syndetic

<sup>1</sup> Literally: 'So long and widely dispersed', i. e. covering so vast an extent of country.—<sup>2</sup> to prepare.—<sup>3</sup> from their homes.—<sup>4</sup> premises.—<sup>5</sup> to be engaged, to be present.—<sup>6</sup> crime.—<sup>7</sup> charge.—<sup>8</sup> maleficio supplicium constituere, to constitute a punishment for a crime.—<sup>9</sup> part of the battle-ground.—<sup>10</sup> to stop.—<sup>11</sup> city in Sicily.—<sup>12</sup> aliquem reliquum facere, to spare the life of somebody.—<sup>13</sup> Thermæ, a Sicilian city.—<sup>14</sup> to establish one's self.—<sup>15</sup> laborare ex aliquâ re, to suffer from an evil.—<sup>16</sup> convenit aliquem, it behooves somebody.—<sup>17</sup> to succeed.—<sup>18</sup> to propose.—<sup>19</sup> The clause 'quarum... adamāris' depends on the next clause 'quibus... comparantur' (laudes being the antecedent), and this clause, again, depends on the next sentence.—<sup>20</sup> in arte aliquâ elaborare, to devote one's self to a sphere (of activity).—<sup>21</sup> supply 'hostis sequi'.—<sup>22</sup> Construe: ad eum finem (point) ad quem porrecta. The relative is involved in the construction of the participle, and the sentence is best rendered by taking porrecta as the finite verb (porrigēbant), and omit pertinebant in the translation.—<sup>23</sup> porrigi, to be stretched forth, to extend.—<sup>24</sup> the fleeing enemy.—<sup>25</sup> See p. 219.—<sup>26</sup> names of cities.—<sup>27</sup> legationes constituere, to choose embassies.—<sup>28</sup> dearth.—<sup>29</sup> names of Gallic tribes.—<sup>30</sup> robur = everyone able to bear arms.—<sup>31</sup> among their young men.—<sup>32</sup> frumentum hornotinum, this year's corn.—<sup>33</sup> to plough out; said of a letter of Metellus, in as much as Metellus by this public letter, had induced the farmers to cultivate their fields, which else they would not have done from fear of being deprived of their crops.—<sup>34</sup> The thirty tyrants, instituted by Lysander after the end of the Peloponnesian war.—<sup>35</sup> The construction partly belongs to Obs. 4, partly to Obs. 3, quantum having the force of qui numerus, the grammatical antecedent being the numeral noun tria millia.—<sup>36</sup> = ne quidem.

antecedent of the relative (*is, hic, tantus* etc.); or it is altogether omitted without being replaced by an absolute form-adjective.

If the antecedent is implied in an absolute form-adjective, the latter takes either the masculine, or the neuter gender in the plural or singular, according to the rules § 354 foll., and § 358 foll., the relative, as disjunct adjective (§ 364) agreeing with it in gender and number. If there is no such absolute form-adjective, the relative takes that form, as to number and gender, which its syndetic antecedent would have, if expressed.

Obs. 1. Nouns of general import (*homo, res* etc.), as grammatical antecedents of relative adjectives may be expressed as such, in which instance the general rules § 612 are applied, as: *Homo, qui* et summā gravitate et parens esset, obstupuit. Cic. Verr. 2, 1, 26.— *Homines qui* sese student præstare ceteris animalibus etc. Sall. Cat. 1, 1.— *Tres sunt res quæ* obstant Roscio. Cic. Rosc. Am. 13, 35.— Curio reprehendit eas res quas Cæsar administrasset in Galliâ; Curio censured what Cæsar had done in the administration of Gaul. Cic. Brut. 60, 218.

Or this kind of grammatical antecedents may be implied in an absolute form-adjective. In this instance the relative takes the number and gender of the form-adjective, as: *Omnes, in quibus* aliquid consilii aut ætatis fuit eo convenerant. Cæs. B. G. 3, 16.— Nunc dicis aliquid quod ad rem pertineat. Cic. Rosc. Am. 18, 52.— *Nihil quod* ip-sis indignum esset committēbant. Cæs. B. G. 5, 35.— *Tria sunt quæ* sint efficienda dicendo. Cic. Brut. 49, 185.— The same agreement is applied to the syndetic antecedents of the relative, if they are used absolutely, as: *Is qui* ponat summum bonum in voluptate: *He who* places the highest good in pleasure. Cic. Off. 3, 32.— *Mercatores ea quæ* ad effeminandos animos pertinent, important; Merchants import what tends to effeminating the minds. Cæs. B. G. 1, 1.— *Libenter homines id quod* volunt, credunt; Men believe willingly what they wish. Ib. 3, 18.

Or the relative is used without any form-adjective implying the grammatical antecedent. In this instance it takes the number and gender which the grammatical antecedent would have if expressed, as: *Qui* stadium currit eniti debet ut vincat: (*He who* runs a race must strive to win. Cic. Off. 3, 10, 42.— *Legatis, tribunis imperat quod* apud quemque facto opus est; To the staff officers he gave orders about what each of them had to do. Liv. 10, 35.— *Ad hæc quæ* visum est Cæsar respondit; To this Cæsar replied what seemed fit. Cæs. B. G. 4, 8.

Obs. 2. The relative, in any of the instances mentioned Obs. 1, must be considered as a disjunct adjective (§ 364), because it always refers to a previous noun expressed or understood. Hence it never takes the absolute forms quis and quid, unless it is merged in the indefinite quisquis and quidquid. But, in order to distinguish the two relations of the relative according as it refers to an antecedent expressed or understood, the latter are designated as 'ABSOLUTE RELATIVES', although, strictly speaking, a relative can never be absolute in the sense applied to other form-adjectives.

The absolute relatives correspond to the following English forms: 1) if referring to persons, *qui* corresponds to 'he who', 'the one who', or 'who' (*qui sapit, tacet*; who is wise (he who is wise) is silent); and in the plural to 'those who', 'they who', 'who' (*qui hoc dicunt errant*, those who say so are mistaken).— 2) If referring to things, the absolute relatives *quod* and its plural *quæ* correspond to 'what' (that which): *Quod bonum est*, prodest (or 'quæ bona sunt, prosunt'); what is good, is useful. Sen. Ep. 117.

The English relatives of the numeral, quantitative, and qualitative classes cannot be used without their syndetic antecedents (as many, as much, such as), but the Latin antecedents may be omitted, as: *quantum possum*, as much as I can. Victoria quantam de Samnitibus nemo ad eam diem pepererat; So great a victory as nobody, up to that day, had gained over the Samnites. Liv. 10, 38.

Obs. 3. The syndetic antecedents of a relative may have the force of both, absolute and disjunct adjectives (§ 364). If disjunct, they refer to nouns previously expressed, and must, according to § 365, agree with those in gender and number; in all other respects such antecedents, and the relatives which refer to them, are treated as if they were absolute adjectives. The syndetic antecedents of either kind are frequently omitted and understood, according to the following rules:

A. The syndetic antecedents must be omitted:

(1) If the grammatical antecedent, being a noun of general import, is an absolute indefinite, or numeral form-adjective expressed, as: *Multi sunt qui* dicant etc.; There are many who say (not 'multi sunt illi or ei qui dicant'). Sen. Ben. 2, 14.— Nunc dicis aliquid quod ad rem pertineat; Now you say something that belongs to the subject. Cic. Rosc. Am. 18, 52.— *Duo sunt quæ*, bene ab oratore tractata, admirabilem eloquentiam faciunt; There are two things which, if well employed by a speaker, make an admirable

eloquence (*i. e.* never fail to excite the admiration of the audience). Cic. Or. 37, 128.— But with *omnis* the syndetic antecedent may be *either* expressed, or understood, as: *Omne id quo gaudemus voluptas est; Everything is 'voluptas' (amusement) in which we find pleasure.* Cic. Fin. 1, 11, 37. But: *Omnia que absunt vehementer hominum mentis perturbant; All the things that are not present (which we do not see) greatly disturb the minds of men.* Cic. B. G. 7, 84.

(2) Syndetic antecedents are not admissible if the indefinite form-adjective implying the grammatical antecedent of the relative is *elliptically omitted*. An ellipsis of this kind regularly occurs (*a*) if *esse* (in the meaning 'to exist') is the (abstract) predicate of the sentence, the relative clause being a 'predicate clause' (p. 486, Obs. 9). In this instance, the omitted antecedent is the *subject* (nominative or accusative) of the sentence, while the relative may be in any case required by the construction of the clause. Such sentences are, in English, introduced by the impersonal form 'There are persons', 'there are people', 'there are those (some)', 'there are things (occasions etc.)', as: *De impudentiā singulāri sunt qui mirentur; There are those (some) who are astonished at his remarkable impudence (the form *sunt ei qui* being Un-Latin).* Cic. Verr. 2, 1, 2.— See Ex. 1-3, and the Ex. quoted p. 486.— Sometimes compounds of the verb *esse* are used with the same construction, as: *Adsunt qui vos hortentur; There are those present who admonish you.* Cic. B. C. 2, 32.— (*b*) If *invenire* or *reperire* is the predicate, in which instance the indefinite antecedent is either the transitive object, or the passive subject of the sentence, as: *Non facile est invenire qui, quod sciat ipse, non tradat alteri (= invenire aliquem qui; 'eum qui' being inadmissible); It is not easy to find anyone who would not teach others what he knows himself.* Cic. Fin. 3, 20, 66.— *Vix invenitur qui, laboribus susceptis, periculisque aditis, non quasi mercedem desideret gloriam; Hardly anyone is found (exists) who, after undergoing hardships and dangers, should not be desirous of renown as his reward.* Cic. Off. 1, 19, 65. See Ex. 4, 5.— Here belong the passive predicates '*inventi sunt*' and '*reperi sunt*' *qui* as synonyms of *sunt qui* (See p. 429, B).— (*c*) If the predicate of the sentence is a verb denoting 'to have', 'to send', 'to select', or verbs of similar import, in which instance the indefinite antecedent is conceived as the transitive object, or passive subject, as: *Tum quum habebas quos imitari, non multum proficiebas; When you had persons (models) to imitate, you did not make much progress.* Cic. Fam. 9, 24.— *Misit qui pro vectura solveret; I sent a person to pay the freight.* Cic. Att. 1, 3, 2.— *Delegisti quos Romae relinqueres, quos tecum educeres; You selected some whom you were to leave in Rome, and others whom to take out with you.* Cic. Cat. 1, 4, 9.— Ex. 6, 7, 8.— The same omission occurs when the subject of passive verbs of this kind is conceived as subject-absolute in the construction of the absolutes absolute, as: *Hannibal Iberum copias trajecit praemis qui Alpium transitus specularentur; Hannibal sent his troops across the Iber after having sent a scouting party in advance to reconnoitre the passes of the Alps [literally: 'after having sent (some) who were to etc.].* Liv. 21, 23. For this omission of the subject-absolute (which after the verbs mentioned is always necessary), and for other indefinite subject-absolute, the omission of which is optional, see p. 175, 176.

B. The absolute and dis-junct syndetic antecedents may or may not be omitted:

1) If they are the *subjects* (nominative or accusative), and *neuter* antecedents, if they are the *subjects* or *transitive objects* of any kind of verb in the principal sentence. The dropping of the syndetic antecedents may be considered as the *rule* if they imply persons, being subject-nominatives, and the relative is likewise the subject of its own clause. In this instance the antecedents are only expressed if the author means *certain* persons, or lays a certain stress upon them, as: *Illi contendunt qui apud me et amicitia, et beneficiis, et dignitate plurimum possunt; Those applied to me [the author meant certain persons whom for important reasons he did not choose to mention by name] who have the greatest weight with me by their friendship, benefactions, and character.* Cic. Rosc. Am. 1, 4. Similarly: *Ut sine contumelia a me nominarentur ei qui se decemviro sperant futuros.* Cic. Leg. Agr. 2, 21.— But: *Quum ab aratro arcescebantur qui consules fierent; When people (persons, farmers) were taken from the plough to be made consuls.* Ib. Rosc. A. 18.— *Omnium est communis, qui fuit hostis suorum; He who was the foe of his own kindred, is the common enemy of all.* Cic. Verr. 2, 1, 15.— *Docilis est is qui attente vult audire; Docile is he who wishes to listen attentively, [where some manuscripts have *is*, and others omit it].* Auct. Her. 1, 4, 7.— See Ex. 9-11.— If the syndetic antecedent (being a *person*), is either a subject-accusative, or if it is a nominative, but the relative is in a different case, the antecedent, likewise, is *often* omitted, but (perhaps) more frequently expressed. The following are examples of omitted antecedents of such kind: (Caesar dixit), *qui (= eos qui) suum timorem in angustias itineris conferrent, facere arroganter; Caesar said that those who referred their fear to the bad roads (assigned the bad roads as the cause of their fear) were acting arrogantly.* Cic. B. G. 1, 41.— *Divitiacus dixit, qui (= eos qui) ejus consilii principes fuissent, in Britanniam profugisse.* Cic. B. G. 2, 14.— *Utile est uti motu animi (= eum uti motu animi) qui uti ratione non potest; It is*

right that he who (a person who) cannot act by reason should act by emotion. Cic. Tusc. 4, 25, 55.— *Digni sunt amicitia, quibus in ipsis inest causa cur diligantur; Those are worthy of friendship whose own persons are the reason why they should be loved.* Cic. Am. 21, 39.— *Quibus autem haec sunt communia, civitatis ejusdem habendi sunt; Those to whom this is common must be considered as citizens of the same State.* Ib. Leg. 1, 7, 23.— *Tanto plus gratia atque opes valere ut, quorum de poena agebatur, tribuni militum crearentur (= ut ei quorum etc.); That (the) (very) men whose punishment was under discussion were elected military tribunes.* Liv. 5, 36.— *Edictum est, quibus videretur d. e. ei quibus videretur) in castra proficiscerentur; That those who liked might go to the camp.* Liv. 5, 20.— *Haec vociferantem quibus erat imperatum (= ei quibus id erat imperatum) jugulant; While he was thus vociferating, those to whom the order was given killed him.* Curt. 3, 2, 20. See Ex. 12-15 and Juv. 3, 161.— If the antecedent denotes *things in general*, the use and the omission of the syndetic antecedent are equally frequent. The relative, either with or without a syndetic antecedent, is expressed by '*what*', whether in the plural or singular, as: *Cicero non ea solum quae vivo se accidere futura praedixit, sed etiam quae nunc usu veniunt cecinit ut vates; Cicero, not only predicted what happened during his lifetime, but, like a prophet, foretold what is now transpiring.* Nep. Att. 16, 4. [Here the syndetic antecedent *ea* may be dropped in the first proposition, and added to the second.]— *Ex hoc genere est illud quod tu nuper ei qui te rogasset, num tibi molestus esset futurus... inquisit; Of the same kind is what you, the other day, said to that man who had asked you whether he was intruding on you.* Cic. Or. 2, 64, 259.— *Caesar cognovit, Considium quod non vidisset pro viso sibi renuntiase; Caesar saw that Considius had reported to him as his own observation what he had not seen.* Cic. B. G. 1, 22.— *Magnum est quod conor, difficile est quod polliceor; What I undertake is great; what I promise is difficult.* Cic. Rosc. Com. 3.— *Id dixit quod in omniis luscis conveniret; He said what might be applied to all one-eyed persons.* Cic. Or. 2, 60, 246. See Ex. 16-19.— In the same way as with determinative relatives, the syndetic antecedents of quantitative, qualitative, and numeral relatives, are either expressed or omitted, as: *Tantum cuique tribuendum est quantum ipse efficere possit; We should give to everyone (of our friends) what (as much as) we can afford.* Cic. Am. 20, 73.— *Scripti ut Gallio quantum is vellet darem; He wrote I should give to Gallius as much as he wanted.* Cic. Att. 10, 15, 4. Ex. 20, 21.

2) The same omission of the syndetic antecedent may or may not take place if the antecedent is in any case, so that the relative, according to the construction of its own clause, is in the same case as the antecedent, or if both the antecedent and the relative are dependent on the same prepositions, as: *Imitemur quos cuique visum est (= eos quos imitari cuique visum est); Let everyone imitate whom (those whom) he likes best. [literally: 'Let us imitate those whom it has seemed to everyone].* Cic. Off. 1, 32, 118.— *Dividebat agros quibus volebat (= eis, quibus agros dividere volebat); He gave a share of the lands to whom he wished.* Ib. 1, 11.— *Epicurus in quibus sequitur Democritum non fere labitur (= in eis rebus in quibus); Epicurus is almost always right in what (where) he follows Democritus.* Cic. Fin. 1, 6. See Ex. 22-24.— Thus the antecedent is generally omitted if the relative takes the form of an *indeclinable* relative, as: *(Caesar dixit) quibus unquam exercitus audiens non fuerit, non eorum gesta fortiter debuisse (= eis quibus unquam); To all those to whom their army had refused obedience, success had been wanting in consequence of a bad conduct of the war.* Cic. B. G. 1, 40.— If the antecedent denotes *things in general*, being placed in the genitive or dative, it generally takes the form '*ea res*' instead of *id*, if the form of the relative (*qui, quibus, quorum*) would leave it doubtful whether *persons* or *things* are meant § 3601. If such an antecedent is omitted, the relative must agree with *res*, as: *Te oro, ut quibus in rebus mei tui indigebunt, nostris miseris ne desis; I beseech you to stand by [me in] my misfortune in what (in those things in which) my family will need you.* Cic. Att. 3, 27.

C. The syndetic antecedents are generally retained if the case of the relative is different from that of the antecedent (except in the instance mentioned No. A), or if the cases are the same, but dependent on different prepositions, or if either the antecedent or the relative is a mere case-object while the other of the two is dependent on a preposition. This rule applies to all syndetic antecedents, whether they are absolute, or dis-junct, or dependent on a noun expressed; as: *Verres eum cui legatus fuisset, in invidiam suis maleficiis adduxit; Verres, by his misdeeds, exposed to hatred that man whose adjutant he had been.* Cic. Verr. 1, 4, 11.— *Non videtur debuisse ejusmodi deliberationem introducere in qua quod utile videretur eum eo quod honestum est compararetur; It seems,*

\* A literal rendering of the English '*let everyone imitate whom etc.*' would be inadmissible, since *quisque* according to § 362, R. 20, 3 can only be used in certain connections, and *omnes, quibus, unusquisque* would refer to *all* 'without exception'. In all sentences of the above form *quisque* must be incorporated in the relative clause, the subject of the principal sentence being variously expressed according to the requirements of the sense; mostly by a syndetic antecedent repeated after the relative clause.

he ought not to have introduced a discussion of that kind, in which *what* seems useful is compared with *what* is moral. Cic. Off. 3, 3, 12.—Hi deducunt colonias in eos agros quos emerint, et in quæ loca præterea videbitur; They will send out colonies to those lands which they will buy, and moreover to all localities they will choose (literally 'to those localities to which it will seem to them i. e. to send colonies). Cic. L. Agr. 2, 27, 74 [Here in the first proposition the antecedent *eos* is retained because it is introduced by a preposition which does not refer to the case of the relative; but in the second proposition the antecedent *ea* is dropped because both, the antecedent and the relative depend on the same preposition (in *ea* loca in quæ colonias deducere videbitur).] See Ex. 25, 26.—The absolute antecedent takes here likewise the form '*ea res*' if the neuter gender is not sufficiently marked by the relative (see No. B, 2), as: Homines non requirunt rationes eorum rerum quas semper vident (which is more perspicuous than eorum quæ vident); Men do not inquire for the causes of *what* they always see. Cic. N. D. 2, 38, 96.—It is remarkable that, in this instance, the relative frequently does not agree in gender with the formal grammatical antecedent *res*, but takes the neuter form *as if the antecedent were an absolute adjective in the neuter*, as; Sumptu ne parcas ullâ in re quod\* ad valetudinem opus sit; Do not spare expenses in anything that may be necessary for your recovery. Cic. Fam. 16, 4, 2.—Abundantiâ eorum rerum quæ prima mortales ducunt; By an abundance of *what* men place first. Sall. Jug. 41, 1.—Delectu rebusque aliis quæ per ipsos agenda erant perfectis; After the draft and the other things which had to be done by them were accomplished. Liv. 32, 29.—In me quidvis harum rerum convenit quæ sunt dicta; \*\* To me *everyone of those things* applies that have been said. Ter. Heaut. 5, 1, 4.—This agreement goes to show that, in the conception of the Latins, the forms *ea res*, and *id* were identical, and that the genitives and datives *eius rei*, *ei rei* (§ 360) are really to be considered as the oblique cases of the absolute neuter *id*.

D. In the instance mentioned No. C, the antecedents may be dropped 1) if they are the completing objects of a verb (so that the case of the antecedent is clear from the connection), and the relative is the subject of its own clause, as: Xerxes præmium proposuit (i. e. *ei*) qui invenisset novam voluptatē; Xerxes proposed a reward for the man who would discover a new pleasure. Cic. Tusc. 5, 7, 20.—Semper in prælio maximum est periculum (i. e. *ei*) qui maxime timet; In battle the greatest danger always threatens him who is most afraid. Sall. Cat. 58.—Ut agerentur gratiæ (i. e. *eis*) qui e municipiis venissent; That thanks should be returned to those who had come from the towns. Cic. P. Red. 11. See Ex. 27, 28.—2) The antecedents may also be dropped if they denote things (both absolutely used, or with nouns), being introduced by a preposition governing the accusative, and if the relative is the subject or completing object of its own clause, as: Nunc redeo ad quæ mihi mandas (= *ad ea quæ*); Now I come to *what* you want me to do. Cic. Att. 5, 11.—Nullas adhuc litteras acceperam præter quæ (= præter *ea quæ*) mihi in Trebulano redditæ sunt; I have not yet received any letter except those which were handed to me in the Trebulane villa. Cic. Att. 5, 3.—Helvetii frumentum omne præter quod (= præter *id quod*) secum portaturi erant, comburunt. Cæs. B. G. 1, 5.—3) Rarely the syndetic antecedent is dropped if it is an attributive genitive of a noun (provided that the relative is a subject-nominative), as: Novâ lege, ut qui juniorum non convenisset ad imperatorum edictum, quique injussu abisset, caput (i. e. *eius* caput) Jovi sacrum esset; By a new law that the heads of those among the younger citizens who would not appear at the call of the commanders, and of those who would leave without order, should be forfeited to Jupiter. Liv. 10, 38.

E. The syndetic antecedents are almost always retained if they are predicate-nominals, the relative clause describing a quality of the subject asserted by the copula. In this construction, the syndetic antecedent (*is*) is a disjunct adjective, always referring to a definite subject, and hence may be also in the feminine. The relative and its antecedent, in this connection, are rendered by 'a man who', 'such a person as to', or by similar expressions, as: Zeno nullo modo *is* erat qui nervos virtutis inciderit; Zeno was by no means the man to cut the sinews of virtue. Cic. Ac. Post. 1, 10 [An omission of '*is*' in this and the following examples would be inadmissible.] Non sumus ei quorum vagetur animus errore; We are not that kind of persons whose minds wander about without aim (in errore). Cic. Off. 2, 2.—Ea est Româna gens quæ victa quiescere nesciat; The Roman nation is of such a character as to find no rest if conquered. Liv. 9, 3.—The antecedent *is*, in this construction, is omitted if it is coördinate to an attribute of another predicate-noun, as: L. Pinarius erat vir acer et qui nihil in fide Siculorum reponeret; L. Pinarius was a determined man, and one who would not rely on the faith of the Sicilians. Liv. 24, 37.—All clauses of this kind are predicate-clauses (p. 486), and always must have their own predicates in the subjunctive (see § 614). See Ex. 29-31.

\* The neuter *quod* may also be taken for a restricting relative, according to p. 560, Obs. 2; or as agreeing with the predicate-noun *opus*, according to p. 525, Obs. 2, although *opus* in '*opus est*' was hardly felt as a noun by the Latins.

\*\* Two inferior codices read '*dictæ*', which reading has been received by Bentley.

Obs. 4. An INVERSION of relative clauses (p. 505, Obs. 2) with absolute relatives may take place in all instances where the use of a syndetic antecedent is admissible, for the same reasons as when the relative has an expressed noun as antecedent. The syndetic antecedent, in this instance, is placed after the relative clause, the relative retaining its absolute form in lieu of the incorporation of the grammatical antecedent, which, of course, cannot take place where there is no noun to incorporate; as: Quibus ratio a naturâ data est, eisdem recta ratio data est; To those to whom reason has been given by nature, a right reason has been given. Cic. Leg. 1, 12, 33.—Cæsar L. Plancum jubet, quorum operâ cognoverat Tasgetium interfectum, hos comprehensos ad se mittere; Cæsar directed Plancus to arrest and send to him those whom he knew to have been implicated in the murder of Tasgetius (literally: by whose agency he knew that T. was murdered). Cæs. B. G. 5, 25.—Sperat se posse quod adeptus est per scelus id per biennium effundere atque consumere; He hopes that he can squander and consume within two years *what* he has obtained by crime. Cic. Rosc. A. 2, 6. See Ex. 32-35.

1. Sunt qui urbânis rebus<sup>1</sup> bellicas<sup>2</sup> antepōnant. Cic. Off. 1, 24, 82.—2. Fuêrunt qui dicerent, non celi motu<sup>3</sup> fieri ortus et occâsus<sup>4</sup>, sed nos ipsos oriri et occidere<sup>5</sup>. Sen. N. Q. 7, 12.—3. Nonne dicitis, esse e regione<sup>6</sup> nobis, e contrariâ parte<sup>7</sup> terræ, qui adversis vestigiis<sup>8</sup> stent contra nostra vestigia, quos avtrîpodas<sup>9</sup> vocatis? Cic. Ac. Pr. 2, 39, 123.—4. Nihil est difficilius quam reperire quod sit omni ex parte<sup>10</sup> in s'no genere perfectum. Ib. Am. 21, 79.—5. In Homêro hoc maximum est, quod neque ante illum quem<sup>11</sup> ille imitatur, neque<sup>12</sup> post illum qui eum imitari posset, inventus est. Vell. 1, 5.—6. Semper Cimônem pedisequi<sup>13</sup> cum nummi<sup>14</sup> sunt secuti, ut habêret quod statim daret. Nep. Cim. 4.—7. Quam e viâ languerem<sup>15</sup>, mi-i qui hoc ei diceret. Cic. Phil. 1, 5, 12.—8. Quid dulcius quam habere quicum omnia andeas sic loqui ut tecum? Ib. Am. 6, 22.—9. Stultissim' est qui hominem aut ex veste aut ex conditione<sup>16</sup> æstimat<sup>17</sup>. Sen. Ep. 47.—10. Maximum ornamentum amicitiae tollit<sup>18</sup> qui ex eâ tollit verendiam<sup>19</sup>. Cic. Am. 22, 82.—11. Errant qui in prosperis rebus<sup>20</sup> omnis impetus<sup>21</sup> fortinæ se putant fugisse<sup>22</sup>. Auct. Her. 4, 17, 24.—12. Necesse est sumpium facere<sup>23</sup> qui querit lucrum<sup>24</sup>. Plaut. Asin. 1, 3, 65.—13. Nego jus esse<sup>25</sup>, qui miles non sit, pugnare cum hoste. Cic. Off. 1, 11.—14. Sapiens palam facit<sup>26</sup>, potentissimum esse qui se habet in potestate. Sen. Ep. 90.—15. Quibus opes nullæ sunt, bonis invident. Sall. Cat. 37.—16. Quod non dedit fortuna, non eripit<sup>27</sup>. Sen. Ep. 59.—17. Cæsar mittit Vatinius ad ripam fluminis qui ea quæ maxime ad pacem pertinere<sup>28</sup> viderentur, ageret. Cæs. B. C. 3, 19.—18. Leviôra<sup>29</sup> sunt quæ repentinô aliquo modo accidunt quam ea quæ meditata<sup>30</sup> et præparata inferuntur<sup>31</sup>. Cic. Off. 1, 8.—19. Ambiorix dixit (se) id quod fecerit de oppugnatione navium, neque judicio, neque voluntate suâ fecisse. Cæs. B. G. 5, 27.—20. Sol queritur majore quam terra sit, an tantus quantus videatur. Cic. Div. 2, 3, 10.—21. Non speraverat Hannibal fore ut tot in Italiâ populi ad se dederent quod defecerant post Cannensem cladem. Liv. 28, 44.—22. Cœlestis ira<sup>32</sup> quos premit<sup>33</sup> miseros facit. Sen. Herc. Oet. 441.—23. Piso parum erat a quibus debuerat adjûna. Cic. Phil. 1, 4.—24. Quam quis amat, sciens non laedit. Quint. 5, 10, 14.—25. Ubi prima impudentia<sup>34</sup> nostri exercitus ab eis qui in silvis latebant visa sunt, subito omnibus copis provocaverunt<sup>35</sup>. Cæs. B. G. 2, 19.—26. Socrates exsecrari eum solèbat qui primus alicui a maliciâ se junxisset<sup>36</sup>. Cic. Leg. 1, 12, 33.—27. Minime miror qui insueti e occipunt<sup>37</sup> ex inuria<sup>38</sup>. Ter. Ad. 2, 1, 42.—28. Nos vel in premio clere<sup>39</sup> poscimus qui nobis aliquid attulisset<sup>40</sup> quo<sup>41</sup> hoc firmitus crederemus. Cic. Tusc. 5, 7, 20.—29. Ego is sum qui nihil unquam meâ potius quam meorum civium causâ fecerit. Ib. Fam. 5, 21.—30. Non sumus ei quibus nihil verum videatur, sed ei qui omnibus veris falsa quedam adjuncta esse dicimus. Ib. N. D. 1, 5.—31. Dixisti, vos eos esse qui vitam insuavem<sup>42</sup> sine his studiis putaretis. Ib. Or. 2, 6.—32. Monstrum certissimum

<sup>1</sup> Res urbânæ, civil affairs.—<sup>2</sup> res bellicæ, military affairs.—<sup>3</sup> revolution.—<sup>4</sup> the rising and setting of the stars.—<sup>5</sup> to set.—<sup>6</sup> just opposite.—<sup>7</sup> ex...parte, on the side.—<sup>8</sup> with footprints opposite to ours, i. e. with their feet opposite to ours.—<sup>9</sup> antipodes.—<sup>10</sup> in every respect.—<sup>11</sup> i. e. aliquis quem.—<sup>12</sup> Neque aliquis inventus est, neque etc.; There was nobody, nor anybody etc.—<sup>13</sup> footmen.—<sup>14</sup> small coins.—<sup>15</sup> e viâ languere, to be tired from the journey.—<sup>16</sup> according to the state in which he is.—<sup>17</sup> to value.—<sup>18</sup> ornamentum alicui rei or ex aliquâ re tollere, to strip something of an ornament.—<sup>19</sup> mutual respect.—<sup>20</sup> in prosperity.—<sup>21</sup> blow.—<sup>22</sup> to escape.—<sup>23</sup> to lay out money.—<sup>24</sup> lucrum querere, to be desirous of making money.—<sup>25</sup> to be lawful.—<sup>26</sup> makes it evident to all.—<sup>27</sup> to take away.—<sup>28</sup> to be most conducive to.—<sup>29</sup> less serious.—<sup>30</sup> accessory predicate: 'with premeditation'.—<sup>31</sup> inferre, to inflict.—<sup>32</sup> the wrath of Heaven.—<sup>33</sup> ira aliquem premit, anger rests on somebody.—<sup>34</sup> the first baggage train.—<sup>35</sup> to rush forward.—<sup>36</sup> utilitatem a naturâ se jungere, to place expediency in conflict with nature (i. e. with morality).—<sup>37</sup> to begin.—<sup>38</sup> from a wrong inflicted.—<sup>39</sup> to bring out, to cause somebody to step forward.—<sup>40</sup> aliquid alicui afferre, to give somebody a new reason.—<sup>41</sup> from which, in consequence of which.—<sup>42</sup> unpalatable, dull.

est esse aliquem humani speciei<sup>1</sup> et agniti, qui tantum immanitate<sup>2</sup> bestias vicerit<sup>3</sup>, ut propter quos<sup>4</sup> hanc suavissimam<sup>5</sup> lucem aspexerit, eos indignissime<sup>6</sup> luce privavit. Ib. Rosc. Am. 22, 63.—33. Multo magis fugiendum est<sup>7</sup> quod, cuius in animo versatur<sup>8</sup>, numquam sinit eum respirare<sup>9</sup>, numquam quiescere. Ib. Fin. 1, 16, 53.—34. Quisquis sentit quemadmodum sit affectus<sup>10</sup>, eum necesse est aut in voluptate esse, aut in dolore. Ib. 1, 11, 38.—35. Quantum<sup>11</sup> Apionius edidisset<sup>12</sup> debere<sup>13</sup>, tantum ex edicto<sup>14</sup> dandum erat. Ib. Verr. 2, 3, 29.

Rem. 7. If the grammatical antecedent of the relative clause is a (personal) PRONOUN, the relative adjective agrees with the pronoun in NUMBER, and with its LOGICAL GENDER (OBS. 1 and 2). Relative clauses of this kind rarely take syndetic antecedents (OBS. 4). For the form of the predicate in such relative clauses see R. 10, OBS. 1.

OBS. 1. *Is, ea, id* has the nature both of a personal pronoun, and of a determinative form-adjective (§§ 231, 214). If *is*, absolutely used, governs a relative clause, it is always a form-adjective (a) if the person or thing to which it refers, is determined by the relative clause (*ei qui negotio praefuerunt*); and (b) if it has the force of a qualitative or quantitative adjective (*Zeno erat is qui etc.*). But it must be considered as a personal pronoun if it refers to persons or things mentioned before as its grammatical antecedents (§ 232). The English pronouns 'he' and 'they' likewise occur in both meanings; as: *Horum princeps Socrates fuit, is, qui totius iudicio Graeciae... omnium fuit facile princeps*; *He who*, in the judgment of all Greece, unquestionably was the foremost of all. Cic. Or. 3, 16.—Instead of *is*, the other demonstratives *hic, ille, iste*, are likewise used with the force of pronouns of the 3d person, and may have relative clauses dependent on them, as: *Iste, qui jam spe atque opinione praedam istam devorasset, commotus est*; *He, who* had in his mind already swallowed that booty, was perplexed. Cic. Verr. 2, 1, 51.

OBS. 2. The pronouns of the first and second persons may refer either to males or females (pronouns of the second person referring exceptionally to things personified), and, since they do not designate the sex of the person by their grammatical forms, have only a LOGICAL GENDER. Hence relative adjectives which have personal pronouns of the first or second person as grammatical antecedents, agree with the logical gender of these pronouns, as: *Tu, ecce, erras quae illum expectes*; Indeed you are mistaken who (when you) expect him. Plant. Most. 1, 3, 31.—*Id duae nos sole scimus, ego quae illi dedi, et illa quae a me accepit*; That only we two know, I who gave it to her, and she who received it. Ib. Cist. 1, 2, 26.—*Nam nos, quarum viri hinc absunt, solliciti sumus semper*; For we, whose husbands are absent from here, are always anxious. Ib. Stich. 1, 1, 4.—*Ego qui te confirmo, ipse me non confirmo*; I, who reassure you, am not so confident myself. Cic. Verr. 2, 3, 30.—*Res haec acerba videtur unicuique vestrum qui simili sensu commovimini*; This matter seems hard to each of you, who are affected by similar feelings. Verr. 2, 1, 44.—*Neque te, Massilia, praetereo, quae L. Flaccum militem cognosti*; Nor do I pass thee, O Massilia, which knowest L. Flaccus as a soldier. Ib. Flacc. 26, 63.

OBS. 3. The personal pronouns as antecedents of relatives may be dropped if no emphasis rests on them, and if they, as subjects, are easily supplied from the text, as: *Qui (= tu qui) agro colendo praesse flagitium putes, profecto Atilium hominem nequissimum iudicares*; You, who think it disgraceful to manage a farm, surely would pronounce Atilius a most wicked person. Cic. Rosc. Am. 18, 50.—If the relative has the force of an adverbial conjunction (denoting cause, co-incident action etc.), the pronouns to which they refer are generally dropped, if subjects: *Stulta multa sum quae vobiscum fabuler*; I am very foolish who (that I) am talking with you. Plant. Mil. 2, 5, 33.—Thus the pronouns of the second person are most always dropped if they are the subjects of an imperative: *Adestote omnes animis qui adestis corporibus*; Be all present with your minds who are present with your bodies. Cic. Sull. 11, 33.

OBS. 4. Since personal pronouns cannot, generally, take attributes (§ 276), relative clauses dependent on personal pronouns cannot, generally, take syndetic antecedents, except in the following instances: (a) If the relative clause is dependent on the syndetic antecedent *is* (sometimes *ille*) as predicate-nominative (R. 6, OBS. 3, E), this

<sup>1</sup> In human shape.—<sup>2</sup> brutality.—<sup>3</sup> to surpass.—<sup>4</sup> by whose agency (to whom he is indebted for the enjoyment; i. e. his parents).—<sup>5</sup> most delightful.—<sup>6</sup> in the most outrageous way.—<sup>7</sup> to shun.—<sup>8</sup> in animo alicuius versari, to pervade one's mind.—<sup>9</sup> to breathe.—<sup>10</sup> feels how he is affected; i. e. is conscious of his emotions.—<sup>11</sup> quantum debere, an infinitive clause, dependent on edidisset; debere being an impersonal passive predicate.—<sup>12</sup> to 'give out', to pronounce. The subjunctive is quasi-subjunctive, dependent on 'ex edicto dandum erat', which is equivalent to 'edictum praecipit ut daretur'. See p. 406, OBS. 1, (a).—<sup>13</sup> aliquid debetur, something is due.—<sup>14</sup> the edict of the praetor.

antecedent is retained even if a personal pronoun is the subject. Constructions of this kind must generally be recast in English, as: *Ego is ero qui semper fui*; LITERALLY: I will be he (the one) who I have always been (= I will be the same I have always been). Cic. Att. 11, 12, 3.—*Ego is sum qui hoc illi concedi putem*; LITERALLY: I am he who believe that this should be conceded to them (= I belong to those who etc.). Cic. Att. 7, 5, 5.—*Tu es ille cui crudelitas displicet*? Are you the man who dislikes cruelty? Ib. Pis. 8, 17.—Sometimes in this construction the antecedent *is* may be dropped (which is an exception to the rule R. 6, OBS. 3, E), as: *Tu es qui (= is qui) diligentissime pretium exquisisti*; You are the one that has most carefully inquired for the price. Cic. Verr. 2, 3, 30.—*Idem* If the syndetic antecedent is *idem*: *Ego idem nunc qui illas omnia res egi silentio, interpellor*; I, the same I, who transacted all this in silence, am now challenged. Cic. Prov. 12, 29.—(c) If the syndetic antecedent is placed after the relative clause, as: *Ego ipse Pontifex, qui caerimonias religionesque publicas sanctissime tuendas arbitror, is hoc, esse deos, persuaderi mihi plane velim*; I, being myself Pontifex, who believe that the public ritual and worship should be most sacredly maintained, I would greatly like that I could be persuaded of the fact that gods exist. Cic. N. D. 1, 22.—*Qui magister equitum fuisse tibi videretur, is per municipia cum caligis et lacernis cucurristi*; You who claim to have been a vice-dictator, you ran through the provincial towns in brogans and duster. Ib. Phil. 2, 30.—(d) Sometimes (mostly poetically) relative clauses are made dependent on 'ille ego' or 'ego ille'; Itaque ego ille qui semper pacis auctor fui, pacem cum Antonio esse nolo; I, the same who have always counselled peace, oppose a peace with Antonius. Cic. Phil. 7, 3.—*Ille ego qui quondam gracili etc.* (I who once sung etc.). Virg. Aen. 1, 1.

OBS. 5. Personal pronouns, as antecedents of a relative clause, are sometimes merged in a possessive adjective: *Illud quidem nostrum consilium laudandum est, qui meos civis servis armatis obicere noluerim* (literally: That opinion of ours is praiseworthy who did not wish; i. e. It is praiseworthy when I did not wish etc.). Cic. Fam. 1, 9\*.

1. Laudabant fortunas meas qui gnatum (son) habere tali ingenio praeditum. Ter. Andr. 1, 1, 71.—2. Id me minime refert qui sum natus maximus. Ib. Ad. 5, 4, 27.—3. Tu nostra, qui remansissimus, caede contentum te esse dicebas. Cic. Cat. 1, 3, 7.—4. Vestra, qui cum summa integritate vixistis, hoc maxime interest. Ib. Sull. 28, 79.—5. Vestra consilia acculantur, qui mihi summum honorem imposuistis. Sall. Jug. 85.—6. Vehementer intererat vestra, qui patres estis. Plin. Ep. 4, 13.

Rem. 8. There are relative clauses which have only a LOGICAL, but no grammatical antecedent. Such clauses pass over into co-ordinate relatives (R. 9), and are used to add facts or remarks pertaining to a whole sentence, or to any of its parts not being nouns or pronouns. The relative, in this construction, assumes the following forms: 1) That of the neuter singular *quod* (quantum, quale), representing the clause as referring to the idea of the 'fact' involved in the sentence to which it refers (§ 365, R. 24). 2) The form *quae res* in the place, and with the meaning of *quod*. 3) The form of an attributive relative, agreeing with a governing noun of general import which represents what is stated in the sentence in a more particular manner than by the general designation 'res' (*quae sententia, quod genus, qui honor* etc.).—The sentence to which the relative refers is called the 'LOGICAL ANTECEDENT' of the relative, and the relatives thus referring to logical antecedents are called 'LOGICAL RELATIVES'.

OBS. 1. Relative clauses of this kind form the transition from pronominal subordination to pronominal coordination (p. 473, OBS. 2), as: *Pompejus, quod mihi summo dolore est, ipse se afflixit*; Pompey has injured himself, which is very painful to me. Cic. Att. 2, 19, 2. Here the relative clause 'quod... est' does not form a member of the principal sentence 'Pompejus ipse se afflixit'. On the contrary, the principal sentence is represented as 'incorporated' in the clause by means of the relative *quod*, which implies 'which fact',—namely 'that Pompey injured himself'. But this incorporation is a cri-

\* A similar construction is sometimes applied to national adjectives, to which the relative refers as if to a national noun, as: *Vejens bellum ortum est, quibus Sabini arma conjunxerant*; The Veientian war arose with whom (= with which people) the Sabines had made an alliance. Liv. 2, 53.—National adjectives have exactly the same relation to national nouns as possessive adjectives to the corresponding personal pronouns. Thus the above-mentioned sentence might be thus changed: 'Nostrum bellum ortum est, quibus Sabini arma conjunxerant'. Madvig, who has no objection to this connection of relatives with possessives, censures the quoted passage of Livy—which is inconsistent.

terion of pronominal coördination (p. 473), being just the reverse of the principle involved in *subordination*. Nevertheless the clause is virtually and 'logically' *subordinate*, since it most frequently precedes the sentence to which it refers or is inserted in it (against the use in pronominal coördination by demonstratives), and may always be conceived as an *ordinary relative clause* dependent on a noun of general import ('*fact*') in apposition to the principal sentence, and hence forming a member of it (Pompey has injured himself, *a fact* which is very painful to me). Indeed this form of the apposition is frequently preferred in the English rendering to the Latin 'logical relative'. Even in Latin this kind of sentence-apposition (which is not admissible in ordinary relative constructions, see p. 506, Obs. 3) is frequently applied to the logical relatives (*id quod*; see Obs. 4).—Since logical relative clauses cannot be considered as being grammatically members of the principal sentence, it follows that they cannot take *syndetic antecedents* to represent them in the principal sentence.

Obs. 2. Logical relative clauses of this kind may have a **DOUBLE** relation, 1) that of an *ordinary relative clause* introduced by *quod* with an 'absolute' antecedent expressed or understood in the principal sentence; and 2) that of a *logical relative clause* conceived as apposition to *another clause*, dependent on the same principal sentence, as: Feci, *quod* profecto ante me nemo, *ut ipse* me per litteras consolärer; I succeeded to be my own comforter by literature, *a thing that* surely, nobody attempted before me, (literally: I did what nobody did before me, (namely) that I was my own comforter). Cic. Att. 12, 14, 3.—Nihilominus Helvetii *id quod constituerant* facere conantur, *ut e finibus suis exeant*; The Helvetians nevertheless undertook to carry out what they had resolved before, *namely the emigration* from their country, or 'The Helvetians nevertheless tried to leave their country, (which was) in accordance with their former plans.' Cæs. B. G. 1, 5.—Clauses of this kind, which must always be recast in rendering, may assume the inverted form according to R. 6, Obs. 4, in which instance a *syndetic antecedent* must be used, as: *Quod* a Verre pridie Heraclius impetrare non potuerat, *id* ei postridie venit in mentem, *ex lege Rupilia sortiri dicat oportere*; On the next day came to Verres's mind *what* Heraclius could not obtain from him the day before, *namely* that according to the Rupilian law he must draw the judges by lot. Cic. Verr. 2, 2, 17. Here the infinitive clause '*ex lege... oportere*' is the subject-clause of the period; the (logical) relative clause '*quod... non potuerat*' is in apposition with it, '*id ei... in mentem*' being the principal sentence. At the same time the relative clause '*quod... potuerat*' is an *ordinary absolute relative clause* in regard to the principal sentence, in which its *syndetic antecedent id* represents the subject. See Ex. 1, 2.

Obs. 3. Logical relative clauses with *quod* mostly occur in the form of *parenthetical clauses*, so as either to precede the sentence which they incorporate, or to be inserted in it, or in the period to which they belong. They are variously rendered in English, generally by placing them *after* the sentence (with '*which*'), or by inserting them in the form of a demonstrative clause with '*and*', or by changing the construction substantively; as: Denique (confirmo), *quod est indignissimum*, per tribunos plebis reges in civitate constitui; Lastly I assert (*and this is the most outrageous thing*), that kings are introduced by the tribunes of the people. Cic. Leg. Agr. 2, 6.—Qui virtute praediti sunt, soli sunt divites; soli, *quod est proprium divitum*, contenti suis rebus sunt; The virtuous alone are rich; they alone are contented with their own, *which is a criterion of wealth*. Cic. Par. 6, 52.—Captæ urbis Romæ, *quod post paucos accidit annos*, clades; The disaster of the capture of Rome, *which happened after a few years*. Liv. 5, 21.—See Ex. 3-5.—The relative clause is placed *after* the sentence, either if both propositions are very short and plain, or to give emphasis to the facts asserted in the clause: Natus est Gadibus, *quod nemo negat*; He is born at Gades, *which nobody denies* (which is not disputed).—At erat mecum senatus, et quidem veste mutata, *quod pro me uno post hominum memoriam publico consilio susceptum est*; But the Senate stood by me, and moreover, in the garb of misery, *an honor which, as far as historical records go, has been shown to me alone by official action*. Cic. Plane. 35, 87. See Ex. 6. If the relative clause follows the sentence, '*quæ res*' is sometimes used in place of *quod*, which is generally the case if the relative is required to be in an oblique case (see below): Cæsar navis paullum removēri jussit; *quæ res* magno usui nostris fuit. Cæs. B. G. 4, 25.—Cuniculis ad aggerem vineasque actis, *cujus rei* sunt longe peritissimi Aquitani; After digging mines towards the rampart and the covered ways, *in which* (art) the Aquitani are most skillful. Ib. 3, 21.—Often *quod* is connected by *ipsum*, in which instance it is often impossible to render without impairing the force of the relative construction by substituting an English coördination: Orat vos ut hanc urbem sibi intueri liceat, *quod ipsum* fortuna eriperat, nisi unius amici opes subvenissent; He implores you to allow him the sight of this city, *and even of this boon* fate would have deprived him without one friend's help. Cic. Rab. Post. 17, 48.—*Quod*, as a logical relative, is generally used only in the nominative, accusative and ablative singular, as: Docui nullam rationem huic corumpendi fuisse; *ex quo* intelligitur etc.; *From which* it is clear that etc. (*which goes to*

show etc.). Cic. Clu. 23, 64. Thus in the construction with a comparative ablative, as: *esse turpius*? Hieronymus selected out of many books of Isocrates perhaps thirty lines, *a baseness which could not be surpassed* (literally: *than which* what could be baser?). Cic. Or. 56. Sometimes, however, logical relatives occur in other cases, and even in the neuter plural, as in the passage Quint. 1, 2, 12, quoted Obs. 5.—In the same way as *quod*, *quantum* is frequently used in a parenthetical clause, restricting the principal predicate to a measure indicated by the clause (being rendered '*as much as*'), as: Hic ego, *quantum* humano consilio efficere potui, summam teci cogitationum mearum; Here I struck the balance of all my thoughts, *as much as* I could do with human wisdom. Cic. Fam. 1, 9, 10. See Ex. 7.

Obs. 4. Instead of *quod* in logical relative clauses, the form *id quod* is very frequently used, being rendered in the same way as the simple *quod*. This '*id*' is a *syndetic antecedent* of *quod*, but without belonging to the grammatical frame of the principal sentence. It must be conceived as marking the relation of the relative clause as that of an apposition to the principal sentence, as: Pompejus ubi, *id quod* maxime expectari videbatur, ostendit se tribuniciam potestatem restitutum; When Pompejus showed that he would restore the office of the tribunes, *a measure which* seemed to be generally expected, etc. Cic. Verr. 1, 15.—Intelligitur, *id quod* jam ante dixi, imprudente Sulla scelera hæc fieri; It is evident that these crimes, *as I* have already remarked before, are committed without Sulla's knowledge. Cic. Rosc. Am. 9, 25. See Ex. 8, 9.

Obs. 5. Frequently in the logical relative *quod* not the whole sentence is incorporated, but such parts of it as may be conceived as separate ideas. Often the idea to which the relative thus refers must be elicited from the sentence by inference. Such constructions are frequently repugnant to the English idiom, and must be recast, as: Si etiam monendi estis a me, *quod non estis*, videor hoc præcipere posse ut etc.; If you must be, also, admonished by me, *which is not necessary*, I would recommend this, that etc. (literally: If you are to be admonished, *which you are not*). Cic. Font. 19, 42.—Sic mihi persuâsi, quum simplex animi natura esset, non posse eum dividi; *quod* (i. e. dividi) si non posset, quum posse interfere; I am satisfied that the soul, since its nature is simple (not compound), cannot be divided; and that if it could not be divided, it could not perish. Cic. Sen. 21, 78.—In this instance the logical relative may be in the plural, if it refers to several coördinate ideas, contained in the principal sentence, as: Neque enim scribenti, edicenti, cogitanti, præceptor assistit, *quorum* aliquid agentibus cujuscunque interventus impedito est; For the teacher cannot assist his pupil when the latter is writing, memorizing, or reflecting, the intervention of any one being a hindrance to those engaged in any of these acts. Quint. 1, 2, 12. [Here the logical relative *quorum* (= *quarum* in Latin) refers to the actions *scribere, edicare, cogitare*, which are implied in the personal participles *scribenti* etc.] See Ex. 10.

Obs. 6. The ATTRIBUTIVE form of the relative, with a noun as governing word, is used to designate the act contained in a preceding sentence by a *substantive term*, which may either denote the action as such, or any other idea (or just a *time-point*) referring to the action contained in the sentence. Such substantives are made the governing nouns of the relative without being its antecedents, in a similar way as in the instance mentioned R. 5, Obs. 3, only that in the instance, mentioned there, the relative has a *grammatical antecedent* in the governing sentence, while here the antecedent of the relative is *logical*. Such constructions must be frequently recast in English, either by making the governing noun of the relative its antecedent connected with the governing sentence in the form of an apposition, or by using the form of a coördination, as: Pomptinus, qui a te tractatus est singulari fide, *cujus* tui beneficii sum ego testis, præstat tibi memoriam quam debet; Pomptinus, who has been treated by you with great friendship, *a kindness to which* I can bear testimony, remembers you as he ought. Cic. Fam. 3, 10, 3.—Quidam sibi nullam societatem communis utilitatis causâ statuunt esse cum civibus, *quæ sententia* societatem omnem distrahit civitatis; Some hold that no bond unites them with their fellow-citizens in regard to their common interests, *an opinion which* dissolves all civil society. Cic. Off. 3, 6, 28.—Ubi impedimenta nostri exercitus ab Gallis visa sunt, *quod* tempus inter eos committendi prelii convenerat, omnibus copiis provolvērunt; When the baggage train of our army was seen by the Gauls, *which moment* they had agreed upon as the signal for battle, they rushed forward etc. Cæs. B. G. 2, 19.—Atticus cum civis Romanus, L. Clodius, L. Torquatus Cæsar, *quæm* atticus sic universa civitas Atheniensium præsecuta est etc.; Atticus, *whose* death was mourned by the whole community, so that etc. Nep. Att. 4, 5. See Ex. 11-13.

Obs. 7. The form of the logical relative clause is used for many idiomatic expressions which cannot be literally rendered in English:

A. Relative clauses with *quod* are used with the force of an English comparative clause with 'as', or of a conditional clause with 'if':

(a) In the formula *quod ajunt* (inst. of *ut ajunt*, or *quomodo ajunt*), referring to a proverb, = 'as people say', 'as the proverb has it', 'according to the proverb', as: *Nec sepulera legens vercor, quod ajunt, ne perdam memoriam*; Nor am I afraid of losing my memory by reading sepulchres (sepulchral inscriptions), as the proverb says. Cic. Sen. 7.—*Urge igitur, nec transversum unguem, quod ajunt, a stilo*; Go on, therefore, but do not go a nail's breadth beyond (from) the pen, as people say (i. e. do not speak, but confine yourself to writing). Cic. Fam. 7, 25, 2. [Here, the proverb is the sentence incorporated in the logical relative *quod*, = which thing (proverb) the people say.]

(b) In a restrictive sense = 'as far as' (mostly with the subjunctive, equivalent to 'quantum' with the indicative; see Cic. Fam. 1, 9, 10, quoted Obs. 3). Thus it occurs 1) in the formulas '*quod sciam*', as far as I know; to the best of my knowledge; '*quod audierim*', '*quod cognoverim*', as far as I have heard, (frequently connected with the restrictive particle *quidem*): *Qui quum ante hanc pugnam tiro esset, quod sciam*; Since he was a novice before this battle, as far as I know. Cic. Rosc. Am. 6, 17.—*Aristides unus post hominum memoriam, quod quidem nos audierimus, cognomine Justus est appellatus*; Aristides was the only one who, as far as we have heard, was called the Just. Nep. Ar. 1, 2. See Ex. 14, 15.—These formulas cannot be explained by '*ita ut sciam*', as the grammarians do, which would be more in need of explanation than *quod sciam*. They are subjunctives of guarded statement, or of individual opinion, applied to an ordinary (logical) relative clause. '*Gajus veniet quod*' (= *id quod*) *scio* would mean 'Gajus will come, a fact which I know'. But '*Gajus veniet, quod sciam*' means 'He will come, a fact which I think I know' = 'as far as I know'.—2) In several expressions with the meaning 'as far as something' (which is expressed in the principal sentence) is consistent with something, or 'not prejudicial to something' (mostly expressed in the clause by an ablative); or 'if something is consistent with something'. These formulas have always the predicate '*facere possim*' (*posses* etc.), or '*facias*'; '*feri possit*' (*posset*), or '*fiat*' (*fieret*), introduced by *quod* as accusative (with *facere*), or nominative (with *feri*); as: *Cupio tibi aliquā ex parte, quod salvā fide* (*facere*) *possim, parere*; I wish to spare your feelings in some respect, as far as I can do consistently with my duties (as far as is consistent with etc.). Cic. Rosc. Am. 34, 95.—These expressions mostly occur in connection with the ablative *commodo* (= 'as far', or 'if consistent with somebody's interest or convenience'), or '*sine molestiā*' (= 'as far', or 'if consistent with somebody's convenience'); as: *Sed... quod commodo tuo fieri possit, utriusque nostrum magni interest ut te videam*; But... it is very much in the interest of both of us that I should see you, if consistent with your convenience. Cic. Fam. 3, 5, 4.—*Que tibi mandavi, velim cures, quod sine molestiā tuā facere poteris*; I wish you would attend to what I have placed in your hands, as far as convenient to you. Cic. Att. 1, 5, 7.—*Senātus tibi decernit ut regem reddas, quod commodo reipublice facere possis*; The Senate charges you with re-instating the king, as far as (or if) consistent with the interest of the republic. Cic. Fam. 1, 1, 3.—*Senātus censuit, ut, quicumque Galliam provinciam obtinēret, quod commodo reipublice facere posset* (as far as consistent etc.), *Æmōs defenderet*. Cic. B. G. 1, 35.—Instead of *quod*, the conjunction *si* is used in the same sense: *Scribit Labiēno, si reipublice commodo facere posset, cum legione ad finē Nerviorum veniat*; He wrote to Labienus to march with a legion to the Nervian territory, if he could do so consistently with the public interest. Cic. B. G. 5, 46.—In these expressions *quod* has the force of *ita ut* in the sense explained p. 637, No. 2.—3) For some similar expressions, with both subjunctive and indicative, see p. 560, Obs. 2.—See Ex. 16-18.

B. A relative clause introduced by '*quod attinet ad*' with an accusative denotes 'regarding or concerning somebody or something', 'as to somebody', 'with respect to something', 'on my, thy, his part' being often connected with *quidem*. It is used either to emphasize the person or thing spoken of in the principal sentence (mostly as parenthetical clause, = *hoc ad me, te, id* etc. *attinet*, that which is said refers to me, thee, it etc.); or as a formula of transition, if the discourse passes over to a new subject (= *Hoc, quod sequitur, ad me, te, illum* etc. *attinet*); as: *Equidem, quod ad me attinet, quo me verum nescio*; I, on my part (As to me, I) do not know where to turn. Cic. Clu. 1, 4.—*Ut se tota res habeat, quod ad eam civitatem attinet, demonstrabitur vobis alio loco*; How the whole matter stands, in regard to that State (as far as that State is concerned) will be explained to you at another place hereafter. Cic. Verr. 2, 2, 5.—*Ad legatos quod attinet, quid a me fieri potuit quam ut etc.*? As to the delegates, what could be done by me but that etc. Cic. Fam. 3, 3, 2. See Ex. 19-21.

C. The relative formulas '*quod reliquum est*', or '*quod superest*', ('as to the rest' = *ceterum*), are mere formulas of transition, being explained in the same way as the above-mentioned expressions (= This, which will be directly mentioned, still remains to be said); as: *Quod superest, si verum illud (proverbium) est, certe permanebunt*; For the rest, if that proverb is true, they will surely remain. Cic. Att. 5, 11, 5.—*Quod reliquum*

*est, velim augeas tua in eum beneficia omnibus rebus quæ te erunt dignæ*; As to the rest, I wish you would increase your favors to him in all ways that are becoming you. Ib. Fam. 13, 28, 2. See Ex. 22, 23.

D. The logical relative takes an ATTRIBUTIVE form in the sense explained Obs. 6, in those clauses which have the force of the preposition *pro* (according to, in accordance with, p. 35, R. 62), being rendered in the same way, or by 'with' or 'considering'; as: *Tu, si esset factum, quæ tua est humanitas, ascripsisses*; If it had been done, you would have added it (said so) in your letter, in accordance with your courtesy (considering your courtesy; literally: you would have added it, which is your humanity). Cic. Att. 7, 7, 1. In these expressions the relative is, grammatically, the predicate-noun of the clause (humanitas tua *hec* est; *Such* is your humanity), the subject being an abstract noun, designating the contents of the principal sentence by a substantive term, the same as in the instance mentioned Obs. 6. The above-mentioned example, in its original grammatical conception means 'Your humanity is such as represented in the principal sentence', a clause which is parenthetically added to the sentence. Thus: *Id, qui tum pudor hominum erat, vim vinculum satis validum legis*; This seemed to be a sufficient means to enforce the law, in accordance with (considering) the discretion of men at that time (such was men's discretion at that time). Liv. 10, 9. See Ex. 24, 25.—In the same way the relative *qualis*\* is used to designate the idea conveyed by the principal sentence as being like the idea of the noun which is the subject of the clause, as: *Abelux, fidus ante Penis, tunc, qualia plerumque sunt barbarorum ingenia, cum fortunâ mutaverat fidem*; Abelux, having been faithful to the Punicans before, then changed sides together with fortune, in keeping with the general character of barbarians (literally: of which kind the character of the barbarians generally is). Liv. 22, 22. Often *quantus* is used in the same sense, in regard to intensity, as: *Quanta ingenia in nostris hominibus esse video, non despero, fore aliquem aliquando qui existat talis orator qualem quaerimus*; According to (to judge from) the great talents which I see in our countrymen, I do not despair that etc. Cic. Or. 1, 21. See Ex. 26.—Instead of using a relative as predicate-nominative, the same relative is often used as predicate-ablative of quality, as: *Quæ ex prudentiâ, nihil te fugiet si meas litteras diligenter legeris*; According to (With) your quick perception, nothing will escape you if you read my letter with attention. Cic. Fam. 11, 13, 1. See Ex. 27, 28.

1. (Legati dixerunt) omnibus Gallis idem esse faciendum quod Helvetii fecerint, ut domo emigrant. Cic. B. G. 1, 31.—2. Nonne ostendis, id te vereri quod præter ceteros in patria non debitas, ne quando liberis proscriptorum bona patria reddantur? Cic. Rosc. Am. 50, 145.—3. Cassius noster, quod mihi magnæ voluptati fuit, feliciter ab Antiochæa hostem rejecerat. Cic. Fam. 2, 10, 2.—4. Ne connivente quidem te, quod ipsum erat scelus, delectus servorum habebatur. Ib. Pis. 5, 11.—5. Hominem audacissimum habuimus in civitate C. Cimbrici, et quod inter omnes constat, insanissimum. Ib. Rosc. Am. 12, 33.—6. Ob eas res XV dierum supplicatio decreta est, quod ante id tempus accidit nulli. Cic. B. G. 2, 35.—7. Tres sunt res, quantum ego existimare possum, quæ obstant Sex. Roscio. Cic. Rosc. Am. 13, 35.—8. Speraverunt, id quod assecuti sunt, se injecturos vobis causam deliberandi. Ib. Cæc. 2, 4.—9. Postremo prospicite, iudices, id quod ad dignitatem populi Romani maxime pertinet, ut plus apud vos preces virginis Vestalis quam minæ Gallorum valuisse videantur. Ib. Font. 21, 49.—10. Lacedæmonii Agin regem, quod nunquam antea apud eos acciderat, necaverunt. Ib. Off. 2, 23.—11. Omnes antiquæ gentes regibus quoniam paruerunt, quod genus in primis ad homines sapientissimos delectabatur. Ib. Leg. 3, 24.—12. Cæcilius Atticum heredem fecit ex 14 dodrantibus, ex quibus hereditas accipit tredecim centies. Cic. Nep. Att. 5, 2.—13. Fecit ut ipse me per litteras consoleretur, quam librum ac, ut illum se descripsisset, honoraret. Cic. Att. 12, 11, 3.—14. Quantus Canius numquam tam esset pauciorum. Nihil, quod sciam, inquit (videtur). Ib. Off. 3, 14.—15. Epictetus se unus, quod sciam, sapientem profiteri est ausus. Ib. Fin. 2, 3, 7.—16. Nunc vero censeo, quod commodo tuo facere poteris, venias ad id tempus quod scribis. Ib. Att. 1, 4, 1.—17. Pergratum mihi feceris si Cossinium, quod sine molestiâ

\* Some grammarians (Meibius § 959, note 2, deny that *qualis* is ever used in this sense. I return to the children of the proscribed their paternal estates = *amovere*, literally 'to move an eye'; here in the meaning 'to banish, to stir', the indifference of the man at the facts transpiring being imputed to him as a crime. = *delectum habere*, to make a draft = *assequi aliquem*, to succeed in something. = *impicere aliquem alienâ*, to force something on somebody. = the necessity of examining the matter. = *look out, take care*. = *maxime pertinet ad aliquid*, it greatly concerns something. = *threats*. = *valere apud*, to have weight with somebody. = *The relative clause refers not to the whole principal sentence, but only to the predicate and its object.* = *form of government*. = *was conferred on, i. e. was exercised by.* = *at, of.* = *see p. 116, R. 105.* = *inheritance.* = *p. 169.* = *by writing (i. e. a book).* = *Render by coördination: The book which I wrote etc.* = *to copy.* = *the book-copyists.* = *historical present.* = *a holiday.* = *was the only one who.* See p. 251, Obs. 7. = *to profess himself as wise.*

*tuū flet, si quis in re opus ei fuerit, iuvenis.* Ib. Fam. 13, 23, 2.—18. Tu velim, *quod commodo valetudinis tuæ aut, quam longissime poteris, obviam nobis properes*<sup>1</sup>. Ib. 14, 5, 1.—19. Sic in provinciâ nos gerimus<sup>2</sup>, *quod ad abstinentiam<sup>3</sup> attinet*, ut nullus teruncius<sup>4</sup> insumatur<sup>5</sup> in quemquam. Ib. Att. 5, 17, 2.—20. *Quod ad popularem rationem<sup>6</sup> attinet*, hoc videmur esse consecuti<sup>7</sup> ut ne quid agi<sup>8</sup> cum populo sine vi possit. Ib. Fam. 1, 2, 4.—21. *Quod ad me attinet*, jam adverse<sup>9</sup>, jam<sup>10</sup> secundæ res me ita fraudaverunt<sup>11</sup> ut rationem sequi<sup>12</sup> quam fortunam malim. Liv. 30, 30.—22. Hæc quidem hactenus<sup>13</sup>; *quod reliquum est*, quotidie tabellarios<sup>14</sup> habebis. Cic. Att. 16, 15, 3.—23. *Quod superest*, scribe quam accuratissime quid placeat, quid censeas. Ib. 9, 19, 4.—24. Si mihi permisisses, rem, *quæ meus amor in te est*, conficissem<sup>15</sup> cum coheredibus<sup>16</sup>. Ib. Fam. 7, 2.—25. Non dubito quin sine meâ commendatione, *quod tuum est iudicium de hominibus*, ipsius Lamiæ causâ omnia studiōse facilius sis. Ib. 12, 29, 2.—26. Huic profecto ipsi, *quantum est situm<sup>17</sup> in nobis*, opem ferre debemus. Ib. Arch. 1.—27. Ajax, *quo animo* (fuisse) traditur, milites oppetere<sup>18</sup> mortem quam illa perpeti malisset. Ib. Off. 1, 31.—28. Pater tuus si<sup>19</sup> viveret, *quâ severitate fuit*, tu profecto non viveres. Ib. Dom. 32.

Rem. 9. The form of the relative clause is very frequently used with the force of a PRONOMINAL PERIODICAL COÖRDINATION (p. 473, OBS. 2, 4). Such relatives have in every respect the function of the demonstratives *hic* or *is*, having antecedents only in that sense in which every demonstrative and the pronoun *is* of the third person are said to have antecedents (P. 1. § 232). The propositions introduced by these relatives are not clauses, but independent sentences. Relatives of this kind are called COÖRDINATING RELATIVES.

OBS. 1. Coördinating relatives are mostly used for periodical coördination (OBS. 2 foll.). But sometimes they are used for a coördination of propositions within a period. In this instance they always include one of the coördinating conjunctions *et* or *autem* (and its synonyms) (*quæ = et is* or *sed is*). Sometimes they represent a causal or consecutive coördination (*qui = nam is*; or *is igitur*) within a period. Such relatives are either rendered by the required English coördinating conjunctions in connection with a demonstrative or a pronoun of the third person, or by participial construction; as: Ratio docet esse deos; *quo concessio* confitendum est eorum consilio mundum administrari; Reason teaches that there are gods; and if this is granted (this granted) we must acknowledge that the world is ruled by their will. Cic. N. D. 2, 30, 75.—Plerique existimant, si acrius Sulla insequi voluisset, bellum eo die potuisse finiri; *cujus* consilium reprehendendum non videtur; Most people think, that the war might have been finished on that day if Sulla had made up his mind to pursue the enemy with greater energy; but his management, in my opinion, is not reprehensible. Cæs. B. C. 3, 51.—Cupiditates sunt in-satiabiles, *quæ* non modo singulos homines, sed universas familias evertunt; Appetites are insatiable, *destroying* not only single individuals, but whole families. Cic. Fin. 1, 13.—Multas ad res peritiles Xenophonti libri sunt; *quos* legite, *quæso*, studiōse; Xenophon's writings are very useful for many purposes; hence do read them with diligence. Cic. Sen. 17, 59.—Ex. 1, 2.

OBS. 2. The form of PERIODICAL pronominal coördination by means of a relative is more frequently used than a coördination by means of a demonstrative, if the period connected with previous periods is introduced by a protasis, or by any clause (finite or participial) preceding its principal sentence. In this instance the relative, with its governing noun, precedes the conjunction of the clause, and is the first word in the construction of the ablatives absolute; as: Illa Stoicorum de se opinio firma in Rutilio et stabilis inventa est. *Qui quum* innocentissimus in iudicio vocatus esset, oratorem adhibere noluit; That self-respect of the Stoics was found firm and unalterable in Rutilius.

<sup>1</sup> *Obviam properare*, to go to meet by a rapid journey.—<sup>2</sup> *se gerere*, to act.—<sup>3</sup> *abstinentia* was a technical term, denoting the quality of a higher officer, especially of provincial governors, who took no gifts. We have no term for it in English, although we sometimes need it: 'as to gift-refusing'.—<sup>4</sup> not a farthing; *teruncius* being three-twelfths of an as.—<sup>5</sup> assessed upon, taken from; *insumere* implying the idea *sumtus facere in*.—<sup>6</sup> popular government.—<sup>7</sup> to have arrived at that point where.—<sup>8</sup> *aliquid agitur cum populo* was a technical term applied to those political affairs which had to be decided by a vote of the people: Nothing can be transacted by the people without violence.—<sup>9</sup> *adverse res*, adversity; *secundæ res*, prosperity.—<sup>10</sup> *jam . . . jam*, now . . . now.—<sup>11</sup> disappoint.—<sup>12</sup> to rely upon reason.—<sup>13</sup> an elliptical expression; supply *dicta sint*: 'So much for this subject'.—<sup>14</sup> letter-carriers will be at your disposition.—<sup>15</sup> to arrange.—<sup>16</sup> coheir.—<sup>17</sup> rests with us (*situm esse*, to be situated, to lie).—<sup>18</sup> to expose himself to death.—<sup>19</sup> See p. 479, OBS. 10.

When he, wholly innocent, was placed under trial he declined to employ a defender. Cic. Brut. 30.—*Quam facultatem si quis casus eripuerit*, mea tamen in te officia constabunt; If any incident should deprive me of this privilege, my services to you will still remain the same. Cic. Fam. 3, 5, 4.—Thus coördinating relatives are elegantly placed before relative indirect questions, as: *De quo quid sentiam* nihil attinet dicere; What I think of him, it is of no use telling you. Cic. Fam. 4, 7, 3.—Co-ordinating relatives may even be placed before other relative clauses to which they belong as demonstratives, as: *Eis quibus quæ* maxime differant ab ceteris hæc sunt; Those of them which differ most from the other (animals), are the following. Cæs. B. G. 6, 15. See Ex. 3-10. Here belong the frequent connections *quæ quum ita sint*, *quo facto*, *qua re cognita* etc.—Relative co-ordinations of periods are likewise (but not so frequently) used when the co-ordinate period begins with the principal sentence, or consists only of independent sentences, as: Cimon testarum suffragiis decem annorum exilio multatus est. *Cujus* facti celerius Atheniensis quam ipsum poenituit; The Athenians, however, regretted this fact quicker than he himself. Nep. Ar. 3. Here belong the frequent connections by *quomobrem*, *qua de causâ*, *quapropter*, *quo tempore*. See Ex. 11-14.

OBS. 3. In the same way (but rarely) the relative adverbs *ubi*, *unde*, and *quo* are used for co-ordination in place of the adverbs of the definite form (*ibi*, *inde*, *eo*), as: Inde Emilius Lacedæmonem adit ac Pallantium. *Unde* per Megalopolim Olympiam descendit. *Ubi* et alia spectanda visa, et Jovem velut præsentem intuens motus animo est; From there he proceeded by way of Megalopolis to Olympia. There he saw etc. Liv. 45, 28.—Emilius Apolloniam ad decem legatos pergit. *Quo* quum Perseus obviam processisset etc.; When Perseus had come to that place to meet them. Ib. Ex. 15-17.

OBS. 4. The neuter relative *quod* is used as a GENERAL CONNECTIVE of a period which is opened by a PROTASIS with *si* (*quod* and *si* being often written as one word). In this connection *quod* does not refer to any antecedent, except to the whole result of what has been stated in previous periods. It represents the *protasis* (and sometimes the principal sentence) as connected in a general way with the preceding period or periods, having the force of the co-ordinating conjunctions *et*, *autem*, *itaque*, but with less definiteness than these. Originally it probably was conceived as having the force of '*quod attinet ad hoc quod dixi*', where '*quod attinet ad*' is only conceived in the mind, '*hoc quod dixi*' being represented by '*quod*'. If used with this original meaning, it is a mere particle of transition, and seems a mere expletive to those accustomed to the English conception, as: Venit mihi in mentem subverti interdum ne te delectet tarda decessio. *Quod si* nihil haberes sensum nisi oculorum, prorsus tibi ignoscere: Sometimes it strikes me that you desire a tardy departure. With respect to this (concerning this point) I would pardon you if you had no other sense than that of sight. Cic. Fam. 4, 10, 2.—Hence *quod si* may represent the action of the protasis, or of the principal sentence as occurring '*in spite of*' of what has been said before (the same as a weakened *nihilominus*): *notwithstanding* what has been said, where the previous discourse is incorporated in the protasis with the force of a concessive clause, being variously rendered (as '*however*', '*indeed*', '*nevertheless*'), as: *Quod si* a te non impetro, cogor fortasse facere quod non mihi reprehendunt; *However*, if (if indeed) you should not comply with my wish, I perhaps, shall be compelled to do what some people object to. Cic. Fam. 5, 12, 8. Thus with reference to the principal sentence: *Quod si* id egissemus quod ne in mentem quidem nobis veniret, omne tempus una fuisset; *However* (if nevertheless if) we had done what did not even enter our minds, we would have been all this time in each other's company. Cic. Fam. 5, 15, 5.—*Quod si* licet desinere . . . ego vero libenter desino; *Nevertheless* (indeed) if it is allowed to stop . . . I shall gladly stop (considering what is mentioned before). Cic. Mur. 4, 9.—*Quod si* in *quod si* may represent the previous statements as REASONS for doing the action expressed in the clause or in the principal sentence (*quod si* = *quæ de causâ*, *Ex quo*, or *igitur*). In this instance *quod si* may be rendered by '*if there-fore*', '*hence if*', '*if then*'; as: *Quod si* mihi tuâ clementiâ opem tuleris, omnibus has been said you should assist me by your generosity, I will be at your service in all things. Cic. Fam. 5, 4, 2.—*Quod si* te adducimus ut hoc suscipias, erit materies digna facilitate tuâ; *If, therefore*, we can induce you to undertake this, it will be a subject worthy of your talents. Cic. Fam. 5, 12, 3.—Lud. delectationem tibi nullam attulissent, quæ nostrum delectationis habuisti; The games would have given you no pleasure. *Itaque*, if you and indeed if you, during those days were engaged with your greater Perseus, you had far more enjoyment than any of us. Cic. Fam. 7, 1, 3.—*Quod si* is frequently used in the meaning '*but if*' (*si autem*), which is very rarely found, while '*si vero*' is frequently found, being more emphatical than *quod si*, as: *Quod si* veteris contumelia obliviſci vellet, nam etiam recentium injuriarum memoriam deponere posse? *But even if* he would forget the old score, could he also efface the remembrance of the recent offences? Cæs. B. G. 1, 14.—Sometimes *quod* in *quod si* expresses a copulative con-

nection of the protasis with the previous periods, rendered by 'and if', 'and again if' (= *praeterea si*): *Quodsi* essem eā perfidiā quā sunt ei qui... tamen eā stultitiā certe non fuisset ut etc.; *And if* I really were as treacherous as those who etc., I certainly would not have been foolish enough to etc. Cic. Fam. 3, 10, 6.—*Quodsi* id est maxime ascripti, omnia ad suam utilitatem referre, quid mihi tandem erat utilis quam hominis nobilissimi conjunctio? *And again* (aside from the reasons given before), *if* to have always one's private interest in view is the chief evidence of a schemer, what could have been more in my interest than the connection with one of the most prominent men? Cic. Fam. 3, 10, 9.—Very frequently *quodsi* serves to increase the force of a simple *si*, corresponding to 'nay if', 'indeed if' implying a *gradation* with respect to former similar statements: *Quodsi* Romae Pompēus privatus esset, tamen ad tantum bellum is erat diligendus; *Nay if* Pompey were in a private capacity at Rome, it would still be necessary to select him for that war. Cic. Leg. M. 17, 50.—If *quod* in connection with *si* has the meaning of an ordinary co-ordinating relative (= *hoc*), it is generally separated by one or more words from *si*, as: *Quod tu si* tanti facies quanti ego semper judicavi faciendum esse; *If you value this* as high as etc. Cic. Fam. 3, 10, 1.

Obs. 5. Sometimes (but rarely) *quod* is similarly used in connection with other subordinating conjunctions, as with *nisi*, *ubi*, *quum*, *ut* (in Plin. H. N. 18, 23), *ne* (in Col. 5, 11), and sometimes before the relative *qui* and the optative particle *utinam*. In all these connections it is either omitted in rendering, or translated in a way similar to the versions mentioned Obs. 4, as: *Quod ubi* ille intellexit id agi atque id parari ut etc.; *When* he (from these facts) understood that it was the plan to etc. Cic. Verr. 2, 1, 26.—*Quod ubi* Crassus animadvertit, suas copias non facile didici... non cunctandum existimavit quin pugna decertaret; *When* Crassus thus perceived that it was not easy to divide his troops... he did not hesitate to make an attack on the enemy. Cæs. B. C. 3, 23\*. See Nep. Ham. 1; Cic. Cael. 32, 79; Ib. Or. 2, 49; Liv. 6, 8; Cæs. B. C. 3, 68; Cic. Phil. 10, 4, 9.

1. Magna est vis conscientiae: *quam* qui negligunt, quum<sup>1</sup> me violare<sup>2</sup> volent, se ipsi indicabunt<sup>3</sup>. Cic. Cat. 3, 12, 27.—2. Centuriones nutu vocibusque<sup>4</sup> hostes<sup>5</sup> si introire vellent vocare cepērunt; *quorum* progredi ausus est nemo. Cæs. B. G. 5, 43.—3. *Quorum* iniqui<sup>6</sup> sermones<sup>7</sup> quum<sup>8</sup> ad me per homines honestissimos perferrentur<sup>9</sup>, habui non temporum solum rationem<sup>10</sup> meorum, sed etiam naturae<sup>11</sup>. Cic. Fam. 1, 9, 20.—4. *Quod quoniam* tibi exposui, facilia sunt ea quae a me de Crasso requiris, Ib. 1, 9, 19.—5. *Quod tibi ut*<sup>12</sup> planius<sup>13</sup> exponam, altius<sup>14</sup> paulo rationem consiliorum meorum<sup>15</sup> repetam necesse est. Ib. 1, 9, 1.—6. *Quae quidem* cohortatio<sup>16</sup> ne<sup>17</sup> tibi inanis<sup>18</sup> aut sine causa<sup>19</sup> suscepta<sup>20</sup> videatur, illa me ratio movit<sup>21</sup> ut considerares in omni reliqua vita quibus<sup>22</sup> crederes, quos caveres<sup>23</sup>. Ib. 1, 7, 9.—7. *Quod quamquam* minime miror, doleo tamen te non tuis bonis<sup>24</sup> delectari potius quam alienis malis laborare<sup>25</sup>. Ib. 4, 3, 1.—8. *Qui si* est talis qualem tibi vidēti scribis, ego quoque aliquid sum. Ib. 6, 18, 4.—9. *Quod cujusmodi* sit, satis intelligere non possum. Ib. 5, 2, 1.—10. Occupato in aliis bellis Cyri, Lyoi rebellare. *Quibus* iterum<sup>26</sup> *quod* *si* arma<sup>27</sup> *et* *qui* adstant<sup>28</sup> sunt. Just. 1, 7.—11. *Quod* colliberis<sup>29</sup> ad te scribo qui jam olim hostes Latini fuerunt. Cic. Fam. 1, 7, 8.—12. *Quod* non multo secus<sup>30</sup> feret, si is rempublicam tenet<sup>31</sup>, quem scilicet sumus. Ib. 1, 9, 2.—13. *Quod* quidem tempore non ego causam nostram, sed eos<sup>32</sup> improbam<sup>33</sup>. Ib. 6, 1, 5.—14. *Quoniam* *ut* paulo ante posui<sup>34</sup>, si essent omnia mihi solutissima<sup>35</sup>, tamen in republica non alius essem atque<sup>36</sup> nunc sum. Ib. 1, 9, 21.

\* Some grammarians (Kühner, § 145, note 21) assert that whenever *quod* introduces a clause whose predicate governs an infinitive clause, as for inst. in the above-quoted passages, *quod* is an ordinary relative with the force of what we call syndetic antecedent of the infinitive clause. This learned grammarian would probably have hesitated to make this assertion if he had considered that *syndetic antecedents* never can take a relative form. Moreover, syndetic antecedents are always 'emphatic', and he himself states that *quod* can never be used as a co-ordinating relative, if the determinative is emphatic.

<sup>1</sup> While, in as much as.—<sup>2</sup> to hurt.—<sup>3</sup> to betray.—<sup>4</sup> by gestures and words.—<sup>5</sup> mischievous.—<sup>6</sup> remarks.—<sup>7</sup> to communicate.—<sup>8</sup> *rationem alicujus rei habere*, to take something into account.—<sup>9</sup> their characters.—<sup>10</sup> in order to.—<sup>11</sup> more plainly.—<sup>12</sup> *paulo alius repetere aliquid*, to go rather far back in stating something.—<sup>13</sup> the scope of my dispositions.—<sup>14</sup> exhortation.—<sup>15</sup> lest.—<sup>16</sup> to consist of empty words.—<sup>17</sup> or to be made without sufficient cause.—<sup>18</sup> an ellipsis = *dicam tibi, me hac ratione motum esse ut*; let me tell you that I had the motive to make you consider etc.—<sup>19</sup> the persons whom (interrogative clause).—<sup>20</sup> to guard against.—<sup>21</sup> enjoy your own happiness.—<sup>22</sup> to be concerned by the misfortunes of.—<sup>23</sup> the more plainly.—<sup>24</sup> *ferre laudi alicujus*, to show interest in somebody's success.—<sup>25</sup> differently.—<sup>26</sup> *rempublicam tenere*, to be at the head of the government; to have possession of the government.—<sup>27</sup> to disapprove of.—<sup>28</sup> as I have put it just before.—<sup>29</sup> even if everything were wholly according to my wish.—<sup>30</sup> *non alius atque*, not different from.

—15. Berenice, quum ad se interficiendam missos didicisset<sup>1</sup>, Daphnæ se claudit. *774* quum obsidēri eam nuntiātum Asia civitatibus esset, auxilia ei omnes misere. Just. 27, 1.—16. Memorabat L. Papirius rempublicam Vejentibus indutiis et cunctatione Aequorum stare<sup>2</sup>. *Unde*<sup>3</sup> si quid increpare<sup>4</sup> terrōris, sine patricio magistratu placere<sup>5</sup> rempublicam opprimi? Liv. 4, 43.—17. Tumulus circumsessus ultra mediam noctem est. *Quo* quum nuntiātum esset castra deserta esse, et ipsi<sup>6</sup>, quacunque pavor tulit, fugerunt. Ib. 4, 39.

### III. CONSTRUCTION AND SIGNIFICATION OF THE RELATIVE CLAUSE.

§ 613. The Latin relative clause has the same logical force as the English relative clause, and, in regard to the grammatical form of its constituent phrases, follows the general rules on construction, tenses and moods, with the following peculiarities: 1) The phrase to which the relative belongs must regularly be placed FIRST in its clause, the relative preceding the other member of its own phrase (for exceptions see Obs. 2).—2) The relative sometimes agrees, BY ATTRACTION, in gender and number, with a member of its own clause, instead of agreeing with the antecedent (R. 10, Obs. 2).—3) The predicate, or the governing verb of the relative is frequently ELLIPTICALLY omitted, and must be supplied from the principal sentence (R. 11).—4) The relative often takes members of the PRINCIPAL SENTENCE into its own framework, and gives to its own members a form different from that of the English relative clause (R. 12; R. 11, Obs. 5).—5) Relatives (contrary to the English construction) are frequently made members of CLAUSES (either non-finite, or already introduced by conjunctions), so that the clause is either made grammatically dependent on two different sentences, or bears a twofold grammatical relation to the same sentence (INVOLUTION. R. 13, 14).—6) In relative adjectives or adverbs the connective element has often the meaning of an ADVERBIAL CONJUNCTION OF MODALITY, while the determinative element has the force of an adjective of the definite form, or of a personal pronoun (§ 614).—7) The MOOD of the predicate in relative clauses is often a *subjunctive peculiar to relative clauses alone*, and not falling under the general rules on dependent subjunctives (§ 614).

Obs. 1. The relative adjective or adverb regularly opens its own clause. Hence 1) the English position of the attributive relative 'of which', 'of whom' after its governing word cannot be imitated in Latin: Simuliter *quorum* contexta viminibus membra vivis hominibus complent; Figures, the limbs of which, bound over with brush, they fill with living men. Cæs. B. G. 6, 16.—2) If the relative is used as a co-ordinating periodical connective (Rem. 9), it must *always* open the period, and precede even the conjunctions of the clause to which it belongs, while the English corresponding demonstrative is always placed *after* the connective by which the clause is introduced: *Cujus rei quæ* conne-tudo sit docere non debeo; I need not show *what* is the custom in *this matter*.—*Quæ si*

<sup>1</sup> R. 6, Obs. 2, No. 2.—<sup>2</sup> i. e. that the preservation of the republic was solely owing to etc.—<sup>3</sup> from those places, i. e. Veji, and the land of the Aequi.—<sup>4</sup> if a thunderclap came from those regions.—<sup>5</sup> would they (the tribunes) like the republic to be surprised by the enemy without having etc.—<sup>6</sup> they likewise; See p. 252, Obs. 9.

colliges, omnia sapienter feres; *If you collect this, you will etc.* Cic. Fam. 4, 13, 7.—*Qui nisi decedat; If he would not leave.* Cæs. B. G. 1, 44.—*Quos quum Ariovistus conspexisset; When Ariovistus had perceived them.* Ib. B. G. 1, 47.—Thus if a demonstrative member of a relative clause is employed in a relative form for periodical connection, two relatives will be placed in immediate succession. In this instance the *coordinating* relative must precede the subordinating one. See Cæs. B. G. 6, 15 (quoted R. 9, Obs. 2).

Obs. 2. Sometimes, however (though rarely), relatives are placed *after* one or two words of their own clause. This is the case: 1) very rarely for rhetorical reasons, to give to certain members of the relative clause a greater emphasis, in which instance the emphatic words, in a few passages, are placed before the relative, as: *Romam quæ asportata sunt, ad ædem Honoris videmus; What has been carried off to Rome, we see in the temple of Honor.* Cic. Verr. 2, 4, 54.—*Quis autem, meum consulatum præter Clodium qui vituperaret, inventus est? But who was there that censured my consulship except Clodius?* Cic. Phil. 2, 5.—*Ut ei fuerunt modo quos nominavi; As those were whom I have just mentioned.* Cic. Am. 5, 19. Thus the passage Cic. Rose. Am. 8, 22, quoted p. 479 (in magnâ familiâ qui habeat)\*.—2) If a relative has the force of a modal conjunction, negative words may precede the relative, the same as those modal conjunctions whose place they take, as: *Unum (iter) angustum et difficile (erat), rix quâ singuli carri ducerentur; So that on it (on which) hardly one vehicle could pass at a time.* Cæs. B. G. 1, 6. (Compare: *Vix ut his rebus tempus daretur.* B. G. 3, 4).—3) In anteclassical and poetical style, the antecedent, incorporated in the clause as the governing noun of the relative, is sometimes placed *before* it, as: *Urbem quam (instead of quam urbem) statuo, vestra est.* Virg. Æn. 1, 573 (see p. 506).—The only part of speech which generally precedes the relatives are those prepositions by which the relative itself is governed. But even these are frequently placed after the relative, as '*quorum per finis ierant*', instead of '*per quorum finis ierant*'. Cæs. B. G. 1, 28.

Rem. 10. The relative, in its capacity as member of the different elementary phrases constituting the sentence, may be used in all relations in which absolute, disjunct, or attributive adjectives occur. Hence it may take the place 1) of the SUBJECT (whether nominative, or subject-accusative, or subject-ablative); 2) of a PREDICATE-NOMINATIVE; 3) of a COMPLETING OBJECT in any case, like a noun; 4) of an ADVERBIAL OBJECT (whether prepositional object, or case-object, or in the form of an adverb); 5) of an ATTRIBUTIVE OR PARTITIVE GENITIVE; 6) of an ATTRIBUTIVE ADJECTIVE.

In all these instances the CASE of the relative is determined by the general rules on the cases of nouns and adjectives. The gender and number of the relative adjective is determined 1) if it is absolute or disjunct, by its relation to its grammatical antecedent, according to the different rules under § 612; 2) if it is used attributively with a governing noun expressed, by the gender and number of this noun (R. 5, Obs. 2, 3). But if a disjunct relative is the SUBJECT of a *predicate-noun*, it generally agrees in gender and number with the latter; and, in the same way, if it has the function as a transitive object of a FACTITIVE verb (p. 101), it generally agrees in gender and number with its *predicate-accusative* (Obs. 2).

Obs. 1. If the relative (as disjunct) takes the place of a SUBJECT-NOMINATIVE, the predicate-verb agrees in person with the grammatical antecedent of the relative. Hence, if the grammatical antecedent is a PERSONAL PRONOUN, expressed or understood, the predicate is in the same person as the pronoun (see the Ex. quoted R. 7, Obs. 1-4, and Ex. 1-3 below). This is even then the case 1) if the relative is not directly dependent on a personal pronoun, but on the absolute syndetic antecedent *is* (or *ille*), denoting persons in general, referring as predicate-nominative to a personal pronoun as subject (R. 7, Obs. 4), as: *Tu es enim is qui me sententiis tuis sapientissime ornasti; For you are the man who have most frequently promoted my interests by your votes.* Cic. Fam. 15, 4, 11.—2) If the relative clause is dependent on a *predicate-noun* that denotes the general class of persons to which the person belongs which as subject is designated by a personal pronoun. In this instance we must frequently place the *English* predicate in the third person, while,

\* This passage shows that Madvig is mistaken if he asserts that this position of the relative, in prose, is confined to the instance that the principal sentence follows the relative.

in Latin, the predicate must even here agree in person with the pronoun expressed or understood, as: *Non sumus ei nos augures qui avium observatione futura dicamus; We are not those augurs who predict the future by the observation of birds.* Cic. Div. 2, 33, 70.—3) If the Latin relative clause is expressed in English in the form of an infinitive after 'to', the person of the Latin predicate cannot be directly determined by the form of the English predicate. This is the case if relative adjectives have the force of final conjunctions after *dignus, idoneus* etc. (see below), as: *Non es dignus qui habeas quæ tam bene facta sunt; You are not worthy of having what is so well made.* Cic. Verr. 2, 4, 20.

Obs. 2. If a disjunct relative adjective is in the relation of SUBJECT to a PREDICATE NOUN, connected by the copula *esse* or by its grammatical equivalents (*feri, videri, dici, appellari* etc., § 462), the gender and number of the relative, according to the general rule of § 366, mostly takes the gender and number of the predicate-noun, and not that of the antecedent, as: *Ætensis ager, et, quod caput est rei frumentariæ, ager Leontinus; The district of Ætna, and that of the Leontini, which is the leader in corn-raising.* Cic. Verr. 2, 3, 23.—*Exstat ejus peroratio qui epilogus dicitur; One of his closing speeches is extant, which is called 'epilogue'.* Cic. Brut. 33, 127.—*Carcer ille, qui est a crudelissimo tyranno Dionysio factus, quæ Lautumia vocantur; That prison which was built by that most cruel tyrant Dionysius, and which is called Lautumia.* Cic. Verr. 2, 5, 55.—*Ea quæ secunda est hieme, qui fuit annus Cn. Pompeio, M. Crasso consulibus; In the following winter, which was (belonged to) the year of Cn. Pompey's and M. Crassus's consulship.* Cæs. B. G. 4, 1.—*Cursorem ejus generis qui ἡγεροδρόμοι vocantur; a courier of that description which is called 'day-runners'.* Nep. Milt. 4, 3.—But sometimes (far more rarely, and hardly ever with the copula *esse*) the relative agrees with the grammatical antecedent\*, and not with the predicate-noun, as: *Nacti portum qui appellatur Nymphaeum.* Cæs. B. C. 3, 26.—*Stella Veneris quæ Lucifer dicitur.* Cic. N. D. 2, 20.—*Genus hominum quod Helotes vocatur.* Nep. Paus. 3.—In the same manner the relative generally agrees in gender and number with the predicate-accusative, if it is the logical subject of the latter, being a transitive object of factitive verbs, as: *Animal plenum rationis et consilii, quem vocamus hominem; That animal gifted with reason and reflection, which we call man.* Cic. Leg. 1, 7.—*Domicilia conjuncta quas urbis dicimus, moribus sepebantur; They surrounded with walls those united homesteads which we call cities.* Cic. Sest. 40. See Ex. 4-9.—In the same manner the relative agrees in the neuter gender with an absolute predicate-adjective, denoting the general idea of a thing, although the antecedent is a person, as: *Non dicam amicum tuum, quod apud homines carissimum est, non hospitem, quod sanctissimum; I will not say thy friend, which with men is the dearest (i. e. THING, DESIGNATION), not thy guest-friend, which is the most sacred.* Cic. Verr. 2, 2, 45.

Obs. 3. Relative adjectives (absolute or disjunct) cannot generally be used as predicate-nominatives (see § 210). But they may be so used whenever they include some idea besides that of a mere abstract reference. Wherever this construction occurs, the relative as predicate-adjective agrees in gender and number with its subject, and not with its antecedent, if the latter is different from the subject, as in the passages under No. 2 (below), and in the second and third examples under No. 4. Relatives are thus used predicatively: 1) If the relative expresses identity of a person or thing with the subject of the clause, as: *Prisus non is eras qui eras; nunc is factus qui tum non eras; Formerly you were not the one who you were; now you have become one who you, then, not were.* Plaut. Trin. 4, 2, 138.—2) In the LOGICAL relatives of the form '*quæ est tua humanitas*', mentioned p. 519, Obs. 7, D. In this construction the relative must be considered as a predicate-adjective, the clause being equivalent to '*Your humanity is such that I am entitled to make the statement in the leading sentence*'.—3) In the INDEFINITE relatives (see Rem. 4, Obs. 7 foll.), in which the relative expresses the idea '*of whatever kind*', as: *Oratorem me, quicumque sim, ex Academiæ spatii exstitisse; That I became an orator, whatever kind of one I may be (such as I am), in the halls of the Academy.* Cic. Or. 3.—4) In the NUMERAL, QUANTITATIVE, and QUALITATIVE relatives, as: *Totidem quot capita originis erant, coloniis missis; Having sent as many colonies as there were, mother-cities.* Liv. 5, 33 (The mother-cities were 'so many' = quot). If quot were not indeclinable, it would take the gender of capita, although 'coloniis' is the grammatical antecedent of the relative (comparative) clause.—*Tantum eorum multitudinem nostri interfecerunt, quantum fuit diei spatium; Our troops killed such a number of them, as there was space of the day (i. e. as the time of day admitted).* Cæs. B. G. 2, 11.—*Amicum habere talem volunt, quales ipsi esse non possunt; They wish to have such a friend as they cannot be themselves.* Cic. Am. 22.

Obs. 4. Relative clauses in which the relative (disjunct) adjective is in the relation of

\* The difference made by Madvig and other grammarians, that the former method is used if the antecedent of the relative contains an idea which is in itself complete, while the latter method is used, if the idea of the antecedent is determined by the relative clause, is without any foundation. This is sufficiently shown by the examples quoted.

an OBJECT are exceedingly frequent, and examples occur in any part of this grammar (from the fourth book). In all clauses of this kind the relative takes its case according to the general rules. Only if the relative is in the relation of an adverbial object (of place, time, and modality) some peculiarities occur. In this instance the leading adverbial idea is always expressed by the grammatical antecedent of the relative (*locus, tempus*, or other designations of time-points, or time-spaces; *modus, causa*, or *res*), which antecedent, in certain instances, may be omitted. These antecedents frequently are the adverbial objects of the principal sentence, taking those forms which are required by the rules on adverbial objects (p. 215 foll.). If the relative clause is used to describe these adverbial relations, the relative adjective regularly takes the same grammatical form as its antecedent, having the same grammatical relation to its own clause, as the antecedent has to the principal sentence:

A. For LOCAL clauses, which can take no other form but that of a relative clause, see No. IV.

B. In TEMPORAL clauses the noun *tempus* or one of its grammatical equivalents (*dies, annus* etc.) is made the antecedent of the clause.

(a) The time at which an action is said to happen requires the form *tempore quo* (*die quo, hora quâ, di-bus quibus* etc.; see p. 226), as: *Eo ipso tempore quo fieret indicium conjurationis*; At the very time that (when) the information was given about the conspiracy. Cic. Div. 2, 20.—Itaque quinque primis diebus, quibus haberi senatus potuit, de imperio Caesaris decernitur; Thus action was taken on Caesar's proconsular power in the first five days that (when) the Senate could meet. Caes. B. C. 1, 5.—Thus with a repeated antecedent, in the inverted form: *Quotempore illum a quaestione abdicari non licebat, eo tempore ad quaestionem ipse abreptus est*; Just at that time when it was not allowed to remove him from presiding over the trial, he was hurried away to his own trial. Cic. Clu. 33, 89. Or the antecedent, according to p. 505, Obs. 2, may be made the governing word of the relative: *Quo tempore cum primum liberam esse audivit, sine iudicio reddidit Cejo*; At the time when he first heard that she was a free person, he returned her to Cejus without waiting for a trial. Cic. Clu. 59, 162. Sometimes the antecedent may not be in an adverbial case, while the relative is in the ablative of time: *Dixerunt cum statu se ejus habuisse temporis rationem quo posita sit; cum homine ejus quo gereret bellum*; They said that with respect to the statue (of Mithridates) they had regarded the time when it was erected, with respect to the person they had regarded the time when he was in war with them. Cic. Verr. 2, 2, 65.

(b) If the relative denotes a time after another time-point (p. 232), either both the antecedent and the relative are in the ABLATIVE, or (if the antecedent has an ordinal numeral as attribute) the relative takes the form *ex quo* with its antecedent in the ABLATIVE. In neither case a relative clause can be used in English; as: *Diebus decem quibus materia copta erat comportari opere confecto*; The work having been finished ten days after the carting of the material had commenced. Caes. B. G. 4, 17.—Mors Sex. Roscii quadriduo quo is occisus est, Chrysogono nuntiatur; The death of Sex. Roscius was announced to Chrysogonus four days after he was murdered. Cic. Rose. Am. 36, 105.—Duodequadragesimo anno ex quo regnare coeperat Tarquinius; In the thirty-eighth year of Tarquinius's reign (after T. had commenced to reign). Liv. 1, 40. See Ex. 11, 12.—If the antecedent (according to the rules p. 232) takes a prepositional form with *post*, the clause must take a comparative form with *quam*.

(c) If the relative denotes a time in answer to the question 'how long', both the antecedent and the relative are placed in the ACCUSATIVE (p. 234): *Omnes illos quos (Chersonesi) habitavit annos*; All the years during which he had lived in the Chersonesus. Nep. Milt. 8.—Scævola fuit mecum triduum illud quod ego Ephesi commoratus sum; Scævola was with me during those three days which I spent (literally: during which I staid) at Ephesus. Cic. Fam. 3, 5, 5.—If the time during which an action has or had been in progress is stated predicatively (i. e. in regard to itself, and not to serve for determining the time of another action), the clause by which the lasting of the action is stated, is not expressed by a relative, but by a temporal clause with *quum* (sometimes by an *Ut*-clause, in the different forms mentioned p. 487, Obs. 9, 3). Clauses of this kind are either predicate-clauses (as in the Plautine passages mentioned p. 487), or attribute-clauses, as: *Anni sunt octo quum ista causa in meditatione versatur* [i. e. anni, quum (instead of quos, or per quos, which forms would not be admissible) ista causa versatur, sunt octo]; It is eight years that this case has been under deliberation. Cic. Clu. 30, 82. If the above-mentioned passage with 'triduum' were predicatively expressed, the clause would take the form with *quum* in the form of a subject-clause, and not the relative form with *quod* (triduum est quum Ephesi commoror; or 'triduum erat quum commorabar').

(d) Clauses denoting an action lasting 'ever since' another action occurred, almost always take a relative form in Latin, being introduced by *ex quo tempore* (= *ex eo tempore quo*), or by *ex quo*, where *tempore* is understood, as: *Fundus quem quadricennium, hoc est, ex quo tempore fundus venit, possedit Cæsennia*; An estate which had been in pos-

session of Cæsennia four years, that is ever since the estate had been sold. Cic. Cæc. 7, 19.—*Si, ex quo trajecimus in Græciam, adhibitus essem in concilium*; If I had ever been taken into the council since we crossed over to Greece. Liv. 36, 7.—See Ex. 13, 14. Sometimes *ex quo* is pregnantly used including both 'immediately after', and 'ever since', as: *Dixit, se, ex quo sui potens fuerit, Romam commigrasse*; He said he had moved over to Rome immediately after he had been of age, and had lived there ever since. Liv. 1, 35.

C. Relative adjectives or adverbs which express the different relations of MODALITY (p. 238 foll.) are treated in the same way as substantive objects of that kind, as: *Ei quorum interest pacem esse*; Those whose interest it is that there should be peace. Liv. 30, 30. They are frequently used in COMPARATIVE clauses; as: *Quæ facta sunt eadem ratione quâ Roscius occisus est*; This has been done in the same manner as the murder of Roscius (literally 'in the same manner in which Roscius was murdered'). Cic. Rose. Am. 33, 94.—*De te loquitur quem ad modum tu putas* (= 'ad eum modum ad quem', or 'eo modo quo tu eum loqui putas'); Of you he speaks in the same manner as you think. Cic. Quinct. 27, 84. For this form see 'Comparative clauses'.—Some peculiarities occur in the relation of CAUSE, in which the relative takes the following forms: (a) that of the adverbial relatives *quare, cur* (negatively *cur non*, or *quid*), *quamobrem*; (b) the prepositional form with *de, ob*, or *propter* (quibus de causis, quam ob causam, propter quem etc.); (c) the form of an attributive genitive with the ablative *causâ* (cujus rei causâ). These forms are used with the following distinctions:

(a) If *causa* or one of its synonyms (*ratio* etc.), or any noun implying the idea of a cause is the antecedent of the relative clause, the cause is generally conceived as 'cause efficient' (p. 277), i. e. an existing cause from which the action was done or should be done. In this instance the relative regularly takes an adverbial form, being expressed either by *cur* (negatively *cur non* or *quid*), or by *quare*, which adverbs have the force of 'qua de causâ', or 'qua ex causâ', as: *Cæsar satis esse causæ arbitrabatur quare in eum animadverteret*; Cæsar believed there was reason enough to proceed (why he should proceed) against him. Caes. B. G. 1, 19.—*Non fuit causa cur tantum laborem caperes*; There was no reason why (= from which) you should take such pains. Cic. Ros. C. 16, 49.—*Sic tibi persuadeas velim, unum mihi esse solatium quare facilius possem pati, te esse sine nobis*; I wish you would rest assured that your being without us is my only ground of comfort which enables me (literally from which ground, or 'why' I am able) to suffer more easily. Ib. Fam. 7, 10, 4. See Ex. 15, 16.—For the use of the subjunctive in these clauses, see p. 514, Obs. 3.

(b) In relative clauses dependent on *causa* or *ratio*, the relative rarely takes a prepositional form with *propter* or *ob* (the latter expressing a motive, being generally used with a repetition of the antecedent): *Ratio ab accusatore reddita non est, quum ob causam* (no reason why, or for which) patrem filius occiderit. Cic. R. A. 22.—*De causis propter quas innocens in periculum deducatur*. Quint. 4, 2, 12. Peculiar is the use of *quamobrem* referring to the antecedent *causa* in the plural: *Multe sunt causæ, quamobrem cupiam abducere*. Ter. Eun. 1, 2, 65. In publicistic language the relative sometimes takes the prepositional form with *de*, the antecedent *causa* being repeated: *Milites qui causas habeant, quibus de causis missi fieri debeant*. Cic. Fam. 8, 8.

(c) Frequently the antecedent *causa* is contained by implication in a neuter absolute adjective, especially in the negative *nilil*, or the interrogative *quid*, also in the mere negation *non*, in the predicative expressions *nilil est, quid est? non est* (= *nulla causa est, quæ causa est, causa non est*). In this construction relative adjectives are not used, the relative clause being introduced by the adverbs *cur, quare, quamobrem* (negatively by *quid*), or by a *Quod*-clause. See p. 514, Obs. 3.

(d) If the causal relative does not refer to *causa* or its equivalents as antecedents, the following distinction is made: 1) If a fact or thing is represented as the cause of the action contained in the relative clause, the relative takes the adverbial form with *cur, quare, quamobrem*, when the principal sentence is negative, or virtually so, as: *Si res vel minima reperiatur quamobrem...videantur*; If the slightest fact should be discovered why (on account of which) they should seem etc. Cic. R. A. 3.—*Quod neque commissum a se intellexeret (i. e. quicquam) quare timeret*; Because he knew that nothing had been done by him why he should be afraid. Caes. B. G. 1, 14.—*Quod commissum nilil esset quare ad istam rationem perveniretur*; Because nothing had occurred why that measure should have been adopted. Cic. Quinct. 19.—2) If the fact or thing is not connected with a negative, the relative clause takes the prepositional form with *propter* (sometimes *ob*), or the form *cujus rei* (*quarum rerum*) *causâ*, as: *Mihi etiam lippitudo hæc, propter quam* (on account of which) non ipse ad te scribo, sine ullâ lacrimâ est. Cic. Att. 10, 14, 1.—*Earum rerum obliti, propter quas fuerunt tibi infensi*. Ib. Phil. 1, 12.—*Rebus eis confectis, quarum rerum causâ* (for the sake of which) exercitum traducere constituerat. Caes. B. G. 4, 19.—*Reliquo sermone confecto, cujus rei causâ venerat*. Ib. B. C. 1, 8.—3) If the antecedent of the causal relative is a person, the relative must take a

prepositional form, almost always with *propter*, as: *Ei, propter quos ipse honestissimus putabatur*; *Those for whose sake he was himself held in the highest esteem.* Cic. R. A. 6. —If the relative is used for periodical connection, the forms *qua de causâ*, *qua ex causâ*, *quâmbrem*, *quare*, *quapropter*, *quocirca*, *quibus de causis*, are all used with the meaning 'therefore'.

Obs. 5. If the relative is used as an ATTRIBUTIVE of a noun expressed, it either has the form of an ATTRIBUTIVE ADJECTIVE to a noun, which is either the antecedent repeated or incorporated, or a noun pointing to the antecedent, or restricting it, as shown p. 505 foll.; or it has, if *disjunct*, the form of an ATTRIBUTIVE GENITIVE, occurring in any of the different relations in which a noun may be attributively used, as: *Quorum magnum numerum habebat*; *Of whom he had a great number.* Cæs. B. G. 1, 4. —*Quorum erat V millia numerus*; *Whose number was five thousand.* Ib. 4, 12. —*Multis de causis, quarum illa fuit justissima*; *For many reasons the most legitimate of which was this etc.* Ib. 4, 16. —The Latin language frequently uses relatives in the form of attributive adjectives governed by a noun expressed or understood, when the English language makes use of different forms. Here belong the following constructions:

1) A relative which in English has a form equivalent to a PARTITIVE GENITIVE dependent on definite or indefinite numerals (§ 374 foll.), generally agrees in Latin with the numeral in gender, number, and case, as: *Venio ad epistolas tuas, quas ego sexcentas\* uno tempore accepi*; *I come to your letters, of which I have received a million at a time.* Cic. Att. 7, 2, 3. —*Conviviis delector cum æqualibus, qui pauci admodum restant*; *I enjoy the entertainments with my equals in age, very few of whom are left.* Ib. Sen. 14. —*Ejus pontis custodes reliquit principes, quibus singulis urbium perpetua dederat imperia*; *He left as guards over the bridge the chiefs to each of whom he had given the government for life of a city.* Nep. Milt. 3, 1. —*Propter linguæ Gallicæ scientiam, quâ multâ jam Ariovistus longinquâ consuetudine utebatur*; *On account of his knowledge of the Gallic language, much of which Ariovistus had already acquired by a long practice.* Cæs. B. G. 1, 47. [*Multâ* may also be taken for an accessory predicate, = *sæpe*. See p. 251, Obs. 7.] —In a similar manner relatives agree in gender etc. with the adjectives *totus* and *universus*, corresponding to the English partitive phrase 'the whole of which', as: *De republicâ taceo, quam vos universam in hoc iudicio vestris humeris sustinetis*; *The whole of which you sustain in this trial on your shoulders.* Cic. Flacc. 37, 94. —If the partitive relative is dependent on *utroque*, it is used both in the form of a partitive genitive, and in that of an adjective agreeing with *utroque*; while *alter* always takes its partitive relative in the genitive; as: *Quorum utroque contempsit alterum*; *Either of whom despised the other.* Cic. Off. 2, 1. But: *Agitabatur inopiâ rei familiâris et conscientia scelerum, quæ utraque his artibus auxerat*; *He was pressed by the scantiness of his means, and the consciousness of his crimes, both of which he had increased by these devices.* Sall. Cat. 5, 7. —If the relative is dependent on *alius*... *alius*, it likewise occurs in both constructions, but more generally in the form of a partitive genitive, as: *Quorum alius aliâ causâ illâ etc.*; *Each of whom made use of different pretexts.* —If a partitive relative is dependent on the noun *numerus*, or *genus* it either takes the form of a genitive, or of an adjective attribute agreeing with *numerus*, as: *Itaque incitabat omnis studio suo; quo in numero fuerunt L. Torquatus etc.*; *In which number (i. e. in whose number, among whom) were L. Torquatus etc.* Nep. Att. 1, 4. But: *Si omnes societates venerunt, quarum ex numero multi sedent iudices*; *If all the societies came, from whose number many judges are sitting here (i. e. to which many of these judges belong).* Cic. Mur. 33, 69\*\*. See Ex. 17-20.

2) LOGICAL RELATIVES, which cannot be used in the genitive or dative (p. 516, Obs. 3), frequently take the form of an agreeing adjective, instead of being placed in a genitive dependent on *res* etc. (*cujus rei*, *cujus facti*), as: *(Numquam) obliviscar quanti me semper feceritis; quæ si vos cepit oblitio, cur id non meo potius capite luitur quam Milonis (instead of *cujus rei oblitio*)?* I shall never forget in what high esteem you have always held me; and if the memory of this fact is effaced with you, why is this not visited upon my head rather than upon Milo's? Cic. Mil. 36, 99. —*Per idem tempus adversus Gallos male pugnatum, quo metu Italia omnis contremuerat (= *cujus facti metu*)*; *And the whole of Italy had trembled from fear (concerning this fact).* Sall. Jug. 114, 1. —Here belong several passages quoted above, as: *Atticus remigravit Romam L. Cottâ L. Torquato Coss., quem diem (i. e. *cujus protectionis diem*) universa civitas prosecuta est.* Nep.

\* The Latin uses the numeral *sexcenti* with the meaning of a large indefinite number, often for the purpose of comic exaggeration.

\*\* Demonstrative adjectives frequently take the same form (*eo numero* = *eorum numero*). In the relative clause dependent on such demonstratives, the relative adjective frequently is in the plural, as if *eorum* had been used in the principal sentence, as: *Archias posita est eo numero qui semper apud omnes sancti sunt habiti.* Cic. Arch. 12, 31. —*Amicitia est ex eo genere quæ prosunt (= *ex eorum rerum genere quæ prosunt*).* Cic. Fin. 3, 21, 70.

Att. 4. —*Ubi prima impedimenta visa sunt, quod tempus (= *cujus rei tempus*) committendi praelium convenerat.* Cic. B. G. 2, 19. See Ex. 21.

3) Sometimes such attributive relatives pregnantly include whole sentences or clauses which must be supplied as connecting links between the relative clause, and the principal sentence, as: (*Dixit Divitiacus*) *fratrem per se crevisse, quibus ille opibus ac nervis ad perniciem suam uteretur (i. e. *fratrem crevisse, et opes ac nervos adeptum esse quibus etc.*)*; *Divitiacus said that his brother had grown through him, and acquired power and influence, which he was using towards his own ruin.* Cæs. B. G. 1, 22. —So in several passages quoted above, as: *Ut me per litteras consolärer, quem librum ad te mittam (i. e. *writing a book, which I will send to you etc.*)* Cic. Att. 12, 14. —*Basilius ad ipsum Ambiorigem contendit, quo in loco cum paucis equitibus esse dicebatur (i. e. *ad Ambiorigem contendit et in eum locum in quo cum paucis etc.*)*. Cæs. B. G. 6, 30.

4) Sometimes attributive relatives agreeing with a governing noun pregnantly imply a predicative phrase in which the relative subject, according to Obs. 2, agrees in number and gender with its predicate-nominative, as: *Interim Casari nuntiatur Sulmonense, quod oppidum a Cornificio VII. millibus passuum abest, cupere ea facere quæ vellet.* Cæs. B. G. 1, 18. [= *quod est oppidum quod... abest*, where *quod* refers to the name of the city (Sulmo) implied in the civic noun, in the same way as a relative may refer to a personal pronoun involved in a possessive adjective. See p. 515, Obs. 5\*.] This construction is frequently used with quantitative and numeral relatives, as: *Ea lis quinquaginta talentis aestimata est, quantus in classem sumptus factus erat*; *The damages in this process were laid at the figure of fifty talents, which was the amount of the cost expended for the fleet.* Nep. Milt. 7, 6.

5) To the relations which must generally be expressed by English equivalents of attributive genitives belong the relatives connected with GERUNDIVES, and often those connected as SUBJECT-ABLATIVES with participles in the construction of the ablatives absolute, as: *In eâ republicâ ad quam opprimendam eis vires defuerunt*; *In that government for the oppression of which they were not strong enough.* Cic. Flacc. 26, 61. —*Quod Darii regno ipsorum interetur dominatio, quo extincto ipsos civibus suis pœnas daturos*; *Because their power rested on Darius's rule, after whose fall they would be called to account by their countrymen.* Nep. Milt. 3, 5.

1. His de causis ego huic causâ patrônis<sup>1</sup> exstiti, non electus unus<sup>2</sup> qui maximo ingenio, sed relictus ex omnibus qui minimo periculo possem dicere. Cic. Rose. Am. 2, 5. — 2. Te solutum<sup>3</sup> Roman mittēbat, qui eadem scires quæ illos scire dicis? Ib. Dej. 7, 22. — 3. Neque is sum, inquit, qui gravissime ex vobis mortis periculo terrear. Cæs. B. G. 5, 30. — 4. Venio nunc ad M. Catonem, quod est firmamentum<sup>4</sup> ac robur<sup>5</sup> totius acceptionis. Cic. Mur. 28, 58. — 5. Veni me ad Leucopetram, quod est promontorium agri Rhodii, deinde<sup>6</sup>. Ib. Phil. 1, 3, 7. — 6. Anxur fuit, quod nunc Terracina<sup>7</sup> sunt, urbs erant. Ib. 42, 44. — 8. Cæsar certior fiebat Belgas, quam tertium esse Gallia<sup>8</sup> partem dixit. Flaminia<sup>9</sup> acta, quem nunc Ceream Flaminium appellant<sup>10</sup>. Liv. 3, 54. — 9. Cassivelan<sup>11</sup> finis a maritimis civitatibus flumen dividit quod appellatur Tamesis. Cæs. B. G. 5, 11. — 10. Diebus circiter quindecim quibus in hiberna ventum est, initium tumultus<sup>12</sup> ortum est ab Ambiorige. Ib. 5, 26. — 12. Sextus et vigesimus annus agebatur<sup>13</sup> ex quo pevirilem sumpsit<sup>14</sup>, nullo die prius ullam publicam privatamque rem egit quam in Capitolio<sup>15</sup>. ultro<sup>17</sup> mihi latronis speciem induit<sup>18</sup>. Ib. 40, 12. — 15. Hæc fuit causa quare toto pianicum vellet? Cic. Clu. 61. — 17. Ego de verâ et perfectâ amicitia loquor, qualis est odium, quos video esse nonnullos, cum ducibus ipsis conflant<sup>19</sup>. Ib. Balb. 27. — 19. Exaugurare<sup>20</sup> fana statuit Tarquinius, quæ aliquot a Tatio rege vota<sup>21</sup> fuerant. Liv. 1, 55.

\* In constructions of this kind the relative adjective might be taken as used in place of an attributive genitive, as in Cic. Flacc. 26, 62: *Adsum Athenienses, de quorum urbis possessione inter deos certamen fuisse proditum est.* But the genitive *quorum* in this passage has a force rather different from *quod* in the passage quoted above.

<sup>1</sup> I have accepted the conducting of this case. — <sup>2</sup> being not selected as the only one. — <sup>3</sup> should he have sent you free to Rome? — <sup>4</sup> the prop. — <sup>5</sup> strength. — <sup>6</sup> to carry off. — <sup>7</sup> bordering on. — <sup>8</sup> capital. — <sup>9</sup> i. e. sunt. — <sup>10</sup> which is called. — <sup>11</sup> the result. — <sup>12</sup> it was. — <sup>13</sup> at his prayer. — <sup>14</sup> to grant. — <sup>15</sup> togam virilem sumere, is virtually = to become of age, the minors wearing the toga prætexta, which was different from the toga worn by men (toga virilis). — <sup>16</sup> to lie in wait (supply *mihi*). — <sup>17</sup> on purpose, or 'virtually'. — <sup>18</sup> he brands me with the mark of a brigand. — <sup>19</sup> to fight with. — <sup>20</sup> to exaugurate, i. e. to deprive a sanctuary of its religious character, to secularize it. — <sup>21</sup> to vow.

—20. Meas litteras quod requiris<sup>1</sup>, impedior<sup>2</sup> inopiā rerum<sup>3</sup>, quas nullas habeo litteris dignas. Cic. Att. 11, 4, 1. —21. Lacedæmonii decemviralem potestatem a Lysandro constitutam sustulerunt<sup>4</sup>; quo dolore<sup>5</sup> incensus iniit consilia<sup>6</sup> reges Lacedæmoniorum tollere. Nep. Lys. 3, 1.

**Rem. 11.** Frequently the governing verbs of relatives, or the predicates dependent on them, and sometimes other words by which their case is determined, are *elliptically omitted*, and must be supplied from the principal sentence, the same as in coördinate propositions.

**Obs. 1.** The relative clauses in which such omissions occur, mostly have the nature of *comparative clauses* (*idem qui, tantum quantum* etc.); but omissions of this kind also occur in ordinary relative clauses. Such an ellipsis cannot be imitated in English unless the Latin relative may or must be rendered by the comparative conjunction 'as'; but we may sometimes use the auxiliary 'to do', instead of repeating the verb of the principal sentence. Such auxiliaries cannot be expressed by 'facere' in Latin; as: Magis ea percipimus quæ nobis ipsis prospere eveniunt, quam illa quæ ceteris (i. e. prosperare eveniunt); We perceive more what happens prosperously to ourselves, than that which so happens to others (than what does to others). Cic. Off. 1, 30. —Eisdem ut finibus nomen suum quibus vita terminaretur; So that his name is confined to the same limits as his life (= eisdem finibus nomen terminaretur quibus vita terminaretur). Cic. Tusc. 1, 15, 32. —Erat enim eodem quo Alcibiades sensu; For he was of the same mind as Alcibiades (= eodem sensu erat quo Alcibiades erat). Nep. Alc. 5, 3. —Intelligitis enim, nullis hominibus quemquam tanto odio quanto istum Syracusanis et esse et fuisse (= tanto odio et esse et fuisse, quanto istum et esse et fuisse; For you will understand, that nobody is and was so hateful to any men, as he (is and was) to the Syracusians. Cic. Verr. 2, 2, 5. See Ex. 1-4. —Sometimes both the principal sentence and the clause have the same object-infinitive, which is understood in both propositions, as: Perge quo cepisti (= perge ire quo ire cepisti); Go on to the place to which you have made arrangements to go. Cic. Cat. 1, 5.

**Obs. 2.** In the examples quoted above (Obs. 1), the verbs which are thus supplied in the relative clause have the same grammatical form in the principal sentence as must be understood for the clause. But this is not generally the case. Thus

(a) The verbs to be supplied in the clause may be of tenses, moods, or persons different from those in the principal sentence, as: Tam sum misericors, iudices, quam vos; tam mitis quam qui lenissimus (i. e. est); I am as merciful, O judges, as you are; as mild as the most lenient (literally: as he who [is] the most lenient). Cic. Sull. 31, 87. —Tam mihi gratum erit, quam quod gratissimum (i. e. est); It will be as pleasant for me as what is the most pleasant. Cic. Fam. 13, 3. —Non eadem mihi quæ superioribus consiliis lege et conditione utendum esse decrevi; I have resolved that not the same law and condition should be used by me, as had to be used by the former consuls (= quæ superioribus consiliis utendum fuit). Cic. L. Agr. 2, 3. —Frequently, however, in such constructions the verb, if it is in a different grammatical form from that required by the construction of the clause, is repeated in Latin, where in English we repeat only the auxiliary, as: Animus alitur et sustentabitur eisdem rebus, quibus astra sustentantur et aluntur; The soul will be fed and sustained by the same elements as the stars are. Cic. Tusc. 1, 19, 43. See Ex. 5.

(b) Sometimes the verb in the principal sentence is an infinitive, and must be supplied as a finite verb in the clause, as: Eum non penitēbat facere idem quod tu (i. e. fecisti); He was not ashamed of doing the same as you did. Cic. Mur. 31, 66. —Vult se eodem quo ceteri jure versari (= quo ceteri versantur jure versari); He wishes to be subjected to the same law as the others are. Cic. L. Agr. 2, 23.

(c) Most frequently object-infinitives or predicate-infinitives are supplied in the clause while, in the principal sentence, the same verb is used as the finite predicate, as: Impulsos semel terrōre eodem agunt quo cepērunt; Having once dislodged them, they drove them by means of the same terror as they did in the beginning (= quo agere eos cepērunt; by which they began to drive them). Liv. 10, 33. —Nemo est qui non equo quo consuevit (i. e. quo uti consuevit) libentius utatur quam intractato et novo; There is nobody who would not use rather a horse to which he is accustomed (literally: which to use he is accustomed) than an untried and new one. Cic. Am. 19, 68. —Nos tamen hoc confirmamus illo augurio quo diximus (i. e. quo confirmari diximus); We, however, prove this by that augury by which we have said it is proved. Cic. Att. 10, 8, 7. —See Ex. 6-10.

(d) Sometimes the governing words of the relative which must be supplied from the principal sentence, and by which the case of the relative is determined, are not verbs, or

<sup>1</sup> As for your missing my letters. —<sup>2</sup> supply 'from writing'. —<sup>3</sup> by the want of material, of news. —<sup>4</sup> to abolish. —<sup>5</sup> = *cujus rei dolore*; and embittered by grief on account of this fact. —<sup>6</sup> he resolved.

they are verbs along with other classes of words, as: Cæsar circiter DC ejus generis, *cujus supra demonstravimus*, navis invenit instructas; Cæsar found that about six hundred ships were furnished, of that kind which we have described above. Cæs. B. G. 5, 2. [Here the clause '*cujus supra demonstravimus*' is equivalent to *cujus* GENERIS NAVIS *supra demonstravimus* = *quibus supra demonstravimus*. The author could not idiomatically use the accusative '*quod demonstravimus*', because the verb *demonstrare*, on account of its concrete meaning, could, according to the Latin conception, not be directly referred to the abstract noun *genus*.] —Quum scribas et aliquid agas eorum quorum consuevit; While you are writing and doing some of those things which you are accustomed to do. Lucr. 1, 14, 1 [quorum consuevit = quorum aliquid agere consuevit]. —Ut statim apertis rationibus, quibus præscripsimus, benevolum faciamus audientem; That we may directly make the hearer well disposed by those open methods which we have stated. Anet. Her. 1, 7. —quibus ut auditor benevolus reddatur præscripsimus]. Here belongs the passage Liv. 5, 23, quoted p. 507, at the end of Obs. 3.

**Obs. 3.** In all instances of elliptical construction of the relative clause, the case of the relative agrees with that of the antecedent, because both are governed by the same verb or noun, which is expressed in the principal sentence, and understood in the clause. A peculiar elliptical construction of this kind sometimes occurs if the governing sentence has the form of an absolute, in which instance the relative is placed in the absolute ablative case of its antecedent, because it would be in the same case with its antecedent if the absolutes absolute were resolved into an ordinary finite clause, as: Raptim quibus quisque poterat elatis exibat (i. e. eis rebus elatis quas quisque efferre poterat); They went out after everyone had taken away what he could (take away). Liv. 1, 1, 29. [If resolved into a finite clause: Raptim exibat quum unusquisque extulisset quæ efferre poterat. Omitting the infinitive *efferre*, the words *extulisset quæ* are placed in ablative absolutes the same as they would be if *quæ* were a demonstrative.] —Quibus poterat satius ducis secum, ad urbem pergit (= eis sane is secum ductis quos ducere poterat; or changed into a finite clause: quum secum duceret quos ducere poterat); He proceeded to the city after taking with him all the wounded he could. Liv. 4, 39.

1. Ad Hannibalem quoque legati ab Carthagine eis diis quibus ad Magōnem venerunt. Liv. 30, 19, 2. Accidit huic quod ceteris mortalibus, ut inconsideration in secundā quam in adversā esset fortuna. Nep. Con. 5, 1. —3. Non licet mihi idem quod vis quibus omnia populi Romani beneficia<sup>1</sup> dormientibus<sup>2</sup> deferuntur<sup>3</sup>. Cic. Verr. 2, 5, 70. Cat. 1, 13, 33. —4. Quem tantā levitā<sup>4</sup> perfunde<sup>5</sup> ardeamus quā aut superiorem<sup>6</sup> Africā, Hannibale victo, aut posteriorem<sup>7</sup>, Carthagine eversa<sup>8</sup>. Ib. Fin. 5, 24, 70. —6. Eo die, quo consueverat<sup>9</sup> intervallo, hostis sequitur. Cæs. B. G. 1, 92. —7. Imitamur quos<sup>10</sup> ceteri visum<sup>11</sup>. Cic. Off. 1, 32, 118. —8. Sustinebimus nos, et spe qua<sup>12</sup> jubet niteri<sup>13</sup>. Ib. Att. 3, 9, 2. —9. Precibus eventum vestri senatus quem videbitur dabit<sup>14</sup>. Liv. 6, 26. —10. Probabo<sup>15</sup>, inquit; modo<sup>16</sup> istā sis equitate<sup>17</sup> qua<sup>18</sup> ostendis. Cic. Fin. 1, 8. —11. Sic tecum loquar, non ut odio permittas<sup>19</sup> esse videar, quo debeo<sup>20</sup>, sed ut misericordiam, quæ tibi nulla debetur<sup>21</sup>. Ib. Cat. 1, 7.

**Rem. 12.** The Latin relative clause frequently contains members which cannot have a place in the English relative clause. This is the case: 1) If the antecedents are transferred to the relative clause (p. 505, Obs. 2); 2) in regard to the indefinite form-adjective *quisque*, which, if it logically belongs to both the principal sentence and the relative clause, is generally expressed in the clause only (Obs. 1); 3) in regard to those *attributive adjectives*, which, according to English usage, are placed in the principal sentence as attributes of the antecedent, but according to Latin usage are transferred to the relative clause in the form of *accessory predicates* of the relative adjective (Obs. 2).

**Obs. 1.** If *quisque* is logically a member of both a relative clause and the principal

<sup>1</sup> Lucius was an historian of great prominence, though none of his writings are preserved, except the letter quoted above.

<sup>2</sup> Gifts. —<sup>3</sup> in their sleep. —<sup>4</sup> *de terri*, be offered, to receive. —<sup>5</sup> *qui ex constitutus*, whose worship was established. —<sup>6</sup> under the same auspices. —<sup>7</sup> who do we believe is so perverted by joy. —<sup>8</sup> the older. —<sup>9</sup> the younger. —<sup>10</sup> *i. e. sequi*. —<sup>11</sup> *i. e. imitari*. —<sup>12</sup> aliquid mihi videtur, something pleases me. —<sup>13</sup> *i. e. niti*. —<sup>14</sup> *niti aliquid*, to rely on something. —<sup>15</sup> Construe: *Senatus precibus vestris cum gratiam dabit* (will give that answer to your prayers, *quem deus exhibet*). —<sup>16</sup> I will approve of it. —<sup>17</sup> only. —<sup>18</sup> fairness. —<sup>19</sup> *i. e. te jore*. —<sup>20</sup> prompted by. —<sup>21</sup> *i. e. permittus esse*. —<sup>22</sup> none of which is owed (*due*) to you.

sentence, the English language places the equivalent of *quisque* in the principal sentence, and refers to it in the clause by a demonstrative, or a personal pronoun. But in Latin *quisque* is generally placed in the relative clause, directly after the relative adjective or adverb, while in the principal sentence it is either replaced by a demonstrative (*is*), or entirely omitted, if it may be easily supplied; as: *Ut sit per quem adsequatur quod quisque desideret*; That there may be somebody through whom every one may obtain what he desires. Cic. Am. 9, 29. *Monuit ut ea quæ in quoque maxima essent, imitaremur*; He exhorted us to imitate in every one what was greatest in him (= in quoque ea quæ maxima in eo essent, which arrangement would not be admissible in Latin). Cic. Or. 3, 12. Thus with comparative relatives, and with relative adverbs: *Ut quanti quisque se ipse faciat, tanti fiat ab amicis*; That every one should be held in such esteem by his friends as he holds himself. Cic. Am. 10.—*Vallum sumpsere unde cuique proximum fuit*; Each took the materials for the rampart from that place which was nearest to him (= *quisque ex eo loco qui ei proximus fuit*, which arrangement would not be admissible). Liv. 3, 27.—Generally the relative clauses in which *quisque* is thus incorporated are placed BY INVERSION before the principal sentence, in which instance the principal sentence is frequently introduced by a demonstrative (*is*) referring to *quisque*, instead of being introduced by the syndetic antecedent of the relative, as: *Roscium jamdiu hoc est consecutus ut in quo quisque artificio excelleret, is in suo genere Roscius diceretur*; Roscius, long since, has obtained the distinction that every one in that sphere in which he excels is called a Roscius in his specialty. Cic. Or. 1, 28. Thus *quisque* is sometimes placed after *quo* in those comparative clauses connected by *quo...eo*, as: *Quo quisque est solertior et ingeniosior, hoc docet iracundius ac laboriosius*; Every one teaches with so much greater ire and pains, as he is (more) skilful and ingenious. Cic. Rosc. Com. 11.—If *quisque* occurs in the same sentence in two different relations, the one may be placed in the principal sentence (mostly if it can take one of the constructions mentioned in § 362, R. 20, 3); while the other is incorporated in the relative clause, as: *Dionysius edixit ut quod quisque e sacris haberet, id ante diem certum in suum quodque tantum referret*; That every one should bring everything that he held of sacred utensils, before a certain day to the temple in which it belonged. Cic. N. D. 3, 34. Sometimes *quisque* is repeated in both propositions if it has the same relation in both, as: *Opportunitas ut quæ cuique apta esset ea cuique obveniret*; That opportunity should fall to every one's lot which is suitable to him. Cic. Fin. 4, 13.—Rarely, *quisque*, in this connection, is attached to the principal sentence alone. In classical language this occurs only if the principal sentence precedes, and *quisque* is placed after *suus* or *se*, as: *Inunte adolescentiâ id sibi quisque genus ætatis degendæ constituit quod maxime adamavit* (where the usual construction 'quod quisque genus ætatis degendæ maxime adamavit, id sibi constituit' would impair the rhetorical symmetry of the principal sentence); *Everyone chooses in his younger days that future vocation for which he has a predilection*. Cic. Off. 1, 32, 117.—Later writers (rarely) place *quisque* in the principal sentence even if no such position after *suus* or *se* can be assigned to it, as: *Bonus liber melior est quisque quo major* (inst. of *quo quisque major*, which construction has not been chosen, because in this arrangement *quisque* would have the appearance of an absolute adjective, = *quisque homo*); *Every good book is the better the larger it is*. Plin. Ep. 1, 20. See Ex. 1-3.

Obs. 2. The Latin Language frequently combines with a relative adjective descriptive adjectives as ACCESSORY PREDICATES of the relative (p. 249 foll.), which agree with the relative in gender, number, and case. This combination, which is not admitted in English, is used in the following instances:

1) If in English a SUPERLATIVE, used as an attribute of the antecedent, is qualified by a relative clause. Such relative clauses do not, logically, restrict the antecedent, but the superlative, and, if construed in the same way in Latin, would confuse the logical and grammatical relations of the clause. Hence the Latin takes the superlative out of the frame of the principal sentence, and joins it, in the form of an accessory predicate with the relative, i. e. makes the relative (instead of the grammatical antecedent) the logical subject of the superlative, as: *Massiliensium civitas Fontejum eis affecit honoribus quas habuit amplissimos*; The Massilian State conferred on Fontejus the highest honors (which it had) in its gift. Cic. Fonteij. 6, 14. It would not be admissible to express this sentence in the English way (Civitas Fontejum amplissimis honoribus affecit quos habuit), because (a) the principal sentence would imply that the State had 'highest' honors to confer, and perhaps no other honors; (b) the clause '*quod habuit*' would repeat an assertion already made in the principal sentence, namely that the State had such honors to confer. But the construction would not imply what the author meant to state, namely that the honors it conferred were the highest of those it held. This predicative relation is expressed in the form of an accessory predicate attached to the relative, = the honors which it had as the highest, being the highest.—Thus: *Agamemnon Diâne devoverat*

\* Instead of this form of the comparative clause, more frequently the form with *ut quisque* and two superlatives is used. See 'Comparative clauses'.

*quod* in suo regno pulcherrimum natum esset illo anno; Agamemnon had vowed as a sacrifice to Diana the most beautiful of what had been procreated that year in his kingdom. Cic. Off. 3, 25.—Often superlatives of this kind cannot, even in English, be attached to the antecedent, without impairing the sense of the passage, as: *Ille Ephesum ad eum quem tu ex tuis fidelissimum delegisti, pecuniam misit*; He sent that money to Ephesus to a man whom you had selected as the most trustworthy of your officials (different from 'to the most trustworthy of your officials' whom you had selected'). Cic. Dej. 5, 14.—See Ex. 4-7.—The same form is used in comparative clauses with *quantus* and *posse*, dependent on superlatives, and corresponding to 'as much (great etc.) as possible'. In clauses of this kind the superlative is always attached as an accessory predicate to *quantus*, and not to the antecedent, the syndetic antecedent *tantus* being generally omitted (See Ex. 10), as: *Ut in transversos quanto maximo possent impetu concurrerent (instead of impetu maximo quanto possent)*; To rush against their front with as hard a dash as they could. Liv. 10, 23. See Ex. 8-10.—Instead of *quantus* more usually the adverbial form with *quam* is employed. Thus the idioms mentioned P. I. p. 221, R. 17, must be explained: *Jugurtha quam maximas potest copias parat*. Sall. Jug. 48.—Superlatives if thus connected with relatives often have the meaning of a high (not highest) degree, being rendered like positives with an adverb of intensity, as: *Verres mittit ad Antiochum regem rogatum ea vasa quæ pulcherrima apud eum viderat*; Verres sent to king Antiochus, and asked him for those admirable (most beautiful) vases which he had seen in his house. Cic. Verr. 2, 4, 27. [If here the superlative could be attached to the antecedent, it would have the meaning 'for the most beautiful of the vases which he had seen'.] See Ex. 11.

2) The same construction is extended to adjectives in the positive degree, if the antecedent is conceived as being unqualified with respect to the action of the principal sentence, but as being restricted by an adjective in regard to the predicate of the relative clause. Such constructions are variously recast in English, as: *Phileas, vir iniqui animi, et minime otium quo tum diutino senescere videbatur, patientis*; Phileas, a man whose mind was restless and impatient of inactivity, which it then seemed was ever to continue till he would be an old man. Liv. 25, 7 (different from 'impatient of the long lasting inactivity in which he seemed to grow old').—Sometimes, in rendering such Latin constructions, we would combine the adjective with the antecedent, although, logically, the action of the principal sentence has no connection with it, as: *Romulus Sabinas virgines quæ Roman ludorum gratiâ venissent, quos tum primum anniversarios in Circo facere instituit, Consulibus rapi jussit*; Romulus gave orders to abduct, on the day of the Consualia, the Sabine virgins who had come to Rome for the sake of the annual games which Romulus had then first established in the Circus. Cic. Rep. 2, 7, 12.—*Privatis quibusdam ex pecuniâ quam consulibus mutuam dederant, tertia pensio dabatur*; To certain private citizens the third instalment was due of the loan (as if *pecuniâ mutuâ* quam dederant) which they had made to the Consuls. Liv. 31, 13.—If attributive adjectives referring to the antecedent, logically belong to both the principal sentence and the clause, they are, even in Latin, attached to the antecedent, and not to the relative, as: *Hoc rectum putabam, ex annuo sumptu qui mihi decretus esset (not 'sumptu qui mihi annuus decretus esset) referre in ærarium ad HS X*; I considered it my duty to return to the treasury 10,000 sesterces remaining from the yearly allowance which was decreed to me. Cic. Att. 7, 1, 6. Here, the 'returning' was made from the allowance of that year, and hence refers to both the principal sentence, and the clause.

1. Hoc privatorum consiliorum<sup>1</sup> ubique semper fuit, ut in quam cuique femine convenisset<sup>2</sup> domum nuberet. Liv. 4, 4, 10.—2. Quod cuique temporis ad vivendum datum est, eo debet esse contentus. Cic. Sen. 19, 69.—3. Eorum quæ naturâ fuerant communia quod cuique obigit<sup>3</sup>, id quisque teneat<sup>4</sup>. Ib. Off. 1, 7, 21.—4. Veniat Cæsar cum copiis quas habet firmissimas<sup>5</sup>! Ib. Fam. 10, 23, 5.—5. Themistocles noctu de servis suis quem habuit fidelissimum ad Xerxem misit. Nep. 2, 4, 3.—6. Quas res violentissimas naturâ genuit, earum moderationem nos soli habemus. Cic. N. D. 2, 60.—7. M. Popilius in tumultu quem proximum castris Gallorum capere potuit, vallum ducere cepit. Liv. 7, 23.—8. Hannibal quantum maximam vastitatem<sup>6</sup> potest caedibus incendiisque efficit. Liv. 22, 3.—9. Papirius Sp. Nautium jubet, inter ipsam dimicationem<sup>7</sup> mulos<sup>8</sup>, quando maxime<sup>9</sup> posset moto<sup>10</sup> pulvere, ostendere. Ib. 10, 40.—10. Tanta est inter eos quanta maxima potest esse, morum studiorumque distantia. Cic. Am. 20.—11. P. Scipioni ex multis diebus quos in vitâ celeberrimos<sup>11</sup> latissimosque vidit, hic dies clarissimus<sup>12</sup> fuit. Ib. Am. 3.

<sup>1</sup> A right of individual discretion.—<sup>2</sup> to be convenient.—<sup>3</sup> what has fallen to his lot.—

<sup>4</sup> Construe: *Id quisque teneat quod cuique obigit eorum (i. e. ex eis rebus) quæ naturâ etc.*—<sup>5</sup> with the most trustworthy (or effective).—<sup>6</sup> desolation.—<sup>7</sup> during the fight itself, i. e. when the fight would have fairly commenced.—<sup>8</sup> mules.—<sup>9</sup> Instead of an adjective (*maximo*) agreeing with *pulvere*, an adverb is used dependent on '*movere*' understood.—<sup>10</sup> to raise.—<sup>11</sup> the many famous and happiest days.—<sup>12</sup> the most glorious.

*Rem. 13.* It is a principle of the English language that the relative adjectives or adverbs must be actual members of that proposition which they subordinate to another sentence. According to this principle, it is not allowed in English to subordinate a sentence to another sentence by means of a relative which grammatically belongs to a clause dependent on the sentence which is to be connected by the relative\*. The Latin conception is different. Any Latin sentence may be relatively subordinated to another sentence by means of a relative adjective or adverb which is a grammatical member of some clause dependent on it. In this instance the relative (according to the rule p. 520, Obs. 2) *precedes* the conjunction or other connective of the clause to which it belongs, and the clause, in this construction, generally *precedes* that proposition which is logically subordinated to the principal sentence by means of the relative in the clause. This remarkable construction, which is very frequent, and is called 'INVOLUTION OF THE RELATIVE', must be rendered by variously recasting the English sentence.

**Obs. 1.** Wherever the Latin language uses an involution of relative clauses, it conceives the relative adjective or adverb as *two distinct words*, namely as a **CONNECTIVE ELEMENT**, consisting in the relative root *qu* (*cu*), which connects without being itself a member of the sentence which it connects; and a **PRONOMINAL OR DETERMINATIVE ELEMENT**, which represents the antecedent as belonging to the grammatical frame of a given clause. If the relative is 'involved', the relative root belongs, as if it were a conjunction, to another clause than the determinative element, as: *Vivit ille, quem si interfecisses salvi essemus*, which would be literally rendered: That man lives if whom you would have killed, we would be safe. But the Latin does not conceive or feel the construction in this way. The Latin thinks as we would think if employing a conjunction with a demonstrative: 'That man lives while if you had killed him, we would be safe'; *Vivit ille qu—, em si interfecisses, salvi essemus*, where *qu*, belonging to *salvi essemus*, has the force of a conjunction of general and looser import than any specific conjunction (= *quum*, *dum* etc. without their particular adverbial meaning), while *em*, belonging to *si interfecisses*, is conceived as an accusative *eum*\*\*.

\* Some of the English classical authors have attempted to introduce this form of construction in the English language, as: 'They venture to be hanged for those civil rights which their ancestors rather than to part with chose to be cut to pieces in the field of battle'. ADDISON, *FREEHOLDER* No. 1. Here are two propositions: 1) Their ancestors chose rather to be cut to pieces in the field of battle; 2) the comparative clause 'than to part with which' (= than they would part with which). The former proposition contains no member connecting it with the antecedent in the principal sentence ('those civil rights'), on which antecedent it is made dependent by means of a relative 'which', that belongs to the comparative clause dependent on it; thus leaving the governing proposition of this clause grammatically unconnected with its principal sentence. Such attempts have failed to find many imitators since they are repugnant to the principle of the English language, according to which the relative word is an *indissoluble unit*, and cannot be so separated in thought as to assign the connective, or relative element 'wh' and the determinative element 'ich', to different propositions. This is done in the above quoted passage, where the element 'wh' belongs to the proposition 'Their ancestors... in the field of battle', and the determinative element, to the comparative clause. To the same Un-English constructions belong such expressions as 'Than whom nobody is wiser', which, being an improper imitation of a Latin idiom, is sometimes used by English writers.

\*\* That this was really the Roman conception, appears from the remarkable fact that sentences thus subordinated by the mere root *qu*, have their predicates either in the *indicative* or *subjunctive* according to the rules on actual relative clauses, as: *O adolescentiam tractam eleganter! cui quidem quum quod licuerit obiciatur, tamen id ipsum falsum reperiatur*; O how unexceptionable must be the life of that young man! seeing that even those reproaches prove false, which, even if true, would contain no reproach. Cic. *Plane*. 12. 31.—Here 'reperiatur' is a relative subjunctive according to § 614, *R.* 16, as if the proposition to which *reperiatur* belongs, were a real relative clause, while the relative adjective grammatically belongs to the clause introduced by *quum*. To the proposition in which 'reperiatur' is the predicate, only the relative root can be referred, and its subjunctive form can be explained only if we separate in our minds this relative element from the determinative element.

**Obs. 2.** A relative may thus be 'involved' in any kind of finite or non-finite clauses, and, in these clauses, may have any grammatical relation which a demonstrative can have.

**A.** Of the **FINITE** clauses in which a relative may be involved, the most frequent are *conditional clauses* (see Ex. 1-4, and the Ex. in Obs. 4, 3; Obs. 6, 1; Obs. 7). But relatives may also be involved in completing *That-clauses* (Ex. in Obs. 6, 2), in *interrogative clauses* (Ex. 5-7, and the Ex. in Obs. 4, 1; 4, 3; Obs. 6, 2), in *temporal* (Ex. in Obs. 4, 2; Obs. 5, 1; Obs. 7), *causal clauses* (Ex. 8), *modal Ut-clauses* (Ex. 9, and the Ex. in Obs. 5, 3), *comparative clauses* (Ex. 10, 11, and Obs. 8), *concessive clauses* (Ex. in Obs. 4, 2; Obs. 7) and even in *relative clauses* (Ex. 12-14, and Obs. 4, 1; 4, 3; Obs. 6, 1; see below). In all these clauses, the relative has the same position, as in the coordination of periods which have a protasis, or begin with their clauses (p. 520): *Qui si, cujus si, cui quum, quem ne, quo quin* (= *si is, si ejus, quum ei* etc.). A relative may be involved in a *relative clause*, if both relatives have different grammatical relations in the clause. In this instance the 'involved' relative (i. e. that of the two relatives whose relative root belongs to the governing clause) *always* precedes that relative which originally belongs to the clause. This latter relative, in the English rendering, has always the force of an ordinary relative, while the 'involved' relative, as far as it belongs to the clause corresponds to a *demonstrative* (or to a personal pronoun, if its grammatical antecedent is a personal pronoun), as: *Accedit superstitio, quā qui est imbutus quietus esse numquam potest*; To this must be added *superstition, which* never allows rest to him *who* is affected by it (literally: by which who is affected can never be quiet). Cic. *Fin.* 1, 18, 60.—Similar is the form of involution if applied to *interrogative clauses* introduced by interrogative adjectives or adverbs. In such combinations the 'involved' relative always precedes, but frequently the governing clause, if consisting of a mere predicate, is elegantly inserted between the relative and the other parts of the interrogative clause, as: *Si quid est in me ingenitū, quod sentio quam sit exiguum* (= *quod quam sit exiguum sentio*; Which how little [it] is I feel, i. e. 'the insufficiency of which I feel'). Cic. *Arch.* 1, 1.—Sometimes other parts of the governing clause are inserted between the relative and the interrogative clause. See Ex. 5, 7.

**B.** In a similar manner the relative is involved in the different non-finite clauses, as:

(a) In **INFINITIVE CLAUSES**. Here the relative may be the *subject*, and is then in the accusative, as: *Ei quos speramus nobis profuturos*; Those of whom we hope that they will be of use to us (literally: Those, we hope that who will benefit us). Cic. *Off.* 1, 15, 48. But the relative may be in the relation of a transitive, intransitive, or adverbial object, or in that of an attribute; as: *Helvetiorum una pars quam Gallos obtinere dictum est*; The one part of the Helvetian country, which, as it has been said, the Gauls occupy. *Cæs. B. G.* 1, 1.—*Exercitatio dicendi, in qua me non infrior mediocriter esse versatum*; The exercise in speaking, in which, I own, I have been not a little engaged. Cic. *Arch.* 1, 1.—Cato post mortem in ea loca discessit quo mihi ipsi cernēbat esse veniendum; Cato, after his death, has gone to those places, to which, he saw, I must go myself. Cic. *Sen.* 13, 81.—See Ex. 16-18.

(b) If a relative is involved in *participial clauses*, not belonging to the *ablatives absolute*, the relative may be in any relation *except that of a subject* (See Ex. 19-22; and the Ex. in Obs. 5, 1).—In this instance many English authors permit themselves a literal translation of the Latin involution, as: *In Phidiae mente insidēbat species pulcritudinis*; In Phidias's mind there shone an ideal of beauty, looking at which he directed his art and hand to the expression of Jove's image (better: which was before his eyes when he directed etc.). Cic. *Or.* 2, 9.—Relatives, if involved in the construction of *ablatives absolute*, almost always are in the relation of *subject-ablatives*, as: *Sunt prima elementa naturae, quibus auctis virtutis quasi carmen efficitur*; The first elements (of virtue) are those of nature (are created by nature), and when these are enhanced, the poem, as it were, of virtue is built up (composed). Cic. *Fin.* 5, 15, 43.—But sometimes relatives thus involved are in the relation of *attributes* to the subject ablative, or to the objects of the predicate ablative as: *Quum L. Flacci res agitur, cujus virtute regibus exterminatis libertas in republica instituta est*; When the case of L. Flaccus is discussed, by whose bravery the kings were exterminated so that liberty was established in the republic. Cic. *Flacc.* 11, 25. See Ex. 23, 24 and the Ex. in Obs. 4, 2; 6, 1.

**Obs. 3.** Clauses with involved relatives cannot be literally rendered into English. For the purpose of rendering such clauses, the Latin relative must be 'DEVOLVED', i. e. the double relation of the Latin relative must be reduced to a *simple* relation. There are always three propositions which are affected by the involution of the relative: 1) The *principal sentence*; 2) the *governing clause*, to which the Latin relative root refers, and which is logically dependent on the principal sentence; 3) the *dependent clause*, in which the relative is involved, and which is thus made grammatically dependent on

both the principal sentence, and on its governing clause. The rearrangement of these three propositions by 'devolving' the relative, is called 'devolution of the relative', which consists in the following four methods: A) The governing clause is made GRAMMATICALLY dependent on the principal sentence by means of a relative or conjunctive connective, the dependent clause being so attached to it that a demonstrative or personal pronoun is used in place of the involved relative. This method is called 'DIRECT DEVOLUTION' (Obs. 4).—B) The grammatical relations of the governing and dependent clauses are reversed, so that what is in Latin the dependent clause, becomes the governing clause in English, and vice versa; the relative remaining in the same clause as in Latin, while the connective properly belonging to the clause (if there is any) is transferred to the other proposition. This method, which is called 'DEVOLUTION BY REVERSAL', is mostly applied to non-finite clauses, but sometimes also to the finite clauses (Obs. 5).—C) The governing and dependent clauses are contracted into one proposition, which is connected like an ordinary relative clause with the principal sentence. This method is called 'DEVOLUTION BY CONTRACTION' (Obs. 6).—D) Both the governing and the dependent clauses are coordinated with the principal sentence by using a coordinating conjunction with a demonstrative or personal pronoun, in place of the involved relative. This is called 'DEVOLUTION BY COORDINATION' (Obs. 7).

There are numerous instances in which, besides these methods of devolution, minor changes must be applied to certain members of the clauses, or in which connecting links must be placed between the principal sentence and the clauses. Sometimes, however, none of these different methods will do full justice to the elegance and concinnity of the Latin construction, and the finer shades which the Latin form imparts to the thought will be lost in the English rendering. Peculiar is the rare instance that a relative is involved in more than one dependent clause, in which instance several of the above-mentioned methods must be combined, as: *Doctrina, quam ego si nihil dicam adjuvare, mentiar*; A doctrine the usefulness of which in several respects, I do not dispute (literally: that which if I would say was not useful, I would lie). Cic. Or. 1, 32.—Ex. 8, 25.

Obs. 4. DIRECT DEVOLUTION.—This form may be applied in three different ways:

1) By using a relative adjective or adverb, which may be made a member of the governing clause, and at the same time refer to some member of the principal sentence as its antecedent, as: *Ad fugam hortatur turpitudine conjungendi cum tyranno, qui quidem incertum est, Phalarimne an Pisistratum sit imitaturus*; To fight the turpitude urges (me) of uniting with a tyrant, of whom it is uncertain whether he will imitate Phalaris or Pisistratus. Cic. Att. 7, 20.—*Infima est conditio servorum, quibus non male precipiunt qui ita jubent uti ut mercenarii (= quibus qui ita jubent uti ut etc., non male precipiunt)*; The lowest rank is that of the slaves, in regard to whom some lay down the good rule to treat them like paid servants (or more literally: in regard to whom those lay down a good rule who order 'to use them' like paid servants). Cic. Off. 1, 13, 41.

2) By substituting for the predicate of the governing clause a verb of kindred signification, but with a different (for inst. 'causative') relation to the antecedent, so that it may be attached to it by means of a relative, without changing the sense, as: *Nihil unquam patrem facere vidit quod quum imitatus esset non patris similis videretur*; He never saw his father do anything which, when imitated by him, would not make him appear the like of his father (i. e. in turpitude). Cic. Verr. 2, 3, 68.—An adolescentulum discere ea mavis quæ quum plane perdidicerit nihil sciat? Or would you rather have a boy learn what leaves him ignorant even when he has thoroughly mastered it? Cic. Fin. 2, 66, 76. Thus if the relative is involved in ablatives absolute: *Stajenus ea locutus est pariete interposito, quibus patefactis in judiciumque prolatis ille rei capitalis damnatus est*; Stajenus, within his own premises, used that language which, after it was betrayed, and carried to the courts, caused his condemnation for a capital crime. Cic. Top. 20, 75.

3) By using a conjunction, in place of the relative, to subordinate the governing clause to the principal sentence, as: *Quam dubium est, an merito accusetur qui an omniuo accusetur incertum est*; How doubtful is it whether a person is justly accused if it is uncertain whether he is accused at all! Plin. Ep. 7, 10.—*Gratulor tibi quod tantum vales apud Dolabellam quantum si ego apud sororis filium valerem, jam salvi esse possemus*; I congratulate you because your influence with Dolabella is so great that, if I had the same influence over my nephew (Antony), we might be all safe by this time. Cic. Fam. 9, 14, 3.—Sometimes a conjunction may be attached to an intermediate participle, or clause, thrown between the principal sentence and the clause, as: *Quum te intueor, Marcelle, quem si ad Cannas consulem habuissemus, melior nostra fortuna fuisset*; When I look upon you, O Marcellus, knowing (being convinced, satisfied) that our fate would have been better, had you been our consul at Cannæ! Liv. 25, 6.

Obs. 5. DEVOLUTION BY REVERSAL. This form may be applied:

1) To temporal clauses (both finite and participial) in which the same temporal conjunction is adapted to either of the two clauses, as: *Unas litteras video mihi a te non*

*esse redditas, quas L. QUINCTIUS QUUM FERRET, ad bustum Basilii vulneratus et spoliatus est*; I see that one letter has not been returned to me by you, (the one) which LUCIUS QUINCTIUS CARRIED when he was wounded and robbed at Basilii's tomb. Cic. Att. 7, 9, 1.—*Gordius planstrum, quo VERENTI regnum delatum fuerat, in templo Jovis posuit*; Gordius placed in the temple of Jupiter the wagon in which he rode when the crown was conferred on him. Just. 11, 7 (= quo quum veheret, regnum ei delatum fuerat).—Here belongs the passage Cic. Or. 2, 9, quoted Obs. 2, B. a. In the passage Cic. Flacc. 11, 25, quoted at the same place, a devolution by reversal is used, but with a modal conjunction, the relation of the two clauses being not interchangeable. Sometimes the reversal of the two clauses may be made by means of relatives, as: *Natura fit ut liberi a parentibus amentur*; A quo INITIO PROPECTAM communem humani generis societatem persequimur; That children are loved by their parents is established by nature; FROM WHICH LOVE that society of the human race has arisen which we perpetuate. Cic. Fin. 3, 62.

2) Generally this method is applied to infinitive, and sometimes to interrogative clauses, in which instance the governing clause is added as a parenthetical clause, either asyndetically, or by means of the conjunction 'as': *Socratis non ea frons erat quæ Crassi illius veteris, QUEM SEMEL ait in omni vita risisse Lucilius*; Socrates's face was not that of old Crassus, who, as Lucilius says, LAUGHED ONLY ONCE IN HIS WHOLE LIFE. Cic. Tusc. 3, 15, 31. See the passages in Obs. 2, B. a.

3) Sometimes this form of devolution may be applied with a change of the Latin conjunction, in certain instances when an involution is used to hide, as it were, the main point of a sentence under the form of a dependent clause, and to soften thereby with urbanity the directness of a statement, as: *Atticus 'Noli, oro te', inquit Sulla, 'adversus eos me ducere CUM QUIBUS NE CONTRA TE ARMA FERREM Italiam reliqui'*; Atticus said to Sulla 'Pray, do not lead me against those WHOM I WOULD HAVE JOINED IN FIGHTING YOU, if I had not preferred to leave Italy'. Nep. Att. 4\*.

Obs. 6. DEVOLUTION BY CONTRACTION.—This form is used:

1) By changing the predicate of the dependent clause into a corresponding VERBAL NOUN (in *ing* or otherwise), which is made an object (generally a prepositional object) or other member of the contracted proposition, the relative being used as the connective of the whole proposition. Frequently, with this method a change of the predicate according to Obs. 4 must be connected, as: *Recordor tua consilia, quibus si parvissem, tristitiam illum tempus non subissem*; I remember your counsels, by following which I would not have suffered the misery of those times. Cic. Att. 8, 12, 5.—*Quam te decebat eis verbis uti quibus si philosophi non uterentur, philosophi omnino non uterentur*; How well it became you to use that language without the use of which by the philosophers we would have no philosophy at all. Cic. Fin. 2, 16.—*Epicurus non satis politus est eis artibus quas qui tenent eruditi appellantur*; Epicurus is not polished enough in those accomplishments the holders (possessors) of which are called 'scholars'. Cic. Fin. 1, 7.—*Expulso cive qui morante, si quidem humanum certi est, capiti Roma non potuit, legati ab Chalcis venerunt*; After the expulsion of a citizen whose presence, if anything human is certain, would have made the capture of Rome an impossibility, envoys came etc. Liv. 5, 33. Voluntas a postulatorem (Ciceronis), quas qui legat non multum desideret historiam contextum librum temporum; Whose readers will not desire much a systematic history of those times. Nep. Att. 16, 3.

\* This is one of the instances in which we cannot approach the finer shades of the Latin sentence. The passage, as rendered above, contains the real meaning of Atticus's words, but this meaning is far more directly expressed in the English version than in the Latin text. If, however, the passage is rendered otherwise, the real point will be lost, which, in the Latin text, is intimated by the logical connection of the opening words *Am quibus* with the governing clause 'Italiam reliqui'. As rendered by our grammarians and editors, the sense of the Latin words will be all but unintelligible. Bröder renders: *For the sake of whom I left Italy, lest I might be compelled to bear arms against you*. Kühner and Meiring: *With whom I did not wish to bear arms against you, and therefore left Italy* (which form is as objectionable in regard to German style, as it is in the English version). MADVIG: *With whom I did not wish to bear arms against you, so that I left Italy for that very reason*. In all these renderings the unwillingness of bearing arms against Sulla is made the main point of the sentence, while the main point is 'that he, if he had remained in Italy, would have joined them in the fight against Sulla'. THACHER in his 'improvement' on Madvig's rendering, makes the wrong point more prominent still by translating: 'Against those with whom I was so unwilling to bear arms against you that I left Italy'. As if the unwillingness of Atticus to fight against Sulla could be a reason not to fight for him!—It is proper to add here the remark that the above-quoted passage is objectionable in the point of Latin style, since the words 'cum quibus' may be grammatically referred to both, the dependent clause 'ne contra te arma ferrem', and to the governing clause 'Italiam reliqui' (cum quibus Italiam reliqui, ne contra te arma ferrem). This glaring ambiguity cannot be excused with the elegance of the construction.

tively, making the governing clause *demonstrative*, while the English language must always give the relative form to the governing clause (in *eam* formam etc.).—Ex quo genere illud est Catonis, a quo *quum* *quereretur* quid maxime in re familiari expediret, RESPONDIT 'bene pascere'. Here belongs that saying of Cato's, WHO, when asked (literally 'when it was asked of him') what was the first requisite in a household, ANSWERED 'a good board'. Cic. Off. 2, 25. Here the determinative of the governing clause (the pronoun *is*) is left out as subject-nominative, while in English it takes the relative form (*who*). If the period had been arranged without involution, it would have been '*qui*, *quum* ab eo etc.' See Ex. 1-5.

Obs. 2. The same form of cross-involution is applied to *participial* clauses, which are 'devolved' in English in the same manner as finite clauses, as: Salutatio illius libri quo me Atticus affatus, quasi jacentem excitavit. The dedication of that book by which Atticus roused me from despondency when he addressed me BY IT (when addressing it to me). Cic. Brut. 3, 14. Here the demonstrative of the governing clause, being in the same case with the relative, is omitted (quasi jacentem eo excitavit), while in English it takes the relative form.

Obs. 3. Sometimes the demonstratives of the governing clause are left out in Latin, even if they are in oblique cases different from the case of the relative in the dependent clause, e.g. when they are subject-accusatives or transitive objects, and even if they are prepositional or adverbial objects: (Cæsar dixit) hos esse eosdem (Germanos) quibuscum saepenumero congressi Helvetii non solum in enis, sed etiam in illorum finibus ple-rumque superarint (instead of 'eos superarint'); Cæsar said that these were the same (Germans) whom the Helvetians had generally defeated when they had met with them both on Helvetian and German soil. Cæs. B. G. 1, 40.—(Cæsar dixit hoc nullo merito populi Romani accidisse), qui si alicujus injuriæ sibi conscius fuisset, non fuisse difficile cavere (= non fuisse ei difficile); ... of the Roman people, to which it would not have been difficult to guard against it, if it (they) had been conscious of any wrong. Cæs. B. G. 1, 14.—Quini erant ordines, quo qui intraverant se ipsi acutissimis vallis inducunt (i. e. ubi se inducunt); There were five rows, where those who entered them (literally 'thither'), spitted them-selves on the sharply pointed stakes. Cæs. B. G. 7, 73.—Sentences in which, as in the last two, the demonstrative supplied is not a necessary part of the clause, may be considered as *ordinary* involutions according to R. 13. And, indeed, cross-involution is nothing but a species of ordinary involution, to which the method of direct devolution is applied by attaching the relative of the dependent clause to the governing clause, and which, even in Latin, may be replaced by a construction in which the relative is *not* involved (Obs. 5). See Ex. 6, 7.—Sometimes two relative clauses, one of which is dependent on the other, which is again dependent on a governing clause, are thus involved with omission of the antecedents: Fundamentum oratoris vides locutionem emendatam et Latīnam, cujus penes quos laus adhuc fuit, non fuit rationis aut scientiæ, sed quasi bonæ consuetudinis; You see that the first requisite, for an orator, is a good Latin style, which with those who had the reputation of it (who had the reputation of a good style) was not a consequence of a scientific method, but of proper practice. Cic. Brut. 74, 258. This construction must be thus resolved: *que apud eos penes quos ejus laus fuit, non fuit rationis etc.* The first *que* is referred to the governing clause '*non fuit rationis*', where it is understood as the subject; '*apud eos*' is omitted, as being sufficiently implied in *penes quos*; '*ejus*' is turned by involution into the connecting relative of the whole of the three clauses.

Obs. 4. Sometimes the dependent clause has, besides the determinative which it has in common with the governing clause, another determinative referring to a different antecedent in the principal sentence. In this instance it would be grammatically correct to use either of the two determinatives of the dependent clause as the connecting relative. But the Latin prefers that relative connection which will not require the use of another demonstrative in addition to it, as: M. Grati-dius, M. Antonii familiaris, cujus quum præfectus esset in Ciliciâ, est interfectus; M. Grati-dius, the friend of M. Antonius, who was killed when he was his (Antonius's) prefect in Cilicia. Cic. Brut. 45, 168. [Instead of '*qui quum ejus præfectus esset*', which construction would require the use of a demonstrative, while, if construed as above, the determinatives of both clauses, being the subjects, are omitted.]

Obs. 5. Sometimes, but more rarely, clauses which might have been connected by cross-involution, are construed as in English, so that the demonstrative is placed in the dependent clause, while the relative belongs to the governing clause, as: Hoc ne P. quidem Clodius dixit unquam, quem, quia jure fui ei inimicus, doleo a te omnibus vitiis esse superatum (instead of cui quia fui inimicus, doleo (eum) a te...esse superatum). Cic. Phil. 2, 7.

1. Tecta igitur ambulatiuncula<sup>1</sup> addenda est, quam ut<sup>2</sup> tantam faciāmus quantam in

<sup>1</sup> Tecta ambulatiuncula, a little hall for promenading.—<sup>2</sup> which, if we make it etc.

Tusculano fecimus, prope dimidio minoris constābit<sup>1</sup> isto loco. Cic. Att. 13, 29, 2.—<sup>2</sup> Thrasyllo corōa a populo data est, quam quod amor civium, non vis expresserit<sup>3</sup>, nullam habuit inviam<sup>4</sup>. Nep. Thras. 4, 1.—<sup>5</sup> In hortos me M. Flacci Cortuli, cui quum<sup>6</sup> omnis metus<sup>7</sup>, exilium, mors proponeretur, hæc omnia perpeti magis quam custodiam mei capitis<sup>8</sup> amittere. Cic. Planc. 7.—<sup>9</sup> Is iterum, cui quum<sup>10</sup> hæret majores ex otio fructus capere quam ceteris, non dubitaverim me gravissimis tempestatibus obviam ferre<sup>9</sup>. Ib. Rep. 1, 4.—<sup>11</sup> Ex quo exstitit illud<sup>10</sup>, multa esse probabilia<sup>11</sup>, quæ<sup>12</sup> quamquam non perciperentur<sup>13</sup>, tamen, quia visum<sup>14</sup> habērent quemdam insignem et illustrem, eis sapientis vita rege-retur. Ib. N. D. 1, 5.—<sup>15</sup> Venit mihi in mentem illud dicere quod<sup>15</sup> quum apud M. Glabrio-nem nuper commemorassem, intellexi vehementer populum Romanum commoveri<sup>16</sup>. Ib. Verr. 1, 14.—<sup>17</sup> Id solum bonum est quod<sup>17</sup> qui possunt, necesse est beatus sit. Ib. Fin. 5, 28.

Rem. 15. Short relative clauses often take the form of PARTICIPIAL CLAUSES if the relative adjective is the *subject* of the clause. The relative, in this instance, is omitted, the finite predicate being changed into a *participle* (present or perfect, according to the sense), which agrees in gender, number and case with its antecedent, expressed or understood.

Obs. 1. The present participle is used if the action is conceived as coincident in time with the principal action, provided the verb is *active* or *deponent*, as: Non sustinissent primum impetum ni alius metus, insidens pectoribus (= qui insedit pectoribus), a fugâ contineret; They could not have resisted the first attack, had not another fear, that occupied their minds (occupying their minds), kept them from fleeing. Liv. 10, 41.—Misericordia est ægritudo ex miseriâ alterius, injuriâ laborantis (= alterius qui injuriâ laborat); Compassion is the grief (arising) from the distress of another person who is suffering wrongly. Cic. Tusc. 4, 8, 18. See Ex. 1-5.

Obs. 2. The past participle is used if the action contained in the predicate of the relative clause is anterior to the principal action, provided that the verb is *passive* or *deponent*: Ne munus humanum, assignatum a Deo, defugisse videamini; Lest you may seem to have deserted the duty of men assigned (which has been assigned) by God. Cic. Rep. 6, 15, 15.—A dis immortalibus constitutam inter homines societatem evertunt; They destroy the society which has been established by the immortal gods among men. Cic. Off. 3, 6, 28.—Pythagoras Crotōnam venit, populūque in luxuriam lapsum auctoritate suâ ad usum frugalitatis revocavit; P. came to Croton and recalled by his authority to frugality the people that had fallen into luxury. Just. 20, 4. Ex. 6, 7.

Obs. 3. If the *active* predicate of a relative clause denotes an action *prior* to the principal action, the clause cannot assume a participial form, except the verb is a *deponent* (see the last Ex. in Obs. 2), or if the construction may be so changed into a passive construction that the relative is made the *subject* of the passive verb, as: Timotheus enhanced by many (of his own) virtues the glory which he had inherited from his father; Timotheus a patre acceptam gloriam multis auxit virtutibus. Nep. Tim. 13, 1.

Obs. 4. If the *passive* predicate of a relative clause denotes an action *coincident in time* with the main action, the clause cannot take a participial form, except the predicate is conceived as a *periphrastic participle with the copula* (p. 127), as: In-ula est Melita, satis lato ab Sicilia mari dis-juncta (= quæ disjuncta est, which is 'a separated one'); Melita is an island which is separated from Sicily by a rather broad channel of the sea. Cic. Verr. 2, 4, 46.—Non tam utilitas parva per amicum quam amici amor ipse delectat; Not so much the advantage delights which is obtained through a friend, as the friend's love (itself). Cic. Am. 14, 51. Ex. 8, 9.

Obs. 5. Absolute participles are often used with the force of relative clauses with the absolute syndetic antecedent (*id*, *ei*), as: Uno et eodem temporis puncto nati dissimilis et naturas et vitas et casus habent; Those that are born at one and the same moment have different characters, lives, and fates. Cic. Div. 2, 45, 95.—Prima et secunda acies signavit ut victis ac summotis resisteret, tertia ut venientis sustineret; The first and second lines made the attack to oppose those that had been (already) conquered and dislodged

<sup>1</sup> Will cost almost one half less.—<sup>2</sup> because it was not a compulsory present, but the free gift of his countrymen's love.—<sup>3</sup> odium.—<sup>4</sup> who, although.—<sup>5</sup> violence. Metus frequently means 'moral compulsion' by some violence acting on the mind and producing fear.—<sup>6</sup> to threaten.—<sup>7</sup> the guard of my life.—<sup>8</sup> although.—<sup>9</sup> to expose myself to.—<sup>10</sup> Since so, the opinion has arisen that etc.—<sup>11</sup> There are many demonstrable things.—<sup>12</sup> quæ quum, *vis*, by which, although they etc.—<sup>13</sup> perceived by the eyes.—<sup>14</sup> because they are evidently and clearly visible in a certain sense of the word.—<sup>15</sup> quod quum commemorassem, *qua* dependent on commemorare quum id commemorassem.—<sup>16</sup> to arouse.—<sup>17</sup> = quod by which beatus sit qui eo potest.

(before); the third line, in order to meet those that were (newly) arriving. *Ces. B. G. 1, 25.*—*Nuperrime dictum facile memoriae mandatur*; What has been just said is easily committed to memory. *Auct. Her. 3, 10, 18.*—*Male parla male dilabuntur*; What has been badly acquired goes badly to naught. *Cic. Phil. 2, 27, 65.*—Such participles may often be rendered by English substantives or participles used substantively, as: *Equestris proelii ratio et cedentibus et insequentibus par periculum inferbat*; The character of an equestrian battle was equally dangerous for the fleeing and the pursuers. *Ces. B. G. 5, 16.*—*Quem pigeat longinquitatis bellorum scribendo legendoque, quae gerentis non fatigaverunt?* Who would be wearied by the length of wars in writing and reading (them), which did not tire out their actors (those that waged them)? *Liv. 10, 31.*—Often the Latin idiom gives to absolute participles, with the force of relative clauses, if they refer to the general idea of persons, a grammatical relation, as: *Magna ejus diei, quo in Sentinati agro bellatum est, fama est etiam vero stanti*; LITERALLY: The glory of the day on which the battle in the Sentinatio district was fought, is great even to one that stands by the truth (= even if there is nothing exaggerated). *Liv. 10, 30.*—*Nisi forte haec illi tunc arma dedimus ut nunc cum bene parato pugnaremus*; Unless perhaps we have then given him (to Caesar) arms in order to fight now with one that is well prepared (= in order to prepare him well for fighting against us). *Cic. Att. 7, 6, 2.* See Ex. 10-18.

1. *Nemo cunctam intuens terram de divina providentia dubitabit.* *Cic. N. D. 2, 39, 99.*  
—2. Probe<sup>1</sup> a Stoicis definitur fortitudo quum eam virtutem esse dicunt propugnante<sup>2</sup> pro aequitate. *Ib. Off. 1, 19, 62.*—3. *Animo nobis opus est non abhorrente<sup>3</sup> a quibuscumque consiliis.* *Liv. 30, 30.*—4. *Nullum vitium tetrus quam avaritia, praesertim in principibus<sup>4</sup> rempublicam gubernantibus.* *Cic. Off. 2, 22, 77.*—5. *Odiusum sane genus hominum (est) officia<sup>5</sup> (sua) exprobrantium<sup>6</sup>, quae meminisse debet is in quem collata sunt, non commemorare qui contulit.* *Ib. Am. 20, 71.*—6. *Superveniunt<sup>7</sup> his restituentibus* pagnam *L. Cornelius et C. #### Moods in Relative Clauses.

§ 614. Relative clauses have their predicates in the SUBJUNCTIVE 1) if the clause is conceived as lacking reality (SUBJUNCTIVE OF NON-REALITY);

<sup>1</sup> Correctly.—<sup>2</sup> *propugnare*, to be a champion.—<sup>3</sup> to shrink.—<sup>4</sup> prominent men.—<sup>5</sup> their past services and merits.—<sup>6</sup> *exprobrare aliquid*, to cast in somebody's teeth; always to refer to what one has done for another, so as to make it, as it were, a reproach to him.—<sup>7</sup> historical present. *Supervenire alicui*, to arrive while somebody is performing an action designated by a present participle which agrees with its logical subject.—<sup>8</sup> *i. e.* Eumenes occurrit Romani qui profecti erant.—<sup>9</sup> an historical fact.—<sup>10</sup> *res gesta*, an act performed, a transaction, an event.—<sup>11</sup> *i. e. quae remota est* (periphrastic participle), which is removed from, *i. e.* which is anterior to.—<sup>12</sup> which is not known, *i. e.* by those who approve it.—<sup>13</sup> as if.—<sup>14</sup> It is in the nature of one who performs an action with pleasure.—<sup>15</sup> the northwind.—<sup>16</sup> is against (contrary to) those who etc.—<sup>17</sup> from Athens to the island of Lemnos.—<sup>18</sup> the sense of sight.—<sup>19</sup> according to the customary device of those who found cities (of the founders of cities).—<sup>20</sup> a place which is now enclosed by two groves 'for those that descend'; *i. e.* which is enclosed towards the upper part of the hill, so that those that descend must pass between two groves.—<sup>21</sup> measures taken by the consent of all the ranks etc.—<sup>22</sup> to rescind.—<sup>23</sup> The two object-infinitives are dependent on *monstrare*, according to the construction of *docere* (p. 104). *Docere* has not been used because this verb would require the accusative *rescentis*, which, in the form it was used at Justin's time (*rescentes*), would not have been distinguishable from the nominative, and would have made the sentence ambiguous.—<sup>24</sup> literally: To those that ate wild fruit, *i. e.* 'while up to their time men were living on wild fruit'.

2) if the clause is logically connected with the principal predicate (GNOMIC SUBJUNCTIVE, § 615).

A relative clause is considered as lacking reality: (a) if it conveys a negative meaning under an affirmative form, or an affirmative meaning under a negative form (*R. 16, 17*); (b) if its predicate does not express actual existence, but is merely conceived in the mind of the speaker. (*R. 18, 19*.)

Obs. Several kinds of relative subjunctives belong to both of the above-mentioned classes, being subjunctives of non-reality, and at the same time gnomic subjunctives. Thus the relative subjunctive of purpose is a gnomic subjunctive, being logically connected with the principal predicate; but it is at the same time, a subjunctive of non-reality, the action existing only in the mind (intention) of the speaker (*R. 19, Obs. 6*). Often relative subjunctives fall under three and more different rules, each of which requires of itself the subjunctive.

Rem. 16. Relative clauses conveying a negative meaning under an affirmative form, and *vice versa*, always depend on 'negative antecedents,' and always require the subjunctive if the negation in the principal sentence affects the relative clause, so as to make it virtually negative if it has an affirmative form, and virtually affirmative if it has a negative form. If the negation in the principal sentence has no such force, the relative clause, generally, has its predicate in the indicative, as:

*Non adest qui hoc sentit* (= is qui hoc sentit, non adest); The person who has this opinion is not present. But: *Non adest qui hoc sentiat*, or *Nemo adest qui hoc sentiat* (= Ei qui adsunt hoc non sentiunt); There is nobody present who has this opinion. In the former example, the relative clause retains its affirmative meaning, being not affected by the negation in the principal sentence, and hence has its predicate in the indicative. In the second example the relative clause, although affirmative in form, is conceived as negative, being affected by the negation in the principal sentence. Hence its predicate must be in the subjunctive of non-reality.

Obs. 1. Sentences with negative antecedents (or what is virtually equivalent to these) of relative clauses dependent on them, occur in three grammatical forms: 1) The negative antecedent is the subject of the principal sentence, the predicate being the abstract verb *esse*, denoting mere 'existence' (p. 4-6, Obs. 8), as: *Nemo est qui hoc sentiat.*—*Nihil est quod aucti possit.*—*Nulla gens est quae etc.* (See Obs. 2, 3, 4).—2) The negative antecedent is the subject of the copula *esse* with a completing predicate, as: *Nemo est qui hoc sentiat* (see Obs. 5).—3) The predicate of the governing sentence is an ordinary verbal predicate, the negative antecedent being in any grammatical relation (as subject, object, or attribute), as: *Nemini, qui hoc sentiat, credendum est; neminem invenio qui etc.; nullius rei quae etc.* (See Obs. 7). In all instances the negative antecedents may be replaced by interrogative antecedents (*quis est qui etc.?* = *nemo est qui etc.* See Obs. 4), or by affirmative antecedents combined with negations in any of its forms (*numquam video hominem qui, = neminem unquam vidi qui etc.; neque quisquam = nemo; non habeo quod = nihil habeo quod*).

Obs. 2. If the predicate of the governing negative (or equivalent) sentence is the ABSTRACT verb *esse* (in English expressed by 'there is', 'there are'), the relative clause is always conceived as not existing if it has an affirmative predicate, and as real if it has a negative predicate. Hence the predicate of such clauses must be always in the subjunctive, as: *Nemo erat qui jus civile didicisset* (not *didicerat*); There was nobody who had learned the civil law. *Cic. Brut. 93, 322* (= *nemo jus civile didicerat*).—*Nulla est natio quam pertimescimus*; There is no nation which we are afraid of (= nullam nationem pertimescimus). *Cic. Cat. 2, 5, 11.*—*Nihil est quod vacet corpore*; There is nothing that is destitute of a body. *Cic. N. D. 1, 23, 65.*—*Nec fuit ex reliquis quisquam qui jurare dubitaret*; Nor was there any one of the others who hesitated to take the oath (= *nemo jurare dubitavit*). *Ces. B. C. 3, 87.*—*Quid est in hac causa quod defensionis indigeat?* What is there in this case that needs a defence? *Cic. R. A. 12, 34* (= *nihil defensionis indiget*).—*Quis est qui utilia fugiat?* Who is there that shuns things useful? (= *nemo fugit utilia*). *Cic. Off. 3, 28, 101.*—*Utrumne est tempus aliquod quo in senatum venisse turpe sit?* (literally: Is there any time at which to have come into the Senate, is a disgrace?) = Can it ever be disgraceful to have been in the Senate at whatever time? *Cic. Dom. 3, 7.*—See Ex. 1-10.

Thus the relative clause is conceived as *real* if it is negative: *Nihil est quod non expugnet pertinax opera*; There is nothing that persevering labor does not conquer. Sen. Ep. 51 (= Everything is conquerable by persevering labor). — *Nemo est istorum qui otium non timeat*; There is none of these men that is not afraid of idleness. Cic. Att. 11, 21, 4 (= Omnes isti otium timeant). — *Nullus est dolor quem non longinquitas temporis minuat*; There is no grief which time does not diminish. Cic. Fam. 4, 5 (= Every grief is diminished etc.). — *Quae latebra est in quam non intret metus mortis?* What hiding-place is there in which fear of death does not enter? Sen. Ep. 82. See Ex. 11-16.

In place of *esse* as abstract predicate other equivalent verbs are frequently used as *existere*, *existere*, and the passives *inveniri* and *reperi*, of which the perfects *inventus est*, and *reperitus est* occur both with preterite and present meaning, as: *Inveniebatur nemo qui se suffragium de me tulisse confiteretur*; There was nobody who owned to have voted in my affair (= nemo confitebatur). Cic. Sest. 31, 68. — *Nemo erat qui sex mensis videret*; There is nobody (alive) who faced six months at that place. Plaut. Trin. 2, 4, 112. Here belong certain verbs including a negation, as *desse*; *Plano nihil deest quod scribam* (= nihil est quod scribam). Cic. Att. 7, 5, 4. — *Milites qui sequerentur currum, defuerunt* (= nulli milites erant qui sequerentur). Liv. 37, 46. — See Ex. 17.

Obs. 3. Here belong the formulas '*Nihil est*', '*causa non est*', '*non est*', '*quid est*', followed by a relative predicate-clause introduced by the adverbs *cur*, *quomodo*, *quare*, and denoting 'there is no reason that (why)'. See p. 487, No. 3; p. 527, a. Such clauses, in which *cur* etc. are not interrogative, but relative adverbs, always require the subjunctive, as: *Causa nulla est cur hunc miserum tanta calamitate affici velis*; There is no reason why you should wish this unfortunate man to meet such a calamity. Cic. Clu. 67. — *Quid est quomodo consulares qui Catalinam adiungunt, repacherentur?* What is the reason (= there is no reason) that the ex-consuls who attended Catiline, should be surprised? Cic. Sull. 20, 81. — *Non fuit causa cur totum latrocinium exers*. Id. R. A. 50. — *Nihil est cur* (there is no reason why) te adventitibus esse castris. Id. Fam. 6, 20, 1. — *Non est cur eorum languisset industria*. Id. Orat. 1, 6. In place of *nihil est cur* etc., more usually the forms with the conjunction *quod* are employed (mostly '*non est quod*'), always requiring the subjunctive: *Nihil est quod metuas*; There is no reason why you should be afraid. Cic. Verr. 2, 2, 75. — *Non est quod existimemus etc.*; There is no reason why we should believe etc. Sen. Qu. N. 1, 2.

Obs. 4. '*Quis est qui*' (*quid est quod*) stands with the *indicative* if the question is not equivalent to a negation, but if '*quis*' expresses uncertainty, and is expected to be really defined by an answer, as: *Quis est qui nostris toribus facit injuriam?* Who is it (he) that injures our door? Plaut. Rud. 2, 4, 1. (*Quis est qui facit* would be 'nobody (he) that injures our door'). — *Quis enim est qui facit nihil nisi sua causa?* For who is he (what sort of a man is he) that does nothing but for his own sake? Cic. Fam. 7, 12, 2. (*Quis est qui facit* would be 'nobody (he) that does nothing but for his own sake'). — *Quid est quod nos tunc pigros inter Equos?* What is it that makes us lazy and indolent? Sen. Ep. 70. See Ex. 18, 19. Sometimes, however, relative clauses of this kind are found with a subjunctive, although they are not conceived as negative: *Quid ego est quod nonnumquamulationem adhibere soleat?* Cic. Off. 3, 4, 18. Thus the subjunctive is always used if the existence of the predicate is dependent on the reality of the principal predicate according to R. 17, Obs. 3, and when '*quid est cur* etc.' has the force of a real question: as '*Quid est propositum*' is a real public gubernationis quo cursum summa digne dedit? Cic. Sest. 45, 98. — *Quid est cur deos ab hominibus colendos dicas?* Id. N. D. 1, 41, 115.

Obs. 5. If the predicate of a negative subject, on which a relative clause depends, consists of the copula *esse* with a completing predicate (Obs. 1, No. 2), the predicate of the clause generally is in the *indicative*. The negation in sentences of this kind does not affect the relative clause, and the negative antecedent may always be replaced by an affirmative antecedent to which the unchanged relative clause may be attached, while the negation belongs to the principal predicate, as: *Nihil est stabile quod in fatum est*; Nothing, that is destitute of truth, is stable. Cic. A. 18, 67 (= Id. quod nullum est stabile esse non potest). If the subjunctive were used in this clause, it would not have the force of a copula, but of an abstract predicate: *There is no stable thing that is destitute of truth*. — *Quid potius bonum est quod non eum qui ut possidet meliorem facit?* Is anything a good that does not make its possessor a better man? Cic. P. 1, 3, 14 (= Id. quod eum qui aliquid possidet meliorem non facit, bonum esse non potest). But in the following similar passage *est* has the force of an abstract predicate, and hence requires the subjunctive in the clause: *Neque ullum bonum est, in quo non is qui habeat honeste possit gloriari*; There is no good of which its possessor might not justly boast. Id. 1, 3, 15. (In the former passage *bonum* is a predicate-noun, but in the latter *bonum* is the subject.) — *Neque est ulla fortitudo quod non est expert*; Nothing is (can be called) bravery that is destitute of reason. — What is without reason

cannot be called etc.; '*quae expert est*' would mean: 'There exists no bravery which is destitute of reason'. Cic. Tusc. 4, 22, 50. — *Nemo liber est qui corpori servit*; Nobody is free who is a slave to his body. Sen. Ep. 92 (= Is. qui corpori servit liber non est). — But: *Nullum est tempus quod iustitia vacare debeat* (not *debet*); There is no time which should lack justice (= iustitia numquam abesse debet). Cic. Off. 1, 19, 65. — See Ex. 20-22.

Obs. 6. To this rule (Obs. 5) there are three exceptions: 1) If both the principal sentence (with a copula) and the relative clause are negative, so that the whole sentence is virtually affirmative, the relative clause is always in the subjunctive, as: *Nemo rex Persarum potest esse qui non ante Magorum disciplinam perceperit*; Nobody can be king of the Persians who has not previously learned the lore of the Magi. Cic. Div. 1, 4 (= Every Persian king must be familiar with the lore of the Magi before his accession). See Obs. 7, No. 2. — But negative clauses of this kind may have the *indicative* if the whole sentence is not conceived as affirmative, as: *Judex esse nemo bonus potest qui suspitione certa non movetur*. Cic. Verr. 2, 5, 26. — 2) If the principal sentence expresses possibility (*nemo potest esse*), the predicate of the clause may be either in the indicative or in the subjunctive, since, according to R. 17, Obs. 3, such relative clauses may have a subjunctive even if the principal sentence is affirmative, as: *Nemo unquam in senatu potuit esse princeps qui maluerit esse popularis* (= si maluerit). Cic. Prov. Cons. 16, 38. — But: *Nemo justus esse potest qui mortem, qui dolorem, qui egestatem timeat*. Id. Off. 2, 11, 38. — See Ex. 23-25. 3) If the relative clause restricts the negative antecedent, making it less general or comprehensive, the relative clause has its predicate mostly in the subjunctive: *Quis me est mortalis miserior, qui vivat, hodie?* What mortal that lives is more wretched to-day than I am? Plaut. Rud. 5, 1, 1. — *Nihil est deo, quod quidem in terris fuit, acceptius quam concilia cœtusque hominum que civitates appellantur*. Cic. Rep. 6, 13. See Ex. 26, 27.

For the subjunctive dependent on sentences of the form: '*Nemo est tam ferus qui*,' and '*ego non sum is qui*' see R. 20, Obs. 2, 3, 9.

Obs. 7. If the principal predicate is an ordinary verbal predicate, the relative clause depending on an antecedent actually or virtually negative, the predicate of the clause is in the *subjunctive*:

1) If what is affirmatively stated in the clause is conceived as not existing. Such sentences may be recast by changing the relative clause into an independent negative sentence, and by attaching to it the principal sentence in the form of an affirmative relative clause, as: *Nihil dixerunt quod ad vestrum iudicium pertineret*; They said nothing that belongs to your decision. Cic. Cœc. 10, 27 (= quod dixerunt, ad vestrum iudicium non pertinet). — *Nihil quod ipsi esset indignum committerebant*; They committed nothing that was unworthy of them. Cœc. B. G. 5, 35 (= quod committerebant non indignum erat). See Ex. 28, 33. For the indicative in such clauses see Obs. 8.

2) If what is negatively stated in the clause, is conceived as *real*, the predicate of the clause is always in the subjunctive. In this instance the negative clause may be transformed into an independent affirmative sentence, as: *Quis unquam orator excellere iudicatus est vulgi iudicio, qui non idem a doctis probaretur?* What orator has ever been considered as distinguished by the judgment of the multitude that was not likewise acknowledged by the learned? Cic. Brut. 50, 189 (= every orator has been acknowledged by the learned who was praised by the multitude). See Ex. 34-36. Passages in which relative clauses of this kind occur with a predicate in the *indicative* are so rare that they must be considered as marks of inaccuracy, as: *Nec vero quicquam video quod non idem te videre certo scio* (instead of *certo sciam*). Cic. Fam. 6, 3, 2.

Obs. 8. An affirmative relative clause dependent on negative sentences requires the indicative if what is stated in it is conceived as *real* and *existing*, as: *Nihil quod ratio est expert, generare ex se potest compotem rationis*. Cic. N. D. 2, 8 (= Id. quod est expert, generare non potest). — *Nec quisquam peditum superavit qui in vallo pugnaverunt* (they really fought on the rampart). Liv. 28, 33. — *Nemo in summam nequitiam incidit qui unquam hæsît sapientiæ*; Nobody falls into great wickedness who has ever been attached to wisdom. Sen. Ben. 7, 19 (= Is. qui unquam hæsît, non incidit). But: *Nihil potest ad malos pervenire quod prosit*; Nothing (no benefit) can come to the wicked that is beneficial (to them). Sen. Ben. 5, 12 (= Prodesse non potest quod ad eos pervenit; but '*quod prodest*' = id quod prodest (a useful thing) ad malos pervenire non potest). — Sometimes it makes no difference in the meaning, whether a relative clause is conceived as *real*, or as not existing. In this instance either the indicative and subjunctive are equally correct, as: *Notati septem (a censoribus), nemo tamen qui sella curuli sedisset (or sederat)*; Seven members of the Senate were expelled, but none that had been a curule officer. Liv. 20, 37. This passage may be paraphrased either by a negative or by an affirmative sentence without affecting the sense, and hence either mood is admissible (= *Nemo, ut eis qui non hærent, sella curuli sedisset*, or *Is qui sella curuli sederat, nemo notabatur*). See Ex. 37, 39. If the relative clause has *restrictive* force, it generally

clause dependent on it. This construction occurs: 1) If the antecedent contains a *qualified* denial, as *pauca* (which denies the idea '*multi*'), *quotusquisque*, *rarus*, and the particle *vix* (Obs. 1). 2) If the relative clause refers to the indefinite numeral *solus* (or *unus*, in the meaning of *solus*), as predicate-adjectives (see Obs. 2. 3). 3) If the relative clause is a predicate-clause, dependent on any indefinite, or numeral antecedent, the principal predicate being the abstract verb *esse* (Obs. 4-9).

Obs. 1. If a relative clause refers to *pauca*, or equivalent expressions in the principal sentence, the predicate of the clause is in the subjunctive, if what is stated in the clause, is conceived as the act of 'few' or as happening 'rarely'. Such clauses may be replaced by qualified negative sentences, as: *Consecuti dies pauci omnino Januario mense per quos Senatum habere liceret*; But few days followed in January on which the Senate could legally meet. Cic. *Sest.* 31, 74 (= On most of the following days the Senate could not meet).—*Raros equis insidentis, raros quibus ferrum in manu sit invenies* (= most of those you will meet, will have no swords). Liv. 8, 38.—*Vix invenitur qui laboribus susceptis non quasi mercedem rerum gestarum desideret gloriam* (= almost every one desires glory as a reward etc.). Cic. *Off.* 1, 19, 65. See Ex. 1. 2.—Sometimes, however, in such clauses the indicative occurs\*, which always is necessary if the relative clause is conceived as a real fact to which the qualified denial, implied in *pauca* etc., does not refer, as: *Cum paucis collocati clientibus, quibus tantum facinus committere auderant*. Cæs. B. C. 3, 60.—*Pauci tamen boni inerant, quos refectione fugare ille non poterat*; But there were a few good men (among the judges) whom he had not been able to drive out by a challenge. Cic. *Att.* 1, 16, 3.—The interrogative formula '*quotus quisque est qui*' (= *quam pauci sunt qui*), and the similar formula '*quam multi sunt qui*', where the relative clauses are predicate-clauses, always require the subjunctive, as: *Quotus enim quisque est qui hanc in republica sectam sequatur?* For how few are there (= there are but very few) who follow this sect in the republic. Cic. *Flacc.* 41, 104.—*Quam multi dies reperiri possunt qui tali nocti anteponantur!* Ib. *Tusc.* 1, 41, 97. See Ex. 3. 4.

Obs. 2. Relative clauses, dependent on *unus* or *solus* as predicate-adjectives (*unus* or *solus est qui* = he is the only one who), almost always have their predicates in the subjunctive, on account of the negative meaning latent in such clauses (*solus est qui hoc dicit* implying that all others do not say so): *Sapientia est una quæ maeritiam pellat ex animis*; It is wisdom alone which expels sadness from our minds. Cic. *Fin.* 1, 13, 43.—*Si voluptas est sola quæ nos vocet ad se, et alliciat suapte natura*; If it is pleasure alone which calls and attracts us by its own nature. Ib. 1, 16, 54.—*Solus es (Cæsar) cuius in victoria ceciderit nemo*; You are the only one in whose victory no one has perished. Ib. *Dei.* 12, 34.—*Solus est hic homo qui sciat divinitus* (who knows it by divine inspiration). *Plant.* *Cure.* 2, 2, 33.—*Hæc est una contentio quæ adhuc permanserit*; This is the only dispute which still remained. Cic. *Ac.* 2, 24, 78.—See Ex. 5-7.—The subjunctive is also used if *unus* or *solus* are used as *accessory* predicates (p. 251, Obs. 7.): *Unum excipio Catonem in quo perfectissimo Stoico eloquentiam non desiderem*. Cic. *Brut.* 31, 118.—*Ego exstiti, non electus unus qui possem etc.* (not elected as the only one who could etc.). Ib. *Rosc.* *Am.* 2, 5. See Ex. 8. 9.—Sometimes *unus* or *solus* are implied in the predicate, as: *Cæsar quod Morini supererant* (= *uni erant*) *qui in armis essent*, eo exercitum adduxit: Cæsar, because the Morini were the only ones who were in arms, led his army to their territory. Cæs. B. G. 3, 28.—Sometimes, however, in relative clauses dependent on *unus* or *solus*, the indicative occurs, as: *Tu esses unus profecto qui vix ullam ceteris oratoribus laudem reliquisti*. Cic. *Or.* 1, 17, 76.—*Una est amicitia in rebus humanis, de cuius utilitate omnes uno ore consentiant*. Ib. *Am.* 23, 86. *Comp. Ter. Andr.* 5, 6, 9; *Sen. Ep.* 92. The indicative is *necessary* if the relative clause does not depend on *unus* as predicate-adjective but on its subject, as: *Id unum bonum est quod nunquam defringitur* (= *id, quod nunquam defringitur, unum bonum est*; what never is worn away is the only good). *Sen. Ep.* 92. Also, if *unus* means 'one,' the indicative is used: *Est unum jus quo devincta est hominum societas*; There is only one law by which society is bound (but '*quo devincta sit*' = it is the law alone by which etc.). Cic. *Leg.* 1, 15, 42.

Obs. 3. Often relative clauses are attached to *unus* or *solus*, and also to *primus*, *reliqui*, and other form-adjectives, instead of being attached to participle attributes of these words (see R. 16, Obs. 10). Such clauses *always* require the subjunctive, as: *Xenophanes unus qui deos esse diceret, divinationem funditus sustulit*; Xenophanes alone among those that believed in the gods, utterly rejected divination (= *unus ex eis qui deos esse dicebant*). Cic. *Div.* 1, 3.—*Quem vero exstet et de quo sit memoria proditum eloquentem fuisse, primus est M. Cethegus*; The first (among those) of whom it is known and placed

\* Thus in the passage Cæs. B. G. 3, 19 the subjunctive '*exaserint*', should be expected in place of the pluperfect indicative '*exaserant*', which is exhibited by all codices.

on record that he was (they were) eloquent. Is M. Cethegus. Cic. *Brut.* 15, 57.—*Hic, qui in collegio sacerdotum esset, primus post Romam conditam iudicio publico est condemnatus* (= *Hic primus (ex eis qui...erant)*). Ib. *Brut.* 33, 127.—*Reliqui sunt qui mortui sint*. L. Torquatus etc. (= *reliqui ex eis qui mortui sunt, sunt* L. T. etc.) Ib. 76, 265.

Obs. 4. Relative predicate-clauses with *esse*, or with verbs including the idea of existence, as *eroriri* (exortus est), *reperiri*, *inventiri*, *evenire*, *incidere*, *occurrere*, *adesse*, *præsto esse*, if these verbs are used as ABSTRACT PREDICATES (p. 486, Obs. 9), are introduced in English by '*there is*', '*there are*' etc. They occur in the following forms:

1) With an INDEFINITE ABSOLUTE FORM-ADJECTIVE as subject (*quidam*, *nonnulli*, *pauca*, *multi*, *aliquis*, *aliquid*, *quisque*, *quotusquisque*, *nemo*, *nil*), as: *Sunt quidam quibus mel amarum videtur*; *There are those*\* to whom honey seems bitter. *Sen. Ep.* 109.—*Sunt multi qui omnino Græcas non ament litteras*; *There are many* who do not like Greek literature at all. Cic. *Ac.* 2, 2.—*Si quis est qui hæc putet arte accipi posse etc.*; If *there is any one* who thinks that this may be learned by rules. Ib. *Or.* 1, 25.—*Quisquis erat qui aliquam partem sceleris attigisset, damnabatur*; *Whoever there was* that had his hand in any part of this crime, was condemned. Ib. *Sest.* 31, 68.—*Est aliquid quod non oporteat, etiamsi licet*; *There is something* which is not proper, although it is permitted. Ib. *Balb.* 3, 8. See Ex. 19-25.—*For nemo est qui, nihil est quod, pauci sunt qui etc.* see p. 543, Obs. 2 foll.; p. 550, Obs. 1.

2) With an INDEFINITE FORM-ADJECTIVE as subject UNDERSTOOD; as: *Sunt qui omnia nature nomine appellant*; *There are some* who call everything 'nature.' Cic. *N. D.* 2, 32.—*Sunt qui eo die magno prælio pugnatum esse auctores sint*; *There are some* who state that a great battle had occurred that day. Liv. 42, 66.—*Erant quos moveret Claudius*; *There were those* on whom Claudius made an impression. Liv. 3, 58.—*Eril mox qui arguat, nequequam Antiochum ultra juga Tauri emotum*; *There will soon be somebody* that argues that Antiochus etc. Ib. 42, 42.—*Si est quod desit*; If *there is anything* (that is) wanting. Cic. *Tusc.* 5, 8.—*Dum est unde jus civile discatur*; As long as *there is somebody* from whom to learn the civil law. Ib. *Verr.* 1, 45.—*Est quod differat inter justitiam et verecundiam*; *There is something* that is different between (i. e. there is some difference between) justice and respect (of the laws). Ib. *Off.* 1, 23.—*Est igitur quo quidque referatur*; *There is a something* to which everything refers. Ib. *Fin.* 5, 6, 16.—*Est quatenus amicitie dari venia possit*; *There is a limit* up to which friendship may be pleaded in excuse. Ib. *Am.* 17, 71.—*Adsumt qui vos hortentur ut a nobis desciscatis*; *There are those* present who exhort you etc. Cæs. B. C. 2, 32.—Sometimes '*est qui*' has the meaning of '*sunt qui*', as: *Est qui plus ei debere se iudicat per quem tutior est, quam ei per quem honestior*; *There are persons* who think they are owing a greater debt etc. *Sen. Ben.* 3, 12.—*Est ubi id valeat*; *There are instances* in which this holds good. Cic. *Tusc.* 5, 8.—See Ex. 10-18.

3) With NOUNS, taken in an INDEFINITE sense, as subjects, corresponding in the singular to the English indefinite article, and in the plural to nouns without article, or with 'some', as: *Sunt homines quos infamiae suae neque pudeat, neque tedeat*; *There are men* who are neither ashamed etc. Cic. *Verr.* 1, 12.—*Fuit quædam vis (there was a power)* quæ generi consuleret humano. Ib. *Tusc.* 2, 49.—*Sunt philosophi et fuerunt* (there are and were philosophers) *qui omnino nullam habere censèrent humanarum rerum procuratorem deos*. Ib. *N. D.* 1, 2. See Ex. 26, 28-31.

4) With DEFINITE NUMERALS with or without nouns: *Omnino duo sunt quæ condiant orationem*; *There are altogether two things* which spice the style. Cic. *Orat.* 55.—*Tria sunt quæ sint efficienda dicendo*; *There are three things* which must be accomplished by (public) speaking. Ib. *Brut.* 49.—*In eâ urbe sunt aedes, sed duæ quæ longe ceteris antecellant*. Ib. *Verr.* 2, 4, 53.—*Quatuor sunt capita quæ concludant nihil esse quod nosci possit*. Ib. *Ac.* 2, 26, 83.—*Duo tum excellēbant (=erant) oratores qui me excitarent*. Ib. *Brut.* 92, 317.—*Mille res inciderunt quæ nomina desiderarent, nec haberent*. *Sen. Ep.* 58.

5) With INDEFINITE SUBJECTS, expressed or understood, and '*inventus (reperitus) est*', '*inventi (reperi) sunt*', '*exortus est*', as abstract predicates, as: *Nostrâ in republicâ inventus est qui filiam interficeret*; *There was* in our republic a man who killed his daughter. Cic. *Fin.* 5, 22.—*Sin erunt aliqui reperi qui pecuniam præferri amicitie sordidum putent*; If *there will be those* who think it mean that money should prevail over friendship. Ib. *Am.* 17, 63.—*Inventus est Numida (=Numida quidam) qui præstaret etc.* Liv. 26, 4.—*Erortus est servus qui eum accuset*; *There came a slave* to accuse him. Ib. *Dei.* 1, Ex. 27.—Probably the *Qui*-clauses after '*inventus est*' etc. were originally conceived as relative clauses of purpose (p. 556 foll.) = '*Somebody has been found out, or singled out by fate or a higher agency to do something (qui aliquid faceret)*'. In this meaning, the mentioned expressions are also used with definite subjects, which is the only connection in which they occur in anteclassical style, as: *Tu enim reperitus Philocratem qui superes veriverbio*. *AR. Pol.* *tu inventus verâ vanitudine qui convincas* (You have been found out to surpass

\* The English demonstrative '*those*', in this construction, is never expressed by the Latin demonstrative *ei* or *illi*, but is either omitted, or expressed by an indefinite.

Philocrates etc.). Plant. Capt. 3, 4, 36.—*Tam exortus est Ti. Gracchus qui otium perturbaret*; Then Gracchus appeared to disturb the peace. Cic. Ac. 2, 5.—Sometimes both constructions, that with an indefinite, and that with a definite subject, are united: *Inventus est scribe quidam, Cn. Flavius, qui fastos populo proposuerit*; There was a certain scribe, namely Cn. Flavius, who exposed the calendar for the people's use. Cic. Mur. 11.—Sometimes definite subjects are used with *inventus est* etc. when *solus* or *unus* is added or unders. and as accessory predicate: *Pompius unus inventus est qui*. Cic. L. M. 23 (quoted p. 429).—*Terres tot annis inventus est qui* hac eveniret (*solus inventus est*). Ib. Verr. 2, 3, 8.

Obs. 5. The mood in the Qui-clauses after *inventus*, *reperitus*, and *exortus est*, on account of its original 'final' meaning, is always the SUBJUNCTIVE. In the Qui-clauses dependent on *esse* and its other equivalents, the mood, in the time before Cicero, was always the INDICATIVE, except when the clause requires a subjunctive for other reasons. In Plautus and Terence this construction (always with indicative) occurs in the following passages: *Sunt hic quos credo inter se dicere etc.* Plant. Cas. Prol. 67.—*Sunt quæ te volumus percontari*. Ib. Pseud. 1, 5, 47.—*Sunt ex te quæ sciscitari volo*. Ib. Capt. 2, 2, 13.—*Sunt quos scio esse amicos, sunt quorum ingenia non quo noscere*. Ib. Trin. 1, 2, 54.—*Sunt alii qui te vulturem vocant*. Ib. 1, 2, 64.—*Est genus hominum qui se primos omnium esse volunt*. Ter. Eun. 2, 2, 17.—Where the subjunctive occurs, it is 1) a subjunctive of purpose (with '*inventus est*'), in the passage quoted above (Obs. 4, No. 5); 2) a causal subjunctive, according to p. 566 foll.: *Sunt, quos miseros malique habes, quos tibi fecisti obnoxios* (= *sunt quos, etsi miseros habes, tibi fecisti obnoxios*). Plant. Trin. 2, 1, 48; 3) a subjunctive of GUARDED STATEMENT (p. 378): *Est paucis vos quod monitos voluerim*. Ib. Capt. Prol. 53; 4) frequently a subjunctive of non-reality with indefinite negative antecedents: *Nihil est quod metumam*. Plant. Capt. 3, 5, 84 (Comp. Capt. 1, 1, 35; 1, 2, 12, and often).—In Cato and Lucretius this construction does not occur at all. Of the prose-writers of Cicero's time, Varro uses the construction about ten times, and only three times with the subjunctive: *Sunt qui putent*, Varro R. R. 1, 8; *Sunt qui dicant*, Ib. 2, 7; *Fuerunt qui dixerint*, Ib. L. L. 4, p. 13. With the indicative: *Sunt qui tradunt*, Ib. L. L. 4, p. 13; *Sunt qui scripserunt*, Ib. p. 44; *Est quod inquinat*, Ib. R. R. 3, 7; *Sunt animalia quæ exeunt*, Ib. L. L. 4, p. 23; *Multa sunt in quibus consuetudinem sequimur*, Ib. 7, p. 118; *Est genus quod appellant*, Ib. p. 119; *Genera sunt vini quæ sunt fructuosiora*, Ib. R. R. 1, 65. In regard to the other authors, a difference must be made between the instance that the subject of *sunt* (etc.) is elliptically omitted, and that it is expressed by *quidam*, *multi* etc. For the latter see Obs. 6 and 7.

In the construction without a subject, CÆSAR has twice, and SALLUST once the indicative: *Sunt qui appellantur alios*, Cæs. B. G. 6, 27.—*Sunt qui piscibus atque ovibus vivere existimantur*. Ib. 4, 10.—*Sunt qui ita dicant*, Sall. Cat. 19. In both authors the subjunctive occurs several times. In Cicero the construction '*sunt qui*', etc. is extremely frequent (it occurs in more than two hundred places), always with the SUBJUNCTIVE, except in five passages: *Sunt qui putant posse te non decedere*. Cic. Fam. 1, 9, 23.—*Sunt qui, quod sentiunt, non audent dicere*. Ib. Off. 1, 21.—*Sunt qui putant* (Orelli and others read *putent* against all the codices) nonnumquam posse etc. Ib. Inv. 1, 40.—*Sunt qui propter utilitatem petendam putant* (some Codd. have *putent*). Ib. 2, 55.—*Sunt quæ præteriti*. Ib. Att. 10, 4, 11.—Livy very frequently uses this construction, and always with a subjunctive.—In the classical poets the subjunctive occurs about as often as the indicative (Esp.: Hor. Carm. 1, 1, 4; 1, 7, 5; Sat. 1, 4, 24; 2, 4, 47; SUBL.: Sat. 1, 2, 28; 1, 4, 75; Ep. 1, 1, 78; Ep. 2, 2, 182). The writers of the silver age, where this construction is exceedingly frequent, almost always use the subjunctive. In a few passages, however, the indicative occurs (*Sunt qui iudicant*, Sen. Ben. 5, 2; *Sunt qui putant*, Ib. Qu. N. præf.). From these facts it is evident that the subjunctive in the construction '*sunt qui*' etc. was unknown to the earlier language, and that this mood was first used in the time of Cicero, Varro still using the indicative oftener than the subjunctive, while Cicero almost always, and Livy always, has the subjunctive. This subjunctive, which occurs in no other language but the Latin, has been differently explained by the grammarians. They generally consider '*sunt qui dicant*' as equivalent to '*sunt homines tales ut dicant*'. But this explanation will fail in most of the passages quoted Obs. 4, and below, and is the less admissible because modal *ut*-clauses are never used in this connection (see p. 561 foll., Obs. 3). HAASE (in Reisch's lectures, p. 605) considers this subjunctive a 'linguistic necessity', because the predication proper is contained in the principal predicate, and hence the use of another indicative in the relative clause for the same predication would be a 'linguistic pleonasm'. But it is difficult to see how such a 'pleonasm' could be corrected by the use of the subjunctive. On account of the late introduction of this subjunctive, it is more probable that a mere analogy has caused its use. Such an analogy may be found in the negative constructions '*nemo est qui*' etc., and also in the construction '*inventus est qui*', in either of which the use of the subjunctive, in accordance with the general requirements of this mood, was established already in anteclassical style.

Obs. 6. If the subject of '*sunt*' etc. with predicate Qui-clauses is expressed, the subjunctive, in classical prose, is the prevailing mood (see the Ex. quoted Obs. 4, 1 and 3); but the indicative occurs considerably oftener than in the construction with subjects understood, as: *Multa res sunt in quibus de suis commodis viri boni multa detrahunt*. Cic. Am. 16.—*Sunt ejus aliquot orationes ex quibus lenitas ejus perspicitur*. Ib. Brut. 48.—*Quam multi sunt homines quorum pro salute se hic L. Sulla obligavit*! Ib. Sull. 26.—*Fuerunt etiam alia genera philosophorum qui se Socraticos esse dicebant*. Ib. Or. 3, 17.—*Sunt quidam qui molestas amicitias faciunt*. Ib. Am. 20.—*Multi sunt qui non donant, sed projiciunt*. Sen. Ep. 120.\* See Ex. 32-36.—Sometimes indicatives are necessary in this construction to remove ambiguities, as: *Sunt multi qui eripiunt aliis quod aliis latentes*. Cic. Off. 1, 14. Had the regular subjunctive *eripiant* been used here, the clause '*quod aliis largiantur*' would not clearly appear as a clause of purpose, which it is intended to be, since the subjunctive '*largiantur*' might pass for an ordinary subjunctive by attraction (= they take from some what they bestow on others). This ambiguity is removed by placing *eripiunt* in the indicative.—If *aliquis* (or *quis*) is used as subject in this construction, the mood of the relative clause is always the subjunctive, as: *Si quis est qui C. Rabirium reprehendendum putet* (not *putat*). Cic. Rab. Post. 1, 1.—*Sin aliquis castiterit qui possit dicere*. Ib. Or. 3, 21.

Obs. 7. Also in the instance that relative Predicate-clauses refer to DEFINITE NUMERALS as subjects (Obs. 4, No. 4), the indicative occurs about as frequently as the subjunctive, as: *Dux sunt artes quæ possunt locare homines in amplissimo gradu dignitatis*. Cic. Mur. 14, 30.—*Quatuor sunt provinciae de quibus intelligo*, etc. Ib. Prov. Cons. 2, 3.—*Tres erant quos in quotidie scribas servare de celo*. Ib. Vat. 7, 16.—*Duo sunt propter quæ delinquimus*. Sen. Ep. 94. See Ex. 37-40.—With *unus*, in the meaning 'one', relative clauses have always the indicative, to distinguish *unus* = 'one', from *unus* = alone. See Obs. 2.

Obs. 8. Relative clauses whose indefinite antecedents are OBJECTS of ordinary verbal predicates, are often virtually equivalent to predicate-clauses. Such relative clauses generally have their predicates in the SUBJUNCTIVE according to the analogy of the clauses mentioned R. 16, Obs. 7, as: *Audivi nonnullos quorum propemodum absolute concluderetur oratio* (= *nonnulli sunt quorum* etc.); I have heard several whose periods had an almost perfect rhythmical conclusion. Cic. Orat. 51, 171.—*Invenies profectos sapientiam qui vim afferendam vitæ suæ negent* (= *sunt profecti qui* etc.). Sen. Ep. 70.—*Habeo alia signa quæ observem*. Cic. Fam. 6, 6, 7.—*Si habes quod liqueat, neque respondis, superbis*. Ib. Ac. Pr. 2, 29, 94.

Obs. 9. Relative predicate-clauses are often used (both in English and Latin) to make a definite subject more emphatical. Such relative clauses, which in English are not introduced by 'there is' but by 'it is', generally have their predicates in the SUBJUNCTIVE, but also in the INDICATIVE, as: *Natura est igitur quæ continet mundum omnem; It is nature that holds the whole world together*. Cic. N. D. 2, 11, 29.—*Oculi sunt quorum tum intentione tum remissione motus animorum significamus; It is the eyes by whose fixed direction or relaxation we indicate the emotions of the soul*. Ib. Or. 3, 59, 222.—*Hæc sunt quæ conturbant; in deliberatione nonnumquam; It is this which sometimes disturbs (us) in deliberation*. Ib. Off. 3, 20, 81.—*Animus est qui sibi omnia commendat; It is the soul which assimilates everything to itself*. Sen. Ep. 55. Sometimes this construction is applied to sentences, virtually equivalent to the above, in which *esse* has the function of a copula, as: *Hæc sunt impiis domesticæ Furæ, quæ dies noctesque parentum pœnas a consceleratissimis filiis repetant*; These are to the wicked the domestic Furies who day and night inflict punishment on criminal sons in the name of their parents (= *It is these things which, as Furies, pursue the sons etc.*). Cic. Rosc. Am. 24, 67.—The following are examples of indications: *Tum es qui abisti herum accessum? Is ille qui te conduxit? It is (was) not I that hired you*. Ib. Merc. 4, 4, 18.—*Ille sunt qui vicia tradunt; It is those that teach vices*. Sen. Ep. 123.—

\* Some grammarians state that the indicative in relative predicate-clauses must be used if the author has in his mind a 'certain person or thing' to which a certain 'quality' is assigned. But this distinction is utterly unwarranted, as will easily appear by comparing the different examples. Others (for inst. Publ. Sch. Gr. p. 370) state that the indicative is used if the indefinite antecedent must be taken for a predicate-adjective (*multa sunt quæ dicuntur* = *Ea quæ dicuntur multa sunt*). But such instances are very rare, and the rule would certainly not apply to such indefinites as *quidam*, *nonnulli* etc. Moreover such clauses occur with the subjunctive, as: *Neque enim pauci, neque leves sunt qui se duo soles vidisse dicant*. Cic. Rep. 1, 10, 15.

† Some grammarians (Kühner, § 146, note 7) erroneously state, that in such clauses the indicative is necessary.

‡ Inferior manuscripts give *conturbant*.

*Temperantia est quæ rationem ut sequamur monet*; It is temperance which admonishes us to submit to reason. Cic. Fin. 1, 14, 47. These sentences must be distinguished from those similar constructions in which the relative clause expresses a quality indicated by *is* (expressed or understood), as a predicate-adjective. See R. 20, OBS. 4.

1. In omnibus sæculis pauciores viri reperti sunt qui suas cupiditates quam qui hostium copias vincerent. Cic. Fam. 15, 4, 15.—2. Rarum est quoddam genus eorum qui se a corpore avocent, et ad divinarum rerum cognitionem rapiantur. Ib. Div. 1, 49.—3. Quotus igitur est quisque qui somniis pareat? Ib. 2, 60, 125.—4. Quotusquisque est qui teneat artem numerorum ac modorum? Ib. Or. 2, 50, 196.—5. Solus est hic qui nunquam rationes ad ærarium referat. Ib. Verr. 2, 1, 38.—6. Unus est qui curet constantia magis quam consilio. Cato. Ib. Att. 1, 18, 7.—7. Quæ (vis), si est una ex omnibus quæ sese moveat, neque nata est certe, et æterna est. Ib. Rep. 6, 28, 28.—8. Hoc oppidum Verres invenit prope solum unde nihil posset auferre. Ib. Verr. 2, 2, 36.—9. Tu illic veneras unus qui ipsam eloquentiam locupletarisses. Ib. Brut. 97, 331.—10. Sunt qui discessum animi a corpore putent esse mortem. Ib. Tusc. 1, 9, 18.—11. De (Verre) impudentia singulari sunt qui mirentur. Ib. Verr. 2, 1, 2.—12. Erant qui censere de tertia vigilia in castra recedendum. Cæs. B. C. 2, 33.—13. Esse debet unde aliquid fiat, deinde a quo fiat. Sen. Ep. 65.—14. Est eisdem de rebus quod dici possit subtilius. Cic. Tusc. 3, 15, 32.—15. Fugie qui se statim dederent. Tac. H. 3, 6.—16. Inveniuntur qui honesta in mercedem colant, quibusque non placeat virtus gratuita. Sen. Ben. 4, 1.—17. Adsunt qui hæc non probent. Cic. Tusc. 1, 31, 77.—18. Præsto est qui neget rem ullam percipi posse sensibus. Ib. Ac. Pr. 32, 101.—19. Multi sunt qui non acerbum judicent vivere, sed supervacuum. Sen. Ep. 24.—20. Est aliquid quo sapiens antecedit deum. Ib. 53.—21. Quicquid est quod deo at, id tum apparet quam antegressa est honestas. Cic. Off. 1, 27, 94.—22. Multa conveniunt quæ mentem exturbarent meam. Ib. Qu. Fr. 1, 4, 4.—23. Quæ quibusdam admirabilia videntur permulti sunt qui pro nihilo putent. Ib. Am. 23, 86.—24. Multa occurrunt quæ in dicendo profutura videantur. Ib. Or. 2, 76, 384.—25. Consilio ac sapientia qui regere rempublicam possent multi nostræ, plures patrum memoria existerunt. Ib. 1, 2, 8.—26. Erant sententiæ quæ castra Vari oppugnanda censuerunt. Cæs. B. C. 2, 30.—27. Senator inventus est qui Milonem cum telo esse dicebat. Cic. Mil. 24, 66.—28. Est quædam animi avaritas quæ in insipientem quoque cadat. Ib. Tusc. 4, 13, 30.—29. Sunt nonnullæ disciplinæ quæ officium omne pervertunt<sup>1</sup>. Ib. Off. 1, 2, 5.—30. Fugere cives qui neque remque publicam obstinatis animis perditum irant. Sall. Cat. 36.—31. Syracusis lex est de religione quæ in annos singulos Jovis sacerdotem sortito capi<sup>2</sup> jubeat. Cic. Verr. 2, 2, 51.—32. Nonnulli sunt in hoc ordine qui spem Catilinae mollibus sententiis<sup>3</sup> aluerunt, conjurationemque nascentem non credendo corroboraverunt. Ib. Cat. 1, 12, 30.—33. Sunt bestię quædam in quibus inest aliquid simile virtutis. Ib. Fin. 5, 14.—34. Est quidam ornatus orationis qui ex singulis verbis est, alius qui ex continuatis conjunctisque constat. Ib. Or. 3, 37, 149.—35. Multi sunt et fuerunt qui a negotiis publicis se removerunt. Ib. Off. 1, 20, 69.—36. Est quædam dulcedo sermonis quæ irripit et blanditur. Sen. Ep. 105.—37. Duo sunt quæ, bene tractata ab oratore, admirabilem eloquentiam faciunt. Cic. Orat. 37, 123.—38. Tria sunt omnino genera quæ in disceptationem et controversiam cadere possunt. Ib. Or. 2, 26, 113.—39. Quando quatuor aut, ad summum, quinque inventi sunt, qui Milonis causam non probarent? Ib. Mil. 5, 12.—40. Duo sunt tempora quibus nostrorum civium spectentur judicia de nobis? Ib. Vat. 4, 10.

Rem. 18. If the principal predicate is represented as possible, doubtful, desirable, or necessary in regard to an INDEFINITE antecedent of a relative clause whose reality is dependent on the reality of the principal sentence, the predicate of the clause is generally placed in the SUBJUNCTIVE.

OBS. 1. The modes of non-reality mentioned above are, in the principal sentence, expressed by one of the grammatical forms mentioned OBS. 2, while in the relative clause the same kinds of non-reality are expressed by the SUBJUNCTIVE. Relative clauses of this kind always have indefinite antecedents (*aliquis*, expressed or understood), which are represented as possibly real in the event that the principal predicate becomes real, as: *Reperitendum est aliquid quod animum confirmet* (something must be found out, which may confirm the mind). If the '*aliquid*' is found, it will cease to be indefinite, the state of suspense being expressed by the subjunctive. Many of these subjunctives are quasi-oblique.

OBS. 2. The principal sentences to which relative clauses of this kind are attached, have the following grammatical forms:

<sup>1</sup> *Rationes ad ærarium referre*, to remit the balance of one's accounts to the treasury.  
<sup>2</sup> Contrary to the better codices, the vulgate has the indicative *pervertunt*.—<sup>3</sup> to elect. *Capere* is the typical term denoting the election of priests.—<sup>4</sup> by indulgent remarks.

A. That of POTENTIAL predicates (*posse, debere, or a gerundial*); as: *Potest alio (aliquo) consule, cui item exercitus in manu sit, falsum aliquid pro vero credi*; It is possible that under some other consul, who likewise has control over an army, something false be believed as true. Sall. Cat. 51, 36. Here the non-reality is possibility, which is indicated by the mere subjunctive in the clause, but expressed by a potential verb in the principal sentence. The antecedent (*consul*) is conceived as an indefinite person, who will be a certain person whenever the clause or the principal predicate becomes real.—*Reperitendum est fons in quo sint prima invitamenta naturæ*; A source must be discovered in which the first inducements of nature are contained. Cic. Fin. 5, 6.—Mors nullum habet incommodum; esse enim debet aliquis cuius sit incommodum; Death has no discomfort; for there must somebody exist to whom it is (could possibly be) a discomfort. Sen. Ep. 36. Thus if '*fortasse*' is added to the principal sentence: *Audisti ex aliquo fortasse qui vidisse eum diceret exeuntem*. Ter. Hec. 4, 1, 35. Here the subjunctive *diceret* expresses the same uncertainty as that which in the principal sentence is expressed by *fortasse*. See Ex. 1-7\*.

B. The principal predicate may have the form of an absolute question (§ 417), the indefinite antecedent and the clause being conceived as subject to the same uncertainty, as the predicate of the question, as: *Aliusne est aliquis improbis civibus peculiaris populus cui nos invisi fuerimus?* Is there any different people peculiar to bad citizens to which (people) we have been hateful? Cic. Sest. 58, 125.—*Vidistis (aliquem) qui tibi duceret chlamydatus cum machæris?* Did you see any one who had with him three men in uniforms and with swords? Plaut. Rud. 2, 2, 9.—*Aliquod tempus est quo non sit descendum?* Sen. Ep. 36. See Ex. 8-10.

C. The principal predicate may denote VOLITION and DESIRE, in which instance the predicate of the clause may often be considered as quasi-oblique, as: *Desiderat uterque aliquid cum quo conferat, cum quo quærat*. Sen. Ep. 109.—*Exempli causâ ponatur aliquid quod pateat latius*. Cic. Off. 2, 4, 19. See Ex. 11, 12.

D. The principal sentence may have the form of a conditional clause, the reality of the clause and of the indefinite antecedent being dependent on the same condition, as: *Si tibi est a Statio scriptum (aliquid) quod pertineat ad me, certior me facies*. Cic. Att. 15, 16a.—*Si aliquem nacti sumus cuius cum moribus et natura congruamus*. Ib. Am. 3, 27. See Ex. 13-15. Here belong sentences introduced by '*quum*' in the meaning 'whenever', as: *Quum aliquid actum est quo media officia compareant, id cumulate videtur esse perfectum*. Cic. Off. 3, 3, 15.—Hæc in antiquorum numerum rejiciuntur *quum aliquid novi luxuria commenta est, quo ipsa se obrueret*. Sen. Ep. 86. But in such clauses the indicative is as frequently used as the subjunctive. See Cic. Off. 3, 8, 36; Am. 19, 70.

E. The writers of the silver age frequently use subjunctives in relative clauses if their indefinite antecedents refer to future-predicates, in place of a dependent future, as: *Veniet aliquod tempus quod nos iterum jungat ac misceat* (instead of *jungat ac miscet*). Sen. Ep. 78. See Ex. 16, 17.

OBS. 3. Sometimes relative clauses dependent on the indefinite antecedents *aliquis* or *aliquid* (expressed or understood) take predicates in the subjunctive, even if the principal sentence is represented as real. Such subjunctives must be considered as conventional forms, caused partly by an analogy of relative clauses with negative antecedents, partly by the analogy of the subjunctives dependent on indefinite antecedents according to R. 18; as: *Nunc dicis aliquid quod ad rem pertineat*. Cic. R. A. 18, 52.—*Videsne quanta fuerit apud Academicos verecundia?* Plane enim dicant (i. e. *aliquid*) quod ad rem pertineat (something that is to the point). Ib. Tusc. 4, 21, 47.—*Magno in mœore*

\* If the antecedent and the clause are conceived as given ideas, and as real without regard to the non-reality of the principal sentence, the indicative is used in the clause (generally with *is, ea, id* as antecedent): *Discutienda sunt ea quæ obscurant*. Cic. Or. 3, 57, 215. Sometimes the clause may be conceived as real or non-real according to the conception of the writer, in which instance both moods would be correct, as: *Nec promissa sunt servanda ea quæ sint* (where some codices have '*sunt*') eis quibus promiseris, inutilla. Cic. Off. 1, 10, 3; where '*sint inutilla*' is conceived as non-real, being dependent on the fulfilment of the promise. But in a similar passage the indicative is used: *Ac ne illa quidem promissa servanda sunt quæ non sunt* eis ipsis utilia quibus illa promiseris. Ib. 3, 25, 94.

† The subjunctives in these relative clauses are generally interpreted as 'modal' subjunctives, the relative clause being considered as equivalent to a modal Ut-clause. To this interpretation the objection must be made that such modal Ut-clauses dependent on *aliquid* do not occur, and in none of the passages given in the text it would be admissible to replace the relative clause by a modal Ut-clause. It is difficult to comprehend how the Latin authors should have felt these clauses as Ut-clauses, when they never actually used Ut-clauses in their place.

inest tamen aliquid quod reipublice profuturum putem. Ib. Phil. 11, 1, 1.—Iste invenit (i. e. aliquem qui sibi biduo breviorum diem postularet. Ib. Verr. 1, 2, 6.—Habet unusquisque aliquid cui tantum credit quantum ipsi creditum est. Sen. Ep. 105.—Alexander victus est illo die quo vidit aliquid cui nec dare quicquam posset, nec eripere. Sen. Ben. 5, 6.

1. Omnia scientia aliquid debet habere manifestum ex quo oriatur et crescat. Sen. Ep. 121.—2. Commune aliquid querendum est his omnibus circum quod illa complectatur et sub se habent. Ib. 58.—3. Nunc fuit eo major adhibenda modicum quae hoc malum sanare posset? Cic. Dom. 5, 12.—4. Genus dicendi est eligendum quod maxime teneat eos qui audiant et quod non solum delectet, sed etiam sine satietate delectet. Ib. Or. 3, 25, 97.—5. Adhibenda praeterea munditia est, non odiosa, neque exquilita nimis, tantum quae faciat acrestem negligentiam. Ib. Off. 1, 36, 130.—6. Semper aliquid accipiendi sunt quos diligimus et a quibus diligimur. Ib. Am. 27, 102.—7. Erit fortasse ad quid quod concedi possit roganti? Ib. Phil. 5, 1, 3.—8. Numquid in quod te aut genere indignum sit tuo facis? Plant. Cure. 1, 1, 23.—9. Habent in amicum qui pectus sapient? Ib. Trin. 1, 2, 53.—10. Mea causa me moneat (aliquid) quod mihi magne utilitati esse possit. Ib. 2, 64, 132.—11. Pete eum magistratum in quo mihi magne utilitati esse possit. Ib. Planc. 5, 13.—12. Ego malo virum qui pecunie egeat quam pecuniam quae viro. Ib. Off. 2, 21, 71.—13. Si qua reliqua spes est quae sociorum animos consolari possit, ea tota in hac lege posita est. Ib. Caecil. 5, 18.—14. Si quisquam est qui placere se studet bonis quam plurimis. Ter. Eun. Prol. 1.—15. Si quem es nactus qui in tuam familiaritatem penitus intravit, hunc quantum credendum sit vide. Cic. Qu. Fr. 1, 1, 5.—16. Veniet iterum qui nos in lucem repñat dies. Sen. Ep. 36.—17. Hujus unius rei usum qui exeat dies veniet. Ib. 70.

Rem. 19. If the antecedent of a relative clause is represented as adapted or fit for the purpose expressed in the clause, or as intended for or serving a purpose designated in the same, the relative predicate is placed in the SUBJUNCTIVE of non-reality.

Obs. 1. If the antecedent is *indefinite*, the mere subjunctive of the relative predicate has the power of designating the antecedent as *fit*, *apt*, or *adapted* to the action expressed in the predicate. Such relative clauses are generally rendered by English relative clauses with 'may' or by an infinitive with 'to', as: Quos percontor video astare; I see persons present whom I may ask (i. e. adapted to be asked by me). Plant. Rud. 2, 2, 4.—Erat in aequitate Pisonis paratissimum refugium quo sine labore, sine molestia homines ulerentur; There was in Piso's fairness a ready refuge which men might use without trouble and difficulty (i. e. the refuge was adapted to their wants). Cic. Verr. 2, 1, 46.—Archias suppeditat nobis (i. e. locum) ubi animus ex hoc forensi strepitu reficitur; Archias prepares a place for us where the mind may recover from this forensic bustle. Ib. Arch. 6, 12.—Semper restabit etiam sapienti (i. e. locus) quo animus ejus excurrat; There will always remain, even for a wise man something to which his mind might apply itself. Sen. Ep. 109.—Tibi copia est qui rem solras omnibus; You have abundant means to pay the claims of all (i. e. means 'quantitatively' adapted, or 'enough too'). Plant. Rud. 2, 6, 73.—Nulla e corpore existunt quae acuant mentem; Many things proceed from the body, which sharpen (i. e. are fit, have the power to sharpen) the mind. Cic. Tusc. 1, 33, 80. See Ex. 1-4.

Obs. 2. In several conventional formulas relative clauses denoting adaptedness occur with the definite antecedent 'hic', referring to previous remarks, connected with habere and similar predicates, as: Haec habui de senectute quae dicerem; These remarks I had to make on old age (= this was what I had to say, what was adapted to be said). Cic. Sen. 13, 85. So: Haec habui de amicitia quae dicerem. Ib. Am. 27, 103.—Haec habebam

<sup>1</sup> Neatness.—<sup>2</sup> if it is asked for.—<sup>3</sup> This sentence belongs both to the rule R. 18. Obs. 2, and to R. 17, Obs. 4. But Terence, who construes est qui with the indicative, placed studeat in the subjunctive on account of the non-reality of the predicate in regard to the governing conditional clause.

\* If the antecedent is *definite*, a separate adjective expressing fitness etc. is generally needed (Obs. 3), except in the few conventional phrases mentioned Obs. 2.—In the following passage it should seem, at first sight, as if a relative clause of adaptedness were made dependent on a proper name as antecedent: In hoc fuit numero Miltiades cui illa custodia crederetur (Nep. Milt. 3, 2), where the relative clause seems to have the force 'as a fit person to be entrusted with this guard'. But more properly the clause is to be attached to hoc numero = eorum numero, so that it would be a clause attached to the governing word of a partitive attribute (according to R. 17, Obs. 3) instead of to the partitive attribute itself (= in numero eorum quibus illa custodia credebatur).—The editors generally take this clause as quasi-oblique.

quae te scire vellem (instead of quae scires, according to p. 405, Obs. 3). Ib. Att. 1, 6, 2.—Haec mihi in mentem veniebant quae dicenda putarem (instead of quae dicerem, p. 405) de naturis deorum. Ib. N. D. 2, 67.—Habere, in this meaning is also construed with an infinitive, with a gerundial, or with an interrogative clause: De republica nihil habeo ad te scribere. Ib. Att. 2, 22, 6.—De spatiis hoc praecipendum habemus. Col. 5, 5.—Etsi quid scriberem non habebam. Cic. Fam. 9, 3.

Obs. 3. The subjunctive of adaptedness led to the peculiar idiom of expressing the particular kind of adaptedness by a *descriptive adjective* to which the relative clause (always with its predicate in the subjunctive) is attached with the force of a completing object-clause. Such adjectives are those denoting fitness, worthiness, and sometimes readiness (idoneus, dignus, indignus, aptus, aptus, paratus). These relative clauses, which may have both definite and indefinite antecedents, are rendered by participial nouns in *ing* after a preposition (of, to), or by infinitives, if the relative is the subject of the clause. If the relative is in an oblique case, the clause must be variously recast in English; as: Is non idoneus erit qui mittatur? Will not that man be fit to be sent? Cic. L. M. 23, 66.—Qui modeste pareretur videtur qui aliquando imperet dignus esse; Who modestly obeys, seems to be worthy of commanding in the future. Ib. Leg. 3, 2, 5.—Eo mihi dignior visus est quem in amicitiam meam reciperem; The more worthy he seemed to me of being admitted to my friendship. Ib. Fam. 13, 16, 2.—Quid est dignus in quo omnis nostra diligentia consumatur? What is more worthy of receiving our whole attention? Ib. Verr. 2, 1, 44.—Nec vos digni estis quos silentium ac nox legat; Nor do you deserve to be hidden in silence and night. Liv. 7, 36.—Nulla videbatur aptior persona quae de illaetate loqueretur (more competent to speak on that age). Cic. Am. 1, 4.—Singulis articulis singula machinamenta quibus colorantur aptata sunt; Special machines are adapted to (made to fit) the torture of each limb. Sen. Ep. 24.—Si propius copias admovisset, paratos fore qui proderent urbem; They would be ready to surrender the city (or 'persons would be ready to surrender the city'). Liv. 43, 10. See Ex. 5-14.

Dignus is also construed with relative adverbs (ubi, cur, quare), with ut (rarely), and with an object-infinitive (in ante-classical, poetical, and post-classical style, and sometimes in Livy): Digna res est ubi in nervos intendas tuos (worthy of all thy efforts). Ter. Eun. 2, 3, 20.—Digna causa videbatur cur inimicitias hominis improbiissimi susceperem (= propter quam); The cause deserved that I should for its sake become the enemy etc.). Cic. Verr. 2, 2, 47.—Nihil dignum faciebat quare ejus fugae comitem me adjuverem; He did nothing to deserve my joining him as companion in his flight. Ib. Att. 9, 10, 2.—Si modo quos ut socios haberes dignos duxisti, haud indignos judicas quos in fidem receptos tuendis (where in the first proposition, a relative construction would have required a twice repeated 'quos'). Liv. 23, 42.—Digna res visa est ut simulacrum ejus dii Gracchus pingi juberet. Ib. 24, 16 (where the clause has no antecedent in the principal sentence, and hence cannot be replaced by a relative construction. Comp. Plant. Mil. 4, 4, 4; Liv. 22, 59).—Poets prefer an object-infinitive with dignus, as: Canāni dignus. Virg. Ecl. 5, 54; Legi dignus. Hor. Sat. 1, 10, 72. This construction is rare in classical prose; Cum auctoribus hoc dedi quibus dignus credi est. Liv. 8, 26.—Aptus and idoneus also occur with a gerundial dative, or with a gerundial after ad (p. 164, A. 210; p. 192).

Obs. 4. Want of adaptedness is sometimes expressed by relative clauses after comparatives with quam. For this construction see 'Comparative clauses'.

Obs. 5. In relative clauses denoting purpose, the antecedent is represented as serving the purpose mentioned in the clause. This distinguishes these clauses from final Ut-clauses, which are used either if the clause has no antecedent in the principal sentence, or if the antecedent is the conceiver of the purpose (Obs. 6). Relative clauses of purpose, which are used either with definite and indefinite antecedents, are rendered either by an English object-infinitive after 'to', or 'in order to', 'with the order to', 'so as to', or by participial nouns in *ing* after 'for', or 'for the purpose of', or by relative clauses with an infinitive, or with potential finite predicates denoting purpose ('to be to' etc.). If a new subject is introduced in the clause, the English clause generally takes the form of a final That-clause, or the subject is incorporated in the principal sentence by the preposition 'for' (See the Ex. in Obs. 6). Often personal pronouns must be added in English if the Latin relative is in an oblique case; as: Philippus Aristotelem Alexandro filio doctorem accipit a quo acciperet ille praecepta eloquendi; Philip summoned Aristotle as teacher for his son Alexander who was to learn from him the rules of eloquence. Cic. Or. 3, 25, 141.—Vos duo delēgi quos praecipue colebam, et quibus essem amicissimus; I selected you two to love you before all others, and to be in the most intimate relations to you. Ib. Att. 9, 11A, 2.—Has inter se capreolis conjungunt ubi (= in quibus) tigna collocant; They connected these by supports for placing the beams upon them. Caes. B. C. 2, 10.—Da mihi ex ista arbore quos seram surculos; Give me some cuttings of that tree to plant. Cic. Or. 2, 69, 278.—Ea qui conficeret, C. Trebonium reliquit; He left C. Trebonius to accomplish this. Caes. B. G. 7, 11.

Obs. 6. Clauses denoting purpose with antecedents which represent the *conceiver* of the purpose, do not generally assume a relative form (see Obs. 7), but are expressed by a final *ut*-clause. But if the antecedent is *not* the conceiver of the purpose, and is represented as 'serving' the purpose of some other person, the clause almost always assumes a relative form (if not expressed by one of the other forms mentioned p. 283), as: Germāni in castra venērunt *ut* (hardly 'qui') de indutiis impetrarent; The Germans came into the camp to procure an armistice. Cæs. B. G. 4, 13.—Tertia acies signa intulit *ut* (hardly 'quæ') venientis sustineret. Ib. 1, 25. But: Cæsar equitatum *qui* (hardly *ut*) sustineret hostium impetum, misit. Ib. 1, 24. The relative form is especially necessary if with *ut* a demonstrative would be required, as: Milites ex coriis tunicas fecerunt *quibus* (not *ut eis*) tela vitarent; The soldiers made tunics out of hides to parry (by them) the missiles. Cæs. B. C. 3, 44.—Cæsar sibi novum bellum exoptabat *ubi* (= *in quo*; but not *ut ibi*, or *ut in eo*) virtus enitescere posset; Cæsar was very desirous of a new war in which his greatness might shine forth (or 'that' his greatness etc.). Sall. Cat. 54, 4.—His delecti ex civitatibus attribuantur *quorum* (hardly *ut eorum*) consilio bellum administraretur; Select men from the States were assigned to those *that* the war might be administered by their advice. Cæs. B. G. 7, 76.—Scribebat orationes *quas* alii dicerent; He wrote orations for others to deliver. Cic. Brut. 46, 206\*.—See Ex. 15, 21.—Sometimes a connecting link must be supplied, containing the action to which the purpose is attached, as: Hoc non fugit Catōnem neque Lælium, *quibus* in hominibus erat summa virtus, et summa viriūte amplificata auctoritas, et *quæ* his rebus ornamento et reipublicæ præsidio esset eloquentia (= and eloquence 'which these men practised' that it might be an ornament and support etc.). Cic. Inv. 1, 4, 5.

Obs. 7. Rarely clauses of purpose in which the antecedent is represented as the conceiver of his own purpose, assume the relative form, mostly for particular reasons, as: Verres venerat ipse *qui* esset in concilio, et prima sententiam diceret (Here the relative form indicates that the purpose was carried out; diceret including pregnantly the meaning of an indicative). Cic. Verr. 2, 1, 29.—Nondum Romam Eumenes venerat *qui* calumniando omnia invisa faceret (where the action of the clause is only 'rhetorically' represented as a purpose of the coming; 'ut... faceret' would historically state the real purpose of Eumenes's coming to Rome). Liv. 42, 42.—Paucæ, *quæ* circum illam essent, manent; A few remained to attend to her (where *quæ* is used instead of *ut* on account of the metre). Ter. Eun. 3, 5, 33.

Obs. 8. If the whole principal sentence, or any part of it which is not a substantive, is conceived as the *logical* antecedent of a final clause (p. 515 foll.), and is represented as the *means* by which the purpose of the clause is attained, the clause frequently takes a relative form, being introduced by *quo* = *ut eo* (in order that *by it*), as: Corripisse dicitur Cluentius judicium pecuniæ *quo* inimicum suum condemnaret; in order to condemn 'by it' (i. e. corrumpeudo judicium) his enemy. Cic. Clu. 4, 9.—Dros hominesque testamur, nos arma neque contra patriam cepisse, neque *quo* pericula alia faceremus; nor in order to endanger others 'by it' (i. e. arma capiendo). Sall. Cat. 33.—Equites omnibus in locis pugnabant, *quo* se legionariis militibus præferrent; to gain 'by it' (i. e. omnibus locis pugnando) distinction over the foot soldiers. Cæs. B. G. 2, 27.—If the purpose refers to a comparative, the form with *quo* is almost always used in place of *ut eo*, as: Dixit sese iecirco ab suis discedere *quo* facilius civitatem in officio teneret; in order to keep 'thereby' (discedendo ab suis) the State (the) more easily under control. Cæs. B. G. 5, 3.—Thus if a comparative is implied in the predicate: cū finibus a Solone supposita erat celebritas virorum et mulierum *quo* lamentatio minuitur; in order to diminish 'by it' (i. e. tollendo celebritatem) the wailing. Cic. Leg. 2, 26.—See Ex. 22-24.—'Quo' in clauses of this kind is rendered like a simple 'ut', the demonstrative *eo*, implied in it, being either omitted, or expressed by 'the' before the comparative (*quo* facilius teneret, to keep the more easily).—Rarely final *ut* is used in place of *quo* before comparatives, as: Ut apertius hoc sit. Cic. Inv. 2, 57, 170.—Sometimes *quo* is used with the force of *ut* final, when neither *eo* can be supplied, nor a comparative follows, as: Ego vos, *quo* pauca monerem advocavi. Sall. Cat. 58, 3.

Obs. 9. Frequently the antecedents of relative final clauses are absolute indefinites. The indefinite *aliquis* (*quidam*) in this connection, in classical language, is generally omitted (according to p. 510 (2)), but must be always rendered by corresponding English

\* Such relative clauses frequently represent the antecedent as acting 'under orders', and thus pass over into imperative clauses, from which they can often be scarcely distinguished: Postea homines cursare non destiterunt, credo *qui* Chrysogono nuntiarent etc. Cic. R. A. 22, 60 (i. e. at the order of the accuser, or of the older Roscius; *ut nuntiarent* would imply their own purpose).—Thus in the frequent formula 'mittit *qui* dicerent' and similar phrases, as: Helvetii legatos ad Cæsarem mittunt *qui* dicerent etc. (who were to say). Cæs. B. G. 1, 7.

nouns (something, things, a subject, a fact, persons etc.), as: *Aliquem* velim *qui* mihi ex his locis viam monstret; I should like somebody to show me the way from this place. Plant. Rud. 1, 4, 36.—Sordidi etiam putandi *qui* mercantur a mercatoribus *quod* statim vendant; Also those must be considered as carrying on a sordid trade who buy from the merchants things to sell them directly again. Cic. Off. 1, 42, 150.—Dedisti mihi *quod* diluerem, de quo disputarem; You have given me a fact to refute and to discuss. Ib. Scaur. 2, 14.—Cæsar ad præfectos mittit *qui* nuntiarent ne hostis prælio lacesserent; Cæsar sent messengers to the commanders to announce (= sent word to the commanders) not to attack the enemy. Cæs. B. G. 4, 11.—If the antecedents are negative absolute adjectives (*nemo*, *nilil*), the indefinite element may be in the same manner omitted, so that the mere negation remains, as: *Qui* mitterentur non reperiebantur (= *nemo* reperiebatur *qui* mitteretur). Cæs. B. C. 1, 33; but: Homo justus *nilil* cuiquam detrahit *quod* in se transferat; An honest man does not take anything from anyone to appropriate it to himself. Cic. Off. 3, 19, 75\*. See Ex. 25, 26.

1. Undique mihi suppeditat *quod* pro M. Scauro dicam. Cic. Scaur. 2, 46.—2. Ego vero *quem* fugiam habeo, *quem* sequar non habeo. Ib. Att. 2, 4, 2.—3. Quum primum fuit *cui* recte ad te litteras darem<sup>1</sup>, nilil prius mihi faciendum putavi quam ut tibi gratulärer. Ib. 4, 1, 1.—4. Hæc faciliōra sunt philosophis quo minus multa patent in eorum vita *quæ* fortuna feriat<sup>2</sup>. Ib. Off. 1, 21, 73.—5. Cæsar idoneos nactus homines est per quos ea *quæ* vellet ad Pompējum perferrentur. Cæs. B. C. 1, 9.—6. Hunc pro suis beneficiis Cæsar idoneum judicaverat *quem* cum mandatis ad Pompējum mitteret. Ib. 3, 10.—7. Ille *qui* postulat idoneus non est *qui* impetret. Cic. L. Man. 19, 57.—8. Livianæ fabulæ<sup>3</sup> non satis *dignæ* sunt *quæ* iterum legantur. Ib. Brut. 18.—9. Perferre rem idoneam de *quâ* queratur, et homines dignos *quibus* cum disseratur putant. Ib. Ac. Pr. 2, 6, 18.—10. Eine *qui* postulabant indigni erant *qui* impetrarent? Ib. Rose. A. 41.—11. O virum magnum, *dignumque* *qui* in republica nostra natus esset! Ib. Off. 2, 23, 83.—12. Siculi statuērunt, si vobis indigni essent visi *quibus* opem auxiliumque ferretis, sedis suas relinquere. Ib. Verr. 2, 2, 3.—13. Me imperator *dignum* judicavit *cui* primum pilum hastatum assignaret<sup>4</sup>. Liv. 42, 34.—14. Si tibi idoneus videor *qui* de homine Siculo ac Græculo judicem. Cic. Verr. 2, 2, 29.—15. Lacedæmonii devictis Atheniensibus triginta viros imposuere *qui* rempublicam eorum tractarent. Sall. Cat. 51.—16. Præmittit equites *qui* primum impetum sustineant. Cæs. B. C. 2, 26.—17. Hannibal tria millia militum in silvis disponit, *qui*, signo dato, simul omnes e latebris exsisterent<sup>5</sup>. Liv. 25, 21.—18. Da mihi aliquid *ubi* condormiscam loci. Plant. Rud. 2, 7, 13.—19. Quasi Appius ille Cæcus viam muniverit non *quâ* populus uteretur, sed *ubi* impudē posterī latrocinarerentur. Cic. Mil. 7, 17.—20. Homini natura rationem dedit *quâ* regerentur animi appetitus. Ib. N. D. 2, 12.—21. Vos nunc quæstionculam, de *quâ* meo arbitratu loquar, ponitis? Cic. Or. 1, 22, 102.—22. Medico puto aliquid dandum esse, *quo* sit studiosior. Ib. Fam. 16, 4.—23. Cohortärer vos, *quo* animo fortiore essetis, nisi vos fortiores cognossem quam quemquam virum. Ib. 4, 7, 2.—24. Omnem orationem attribuius Catōni *quo* majorem auctoritatem haberet oratio. Ib. Sen. 1, 3.—25. Doctōrum est ista consuetudo ut eis ponatur (a theme is given to them) de *quo* disputent. Ib. Am. 5, 17.—26. Accusator esses ridiculus si illis temporibus natus esses quum ab aratro arcescebantur *qui* consules fierent. Ib. R. A. 18, 50.

§ 615. The GNOMIC SUBJUNCTIVE (§ 614) is used: 1) if the relative clause restricts the reality of the PREDICATE in the principal sentence

\* Anteclassically *edim* often occurs as SUBJUNCTIVE present of *edere*, to eat, especially in relative clauses of purpose, as: Miserrimus 'st *qui*, quum cupit esse, *quod* edit, non habet. Plaut. Capt. 3, 1, 3.—The relative subjunctive of purpose has a double nature, that of non-reality, and that of virtual obliquity (p. 404, R. 88). If the antecedent is negative, the subjunctive is of a threefold nature, being based on R. 16; R. 19, and on p. 401, R. 88, 1. Such subjunctives may sometimes give rise to ambiguities, as in the last passage quoted in the text, where 'transferat' would be required to be in the subjunctive, even if the clause were not conceived as final. This ambiguity has sometimes misled the grammarians into considering certain passages as 'clauses of purpose', in which nothing but a negative subjunctive of non-reality is contained, as: Germāni neque Druides habent *qui* rebus divinis præsent, neque sacrificiis student; The Germans neither have Druids presiding over religion, nor etc. Cæs. B. G. 6, 21 (= *Druides nullos habent qui præsent*, according to R. 16, Obs. 7; not, as Madvig supposes = *Druides ut præsent*, which might mean 'they have' Druids, but not for the purpose etc.).

<sup>1</sup> This subjunctive belongs both to R. 17, 3, and to R. 19.—<sup>2</sup> *patent... quæ feriat*, are exposed which fortune may strike, i. e. exposed to the blows of fate.—<sup>3</sup> The dramas of Livius Andronicus.—<sup>4</sup> of appointing me to the command of the first section of the hastati.—<sup>5</sup> leave their hiding-places.

OBS. 1. 2); 2) if it expresses QUALITY or MODALITY (R. 20); 3) if it is to the principal predicate in the relation of CAUSE and EFFECT (R. 21).

OBS. 1. Relative clauses restrict the reality of the predication in the principal sentence, if the facts of the latter are represented as holding good only within the limits of what is stated in the clause. Such relative clauses, in which often the particles *quidem* or *modo* (at least) are inserted, generally occur if the antecedent is negative (R. 16, OBS. 10); but they may also refer to substantives not qualified by any form-adjectives, or to absolute indefinites not negative (as *omnes, ceteri, reliqui, unus*), or to the whole sentence, conceived as antecedent. Restricting relative clauses generally contain various modifications of the idea 'as far as known', and may be generally rendered by 'as far as' with a personal pronoun, referring to the antecedent, as: *Omnium oratorum, quos quidem ego cognoverim, acutissimum judico Q. Sertorium*; Of all orators, as far as I know them (or 'at least of those with whom I am acquainted'), I consider Sertorius the most ingenious. Cic. Brut. 48, 180.—*Fuit Sulpicius vel maxime omnium, quos quidem ego audiverim, grandis orator*. Ib. 55, 203.—*Ex oratoribus Atticis antiquissimi sunt, quorum quidem scripta consent, Pericles et Alcibiades*. Ib. Or. 2, 22.—*Unus in hac civitate, quem quidem ego possim dicere, L. Opimius indignissime concidit*. Ib. Sest. 67, 140.—If the restricting clause does not express the idea 'as far as known', the predicate is often found in the indicative (except when there is a negative antecedent, see R. 16, OBS. 10); as: *Ceteri auctores, quorum quidem ego legi annales, nihil memorabile actum tradunt*. Liv. 32, 6.—*Reliquas omnis Græciæ laudes, quæ quidem erant expetendæ, studio suo majores in banc urbem transtulerunt*. Cic. Tusc. 2, 2, 5.—*Omnia, quæ quidem intus inclusæ sunt, ita locata sunt ut nihil eorum supervacaneum sit*. Ib. N. D. 2, 47, 121.

OBS. 2. If restricting relative clauses refer to the whole sentence, they are introduced by *quod* (p. 515, R. 8), occurring in the following conventional formulas: 1) With the meaning 'as far as known' in the formulas '*quod sciam*' (to the best of my knowledge, see p. 518, b), '*quod senserim*' (as far as I have noticed), '*quod exstet*' (as far as known by record), and equivalent expressions, as: *Numquam illum offendi, quod quidem senserim*. Cic. Am. 27, 103.—*Quod litteris exstet*, Pherecydes Syrius primus dixit animos esse hominum sempiternos. Ib. Tusc. 1, 16, 38. These formulas always require the subjunctive, except when *quantum* is used in place of *quod*, in which instance the clause is comparative, and as such not subject to the rules of relative subjunctives.—2) With the meaning 'as far as possible' (to the best of one's ability), or 'as far as consistent with something', generally expressed by the formulas *quod... facere* or *feri possit, quod fiat* (p. 518, b), but also by *quod* with *esse*; as: *Quæro, ut liceat, pace quod fiat tua* (if you have no objection, i. e. 'as far as it may be done with thy consent'), dare huic quæ volumus. Ter. Eun. 3, 2, 13. In the formulas of this kind the indicative (future) is sometimes used, as: *Tu edicto censuram in Macedoniam redibis, quod sine dolo malo facere poteris* (to the best of your ability, acting in good faith). Liv. 43, 15.—*Omnia hæc confugam, quod erit mihi bonum atque commodum* (as far as consistent with my own good). Ter. Phorm. 1, 2, 81. Comp. Cic. Att. 1, 5, 7, quoted p. 518.—3) The formula '*quod in te est*' (as far as you are (I am etc.) concerned), as far as it depends on you; being always in the indicative: *Sacra Clodiæ gentis cur intereant, quod in te est*? Cic. Dom. 13, 34.

Rem. 20. Relative clauses are frequently used with the force of QUALITATIVE UT-CLAUSES, and of ADVERBIAL UT-CLAUSES OF MANNER or INTENSITY, according to which we distinguish 1) relative clauses of QUALITY; 2) relative clauses of MANNER; 3) relative clauses of INTENSITY. Each of these three classes requires the SUBJUNCTIVE.

OBS. 1. The requirements of the subjunctive of quality are the following: 1) The clause must contain facts which are stated with the purpose of deriving from them a quality of the grammatical antecedent (*Gajus est is qui vim non timeat* = *Gajus est impavidus*). 2) The quality must be indicated in the principal sentence by one of the form-adjectives *is, talis, ejusmodi*, which are sometimes left out, but are always understood. 3) These form-adjectives must be either in the relation of predicate-adjectives, the antecedent being the subject (as in the above-mentioned example), or in the relation of attributes to the antecedent, in which instance, however, they must be conceived as logical predicates (*Eas res gessit quæ defendi nequeant* = *His acts are indefensible*). In this form the relative clause is virtually the predicate of the principal sentence. This logical relation of the clause to the principal sentence must be considered as the grammatical reason for the use of the subjunctive (§ 614).

OBS. 2. If any of the three requirements mentioned in OBS. 1 is wanting, the clause either cannot take a relative form, or its predicate must be in the indicative, or, if a subjunctive is used, it cannot be considered as a subjunctive of quality; as:

1. *Animus is est quem videlis; copiæ (cæ sunt) quas audis*; His spirit is such as you see; his resources are such as you have heard. Cic. Phil. 11, 13, 32 (Here the two relative clauses do not describe qualities of the antecedents *animus* and *copiæ*; hence the predicate is in the indicative).—Thus: *Quæ domus non ea est quam parietes nostri cingunt* (not *cingant*). Ib. Rep. 1, 13.—*Ego is ero qui semper fui* (not *fuero*). Ib. Att. 11, 12, 3.—*Eum te esse finge qui sum* (not *sim*) ego; Suppose yourself to be such as I am. Here the clause does not describe a quality of the antecedent, but determines it by a comparison with other qualities (*is qui = talis qualis*). Hence if *is qui* has the force of *talis qualis*, the clause must be in the indicative. Comp. Cic. Att. 7, 8, 1; Fam. 5, 19, 2; ib. 3, 12, 2\*.—But: *Ego is sum qui illi concedi putem utilius esse quod postulat, quam signa conferri*; I am the man who thinks (to think) it more useful to submit to his demands than to fight (= I am strongly inclined to peace). Cic. Att. 7, 5, 5. See the Ex. OBS. 3.

2. *Bithyniæ, quæ nunc vestra provincia est, vici exusti sunt complures*. Cic. L. M. 2, 4. Here the relative clause denotes a quality of the antecedent, but it is not, and cannot be designated in the principal sentence by any of the form-adjectives *is, talis, ejusmodi*, as syndetic antecedents of the clause (not: *Ejus Bithyniæ quæ est etc.*). Hence the mood of the clause is the indicative.

3. *Improbantur ei quæstus qui in odia hominum incurrunt*; (Those) gains which cause the hate of men, are disapproved. Cic. Off. 1, 42. Here the clause both denotes a quality of the antecedent, and refers to a form-adjective *is* as its syndetic antecedent, which, however, neither is a predicate-adjective, nor can be logically conceived as such (see OBS. 6); hence the mood must be the indicative.

OBS. 3. If the syndetic antecedent of a relative clause of quality is in the relation of a predicate-adjective, or of an attribute-adjective attached to a predicate-noun, or of a qualitative-genitive with the force of a predicate-adjective, the Latin language makes use of the following forms: 1. *Gajus est is qui*; 2. *Urbs est ejusmodi quæ*; 3. *Gajus est talis qui*; 4. *Gajus est is consul qui*; 5. *Hoc est ejus viri qui*. These forms are variously rendered by '*Gajus is the (a) man, to*', '*the (a) man who*', '*such as*', '*such as to*', '*such that*'. Sometimes different circumlocutions are required.

A. In the forms with *is qui*, the grammatical antecedent of the clause always is the subject of the sentence. These forms are mostly used if the governing sentence is negative (in which instance the subjunctive is used for two reasons; see R. 16); but it also occurs if the principal sentence is affirmative, as: *Tu is es qui in disputando non tuum judicium sequitur, sed auctoritati aliorum pareas*; You are such a man as not to follow (or 'you are a man who does not follow') in discussions your own judgment, but (who obeys) the authority of others. Cic. Leg. 1, 13.—*Ego sum is qui non possim dicere me hæc didicisse*; I am such a person (i. e. 'my knowledge is of such a kind') that I cannot claim to have learned these things. Cic. Or. 3, 9, 32.—*Sociâlis exercitus is est, quod adjungit Romani duplicem vim suas*; The army of the allies is such that the Romans double their strength by incorporating it. Liv. 8, 4.—*Quæ objecta sunt mihi, ea sunt quæ fatèri non erubescam*; The charges against me are such as (= those which) I am not ashamed to own. Liv. 42, 41.—*Ne actor quidem est is cui reus tam nocens impune eripi possit*; Not even the prosecutor is the man from whom a defendant so culpable could be snatched with impunity. Cic. Verr. 2, 1, 4. See Ex. 1-8.

B. The form *ejusmodi qui* rarely refers to persons, but almost always to antecedents

\* Thus *is qui* stands with the indicative if it has the force of *idem qui*, being chiefly used so in parenthetical sentences, where *is* has the relation of an apposition, as: *Nec audendus Socrates, is qui (being the one who) physicus appellatur*. Cic. N. D. 1, 13.—*Quorum princeps Socrates fuit, is qui... omnium fuit facile princeps*. Ib. Or. 3, 16.

† In sentences of this form (*Gajus est is qui*), the grammatical antecedent of *qui* is not a noun of general import understood with *is (talis)*, '*Gajus est is qui*' being not equivalent to '*Gajus est is homo qui*'. *Is* and *talis*, in this construction are predicate-adjectives of quality (*is = ita constitutus*), expressing the 'general idea' of a descriptive adjective of quality. The real grammatical antecedents are the subjects of the sentence. That the Latins thus conceived the predicate-adjective *is*, appears 1) from the construction with *ejusmodi*; *Genus est belli ejusmodi quod vestros animos excitare debeat*. Cic. L. M. 2, where '*quod*' evidently refers to *genus*, and not to '*modi*'; 2) from the fact that the person of the verb of the clause does not agree with the third person included in a predicate-noun understood, but with the person of the subject. Thus in the sentence '*Romana gens ea est quæ victa quiescere nesciat*', Liv. 9, 3, we cannot supply '*gens*' as predicate-noun understood, as the grammarians generally do (not = *Romana gens ea est quæ*, but '*ea est quæ*', *ea* being equal to '*ita constituta est ut ea*'). The Latins felt their qualitative form-adjectives in a manner quite different from the conception of the English equivalents of these adjectives.

denoting things. *Ejusmodi qui* and *talis qui* may also refer to *ind. finite* antecedents, while *is qui* always refers to *definite* antecedents: *Est res ejusmodi cujus exitus providi possit*: The affairs of such a nature that its result may be foreseen. Cic. Fam. 6. 1. 1. — *Quicquid ejusmodi est in quo non possint plures excellere, eo fit peritque contento*. Ib. Off. 1, 8, 26. See Ex. 9. 10.

C. *Talis*, as predicate-adjective, is rarely used with qualitative Qui-clauses\*, as: *Talem te esse oportet qui te bonis omnibus ducem praebeas*. Cic. Fam. 10. 63.—*Si quis est talis qui me vehementer accuset*. Ib. Cat. 2, 2, 3.—More frequently the predicate-adjective *talis* occurs with modal Ut-clauses, as *Si tales sunt di ut rebus humanis intersint*; If the gods are such that they interfere with the affairs of men. Ib. N. D. 3, 14, 47. On the other hand, if *is* and *ejusmodi* are predicatively used in the principal sentence, Ut-clauses more rarely occur than Qui-clauses, as: *Quum ille is sit orator ut nihil eo possit esse praestantius*. Cic. Or. 3, 9, 32.—*Non is es, Catilina, ut te unquam pudor a turpitudine revocarit*. Ib. Cat. 1, 9.

D. Similar is the construction in which *is* and *talis* are attributively attached to predicate-nouns, the subject being the grammatical antecedent, as: *Ego ero is consul qui contionem metuam, qui tribunos plebis perhorrescam?* Will I be such a consul as to be afraid of a public assembly, as to dread the tribunes of the people? Cic. L. Agr. 2, 37, 101.—*Non sumus ei augures qui avium observatione futura dicimus*. Ib. Div. 2, 57, 111.—*Innocentia est affectio talis animi quae nocet nemini*. Ib. Tusc. 3, 8.

E. Sometimes *is* takes the form of an impersonal predicate-genitive § 466, No. 2, either as an absolute adjective, or with a noun denoting the general idea of a person. This occurs if the grammatical subject is an *action* (referred to by the neuter *hoc*), the quality of which is described by a relative clause referring to the character of the doer. Such relative clauses cannot be replaced by Ut-clauses; but their predicate, according to the analogy of the above-mentioned forms, must be in the subjunctive, as: *Hoc est ejus uti quem de suscepta causa nullum periculum possit depellere*; This is the nature of a man whom no danger can deter from his purpose. Cic. Leg. 9, 26. *Hoc non erat ejus qui innumerabiles mundos mente peragrasset*; This was not the character of a man who in his mind had travelled through innumerable worlds. Ib. Fin. 2, 31.

Obs. 4. In this construction the predicate-adjectives *is*, *talis*, *ejusmodi*, are sometimes understood, as: *Domus est (i. e. ea or ejusmodi) quae nulli mearum villarum cedat*; The house (on your country-place) is such as to be second to none of my own villas. Cic. Fam. 6, 18, 5.—*Preces erant, sed (i. e. eae) quibus contradicere non posset*; It was a prayer, but such as to admit of no contradiction. Tac. H. 4, 8†. See Ex. 11.—For the co-ordination of relative qualitative clauses to descriptive adjectives see R. 21, Obs. 10.

Obs. 5. Relative clauses dependent on sentences of the form A of Obs. 3 (Gaius est *is qui*) have the INDICATIVE: 1) if they do not denote quality, provided the subjunctive is not required for other reasons (see R. 21, p. 563, note ‡); as: *Suscipe paulisper meas parvas, et eum te esse finge qui sum ego* (= think yourself to be in my place). Cic. Fam. 3, 12.—*Is erat qui ipse eam sedem roverat*; It was he who had himself voted that temple. Liv. 40, 34.—*Tu es is qui me sententiis tuis saepissime ornasti*; It is you who have most frequently protected my interest by your votes (in the Senate). Cic. Fam. 15, 4, 11. (See Obs. 2, No. 1.) 2) If the predicate *esse* of the principal sentence has the meaning 'to signify', 'to mean', 'serving for definition': *Vir bonus est is qui prodest quibus potest*; A good man is one who is useful to as many as he can. Cic. Off. 3, 15, 61. 3) If the facts stated in the clause have happened before the time of the principal sentence, the clause has its predicate in the indicative, even if it may be conceived as describing a quality of the subject‡. Hence, if there are several co-ordinate Qui-clauses dependent on the sen-

\* From *talis qui*, the combination *talis qualis* must be distinguished, which never has the value of a qualitative Qui-clause, but always has a comparative meaning, requiring the indicative (See Comparative clauses). *Talis qui* always requires the subjunctive (see Obs. 7, and foot-note †).

† Sometimes relative clauses of quality have as antecedents subjects to which a demonstrative (*is*) referring to a previous sentence, is attached. In this instance *is* is not repeated as predicate-adjective, as: *Is erat annus quo Caesari per longos consulens fieri liceret* (= *is* or *hic* annus erat *is* quo etc.). Caes. B. C. 3, 1. The clause '*quo liceret*' is conceived as a quality of the year by which it came (as all other similar years) under the general requirements of the election laws in regard to Caesar. The same clause with the indicative would denote a permission referring to that year only.

‡ Relative clauses of this kind, according to the general rules on the tenses of modal Ut-clauses, cannot be conceived as equivalent to such clauses. This, however, refers only to clauses dependent on sentences with the antecedent *is*. Those dependent on sentences of the forms B, and C, are always conceived as equivalents of modal Ut-clauses, and

tences of the form A, Obs. 3, those predicates referring to a time anterior to that of the principal sentence are placed in the indicative, while those belonging to the time spoken of, are in the subjunctive, as: *Et reus is est cui existimatio sancti-eima fuit semper, et iudex est is quem nos non minus bene de nobis existimare quam secundum nos judicare debemus*, et advocatio ea est quam propter eximium splendorem vereri debemus. Cic. R. C. 5, 15.—*Genus hominum (id) erat cui liceret libere facere quod vellet, legiones (erant) eae quae paullo ante apud adversarios fuerant*. Caes. B. C. 2, 29. See Ex. 12-14.—4) Sometimes, but rarely, in relative qualitative clauses of the form A, not belonging to any of the mentioned exceptions, the indicative is used, as: *Ista quidem sententia ea est quae neque amicos parat, nec inimicos tollit*. Liv. 9, 3.

Obs. 6. Often the syndetic antecedent '*is*' of a relative clause of quality is in the relation of an attribute to the grammatical antecedent (or it may be used as an absolute adjective), the principal sentence having an ordinary verbal predicate. The Latin language often uses this form of the sentence in place, and with the force of the predicative forms mentioned Obs. 3, in which instance the predicate of the clause is generally placed in the subjunctive. The criterion of this construction is, that it may be replaced by the predicative form considered in Obs. 3, and that the principal predicate, containing a fact conceived as already known and granted, may be relatively attached to the antecedent, as: *Eae res gesseram quarum non unus auctor, sed dux omnium voluntatis fuisset*; I had done (those) things of which I was not the sole author, but (in regard to which) I acted as the organ of the universal will. Cic. Sest. 16, 38. Here the author does not mean to assert the principal predicate *gesseram* as such, since the acts referred to were already spoken of in the previous sentences. But he means to assert the quality of these acts, described in the relative clause, so that the passage is logically equivalent to '*Res, quas gesseram, eae fuerant quarum... fuisset*'. In these constructions, the syndetic antecedent *is* (or *talis*, *ejusmodi*, see Obs. 7), being always emphatical, and showing, in connection with the subjunctive, the real meaning of the passage, is rarely left out in good prose, and always must be understood. Ut-clauses cannot be used in place of such relative clauses, unless the construction is first transformed into a construction of the form A, Obs. 3; as: *Non ab ea republica avellar, qua carendum esse doleam* (= *Respublica a qua avellar non est ea qua etc.*, or '*non est ea ut carendum ea esse doleam*'; The republic, from which I shall be torn away, is not such that I should be sorry for being deprived of it). Cic. Fam. 6, 4, 4.—*Ei mandasti cui expediret illud venire quam plurimo* [= *Vir cui mandasti*], *est is cui expediret*; He to whom you have given the order (is a man who) has an interest in its selling as high as possible. Ib. Fam. 7, 2, 1.—Caesar Vettium in rostra produxit, eumque in eo loco constituit quo Bibulo consuli aspirare non liceret (= locus, in quo eum constituit *is* erat ut Bibulo eo aspirare non liceret; assigning a place to him to which etc., or 'the place assigned to him being such that etc.'). Ib. Att. 2, 24, 3.—*Tu ibi eris ubi omnia scire possis* (= locus, ubi eris, *is* est ut ibi etc.). Ib. Fam. 6, 20, 2\*. See Ex. 15-19.—If relative clauses denote qualities re-

hence cannot have tenses referring to a time anterior to that of the principal sentence. Clauses dependent on sentences of the form E, admit these tenses, but must always have their predicates in the subjunctive.—If a perfect tense in relative clauses of the form A includes the present time (corresponding to the English present-perfect), it may be placed either in the subjunctive or indicative, as: *Is enim est ille qui semper voluntatem vestram contempserit*. Cic. Ph. 6, 3, 5.

\* The grammarians frequently consider subjunctives in relative clauses as qualitative subjunctives, although they do not correspond to the requirements of this rule, as in the following passages (MEIRING § 704): *Gyges in hiatum descendit animumque equum, ut ferunt fabulae, animadvertit, cujus in lateribus fores essent*. Cic. Off. 3, 9. It is true that this relative clause expresses a quality of the bronze horse. But the quality is simply stated as a fact without any predicate force, so that the clause could neither be replaced by an Ut-clause, nor could a syndetic antecedent '*eum*' be used, nor could the principal predicate '*animadvertit*', which is stated as an independent fact, be relatively attached to '*is equus*' taken predicatively. The subjunctive *essent* evidently is *quasi-oblique*, being represented as the statement of the fable.—*Natura nihil habet praestantius, nihil quod magis expetat, quam honestatem*. Cic. Tusc. 2, 20. Here the subjunctive *expetat*, evidently is not a subjunctive of quality, but a 'negative' subjunctive according to p. 545, Obs. 7, 1.—Some grammarians (for inst. the author of the Publ. Sch. Grammar) say: '*Is qui* takes the subjunctive if '*qui*' is consecutive and indefinite (= such a one that); but the indicative, if '*qui*' is definite (= the person who). This distinction will not determine the mood of the clause, because the grammatical antecedents in these clauses are generally definite, and the renderings '*the person who*' and '*such a one that*' are very frequently used without any appreciable difference. Moreover this rule does not determine the instance when *qui*, '*is* not consecutive and indefinite', which is just the one that has most perplexed the grammarians. See p. 568 foll., foot-note ‡.

ferring to 'is', but the principal sentence does not admit of the transformation mentioned, the *indicative* must be used, unless the subjunctive is required for other reasons, as: *Premebatur multitudo ab eis qui majores opes habebant*. Cic. Off. 2, 12, 41. Here the principal predicate *premebatur* contains a new fact, asserted as such by the author, the relative clause having merely a determinative nature, designating the passive agent. But if *habebant* is changed into the subjunctive *haberent*, the predicate *premebatur* would be represented as already known, or as mentioned before, while the statement in the clause would contain the real assertion (= *Homines, quibus multitudo premebatur, ei erant qui majores opes habebant*).—An indicative must also be used if the clause, even in the predicative construction, would require the indicative (according to Obs. 5), as: *Civis erat expulsus is qui rempublicam ex senatus auctoritate defenderat*. Cic. Sest. 24, 53.—Eidem in *eis* elaborant *quae sciunt* nihil ad se pertinere. Ib. Sen. 7, 24.—In urbe *ea* es ubi nata est ratio ac moderatio vitae (not = *Urbs*, in qua es, *ea* est ut ibi nata sit). Cic. Fam. 6, 1, 6. Compare with: *Sed in ea* es urbe in qua haec vel plura parietes ipsi loqui posse videantur. Ib. 6, 3, 3.—Sometimes, however, in clauses of this kind the *indicative* is used, even if all the requirements of a subjunctive exist, as: *Cato et ea sentit quae non sane probantur in vulgus, et in ea* est haeresi quae nullum sequitur florem orationis (= *Quae Cato sentit ea sunt quae...probantur*; haeresis in qua est, *ea* est quae...sequitur). Cic. Parad. Pro. 2.—*Id enim bellum gerunt quod* ab omnibus gentibus probatur (= *Bellum, quod gerunt, id est ut* ab omnibus gentibus probetur). Ib. Phil. 11, 15, 39.\*

Obs. 7. Sometimes *talis* and *ejusmodi* may be used with the force of *is* in clauses of this kind (Obs. 6), in which instance the *subjunctive* is always necessary, as: *Talem injuriam acceperant quam nullā lege satis digne persequi possent*. Cic. Verr. 2, 1, 32.—*Mihi causa talis oblata est in qua* oratio deesse nemini possit. Ib. L. M. 1, 3. See Ex. 20, 21.

Obs. 8. *Adverbial* Ut-clauses of manner of the form '*ita ut is*' can generally not assume a relative form, as: *Hi ita vivunt ut eorum probetur fides*. Cic. Am. 5, 19. This Ut-clause cannot be replaced by a relative clause '*Hi (ita) vivunt quorum probetur fides*', which would mean '*Qui vivunt ei sunt ut eorum fides probetur*'. But sometimes relative clauses have the force of *adverbial* Ut-clauses of manner, namely 1) if the relative *quod* refers to the whole principal sentence as antecedent (p. 515, R. 8), as: In enodandis nominibus vos Stoici, *quod miserandum sit*, laboratis; In the explanation of names you Stoics blunder so that it is pitiable. Cic. N. D. 1, 41.—*Etas nostra, quod interdum pudeat*, juris ignara est; Our time is so ignorant in the law, that it sometimes is a shame. Cic. Or. 1, 10, 40; 2) if relative clauses are coördinate to predicative or attributive descriptive adjectives. See R. 21, Obs. 10.

Obs. 9. Relative clauses are sometimes used to describe the 'INTENSITY' of a quality referring to their antecedents. The regular form of clauses of intensity is that of an *Ut-clause*, even if the principal sentence contains an antecedent of the clause (p. 437), as: *Tanta vis justitiae est ut ea* etiam latronum opes firmet atque augeat. Cic. Off. 2, 11, 40. But the clause takes almost always a relative form in the peculiar idiom of the form '*Nemo est tam bonus (fortis etc.) qui hoc faciat*', and in equivalent constructions with *nihil, nullus*, with interrogatives of negative force, or negative adverbs. These forms are the same as the relative predicate-clauses dependent on negative antecedents (R. 16, Obs. 2, 7), and are employed to make the statement of the clause more emphatical by denying that even the greatest intensity of certain qualities of the indefinite subject cannot affect the facts stated in the clause. Such relative clauses, having the adverb *tam* as syndetic antecedent (which is merged in *tantus* in place of *tam magnus*), must be con-

\* A peculiar species of qualitative relative clauses are those which designate things by certain QUANTITATIVE properties pertaining to them, for inst., by their value, size, distance etc. They always occur with a subjunctive, and generally without a syndetic antecedent, as: *O societatem captiosam et indignam, ubi alter HS quinquaginta millia, alter centum millium quod sit in societatem affert*; And where the other party brings into the partnership what is worth as much as 100,000 sesterces. Cic. R. Com. 10, 29 (= where what the other invests in the concern is worth etc.).—*Pauculis mensibus furta praetoris, quae essent HS duodecies ex uno oppido exportati sunt*; Within a few months the praetor's stealings, which were as high as 6 million sesterces, were sent off from a single city (= the stealings, which were sent from one single city, amounted to etc.). Cic. Verr. 2, 2, 75.—*At ille, mille et octoginta stadia quod abesset*, videbat; But that man saw (could see) things which were at a distance of 1080 stadia (= the distance at which he could see things amounted to 1080 stadia). Cic. Ac. Pr. 2, 25.—*Num vir bonus emet denario quod sit mille denarium?* (= If what he buys for a denarius is worth a thousand denarii). Cic. Off. 3, 23. The subjunctive in the last passage may also be referred to the rule p. 555, B.

† This passage is quoted by some grammarians (Publ. Sch. Gr. p. 370) with an *indicative* (*potent*) to prove that *talis qui* sometimes occurs with an indicative. But all the critical editions, by authority of the better codd., give the subjunctive *possit*. There is no other proof for the use of the indicative after *talis qui*.

sidered as equivalents of Ut-clauses of intensity, and hence frequently take the form of a *Quin-clause* if they are negative (R. 16, Obs. 11); as: *Nemo est tam senex qui se annum non putet posse vivere* (= *ut se non putet etc.*); Nobody is so old as not to believe he might live another year (the same as '*Nemo est qui se annum non putet posse vivere quamvis sit senex*'). Cic. Sen. 7, 24.—*In bello nihil tam leve est quod non magnae interdum rei momentum faciat*; In war nothing is so insignificant that it might not sometimes be of great influence on the course of events. Liv. 25, 18.—*Neque tam remisso animo quisquam fuit qui ea nocte conquieverit*; Nor was there any one of such equanimity that he could sleep in that night. Caes. B. C. 1, 21.—*Nec vero ulla vis imperii tanta est quae premente metu possit esse diuturna*. Cic. Off. 2, 7, 25.—*Quis homo est tanta confidentia qui sacerdotem audeat violare?* Plant. Rud. 3, 2, 32.—*Nihil tam absurde dici potest quod non dicatur ab aliquo philosophorum*. Cic. Div. 2, 58.—*Nemo est tam fortis quin rei novitate perturbetur*. Caes. B. G. 6, 39. See Ex. 22–28.—*Ut-clauses* are less frequently used in place of such relative or *Quin-clauses*, as: *Nec sum tam stultus ut te usura falsi gaudii frui velim*. Cic. Fam. 6, 12, 1.

Obs. 10. Aside from the form mentioned Obs. 9, clauses of intensity rarely take a relative form, as: *Statuerunt tantum illud esse maleficium quod aperiri illustrarique deberet*. Cic. Sull. 2, extr. Sometimes *tantus* is understood, as: *Vidi cisternam quae (i. e. tanta fuit ut) sufficere in usum vel exercitus posset*. Sen. Ep. 86\*.

1. Equidem *is sum qui* istos plausus semper contempserim. Cic. Phil. 1, 15, 37.—2. *Is enim sum qui* vigiliis, curis, periculis perfecim ut non obstarem reipublicae. Ib. 12, 8, 21.—3. Genus scribendi *id fuit quod* nemo abjecto animo<sup>1</sup> facere posset. Ib. Att. 12, 40, 2.—4. *Is enim fueram, cui*<sup>2</sup> quum liceret majores ex otio fructus capere quam ceteris, non dubitaverim me gravissimis tempestatibus obviam ferre. Ib. Rep. 1, 4, 7.—5. *Non sumus ei quorum vagetur animus errore, nec habeat umquam quid sequatur*. Ib. Off. 2, 2.—6. Si modo *is sum qui* id possum judicare. Ib. Brut. 49, 181.—7. *Neque is sum qui* gravissime ex vobis mortis periculo terrear. Caes. B. G. 5, 30.—8. *Non sumus ei quibus nihil verum videatur*. Cic. N. D. 1, 5, 12.—9. Nomen legati *ejusmodi esse debet quod non modo* inter sociorum jura, sed etiam inter hostium tela incolume pervestitur. Ib. Verr. 2, 1, 33.—10. Genus *ejusmodi* fuit criminum quod non totum pendere ex teste, sed quod ponderaret iudex ipse per se. Ib. Scaur. 2, 14.—11. Accessit consul hortator. At qui consul! Si prudentiam quaerimus, qui minime falli possit; si viriutem, qui nullam pacem probaret nisi Antonio victo. Ib. Ph. 12, 1.—12. Estne Sthenius *is qui* omnis honores, facillime quum adeptus esset, amplissime ac magnificentissime gessit? Ib. Verr. 2, 2, 46.—13. Hostes *ei sunt quos* proximo anno clamore debellastis. Tac. V. Agr. 34.—14. Non hostis *est is* cujus praesidium Claternā dejecit Hirtius? Cic. Phil. 7, 8, 21.—15. Majoribus vestris cum eo hoste res erat<sup>3</sup> qui haberet rempublicam, curiam, avariam, etiam brevem, aut nullam omnino sint relicturi<sup>4</sup>. Ib. Off. 2, 16, 35.—16. Quorum memoria aut brevem, aut nullam omnino sint relicturi<sup>4</sup>. Ib. Off. 2, 16, 35.—17. Cum eo hoste res est qui hesterno die delendi omnis exercitus fortia per se ordiam usus non sit<sup>5</sup>. Liv. 7, 35.—18. Manlius praepes ad id certamen agitur quo<sup>6</sup> vinceret an vinceretur, haud multum interesset. Ib. 8, 7.—19. Erat in oppido conventus *is qui* ex variis generibus constaret. Caes. B. C. 2, 36.—20. Natura dedit talem mentem quae omnem virtutem capere posset. Cic. Fin. 5, 21, 59.—21. Tales viri mittebantur quorum de consilio sperari posset, imperatores nihil indignum decretis esse. Liv. 45, 17.—22. Nulla tam detestabilis pestis est quae non homini ab homine nascitur. Cic. Off. 2, 5, 16.—23. Quis est tam stultus cui sit exploratum se ad vesperum esse victurum? Ib. Sen. 19, 67.—24. Nulla gens tam immānis umquam fuit, in qua tam crudelis hostis patriae sit inventus. Ib. Sull. 27, 76.—25. *Ecquem tam amentem* esse putas, qui illud quo vescatur deum esse credat? Ib. N. D. 3, 16, 41.—26. Numquam ullum periculum tantum putavi quod subterfugere mallem quam vestrae auctoritati obtemperare. Ib. Fam. 16, 1.—27. *Nemo est tam afflictus quin possit* navare aliquid et efficere. Ib. 6, 1, 7.—28. *Numquam tam male est* Siculis quin aliquid facere et commode dicant. Ib. Verr. 2, 4, 43.

\* *Tantus quantus* is always used comparatively, requiring the indicative, and is in the same relation to *tantus qui*, as *talis qualis* to *talis qui* (Obs. 4). If subjunctives occur with *tantus quantus*, they must not be considered as qualitative subjunctives, as: *Eumenes exceptus est tanto honore quantum meritis ejus existimaret deberi populus Romanus* (Liv. 42, 11), where *existimaret* is an idiomatic quasi-oblique subjunctive, according to p. 405, Obs. 3.

<sup>1</sup> Being in a despondent mood.—<sup>2</sup> See p. 539, R. 14.—<sup>3</sup> had to deal with.—<sup>4</sup> In this passage the relative clause is conceived predicatively (= If men spend money for things which are of a nature that they will not leave behind etc., they are spendthrifts).—<sup>5</sup> The time-point of the relative predicate is strictly prior to the time of the principal sentence; but the author has in his mind the time-period or stage of the war.—<sup>6</sup> involved according to p. 535, Obs. 2.

Rem. 21. If a relative clause contains the CAUSE of the principal predicate, the principal sentence being represented as the LOGICAL EFFECT of that cause, it generally has its predicate in the SUBJUNCTIVE. The cause may be conceived as a *direct*, or as an *adversative* (concessive) cause (Obs. 4). Often, however, the causal connection is of a looser nature, designating a general logical connection with the principal predicate, or with other statements.

Obs. 1. If the relative clause has a strictly causal meaning, *qui* has the force of a causal conjunction with a personal pronoun referring to the antecedent (*qui* = *quum* is, *quum* ego etc.; *quem* = *quum* cum etc.), in which instance the Latin relative clause may often be rendered by an English causal clause. Generally however the form of a relative clause is used both in English (with the indicative), and in Latin (with the subjunctive, or indicative). Adverbial relatives have the force of a causal conjunction with a demonstrative adverb (*ubi* = *quum* ibi; *quo* = *quum* eo etc.).

The constructions in which the causal relative subjunctive occurs, are the following:  
A. The clause is made dependent on particular nouns, or on one of the personal pronouns, expressed or understood [FORMULA: *Gajus, qui hoc sciret, parat*; *Gajus, si hoc he (although, or 'who') knew this, obeyed*. Obs. 2-5.]

B. The relative clause has the force of a *Quum*-clause denoting a fact which the principal sentence describes according to its inner bearings, according to p. 339, R. 69 [FORMULA: *Gajus peccavit qui hoc faceret*; *Gajus committed a blunder in (by) doing this (when he did this, in as much as he did this)*. Obs. 6.]

C. The relative clause takes the place of a completing *Quod*-clause after verbs of praising, censuring, thanking, complaining, admiring etc., see p. 388, Obs. 1, 2 [FORMULA: *Gajus laudat Sejum qui hoc dixerit*; *Gajus praises Sejus for having said this*. Obs. 7.]

D. The relative clause is made dependent on a general antecedent (*is, ea, id*), and has the double nature of determining this antecedent and representing the cause of the principal action [FORMULA: *Gajus is qui hoc dixisset parat*; *Gajus punished those who had said this and because they had said it*. Obs. 8.]

E. The clause depends on a general antecedent determined by it (*is, ea, id*), expressed or understood, but so that a certain person, previously mentioned, is meant by it; being mostly rendered by an English participial construction [FORMULA: *Qui nihil ejusmodi suspiceretur venire non dubitabant*; *Having no misgivings of the kind, they came without hesitation*. Obs. 9.]

F. The clause refers to a preceding descriptive adjective, dependent on its antecedent, and explains the reason why the adjective is applied to the antecedent [FORMULA: *Vir fortissimus, cui plurima dona militaria adreuerunt*; *a brave man, to whom (seeing that to him a great many military rewards were given)*. Obs. 10.]

Obs. 2. Causal relative clauses with PARTICULAR NOUNS, or their equivalents, as antecedents (Obs. 1, A), generally denote a LOGICAL REASON by which the facts stated in the principal sentence are explained, the relative being an equivalent of the causal conjunction *quum*, since (*qui* = *quum* is, *quum* ego etc.), as: *Hospes qui* (= *quum* is) *nihil suspicaretur*, hominem summā vi retinere cœpit; The guest-friend who (since he) did not suspect anything, began to retain the man with the greatest urgency. Cic. Verr. 2, 1, 25.—Iterum iste, cui (= *quum* ei) nullus esset usquam consistendi locus, Romam se contulit. Ib. Flacc. 21, 50.—Qui (= *quum* ego) mihi nullius umquam delicti gratiam fecissem, haud facile alterius libidini malefacta condonabam; I who (since I) never had pardoned myself for any offence, did not easily condone misdeeds to the lust of others. Sall. Cat. 52, 8.—See Ex. 1-9.

More rarely *qui*, in these clauses, has the force of *quod* or *quia* (but never of *quoniam*), as: Samnites, omissis Sidicinis Campanos adorti sunt, unde (= *propterea quod inde, i. e. ab eis*) prædæ atque gloriæ plus esset; The Samnites, having turned from the Sidicini, attacked the Campanians because more booty and glory was to be gathered there (from them). Liv. 7, 29.—Sometimes causal *Quod*-clauses after negations (*non quod sed* etc., see p. 690) take the form of a relative clause, which always requires the subjunctive, like *Quod*-clauses of this kind, as: Octo hominum millia tenebat Hannibal, non quos (= *non quod* eos) in acie cepisset, aut qui periculo mortis diffugissent, sed qui (= *sed quod*) relictī in castris fuissent a Paulo et Varrone; Hannibal held 8000 men, not in consequence of having captured them in battle, or of any attempt of theirs to flee under danger of life, but because etc. Cic. Off. 3, 32, 111\*. Peculiar is the subjunctive

\* The subjunctives in these relative clauses cannot be considered as *qualitative* (as some grammarians do), since they neither are predicatively conceived (R. 20, Obs. 6), nor admit of a transformation into an *Ut*-clause. The construction is evidently equivalent

in relative clauses, by which a cause referring to a different antecedent is pregnantly intimated, as: Is erat qui ipse eam ædem voverat quo die cum Antiocho ad Thermopylas depugnasset. Liv. 40, 34 (on the day he had defeated Antiochus, and because he had defeated him).

Often the causal force is not contained in the relative clause, but in its governing clause in which it is involved according to the rules p. 534 foll. In this instance, the predicate of the governing clause is placed in the subjunctive, while the predicate of the relative clause may be in the subjunctive by attraction, as: Numquam laudari satis digne philosophia poterit, cui qui pareat omne tempus ætatis sine molestia possit degere. Cic. Sen. 1, 2.

Obs. 3. Often a relative clause does not assign a cause to the action expressed by the predicate, but to the predication (assertion) as such, representing it as a proof for the truth of what is asserted in the principal sentence. The relative in clauses of this kind has the force of the conjunction *siquidem* (since = *seeing that*), as: Non est inhumana virtus neque superba, quæ etiam populos universos tueri solet; Virtue is not inhuman nor haughty, since it is wont to protect even whole nations (= which is proved by the fact that it is wont etc.). Cic. Am. 14, 50.—Atticus afflictis semper succurrit, qui quidem Serviliam, Bruti matrem, non minus post mortem ejus quam florentem coluerit; Atticus always assisted those in distress. Thus (= which was shown by the fact that etc.) he was not less devoted to Brutus's mother after the death of her son, than when she was in prosperity. Nep. Att. 11.—Quid? Istæ mutæ sunt quæ pro se fabulari nequeant? How? Are those women mute that (seeing that) they cannot talk in their own behalf? Plant. Rud. 4, 4, 69.—Tubero paullo etiam durior, qui quidem judicaverit vacationem augures non habere. Cic. Brut. 31, 117.—In M. Bruto magnum fuit dedecus generi vestro, qui accusationem facitaverit. Ib. 34, 130.—See Ex. 10-13.

Obs. 4. Frequently the cause designated by the relative clause is ADVERSATIVE (concessive), containing a reason from which the contrary of what is stated in the clause should be inferred. This force of the clause is frequently intimated by the particle *tamen* in the apodosis, but often it must be inferred from the connection alone, whether the cause is meant to be direct or adversative, as: Egomet, qui sero ac leviter Græcas litteras attigissem, tamen complures dies Athēnis commoratus sum; I, on my part, who (although I) had but late and slightly touched Greek literature, yet staid several days at Athens. Cic. Or. 1, 18, 82.—Pompejani miserrimo ac patientissimo exercitui Cæsaris luxuriam objiciebant, cui semper omnia ad necessarium usum defuissent; Which (although it); in the face of the fact that it had always been short of all necessities of life. Cæs. B. C. 3, 96.—Tu non adfuisti, qui diligentissime semper illum diem et illud munus solutus esses obire. Cic. Am. 2, 7.—Rex Antiochus, qui Romæ ante oculos omnium nostrum biennium fere fuisset, is... præcepit provinciâ populi Romani exturbatus est; Antiochus, who (although he) had been two years at Rome etc. Ib. Verr. 2, 4, 30.—Te solitum Romam mittebat, qui eadem scires? Should he have sent you free to Rome, who (although you) had a knowledge of the same things? Ib. Dej. 7, 22 (= He could not have sent you, because etc.).—Ut, qui non satis diu vixerit, Hortensius, tamen hunc cursum confecerit; So that Hortensius, although his life was too short, still has finished this career. Ib. Brut. 94, 326. See Ex. 14-18.—For the combination *qui tamen* see Obs. 12, 5.

Obs. 5. Relative clauses containing a direct or adversative cause, have not always predicates in the subjunctive. If the causal connection is evident, the indicative increases the force of positiveness of the statement, and the relative, in this instance, often has the force of the conjunction *quoniam* (which is not the case, if the relative clause has a subjunctive); as: Constituta respublica videbatur aliis, mihi vero nullo modo, qui (= *quoniam*) omnia te gubernante naufragia metuēbam. Cic. Phil. 2, 36, 92. Comp. Ib. Off. 1, 32, 118; Ib. 3, 29, 104. Thus in clauses denoting adversative cause: Contio quæ ex imperitissimis constat, tamen judicare solet quid intersit inter popularem civem et inter constantem. Cic. Am. 25, 95.—Atticus, qui pecuniam conferre noluerat florenti illi parti, abjecto Bruto HS centum millia muneri misit. Nep. Att. 8, 5.—Sometimes indicatives are used to avoid ambiguities: Clarissimum virum generis vestri nemo reprehendit, qui filium suum viâ privavit. Cic. Sull. 11, 32 (= *although* he deprived; *qui privasset* would make the clause indirect, = censured him for depriving).—Me autem quid pudeat, qui tot annos ita vivo ut etc. Cic. Arch. 6, 12 (= *since* I am living; *qui vivam* would make the clause oblique, = quid pudeat quod vivam, should I be ashamed of living etc.).

Obs. 6. Relative clauses are often used with the force of *Quum*-clauses stating facts lent to a causal *Quod*-clause after a negation, which always requires a subjunctive, since the relative clause is logically negative under an affirmative form (p. 543, Obs. 2; p. 545, Obs. 7). At the same time the clauses explain the cause of the captivity of the soldiers, and also the reason for the following statement: 'Eos senatus non censuit esse redimendos'.

which in the principal sentence are represented according to their inner import and bearing (p. 339, R. 69). Such clauses may be placed in the subjunctive, on account of their causal character ('in as much as'), as: Tarquinio quid impudentius, *qui* bellum gereret cum eis qui non tulerant ejus superbiam? What (= nothing) is more impudent than (the act of) Tarquin who (in as much as he) waged a war with those who had not borne his arrogance? Cic. Tusc. 3, 12.—Marius a fide justitiæque discessit, *qui* optimum civem, cujus legatus esset, in invidiam falso crimine adduxerit; Marius deviated from duty and virtue when he (in as much as he, by the fact that he) by a false charge created hatred against an excellent citizen etc. Ib. Off. 3, 20, 79. See the Ex. p. 425, a, and Ex. 19-21.—But frequently the indicative occurs in these clauses: Errastis vehementer, *qui* (= *quum*, or *quod*) sperastis, vos contra consulem popularem in evertendâ republicâ populares existimâri. Ib. L. Agr. 1, 7, 23.—Ingratus (fuit) L. Sulla, *qui* patriam durioribus remediis quam pericula erant, sanavit. Sen. Ben. 5, 16. Comp. Cic. Sen. 15, 52, where the codd. are divided between '*procrevit*' and '*procreet*'.—See Ex. 22, 23.

Obs. 7. Instead of completing Quod-clauses, dependent on verbs of thanking etc. (p. 388, Obs. 1, b; Obs. 2), which always involve a cause, Qui-clauses are frequently used. These generally have their predicates in the subjunctive: Ego te non reprehendo, *qui* illum ad ædificationem tuam tradideris; I do not blame you for having employed him in your building operations. Cic. Fam. 7, 20, 1.—Dictatorem increpabant, *qui* consulatum... cepisset. Liv. 7, 25.—Miseret tui me, *qui* hunc hominem facias inimicum tibi. Ter. Eun. 4, 7, 32. See Ex. 24-26.—Sometimes, however, if the principal predicate is in the present, such clauses have an indicative, as: Doleo te, cujus in adolescentiam incurrit misera fortuna reipublicæ. Cic. Brut. 97, 331. This is always the case if '*gratiam habere*' (referre) is the principal predicate\*, as: Maximas habeo gratias Pisoni, *qui* non cogitavit etc. Cic. Phil. 1, 7, 15.—Præclarum populo Romæo refert gratiam, *qui* te ad summum imperium exaltavit. Ib. Cæc. 11, 28. Thus Cic. Phil. 10, 1, 1. See Ex. 27, 28. Comp. Cic. Sen. 14.

Obs. 8. A relative clause, dependent on a 'GENERAL ANTECEDENT' (denoting the general idea of persons or things, or of classes of persons or things), may have the double function of DETERMINING the general idea of the antecedent, and of assigning a CAUSE to the principal predicate. Such general antecedents are mostly expressed by the absolute demonstrative *is, ea, id* (rarely by *hic* or *ille*). The predicate of such relative clauses is placed in the SUBJUNCTIVE of CAUSE if the author means to make the causal connection prominent. This kind of causal relative clauses cannot be replaced by clauses introduced by causal conjunctions†. They are mostly used if the principal predicate

\* After '*gratiam habere*' in the present, a subjunctive occurs only for particular reasons, as: Ego vero illi (Lycurgo) maximam gratiam habeo, *qui* me eâ poenâ multaverit quam sine mutuatione possem dissolvere. Cic. Tusc. 1, 42, 100. Here '*multare*' is used in a figurative sense, = eas leges dedit ex quibus multatus essem. If the indicative had been used, the predicate (*multavit*) would mean that Lycurgus performed himself the act of punishing.

† If the demonstrative antecedent is not determined by the relative clause, but has itself an ordinary noun as antecedent, the mood of the relative clause is treated as if its own antecedent were a noun according to Obs. 2. In this instance the demonstratives *hic, ille, iste* are used (rarely *is, ea, id*). See Ex. 5, 6, and the passage Cic. Flacc. 21, 50, quoted Obs. 2.

‡ Relative clauses dependent on the absolute demonstrative *is, ea, id*, belong to very different categories, according to which the moods of the clause are differently treated: 1. They may have the sole function of more or less definitely determining the general idea of the antecedent (Engl. = 'he who', 'those who', 'that which'; but sometimes 'such as', 'a man who', 'things which' etc.). Such clauses have their predicates in the indicative, as: Quid potest desiderare *is* cui omnia contingunt? What can a man desire who succeeds in everything? Sen. Ep. 92.—Non *is* solum gratus esse debet, *qui* accipit, verum etiam *is* cui potestas accipiendi fuit (= he who). Cic. Prov. Cons. 17, 41.—Duces deliguntur *ei* qui unâ cum Sertorio fuerant (= men who). Cæc. B. G. 3, 23.—Sepe homines aut *eos* laudant quos non debent, aut *eos* quos non expedit (= those who, or such as). Cic. Off. 2, 19, 68.—Quo modo geometres cernere ea potest *que* aut nulla sunt, aut inter nosci a falsis non possunt? (= things which). Ib. Ac. Pr. 2, 7, 22.—2. The antecedent *is* may be used to indicate a quality described by the clause. In this instance the rules R. 20 are applied.—3. The clause may have the double function of determining the antecedent '*is*', and of assigning a cause to the principal predicate. In this instance the rules Obs. 8 and Obs. 9 are applied.

Our grammarians have tried to establish another rule. MADVIG, and, after him, MEIRING and others, say that if the demonstrative *is* denotes an indefinite person or thing, the predicate of the relative clause is in the subjunctive, while it is in the indicative if *is* denotes a certain person or thing. But so sweeping a rule, without

belongs to the verbs of praising, censuring etc., mentioned Obs. 7; but they also occur with other predicates; as: *Eorum* constantiam laudamus *qui* non turbulente humana patientur (of those who bear human trials without fretting; i. e. we praise them for bearing etc.). Cic. Tusc. 4, 28, 60.—Ex hoc genere est illud quod tu nuper *ei* qui te rogasset... inquisti; 'Here belongs that answer which you lately gave to one who had asked you etc.', the question being represented as the cause of the answer, or as eliciting it. Cic. Or. 2, 64, 259.—See Ex. 29-33. A general antecedent may also be designated by a noun denoting a whole class of persons or things, as: Habet tamen suos laudatores, *qui* hac ip-sa ejus subtilitate admodum gaudent; Still he has his own admirers, who are greatly delighted by this very nicety of his (they are his admirers, because they are delighted). Cic. Brut. 16, 64.—Oppianicus obsignatores ad eum, *qui* neque Atinium, neque Aviliam nosset, adduxit ('witnesses who were not acquainted etc.'). which fact was the very reason that they were chosen. Cic. Clu. 13, 37. Often relative clauses, dependent on the general antecedent *is* (expressed or understood), have the value of conditional clauses with indefinite antecedents (*is* qui = *si quis*, or = *aliquis, si is*). Such clauses, which always are to the principal predicate in the relation of cause to effect, have sometimes a subjunctive, and sometimes an indicative, as: Non est contra naturam spoliare eum quem est honestum necare (= spoliare aliquem si eum necare honestum est). Cic. Off. 3, 6, 32. But: Neque conamur docere eum dicere *qui* loqui nesciat (= aliquem, si is nescit). Ib. Or. 3, 10, 38.—Nihil est tam alienum ab eo *qui* alterum conjurationis accusat, quam videri conjuratorum poenam lugere (= si quis alterum accusat, nihil est tam alienum ab eo etc.). Ib. Sull. 10, 31. See Ex. 34, 35.

Obs. 9. By a frequent Latin idiom, relative clauses with predicates in the subjunctive, are attached to general antecedents (mostly understood) referring to particular persons mentioned in a previous sentence, in order to intimate that, what is stated in the clause in regard to a particular antecedent, would hold good in regard to any other person or thing in the circumstances mentioned. Such relative clauses have a causal force in regard to the particular person meant; but they imply at the same time a general assertion holding good in regard to all. In English they are mostly expressed by participial constructions, or, if such constructions are not admissible, by relative clauses with indefinite antecedents; as: Verres nauarchos vocari jubet. *Qui* nihil metuerent, nihil suspicarentur, statim accurrunt; Verres had the naval commanders called. Fearing nothing, suspecting nothing, they directly came. Cic. Verr. 2, 5, 41 (the force of this construction may be fully expressed by the addition of the clause 'as every one would do under the circumstances'). The sentence, besides the particular fact, implies also the general assertion '*Qui* nihil metuit etc., statim accurrunt quum vocatus est'.—*Qui* nondum physica didicissent, tantum sibi persuaserant quantum naturâ admonente cognoverant; Having no knowledge yet of physical science, they (referring to the oldest inhabitants of Greece) believed only what they had learned in the school of nature. Cic. Tusc. 1, 13.—*Qui* jam ante inimico in nos animo fuisset, multo gravius hoc dolore exarsit; Having been always (before) of a hostile disposition towards us, he (i. e. Indutimarus) was inflamed into much greater anger by this (new) grievance. Cæc. B. G. 5, 4. (Comp. Ex. 40).—Evensit facile quod dis cordi esset; The gods taking an interest in it, it came readily to pass. (= It came readily to pass, as every thing does in which the gods take an interest). Liv.

any other discrimination, is not warranted by the usage of the Latin authors. In the passages quoted No. 1, the antecedents are certainly 'indefinite', and often correspond to the English indefinite article; still the predicate is always in the indicative. On the other hand in the passages belonging to No. 2 (see R. 20) the antecedent is almost always definite, and yet the subjunctive is used. The same is always the case in the instances falling under the rule Obs. 9.—Madvig tries to establish his rule by the following passages (§ 264, Obs. 1): *Qui* ex ipso audissent quum palam multis audientibus loqueretur, nefaria quedam ad me pertulissent. Cic. Att. 11, 8. Madvig says: '*Qui audissent*' = persons who; such persons as: '*qui audierant*' would mean 'those who' (Thacher improperly renders '*the particular persons who*').—But that the Latins did not make such a distinction, appears from passages like the following: Utrumque *qui* interfuerunt nunc quoque memorant (where the connection shows that '*qui interfuerunt*' cannot mean 'those who were present', but '*persons*' that were present). Tac. H. 4, 81.—Evidently '*audissent*', in the above-mentioned passage is a quasi-oblique subjunctive, '*qui audissent*' being: '*qui dixerant se audisse*' (p. 405, No. 2). At ille, nescio qui, mille et octoginta stadia quod abesset videtur. Cic. Ac. Pr. 2, 25. Madvig says '*Things which were distant*'; '*quod abesset*' would signify '*that which was distant*' (Thacher renders 'some particular thing that was distant'). This subjunctive is explained p. 564, n. †. From the other three passages, quoted there, it appears that Madvig's and Thacher's distinctions are improper. Compare: *Pictor vitel quæ nos non videmus*. Cic. Ac. 2, 27; where the correct *videmus*, according to Madvig's theory, would have to be changed into the improper subjunctive *videamus*.

1, 39.—Pugnatum ab hostibus ita acriter est ut a viris fortibus in extrēmā spe salutis contra eos qui ex vallo et turribus tela jacerent, pugnari debuit ('against adversaries who threw their missiles from the rampart etc.'): this advantageous position being assigned as the cause of the hopeless situation. *Cæs. B. G. 2, 33.* See Ex. 36-42. The same form is used if the cause is *adversative* (Obs. 4.): *Qui septingentis medimnis decidere natus erat, mille promisit: Having refused to pay 700 medimni by way of compromise (i. e. although he would not before pay 700 medimni), he now promised a thousand.* *Cic. Verr. 2, 3, 23.*—Absolvite eum qui se fateatur maximas pecunias cum summā sociorum injuriā cepisse: Acquit a man (referring to Verres), who (i. e. although he) owns to have appropriated immense sums by inflicting the greatest wrong on our allies. *Cic. Verr. 2, 3, 95*; *See Ex. 43-45.*  
—you cannot acquit a man who (i. e. cannot acquit that man, since etc.). See Ex. 43-45.  
—In clauses of this kind as in the instance of Obs. 3, the general antecedent may be expressed by a noun denoting a whole class of persons, to intimate that, what is stated in the clause, would apply to all persons of the same class under the same circumstances, as: *Is rex quem Senatus hoc nomine saepe appellasset, quippe illum ordinem ab adolescentiā gravissimum sanctissimumque duxisset, eidem rebus est perturbatus quibus nos.* *Cic. Dej. 3, 10*; That king who... had from his youth considered the Senate as the most august and sacred body, was led astray etc. i. e. every other king, who would have been in the same relation to the Senate, would have acted in the manner mentioned. See Ex. 46.—Sometimes such clauses have predicates in the indicative, as: *Qui locus quidēis plenissimus fore videbatur, in eo maxime moles molestiarum exstitit.* *Cic. Or. 1, 1, 2.* Comp. with: *Quas ego campus antea viridissimos vidissem, hos ita vastatos vidēbam ut etc.* *Ib. Verr. 2, 3, 18.* See Ex. 47, 48.

Obs. 10. Frequently relative clauses dependent on a noun as antecedent, are in a *logical relation* to a preceding *descriptive adjective*, attributively or predicatively dependent on that antecedent, in which instance the predicate of the clause is generally in the *subjunctive*. Such a logical relation of relative clauses to descriptive adjectives occurs 1. if the clause denotes a *quality* of the antecedent, *coördinate* to another quality expressed by the descriptive adjective; 2. if the clause describes the *manner* in which the action, designated by the adjective, is performed; 3. if the clause expresses *reason*, being represented as *proof* for the truth of the attribution or predication of the descriptive adjective. (See Obs. 2.)

A. If the clause denotes a *coördinate quality*, the subjunctive has the nature of the qualitative subjunctive according to R. 20, the coördination grammatically referring to the syntetic antecedent *is* of the clause, which is either expressed, or (more frequently) understood, and which has the nature of the qualitative *is*, explained p. 561, Obs. 3. Relative clauses of this kind require one of the coördinating conjunctions *et*, *sed*, or *aut*. This form of coördination is extremely frequent in the writers of the silver age, but also occurs in the classical writers. The antecedent, on which both the descriptive adjective and the relative clause are dependent, is most frequently in the relation of a predicate noun, or of an apposition; less frequently in the relation of a subject or object, as: *Est istud grave vitium, et intolerabile, et quod dissociat homines (= et id quod dissociat homines, according to R. 20, Obs. 2, 3.)*; This is a great and intolerable vice, which (or and one that) severs the society of men. *Sen. Ben. 7, 28.*—*Sed id leve est et quod (= et id quod) summam eum stringat*; But this is slight and such as to touch only the outer skin. *Ib. Ep. 72.*—*L. Pinaris erat vir acer, et qui (= et is qui) plus in eo ne posset decipi quam in fide Siculo rum reponeret*; L. Pinaris was a severe man, and so disposed that he placed more confidence etc. or a severe man, placing more confidence etc. *Liv. 24, 37.*—*Cum homine edaci tibi res est, et qui (= et eo qui) jam aliquid intel igit.* *Cic. Fam. 9, 20, 2.*—*Circumsessus es a quibus? A Lampacenis, barbaris hominibus, credo.* *Ib. Verr. 2, 1, 32.*—*Intercessit res parva aut eis qui populi Romani nomen contemnerent.* *Ib. Verr. 2, 1, 32.*—*Intercessit res parva dictu, sed qua studiis in magnum certamen excessit* (but by party-animosity it resulted in a great strife). *Liv. 34, 1.*—*Crebro reficit lippitudo, non illa quidem perniciosa, sed tamen qua impedit scriptio nem meam.* *Cic. Att. 10, 17, 2.*—*Causidicum quendam sequuntur, subilem et elegantem, et qui (= et cum qui) in forensibus causis praestare possit consistere (and able to acquit himself creditably in law cases).* *Cic. Or. 9, 30.*—See Ex. 49-57.—Sometimes these coördinate relative clauses have the syntetic antecedent *quasi* modi, as: *Notarium facimus atque ejusmodi qui uno maleficio seclera omnia complexa esset videtur.* *Cic. R. A. 13, 37.*—Sometimes coördinate relative clauses (but not if they have the syntetic antecedent *is* or *ejusmodi*) are found with predicates in the *indicative*, as: *Hae sunt meae imagines, hae nobilitas non hereditate relicta, sed qua ego plurimis laboribus et periculis quaesivi.* *Sall. Jug. 85, 30.*—*Homo justus, atque quam sententiam virum bonum, nihil cuiquam detrahet.* *Cic. Off. 3, 19, 75.*—*Socrates, vir fortis, et cuius per figuras sermo procedere solitus erat, induit illi nasute negare quam superbe.* *Sen. Ben. 5, 6.*

B. If the relative clause denotes the *MANNER* in which the preceding descriptive adjective is performed, or takes place (*qui* being = *ita ut is*), it cannot be connected with

the adjective by coördinating conjunctions, as: *Hec quum flebilibus modis, qui (ita ut ei) totis theatris maestitiam inferant, concinuntur*; When this is sung in doleful strains, so as to fill whole audiences with sadness. *Cic. Tusc. 1, 44, 106.*—*Multi vulnerati, etiam quos vires sanguisque deserebant, ut intra vallum caderent nitebantur (= etiam ei qui ita vulnerati erant ut eos etc.).* *Liv. 25, 14, Comp. Cic. Verr. 2, 5, 27; ib. 28; ib. 2, 4, 51; R. A. 9, 26.*—See Ex. 52, 53.

C. Relative clauses denoting *proof* with regard to the use of the preceding adjective, do not take coördinating conjunctions, as: *Repente ad me venit Heraclius, homo nobilis, qui sacerdos Jovis fuisset* (the high standing of Heraclius being proved by the fact that he had been a priest of Jupiter.) *Cic. Verr. 2, 4, 61.*—*Iste novus astronomus, qui non tam caeli rationem quam calati argenti duceret* (the clause explaining the reason for applying the attribute *novus* to the noun *astronomus*). *Ib. 2, 2, 5, 2.* Comp. *Cic. Cæc. 7, 18.*—See Ex. 54, 55.

Relative clauses of this kind (C) are mostly used to explain adjectives which, with their governing nouns, form an elliptical exclamation, as: *O virum simplicem, qui nos nihil celat; sapientem, qui servendum necessitati putet!* Oh, for the simple-minded man who does not conceal anything from us! Oh, for the wise man who thinks he must submit to necessity (make the best of it)! *Cic. Or. 69, 230.*—*Me miserum qui non adfuerim!* How unfortunate am I, that I have not been present! *Ib. Fam. 3, 11.*—*O fortunata adolescentem, qui tuae virtutis Homæ præconem invenieris!* *Ib. Arch. 10.*—See Ex. 56-58.

Relative clauses explaining a preceding adjective by adding a proof, often have their predicates in the indicative, as: *Quam rem pauci impedi verunt, cæci avaritiæ, quibus omnia vendere mos erat.* *Sall. Jug. 80, 5.*—*O fortunata mors, quæ naturæ debita pro patriâ est potissimum reddita!* *Cic. Phil. 14, 21.* See *Cic. Or. 3, 27*, and Ex. 59.

If relative clauses referring to preceding descriptive adjectives belong to none of the preceding categories (A, B, C), they have their predicate in the *indicative*, as: *An imitari debemus agros fertiles, qui multo plus efferunt quam acciperunt?* *Cic. Off. 1, 15, 48* [Here the clause contains a *quality* of the *agri fertiles*, but not a *quality* of the 'agri', coördinate to *fertiles*]. See Ex. 60.

Obs. 11. Relative causal clauses frequently assign a cause to some intermediate predicate in the mind of the author, which must be supplied, in order to account for the use of the subjunctive, as: *Oppianicus L. Clodium, pharmacopolum circumforaneum, qui casu tum Larinum venisset, aggreditur, et cum eo...transigit; Oppianicus applied to Clodium, a peddler in drugs, who had just come by chance to Larinum, and concluded the bargain with him.* *Cic. Clu. 14, 40* (The intermediate fact is 'Oppianicus made use of his casual presence, and concluded etc.').—*Quod quum percrebrisset, Pythius quidam, qui argentarium faceret Syracusis, ad cenam Canium invitavit.* *Cic. Off. 3, 14, 58.* (The intermediate fact is that Pythius, in consequence of his business as money-broker, 'easily became acquainted' with Canius as a foreign resident, so that he might claim the right to invite him to dinner).—*Qui per tot annos Hieronem et Gelonem nec vestis habitu, nec alio ullo insigni differentis a ceteris vidissent, conspexere purpuram ac diademata.* *Liv. 24, 5.* (The Syracusians 'were amazed' to see purple and diadem, since they had never seen such badges of royalty even with their own kings).—*Socii navales, ad depopulandum agrum Nucernum profecti, proximis raptim vastatis, unde reditus tutus ad navales esset, longius progressi, excivere hostem.* *Liv. 9, 38.* [= The crews of the ships rapidly plundered the region next to the shore 'by which they exposed themselves to no danger', since they could safely return from there to their ships; but, going farther, they aroused the enemy].—*Sthenius, qui Romam pervenisset, omniaque habuisset equiora et placabiliora quam animum prætoris, rem ad amicos suos detulit.* *Cic. Verr. 2, 2, 38.* (Supply 'non parvit prætori', to which the relative clause 'qui pervenisset, et habuisset' assigns the cause).—*Homo, qui semper ita palam dicebat, pupillos certissimam prædam esse prætoribus, optatum negotium sibi in sinum oblatum esse dicebat.* *Cic. Verr. 2, 1, 50* (Supply: 'Mirum non est, Verrem dixisse, optatum negotium etc.' To this the Qui-clause assigns the reason).—*Diploma statim non est datum, quod est mirifica improbitas in quibusdam, qui tulissent acerbis veniam tibi dari.* *Cic. Fam. 6, 12, 3.* Here after 'quibusdam' the connecting link 'who caused this delay' must be understood, the reason of which action is explained by the relative clause.

Sometimes a subjunctive is used in a relative clause, to represent it as a cause for statements, contained in subsequent sentences, as: *Atqui ille apud Accium pastor, qui navem nunquam ante videret, ut procul vehiculum Argonautarum conspexit, hoc modo loquitur: etc.* *Cic. N. D. 2, 35, 89.* Here the relative clause (= 'being a man who had never seen a vessel before'), explains the import of the remarks quoted in the subsequent passage.—*Hujus provinciae, quæ ex hoc genere varietate constaret, Fontejus præfuit.* *Cic. Fontej. 6, 13.* (Here the subjunctive foreshadows the future argument which the

\* Here the connecting link 'which were so situated that they could safely retreat' might be supplied, which would make the relative clause a clause of manner.

author is going to derive subsequently from the 'variety of the inhabitants' in favor of the accused\*).

Sometimes relative clauses have the subjunctive on account of some inner connection of the fact stated in it with the facts of the principal sentence, the nature of which connection is left unexplained, as: *Mirabile quod eo ipso tempore quo fletur indicium conjuratiōis, signum Jovis collocabatur*. Cic. Div. 2, 20, 46. Here the coincidence of time of the facts in both propositions, is represented as a proof that there must be some inner connection between them.

Obs. 12. Frequently causal relative clauses are used in connection with conjunctions and particles. Such combinations are *quippe qui, ut qui, utpote qui, praesertim qui*, and, for adversative cause, *qui tamen*.

1. *Quippe qui* (= since he, since they, since I, etc.) represents the principal sentence as a self-evident consequence of the facts stated in the clause. Cicero always uses the *subjunctive* in clauses introduced by *quippe qui*. In anteclassical style these clauses are generally, in Livy often, and in Sallust always, construed with the *indicative* † (in Caesar the combination *quippe qui* does not occur): *Hos libros non contemno quippe quos numquam legerim*. Cic. Tusc. 2, 3, 7.—*Convivia cum patre non infbat Roscius, quippe qui ne in oppidum quidem, nisi perraro, veniret*. Ib. R. A. 18. But: *Quippe qui certo scio*. Plaut. Truc. 1, 1, 49.—*Quo maturius Persens hostis judicabatur, quippe quem per omnia grasari scelera vitabant*. Liv. 42, 18.—*Imperator omnis fere res asperas per Jugurtham agere, quippe cujus neque consilium, neque inceptum ullum frustra erat*. Sall. Jug. 7, 6. So in Liv. 8, 26; Sall. Cat. 13, 2; 48; Jug. 1, 3; 14, 10, and often.—See Ex. 61–63.—Sometimes, in place of a relative clause, a participial clause is combined with *quippe*, as: *Est hoc haud nimis amplum, quippe concedentibus Romam caput Latii esse (= nobis amplum, quippe qui concedamus)*. Liv. 8, 4.

2. *Ut qui* has arisen from *ut is qui* = 'as a man (would do) who etc.'; as: *Ad eum venit Dejotarus evocatus ut is qui senatus parere didicisset, as a man (would do) who had learned to obey the Senate*. Cic. Dej. 5, 13. This 'is' is almost always understood, and generally represents the clause as applying to every one besides the antecedent, under the circumstances mentioned in the clause. Clauses introduced by *ut qui* have always the *subjunctive*; but the construction (except in its original form with *ut is qui*), does not occur in Cicero. *Ut qui* is generally rendered by 'since he, they, etc.', or by a participial construction, as: *Tarquinius ad jus regni nihil praeter vim habebat, ut qui neque populi iussu, neque auctoribus patribus regnaret*. Liv. 1, 49. See Ex. 64, 65.—Sometimes (with negative clauses) *ut qui* is used in the meaning 'although', as: *Nam, ut qui ne alteri quidem exercitui se ad certamen credidissent pares...*, advenientem Marcium aggrediuntur. Liv. 9, 43. Sometimes it has the force 'as if he etc.', as: *Primā luce sic ex castris proficiscuntur, ut quibus esset persuasum* (as if they were assured, i. e. 'as persons would act who are assured etc.'), non ab hoste, sed ab homine amicissimo consilium datum. Caes. B. G. 5, 31. In this sense *velut qui, quasi qui, tamquam qui*, are sometimes used: *Tarentini, velut destituti, ac non qui ipsi destituisent, increpare Palaeopolitānos*. Liv. 8, 27.—*Meo allegatu venit, quasi qui aurum mihi ferret abs te*. Plaut. Trin. 5, 2, 18.—*Alius accipit fastidiose, tamquam qui dicat etc.* Sen. Ben. 2, 24.

3. *Utpote qui* has the force of *ut qui* ('since he' etc.), being construed with the *subjunctive* ‡: *Lucius, frater ejus, utpote qui peregre depugnaret, familiam ducit*; His brother Lucius, since he has done fighting abroad, is at the head of his household. Cic. Phil. 5, 11, 30.—*Utpote qui* is sometimes used = *ita ut, or ita si*, in the meaning 'provided that': *Similiorem mulierem magisque eandem, utpote quae non sit eadem, non reor deos facere posse*. Plaut. Mil. 2, 6, 49.

4. *Praesertim qui* (= *praesertim quum is*, etc.; especially since he, you etc.), in classical language, is construed with the *subjunctive*: *Nemo adfuit, ne hic quidem Hortensius, praesertim qui illum solus antea de ambitu defendisset*. Cic. Sull. 2, 6.—*Valde metuo ne*

\* This and the previous sentence, and many similar passages, are generally understood as equivalent to *Ut*-clauses of quality (although *Ut*-clauses could not be used in their place). Such explanations explain nothing, since the question will arise, *why* the author conceived such clauses as qualitative *Ut*-clauses, and *why*, for instance, in a relative clause immediately preceding the last passage, which expresses exactly the same thought, an *indicative* is used (Gallie Fontējus praefuit, quae constat ex eis generibus hominum qui etc.). The reason that in this relative clause the *indicative* is used, is evidently because here the author states a mere fact, while in the next passage (quoted in the text) he repeats the same fact in order to show its importance for the subsequent defence.

† In Cic. Mil. 18, 4 (*quippe qui* obvious ei futurus non erat) the reading is doubtful.

‡ Livy uses the *indicative* with *quippe qui* about as often as the *subjunctive*. The *subjunctive* occurs for instance in 21, 60; 26, 31; and 37, 20.—For particulars about the use of *quippe* see p. 688 foll. For the derivation of *quippe* see p. 708.

§ In Cic. Att. 2, 24, 4 (*Utpote qui nihil contemnere solemus*), the reading is doubtful.

*frigeas in hibernis, praesertim qui sagis non abundas*. Ib. Fam. 7, 10, 2. See Ex. 66.—With the *indicative*, it sometimes occurs in Plautus, as Rud. 2, 1, 2.

5. *Qui tamen* generally represents the *principal sentence* as 'concessive' in regard to the clause, being rendered by 'who however', 'which however', or by 'although', with restrictive meaning, as: *Perturbat me etiam illud interdum, quod tamen, quum te penitus cognovi, timere desino*; Sometimes this, too, disturbs me, *which, however*, I cease to fear when I thoroughly examine your character. Cic. Dej. 2, 4 (= although it disturbs me, I cease to fear when etc.).—Sometimes a clause introduced by *qui tamen* has the force of a concessive parenthetical sentence, restricting the predication of the principal sentence by a 'concession', similarly to *quamquam* if used as co-ordinating conjunction (See 'Concessive clauses'); as: *Alter, qui tamen se continerat, senerat tantum aliud atque homines expectabant*; The other one, although (I cannot deny that) he had restrained himself, only felt differently from what men expected. Cic. Sest. 53, 114.—Sometimes *qui tamen* approaches the meaning of a concessive subordinating conjunction (almost = *etsi*), as: *Caesar dixit, ejus hostis periculum factum esse nuper in Italiā, servili tumultu, quos tamen aliquid usus ac disciplina, quae a nobis accipissent, sublevarent*; That this enemy had been lately tested in Italy in the war with the slaves, although these had the advantage etc. Caes. B. G. 1, 40.—*Qui tamen* generally stands with the *indicative*, unless the relative clause as such requires the *subjunctive*, as: *Fuit mirificus in Crasso pudor, qui tamen (= ita tamen ut is) non modo obsessus ejus orationi, sed etiam prodesset*. Cic. Or. 1, 26, 122.—*Si vetustum verbum sit, quod tamen (= ita tamen ut id) consuetudo ferre possit*. Ib. 3, 43, 170.

1. Homo, qui semper hospitalissimus nostrorum hominum existimatus esset, noluit videri Rubrium invitum domum suam recepisse. Cic. Verr. 2, 1, 26.—2. Habonius, qui legem nosset, et qui non putaret sibi expedire ita accipere, negat id sibi deberi. Ib. 2, 1, 51.—3. Neque spes veniae ab Scipione erat Celtiberis, quem, bene meritum de se, in Africam oppugnatum venissent. Liv. 30, 8.—4. Itaque jam in Tusculano, qui non meminissent, me jam usum isto proemio, conjecit id in illum librum quem tibi misi. Cic. Att. 16, 6, 4.—5. I-te, qui jam illum praedam devorasset, commotus est. Ib. Verr. 2, 1, 51.—6. Volcatius animo requissimo nummos affert, qui nihil amitteret. Ib. 2, 23.—7. Inde barbari dissipati, quibus nec certa imperia, nec duces essent, vertunt impetum in suos. Liv. 7, 24.—8. Tum demum Titurinus, qui nihil ante providisset, trepidare et concurrere; at Cotta, qui cogitasset haec posse accidere, nulla in re communi saluti deerat. Caes. B. G. 5, 33.—9. Primo mirantur omnes improbitatem, deinde, qui istum nosset, videbant adjectum esse oculum hereditati. Cic. Verr. 2, 2, 15.—10. Atticus multorum consulum praefecturas delatas sic accepit ut neminem in provinciam sit consecutus; qui ne cum Quinto quidem Cicerone voluerit ire in Asiam. Nep. Att. 6.—11. Hannibal prius animam quam odium erga Romanos deposuit; qui quidem, quum patriā pulsus esset, numquam destitit animo bellare cum Romanis. Ib. Hann. 1, 3.—12. Satin' tu sanus mentis, qui conditionem hanc repudies? Plaut. Trin. 2, 4, 54.—13. Neque hoc fugit sapientissimum regem Philippum, qui Aristotelem Alexandro filio doctorem accierit. Cic. Or. 3, 35, 141.—14. Ego, qui ab ineunte aetate incensus essem studio Crassi, verbum ex eo numquam elicere potui de ratione dicendi. Ib. 1, 21, 97.—15. Statuae, quae illius causae nihil prodessent, reponuntur. Ib. Verr. 2, 2, 67.—16. Sulpicius, qui in eadem invidiae flamma fuisset, hos in tribunatu spoliare instituit. Ib. Or. 3, 3, 11.—17. Ego, qui in foro judicioque ita verser ut nemo plures causas defenderit, et qui omne tempus in his studiis consumam, tamen quo die mihi dicendum sit, non solum commoveor animo, sed etiam toto corpore perhorresco. Ib. Caec. 13, 41.—18. Itaque, qui in maximā celebritate atque in oculis civium quondam vixerimus, nunc abdimus nos, quantum licet. Ib. Off. 3, 1, 3.—19. At stulte fecit (Regulus) qui non modo non censuerit captivos redimendos, verum etiam dissuaserit. Ib. 3, 27, 101.—20. Sed tu in re militari multo es cautior quam in advocatibus, qui neque in Oceano natāre volueris, neque spectare essedarios. Ib. Fam. 7, 10, 2.—21. Ego stulta multum, quae cum hoc insano fabulem. Plaut. Mil. 2, 4, 18.—22. Corporis nostri magnam naturā videtur habuisse rationem, quae formam nostram, in qua esset species honesta, eam posuit in promptu. Cic. Off. 1, 35, 126.—23. Credo ego miseram fuisse Penelopam, quae tamdiu viro suo caruit. Plaut. Stich. 1, 1, 1.—24. Sic vestra ista providentia reprehendenda, quae rationem dederit eis quos scierit ea perverse usuros. Cic. N. D. 3, 31, 78.—25. Illi Sacerdotes execrabantur, qui verrem tam nequam reliquisset. Ib. Verr. 2, 1, 46.—26. Homo Ligurem accusare cepit, qui tam diligens, tam attentus esset. Ib. 2, 1, 48.—27. Maximam tibi gratias habere debemus, qui ne minimam quidem moram interposu-

<sup>1</sup> The most hospitable toward our citizens.—<sup>2</sup> although he had well deserved of them.—<sup>3</sup> I inserted it in that book which etc.—<sup>4</sup> in your law-practice. Cicero wrote this letter to the lawyer Trebatius, who took part in Caesar's Gallic war, but did not go with him to Britain.—<sup>5</sup> an ironical allusion to the British charioteers, *spectare* being generally used of gladiatorial shows.—<sup>6</sup> a boar, being an allusion to Verres's name.

*istū* quin maximo gaudio frueremur. Ib. Ph. 10, 1, 1.—28. Bonam est quod habeas gratiam mihi. *qui* te ex insulso salum feci operā meā. Plant. Rud. 2, 6, 33.—29. Duces eos ludavistis *qui* contra illum bellum suscepissent. Cic. Ph. 5, 2, 3.—30. Socrates *eis qui* hæc, quæ nunc no-querimus, tractarent, commune nomen (philosophorum) eripuit. Ib. Or. 3, 16, 60.—31. Homo, inimicus *his qui* recitassent<sup>1</sup>, hostis omnibus *qui* acclamassent<sup>2</sup>, exarsit iracundiā. Ib. Verr. 2, 2, 20.—32. Non ingrati, sed miseri (erant ei) *quibus* red dere salutem, a quo acceperant, non liceret. Ib. Sest. 57, 122.—33. *Qui* potest temperantiam laudare *is qui* ponat summum bonum in voluptate? Ib. Off. 3, 33.—34. Hæc *qui* videat, nonne cogatur confiteri deos esse? Ib. N. D. 2, 4.—35. Has epistolas *qui* legat, non multum desideret historiam illorum temporum. Nep. Att. 16, 3.—36. *Qui* adolescentis nihil nisi gravissime fecerit, se eā ætate saltavit? Cic. Dej. 9, 27.—37. *Qui* ex calamitate senatoris P. R. spolia domum referre ausus sit, is ullam calamitatem poterit deprecari? Ib. Verr. 2, 1, 59.—38. Cupiditates *qui* possunt esse in eo *qui* ruri semper habitavit? Ib. R. A. 14, 39.—39. Non illo otio fruor quo debēbat *is qui* quondam peperisset otium civitati. Ib. Off. 3, 1, 4.—40. Hæc impulsu occasione, *qui* jam ante se P. R. imperio subjectos dolerent, liberius atque audacius de bello consilia infra incipiunt. Cæs. B. G. 7, 1.—41. In eo *qui* ad D. Brutum obsidione liberandum profectus sit, timere non debētis, ne memoria maneat domestici doloris. Cic. Ph. 5, 18, 51.—42. Quia *qui* barbaros homines ad bellum impulisset, non debēbat minuere illorum suspicionem. Ib. Sull. 13, 36.—43. *Qui* chirographa<sup>3</sup> Cæsaris defendisset, lucri sui causā, is leges Cæsaris, eaque præclaras, ut rempublicam concutere possit, evertit. Ib. Ph. 2, 42, 109.—44. *Qui* in suā re fuisset egenti-simus, erat insolens in aliēnā. Ib. R. A. 8, 32.—45. Et *qui* se artem dicendi tradidit etiam ceteris profectus, ipse omnibus iudiciis victus est. Ib. Flacc. 18, 42.—46. Prope inspectantibus vobis classis *ea cui* consul P. R. prepositus esset, a prædonibus capta est. Ib. L. M. 12, 33.—47. Mihi periculum accidit, tantam temeritatem fuisse in eo adolescente *cujus* ego salutem duobus capitis iudiciis defendi. Ib. Fam. 3, 10, 5.—48. *Qui* reus pridie jam ipse se condemnatum putabat, is posteaquam defensor ejus consul est factus, absolvitur. Ib. Verr. 1, 7, 20.—49. Oratorem perfectum, et cui nihil admodum desit, Demosthenem facile dixeris. Ib. Brut. 9.—50. Legioni Messalla præerat, claris majoribus, egregius ipse, et *qui* solus ad id bellum artis bonas attulisset. Tac. H. 3, 9.—51. Tynēta abest a Carthagine XV millia passuum, locus quum operibus, tum suapte naturā tutus, et *qui* a Carthagine conspici et præbere ipse conspectum in mare urbi possit. Liv. 30, 9.—52. Erant in eā legione fortissimi viri, centuriones, *qui* (= ita fortes ut) jam primis ordinibus appropinquarent. T. Pullo et L. Vorenus. Cæs. B. G. 5, 44.—53. Me impedit pudor ab hominum omnium gravissimo, *qui* genus hujusmodi disputationis semper contempserit, hæc exquirere. Cic. Or. 1, 35.—54. Est vera lex recta ratio, naturæ congruens, constans, sempiterna, quæ vocet ad officium iubendo, vetando a fraude deterreat. Ib. Rep. 3, 22.—55. Roscius hunc miserum, *qui* nondum paterno funeri iusta solvisset<sup>4</sup>, ejecit. Ib. R. A. 8, 23.—56. O miserum senem, *qui* mortem contemnendam esse in tam longā ætate non viderit! Cic. Sen. 19.—57. O magna vis veritatis, quæ contra hominum calliditatem facile se per se ipsam defendat! Ib. Ciel. 26.—58. Me cæcum *qui* hæc ante non viderim! Ib. Att. 10, 1.—59. O solem ipsum beatissimum, *qui*, antequam se abderet, fugientem vidit Antonium! Ib. Ph. 14, 10, 27.—60. Quintus etiam Cæpio (in numero disertorum est habitus), vir acer et fortis, cui fortuna belli crimini, invidia populi calamitati fuit. Ib. Brut. 35, 135.—61. Mihi quidem pestifera videtur tribunicia potestas, quippe quæ in seditione et ad seditionem nata sit. Ib. Leg. 3, 8.—62. Nullas res habeo litteris dignas, quippe cui nec quæ accidunt, nec quæ aguntur illo modo probentur. Ib. Att. 11, 4, 1.—63. Plurimum terroris Romam celeritas hostium tulit, quippe quibus ægre ad undecimum lapidem occursum est. Liv. 5, 37.—64. Aequorum exercitus, ut *qui* permultos annos imbelles egissent, sine ducibus certis, sine imperio trepidare. Liv. 9, 45.—65. Igitur pro se quisque iermes, ut quibus nihil hostile suspectum esset, in agmen Romanum ruebant. Ib. 30, 6.—66. Veritus est ne hostium impetum sustinere non posset, præsertim quos recenti victoria efferri sciret. Cæs. B. G. 5, 47.

## IV. LOCATIVE CLAUSES.

§ 616. LOCATIVE CLAUSES are those introduced by one of the locative adverbs of the interrogative or relative form (*ubi*, *unde*, *quo*, *qua*, *ubicun-*

<sup>1</sup> Who had read the report.—<sup>2</sup> who had shown their approval of it by their clamor.—<sup>3</sup> i. e. Deiotarus.—<sup>4</sup> meaning Verres.—<sup>5</sup> referring to S. Roscius.—<sup>6</sup> referring to the speaker. = 'Since I have given peace to the community, I ought to enjoy it myself'.—<sup>7</sup> referring to Octavianus.—<sup>8</sup> the autograph notes left by Cæsar.—<sup>9</sup> had performed his duties in regard to his father's funeral.

*que* etc., see p. 215, R. 3. 4; p. 216), according to which they belong either to the INTERROGATIVE or to the RELATIVE clauses.

Obs. 1. RELATIVE locative clauses are either in the relation of *adverbial object-clauses* (p. 482, C), or in that of *attributive clauses* (Obs. 2). The former (locative adverbial clauses) have the grammatical value of an object of PLACE (p. 215), determining the local relation of the principal predicate. Their syndetic antecedents (expressed or understood) are the *demonstrative locative adverbs* (i. e. those of the definite form: *ibi*, *inde*, *eo*, *ed*, see p. 216, 2). The relative locatives may be either in the same adverbial case as the syndetic antecedent (*ibi ubi*, *inde unde*, *eo quo* etc.), or their cases may be different (*ibi unde*, *inde ubi*, *ibi quo* etc.); as: Nulla est laus *ibi* esse integrum *ubi* nemo est qui aut possit aut conetur corrumpere; it is no praise to be incorrupt *where* there is nobody who can or dare corrupt. Cic. Verr. 1, 16.—*Ubi* libido dominatur, innocentia leve præsidium est. Ib. Or. 65, 219.—Ejici est, *inde* repelli *unde* invitus recedas. Sen. Ep. 54.—Major pars hominum *eo* deterri solet *quo* a natura ipsa deducitur. Cic. Off. 1, 41, 147.—*Quā* triduo ascenderat, (*eā*) biduo est degressus; *By the way on which* it took him three days to ascend the mountain, he descended in two. Liv. 40, 22.—Palæopolis fuit haud procul *inde ubi* nunc Neapolis sita est; Palæopolis was not far from *where* now Neapolis lies (= from the present site of N.). Liv. 8, 22. See Ex. 1-6.—Indefinite-relative adverbs either take no syndetic antecedents, or the ordinary demonstrative locatives, as: *Ubi* cunque homo est, *ibi* beneficio locus est. Sen. Vit. B. 24.—Romam se ire significabant, *quacunque* ibant, immensum obtinentes loci. Liv. 5, 37. See Ex. 7.—The relative locative adverbs may be replaced by attributive phrases with the noun *locus* to which they are equivalent (*quo in loco*, *quem in locum*, *quo ex loco* etc., see p. 215, R. 4) as: Quum viderent *quo in loco* (= *ubi*) antea, qui sociis injurias fecerant, accusari et condemnari solēbant, *ibi* esse palam posita ea quæ a sociis ablata essent. Cic. Verr. 2, 1, 22. Instead of '*quo in loco*', the mere ablative (*quo loco*) is often used: Hannibal, *quo* constituerat loco (= *ubi* constituerat), quinque milia ferme ab urbe posuit castra. Liv. 27, 16.

Obs. 2. ATTRIBUTIVE locative clauses describe the local relations of an ordinary substantive which is the grammatical antecedent of the relative adjective, implied in the locative adverb. The antecedents of such clauses are either names of cities, or proper names denoting other localities, or common nouns denoting places.

A. If relative clauses with the name of a city as grammatical antecedent, are introduced by those prepositions which, according to § 455, would require names of cities to be placed in the genitive, accusative, or ablative, without a preposition (as 'locative cases'), the relative *always* takes the form of a *locative adverb* (*ubi* = in which; *quo* = to which; *unde* = from which), as: Tarquinienses Volscorum bello ad Anxur, *ubi* (not '*in quo*') præsidium obsidebatur, occupatos videbant Romanos. Liv. 5, 16.—Tantum terroris fuit Romæ, *quo* (not '*ad quam*') multiplex fama pervenerat; So great a terror was at Rome, *to which* (city) many rumors had found their way (*where* many rumors had arrived). Liv. 5, 18.—Maxima pars Vejos profugit, *unde* ne nuntius quidem cladis Romam est missus, *whence* (from which city) not even a messenger was sent to Rome to carry the intelligence of the defeat. Liv. 5, 38.—Often the antecedent denotes the *inhabitants* of the city, while the relative refers to the city as a *place*. In this instance, the relative likewise takes an adverbial form, as: Bellum cum Volturnensibus exortum, *quo* exercitus duci nequiverit. Liv. 5, 31.—Adsunt Athenienses, *unde* humanitas, doctrina, etc. in omnis terras distributæ putantur. Cic. Flacc. 26, 62.—See Ex. 8, 9.

B. Relatives generally take an adverbial form in place of relative adjectives dependent on those prepositions which correspond to any of the four locative adverbial cases, if their antecedent is any proper name denoting localities, as mountains, countries, castles, etc. (where often the name of the inhabitants is used instead of the place), as: Iter per Alpēs, *quo* magno cum periculo mercatores ire consueverunt, patefieri volēbat. Cæs. B. G. 3, 1.—Accepimus, statuam in Aventinum, *quo* vota Romani dictatōris vocaverant, perlatam, *ubi* templum ei postea Camillus dedicavit. Liv. 5, 22.—Qui in Sallentinis, aut in Bruttis prædia habent, *unde* vix ter in anno audire nuntium possunt. Cic. R. A. 46, 132.—Instead of these local adverbs, equivalent attributive phrases with '*locus*' frequently occur, as: Venit ad castellum Axiam, *ex quo loco* fundus is de quo agitur non longe abest. Cic. Cæc. 7, 20.

C. The same 'locative' adverbial form of relatives is often used when the antecedent is a common noun denoting locality (as *locus*, *urbs*, *regio* etc.), as: Intelligēbat, in *eis locis* sibi bellum gerendum *ubi* L. Valerius legatus interfecus esset. Cæs. B. G. 3, 20.—Videtisne hoc totum nomen, coram *ubi* facit delatum, esse in litura? Do you not see that the whole *passage*, *where* he says that the complaint was made in person, shows the marks of erasure? Cic. Verr. 2, 2, 42.—Ex *eis oppidis qua* ducebantur; From those towns *through which* they were conveyed. Ib. 2, 5, 26.—Vadis Rhodani *quā* minima altitudo fluminis erat: by the fords of the Rhodanus, *where* (i. e. 'through which') the

water had the least depth. Cæs. B. G. 1, 8.—See Ex. 10-12.—But the use of relative adjectives with such antecedents is as frequent as that of the locative adverbs, as: Mox redacti ad eum locum in quo (or ubi) commissa pugna erat. Liv. 10, 36.—Eis regionibus quibus (or quâ) nos iter facturos cognoverat. Cæs. B. G. 5, 19. The use of locative adverbs, however, is necessary if the local antecedent is expressed by an absolute adjective, as: Ad extremum provinciae Galliae ubi (not in quo) castra Marcellus habebat; To the extreme boundaries of Gaul where (or at which) Marcellus had his camp. Liv. 40, 16.

D. If relative clauses refer to persons as antecedents, the relative may take an adverbial locative form, if by the relative the place is meant where the persons are staying, as: Rem ad patres conscriptos detuli, quo quum Catilina venisset, quis eum senator appellavit? Cic. Cat. 2, 6, 12.—But, even if the relative has no local meaning, locative adverbs are sometimes used in place of prepositional relative adjectives. This, however, is confined to the adverb unde, as: Quodsi saltatorem avum habuisses, neque eum virum unde (= ex quo) pudoris pudicitiaeque exempla peterentur, tamen etc. Cic. Dej. 10, 28. See Ex. 13, 14.—Rarely ubi, with reference to persons, is used in the meaning 'apud quem', as: Neque adhuc præter te quisquam fuit ubi nostrum jus contra illos obtineremus. Cic. Quinct. 9.

Obs. 3. The mood of locative relative clauses is determined by the rules referring to relative clauses in general (§ 614, 615), both in respect to the subjunctive of non-reality (Ex. 15-17), and the gnomic subjunctive (Ex. 18). In the case of the subjunctive of adaptedness and purpose, the antecedent locus, implied in the locative form of the relative, is omitted in the same way as the antecedents of relative adjectives, as: Habes (i. e. locum) ubi ostentes tuam illam præclaram patientiam frigoris etc. Cic. Cat. 1, 10, 26.—Effecerunt ut esset (i. e. locus) ubi tegimenta præpendere possent. Cæs. B. C. 2, 9.

Obs. 4. INTERROGATIVE locative clauses, which (according to p. 482 foll.) are either subject-clauses, or object-clauses, must always have their predicates in the subjunctive, according to the general rules on interrogative clauses (p. 390, foll.), as: Istud non beneficium sed fenus est, circumspicere, non ubi optime ponas (i. e. beneficium), sed ubi questuosissime habeas, unde facillime tollas. Sen. Ben. 4, 3.

1. Obsecrat animos fortuna ubi vim suam ingruentem refringi non vult. Liv. 5, 37.—2. Ubi cuique valles abdita spem salutis aliquam offerēbat, (ibi) considerat. Cæs. B. G. 6, 34.—3. Ibi cognoscit, LX navis eodem, unde erant profectæ, revertisse. Ib. 5, 5.—4. Ibis tandem aliquando quo te jam pridem ista tua cupiditas effrenata ac furiosa rapiēbat. Cic. Cat. 1, 10, 25.—5. Hæc exsecratus in se hostisque, quâ confertissimam cernēbat Gallorum aciem, concitat equum. Liv. 10, 28.—6. Retulerunt, eo se progressos unde in omnis partibus circumspicere esset. Ib. 10, 34.—7. Ad virtutem eundem est, quocunque vocāvit, quocunque misit, sine respectu rei familiaris. Sen. Ben. 4, 1.—8. Labienus revertitur Agedicum, ubi impedimenta totius exercitus relicta erant. Cæs. B. G. 7, 62.—9. Lilybæum, unde digressa est oratio, revertamur. Cic. Verr. 2, 4, 16.—10. Loca superiora, unde erat propinquus despectus in mare, ab exercitu tenebantur. Cæs. B. G. 3, 14.—11. Ad castra Samnitium perrexit, quo multitudo omnis consternata agebatur. Liv. 10, 29.—12. Tantis sceleribus notatus es, ut omnem locum quo adisses, exilii similium redderes. Cic. Dom. 27, 72.—13. Quasi jam divinarem, illo extincto, fore unde dicerem neminem. Ib. Sen. 4, 12.—14. (Ita) ut, qui eum necasset unde ipse natus esset, careret eis rebus omnibus ex quibus omnia nata esse dicuntur. Ib. R. A. 26, 71.—15. An vero ullam oram tam desertam putatis, quo non illius diæ fama pervenerit? Ib. Leg. M. 15.—16. Quid erat in terris, ubi in tuo pedem poneret? Ib. Phil. 2, 19, 48.—17. Tum sibi M. Pisonis domum, ubi habitaret, legerat. Ib. 2, 25, 62.—18. Veluti ex composito ibi obviam habuere hostem, ubi et intrare ac vastare ipsi Samnitium agrum prohiberentur, et regredi inde in pacata, sociorumque P. R. finis, Samnitium prohiberent. Liv. 10, 32.

#### ENGLISH EXERCISES.

I. INDEFINITE RELATIVES (R. 4, Obs. 9).—1. I shall send you<sup>1</sup> all the books<sup>2</sup> on this subject<sup>3</sup> I can discover<sup>4</sup> in my library.—2. All the soldiers<sup>5</sup> that survived<sup>6</sup> after<sup>7</sup> the rout, retreated to their former<sup>8</sup> camp.—3. The general sent a foraging party<sup>9</sup> to the surrounding country<sup>10</sup> to<sup>11</sup> collect<sup>12</sup> all the corn that was left<sup>13</sup> after the depredations<sup>14</sup> of the enemy.—4. I wish you would employ all the time that will be at your disposition be-

<sup>1</sup> Where was a place etc.—<sup>2</sup> in your own (property).—<sup>3</sup> a subjunctive of quality, according to R. 20 (= prohibebantur vastare agrum ubi hosti obviam venerant).—<sup>4</sup> instead of *et unde*, according to p. 474 Obs. 7, fin.—<sup>5</sup> Render: *You will have*.—<sup>6</sup> = whatever of books.—<sup>7</sup> res.—<sup>8</sup> investigare.—<sup>9</sup> superesse.—<sup>10</sup> § 444, R. 52.—<sup>11</sup> superior.—<sup>12</sup> frumentatōres.—<sup>13</sup> surrounding country, agri.—<sup>14</sup> qui.—<sup>15</sup> colligere.—<sup>16</sup> reliqui esse ex.—<sup>17</sup> populatio.

fore<sup>1</sup> entering upon your official duties, to acquire that knowledge without which you cannot successfully perform your duties.—5. I wish you would enter upon<sup>2</sup> this business with the understanding<sup>3</sup> that I will myself do<sup>4</sup> what [pari] of it you might leave<sup>5</sup> unfinished.—6. Examine<sup>7</sup> the man in whatever way<sup>8</sup> you can.—7. In whatever way we may shape our actions<sup>9</sup>, yet that which is to be, will happen<sup>10</sup>.—8. The consul ordered<sup>11</sup> the lictor to hurry to execution<sup>12</sup> whomsoever of<sup>13</sup> the crowd he would designate<sup>14</sup> by [a motion of] his eyes.—9. I beg<sup>15</sup> [you] would remember this, that, whatever words you use<sup>16</sup> in your letter, you will certainly offend his feelings<sup>17</sup>.—10. Whichever of the two parties<sup>18</sup> will be victorious in this war, we will be lost<sup>19</sup> at all events<sup>20</sup>.—11. How great so ever his poverty was, he still preserved his integrity<sup>21</sup>.—12. All his silver and gold, whatever its amount<sup>22</sup> was, he placed<sup>23</sup> at the disposition of the republic.—13. Oil never takes<sup>24</sup> the taste<sup>25</sup> of salt, whatever<sup>26</sup> quantity you may add<sup>27</sup>.—14. He gave what he could, however little it may have been.—15. If [there] will be anything, of whatever kind it may be, I wish you would write [it].—16. I cannot attack<sup>28</sup> a man<sup>29</sup> who always treated<sup>30</sup> me with the greatest kindness<sup>31</sup>, whatever his [other] qualities<sup>32</sup> may be.—17. Try<sup>33</sup> to return to Rome before the first of next month<sup>34</sup>, wherever I may be [at that time].—18. Our citizens have committed<sup>35</sup> to their government<sup>36</sup> the protection<sup>37</sup> of their persons<sup>38</sup>; wherever<sup>39</sup> in the world they may be, the whole<sup>40</sup> authority of the republic is with them.—19. So great fame had preceded<sup>41</sup> that man, that, to what place so ever he came<sup>42</sup>, a crowd eager to see and hear would receive<sup>43</sup> him.—20. In whatever direction<sup>44</sup> they turned<sup>45</sup>, they were received<sup>46</sup> by the missiles<sup>47</sup> of the enemy.—21. Skirmishers<sup>48</sup> harassed<sup>49</sup> the enemy along<sup>50</sup> the whole line of their march.—22. How so ever this may be, see<sup>51</sup> that you return as soon as possible.—23. In what manner so ever this man will act<sup>52</sup>, I shall follow his lead<sup>53</sup>.—24. Be it as it may, there is no reason why<sup>54</sup> we should place a doubt in his good faith.—25. Let us wait for<sup>55</sup> the events of the next [few] days, and<sup>56</sup> shape our course accordingly.

II. AGREEMENT OF THE RELATIVE WITH THE GRAMMATICAL ANTECEDENT (§ 611, § 612, R. 5).—1. The children and women who had survived<sup>57</sup> this calamity, were sold into slavery<sup>58</sup>.—2. He obtained fame by those devices<sup>59</sup> and contrivances<sup>60</sup> which are unworthy of a free man.—3. On the next day, the hostages and arms which Cæsar had demanded<sup>61</sup>, were delivered.—4. Almost the whole community<sup>62</sup> went to meet<sup>63</sup> Cæsar, and<sup>64</sup> begged<sup>65</sup>, not to deliver them up to the vengeance<sup>66</sup> of [their] bitterest<sup>67</sup> enemies.—5. After saying<sup>68</sup> this, Vorenus left<sup>69</sup> the intrenchment, and rushed<sup>70</sup> on what seemed to be the thickest of the hostile lines.—6. Sextus, the son of L. Tarquinius, used<sup>71</sup> to the destruction of the Gabii that power which they had entrusted to him for the protection of the State.—7. The Gauls resolved to assemble<sup>72</sup> for the defence<sup>73</sup> of that territory<sup>74</sup> which<sup>75</sup> the Romans would invade first with their army<sup>76</sup>.—8. It is astonishing<sup>77</sup>

<sup>1</sup> Render: I, on my part, whatever of time will intercede (*intercedere*) till (*dum* with subj.) you will assume (*occipere*) the province conferred (*deferre*) to you, I wish you would so employ (*collocare*), that you learn those things (*ea perdiscere*) without which you cannot correctly perform (*recte perfungi*) that office (*munus*).—<sup>2</sup> aggredi aliquid.—<sup>3</sup> ita.—<sup>4</sup> perficere.—<sup>5</sup> future perfect, converted into a subjunctive.—<sup>6</sup> infectus.—<sup>7</sup> investigare.—<sup>8</sup> modus.—<sup>9</sup> to shape one's actions, se gerere.—<sup>10</sup> fieri.—<sup>11</sup> mandare.—<sup>12</sup> ad supplicium trahere.—<sup>13</sup> ex multitudine.—<sup>14</sup> significare (p. 373, Obs. 1; p. 452, R. 98).—<sup>15</sup> quæso.—<sup>16</sup> fut. perf. (subjunct.).—<sup>17</sup> animus.—<sup>18</sup> pars.—<sup>19</sup> = we are going to perish.—<sup>20</sup> tamen.—<sup>21</sup> fides.—<sup>22</sup> quantuscunque.—<sup>23</sup> to place at the disposition of somebody, dicare alicui.—<sup>24</sup> recipere.—<sup>25</sup> sapor.—<sup>26</sup> Render: How much salt soever you will have added, nevertheless oil does not take [its] taste.—<sup>27</sup> adjicere.—<sup>28</sup> accusare.—<sup>29</sup> is.—<sup>30</sup> prosequi.—<sup>31</sup> benevolentia.—<sup>32</sup> = of whatever kind he etc.—<sup>33</sup> operam dare ut.—<sup>34</sup> Kalendæ proximæ.—<sup>35</sup> deferre.—<sup>36</sup> = to those who are at the helm (*in gubernaculis*) of the republic.—<sup>37</sup> presidium.—<sup>38</sup> corpora.—<sup>39</sup> Render: Who, wherever they are etc.—<sup>40</sup> Render: there (*ibi*) is the whole authority of the republic.—<sup>41</sup> præcedere aliquem.—<sup>42</sup> pluperf.—<sup>43</sup> prosequi.—<sup>44</sup> quoquo.—<sup>45</sup> se vertere, p. 328, R. 66; Obs. 1.—<sup>46</sup> excipere.—<sup>47</sup> telum.—<sup>48</sup> expedite cohortes.—<sup>49</sup> lacessere.—<sup>50</sup> = wherever he made his march.—<sup>51</sup> curare (ut).—<sup>52</sup> se gerere.—<sup>53</sup> = I shall follow to what [place] he will lead.—<sup>54</sup> nihil est quamobrem.—<sup>55</sup> Render: Let us expect what will happen (*fieri*) at the next (*proximus*) days.—<sup>56</sup> Render asyndetically: according as (*utcumque*) the thing is (subj.), so let us act (*agere*).—<sup>57</sup> superesse.—<sup>58</sup> sub corona vendere.—<sup>59</sup> artes.—<sup>60</sup> studia.—<sup>61</sup> imperare.—<sup>62</sup> civitas.—<sup>63</sup> obviam procedere.—<sup>64</sup> Render: 'who' begged.—<sup>65</sup> orare ne.—<sup>66</sup> ira.—<sup>67</sup> acer.—<sup>68</sup> loqui (partic. construction).—<sup>69</sup> extra munitiones procedere.—<sup>70</sup> Render: And what part of the enemies seemed thickest (*confertissimus*), in that he rushed (*irrupere*).—<sup>71</sup> Render by inversion: Which to him forces to protecting (*tuere*) the State of the Gabii had been committed (*subjunct.*), those he used to (*in*) the destruction (*perniciem*) of the people (*gens*).—<sup>72</sup> convenire.—<sup>73</sup> defendere (*gerundial*).—<sup>74</sup> Render: boundaries of that nation (*gens*).—<sup>75</sup> Render by inversion.—<sup>76</sup> Render by 'to introduce an army into the territory'.—<sup>77</sup> mirus.

that<sup>1</sup> [there] should have been<sup>2</sup> no rancor<sup>3</sup> between those men who<sup>4</sup> were competing<sup>5</sup> for such<sup>6</sup> a prize.—9. You ought to implore the immortal gods to<sup>7</sup> defend from the nefarious<sup>8</sup> crimes of the most abandoned<sup>9</sup> citizens a government<sup>10</sup> which<sup>11</sup> they destined<sup>12</sup> to be the greatest<sup>13</sup> and most prosperous<sup>14</sup> of all.—10. Return<sup>15</sup> to us so strengthened<sup>16</sup> in health that you are able to justify<sup>17</sup> the expectations in respect to you<sup>18</sup>, which<sup>19</sup> you have awakened<sup>20</sup> in us.—11. Atticus assisted the friends<sup>21</sup> of his adversary Antonius with [those] things they<sup>22</sup> were in need of<sup>23</sup>.—12. Return<sup>24</sup> the money which<sup>25</sup> you have received from me.—13. Semiramis built<sup>26</sup> the walls of Babylon with lime<sup>27</sup> and bitumen<sup>28</sup>, an article<sup>29</sup> which, in that country<sup>30</sup>, oozes<sup>31</sup> from the earth.—14. King Philip was seized with the desire of ascending Mount Hæmus<sup>32</sup>, from which it was said<sup>33</sup>, both<sup>34</sup> the Adriatic and Ionian seas [could] be seen at once.—15. The whole land<sup>35</sup> which was between Mount Massicus and the river Vulturius was parcelled out<sup>36</sup> among the Plebeians.—16. The enemy seized<sup>37</sup> all the gold<sup>38</sup> and silver, and all the corn<sup>39</sup> and fodder<sup>40</sup> that was in the city.—17. Hannibal laid waste<sup>41</sup> the whole tract of land<sup>42</sup> between the city of Cortona and lake Trasimene, with all the rigor<sup>43</sup> of war.

III. ABSOLUTE RELATIVES (R. 6).—1. It will be difficult to find [any person] who can give<sup>44</sup> you a satisfactory<sup>45</sup> account<sup>46</sup> on this subject<sup>47</sup>.—2. They maintain<sup>48</sup> an uninterrupted<sup>49</sup> intercourse<sup>50</sup> with these traders<sup>51</sup>, in order to have [persons] to whom to sell what they have gained<sup>52</sup> by stealing<sup>53</sup> and robbery<sup>54</sup>.—3. The conquerors<sup>55</sup> broke the fetters<sup>56</sup> of their countrymen<sup>57</sup> sold into slavery<sup>58</sup>, sending<sup>59</sup> [parties] in all directions<sup>60</sup> to<sup>61</sup> search<sup>62</sup> [for them].—4. The managers<sup>63</sup> selected [some persons] out of those present<sup>64</sup> to<sup>65</sup> keep order<sup>66</sup> during the proceedings in so large a gathering.—5. [Those] act wisely who, in times of prosperity<sup>67</sup> make provisions<sup>68</sup> for a rainy day<sup>69</sup>.—6. He is considered the wisest<sup>70</sup> who<sup>71</sup> himself conceives the ideas he needs; the next place being assigned<sup>72</sup> to him who adopts<sup>73</sup> what is well devised<sup>74</sup> by others<sup>75</sup>. In the sphere<sup>76</sup> of stupidity just the reverse is true; for he<sup>77</sup> who has no original thought<sup>78</sup>, is less stupid than he [ille] who endorses<sup>79</sup> what is<sup>80</sup> stupidly devised by others.—7. [Those rulers] who consult<sup>81</sup> [the interests of one] part of the citizens, [and] neglect the other<sup>82</sup>, inaugurate<sup>83</sup> a most baneful<sup>84</sup> condition of things<sup>85</sup> in the country, [namely] rebellion and discord.—8. Then, even those who had been doubtful before, went over<sup>86</sup> to the Carthaginians.—9. Happy was the decease<sup>87</sup> of that [man] who did not<sup>88</sup> live to witness those things which he saw in his mind as impending.—10. There are several persons [in this city] who either do not see what<sup>89</sup> is imminent<sup>90</sup>, or dissemble<sup>91</sup> what they see.—11. The Veneti commenced<sup>92</sup> to procure the equipments for their ships.—12. They did<sup>93</sup> what was unworthy of themselves, and of him under<sup>94</sup> whom they served.—13. Write to me as much as you can on all the events<sup>95</sup> of that day.—14. Let every one of us attach himself<sup>96</sup> to those whom<sup>97</sup> he likes best.—15. Actions<sup>98</sup> are dangerous either to their

<sup>1</sup> Quod.—<sup>2</sup> intercedere.—<sup>3</sup> obrectatio.—<sup>4</sup> by inversion.—<sup>5</sup> they compete for a prize; inter eos est æmulationis laudis.—<sup>6</sup> tantus.—<sup>7</sup> ut.—<sup>8</sup> nefarius.—<sup>9</sup> perditissimus.—<sup>10</sup> respublica.—<sup>11</sup> by inversion.—<sup>12</sup> velle.—<sup>13</sup> pulcherrimus.—<sup>14</sup> florentissimus.—<sup>15</sup> reverti (fut.).—<sup>16</sup> confirmare.—<sup>17</sup> sustinere ac tueri.—<sup>18</sup> expectationes tui.—<sup>19</sup> by inversion.—<sup>20</sup> concitare.—<sup>21</sup> familiaris.—<sup>22</sup> by incorporation.—<sup>23</sup> indigere.—<sup>24</sup> restituere.—<sup>25</sup> by incorporation.—<sup>26</sup> construere.—<sup>27</sup> calx.—<sup>28</sup> bitumen.—<sup>29</sup> materia.—<sup>30</sup> regio.—<sup>31</sup> exsudare.—<sup>32</sup> Render: Hæmus from which mountain.—<sup>33</sup> ferebatur (with impersonal construction).—<sup>34</sup> the two seas, the Adriatic and the Ionic (sing.).—<sup>35</sup> quod agri.—<sup>36</sup> dividere, with dat.—<sup>37</sup> capere.—<sup>38</sup> partitive construction.—<sup>39</sup> pabulum.—<sup>40</sup> pervasare.—<sup>41</sup> partitive: quod agri.—<sup>42</sup> clades.—<sup>43</sup> reddere.—<sup>44</sup> probabilis.—<sup>45</sup> ratio.—<sup>46</sup> res.—<sup>47</sup> tueri.—<sup>48</sup> continuus.—<sup>49</sup> commercium.—<sup>50</sup> mercator.—<sup>51</sup> capere.—<sup>52</sup> furtis.—<sup>53</sup> rapina.—<sup>54</sup> victor.—<sup>55</sup> to break somebody's fetters, aliquem ex servitute in libertatem restituere.—<sup>56</sup> civis.—<sup>57</sup> to sell into slavery, venumdare.—<sup>58</sup> ablative absolute, in the perfect.—<sup>59</sup> to send in all directions, dimittere.—<sup>60</sup> qui.—<sup>61</sup> conquirere.—<sup>62</sup> qui præfuerunt.—<sup>63</sup> ei qui aderant.—<sup>64</sup> qui.—<sup>65</sup> Render: who should take pains (operam dare) lest anything in such a multitude should be done tumultuously (tumultuose), or against the laws.—<sup>66</sup> tempora secunda.—<sup>67</sup> providere aliquid, to make provisions for something.—<sup>68</sup> casus adversi.—<sup>69</sup> Render: They say that he is the wisest.—<sup>70</sup> Render: to whom comes into the mind what is necessary (opus).—<sup>71</sup> Render: that next comes (proxime accedere) that [one] who etc.—<sup>72</sup> obtemperare.—<sup>73</sup> Render: to the things well invented (by absolute participle).—<sup>74</sup> Render: of the other.—<sup>75</sup> Render: In stupidity it is contrary (contra).—<sup>76</sup> Arrange: For less stupid is he (is).—<sup>77</sup> cui nihil in mentem venit.—<sup>78</sup> comprobare.—<sup>79</sup> Render: What comes stupidly into the mind to the other.—<sup>80</sup> consilium alicui.—<sup>81</sup> = neglect a part.—<sup>82</sup> inducere in civitatem.—<sup>83</sup> perniciosus.—<sup>84</sup> condition of things, res.—<sup>85</sup> defecere.—<sup>86</sup> exitus.—<sup>87</sup> Render: who did not see those [things] when they happened (fieri) which he foresaw (providere) [as] future.—<sup>88</sup> plur.—<sup>89</sup> imminere.—<sup>90</sup> dissimulare.—<sup>91</sup> Render: commenced (instituere) to procure (providere) those [things] which pertain to the use of the ships.—<sup>92</sup> committere.—<sup>93</sup> Render: whose camp they followed.—<sup>94</sup> Render: on all things which have been done on that day.—<sup>95</sup> to attach one's self to anyone, aliquo uti.—<sup>96</sup> Render: to whom it seems. The whole sentence to be rendered by four words.—<sup>97</sup> rerum actiones.

doers<sup>1</sup>, or to others.—16. Every one can<sup>2</sup> see<sup>3</sup> with his own eyes the beauty of what<sup>4</sup> we know to be the work<sup>5</sup> of divine providence.—17. Is Piso the man who looks<sup>6</sup> as if he did this without a consideration<sup>7</sup>?—18. They have given the man<sup>8</sup>, whose<sup>9</sup> life they failed<sup>10</sup> to take, to you. O judges, to throttle<sup>11</sup>.—19. Has that [man], who<sup>12</sup> made another man's calamity<sup>13</sup> the occasion of a most outrageous robbery, the right<sup>14</sup> of deprecating any calamity?—20. Many demand<sup>15</sup> of their friends what<sup>16</sup> they themselves do not grant<sup>17</sup> them.

IV. LOGICAL RELATIVES (R. 8).—1. He sent to my aid<sup>18</sup> all the troops he could spare, which gave me the greatest pleasure.—2. You will have to try<sup>19</sup> what so many [did] before you, [namely] to retrench<sup>20</sup> your expenses<sup>21</sup> as carefully<sup>22</sup> as you can.—3. King Ariobarzanes has returned thanks to me for<sup>23</sup> the great care which the Roman Senate and people were taking for his interests, [a distinction] which seems to be very great and exceedingly honorable<sup>24</sup> for him<sup>25</sup>.—4. In the next place<sup>26</sup>, if I am now<sup>27</sup> called from life<sup>28</sup>, I shall not be torn<sup>29</sup> from a<sup>30</sup> republic which to part with<sup>31</sup> would give me pain, a consolation which<sup>32</sup> I have in common with you.—5. The Senate returned thanks to Cicero, not for<sup>33</sup> the good administration<sup>34</sup> of the republic, which [it did] to many, but for saving<sup>35</sup> [the republic], [an honor] which since<sup>36</sup> Rome's building happened to no civilian<sup>37</sup>.—6. He condemned the very man from whom he had taken a bribe<sup>38</sup> with reference<sup>39</sup> to the judgment, an impudence<sup>40</sup> which is without a parallel.—7. This happened in such a manner<sup>41</sup> that it should<sup>42</sup> have been fatal<sup>43</sup> to the Syracusians, as much as could be conjectured<sup>44</sup> by human foresight<sup>45</sup>.—8. Verres ordered<sup>46</sup> Heraclius to be summoned<sup>47</sup>, which<sup>48</sup> ought<sup>49</sup> to have been done from the first<sup>50</sup>.—9. Alexander did not only kill Callisthenes, but even tortured<sup>51</sup> [him], a cruelty which was followed<sup>52</sup> by too late<sup>53</sup> a repentance<sup>54</sup>.—10. He hopes it to be feasible<sup>55</sup> to depart<sup>56</sup> with me for Italy. Should I<sup>57</sup> live to see this day, I shall think<sup>58</sup> myself<sup>59</sup> amply rewarded for my hardships.—11. He never mentioned<sup>60</sup> this subject again<sup>61</sup>, as far as I am informed.—12. I have directed my agents<sup>62</sup> to apply (if it would not give you too much trouble) to you for advice<sup>63</sup> in all the affairs<sup>64</sup> which would give rise<sup>65</sup> to any dispute.—13. The Senate commanded<sup>66</sup> Scipio to leave the army<sup>67</sup>, if not prejudicial to the public interest, and to come to Rome to preside<sup>68</sup> over the consular election.—14. As regards me, I keep quiet<sup>69</sup>, because<sup>70</sup> I do not believe that, while Pompey is absent, action should be taken<sup>71</sup> in regard<sup>72</sup> to the Campanian lands<sup>73</sup>.—15. For the rest, I wish you would think<sup>74</sup> that whatever kindness<sup>75</sup> you will show to Carcellia, you will do a great favor<sup>76</sup> to me.—16. For my [friend] Dionysius I only open<sup>77</sup> and pave<sup>78</sup> the way to your acquaintance<sup>79</sup>. When<sup>80</sup> you once know him personally, you will, as is your character<sup>81</sup>, consider him worthy of your

<sup>1</sup> To those who undertake them.—<sup>2</sup> by licet.—<sup>3</sup> contemplari.—<sup>4</sup> of those things which.—<sup>5</sup> to be constituted by.—<sup>6</sup> = who seems to have done this.—<sup>7</sup> gratia.—<sup>8</sup> is.—<sup>9</sup> by inversion.—<sup>10</sup> Render: whom they could not kill while (quum) they wished (cupere).—<sup>11</sup> jugulare (gerundial).—<sup>12</sup> by inversion.—<sup>13</sup> Render: Who snatched (rapere) out of the other's calamity the most disgraceful spoils to [his] house.—<sup>14</sup> Render: will he be able to deprecate (deprecari) from himself?—<sup>15</sup> desiderare.—<sup>16</sup> by inversion.—<sup>17</sup> tribuere.—<sup>18</sup> Render: He did, which was to me the greatest pleasure (letitia, ABSTRACT DATIVE), that he sent to me to aid (subsidium, ABSTR. DATIVE) what was left (reliqui) to him of troops.—<sup>19</sup> facere.—<sup>20</sup> circumcidere.—<sup>21</sup> sumptus.—<sup>22</sup> religiosus.—<sup>23</sup> by an infinitive clause: 'That to the Senate etc. his welfare was of so great care (ABSTRACT DATIVE).—<sup>24</sup> perhonorificus.—<sup>25</sup> The relative inserted clause must be placed before the infinitive clause.—<sup>26</sup> deinde.—<sup>27</sup> jam.—<sup>28</sup> ad exitum vite vocari (subjunctive).—<sup>29</sup> avellere.—<sup>30</sup> is.—<sup>31</sup> that which must be missed (carere, gerund). I should grieve (dolere, subj. pres.).—<sup>32</sup> Render: which as to (ad) consolation is common to me with thee. The relative inserted clause to be placed after deinde.—<sup>33</sup> pro.—<sup>34</sup> bene gerere rempublicam (by reversed participial phrase).—<sup>35</sup> conservare (reversed partic. phrase).—<sup>36</sup> post.—<sup>37</sup> togatus.—<sup>38</sup> pecuniam accipere.—<sup>39</sup> ob.—<sup>40</sup> Render: Than which (abl.) what could be more impudent?—<sup>41</sup> ita.—<sup>42</sup> debere.—<sup>43</sup> exitium (ABSTR. DAT.).—<sup>44</sup> conicere.—<sup>45</sup> consilium.—<sup>46</sup> historical present (jubere).—<sup>47</sup> citare.—<sup>48</sup> to be placed directly after the subject.—<sup>49</sup> oportet.—<sup>50</sup> initio.—<sup>51</sup> torquere.—<sup>52</sup> change into an active construction.—<sup>53</sup> too late, serus.—<sup>54</sup> poenitentia.—<sup>55</sup> = that it could be done.—<sup>56</sup> decedere in.—<sup>57</sup> = which day if I shall have seen.—<sup>58</sup> existimare.—<sup>59</sup> = that I have derived (percipere) a great fruit from my labors.—<sup>60</sup> colloqui de eâ re.—<sup>61</sup> postea.—<sup>62</sup> = so we have prescribed to those to whom we have committed (mandare) those affairs (negotium).—<sup>63</sup> to apply to somebody for advice, aliquo arbitro uti.—<sup>64</sup> res.—<sup>65</sup> = which would be called into some controversy.—<sup>66</sup> precipere.—<sup>67</sup> to leave the army and come to Rome, ex castris Romam venire.—<sup>68</sup> comitia consularia habere (GERUNDIAL).—<sup>69</sup> tacere.—<sup>70</sup> iccirco quod.—<sup>71</sup> Render: that it is convenient (convenire) that (accus. w. inf.).—<sup>72</sup> to take action in regard to something, causam alicujus rei agere.—<sup>73</sup> ager (sing.).—<sup>74</sup> sic velim existimes.—<sup>75</sup> = by whatever things you will have done kindly (benigne) to etc.—<sup>76</sup> gratissimum facere.—<sup>77</sup> patefacere.—<sup>78</sup> munire.—<sup>79</sup> cognitio.—<sup>80</sup> Partic. const.: The acquainted one (cognitus per te ipsum) you will judge worthy etc.—<sup>81</sup> natura.

friendship.—17. Whatever may be obtainable<sup>1</sup>, you will<sup>2</sup> (considering Caesar's humanity) most easily obtain it from him by your own application<sup>3</sup>.

V. COÖRDINATING RELATIVES, R. 9. [All the co-ordinating demonstratives and pronouns, used in these sentences, to be expressed relatively, as far as admissible.]—1. Nothing holds<sup>4</sup> society together<sup>5</sup> so much<sup>6</sup> as [mutual] confidence<sup>7</sup>; but this (*i. e.* confidence) cannot exist<sup>8</sup> unless<sup>9</sup> the payment<sup>10</sup> of debts<sup>11</sup> be enforced<sup>12</sup>.—2. Sophocles wrote tragedies up to extreme old age<sup>13</sup>. When, on account<sup>14</sup> of this occupation<sup>15</sup>, he seemed to neglect [his] property<sup>16</sup>, legal proceedings<sup>17</sup> were instituted against him by his sons.—3. The Athenians, Boeotians, and their other allies, tried<sup>18</sup> to stop<sup>19</sup> [the march of] Agesilaus. [But] he defeated *them* all in a bloody<sup>20</sup> battle.—4. Being well aware of this custom<sup>21</sup>, the consul departed at an earlier time<sup>22</sup> for the army than was his wont<sup>23</sup>.—5. When our army was at the distance<sup>24</sup> of a few days' marches from these States, their<sup>25</sup> envoys came to the camp.—6. When their (*i. e.* the enemy's) consternation<sup>26</sup> was betrayed<sup>27</sup> by bustle<sup>28</sup> and running<sup>29</sup>, our soldiers invaded<sup>30</sup> the camp.—7. At this place [those] who were able to seize their arms quickly, opposed<sup>31</sup> our [troops] for a little while<sup>32</sup>.—8. The position<sup>33</sup> of this ground<sup>34</sup> was such<sup>35</sup> that heavy missiles<sup>36</sup> could be launched<sup>37</sup> on<sup>38</sup> our ships from the higher<sup>39</sup> points<sup>40</sup>.—9. When the consul had arrived there, he ordered the city to enlist<sup>41</sup> soldiers [for his army].—10. Having received<sup>42</sup> this letter about midnight<sup>43</sup>, he immediately communicated<sup>44</sup> the intelligence<sup>45</sup> to the chief-commander.

VI. CONSTRUCTION OF THE RELATIVE CLAUSE.—GRAMMATICAL FORM OF THE RELATIVE. R. 10.—1. Are you the man who has starved<sup>46</sup> the common people?—2. It is I who gave you the hope<sup>47</sup> of an early departure<sup>48</sup>; [it is] I who kept up<sup>49</sup> our confidence<sup>50</sup>, that<sup>51</sup> our plans might be carried out<sup>52</sup>.—3. It is the mark of a trifling<sup>53</sup> mind to repudiate a legitimate fame<sup>54</sup>, which is the most honorable<sup>55</sup> fruit of true virtue.—4. After the death<sup>56</sup> of Pompey, the father, who was the [shining] light<sup>57</sup> of the Roman empire, [his] son, most similar to the father, was killed.—5. Panula is an<sup>58</sup> island surrounded<sup>59</sup> by that sea which you call the Ocean.—6. Eumenes fled into a fortress<sup>60</sup> of Phrygia which is called Nora.—7. Thebes itself, which is the capital<sup>61</sup> of Boeotia, was in great excitement<sup>62</sup>.—8. Hannibal arrived in Italy five months after<sup>63</sup> he had marched from New Carthage, and fifteen days after<sup>64</sup> he had begun to ascend the Alps.—9. The general left for the theatre of war<sup>65</sup> two days<sup>66</sup> after he had been appointed to the command of the army<sup>67</sup>.—10. I staid<sup>68</sup> at Athens three days<sup>69</sup> after your letter was handed<sup>70</sup> to me.—11. The week<sup>71</sup> I staid in my villa near Tusculum<sup>72</sup>, I spent<sup>73</sup> in reading and writing, since the bad weather<sup>74</sup> confined<sup>75</sup> me to the house.—12. It is now exactly<sup>76</sup> thirty years, since I came<sup>77</sup> to this city.—13. It is now ten months that you have been implicated<sup>78</sup> in this difficulty.—14. Ever since I became a man<sup>79</sup>, I have been in so intimate a connection<sup>80</sup> with Sulpicius, that neither he<sup>81</sup> has been doing<sup>82</sup> anything without me, nor I without him.—15. Ever since Cicero entered on the government of [his] province<sup>83</sup>, he showed<sup>84</sup> himself so conscientious<sup>85</sup> that nobody had<sup>86</sup> to incur<sup>87</sup> even<sup>88</sup> the slightest<sup>89</sup> expenses on his account<sup>90</sup>.—16. This is an important<sup>91</sup> reason why we should believe this man innocent.—17. What means<sup>92</sup> that whole charge<sup>93</sup>, if, as<sup>94</sup> you say, you had<sup>95</sup> no reason to<sup>96</sup> make<sup>97</sup> this unfortunate<sup>98</sup> [man] still<sup>99</sup> more unfortunate?—18. I had<sup>100</sup> many reasons

<sup>1</sup> Impetrandus (future; plural).—<sup>2</sup> = it will be easiest to obtain.—<sup>3</sup> to obtain 'for yourself' (dative of interest).—<sup>4</sup> continēre.—<sup>5</sup> vehementius.—<sup>6</sup> fides.—<sup>7</sup> esse nulla potest.—<sup>8</sup> nisi.—<sup>9</sup> solutio.—<sup>10</sup> res creditae.—<sup>11</sup> future.—<sup>12</sup> To enforce something = something is necessary.—<sup>13</sup> summa senectus.—<sup>14</sup> propter.—<sup>15</sup> studium.—<sup>16</sup> res familiaris.—<sup>17</sup> Render: He was called into trial (*judicium*) by etc.—<sup>18</sup> conari.—<sup>19</sup> obsistere alicui.—<sup>20</sup> gravis.—<sup>21</sup> having ascertained (*cognoscere*) this custom (*abl. abs.*)—<sup>22</sup> maturus.—<sup>23</sup> It is my wont, consuēvi.—<sup>24</sup> to be at a distance, abesse.—<sup>25</sup> ab eis.—<sup>26</sup> terror.—<sup>27</sup> significare.—<sup>28</sup> fremitus.—<sup>29</sup> concursus.—<sup>30</sup> irrumperere in.—<sup>31</sup> resistere.—<sup>32</sup> paulisper.—<sup>33</sup> natura.—<sup>34</sup> locus.—<sup>35</sup> hic, hæc, hoc.—<sup>36</sup> tormentum.—<sup>37</sup> adigere.—<sup>38</sup> ad.—<sup>39</sup> superior.—<sup>40</sup> locus.—<sup>41</sup> alicui milites imperare.—<sup>42</sup> = After (*abl. abs.*) this letter had been brought (*afferre*).—<sup>43</sup> media nox.—<sup>44</sup> deferre ad aliquem.—<sup>45</sup> quæ nuntiabantur.—<sup>46</sup> fame necare.—<sup>47</sup> specim afferre.—<sup>48</sup> matfra decessio.—<sup>49</sup> servare.—<sup>50</sup> fides.—<sup>51</sup> infinitive clause.—<sup>52</sup> our plans may be carried out, res confici potest.—<sup>53</sup> levis.—<sup>54</sup> justa gloria.—<sup>55</sup> honestus.—<sup>56</sup> = after P. had died (*extingui*), *ABL. ABS.*—<sup>57</sup> lumen.—<sup>58</sup> quidam.—<sup>59</sup> circumfusus.—<sup>60</sup> castellum.—<sup>61</sup> caput.—<sup>62</sup> motus.—<sup>63</sup> by the relative.—<sup>64</sup> ad castra proficisci.—<sup>65</sup> by ordinale, acc. to p. 233, Obs. 4, 1.—<sup>66</sup> to be appointed to the command of the army, exercitum accipere.—<sup>67</sup> commorari.—<sup>68</sup> triduum.—<sup>69</sup> reddere.—<sup>70</sup> hebdomas.—<sup>71</sup> villa near Tusculum, Tusculanum.—<sup>72</sup> consumere (*with gerundial*).—<sup>73</sup> tempestas.—<sup>74</sup> continere aliquem in aliquo loco.—<sup>75</sup> ipse.—<sup>76</sup> commigrare.—<sup>77</sup> in aliqua re versari.—<sup>78</sup> to become a man, togam virilem sumere.—<sup>79</sup> to be in an intimate connection with somebody, aliquo familiariter uti.—<sup>80</sup> ille.—<sup>81</sup> agere.—<sup>82</sup> provinciam accipere.—<sup>83</sup> se prestare.—<sup>84</sup> abstinent.—<sup>85</sup> gerundial.—<sup>86</sup> sumptus suscipere.—<sup>87</sup> Render: 'not even'.—<sup>88</sup> minimus.—<sup>89</sup> propter.—<sup>90</sup> magnus.—<sup>91</sup> esse.—<sup>92</sup> crimen.—<sup>93</sup> by the relative.—<sup>94</sup> by esse.—<sup>95</sup> cur.—<sup>96</sup> reddere.—<sup>97</sup> miser.—<sup>98</sup> multo.—<sup>99</sup> by esse.

why I should join<sup>1</sup> Pompey as the companion of his flight.—19. What do you allege<sup>2</sup> why we should believe you rather than that [other man], whose very words<sup>3</sup> betray<sup>4</sup> his great<sup>5</sup> consciousness.—20. I was seized<sup>7</sup> with the greatest grief when I saw<sup>8</sup> the man<sup>9</sup>, for whose sake<sup>10</sup> I had undergone<sup>11</sup> so many hardships, be faithless<sup>12</sup> to a cause which is [that] of all the patriots<sup>13</sup>.—21. So great was the forgetfulness<sup>14</sup> of that man that, if he came to any [place], he forgot the very<sup>15</sup> [thing] for the sake of which<sup>16</sup> he had come.—22. [Some of] the most prominent<sup>17</sup> men were present, with many of whom I am intimately<sup>18</sup> acquainted<sup>19</sup>.—23. This kind of gems<sup>20</sup>, a few<sup>21</sup> of which are in my possession<sup>22</sup>, is of remarkable<sup>23</sup> beauty.—24. We cannot wonder that<sup>24</sup> you are hostile<sup>25</sup> to that government which you failed<sup>26</sup> to destroy, not for lack of disposition, but for lack of strength.

VII. ELLIPSIS IN THE RELATIVE CLAUSE, AND TRANSPOSITION OF WORDS FROM THE PRINCIPAL SENTENCE. R. 11, 12.—1. They<sup>27</sup> think<sup>28</sup> about this subject very much<sup>29</sup> as<sup>30</sup> the other barbarians do.—2. To Aristides happened what happened to many countrymen of his<sup>31</sup>, [namely] that (*ut*) he was banished<sup>32</sup> by ostracism<sup>33</sup>.—3. Caesar left as protection<sup>34</sup> for the ships the same troops as he had left before.—4. I did<sup>35</sup> what few did before me, when<sup>36</sup> I followed<sup>37</sup> the advice of those who, avowedly<sup>38</sup>, were my worst enemies.—5. I shall follow<sup>39</sup> the same plan as<sup>40</sup> I did from the beginning.—6. I shall give you the same opportunity as<sup>41</sup> before; only<sup>42</sup> observe<sup>43</sup> that uprightness in your dealings with me which you are wont<sup>44</sup> [to observe].—7. He showed<sup>45</sup> in his letter that respect<sup>46</sup> which it was his duty<sup>47</sup> [to show].—8. Some said that the dead body of Pausanias<sup>48</sup> ought<sup>49</sup> to be interred<sup>50</sup> in the same<sup>51</sup> [spot] as those [were interred] who were executed<sup>52</sup> for a crime.—9. If we make gifts<sup>53</sup>, we should give<sup>54</sup> to every one what he needs most<sup>55</sup>.—10. Let every one attend<sup>56</sup> chiefly<sup>57</sup> to those [things] for which<sup>58</sup> he is best fitted<sup>59</sup>.—11. Every one seized<sup>60</sup> those [things] which<sup>61</sup> seemed to him the most suitable<sup>62</sup>.—12. The Carthaginians, [in] the peace made with the Romans, lost their<sup>63</sup> richest<sup>64</sup> provinces.—13. The priestess is said to have prayed<sup>65</sup> to the god, to give to [her] sons for their piety the highest<sup>66</sup> reward which could be given by a god to men.—14. Drusus, after leaving<sup>67</sup> his<sup>68</sup> most trustworthy<sup>69</sup> troops as garrison<sup>70</sup> in the fortress<sup>71</sup>, pursued the enemy with the rest of his army.—15. He used<sup>72</sup> as interpreter<sup>73</sup> a<sup>74</sup> captured<sup>75</sup> Persian whom he had in his<sup>76</sup> camp.—16. The consul marched<sup>77</sup> to [his] colleague by as great marches as he could.

VIII. INVOLUTION. R. 13, 14. (*Involved relatives to be used in every sentence.*)—1. The accused is exceedingly culpable<sup>78</sup>, and<sup>79</sup>, if he is condemned, people<sup>80</sup> will no longer<sup>81</sup> say that money is omnipotent<sup>82</sup> in these courts<sup>83</sup>.—2. It will be necessary<sup>84</sup> for the consul to yield<sup>85</sup> his opinion, by doing which<sup>86</sup> he will greatly<sup>87</sup> ingratiate himself with all the good.—3. At that time we had a chief of quick action<sup>88</sup> and energetic<sup>89</sup> mind<sup>90</sup>. If<sup>91</sup> we had now such a chief, we would, for these outrages, demand reparation<sup>92</sup> by war.—4. That alone is a good, the possessor<sup>93</sup> of which is praiseworthy<sup>94</sup>, even if he

<sup>1</sup> Se adjungere alicui.—<sup>2</sup> afferre.—<sup>3</sup> sermo (*sing.*).—<sup>4</sup> demonstrare.—<sup>5</sup> summus.—<sup>6</sup> fides.—<sup>7</sup> afficere.—<sup>8</sup> intelligere.—<sup>9</sup> is.—<sup>10</sup> propter.—<sup>11</sup> suscipere.—<sup>12</sup> deserere causam.—<sup>13</sup> boni.—<sup>14</sup> oblivio.—<sup>15</sup> by ipse ille.—<sup>16</sup> ejus rei causa.—<sup>17</sup> summus.—<sup>18</sup> familiarissime.—<sup>19</sup> uti.—<sup>20</sup> gemma.—<sup>21</sup> aliquot.—<sup>22</sup> possidere.—<sup>23</sup> mirus.—<sup>24</sup> infinitive clause.—<sup>25</sup> infestus.—<sup>26</sup> Render: for (*ad*) the destruction (*delere*, gerundial) of which not the disposition (*animus*), but the strength (*virtus*) were wanting (*desse*) to you.—<sup>27</sup> hi.—<sup>28</sup> sentire.—<sup>29</sup> fere.—<sup>30</sup> = what.—<sup>31</sup> see P. I, § 272, R. 1; § 283, R. 5.—<sup>32</sup> in exilium mittere.—<sup>33</sup> testarum suffragium.—<sup>34</sup> presidium (*ABSTR. DAT.*).—<sup>35</sup> facere.—<sup>36</sup> Render: 'that (*ut*) I followed'.—<sup>37</sup> to follow the advice of some one, aliquo auctore (*abl. abs.*) agere.—<sup>38</sup> Render: 'Who professed (*profiteri*) that they were most inimical to me'.—<sup>39</sup> ratione uti.—<sup>40</sup> Render: 'which [to use] I began'.—<sup>41</sup> by the relative.—<sup>42</sup> modo.—<sup>43</sup> to observe uprightness in one's dealings with somebody, fidem alicui prestare.—<sup>44</sup> consuēvisse.—<sup>45</sup> uti.—<sup>46</sup> verecundia.—<sup>47</sup> by debere.—<sup>48</sup> = the body of the dead Pausanias.—<sup>49</sup> oportere.—<sup>50</sup> to inter in a place, inferre in locum.—<sup>51</sup> by the locative adverb.—<sup>52</sup> to be executed for a crime, ad supplicium dari (*datum esse*).—<sup>53</sup> beneficium (*sing.*) prestare (*in the future*).—<sup>54</sup> [that] should be given (*gerundial*) which etc.—<sup>55</sup> = what is most (maxime) necessary to every one.—<sup>56</sup> elaborare in aliqua re.—<sup>57</sup> potissimum.—<sup>58</sup> by inversion.—<sup>59</sup> aptissimus ad.—<sup>60</sup> arripere.—<sup>61</sup> by inversion.—<sup>62</sup> aptissimus.—<sup>63</sup> = which they had.—<sup>64</sup> opulentus.—<sup>65</sup> precari a deo.—<sup>66</sup> maximus.—<sup>67</sup> relinquere (*ABL. ABS.*).—<sup>68</sup> = which he had.—<sup>69</sup> firmus.—<sup>70</sup> *ABSTR. DAT.*—<sup>71</sup> castellum.—<sup>72</sup> adhibere.—<sup>73</sup> interpretes.—<sup>74</sup> quidam.—<sup>75</sup> bello captus.—<sup>76</sup> by secum.—<sup>77</sup> ducere.—<sup>78</sup> nocenti-simus.—<sup>79</sup> = who if he is condemned.—<sup>80</sup> homines.—<sup>81</sup> = will cease to say.—<sup>82</sup> plurimum posse.—<sup>83</sup> judicium.—<sup>84</sup> Infinitive clause.—<sup>85</sup> de opinione sua decedere.—<sup>86</sup> = if he which does (*subjunct.*).—<sup>87</sup> to greatly ingratiate one's self with some one, ab aliquo summam infre gratiam.—<sup>88</sup> celerissimi consilii.—<sup>89</sup> acerri-mus.—<sup>90</sup> ingenium.—<sup>91</sup> by the involved relative *qualis*: 'of which quality (*qualis*) if [one] were now'.—<sup>92</sup> to demand reparation for outrages by war, res ex injuriis bello repetere.—<sup>93</sup> = which who has.—<sup>94</sup> laudandus.

has nothing else<sup>1</sup>, but without which<sup>2</sup> a man is condemned and rejected in the fullness of everything else<sup>3</sup>.—5. The swans<sup>4</sup> are consecrated<sup>5</sup> to Apollo, because they seem to have from him [the gift of] divination, by which they foresee<sup>6</sup> the happiness after death, so as to die with song<sup>7</sup> and rejoicing.<sup>8</sup>—6. The nothingness of worldly goods<sup>9</sup> you have proved in your book on happy life, in the reading<sup>10</sup> of which I wish nothing so much, as to abandon all those [things].—7. How pleasant must be that journey, at the end of which<sup>11</sup> no care, no anxiety<sup>12</sup> is to remain<sup>13</sup>.—8. Where<sup>14</sup>, on land or water, shall I find a person<sup>15</sup> whose whereabouts<sup>16</sup> I do not know?—9. A. Torquatus stands<sup>17</sup> before [my] eyes, the quality<sup>18</sup> of whose pursuits both of you must<sup>19</sup> know.—10. Octavius is a man<sup>20</sup>, whose actions<sup>21</sup>, of whatever kind<sup>22</sup> they may be, we will expect with the greatest confidence<sup>23</sup>.—11. That man is addicted<sup>24</sup> to habits of life, from which<sup>25</sup> a person who is once accustomed to them, will seldom return to honest pursuits.—12. This is the carriage<sup>26</sup> which Napoleon used<sup>27</sup> when, on his flight after the battle of Waterloo, he was nearly captured by the enemy.—13. That ancient throne<sup>28</sup>, on which the king<sup>29</sup> used to sit when his vassals tendered him their homage, was ruthlessly<sup>30</sup> thrown into the flames.—14. This was the prophetic<sup>31</sup> word<sup>32</sup> of L. Crassus, which we expected<sup>33</sup> [to hear] when we came to the Senate.—15. From there they came to the river Euphrates, which<sup>34</sup> they rapidly crossed by pontoons, when another more serious obstacle opposed [the march of] the army.—16. We rely<sup>35</sup> on those whom we believe to have a better knowledge<sup>36</sup> than we [have].—17. Apollonius did not suffer those who, in his judgment<sup>37</sup>, had no hope of becoming [good] orators, to waste their time<sup>38</sup> with him.—18. Hannibal was appointed<sup>39</sup> commander of the Carthaginians on account of the hatred<sup>40</sup> which all knew he had ever since his childhood entertained against the Romans.—19. I come now to those [things] in regard to which<sup>41</sup> Epicurus remarks that he did not comprehend how life could be happy without them.—20. Nothing is more undignified<sup>42</sup>, than that<sup>43</sup> anything should seem worse to you than dishonor<sup>44</sup>, to avoid<sup>45</sup> which any pain must be submitted to.—21. His<sup>46</sup> condition is the same as<sup>47</sup> [that] of the tyrant Dionysius, who, when he was in a position to do anything he pleased<sup>48</sup>, did not feel himself [any] happier<sup>49</sup> on that account<sup>50</sup>.—22. Of what use<sup>51</sup> are treasures which<sup>52</sup> we cannot employ<sup>53</sup> when they are in our possession<sup>54</sup>?—23. Alexander made<sup>55</sup> Parmenio governor of Media, a country which, in wealth, is second to none.—24. Philo, who in scholarship<sup>56</sup> had no superior among the Jews, was the first who<sup>57</sup> applied<sup>58</sup> the speculative<sup>59</sup> method to the interpretation<sup>60</sup> of the sacred books of the Jews.

IX. RELATIVE SUBJUNCTIVES OF NON-REALITY, DEPENDENT ON NEGATIVES. (R. 16).—1. There is nothing that either you [would] wish to hear, or [which] I dare to assert<sup>61</sup>

<sup>1</sup> Etiam si aliis destituitur.—<sup>2</sup> but which who has not.—<sup>3</sup> in omnium aliarum rerum copia.—<sup>4</sup> cygnus.—<sup>5</sup> dedicatus.—<sup>6</sup> = foreseeing by which what boon (*quid boni*) [there] is in death, they die etc.—<sup>7</sup> cantus.—<sup>8</sup> voluptas.—<sup>9</sup> Render: How none richer are, thou hast taught in that book which thou hast written on happy (*beatus*) life.—<sup>10</sup> Render: 'when I read which, I prefer (*malle*) nothing than to abandon (*relinquere*) etc.—<sup>11</sup> 'when which is ended (*conficere*)', by ABL. ABS.—<sup>12</sup> sollicitudo.—<sup>13</sup> reliqui esse (periphr. fut. subj.).—<sup>14</sup> = *Through which parts* (by the locative adverbial form of the interrogative) shall I pursue.—<sup>15</sup> is.—<sup>16</sup> = where who is, I do not know.—<sup>17</sup> versari.—<sup>18</sup> = whose of what quality studies were.—<sup>19</sup> *necesse est*; with infinitive clause.—<sup>20</sup> is.—<sup>21</sup> = what who acts.—<sup>22</sup> = indefinite relative.—<sup>23</sup> *aquissimo animo*.—<sup>24</sup> = follows that method (*ratio*) of life.—<sup>25</sup> = by which who is imbued (*imbuitus*), can (*subjunct.*) hardly be recalled to an honest kind (*genus*) of living.—<sup>26</sup> rheda.—<sup>27</sup> on (by) which when Napoleon fleeing out of the Waterloo (Vaterloensis) battle was driven (*vehit*), he almost was captured etc.—<sup>28</sup> solium.—<sup>29</sup> = to the on which (*abl.*) sitting king faith and office used (*solere*) to be tendered (*praestari*) by his (men).—<sup>30</sup> *sedus*.—<sup>31</sup> divinus.—<sup>32</sup> vox.—<sup>33</sup> = expecting which we came.—<sup>34</sup> = after having crossed (*superare*, ABL. ABS.) which by bridges quickly made, a more serious (*gravis*) obstacle (*impedimentum*) was objected to the army.—<sup>35</sup> *fidem habere alicui*.—<sup>36</sup> plus intelligere.—<sup>37</sup> Render: that who he judged could not become (*evadere*) orators.—<sup>38</sup> *operam* (not '*tempus*') perdere.—<sup>39</sup> constituere.—<sup>40</sup> = hatred of the Romans, that by which he was imbued from boyhood was known (*constat*) among all.—<sup>41</sup> = after which had been detracted (ABL. ABS.), how life could be happy, Epicurus denies that he understood (*intelligere*).—<sup>42</sup> indignus.—<sup>43</sup> infinitive clause.—<sup>44</sup> *dederis* (COMPAR. ABL.).—<sup>45</sup> = that (*ut*) thou mayest escape (*effugere*) which, any (*quilibet*) rather pain must be undergone (*subire*, gerundial).—<sup>46</sup> = of this (man).—<sup>47</sup> ac.—<sup>48</sup> = to whom when all [things] were allowed (*licet*).—<sup>49</sup> se beatorem ducere.—<sup>50</sup> *iccirco*.—<sup>51</sup> *Cui bono sunt opes*, literally 'To whom are treasures (to) advantage?' (ABSTR. DAT.).—<sup>52</sup> by cross-involution.—<sup>53</sup> *uti*.—<sup>54</sup> = when we have which.—<sup>55</sup> Render: Alexander subjected Media, than which no region is more opulent, to Parmenio.—<sup>56</sup> = than who nobody was more learned (*eruditus*).—<sup>57</sup> by access, pred. p. 250, Obs. 1.—<sup>58</sup> to apply something to something, *uti aliquā re in aliquā re*.—<sup>59</sup> *dialectica ratio*.—<sup>60</sup> explicare (gerundial phrase).—<sup>61</sup> dicere.

as<sup>1</sup> certain.—2. There is no admixture<sup>2</sup> in the soul which seems to be of terrestrial origin<sup>3</sup>.—3. There is nobody that considers Cicero a greater orator than Demosthenes.—4. There was nobody that dared to open his mouth<sup>4</sup>.—5. There is no subject on which the learned disagree so much.—6. What lapse of time<sup>5</sup> can replace<sup>6</sup> divine power?—7. What is there that should hinder me to follow that [view] which seems reasonable<sup>7</sup> to me?—8. Who is there that believes that future [things] can be conjectured<sup>8</sup> out of dreams?—9. There is no living being<sup>9</sup>, except<sup>10</sup> man, that has any notion<sup>11</sup> of God.—10. There is nothing that length<sup>12</sup> of time cannot achieve<sup>13</sup>.—11. There is nothing in the whole world that does not belong to the universe as a part<sup>14</sup>.—12. Who is there that does not hate Tarquin the Haughty?—13. Who is there that would not like<sup>15</sup> to seem benevolent<sup>16</sup>?—14. Who is there that does not understand, that by this one law the whole republic is annihilated<sup>17</sup>?—15. Who is it that divulges rumors of this kind?—16. What is the reason that you think him to be insolvent<sup>18</sup>?—17. There is no reason why in this case a prominent genius<sup>19</sup> should be required<sup>20</sup>.—18. There is no reason why you should call<sup>21</sup> that man from the province.—19. There is no reason why you should risk your popularity<sup>22</sup> by proposing<sup>23</sup> such a law.—20. Nothing is honest, that is done unwillingly<sup>24</sup> [or] under compulsion.—21. Nobody is [to be called] happy who believes in<sup>25</sup> this theory<sup>26</sup>.—22. There is no good [man] that holds<sup>27</sup> this opinion.—23. Nobody can be a president<sup>28</sup> of the republic who is not born in this country<sup>29</sup>.—24. Nothing can be truly useful which is acquired<sup>30</sup> by crime<sup>31</sup>.—25. Nobody can be [called] rich who covets the things of others<sup>32</sup>.—26. You cannot send me anything from that city which will be more acceptable<sup>33</sup>.—27. The speaker said<sup>34</sup> nothing by which the passions<sup>35</sup> of the multitude were aroused<sup>36</sup>.—28. I have nothing to<sup>37</sup> compare with Scipio's friendship.—29. I have never met<sup>38</sup> with any [man] from whom<sup>39</sup> I withdrew<sup>40</sup> more gladly<sup>41</sup>.—30. The name of no [man], that had been among these<sup>42</sup>, was withheld<sup>43</sup>.—31. I never have known anyone who said nothing with greater airs<sup>44</sup>.—32. No one has yet wished to see<sup>45</sup> me whom<sup>46</sup> I refused to receive on account of my engagements.—33. Nobody who is hurrying<sup>47</sup> to his burning house<sup>48</sup>, will admire even<sup>49</sup> the most exquisite<sup>50</sup> music<sup>51</sup>.—34. I respect<sup>52</sup> no pursuit<sup>53</sup> which has money for its object<sup>54</sup> (SENECA).—35. After Panætius nothing has been written on this subject, at least [nothing] with which I agree<sup>55</sup>.—36. Nobody, who has<sup>56</sup> a manly spirit<sup>57</sup>, can tolerate the bearing<sup>58</sup> of that man.—37. Who is there of all [men], provided<sup>59</sup> he has any intercourse with the Muses, who should not rather wish<sup>60</sup> to be this mathematician<sup>61</sup> than that tyrant?—38. There is no one, but he would rather wish to die than be converted into some form<sup>62</sup> of a beast<sup>63</sup>, while<sup>64</sup> at the same time having the mind of man.—39. There was no one, but he said that the opinion of this [man] was most correct<sup>65</sup>.—40. No day passes, but Satrius calls on me<sup>66</sup>.—41. I have never sent a letter home, but another letter for you accompanied it<sup>67</sup>.—42. Hortensius let<sup>68</sup> no day pass without either speaking<sup>69</sup> in the forum, or meditating without the forum.

X. RELATIVE SUBJUNCTIVES FOLLOWING THE ANALOGY OF SUBJUNCTIVES WITH NEGATIVE ANTECEDENTS. R. 17.—1. You will find few that will agree with you.—2. How few are there that deny wealth and pleasures to be goods!—3. He took<sup>70</sup> [a] few assistants<sup>71</sup> whom he thought to be competent<sup>72</sup> to perform the work.—4. I was the only one to whom both<sup>73</sup> [alternatives] were open<sup>74</sup>.—5. You were the only one who [ever] wished to have his colleague as a master<sup>75</sup>.—6. Have you alone the privilege to claim this right

<sup>1</sup> Pro.—<sup>2</sup> = nothing mixed (*mixtum*).—<sup>3</sup> of terrestrial origin, *ex terrā natus*.—<sup>4</sup> *hiscere*.—<sup>5</sup> = what lapse of time (*vetustas*) is there, that can etc.—<sup>6</sup> *conficere*.—<sup>7</sup> *probabilis*.—<sup>8</sup> *conjectare*.—<sup>9</sup> living being, animal.—<sup>10</sup> *præter*.—<sup>11</sup> *notitia*.—<sup>12</sup> *longinquitas*.—<sup>13</sup> *assequi*.—<sup>14</sup> = that is not a part of the universe (*universum*).—<sup>15</sup> *velle*.—<sup>16</sup> *beneficus*.—<sup>17</sup> *delere*.—<sup>18</sup> See p. 168, Obs. 3.—<sup>19</sup> *excellens ingenium*.—<sup>20</sup> *requirere*.—<sup>21</sup> *devocare*.—<sup>22</sup> to risk one's popularity, *cum populo in invidiam venire*.—<sup>23</sup> *legem rogare*.—<sup>24</sup> = that is done by an unwilling [one] (*invitus*), by a compelled [one].—<sup>25</sup> *sequi* (with accus.).—<sup>26</sup> *ratio*.—<sup>27</sup> *sequi*.—<sup>28</sup> *princeps*.—<sup>29</sup> *intra finis nostros*.—<sup>30</sup> *parere*.—<sup>31</sup> *scelus*.—<sup>32</sup> P. I, § 358.—<sup>33</sup> *jucundus*.—<sup>34</sup> *proferre*.—<sup>35</sup> *animi*.—<sup>36</sup> *excitare*.—<sup>37</sup> = which I compare.—<sup>38</sup> *convenire aliquem*.—<sup>39</sup> *unde*.—<sup>40</sup> *abire*.—<sup>41</sup> *lubenter*.—<sup>42</sup> = who had been in that number.—<sup>43</sup> *occultare*.—<sup>44</sup> *maior auctoritate*.—<sup>45</sup> *convenire*.—<sup>46</sup> Render: 'for whom (DAT. INCOMMUDI) I was engaged (*occupatus*)'.—<sup>47</sup> *currere*.—<sup>48</sup> = to the conflagration of his house.—<sup>49</sup> by *ne quidem*.—<sup>50</sup> *suavis*.—<sup>51</sup> *cantus*.—<sup>52</sup> *suspiciere*.—<sup>53</sup> *studium*.—<sup>54</sup> = which goes out (*exire*) into money (*as*).—<sup>55</sup> *I agree with something*, *mihi probatur aliquid*.—<sup>56</sup> by *esse*.—<sup>57</sup> *virile ingenium*.—<sup>58</sup> *vultus habitusque*.—<sup>59</sup> = who has only some commerce with the Muses.—<sup>60</sup> *malle* with infinitive clause.—<sup>61</sup> mathematicus.—<sup>62</sup> *figura*.—<sup>63</sup> *bestia*.—<sup>64</sup> *quum* with subjunctive of periphrastic future.—<sup>65</sup> *somebody's opinion is correct*, *aliquis vere sentit*.—<sup>66</sup> *domum meam ventilare*.—<sup>67</sup> Render: I have never sent one letter home, that not the other was [directed] to thee.—<sup>68</sup> *pati*.—<sup>69</sup> *dicere*.—<sup>70</sup> *sibi assumere*.—<sup>71</sup> minister.—<sup>72</sup> *idoneus*, with gerundial dative.—<sup>73</sup> *utrumque*.—<sup>74</sup> *licet*.—<sup>75</sup> Render: Who wished (*velle*) to have him, whom you had [as] a colleague, [as] a master.

for you?—7. He is<sup>3</sup> the only person to whom I can confide<sup>3</sup> this [secret].—8. This [man] was the only one<sup>4</sup> among those condemned, who was privy to that crime.—9. There was [but] one desire by which all, who were present, were actuated<sup>5</sup>.—10. There are those who think that body and soul perish together<sup>6</sup>.—11. There are those who neither know how to decline<sup>7</sup> the benefits which they receive, nor how to return<sup>8</sup> [them].—12. There were some that thought the fight would result<sup>9</sup> disastrously<sup>10</sup> to our [troops].—13. There were some to whom Curio seemed the third orator of that age.—14. There were some who either were anxious<sup>11</sup> for some new commotions<sup>12</sup> in (of) the republic, or who turned<sup>13</sup> the discords of the citizens to their profit.—15. There are certain [things] which are<sup>14</sup> neither commanded, nor prohibited by the laws.—16. There are those present who are ready to shed their blood<sup>15</sup> for the welfare of the republic.—17. There are certain philosophers who think that invalids<sup>16</sup> should<sup>17</sup> neither be called<sup>18</sup> happy<sup>19</sup>, nor unhappy<sup>20</sup>.—18. There are obligations<sup>21</sup> which we are owing<sup>22</sup> more to some<sup>23</sup> [persons] than to others.—19. There is a certain<sup>24</sup> [quality] which is theoretically<sup>25</sup> rather than practically different from virtue.—20. There are many things which may be said on<sup>26</sup> both sides of the [question].—21. We know some [persons] who studied<sup>27</sup> many years with a philosopher, without<sup>28</sup> acquiring even a tincture [of philosophy].—22. There were two roads in all<sup>29</sup> by which<sup>30</sup> the Helvetians could reach<sup>31</sup> the country of the Sequani.—23. There are seven cities<sup>32</sup> which claim<sup>33</sup> Homer as their townsman.—24. It is this [fact] by which it is proved that this part of philosophy is not superfluous<sup>34</sup>.—25. It is philosophy which teaches the true way<sup>35</sup> of living, and<sup>36</sup> which makes it impossible for its follower ever to be unhappy.

XI. RELATIVE SUBJUNCTIVES OF POSSIBILITY, NECESSITY, DESIRABLENESS, AND DOUBT. R. 18.—1. We want<sup>37</sup> a commander who has legitimate authority<sup>38</sup>.—2. We must learn things<sup>39</sup> that enable us<sup>40</sup> to be useful to our country.—3. We must act with<sup>41</sup> a dignity<sup>42</sup> and firmness<sup>43</sup> which is proof<sup>44</sup> not only against influence<sup>45</sup> but even against suspicion.—4. Perhaps [somebody] has told you this who has not seen it himself, but heard<sup>46</sup> it from others.—5. Money<sup>47</sup> should be made by means<sup>48</sup> which are free<sup>49</sup> from baseness<sup>50</sup>.—6. Is there anything else<sup>51</sup> that you [would] say in your behalf<sup>52</sup>?—7. Has any one gone down<sup>53</sup> this road who carried a wooden<sup>54</sup> chest<sup>55</sup> on his shoulder<sup>56</sup>?—8. To you I wish<sup>57</sup> a farm<sup>58</sup>, in which you can enjoy<sup>59</sup> all the pleasures<sup>60</sup> of agriculture<sup>61</sup>.—9. What delight<sup>62</sup> of the mind can be compared<sup>63</sup> with the pursuits<sup>64</sup> of those who are always searching<sup>65</sup> for something that [may] contribute to the well-being of their fellow-men<sup>66</sup>?—10. In the present<sup>67</sup> corruption<sup>68</sup> of morality<sup>69</sup>, something is required<sup>70</sup> that [may] reform<sup>71</sup> inveterate abuses<sup>72</sup>.—11. Our people<sup>73</sup> do not desire monitors who [shall] tell them minutely<sup>74</sup>: 'Walk<sup>75</sup> thus! speak thus! dine thus! drink thus!'—12. If you know any one who will take<sup>76</sup> the villa on this condition, let me know<sup>77</sup> at your earliest convenience<sup>78</sup>.

XII. RELATIVE SUBJUNCTIVES OF ADAPTEDNESS AND PURPOSE. R. 19.—1. I know [something] that [may] give you relief<sup>79</sup>.—2. I have found [somebody] who [might] be properly<sup>80</sup> entrusted<sup>81</sup> with the defence<sup>82</sup> of our cause.—3. He erected a fortification<sup>83</sup> in

<sup>1</sup> Render: Are you distinguished (*eximius*) [as] the only one in whom this holds good (*valere*)?—<sup>2</sup> Render: I have this [one as] the only [one] to whom.—<sup>3</sup> credere.—<sup>4</sup> Render: This [man] was condemned [as] the only [one] who was privy (*consciens*) of that crime (*scelus*).—<sup>5</sup> movere.—<sup>6</sup> unā.—<sup>7</sup> negare.—<sup>8</sup> referre.—<sup>9</sup> esse.—<sup>10</sup> calamitosus.—<sup>11</sup> to be anxious for something, aliquid querere.—<sup>12</sup> motus.—<sup>13</sup> to turn something to one's profit, aliquā re pasci.—<sup>14</sup> render by active construction 'which to do the laws neither command (*jubere*), nor prohibit'.—<sup>15</sup> vitam profundere.—<sup>16</sup> invalids = homo (sing.) valetudine parum prosperā usus.—<sup>17</sup> gerundial.—<sup>18</sup> dicere.—<sup>19</sup> beatus.—<sup>20</sup> miser.—<sup>21</sup> officium.—<sup>22</sup> which are owed (*debere*).—<sup>23</sup> alii...alii.—<sup>24</sup> quiddam.—<sup>25</sup> which from virtue can be separated rather by the idea (*cogitatio*) than by the thing.—<sup>26</sup> in utramque partem.—<sup>27</sup> apud philosophum persedēre.—<sup>28</sup> and drew (*ducere*) not even the color.—<sup>29</sup> omnino.—<sup>30</sup> quā.—<sup>31</sup> pervenire ad finis.—<sup>32</sup> civitas.—<sup>33</sup> say that Homer is their citizen.—<sup>34</sup> super-vacuum.—<sup>35</sup> ratio.—<sup>36</sup> Render by involution 'to which who has given himself, can by no means be unhappy'.—<sup>37</sup> nobis opus est.—<sup>38</sup> imperium legitimum.—<sup>39</sup> artes.—<sup>40</sup> = which effect that (*ut*) we are of use (ABSTR. DAT.) to the State.—<sup>41</sup> adhibere aliquid (gerundial).—<sup>42</sup> gravitas.—<sup>43</sup> constantia.—<sup>44</sup> to be proof against something, resistere alicui rei.—<sup>45</sup> gratia.—<sup>46</sup> accipere.—<sup>47</sup> rem familiārem querere.—<sup>48</sup> eis artibus.—<sup>49</sup> to be free from something, abesse ab aliquā re.—<sup>50</sup> turpitudine.—<sup>51</sup> Incorporate 'else' (*aliud*) in the relative clause.—<sup>52</sup> pro te.—<sup>53</sup> descendere.—<sup>54</sup> lignus.—<sup>55</sup> arca.—<sup>56</sup> humerus.—<sup>57</sup> optare (plur.).—<sup>58</sup> rus.—<sup>59</sup> frui.—<sup>60</sup> oblectamentum.—<sup>61</sup> agri colendi.—<sup>62</sup> oblectatio.—<sup>63</sup> conferre.—<sup>64</sup> studium.—<sup>65</sup> to search for something, aliquid anquirere.—<sup>66</sup> Render: 'That looks (*spectare ac valere*) towards (*ad*) living well and happily'.—<sup>67</sup> hic.—<sup>68</sup> perversitas.—<sup>69</sup> mores.—<sup>70</sup> desiderare.—<sup>71</sup> discutere.—<sup>72</sup> malum.—<sup>73</sup> homines nostri.—<sup>74</sup> ad singula.—<sup>75</sup> incedere (sing.).—<sup>76</sup> emere.—<sup>77</sup> certiorē facere (*fut.*).—<sup>78</sup> primo quoque tempore.—<sup>79</sup> salūtem afferre.—<sup>80</sup> recte.—<sup>81</sup> to entrust somebody with something, alicui aliquid credere.—<sup>82</sup> vindictio.—<sup>83</sup> locum munire.

which the soldiers [might] find a safe refuge<sup>1</sup> if they were pressed by the enemy.—4. Crops were growing in these fields which might serve<sup>2</sup> as pasture for the draught-horses.—5. Antonius has [something] to<sup>3</sup> promise<sup>4</sup> to his [adherents].—6. Fortune has given<sup>5</sup> me nothing to bestow<sup>6</sup>.—7. Camillus was deemed<sup>7</sup> worthy of being called<sup>8</sup> the second founder<sup>9</sup> of the city after<sup>10</sup> Romulus.—8. Virtue makes<sup>11</sup> men worthy of coming into communion<sup>12</sup> with<sup>13</sup> God.—9. Who seemed to us a fit person to receive gifts from<sup>14</sup>, cannot be unworthy of being our creditor<sup>15</sup>.—10. That architect was fully competent<sup>16</sup> to build<sup>17</sup> the bridge over<sup>18</sup> the river.—11. The horsemen, in order to<sup>19</sup> wipe out<sup>20</sup> by bravery the disgrace<sup>21</sup> of [their] flight, fought at all places.—12. The consul gave to D. Junius command<sup>22</sup> at the mouth<sup>23</sup> of the Volturnus river, with the order to send corn to the army whenever a<sup>24</sup> ship had arrived<sup>25</sup>.—13. Caesar made<sup>26</sup> the foot-soldiers<sup>27</sup> manœuvre<sup>28</sup> among the cavalry<sup>29</sup> that they might, by daily practice<sup>30</sup>, acquire<sup>31</sup> skill<sup>32</sup> in this kind of fighting<sup>33</sup>.—14. Every day a great number of ships assembled<sup>34</sup> for the purpose of carrying supplies<sup>35</sup> [to the army].—15. Armed [men] were placed at that very spot, who were to murder you.—16. Places in the Circus were assigned<sup>36</sup> to the Patricians and Knights, where each [rank] might have their own seats (*spectaculum*)<sup>37</sup>.—17. The Mamertini gave<sup>38</sup> to Verres both a city into which<sup>39</sup> to convey<sup>40</sup> his stealings<sup>41</sup>, and a ship in which to remove<sup>42</sup> [them].—18. Artaxerxes presented Themistocles<sup>43</sup> with the city of Magnesia, to furnish him with<sup>44</sup> bread; Lampasacus, from which<sup>45</sup> he was to take<sup>46</sup> [his] wine, [and] Myus<sup>47</sup>, from which he was to have [his] vegetables<sup>48</sup>.—19. The Rhodians sent Thrasyllus to Rome, in order that by his eloquence the good graces<sup>49</sup> of the Senate might be won for them<sup>50</sup>.—20. What hope of return<sup>51</sup> have we if we give to an unknown shipwrecked<sup>52</sup> [person] a vessel to convey<sup>53</sup> him home?—21. Moses established<sup>54</sup> new ceremonies<sup>55</sup> among the Jews, in order to strengthen thereby the nation for the future<sup>56</sup>.—22. Themistocles fortified<sup>57</sup> Port Piræus with walls, the more easily to defend the city.—23. I sent him word<sup>58</sup> that I would arrive in three days.—24. I have appointed<sup>59</sup> [a man] to take my place<sup>60</sup> if I cannot be present in person<sup>61</sup>.—25. Claudius hired<sup>62</sup> assassins<sup>63</sup> to take Milo's life by an ambush<sup>64</sup>.

XIII. RELATIVE SUBJUNCTIVE OF QUALITY. R. 20.—1. Antonius will be the man to whom crowds<sup>65</sup> of profligate citizens will flock from all quarters<sup>66</sup>.—2. Apronius was a man who had the privilege<sup>67</sup> both to say and to write with impunity<sup>68</sup> everything<sup>69</sup> he wished.—3. Sulpicius is not the man to be afraid lest his principles<sup>70</sup> be in danger<sup>71</sup> from the artifices<sup>72</sup> of [any] prepared<sup>73</sup> speech.—4. I am not the man to pronounce<sup>74</sup>, whatever we see<sup>75</sup>, to be such<sup>76</sup> as we see it.—5. These men will be such<sup>77</sup> as to consent<sup>78</sup> to nothing prejudicial<sup>79</sup> to the public interest<sup>80</sup>.—6. P. Crassus was in a position (*is*) that nobody in the republic thought himself superior<sup>81</sup> to him either<sup>82</sup> in honor or in wealth<sup>83</sup>.—7. You are a man who have always been on the side<sup>84</sup> of the patriots<sup>85</sup>.—8. The chief-commander was a man in whom the soldiers placed unbounded confidence<sup>86</sup>; the other officers<sup>87</sup> were men who had seen service<sup>88</sup> in Spain under<sup>89</sup> Sertorius.—9. [This sentence, and No. 10, 11, 12, to be transformed into relative constructions with attributive synthetic antecedents, according to Obs. 6.] The works which M. Agrippa erected<sup>90</sup> in the

<sup>1</sup> Periculum.—<sup>2</sup> = in which the draught-horses [might] be pastured (*pascere*).—<sup>3</sup> relative.—<sup>4</sup> polliceri.—<sup>5</sup> invenire.—<sup>6</sup> dare.—<sup>7</sup> habere.—<sup>8</sup> by active construction (*I am called* = they call (*ferre*) me).—<sup>9</sup> conditor.—<sup>10</sup> a.—<sup>11</sup> efficere.—<sup>12</sup> consortium.—<sup>13</sup> genitive.—<sup>14</sup> Render: Who seemed to us worthy 'of whom' we should receive gifts (*beneficium*).—<sup>15</sup> Render: 'Unworthy to whom we owe' (*debere*).—<sup>16</sup> fully competent, satis idoneus.—<sup>17</sup> *præesse* with gerundial dative (*faciendo*).—<sup>18</sup> in.—<sup>19</sup> Can 'in order to' be rendered here by a relative?—<sup>20</sup> delere.—<sup>21</sup> turpitudine.—<sup>22</sup> preponere.—<sup>23</sup> ad ostium.—<sup>24</sup> by 'ut quisque'.—<sup>25</sup> accedere.—<sup>26</sup> jubere.—<sup>27</sup> legionarius.—<sup>28</sup> præliari.—<sup>29</sup> equites.—<sup>30</sup> consuetudo.—<sup>31</sup> percipere.—<sup>32</sup> skill in, usus, with genitive.—<sup>33</sup> præliorum.—<sup>34</sup> convenire.—<sup>35</sup> commensum supportare.—<sup>36</sup> Render: Places were divided to etc.—<sup>37</sup> Render: Where each [rank] might make spectacles to themselves.—<sup>38</sup> præbere.—<sup>39</sup> by the locative adverb.—<sup>40</sup> deportare.—<sup>41</sup> furtum (plur.).—<sup>42</sup> exportare.—<sup>43</sup> dat.—<sup>44</sup> = furnish (*præbere*) to him bread.—<sup>45</sup> locat. adverb.—<sup>46</sup> sumere.—<sup>47</sup> GEN. Myuntis.—<sup>48</sup> opsonium (sing.).—<sup>49</sup> to win the good graces, voluntatem conciliare.—<sup>50</sup> dative of the interested person.—<sup>51</sup> recipere beneficium.—<sup>52</sup> naufragus.—<sup>53</sup> = by which he may be forwarded back (*reverti*).—<sup>54</sup> constituere aliquid alicui.—<sup>55</sup> ritus.—<sup>56</sup> in posterum.—<sup>57</sup> munire.—<sup>58</sup> sent [persons] who were to announce.—<sup>59</sup> constituere.—<sup>60</sup> meo nomine agere.—<sup>61</sup> ipse.—<sup>62</sup> conducere.—<sup>63</sup> sicarius.—<sup>64</sup> to take one's life by an ambush, aliquem improvidum ex insidiis opprimere.—<sup>65</sup> Render: 'To whom runnings (*concursus*) of profligate (*perditus*) citizens [will] be made.—<sup>66</sup> undique.—<sup>67</sup> = to whom it was allowed (*licet*).—<sup>68</sup> impune.—<sup>69</sup> by the indefinite relative.—<sup>70</sup> fides (sing.).—<sup>71</sup> to be in danger, temptari.—<sup>72</sup> insidiæ.—<sup>73</sup> compositus.—<sup>74</sup> dicere.—<sup>75</sup> = whatever is seen.—<sup>76</sup> talis qualis.—<sup>77</sup> talis.—<sup>78</sup> to consent to something, aliquid sententiis confirmare.—<sup>79</sup> = which seems to be contrary (*obesse*) to etc.—<sup>80</sup> utilitas.—<sup>81</sup> = that nobody preferred (*anteferre*) himself to him (relatively expressed).—<sup>82</sup> neither.—<sup>83</sup> fortune.—<sup>84</sup> to be on somebody's side, alicuius partes sequi.—<sup>85</sup> boni.—<sup>86</sup> summe confidere.—<sup>87</sup> dux.—<sup>88</sup> stipendia facere.—<sup>89</sup> apud.—<sup>90</sup> excitare.

city, were such that they both surpassed<sup>1</sup> the magnificence of former<sup>2</sup> [works], and remained<sup>3</sup> unsurpassed in the future.—10. Perhaps what you will hear from me is such, that not all will approve<sup>4</sup> of it.—11. The act<sup>5</sup> which the tribunes had undertaken was such that it aroused<sup>6</sup>, not the lowest classes<sup>7</sup>, but the very heads of the Plebeians<sup>8</sup>.—12. King Dejotarus's<sup>9</sup> troops never were of a quality that he could make war<sup>10</sup> with them on the Roman people.—13. We were distinguished<sup>11</sup> by qualities<sup>12</sup> that do not show<sup>13</sup> themselves in battle.—14. The people conferred<sup>14</sup> the highest power<sup>15</sup> on a man<sup>16</sup> who, before, had in a most disgraceful manner<sup>17</sup> broken<sup>18</sup> the laws.—15. What State is so strong<sup>19</sup> that it might not be utterly<sup>20</sup> destroyed<sup>21</sup> by hate<sup>22</sup> and discord<sup>23</sup>?—16. No force<sup>24</sup> is so great that it might not be broken<sup>25</sup> by the sword<sup>26</sup>.—17. Was there ever a man<sup>27</sup> so cruel, as to forbid anyone to mourn?—18. Nobody is so hostile to our cause as to call us bad citizens.—19. Nothing has ever happened so unfortunately<sup>28</sup>, that it should not be useful<sup>29</sup> to some one.

XIV. CAUSAL AND ADVERSATIVE RELATIVE CLAUSES. R. 21.—1. The governor<sup>30</sup> of the State, who was of the opinion<sup>31</sup> that he should do his official<sup>32</sup> duty without any regard to party, rejected<sup>33</sup> the offer<sup>34</sup>.—2. Zopyrus was derided by the others, who did not acknowledge<sup>35</sup> these vices [to exist] in Socrates.—3. I know that the master was angry, since I played the eavesdropper<sup>36</sup>.—4. Sleep embraced<sup>37</sup> me, since I had been awake<sup>38</sup> till late<sup>39</sup> in the night.—5. This is altogether<sup>40</sup> your own fault<sup>41</sup>, since you despised the advice we tendered<sup>42</sup> to you at your departure<sup>43</sup>.—6. The servants, who were of the same stamp<sup>44</sup> as their master, treated Habonius most shamefully.—7. We ourselves, although we were strongly attached<sup>45</sup> to that party<sup>46</sup>, are daily more estranged<sup>47</sup> [from it].—8. Nero, although he was given<sup>48</sup> to a most immoderate debauchery, was only three times indisposed during his whole life<sup>49</sup>.—9. Should that man have been elected without bribe<sup>50</sup>, who, besides his wealth, had nothing at all to gain the favor<sup>51</sup> of his fellow-citizens?—10. I believe<sup>52</sup>, I did wrong<sup>53</sup> that I left<sup>54</sup> you.—11. You yourself acknowledged<sup>55</sup> this to be correct<sup>56</sup>, when<sup>57</sup> you refused<sup>58</sup> to follow Pompey to the war<sup>59</sup>.—12. We admire Fabricius for his belief<sup>60</sup> that even the enemy has some rights which we are bound to respect<sup>61</sup>.—13. I am very thankful<sup>62</sup> to old age<sup>63</sup> for<sup>64</sup> increasing my eagerness<sup>65</sup> for conversation<sup>66</sup>, [and for] abating<sup>67</sup> [my eagerness] for drink<sup>68</sup> and food.—14. What place can bravery have<sup>69</sup> in him who says that pain is the greatest evil?—15. We admire the bravery of those who, in battle, prefer<sup>70</sup> death to flight.—16. Having refused<sup>71</sup> to rule<sup>72</sup> in his own State, he could not be a subject<sup>73</sup> in a foreign<sup>74</sup> [one].—17. Observe the discretion<sup>75</sup> of [the] Gauls. Not knowing<sup>76</sup> the life and nature of men, and having heard [only] so much that P. Sulla and the others were in the same<sup>77</sup> distress<sup>78</sup> as<sup>79</sup> Cethegus, they asked whether they had<sup>80</sup> the same purpose<sup>81</sup>.—18. Who throttled<sup>82</sup> his intimate<sup>83</sup> [friend], what will he<sup>84</sup> do with<sup>85</sup> an enemy if an opportunity offers<sup>86</sup>?—19. You cannot<sup>87</sup> [any] longer retain in [the command of] the province a man<sup>88</sup> who is making with the enemy treaties<sup>89</sup> disposing<sup>90</sup> of our allies, and with our allies [is making treaties] disposing of our citizens.—20. I shall unhesitatingly<sup>91</sup> defend a man<sup>92</sup> whom whole provinces wish to be safe<sup>93</sup>.—21. Having attacked<sup>94</sup> this party<sup>95</sup> with the fiercest<sup>96</sup> hatred, he now became<sup>97</sup> its most ardent supporter.—22. This is a

<sup>1</sup> Vincere.—<sup>2</sup> prior.—<sup>3</sup> Render: And were surpassed by no [magnificence] afterwards.—<sup>4</sup> probare aliquid.—<sup>5</sup> actio.—<sup>6</sup> accendere.—<sup>7</sup> infima plebs (sing.).—<sup>8</sup> plebs (sing.).—<sup>9</sup> = King Dejotarus had those troops.—<sup>10</sup> bellum interire alicui.—<sup>11</sup> prestare.—<sup>12</sup> ex res.—<sup>13</sup> = which do not go forward (propterea) into battle (merely determining the antecedent res).—<sup>14</sup> deferre.—<sup>15</sup> imperium.—<sup>16</sup> is.—<sup>17</sup> by the adverb (turpis).—<sup>18</sup> violare.—<sup>19</sup> firmus.—<sup>20</sup> funditus.—<sup>21</sup> evertere.—<sup>22</sup> plur.—<sup>23</sup> discidium (plur.).—<sup>24</sup> vis.—<sup>25</sup> frangere.—<sup>26</sup> ferrum.—<sup>27</sup> by equis.—<sup>28</sup> male.—<sup>29</sup> prodesse.—<sup>30</sup> praefectus.—<sup>31</sup> existimare.—<sup>32</sup> Render: That offices should [be] performed (prestare) without faction (factio).—<sup>33</sup> respuere.—<sup>34</sup> conditio.—<sup>35</sup> agnoscere.—<sup>36</sup> ad fores auscultare.—<sup>37</sup> complecti.—<sup>38</sup> vigilare.—<sup>39</sup> multa nox.—<sup>40</sup> omnino.—<sup>41</sup> culpa (that thy altogether fault is).—<sup>42</sup> offerre.—<sup>43</sup> partic. constr., by proficiscens.—<sup>44</sup> mores.—<sup>45</sup> deditissimus.—<sup>46</sup> pars.—<sup>47</sup> abalienare.—<sup>48</sup> = to be of most immoderate luxury.—<sup>49</sup> = languished altogether (omnino) thrice.—<sup>50</sup> gratis (the question to be expressed in the indicative and without any interrogative particle).—<sup>51</sup> to gain the favor, animos sibi conciliare.—<sup>52</sup> videor.—<sup>53</sup> peccare.—<sup>54</sup> discedere ab.—<sup>55</sup> iudicare.—<sup>56</sup> verus.—<sup>57</sup> relative.—<sup>58</sup> nolle.—<sup>59</sup> in castra.—<sup>60</sup> = who believed.—<sup>61</sup> Paraphrase: That there exists (esse) some crime (nefas) even against (in) the enemy (hostis).—<sup>62</sup> magnam gratiam habere.—<sup>63</sup> senectus.—<sup>64</sup> relative.—<sup>65</sup> aviditas, with genitive.—<sup>66</sup> sermo.—<sup>67</sup> tollere.—<sup>68</sup> potio.—<sup>69</sup> by esse.—<sup>70</sup> anteponere.—<sup>71</sup> nolle (relative construction).—<sup>72</sup> principem esse.—<sup>73</sup> to be a subject, servire.—<sup>74</sup> allēna.—<sup>75</sup> diligentia.—<sup>76</sup> nosse (relative construction).—<sup>77</sup> par.—<sup>78</sup> calamitas.—<sup>79</sup> relative.—<sup>80</sup> esse in.—<sup>81</sup> voluntas.—<sup>82</sup> jugulare.—<sup>83</sup> familiaris.—<sup>84</sup> is.—<sup>85</sup> dative.—<sup>86</sup> dari (abl. abs. in the perf.).—<sup>87</sup> by an affirmative imperative sentence.—<sup>88</sup> is.—<sup>89</sup> pactiōnes facere (at the end of the period).—<sup>90</sup> disposing of = de.—<sup>91</sup> sine ulla dubitatione.—<sup>92</sup> is.—<sup>93</sup> salvus.—<sup>94</sup> persequi (relative construction).—<sup>95</sup> factio.—<sup>96</sup> acer.—<sup>97</sup> = began to support (adjuvare atque ornare) it with the greatest now zeal.

most grievous<sup>1</sup> error indeed<sup>2</sup>, which (et qui) may be fatal<sup>3</sup> to the safety of the republic<sup>4</sup>.—23. The reason of man is imperfect, but perfectible<sup>5</sup>.—24. The Syracusians, [being] men of experience<sup>6</sup>, who (i. e. 'so that they') were able to see in the dark<sup>7</sup>, kept an account<sup>8</sup> of the pirates that were daily beheaded<sup>9</sup>.—25. Archagathus, a noble-minded<sup>10</sup> man, who (i. e. 'so that he') wished to be loved and esteemed<sup>11</sup> by his [towns-men], felt sore<sup>12</sup> that such an office<sup>13</sup> should have been tendered<sup>14</sup> to him.—26. [These men], old-fashioned people<sup>15</sup>, who (i. e. 'so that they') judged<sup>16</sup> others<sup>17</sup> from their [own] character<sup>18</sup>, believed [this statement].—27. [That] timid and inexperienced<sup>19</sup> man, who had neither courage nor intelligence<sup>20</sup> enough, did not think the inheritance to be worth so much<sup>21</sup>, that he should endanger<sup>22</sup> [thereby] his citizenship.—28. O the sordid<sup>23</sup> [men] who accepted the gift, [and] the wicked<sup>24</sup> [man] who gave [it]!—29. O imprudent<sup>25</sup> youth, who didst surrender thyself to the faith of a tyrant!—30. It is not easy<sup>26</sup> to recognize a flatterer, since (quippe) he frequently flatters<sup>27</sup> [while] pretending<sup>28</sup> to gainsay<sup>29</sup>, and at last<sup>30</sup> suffers himself to be convinced<sup>31</sup> by better<sup>32</sup> arguments.—31. Although<sup>33</sup> Plato was cruelly injured<sup>34</sup> by Dionysius, since (quippe) [the latter] had ordered him to be sold into slavery<sup>35</sup>, he yet returned to Syracuse.—32. The consul did not restrain<sup>36</sup> the ardor of the legions, knowing<sup>37</sup> that the raw recruits<sup>38</sup> of the enemy were not equal to the contest<sup>39</sup>.—33. A great part of the Fidiates, having<sup>40</sup> been added as colonists<sup>41</sup> to the Romans, knew the Latin<sup>42</sup> [language].—34. You cannot wonder that I should dislike<sup>43</sup> him to whom the Roman people is inimical<sup>44</sup>, especially since I, in return for the favors<sup>45</sup> of the Roman people, should<sup>46</sup> take<sup>47</sup> even more than my share<sup>48</sup> in<sup>49</sup> the burdens<sup>50</sup> and duties<sup>51</sup> [due to it].

XV. LOCATIVE CLAUSES (§ 616).—1. Where the king had fallen, a sepulcher was constructed.—2. When the enemy had come to that [place] where our [soldiers] were hidden in ambush, those [that were] fleeing suddenly stopped<sup>61</sup>, and, turning around, made an attack on [their] pursuers<sup>62</sup>.—3. Till a ship has come to the place for which a passage has been taken [in it]<sup>63</sup>, it does not belong<sup>64</sup> to the owner<sup>65</sup>, but to the passengers<sup>66</sup>.—4. You must directly return there from where you have departed.—5. The inhabitants, in the third night-watch, made a sally<sup>67</sup> from the town [on that side] where<sup>68</sup> the ascent<sup>69</sup> to our fortifications seemed to be least steep<sup>70</sup>.—6. They met<sup>71</sup> the Gauls eleven miles<sup>72</sup> [from the city], where<sup>73</sup> the river Allia mixes<sup>74</sup> its waters with those of the Tiber.—7. They returned<sup>75</sup> to Rome, where 'he war was preparing<sup>76</sup> with the greatest energy<sup>77</sup>.—8. I departed from Syracuse<sup>78</sup> from which [place] the passage<sup>79</sup> to Greece was said to be safest.—9. On the third, May I left<sup>80</sup> Tarsus where<sup>81</sup> I had arrived the day before<sup>82</sup>.—10. I pray<sup>83</sup> [to] thee, O Juno, to (ut) follow us into our city, where a temple, worthy of thy greatness<sup>84</sup>, will receive<sup>85</sup> thee.—11. The consul accepted the capitulation of the city<sup>86</sup>, to which the routed army<sup>87</sup> had fled<sup>88</sup>.—12. I thought<sup>89</sup> it necessary<sup>90</sup> to point out<sup>91</sup> the sources from which you might draw<sup>92</sup> this knowledge<sup>93</sup>.—13. We are not going to suffer<sup>94</sup> in this country<sup>95</sup> any one from whom<sup>96</sup> danger may come to our liberty.—13. The consul occupied that town in order<sup>97</sup> to collect<sup>98</sup> there the supplies<sup>99</sup> for the army.

<sup>1</sup> Lamentabilis.—<sup>2</sup> sane.—<sup>3</sup> exitiosus.—<sup>4</sup> salus publica.—<sup>5</sup> = but which can be perfected.—<sup>6</sup> of experience, peritus.—<sup>7</sup> occulta videre.—<sup>8</sup> rationes habere.—<sup>9</sup> secūri ferri (quasi-oblique subjunctive, as if an indirect question).—<sup>10</sup> nobilis.—<sup>11</sup> diligere.—<sup>12</sup> graviter ferre (with infinitive-clause).—<sup>13</sup> provincia.—<sup>14</sup> dare.—<sup>15</sup> homines antiqui.—<sup>16</sup> fingere.—<sup>17</sup> ceteri.—<sup>18</sup> natura.—<sup>19</sup> imperitus.—<sup>20</sup> consilium.—<sup>21</sup> p. 267, Obs. 4; p. 270 R. 35.—<sup>22</sup> Render: That he should come into doubt (dubium) on [his] citizenship (civitas).—<sup>23</sup> sordidus.—<sup>24</sup> improbus.—<sup>25</sup> improvidus.—<sup>26</sup> = A flatterer (assentator) is not easily recognized (agnoscere). Obs. 1.—<sup>27</sup> blandiri.—<sup>28</sup> simulare, with infinitive-clause.—<sup>29</sup> litigare.—<sup>30</sup> ad extremum.—<sup>31</sup> vincere.—<sup>32</sup> potior.—<sup>33</sup> quum.—<sup>34</sup> violare.—<sup>35</sup> to be sold into slavery, venundari.—<sup>36</sup> not to restrain, indulgere with dat.—<sup>37</sup> by ut with the relative.—<sup>38</sup> novus miles (sing.).—<sup>39</sup> to be equal to the contest, satis certamini esse.—<sup>40</sup> colonus.—<sup>41</sup> p. 34, R. 38.—<sup>42</sup> alicui inimicum esse.—<sup>43</sup> infestus.—<sup>44</sup> pro voluntate.—<sup>45</sup> debere.—<sup>46</sup> suscipere.—<sup>47</sup> quam pars virilis postulat.—<sup>48</sup> partitive genitive, dependent on plus.—<sup>49</sup> onus (sing.).—<sup>50</sup> munus (sing.).—<sup>51</sup> consistere.—<sup>52</sup> Render: and carried (inferre) the converted standards (stigma) against the pursuing (insequi).—<sup>53</sup> Render: Till (quoad) 'it has been come' (pervenire. IMPERS. PASS.) thither whither a ship has been taken (sumere).—<sup>54</sup> esse.—<sup>55</sup> dominus.—<sup>56</sup> navigantes.—<sup>57</sup> eruptio.—<sup>58</sup> p. 218, (c).—<sup>59</sup> as censens.—<sup>60</sup> arduus.—<sup>61</sup> occurrere (impers. pass.).—<sup>62</sup> by lapis (p. 220, Obs. 1).—<sup>63</sup> Render: Where the river Allia is mixed to the Tiberine (Tiberinus) stream.—<sup>64</sup> impers. pass.—<sup>65</sup> parare.—<sup>66</sup> vis.—<sup>67</sup> trajectus.—<sup>68</sup> = departed from.—<sup>69</sup> pervenire (see p. 37, R. 67).—<sup>70</sup> pridiē ejus diēi.—<sup>71</sup> precari.—<sup>72</sup> amplitudo.—<sup>73</sup> subjunctive by attraction.—<sup>74</sup> urbem in deditiōnem accipere.—<sup>75</sup> fusā acies.—<sup>76</sup> se conferre.—<sup>77</sup> putare.—<sup>78</sup> gerundial of the main verb.—<sup>79</sup> demonstrare.—<sup>80</sup> haurire.—<sup>81</sup> doctrina.—<sup>82</sup> pati, with infinitive-clause (to be in this country etc).—<sup>83</sup> civitas.—<sup>84</sup> adverb.—<sup>85</sup> relative construction.—<sup>86</sup> comportare. Render passively (the supplies to be collected).—<sup>87</sup> commeatus.

## CHAPTER THIRD.

## THAT-CLAUSES.

## I. COMPLETING THAT-CLAUSES.

§ 617. THAT-CLAUSES are either *completing*, or *adverbial* (§ 456; § 610, R. 3, OBS. 1, p. 482 foll.). The former are those which *complete* the idea of their governing words in the principal sentence. They have either the form of an infinitive-clause, or the form of a finite clause introduced by *ut* (*ut*), *ne*, *quin*, *quominus*, or *quod*. *Quod* requires the predicate of the clause to be in the INDICATIVE, except if the clause is *oblique* (p. 388). The other conjunctions require a SUBJUNCTIVE in all That-clauses, whether the clause contains an oblique, or a direct statement. — Sometimes finite That-clauses take an *asyndetic* form (p. 473, OBS. 3), their predicates being in the subjunctive (R. 24, OBS. 1, 6).

OBS. The form of completing That-clauses is determined 1) by the nature of the clause (R. 24, OBS. 1); 2) by the governing word in the principal sentence. Completing That-clauses are either (a) in the relation of OBJECTS to the (logical) predicate of the principal sentence, or (b) in the relation of SUBJECTS to the same, or (c) in the relation of ATTRIBUTES to a noun. They also may (d) perform the function of PREDICATES of the principal sentence (p. 486 foll.). Completing That-clauses, accordingly, are divided into OBJECT-CLAUSES, SUBJECT-CLAUSES, ATTRIBUTE-CLAUSES, and PREDICATE-CLAUSES.

## A. OBJECT THAT-CLAUSES.

Rem. 22. OBJECT THAT-CLAUSES take the following forms: 1. That of an INFINITIVE CLAUSE if they depend on a *verbum sentiendi* or *declarandi*, and contain an *oblique declarative* statement (p. 387, R. 81). — 2. They take the form of an Ut-clause (negatively *ne*); (a) if they are dependent on a *verbum declarandi*, and contain an *oblique imperative* statement (p. 389, R. 83); (b) if they depend on a *verbum faciendi*, implying an *aim* which is specified by the That-clause (R. 25). — 3. They take the form of a clause introduced by *ne*, *quin*, or *quominus*, if they depend on a *verbum faciendi* implying a *negative aim* which is specified by the That-clause (R. 25, OBS. 5 foll.). — 4. They take the form of a *Quod*-clause or of an *Ut*-clause if the governing verb does not belong to any of the first three classes. These clauses represent the idea of a fact which is treated like a *substantive* object (transitive, intransitive, or prepositional), dependent on the principal predicate (R. 26). There are several idiomatic exceptions to all these rules.

1. *Verba sentiendi*.

Rem. 23. *Verba sentiendi* are those that express an act of the mind (*sensire*, *intelligere*, *meminisse*, *discere*, *existimare*, *credere*, *gaudere*, *vereri*, *cupere*, *pati* etc.), or an act or impression of the senses (*videre*, *sensire*, *audire* etc.). The That-clauses dependent on them are oblique clauses and generally have the form of an INFINITIVE clause (p. 387, R. 81) with the following exceptions: 1) verbs of fearing (OBS. 1); 2) the verb *dubitare* with a negative (OBS. 2-4); 3) verbs of emotion (OBS. 5, 6); 4) verbs

of volition (OBS. 7); 5) those *verba sentiendi* which in certain connections have assumed the signification of other classes of verbs (as *sperare*, *censere*, *videre*). See OBS. 8-10.

OBS. 1. Verbs of FEARING require *Ne*-clauses or *Ut*-clauses (*ne non*), according to § 408, R. 56, as: *Vereor ne nobis Idus Martiae nihil dederint, praeter letitiam*; I am afraid that the Ides of March have given us nothing except (a temporary) joy. Cic. Att. 14, 12. *Foris ut redderentur*; I was afraid they would not be returned. Ib. Fam. 12, 19, 1. *Vereor ne non liceat*; I am afraid that it is not allowed. Ib. Att. 2, 19, 3. The construction of verbs of fearing with an infinitive clause, or with an object-infinitive is rare, and mostly anteclassical, poetical, or postclassical (see Cic. Fin. 2, 13, 39). For the construction of verbs of fearing with interrogative clauses see p. 391, OBS. 1, c. (See also Cic. Att. 7, 1, 3; 9, 6, 6; 13, 21.) — For the tense of the subjunctive see p. 448, OBS. 1, 2.

OBS. 2. That-clauses dependent on *dubitare* with a negative, or with what is equivalent to a negation, take the form of *Quin*-clauses. *Quin* in this construction is rendered by 'that' (but that), and *quin non* by 'that not', as: *Agamemnon non dubitat quin brevi sit Troja peritura*. Cic. Sen. 10. — *Quam dubitaret nemo quin abs te pecunia liberatus esset*. Ib. Verr. 2, 5, 30. — *An hoc dubitabit quisquam quin is venalem jurisdictionem haberet*? Ib. 2, 2, 48. — *Dubitabitur igitur, iudices, si non dubitabitur quin vos Laterenensium negotiorum elucere non possim* (that I will not escape the charge of negligence). Ib. Verr. 2, 1, 49. — *Non dubitavit Xeno quin impetrare non posset*. Ib. Att. 5, 11, 6\*. — Livy sometimes (for inst. 22, 55; 36, 41), and Nepos (or his epitomizer) almost always, construe *non dubitare* with an infinitive clause\*\*. In later prose this construction became the regular one.

OBS. 3. *Non dubitare*, in the meaning 'not to hesitate' (when the logical subject of the principal predicate is the same as that of the clause), is generally construed with an object-infinitive, as: *Ebrius non dubitavit id ipsum, quod arguitur, confiteri*. Cic. Cat. 1, 2. But often, even in this meaning of *non dubitare*, a *Quin*-clause is used, as: *Dubitare non debes quin tam honestum municipium tibi in perpetuum obligare velis*. Cic. Fam. 13, 42. Comp. Ib. Mil. 23, 63; L. M. 16, 49; 23, 68; L. Agr. 2, 26, 69; Att. 1, 11 D. 3. This construction is necessary if *dubitare* is in the periphrastic conjugation in *dum*, as: *Tam vero dubitandum non existimavit quin ad eos proficeretur*. Cæs. B. G. 2, 21. — *Non dubitandum putavi quin succurrerem*. Cic. Fam. 10, 18. Thus with *non cunctandum esse*: *Cæsar non cunctandum existimavit quin pugna decertaret*. Cæs. B. G. 3, 23.

OBS. 4. Sometimes other verbs of feeling and thinking, implying, like *dubitare*, a negative, if combined with negations (as *non negare*, *non ignorare*, *non aliter sentire*), occur with *Quin*-clauses in place of infinitive clauses, as: *Respondit, negare non posse quod res sit exortum milti*. Liv. 40, 36. — *Quis ignorat quin tria Graecorum genera sint*? Cic. Fac. 25. — *Quis ignorat quin id longe sit honestissimum*? Quint. 12, 7, 8. — *Non jam aliter senties quin omni ex an interdicti viderentur*. Cic. Cæs. 11, 31. — Thus *non mittere*, and *non cerere*, in a few ante-classical and post-classical passages, are construed with *quin* (= *ne non*), as: *Non metuo quin meo uxori late suppetiae sint*. Plaut. Am. 4, 1, 54. — *Non vereor quin id quod postulo libenter sequamini*. Rut. Lup. 2, 17. (Comp. foot-note to R. 24). — For the construction of negative impersonals, and negative substantives with *Quin*-clauses, see R. 27 and 28. — For the construction of negative *verba faciendi* with *quin*, see R. 25, OBS. 5.

OBS. 5. *Verba sentiendi* expressing EMOTION are construed with *That*-clauses to denote

\* The original conception of the conjunction *quin*, in this construction, was not that of an affirmative conjunction, but that of an interrogative negative adverb (*quin* = *quid non*, or *cur non*; *non dubito quin hoc verum sit* = I have no doubt 'why this should not be true'). The construction of *non dubitare* etc. with an interrogative clause is not rare in classical prose, as: *Non dubito quid nobis agendum putes*. Cic. Att. 10, 1. — But the original force of *quin* seems to have been obscure even to the ancients. Thus Gelius (N. A. 17, 13), who quotes many passages in which *quin* is improperly used by certain writers, remarks that many do not understand the true force of this 'compound and periphrastic conjunction', referring his readers to a chapter in the 'commentarii grammaticii' of Nigidius Figulus, Cicero's contemporary and friend, where an exhausting treatment of the subject would be found.

\*\* The English grammarians quote the following passage as a proof, that the construction of *non dubitare* (in the meaning 'not to doubt') with an infinitive clause, occurs in Cicero: *Nam Pompejus non dubitat ea, quae de republica nunc sentiat, mihi probari*. Cic. Att. 7, 1, 3. But the passage reads thus: *Nam Pompejus non dubitat. Vere enim iudicat ea, quae de republica nunc sentiam, mihi probari*.

Mithridates se Bosphorānis bellum *inferre simulabat* (designated a war). Ib. L. M. 4, 9. Very rarely *spēdere*, and *pollicēri* are construed with an object-infinitive, as: *Qui pollicentur obsides dare*. Cæs. B. G. 4, 21.—Magnitudine pœnæ reliquos *deterreere sperans*. Ib. B. C. 3, 8.

## 2. Verba declarandi.

Rem. 24. Verba declarandi denote the utterance or manifestation of a feeling, thought, or impression. The That-clauses dependent on them take 1) the form of an infinitive clause if they contain a declarative statement (Obs. 1).—2) They take the form of an imperative clause (p. 389, R. 83) if the governing verb denotes the utterance of *edition* (Obs. 1–8).—3) They take the form of a *Quod*-clause if they contain the utterance of emotions or certain other feelings (Obs. 9).\*

Obs. 1. The That-clauses dependent on the general verba declarandi *dicere, scribere, nuntiare, docere* etc., are usually conceived as *declarative* (p. 480) and hence take the form of an infinitive clause (see the Ex. p. 400). But they may be conceived as *commanded* or *willed* by the subject, in which instance the English language uses either the form of an object-infinitive with 'to' ('he told him to go'), or that of a That-clause with 'should', 'ought', or other auxiliaries denoting compulsion. Such clauses must either take the form of an imperative clause in Latin (with *ut, ne*, or the mere subjunctive), or, if they have passive predicates, the form of an infinitive clause with a gerundial predicate, as: *Dixeram tibi a principio ut silerēmus* (that we should be silent). Cic. Brut. 42, 157.—*Isti patribus conscriptis, ne unā plagā conciderent; vulnus esse ejusmodi quod mihi nec dissimulandum, nec pertimescendum videretur*. Ib. Att. 1, 16, 9.—(Here 'ne unā plagā conciderent' is conceived as an imperative clause; but the coordinate That-clause 'vulnus esse ejusmodi etc.' is declarative.)—*Mittit qui nuntiarent ne hostis prælio lacerarent* (not to attack). Cæs. B. G. 4, 11.—*Philosophia nos docuit ut nosmet ipsos nosceremus* (has taught us the duty of knowing ourselves). Cic. Leg. 1, 22.—*Doct longē aliā ratione docuit esse gerendum*. Cæs. B. G. 7, 11.—If 'concedere' means 'to admit something as true', it requires an infinitive clause; but if it means 'to permit' it requires an imperative clause with *ut* or the mere subjunctive, as: *Concedo tibi ut ea prætereas, quæ, quum taces, nulla esse concedis*. Cic. R. A. 19, 51.—*Persuadere*, in the meaning 'to convince the truth of something' is construed with an infinitive clause, but, in the meaning 'to persuade' requires an imperative clause, as: *Civitati persuasit ut de finibus suis exirent; persicillare esse Gallie imperio potiri*. Cæs. B. G. 1, 2.—*Socrates Alcibiadi persuasit, eum nihil hominis esse*. Cic. Tusc. 3, 32, 77.—*Monere*, in the meaning 'to remind of a fact' requires an infinitive clause, but in the meaning 'to exhort' must have an imperative clause: *Res ipsa monēbat, tempus esse*. Cic. Att. 10, 8.—*Pompejum monēbat ut meam domum metueret*. Ib. Sest. 64, 153.

\* Clauses with *quoniam*, dependent on verba declarandi, are rare exceptions, nor can generally a *Quoniam*-clause be used after such verbs. But *non dicere* is sometimes (rarely) construed with *quoniam*, to denote that the statement cannot be contested; as: *Dicit non potest quoniam* (it cannot be contested that) *ei qui nihil metuant, beati sint*. Cic. Tusc. 5, 7, 17.—*Non potest dici quoniam* commode fiat. Auct. Her. 4, 28.—*Nemo est qui aliter dicat quoniam* omnium naturalium simile esset id ad quod omnia referuntur. Cic. Fin. 4, 13, 32.—Thus *Quoniam*-clauses are sometimes used with expressions denoting 'not to question', 'not to dispute', as: *Non ambigitur quoniam* Brutus pessimo exemplo id facturus fuerit. Liv. 2, 1.—*In controversia non erat quoniam* verum dicerent. Cic. Cæc. 11, 31.—*Quoniam* a cæcitate murum non queritur. Quint. 4, 4, 4.—*Nec diu amplexandam quoniam* Agrippina claritudine generis antefret. Tac. Ann. 12, 6. For the use of *quoniam* with impersonal verbs see R. 28, Obs. 3, 5, 7.

† Sometimes *dicere* is used with an *Ut*-clause where, at first sight, an infinitive clause should seem to be proper, as: *De divi neque ut sint, neque ut non sint, habeo dicere*. N. D. 1, 23, 63. Here the *Ut*-clause is tersely used in an ironical sense, to intimate that such an assertion would sound like a presumptuous dictation that the gods should exist, or not exist.

‡ The clause with a verbum dicendi after *mittere*, denoting the message sent, is frequently omitted. The dependent That-clause, in this instance, takes either the form of an infinitive clause, or that of an imperative clause, according as a mere statement, or an order is conveyed. *Mittere* corresponds then to the English 'to send word', as: *Ego puerum volo mittere ut* habeat animum bonum; I am going to send her word by a slave that she must be of good cheer. Plant. Pers. 3, 86.—*Fabius ad collēgam misit, exercitu opus esse qui* Campānis opponeretur. Liv. 24, 19.

§ Similarly *discere* occurs with an *Ut*-clause if it refers to the learning of a duty, as: *Se a patribus suis didicisse ut* magis virtute quam dolo contenderent; They had learned the duty of waging their wars more by bravery than by treachery. Cæs. B. G. 1, 13.

Obs. 2. Imperative clauses contain the following different kinds of volition: 1) requests, prayer, demand, and invitation (Obs. 3); 2) advice, proposition, and exhortation (Obs. 4); 3) resolution and stipulation (Obs. 5); 4) order, charge, command, and expressed wish (Obs. 6, 7); 5) permission (Obs. 8). These different kinds of expressed volition, are indicated by special classes of governing verbs (*verba imperandi*), while the general verbs of saying (Obs. 1) may be used with regard to any kind of volition.

Obs. 3. The verba imperandi expressing REQUEST etc. are: *petere, postulare, flagitare, orare, rogare, precari, obsecrare, implorare, instare* (to urge) *invitare*, and similar verbs, as: *Precor deos ut* his infinitis nostris malis contenti sint. Cic. Qu. Fr. 1, 3, 9.—*Petebant ut* equites premitteret. Cæs. B. G. 4, 11.—*Postulo ut* ne quid præjudicati asseratis. Cic. Clu. 2, 5.—*Cæsar cognovit, Germanos invitatos esse ut* ab Rheno discederent. Cæs. B. G. 4, 6.—*Semper flagitavi ut* convocarēmur. Cic. Phil. 5, 11, 30. 'To ask for a permission' is rendered by 'petere ut aliquid facere liceat' (not by 'veniam or potestatem petere'), as: *Tribunus militum petebat ut* Cæsaris voluntate discedere liceret; a military tribune asked Cæsar for the permission of leaving the army. Cæs. B. G. 1, 39.—If the person to whom the petition is directed, is not mentioned, the clause generally takes a passive construction, in which instance it sometimes takes the form of an infinitive clause, which, however, in classical prose, is confined to the verb *postulare* as: *Hic postulat se Rome absolvi*. Cic. Verr. 2, 4, 60.—*Et tamen ignosci nobis postulamus*. Auct. Her. 2, 17.—*Poscere*, in good prose\*, is not construed with That-clauses, but only with substantive clauses. In the poets and postclassically, it occurs both with *Ut*-clauses and infinitive clauses. Livy once uses an *Ut*-clause after *clamare et poscere* (2, 65).—If *instare*, (to insist upon) refers to a mere statement of a fact, it is construed with an infinitive clause, as: *Si instatur* (if it is insisted upon), suo milite vinci Romam posse. Liv. 2, 48. If it means 'to continue with perseverance', it is construed with an object-infinitive, as: *Instat Scandilius poscere recuperatores*. Cic. Verr. 2, 3, 59. But if *instare* means 'to demand urgently', the That-clause, dependent on it, has the form of an imperative clause, as: *Tibi instat Hortensius ut* eas in consilium. Cic. Quint. 10, 34.

Obs. 4. The verba imperandi expressing advice, proposition, and exhortation are *sua-dere, persuadere, monere* (see Obs. 1), *hortari, censere* (in the meaning 'to propose', 'to move', see R. 23, Obs. 9); as: *Equidem suavi ut* Romam pergeret (I advised him to proceed to Rome). Cic. Att. 16, 8, 2.—*Cæsar reliquos cohortatur ne* labōri succumbant (exhorted them not to succumb). Cæs. B. G. 7, 86. Verbs of exhorting (*monere, hortari*) sometimes, but very rarely, take an object-infinitive in good prose (Cic. Fin. 1, 20; Ib. Sest. 3, 7). The same construction or that of an infinitive clause, with *sua-dere* and *persuadere*, is poetical or postclassical, as: *Suadebat asino fugere*. Phædr. 1, 17, 6.—Verbs of exhorting are frequently construed with *ad* and a gerundial: *Sic ego vos ad libertatem recuperandum cohortor* (= ut libertatem recuperetis). Cic. Phil. 4, 5, 11.

Obs. 5. The verba imperandi expressing resolution and stipulation are: *decernere, statui, constituere, velle* (see R. 23, Obs. 7), *pacisci, pangere*\*\*, *sancire*, as: *Decrevistis ut* de præmiis militum primo quoque tempore referretur. Cic. Phil. 5, 2, 4.—*Statuit ut* decem milia hominum in oppidum submittantur. Cæs. B. G. 7, 21.—*Hasdrubal paciscitur* (stipulated, bargained) cum Celtiberorum principibus ut copias inde abdicent. Liv. 25, 32.—*Si quis pepigerit ne* illo medicamento unquam postea uteretur. Cic. Off. 3, 24.—*Gallie principes iurejurando, ne* quis enuntiaret (quæ essent constituta) inter se *sancierunt* (they pledged each other, by stipulation). Cæs. B. G. 1, 30.—*Ut* ne plebi cum patribus essent connubia, inhumanissimā lege *sancierunt*. Cic. Rep. 2, 37, 63.—If the construction of the clause is passive, it may take the form of an infinitive clause with a gerundial predicate-infinitive, as: *Ad unum omnes regnum Numæ deferendum decernunt*. Liv. 1, 18.—*Decernere, constituere, and statuere*, are generally construed with an object-infinitive if the actions contained in the clause are those of the subjects of the governing verbs, as: *Legiones decreverunt senatum defendere contra Antonium*. Cic. Phil. 5, 2, 4.—*Cæsar bellum cum Germanis gerere constituit*. Cæs. B. G. 4, 6. But sometimes, even in this meaning, *Ut*-clauses or (if the construction of the clause is passive) infinitive clauses with gerundial predicates are used, as: *Constitueram ut* pridie Idus Aquini manerem. Cic. Att. 16, 10.—*Reliquam ætatem a republica procul habendam decervi*. Sall. Cat. 4.—If these verbs are used in the meaning 'to judge', as verba sentiendi, the That-clause takes the form of an infinitive clause, as: *In quo omnia mea posita esse decervi*. Cic. Fam. 2, 6, 3.—*Laudem sapientie statuo esse maximam*. Ib. 5, 13.—If *constituere* means 'to promise', it takes the same construction as *polliceri* (with an infinitive clause in the

\* Augustin (Civ. Dei, 2, 21) mentions the following (lost) passage of Cicero's second book de Rep.: 'Philus poposcit ut hæc ipsa quæstio diligentius tractaretur'. But, since Philus in the extant parts of Cic. Rep. always speaks in 'direct discourse', it is evident that Augustin quotes only the sense, and not the wording of the passage.

\*\* *Pangere* has the meaning 'to stipulate' only in the perfect *pepigi*, not in the present system, nor in the perfect-form *pangxi*.

periphrastic future): *Vellem non constituiissem*, in 'Tusculānum *me* hodie *ventūrum* esse, Lælio: I wish I had not bound myself to Lælius to come to-day etc. Cic. Or. 1, 62.—*Constitui* cum quodam hospite, *me* esse illum *conventūram*. Ter. Hee. 1, 2, 120.

Obs. 6. The verbs of command, construed with That-clauses, are: *imperāre, præcipere, præscribere, mandāre, negotium dare* (to charge), *jubere, edicere, ferre\*, cavere*, and those of 'negative' command (prohibition): *interdicere, vetare* (Obs. 7). The regular construction of these verbs is with a dative of the person commanded and a clause with *ut, ne* (*ut ne*), or the mere subjunctive (except *jubere* and *vetare*), the English language generally employing an object-infinitive in place of the Latin That-clause, as: Consules *aditibus* curulibus *imperāvērunt ut* sacerdotes ejus sacri omnis conquirerent. Liv. 39, 11.—*Imperat Lælius ut* per colles *circumdūcat* equites. Ib. 28, 33.—*Quum ei præscriptum esset ne* quid sine Sexti nostri sententiā areret. Cic. Att. 16, 3, 6.—*His præcipit*, omnis moriālis pecuniā *aggrediantur*. Sall. Jug. 28.—M. *Emilio* senātus *negotium dat* ut Patavinōrum seditiōnem comprimeret (charged with suppressing etc.). Liv. 41, 27.—*Jubere* takes the person commanded as substantive object in the *accusative*, the action commanded being added in the form of an *object-infinitive* (§ 491, p. 104): Cæsar *Illece-tios* oppida vicique, quos incenderant, *restituere jussit*. Cæs. B. G. 1, 28. The verbs *edicere, ferre, cavere* do not take personal objects along with the That-clauses dependent on them; but incorporate the person to whom the command is issued in the clause, as: Quero *edixeritne* prætor *ut* *adesdes* die tricesimo (not: *edixerit tibi ut adesdes*). Cic. Varin. 14, 33.—Consul *edicere* est ausus *ut* senātus ad vestitum redderet. Ib. Pis. 8, 185.—The same construction often occurs with *præcipere* and *præscribere*, rarely with *imperāre*: Illud *præcipiendum fuit*, ut diligentiam adhiberemus. Cic. Am. 16.—Idem *imperat ut* hastas equites erigerent. Liv. 1, 37.—If the person commanded is not mentioned, a passive Ut-clause or passive infinitive clause is used: *Imperārit ut* in foro sibi lecta *sternerentur*. Cic. Verr. 2, 3, 44.—Non *hunc* in vincula *duci imperabis?* Ib. Cat. 1, 11.—Pro Serapionis libro tibi *præsentem pecuniam solvi imperāri*. Ib. Att. 2, 4, 16.—*Has naris actua-rias imperat fieri*. Cæs. B. G. 5, 1.—A passive infinitive clause is the usual construction with *jubere* if the person commanded is not mentioned, as: Cæsar *pontem*, qui erat ad Genuam, *jubet reparari*. Cæs. B. G. 1, 7.—Cæsar *naris* longas *ædificatris*, *remiges instituit*, *gubernatores comparari jussit*. Ib. 3, 4, 9. But sometimes, in this instance, the construction remains active, and an *object-infinitive* is used in place of a That-clause, as: Hæstio-ques eadem mensurā *reddere jubet*, quæ acceperis. Cic. Brut. 4.—Cæsar castra vallo fossā-que *munire jubet*. Cæs. B. G. 2, 5.—Vetera sunt præcepta sapientium, qui *jubent* tempori *parcere*. Cic. Fin. 3, 22.—Duces barbarōrum totā acie *pronuntiare jussērunt* ne quis ab loco discederet. Cæs. B. G. 5, 34.—Justitiā *præcipit parcere* omnibus. Cic. Rep. 3, 12. This construction, except with *jubere*, is extremely rare in classical prose.—*Jubere*, if it denotes the resolutions of the people in a plebiscite, is either construed with an Ut-clause, or, if the construction of the That-clause is *passive*, with an infinitive clause, as: Senātus *decrēvit*, populus-que *jussit ut* questōres eas statuas demolientiā curarent. Cic. Verr. 2, 2, 67.—Rogatiōnem promulgāvit, *vellent*, *juberent* Philippo regi bellum *indici*. Liv. 31, 6.—The same construction (rarely a Ne-clause) is sometimes used, if *jubere* refers to any official decree, as: Hic tibi (*i. e.* prætori) in mentem non venit *jubere, ut* hæc quoque referret se tibi vendidisse? Cic. Verr. 2, 4, 12.—Quinctius *jussit ut* naves Eubœam peterent. Liv. 32, 16.—Magōni nuntiātum est, *senātum jubere ut* classem in Italiam traiceret. Ib. 28, 36.—*Jubet ut* sententiam *dicat* suam. Plaut. Am. 1, 1, 50.—Quod *ne* fletet consules *jussērunt*. Hirt. B. G. 5, 52.—*Jussit ut* Britannicus et Octavia in complexum patris pergerent. Tac. Ann. 11, 32].

\* The verb *ferre*, as *verbum imperandi* mostly occurs in the phrase *legem ferre*, to give a law (without a completing clause). But it also occurs in the meaning 'to ordain', without *legem*, but with an *Ut*-clause, as : *Quum hoc natura tulerit ut summi virtute et animo praesent imbecillioribus*. Cic. Rep. 1, 34.

+ *Cavere* takes That-clauses in two different meanings; 1) as a *verbum faciendi* in the meaning 'to be on one's guard lest', or, 'to take care that' (see R. 25, Obs. 3). 2) as a *verbum imperandi* in the meaning 'to make a provision in a clause of law.' or by an article of stipulation in a treaty. In both meanings it is construed with a Ne-clause, or with an Ut-clause, as: *Epicius testamentum cavet* (ordered in his testament) *dies natalis ut ageretur*. Cic. Fin. 2, 31, 103. — *Aliis plebis scitis cautum est* (it was provided) *ne quis eundem magistratum intra decem annos caperet*. Liv. 7, 42.

‡ If the *That*-clause dependent on *edicare* refers to the actions of the subject itself, it cannot be considered as an imperative clause, and must take the form of an infinitive-clause with a periphrastic future, as: *Edixit, esse iudicium injuriarum non daturum*. Cic. Verr. 2, 2, 27.

§ Thus in the construction of the nominative with the infinitive: In lautumias Syracusinas deduci imperantur. Cic. Verr. 2, 5, 27 (p. 105, 106).

‡ In this construction *habere* does not take a personal object in the accusative. In post-classical language, however, it sometimes takes a personal object in the *dative*, as:

[illegible][illegible]

Nepo *Bruttienso* *jussit* *versiprell*, cantumque aliquem *exipret*, Tac. Ann. 13. 15. It is doubtful whether this construction occurs in classical prose. The passage in Cæs. B. C. 3. 93 (*Militibus* *enim* *jussit* *ne* *qui* *eorum* *violarentur*) is doubtful in its reading, since some manuscripts give the scarcely less objectionable reading '*Militibus* *commendavit* *ne* *etc.*'—The passage in Liv. 42. 43, 6, admits of a different interpretation.

\* For *prohibere*, which generally has the meaning of a *verbum faciendi*, see R. 25, Obs. 5.

† The writers of the silver age use *retire* sometimes as a *verbum faciendi*, in the meaning 'to prevent', when they construe it with *quominus*, as: *Sapientia nullā reminiscens exiret retiri (= impediri) potest*. Sen. Ep. 9.

§ For the construction with *ne*, which Kühner mentions as regular, no vouchers are extant.

¶ *Permittere* and *committere* originally have a more general meaning than the English verbs 'to permit', 'to allow', signifying (in connection with the dative of the person) 'to commit', or 'to leave something to somebody'. 'To permit' was originally expressed by *potestatem permittere* (as for inst. in Cic. Agr. 2. 134). Hence the construction *permittere aliquid*, which, according to the English conception, seems to be a pleonasm, as: *Postulavit ut Ariovistus Sequanis permitteret ut obsides voluntate ejus reddere illis liceret*. Cæs. B. G. 1, 35.

*dere, dimicāre, tendere*). Some of these verbs admit the construction with an object-infinitive (*studēre, cogitāre, animum inducere, moliri, niti*), which is the regular construction of *studēre*\* and *cogitāre*†. A few others take an object-infinitive in poetry and post-classical language.

EXAMPLES: *Agitātum* in urbe ab tribūnis plebis ut tribūni militum consulari potestate crearentur (*The scheme of electing etc. was agitated*). Liv. 4, 30.—*Illud potius agendum et cogitandum est* ne qui socii a populo Romano desciscant. Liv. 24, 45.—*Intelligere se dixit, non id agi ut verum inveniretur* (*that the intention was not, to find the truth*), sed ut aliquid falsi dicere cogeretur. Cic. Clu. 63, 177.—*Ille intellexit, id agi atque id parari*† ut filiae suae vis afferretur. Ib. Verr. 2, 1, 26.—*Itaque ut idem omnes sentiant summā vi agendum esse*. Liv. 24, 28.—*Pater potuit animum inducere ut nativam ipsam vinceret*. Cic. R. A. 19, 53.—*Quum senatus temptaret* (tentaret) post Romuli excessum, ut ipse gereret sine rege rempublicam. Ib. Rep. 2, 12, 23.—*Equidem ut honore dignus essem, maxime semper laboravi*. Ib. Planc. 20, 50.—*Id moliri eos atque struere*‡ ut Syracusae in ditioe Romanorum sint. Liv. 24, 23.—*Qui stadium currit, niti et contendere*§ debet ut vincat. Cic. Off. 3, 10.—*Enitere* per amicos ut scida ne qua deperat. Ib. Att. 1, 20, 7.—*Se adnisiros ut bene cumulāram gratiam referant*. Liv. 24, 48.—*Denus modo operam ne* (mori) tam necesse nobis sit quam Catōni fuit. Cic. Fam. 9, 18, 2.—*Moderabor ipse ne videar* fortuito in sermōnem vestrum incidisse. Ib. Or. 1, 24, 111.—*Me spectasse semper ut tibi possem quam maxime esse conjunctus*. Ib. Fam. 5, 8, 3.—*Mentes hominum nefariae ne vobis nocere possent, ego providi*. Ib. Cat. 3, 11, 27.—*Prospicite*, iudices, ut plus apud vos preces virginis Vestalis quam minae Gallorum valuisse videantur. Ib. Fonteij. 21, 49.—*Servius Tullius curavit ne plurimum valeant plurimi*. Ib. Rep. 2, 22, 39.—*Nihil antiquius habui quam ut Pansam convenirem*. Ib. Fam. 11, 5.—*Pugna ut tecum et cum meis mihi liceat vivere*. Ib. Att. 3, 22, 2.—*Omni contentione pugnatum est ut* his haec capitis aestimaretur. Ib. Clu. 41, 116.—*Quos ut incolumis conservare possimus, omni ratione erit dimicandum*. Ib. Div. Cae. 22, 72.

Obs. 3. The verbs *efficiendi*, denoting the 'bringing about' of an effect, are: 1) the general verbs *efficere*¶, *facere*\*\*†, *perficere*, *praestare*, *rem eo deducere*; 2) verbs denoting

\* *Studēre* is rarely construed with an Ut-clause, as: *Docet omnibus modis huic rei studendum ut* pabulatione Romani prohibeantur. Cae. B. G. 7, 14.—*Caesar studēbat ut* hanc partem oppidi ab reliqua parte urbis excluderet. Bell. Alex. 1.—*Studēre* is most frequently construed with an object-infinitive: *Studemus tutiorem vitam hominum reddere*. Cic. Rep. 1, 2.—*Fieri studēbam ejus prudentia doctior*. Ib. Am. 1, 1.—Sometimes *studēre* is construed with infinitive clauses, as: *Si quisquam est qui placere se studeat* quam plurimis. Ter. Eun. prol. 1.—*Pompējus rem ad arma deduci studēbat*. Cae. B. C. 1, 4.—*Orator ille... illis gratum se videri studeat*. Cic. Off. 2, 20, 70.—*Qui sese student praestare ceteris animalibus*. Sall. Cat. 1, 1.

† *Echedūre* pater filium cogitabat. Cic. R. A. 19, 53.

‡ *Parare* generally takes a substantive object; more rarely it is construed with an object-infinitive. The construction with Ut-clauses is very rare, and mostly anteclassical.

§ *Struere*, without the addition of such verbs as *moliri*, does not occur with Ut-clauses.

¶ The construction of the simple verb *tendere* (in the meaning of its compound *contendere*, with *ut*, or *ne*, is rare, as: *Tribūni plebis tribunorum militum ut habeantur comitia, tendunt*. Liv. 4, 7. See Ib. 38, 45. The construction of *tendere* with an object-infinitive is poetical and post-classical.

¶ *Efficere* is often used in the meaning 'to prove (to make out)', mostly in the passive impersonal form '*efficitur*' = it is proved, it follows (as a logical consequence). In this meaning, *efficere* is either treated as a *verbum declarandi*, and construed with an infinitive clause, or as a *verbum efficiendi*, being construed with an Ut-clause, as: *Dicæarchus vult efficere animos esse mortales*. Cic. Tusc. 1, 31.—*Mors ut malum non sit, efficitur* (= Your discussion will have the effect that death is not considered an evil). Ib. 1, 8. See R. 27, Obs. 1.

\*\* *Facere* has different constructions according to its different meanings: 1) With a participle as factitive predicate (p. 101. R. 74, A.), it has the meaning 'to introduce in discourse', as: *Xenophon facit Socratem disputantem, formam dei quæri non oportere*; *Xenophon introduces Socrates who asserts (makes Socrates assert) that the form of the Deity should not be investigated*. Cic. N. D. 1, 12, 31. Rarely in place of the participle, an object-infinitive (according to the construction of *jubere*) is used, as: *Polyphēnum Homērus cum ariete colloquentem facit, ejusque laudare fortunam*. Ib. Tusc. 5, 39.—2) In the meaning 'to represent' it takes a transitive object along with an object-infinitive (like *jubere*), or an infinitive clause (if the infinitive is passive), as: *Si timuisse eos facis qui discesserunt*; If you represent those that have gone as having been afraid (as cowards). Cic. Dom. 4, 10.—*Poëta impendēre apud inferos saxum Tantalō faciunt*. Ib. Tusc. 4, 16, 35.—*Plato construi a deo atque editeari mundum facit*. Ib. N. D. 1, 8, 19.—*Isocratem* Plato admirabiliter in *Phædro laudari facit* a Socrate. Ib. O. G. O. 6, 17.—

an effect in the interest of the doer: *impetrare, obtinere (tenere), assequi, consequi, adipisci*; 3) the verbs denoting an effect obtained after a previous struggle: *vincere, pervincere, evincere, expugnare*. The That-clauses dependent on these verbs take the form of an Ut-clause, or (negatively) of a Ne-clause\*. Sometimes, in poetry, an object-infinitive or a mere subjunctive is used in place of an Ut-clause. It is frequently repugnant to the English idiom to connect That-clauses with the regular equivalents of these verbs, so that the construction must be variously recast:

Ex. *Faciam ut intelligatis* quid error affligerit; I will make you understand (make it clear to you) what has been added by error. Cic. Clu. 4, 9.—*Germāni jumenta quotidiana exercitatione summi ut sint laboris efficiunt* (make their horses able to bear the severest labor). Cae. B. G. 4, 2.—*Hæc stultitia facit* (has the effect) *ut hoc stultissimum facinus rapienter factum esse videatur*. Cic. Rab. Post. 9, 24.—*Faciam ut* aut vivo mihi aut mortuo gratias agas (I will bring it to pass that you shall thank me etc.). Cae. B. C. 3, 91.—*Sol efficit ut omnia floreat*. Cic. N. D. 2, 15, 41.—*Satis id est magnum quod potest præstare ut ea causa melior et præstabilior esse videatur* (that he can make that cause to appear better etc.). Ib. Or. 1, 10, 44.—*Rem huc deduxi ut palam pugnare possētis* quum etc. (I have made it possible for you to contend etc.). Ib. Cat. 2, 2, 4.—*Attamen ægre retentis Domitiani militibus est factum ne prælio contenderetur*. (By restraining the soldiers, a battle was prevented.) Cae. B. C. 3, 37.—*Ejus belli fama efficit ne se pugnae committerent Salpinætes* (prevented the Salpinians from etc.). Liv. 5, 32.—*Efficiunt ne* quid inter privatum et magistratum differat (they effect that there is no difference, = efface all difference). Cic. Rep. 1, 43, 67.—*Munitiones efficiunt ne* quem locum nostri intrare possent (prevented our soldiers from). Cae. B. C. 3, 44.—*Ne irascamur præstabimus*; we will succeed in suppressing our anger. Sen. Ira. 3, 5.—*An etiam præstare potui, necubi delitescerent latrones, ne quid sarcinarum raperetur, ne quis vulneraretur*? Liv. 38, 49.—*Dux Gallorum uti eadem deditiōnis conditione uteretur*, a Crasso impetravit (obtained from Crassus the same conditions in regard to his capitulation). Cae. B. G. 3, 23.—*Galli legatos ad Caesarem de deditiōne mittunt et ut conservarentur impetrant* (succeeded in securing their lives and liberty). Ib. 2, 12.—*Verum si a Chrysogono non impetrāmus ut pecuniā nostrā contentus sit*, vitam ne petat; If we cannot make Chrysogonus be contented with our money, let him (at least) not claim our life. Cic. R. A. 52, 150.—*Vos adepti estis ne* quem civem metuerētis; You have obtained the advantage of not fearing any citizen. Ib. Mil. 13, 34.—*Quid assequitur nisi ut* arent qui in agris remanerunt? what does he gain by it except that etc.? Ib. Verr. 2, 3, 55.—*Antiochus facile obtinuit ut* Chalcididis portæ sibi aperirentur (easily succeeded in having the gates opened to him). Liv. 35, 51.—*Marcellus tenuit (= obtinuit) ne* irrito incepto abiretur. Liv. 24, 19.—*Vicerunt tribuni ut* legem perferrent (conquered the right of proposing the law). Liv. 4, 25.—*Patres summā ope evicerunt ut* Furius Camillus crearetur; The Patricians, after a hard contest, carried the election of Furius Camillus. Liv. 5, 36.—*Pervicerunt tribuni ut* Quinctius de bello ad

Rarely *facere* has the meaning of *cogere*, in which instance it has the construction of this verb (with an accusative, along with an object-infinitive): *Facio me alias res agere*, ne convicium Platōnis audiam; I compel myself to do something else, in order not to hear Plato's reproaches. Cic. Fam. 15, 18, 4.—In the Imperative it often means 'suppose', requiring an infinitive clause, as: *Fac omnia amicissimos Fontējo fuisse*; Suppose all had been most intimate with Fontējus. Cic. Font. 2, 3.—*Fac (te) potuisse*. Ib. Phil. 2, 3.—*Fac animos non remanere post mortem*. Ib. Tusc. 1, 34.—*Fac, qui ego sum, esse te*. Ib. Fam. 7, 23.—5) For the construction of *facere* as an ABSTRACT verb with a Predicate clause see R. 30. For the construction of *facere* with substantive Quod-clauses see R. 26, Obs. 2.

¶ The verbs *facere* and *efficere*, if construed with Ne-clauses (see the examples in the text), assume the force of the negative verbs of doing (*impedire* etc., see Obs. 5). Unless these verbs have this force (the aim of the action being negative), a negation in the That-clause is not expressed by *ne*, but by *non* after *ut*, as: *Splendor vester facit ut peccare sine summo periculo non possitis*. Cic. Verr. 2, 1, 8 (= Your prominent position has the effect that if you falter in your duty, the republic is in the utmost danger). Hence if *efficere ut* has the meaning 'to prove that', the That-clause, if negative, is introduced by *ut non* (See Cic. Tusc. 1, 8, quoted above). Sometimes a clause with *ne*, and a clause with *ut non* are coördinated, to present pregnantly two different meanings of the governing verb: *Ex hoc efficitur, non ut voluptas ne sit voluptas, sed ut voluptas non sit summum bonum*; From this it follows, not that we can decree pleasure to be no pleasure (make pleasure be no pleasure), but that pleasure is not the greatest good. Cic. Fin. 2, 8.

Sometimes a clause introduced by *quominus* is used, in place of a Ne-clause, to impart to the verbs *facere* and *efficere* the meaning of a *verbum prohibendi*, as: *Quominus discessio fieret, per adversarios tuos factum est*; Your adversaries hindered the taking of a vote. Cic. Fam. 1, 4, 2.—*Nihil censoria animadversio efficit quominus* regimen rerum ex notata domo peteretur; The censorian mark did not hinder the tendering of the highest power to the disgraced family. Liv. 4, 31. This construction, however, belongs more to the silver age, and is not frequent in classical style.

**EXAMPLES. 1. VERBS OF HINDERING.**—Plura ne dicam tuæ me lacrimæ impediunt (prevent me from saying more). Cic. Planc. 42, 104.—Ne extemplo gereretur bellum, hiems impedivit (hindered the immediate beginning of the war). Liv. 38, 32.—Ætas non impedit quominus studia teneamus usque ad ultimum tempus senectutis (does not prevent us from continuing our pursuits to extreme old age). Cic. Sen. 17, 60.—Que formido tot ac talis viros impedit quominus causam velint dicere? Ib. R. A. 2, 5.—*Mæ armare civitatem defensionem prohibent*, Liv. 24, 46.—Ne Iustrum perficerent mors prohibuit P. Ennii Ib. 24, 43.—Hi mem credo adhuc prohibuisse quominus de te certum haberemus. Cic. Fam. 12, 5.—Ne id quod placbat decerneret, ambitio obstat (prevented him from decreeing what he wished). Liv. 5, 36.—Quid obstat quominus sit beatus? Cic. N. D. 1, 34.—Ne confestim bellum indiceretur, religio obstat. Liv. 4, 30.—Ceteris rebus multa externa quominus possidentur possunt obstare. Cre. N. D. 2, 14, 35.—Non adversatur ius quominus summi quidque cuiusque sit. Ib. Fin. 5, 20, 67.—Interdicitur doctrinæ quominus ad te plura scribam. Ib. Att. 8, 8, 2.—Notarius ejus libanus commemorare puerum debet proci. Id. Verr. 1, 5, 14.—Cato tribunos debet in adversarios republice suisque consuli. Cic. Tuscul. 1, 38.—Cæsar aut Sextium misit ut, quominus libere hostes insequerentur, impediret. Cæs. B. G. 7, 9.—Legē accipiuntur tabula publicæ agrum quominus Romani d. posuerant. The books of the revenue-farmers are exempted by law from being sold to Rome; i. e. their privilege excludes hindrance the operation of the law. Cic. Verr. 2, 2, 85.  
The same verb is used figuratively, as in the following examples.—Ipsi præstito the plan

2. VERBIS OF RESISTING. — Atticus *ne* qua *viri* statua poneretur, *ne* *quid* resisted the plan of erecting a statue to him). Nep. Att. 8. — *Vix deorum opibus quin occurrat* Romanæ res *resistit* potest; We can, even with the help of the gods, scarcely prevent by our resistance the collapse of the Roman republic. Liv. 4. 43. — *Neque repugnabo quominus* by oratores omnia legant, omnia audiant; Nor will I oppose the reading and hearing, by the speakers, of all things. Cic. Or. 1, 60. 256. — (Edui polliciti sunt, se) *non recusaturos* quominus perpetuo suo Sequanorum diti one atque imperio essent. Cæs. B. G. 1. 31. — Illi *non hoc recusabant* ne eâ lege accusarentur qua nunc Avitus accusatur; Avitus *ne* hoc quidem unquam *recusavit*, quominus eâ lege rationem vite sue redderet, qua non tenebatur. Cic. Clu. 56, 154. — A te missus, *ire* *non recusavi*. Liv. 40. 15. — Pompejus dixit, *non recusare* se, quin nullus usus imperator existimaretur si sine maximo detrimento legiones Cæsaris seque receperent. Cæs. B. C. 3. 45. — *Non recusavi* quominus, Plaut. Mil. 4. S. 33.

3. VERBS OF LEASTRAINING. — *For reprimere quā* to restrain, to restrain. *Philo. Mil. 4.8.78.*  
— *Veniunt milites temperare et amittit quā* to temper, to restrain the heat, to restrain the soldiers.  
from. *Liv. 5. 15. — Neque sibi homines barbaros et inmoderatos existimant* (causes, *quā* in  
provinciam exirent. *Caes. B. G. 1. 83. — Imperare ut nemo quēvis quē* to restrain, to restrain  
scirem. *Liv. 34. 31. — Egred abstinere quā* to restrain, to restrain. *Id. 2. 45. — Milites dū* to  
*relenti quā* to restrain, to restrain. *Caes. B. C. 2. 13.*

4. VERBS OF DELAYING.—Non ultra differendum ratus *quā* per se fortissimū tentaret, exercitum instruit. Liv. 40. 27.—*Nullum morum interponendum* putavimus *quā* videremus hominem nobiscum vetustate amicitiae conjunctum. Cic. Ac. Po. 1, 1.—Quam omnes vocēs audirentur, *expectāri* diutius non oportere *quā* ad castra irerēt (that they should not delay any longer the marching against the camp). Caes. B. G. 3, 24.—*Deesse* mihi notat *quā* te adjuvarem d. w. i. e. in justice to myself, to remind you. Cic. Fam. 5. 12. 2.—*Nihil praetermisi* *quā* Pompeium a Caesare conjunctione avocarem I spared no efforts to turn Pompey etc.). Ib. Phil. 2, 10, 24.

5. VERBS OF AVOIDING. — *Fratrem ego vitari ne vidērem* (I have avoided my brother). Cic. Att. 3, 10, 2. — *Eat vitatam ne ostentatim memoriam susceperit* (let him eat so that he may not boast of his memory). Ib. Part. Or. 17, 60. We must avoid the appearance of a boyish exhibition of our memory. — *Per eos ne causam diceret se scriptam*. Through these he avoided a trial. Cæs. B. G. 1, 4. — *Per eos ne causam diceret se scriptam*. Through these he avoided a trial. Cæs. B. G. 1, 4.

—Per eos ne causam deceret se *cipere*? Through these he had got a firm case; *ne* = *ut*.  
—Obs. 6. Often a clause with *quominus* refers to the idea of hindering or ‘undermining’. Such clauses may be connected with ordinary verbs of doing, or with other verbs, which by the Quominus-clause, frequently assume the force of a verb of *hindering*, as: I figure by no means triflingly, if me *faciunt esse* aliquid *quominus* isto condemnari possit? what, by some act of mine, I have hindered his condemnation? (Cic. Ver. 2. 1. 9.—Nemo est qui neciat, *quominus* discessio foret, per adversarios suos *esse faciunt* that his adversaries prevented the taking of a vote). Ib. Fam. 1. 4. 2.—Memini te censorias leges tollere, ne pupillo tutiores *consulerent quominus* fortūis omnibus exstimatione eum usque ad rogum prosequeretur. Ib. Verr. 2. 3. 7.—Ne *per te ferat quominus* hac exstimatione eum usque ad rogum prosequatur: lest your action may prevent this reputation from following him to his grave (literally: lest he bear it through you that this reputation does not follow him etc.). Ib. Quinct. 31. 99.—Nihil de me *taliter quominus* esset in eo loco in quo me heredes P. R. collocarunt: The bill which you have carried does not contain anything which could prevent me from being in that position where etc. (literary: You have not ‘carried’ anything concerning me’ to *prevent me* ‘from being etc.’). Ib. Dom. 31. 82.—Præterquerum Dodonæam nihil desideramus *quominus* Eprium ipsum possidere videāmur: With the

exception of the oak of Dodona we miss nothing which, by its absence, *might prevent us from thinking* that we possessed Epirus itself. Cic. Att. 2.4.5. For another method to interpret this construction see R. 29, Ops. 7.1.1, 2. For the use of *quominus* and *quin* to introduce subject-clauses, attribute-clauses and modal-clauses, see below.

to introduce subject-clauses, attribute-clauses and modal-clauses, see below.

Here belongs the impersonal construction '*Stat per aliquem quominus*' (where *per* has the same force as in '*per me licet*'), the phrase being equivalent to '*aliquis impedit quominus*', but with the accessory idea of responsibility. It may be variously rendered '*It is chargeable to some one that not*', 'it is imputed to some one', 'somebody is responsible for the failure of etc.', 'it is one's fault', 'owing to one etc.', or simply by 'He prevented an action', as: Caesar cognōvit, *per Afranium stare quominus* praelio dimicaretur; Caesar learned that Afranius had prevented a fight. Cæs. B. C. 1. 41.—*Stetitne per Trebonium quominus* oppido potiturer videbatur; It seems that Trebonius was responsible for their failure in capturing the town. Ib. B. C. 2. 13.—'*Stat per aliquem*' is also construed with *ne*, and '*non stat per aliquem*' may be construed with *quā*, as: Ostenderent promissis proflis, *per duces*, non *per milites*, *stetisse* *ne* vincerent; He said they should show that in the former battles their failure in defeating the enemy was chargeable (must be imputed, was owing etc.) to the commanders, and not to the soldiers. Liv. 3. 61.—*Quoniam per eum non stetit quin fides præstaretur*; because the breaking of their faith was not attributable to him. Ib. 2. 81.

Obs. 7. In a similar way a *Quin-clause* dependent on *non facere* (sometimes *non efficere*) imparts to *facere* the meaning of a verb of *restraining* or *omitting* (Obs. 5), and hence *facere non possum quia* means 'I cannot help (refrain) doing something', 'I cannot but', and *fieri non potest quia* means 'It is impossible that not', or 'it is necessary that', as: *Facere non possum quin* quodidē ad te litteras mittam: I cannot help writing every day a letter to you. Cic. Att. 12, 27, 2.—*Facere non potui quin* tibi sententiam declarārem meam: I could not but tell you openly my opinion. Ib. Fam. 6, 13, 1.—*Fieri nullo modo poterat quin* Cleonini parceretur: It was altogether impossible not to spare Cleomenes. Ib. Ver. 2, 5, 40.—In place of *quia* is also used *ut* *non* *pot* *est*, according to Obs. 5, as: *Non potestis nullo modo facere ut* mihi illam epistolam *non* mitteretis. Ib. Att. 11, 21, 1.—*Facere potui quin* dixert, and nobody could help speaking thus. Cic. Or. 70, 234. With the same force the expression '*non possum non*' with an object-infinitive is used, as: *Non possum enim non diligere* cuius beneficio id consecutus sum. Ib. Fam. 9, 17, 2.—*Non enim possum quin* crediderim. Ib. Or. 2, 10.—' *Fieri non potest ut* ' means 'It is impossible that'.

See Cic. Mur. 34, 70.

#### 4. *Fact-clauses.*

*Rem. 26.* Verbs not belonging to the classes mentioned above (*R.* 23-25) may take That-clauses to represent any substantive object (transitive, intransitive, or adverbial). Such clauses either take the form of a *Quod-clause*, or that of an *Ut-clause*. They are called **SUBSTANTIVE-CLAUSES** or **FACT-CLAUSES** (p. 491, *OBS.* 14).

Obs. 1. In English, such Fact-clauses are either made dependent on a noun of general import (fact, thing, idea), or they take the form of a participial noun in *ing* as a substantive object. In Latin, they take, in their complete form, an absolute neuter demonstrative (*id, hoc, illud*) or a demonstrative with the noun *res* (*haec res, ea res*) as syndetic antecedents (p. 492, Obs. 15), which are placed in the case required by the governing verb, or by the leading adverbial idea. To this antecedent the clause is attached in the form of a *Quod-clause* if the action of the clause is conceived as a *past* or *present fact*. If the action lies in the *future* from the standpoint of the principal predicate), or expresses a *mere idea* conceived in the mind, the form of an *Ut-clause* is used. The syndetic antecedent may be left out if it is a *transitive object* in the accusative, and sometimes, when it is in the ablative.—Fact-clauses occur not only as *object-clauses*, but also as *subjects* of a sentence (see R. 28 Obs. 5), and as *attribute-clauses* (See R. 29 Obs. 7, B. 6). All fact-clauses introduced by *quod* have their predicates in the indicative, unless the subjunctive is required by the general rules p. 385 foll. Fact-clauses introduced by *ut* always require the subjunctive.

Obs. 2. Any transitive verb, not belonging to the classes mentioned B. 23-25, may take a Fact-clause with *quod* as transitive object, in which instance the syndetic antecedent, as transitive object, is placed in the accusative, but is frequently omitted: *Ilud minus curo quod congregasti operarios omnes*; I do not care for the fact that you have assembled all your forces (or 'for your assembling all your forces'). Cic. Brut. 86. 297.—*Quod mihi nihil, aut quod non multum relinquit, percommode facis estque mihi gratum.* Ib. Or. 2. 86.—*Mitto quod subire pericula paratissimus fueris si etc.*; I pass (do not mention) the fact that you would have been most ready to undergo dangers if etc. Ib. Fam.

15. 4. 12.—Quo facto duas res consecutus est\*). quod animos centurionum devinxit, et militum voluntates redēxit: By this fact he gained two things, that he secured (securing) the devotion of the centurions, and that he brought (buying) the attachment of the rank and file. Cæs. B. C. 1. 39. Quod duas simul acies exercituum barbarorum circumvenērunt, quod multi milia ceciderunt et cepērunt, hoc si ipsi tenuerant, vos sagittas non erant? (if they withheld from you the fact that they outflanked two wings of the barbarians at once etc.). Liv. 38. 49. See the Ex. p. 491, 2.

Obs. 3. Of the intransitive verbs that govern a genitive and ablative, only some *verba affectuum*, and the verbs of *accusing* and *condemning* admit Fact-clauses in place of their intransitive objects (see p. 599, foot-note), in which instance the syndetic antecedents are regularly left out. Thus 'Gajum furti condemnō' may be expressed 'Gajum condemnō (ajus) quod furtum perpetravit', as: C. Licinius Stolo decem milibus aeris est damnatus quod mille jugerum agri cum filio possideret. Liv. 7. 16. Such clauses pass over into *causal* Quod-clauses. Intransitive dative-objects cannot be represented by Fact-clauses, and such English expressions as 'It is owing to the fact that' etc., 'Ascribe it to the fact that' must be recast in Latin (for inst.: *Causa est quod* = it is owing to the fact that; *Velim hoc eo factum esse credas quod* = Ascribe this to the fact that).

Obs. 4. In the following instances Fact-clauses with *quod* take the place of substantive objects dependent on an adverbial idea:

1) If the clause represents an ABLATIVE OF MEANS, INSTRUMENT, and CAUSE, as: Acilius eo ipso quod nihil tale timērent Aetoli, opprimī incantos posse sperāvit (from the very fact that the Aetolians did not fear anything of the kind). Liv. 37. 4.—Populus contentus erat eo quod ratio habita plebejorum esset (was contented by the fact that: was contented because). Ib. 4. 6.—Hoc uno praeſtāmus vel maxime felix quod colloquimur inter nos. Cic. Or. 1. 8. 32.—The syndetic antecedent *eo* or *hoc* may be left out, which shows how these Fact-clauses have passed over into *causal* Quod-clauses: Qui potuit divitiis Romulus vitia vitare quam quod (= eo quod) urbem perennis annis posuit in ripa (than by the fact that he placed, or, than by placing the city). Cic. Rep. 2. 5. 10. If the verb forms a gerund, this construction may be replaced by the ablative of a gerundial (see p. 159, 170). Here belongs the frequent use of Quod-clauses denoting coincidence of action, where *quod* has the force of 'in as much as', a relation which may also be expressed by participles, by gerundial ablatives (p. 170, R. 211), or by Quam-clauses (p. 339, R. 69), as: Bene facis quod me adjuvas (= eo quod); You do well in as much as you assist me; or: In obsequiis assistens me tu bene facis. Cic. Fam. 3. 4. 16.—Scriptum erat, recte eum atque ordine fecisse quod (= eo quod) in Leoninis nulla peperisset. Liv. 24. 31.—Bene te consuluisse rebus tuis ait quod Demetrium Roman miseris. Ib. 40. 11.—Quod mihi nihil, aut quod non multum reliquisset, perperam fecis, estque mihi gratum. Cic. Or. 2. 86. 350. —Hoc a me novum cognoscens quod; res ita constituta ut crimen totum explicem. Ib. Verr. 1. 18. 55.—Here, also, belong the Quod-clauses dependent on the ablatives *eo* or *hoc* before comparatives, which are rendered by 'the more... the more', as: Eo ad te barbarius scripsi quod quotidie te ipsum expectabam (= eo quod) expectabam, tardius scripsi: From the fact that I daily expected, yourself, I have written later, or, I wrote the later because I expected. Cic. Fam. 3. 6.—Libertatem eo studiois plenius laudant quod summi ejusque bonitas commūne perfugium est omnium (They praise liberty more zealously from the fact that it is a refuge, = the more zealously they praise it is). Ib. Off. 2. 18. 63.—Respondit hoc esse miseriam fortunam Sequanorum quod soli auxilium implorare non auderent (the more pitiable their lot is). Cæs. B. G. 1. 32.

2) Quod-clauses representing PREPOSITIONAL OBJECTS occur with the prepositions *ex*,

\* *Consequi*, as a *verbum efficiendi*, might have taken an *ut*-clause (R. 25. 3), which would have represented the predicate as an effect of the action, while the author, by the Fact-clause, represents the predicates as coincident with the main action. Thus Cicero, in a similar sentence, uses an *ut*-clause: His subsidiis ea cum consecutus ut ex altissimis sociis antecessimos redderem. Cic. Fam. 15. 4. 14. Thus *adipisci* occurs with a Quod-clause: Illud quidem sanas adepti quod possumus, iudicare, nos Cassari carissimos esse. Cic. Att. 4. 15. 10.

\* *Ut*-clauses sometimes are found with a syndetic antecedent *id est* in the dative, which takes the form *et rei*, as: Multa est ei rei cura major adhibenda ut constare possimus nobismet ip-sis. Cic. Off. 1. 33. But this is not a Fact-clause in the sense explained above, the *ut*-clause being a *completing Object-clause*, dependent on *curam adhibere* (= *curare*) according to p. 599, Obs. 2.

† A *That*-clause dependent on *cognoscere* seems to require the form of an *infinitive* clause. But here the Quod-clause refers to *novum*, meaning that the fact mentioned is new in as much as the speaker will follow a peculiar method in the order of examining the witnesses.

§ In the similar construction *eo magis... quo*, where *eo* is followed by a relative clause, both the clause and the antecedent *eo* represent *ablatives of difference*.

*de pro, in, de*, and *propter* or *eo quod*, from the fact that; *ob id quod*, on account, or for the fact that; *pro eo quod*, in accordance, in keeping with the fact that; *in eo quod*, in the fact that; or 'in that'; 'in as much as'; *de eo quod*, on (concerning) the fact that; *propter id quod*, besides the fact that, 'aside from with a participial noun', or 'with the exception of the fact that', as: Oppianicus ex eo quod Scamander reus erat factus (from the fact that Scamander was indicted) quid sibi impendēret cōpit suspicari. Cic. Clu. 24. 66.—Odium patris in filium ex hoc ostenditur quod hunc ruri esse patiebatur (is inferred from his suffering him to be in the country). Ib. R. A. 18. 52\*. Chalcidensium legatio ob id quod princeps eorum, pedibus captus, lecticā est introductus, ultimae necessitatis visa res. Liv. 43. 7.—In hoc uno errat quod existimat eadem vias ad omnium familiaritates esse multas. Cic. Verr. 2. 3. 68.—Quiesierat ex me Scipio quidnam sentirem de hoc quod duos soles visos esse constaret. Ib. Rep. 1. 13. 19.—Omnia mihi per jucunda fuerunt praeter illud quod parum diligenter possessio salinarum mearum defenditur (excepting the fact that my property in the salt works is not carefully enough protected by you). Ib. Fam. 7. 32. 1.—See the Ex. p. 492, 4.—For 'praeter id quod', meaning 'excepting the fact that', the form 'nisi quod' is more commonly used. But to express 'excepting the fact that', the form 'nisi quod' is more frequently used than 'praeter id quod': as: Sinistris, praeterquam quod confortiores steterunt, repentinō consilio consulis additae vires (to the left wing, aside from the fact that they formed a more solid body, new strength was added by, etc.). Liv. 9. 27.—Itaque, praeterquam quod ambo consules profecti ad bellum erant cum quatuor legionibus, alii duo exercitus Etruriae oppositi sunt. Ib. 10. 26.—Cum Patrone Epianeo mihi omnia communia sunt, nisi quod in philosophiā vehementer ab eo dissentio. Cic. Fam. 13. 1.—Nihil acciderat ei quod nollet, nisi quod annulum, quo delectabatur, in mare abjecerat. Ib. Fin. 5. 30.

3) Some kinds of Quod-clauses are elliptically used, so that the principal sentences and their prepositional antecedents, are understood: (a) 'Quid? quod?' serves as a periodical connective, being equivalent to 'quin etiam' (nay even). It must be completed by 'Quid de eo dicam quod etc.?' (What shall I say of the fact that?), as: Quid? quod tu te ipse in custodiam dedisti; Indeed, you even delivered yourself into custody. Cic. Cat. 1. 8. 19.—(b) Very frequently Quod-clauses, serving for periodical connection, have the force of 'Quod attinet ad id quod' ('as to the fact that', or 'as to' with a participial construction, see p. 474, Obs. 6), as: Quod multitudinem Germanorum in Galliam tradidit, id se sui muniendi causa facere dixit; As to the fact that he was taking over a great number of Germans into Gaul, he was doing this for strengthening himself. Cæs. B. G. 1. 44.—Quod etiam sua reddiderint, vereri ne tantā indulgentiā plures ad talia audenda impellantur: Concerning the fact that they had returned even their own such undertakings. Liv. 39. 55.—Quod ais, non plus me Plancio debere quam bonis omnibus, ego me debere bonis omnibus fateor: As to your remark that I am not owing any more to Plancio than to all the good, I confess that I am owing to all the good. Ib. Plane 28. 68.—Quod scribis de velle se qui sit republicae status, summa dissensio est; In your inquiry about the condition of the republic, I reply that there is the greatest dissension. Ib. Fam. 1. 7. 10.

Obs. 5. Fact-clauses introduced by *ut* are either rendered by object-infinitives, or by participial nouns, or by *That*-clauses which are made dependent on a noun of general import corresponding to the idea represented by the clause (right, privilege, rule, idea, quality, plan etc.). The *ut*-clause may represent a transitive or prepositional (adverbial) object. Negative *That*-clauses of this kind are introduced by *ne*, if the negation contains the idea of prevention; else *ut non* is used.

1. TRANSITIVE *ut*-CLAUSES.—Respondit Socrates sese mervisset ut amplissimis honoribus et praemiis decoraretur (merere aliquid); that he had deserved to be remunerated by the highest honors and rewards. Cic. Or. 1. 54. 272.—Nihil habet nec fortuna tua majus quam ut possis, nec natura melius quam ut velis servare quam plurimos (= you have no right more important than that of saving as many as possible, nor has your heart any better quality than your will of doing so). Ib. Lig. 12. 38.—Sapientia et animi magnitudinem complectitur, et justitiam, et ut omnia quae homini accidunt infra se judicet (complecti aliquid); Wisdom comprises magnanimity, justice and the quality of judging all human accidents inferior matters. Ib. Fin. 3. 7. 25.—Hoc mihi Metellus non eripuit; hoc etiam addidit ut quereretur hoc sociis imperari (addere aliquid); Metellus (by his proceedings) has not deprived me of this [right]; he has even added another right to it, namely that I may complain of such things being imposed on our allies. Ib. Verr. 2. 2. 68.—Est boni viri

\* In place of *ut non*, frequently *ut* and *hinc* are used, as: Quam vehementer eum timendum putarem, licet hinc intelligatis quod etiam illud moleste fero. Cic. Cat. 2. 2.  
† In the silver age, *merere* takes an object-infinitive, and, negatively, a *Ne*-clause, as: Merui quidem admitti. Sen. Ep. 93. Hac victoria videtur meruisse Marius, ne ejus nati rempublicam pœniteret. Vell. Pat. 2. 12.

*rem dicere*: Vende mihi vasa celata, non es dignus qui habeas quæ tam bene facta sunt. Ib. Ver. 2, 4, 20. — Prima sequentem locum est in secundis tertisque consistere. Ib. Orat. 1, 4. — Quid tam *reputans* quam *cavendum dicere*, quod honestum sit id solum bonum esse, quid dicat etc. Ib. Fin. 4, 28, 75. — *Injurious et contumacem* locum est his honoribus *cedat esse* fidei-simos *socios*. Ib. Balb. 9, 24. — *Longum est*\* (It would take too much time) — *nunc ne expiendi*, qui ratione infirmare testes oportuit. Ib. Or. 2, 27. Haud autem *per absurdum*, bonum esse a quod non expectandum sit id some say that anything is a good which etc.) Ib. 3, 8, 27. In all the instances in which subject Third classes assume the form of an infinitive clause, a subject-infinitive may be used if the grammatical subject of the clause is an *infelicitæ person*, which may always be omitted, as: Quid tam *absurdum* quam *delectari* (i. e. quam *aliqum* delectari inanimis rebus? Cic. Sen. 14, 49.)

Ques. 4. If the principal predicate expresses a *judgment* of the author, as in the previous rule, but the subject-clause contains an *actual fact*, or *event*, and not a 'given proposition' merely assumed by the author, the *Fact-clause* is treated as a *Fact-clause* according to the rules in R. 26. Hence it takes the form of a *Qual-clause* if it refers to a past or present fact, but an *U-clause* is used if the fact belongs to a future time, or is represented as a consequence of some action. But in all these instances *subject infinitive clauses* (or a *subject-infinitive*) may be used if no ambiguity can arise from their use.

*Examples:* Ex tota laude Reguli unum illud est admiratione dignum quod tan feros retinendos censuit. Cic. Off. 3.31.—Nisi hoc *indignum* putas quod vesitum sedere in iudicio vides quem tu e patrimonio expulisti. Ib. R. A. 51. But: Nominē hōc *indignissimū* est nos idoneos *habiles* esse per quorum sententias id assequatur quod antea ipsi scelere assequi consueverunt (where the infinitive clause *idq* be replaced by a Quod-clause). Ib. R. A. 3.—Nihil *pius* turpius quam quod etiam in scriptis obliuiscuntur quid pauci ante posuisset. Ib. Brut. 60. 218. But: Quid *turpius* est quam sapientis *ritum* ex insipientium sermōne *pendere* (where a Quod-clause *est* could be substituted, according to Obs. 3). Ib. Fin. 2. 15.—Timeo ne mai. sit *incalensum* aliquando, quod iam *emissum* potius quam *querin*. Ib. Cat. 2. 7. 15. But: Tu tui nunquam *crimen* fore potasti, excellentissimo loco palam tibi *adhiberi naturā* (where the clause *might* have been expressed in the form of a Quod-clause). Ib. Verr. 2. 5. 18.—Satis id est *meritum*, quod potes præstare ut ea cum, quancumque tu iudis, prohiberi esse iudicātor. Ib. Or. 1. 10. 44. But: *Magnificum* illud etiam et Romā est hominibus *gloriosum*, ut tunc sic philosophia litteris non egent. Ib. Div. 2. 2. 5. (Here the author represents the fact that the Romans would not need the Greek books on philosophy as a future result of his labors if they would be accomplished. Hence an Utc-clause is used. *Quod* means, est id quidem *in futurum*, sed tui *commens* cum multis. Ib. Fam. 1. 15. 1. But: Hoc est natūa *commune* animantium ut habeant inordinem progrediendi (i. e. it is the common quality of living creatures, *provided by nature* that they should have etc.). Ib. Or. 1. 17. 54. In the following passage, '*commune* est' is, and must be construed with an infinitive clause: *Quoniam* quod honestum sit, id esse propter se expectatum (i. e. 'the proposition' that all which is honest etc., *commune* est) mox est cum authorum aliorum philosopharum se referitis. Ib. Fin. 3. 14. 36.—Nā illud animorum *indivisiibile* quod utas de totum aspicietur illorum penitēre. Ib. Div. 2. 37. 78.—Cuspis quod opem deiecit, mihi valde *gratum* est. Ib. Fam. 16. 17.—Illud animorum corporumque *disimile* (est) quod animi valentes morbo temptari non possunt, corpora possunt. Ib. Tuscul. 4. 14.—Quoniam ad tuendos homines hominem tam in esse videmus, *consequenter* huiusmodi facit ut superius veli gerere et administrare rempublicam. Ib. Fin. 3. 20. 68 (i. e. It is *in consequence* with, and a *consequence* of the original designation of man *that* he should wish to administer public affairs). But: Non est *consentaneum*, qui metu non frangeatur, *eam* frangi capere (i. e. The '*proposition*' that he should be subdued by passion who is not subdued by fear, *does not hold to reason*). Ib. N. D. 2. 15.

\* From 'longum est me aliquid facere' must be distinguished the expression 'Nihil mihi est longius' = 'nihil habeo longius' (I cannot wait for the time that), which is construed like *expectare* (R. 23. Obs. 8). i. e. with *ut* or *dum*, as: Respondit, nihil sibi longius fuisse quam ut me videret. Cic. Fam. 11, 27.—Nihil ei longius videbatur, quam dum illud videret argentum. Ib. Verr. 2, 4, 18.

† On the other hand, every subject-infinitive with a transitive object dependent on it, may be replaced by an infinitive clause in which the transitive object is made a subject-accusative, the active subject-infinitive being changed into a passive predicate-infinitive, as: *Quid flagitiosius quam eum a quo pecuniam acceperis condemnare*. Cic. Verr. 2. 2. 32. Here the transitive object *eum* may be made a subject-accusative without changing it in form, while the active subject-infinitive *condemnare* is changed into a passive predicate-infinitive (*condemnari*).—*Nunc libertatem repelli satis est*. Liv. 3. 53. Here the subject-accusative *libertatem* may be made a transitive object-accusative, the passive predicate-infinitive *repelli* becoming an active subject-infinitive (*libertatem repellere satis est*).

‡ For *gratum est ut*, see OBS. 6, at the end.

Obs. 5. If the clause is represented as a *rule, right, duty, task, or as an action which should be done, or effected*, it takes the form of an *Ut-clause* (negatively with *ne*), as : *Præclārum illud est, et rectum quoque, et verum ut eos qui nobis carissimi esse debeant, æque ac nosmet ipsos amemus*; It is an *excellent, correct and true rule that we should love etc.* Cic. Tusc. 3, 2, 73. But: *Quid est enim præclarius quam honoribus perficere senem posse suo jure dicere idem quod etc.* Ib. Or. 1, 45. Similarly: *Non est rectum, minūri parere majorem*; It is *not right* that the greater should obey the smaller (i. e. 'the proposition that', or 'It is not right if etc.'). Ib. Tim. 6.—*Id enim est proprium civitatis et urbis ut sit libera et not sollicita suæ rei cujusque custodiâ* (it is the particular right of the State and City, to be free etc.). Ib. Off. 2, 22, 78. But: *Proprium est laudis tunc, nihil a te unquam esse dictum* quod obesset ei pro quo diceres (it is your particular praise that you have never said anything that etc.). Ib. Or. 2, 73. In the last sentence, also a *Quod-clause* (*quod nihil est dictum etc.*), but not an *Ut-clause*, would be correct.—*Id arbitror apprime in vita esse utile, ut ne quid nimis*: This I believe is an extremely useful rule that there should be no 'too much'. Ter. Andr. 1, 1, 34. But: *Accusatores multos in civitate esse, utile est* (it is useful if etc.). Cic. R. A. 20, 56\*.—*Nihil est in dicendo majus quam ut faveat oratori is qui audit*; Nothing is more important in speaking, than for an orator to effect that the hearers should be favorably disposed towards him. Ib. Or. 2, 42.

If the principal predicate denotes '*it is fair, unfair, proper, expedient, convenient*', the subject-clause denoting 'that something *should* be done', the clause does *not* take the form of an Ut-clause, but that of an infinitive clause. Such predicates are *aequum esse*, *iniquum esse*, *par est*, *commodum est*, *optimum est*, *satius est*, and *verum est*, or *recte est* (in the meaning 'it is proper'); as : *Omnibus vestrum auxilium aequum est patere* (it is fair that your assistance should be open to all; not '*ut auxilium pateat*'). Liv. 7. 50. — *I-menas gentem Baetorum in fidem Romanorum permitti, aequum* (*esse*) censetur. Ib. 42. 44. — *Iniquum tibi videtur esse*, non eisdem legibus omnia teneri. Cic. Clu. 55. — *Nihil est iniquius quam aliquid heredem paterni odii fieri*. Sen. Ira. 2. 34. — *Par est omnis omnia capere qui res magnas conceperunt*. Cic. Orat. 1. 4. — *Dubitans quid me facere oporteret, omnia pariter feci*. Cic. Cat. 1. 6. — *Commodissimum esse* statuit, omnes naves subdici. Caes. B. G. 5, par sit. Ib. Au. 9. 9. 2. — *Conveniensimum esse* domum suam quandoque recitari. Ib. 2. 10. — *Verum est* (it is proper) that agrum habere eos quorum sanguine et solore partus sit. Liv. 2. 48. — *Neque verum esse, eos qui suos fuis tueri non poterint, alienos occupare*. Caes. B. G. 4. 8. — *Cato negat verum esse* (says it is improper) *allic benevolentiam cibo*. Cic. Mur. 35. 74. — *Praelium rectum est hoc fieri* (it is right, proper), that this battle should be undertaken). Ib. Tusc. 4. 19. 43.

Obs. 6. If an impersonal predicate-adjective refers to the *reality* of the proposition, representing it as true or false, as certain or uncertain, as probable or improbable, as

\* If the predicate of the clause is a passive, such clauses may take the form of an infinitive clause with a gerundial, as: *Vituperandi praecepta contrariis ex vitis sumenda esse, perspicuum est.* Cic. Or. 2, 84. (See also note 21; that 'gerundium est' is sometimes con-

\* The statement of Rudlinian (p. 234, note 21) that '*æquum est*' is sometimes construed with an Ut-clause, is repeated by almost all the subsequent grammarians and lexicographers, some of them (for inst. Publ. Sch. Gr. p. 250) asserting that '*æquum est*' is '*very frequently*' construed with a subject Ut-clause. Some grammarians take pains to illustrate by examples of their own make the difference between *æquum est ut*, and *æquum est* with an infinitive clause. The fact is, that *æquum est* and *iniquum est* are ALWAYS construed with infinitive clauses, unless another coordinate predicate requires an Ut-clause, as: Id senātum *velle et æquum censere ut* ita feret. Liv. 39, 13. See, besides the examples quoted in the text: Cic. Off. 1, 9; Fin. 2, 35; L. M. 23; Cæs. B. G. 4, 16; Nep. 2, 7; Ter. Heaut. 2, 1, 2; Liv. 10, 21, and often. *Æquum non est*, and *par non est*, in two or three places of Plautus are construed with *ut*, according to the principle stated R. 26, Obs. 6: *Æquum videtur tibi (i. e. it is not proper) ut* ego, aliūm quod est meum esse dicam? Plaut. Rud. 1, 4, 4.—*Non par videtur*, presentibus illis pædagogus unā ut siet. Ib. Bach. 1, 2, 31. In classical prose, even with '*æquum non est*' an infinitive clause is used, as: Cæsar, se invito *Germānos in Galliam transire non æquum* existimāvit. Cæs. B. G. 4, 16.

† *Satius est* (it is better; it would be preferable) generally stands with a *subject-infinitive*, as: *Obvii Etne ignibus satius illi insulae esse quam est*. Liv. 26. 29. But it also occurs with an infinitive clause, as: *Mori me satius est*. Ter. Eun. 4. 7. 2.—*Satius fuisse non mori* (it is better than to die) *quam omni matrem*. Liv. 34. 33. The positive *Satius est* (it is enough) takes either a *subject-infinitive*, or clauses according to the general rules, as: *Mini sal erat, ita nobis antipatros nostros tradidisse*. Cic. N. D. 3. 4. connected with an *It*-clause. But in

§ *Verum est*, in the meaning 'it is proper', is not construed with an Ut-clause. But in the meaning 'it is true', 'it is certain', it takes either an infinitive clause, or an Ut-clause. See Obs. 6.

usual or unusual, rare or strange, the subject-clause takes *either* the form of an *infinitive clause*, or that of an *Ut-clause*\* (negatively *ut non*). The form of an *Ut-clause* is generally used in this connection, if the author pregnantly implies that, what is stated in the clause, *is* or *should be* otherwise, or *should be expected* to be otherwise.

EXAMPLES.—Conceditur *rerum esse ut* bonos boni diligant. Cic. Am. 14, 50.—Sin autem *illa veriora* (= illud verius) *ut* idem (sit) interitus animorum et corporum. Ib. 4, 14.—Si *rerum est* (if it is certain) *ut* populus Romanus omnis gentis virtute superaret. Nep. Hann. 1.—*Verum est*, etiam eis qui aliquando futuri sint, *esse consulendum*. Cic. Fin. 3, 19, 64.—Neque *rerum est*, opprimi memoriam imaginum pondere. Ib. Or. 2, 88.—Illud *verius est*, neminem in eo disertum esse posse quod nesciat. Ib. 1, 14.—Ita *fit verum illud*, amicitiam nisi inter bonos esse non posse. Ib. Am. 18, 65.—De ipso Roscio potest illud quidem *esse falsum ut* circumligatus fuerit angui. Ib. Div. 2, 31, 66.—*Falsum est*, omnis animi voluptates esse e corporis societate. Ib. Fin. 2, 32, 106.—Etiam tum quum *verisimile erit aliquem* (crimen) *commisisse*, in suspitione latratote. Ib. R. A. 20, 57.—Atque illud *est probabilius*, neque tamen *verum*, omnis in eo quod scirent satis *esse* eloquentis. Ib. Or. 1, 14.—Hoc *verisimile non est*, odio fuisse parenti filium. Ib. R. A. 14, 40.—*Non est verisimile ut* Chrysogonus horum litteras adamaret aut humanitatem. Ib. 41, 121.—An *verisimile est ut* civis Romanus cum gladio in forum descenderet? Ib. Sest. 36, 78.—*Verisimile non est ut* hunc in adversis rebus ab se dimitteret. Ib. Sull. 20, 75.—*Verisimile non est ut* ille religioni suae pecuniam anteponeret. Ib. Verr. 2, 4, 6.—Dei *verisimile est ut* alios indulgentius tractent propter parentis, alios propter futuram posterorum indolem. Sen. Ben. 4, 32.—*Rarum est ut* in foro iudicia propter id solum constituantur. Quint. 3, 19, 3.—*Quid tam inusitatum quam ut* eques Romanus ad bellum maximum pro consule mitteretur? *Quid tam singulare quam ut* consul ante fieret quam per leges licisset? *Quid tam incredibile quam ut* iterum eques Romanus triumpharet? Cic. L. M. 21, 62.—*Quid tam praeter consuetudinem* (= inusitatum) quam homini peradolescenti *exercitum dari*? *Quid tam novum quam adolescentem* privatum exercitum *conficere*? Ib. 21, 61.—*Non erit tibi hoc novum*, mihi *illum nullus rei rudem esse visum*. Ib. Or. 2, 1.—Hoc vero *novum*, ut homines servos e medio supplicio dimiserit. Ib. Verr. 2, 5, 6.—*Quid in Græco sermone tam tritum atque celebratum est* quam, si quis despicatui ducitur, *ut* Myrdum ultimus esse dicatur? Ib. Placc. 27, 65.—*Ut* in cunis fuerit anguis, *non tam est mirum* (strange, unusual). Ib. Div. 2, 31, 66.—Hoc vero *optimum est* (ironically used: It surpasses all belief that such a man should not know etc.) *ut* is qui finem rerum expetendarum voluptatem esse diceret et ultimum bonorum, id ipsum quid et quale sit nesciat. Ib. Fin. 2, 3, 6.—Id vero militibus fuit *pergratum et jucundum ut*, qui aliquid iusti incommodi expectavissent, *ultra premium ferrent* (against all probability). Cæs. B. C. 1, 86.

Obs. 7. Often the neuters of ORDINAL NUMERALS (definite or indefinite) are used with the copula in connection with a subject That-clause. Such numeral adjectives are not to be considered as impersonal predicates of the That-clause, but as absolute adjectives denoting the general idea of a *thing*, being used in this connection to express the *order* of certain 'points' in discourse. Such constructions must be treated, not according to

\* The reason of this construction with an *Ut-clause* must be derived from those passages, in which the subject That-clause contains a fact *against* reality, or a proposition which is contrary to experience. In these instances an *Ut-clause* is used, because this form makes it possible to express the non-reality of the predicate by a *subjunctive* (see p. 543). Subsequently this principle was generalized, and optionally extended to all instances in which the principal predicate refers to the *reality* of the clause.

† *It is certain* is either expressed by '*certum est*', or by '*verum est*', or '*exploratum est*', being construed with infinitive clauses, as: *Portentum certissimum est, esse aliquem qui* etc. Cic. R. A. 22, 63. More generally, however, the expression '*certum est*' means 'I (he etc.) *am determined* (to do a thing)' being either construed with an infinitive clause, or with a subject-infinitive. In the infinitive clause, the English subject of the principal predicate is inserted as subject-accusative, the tense of the predicate-infinitive being always the *present*, as: *Certum est, exulatum hinc ire me*. I am determined on going into exile. Plaut. Merc. 3, 4, 59.—*Eorum me libertati parere certum est*. Cic. Off. 1, 12, 38. If construed with a subject-infinitive, *certum est* takes the English subject as dative of the interested person: *Mihi certum est, illius uti testimoniis*. Cic. Cæc. 9, 24.—Sape ex Crasso audivi, *sibi certum esse a iudiciis causisque discedere*. Ib. Or. 2, 33.—The expression '*exploratum est*' is construed, like an adjective-predicate, with a dative of the person and a subject-infinitive clause, as: *Cui corpus bene constitutum sit et exploratum ita semper fore*. Cic. Tusc. 2, 7.—*Cui sit exploratum* (To whom is it sure) *se ad vesperum esse victurum*? Ib. Sen. 19, 67.—If *certum est* is used in the meaning of 'it is certain', it generally refers to 'subjective' (i. e. individual) certainty, being construed with the dative of the person and an infinitive clause, as: *Certius tibi est me esse Romæ, quam mihi, te Athenis*. Cic. Att. 1, 9, 1.—Sometimes '*constat*', with an infinitive clause, is used in the meaning of 'objective' certainty. See R. 28, Obs. 1.

the rules of impersonal predicate-adjectives, but according to those of impersonal *predicate-nouns* (Obs. 8 foll.), the neuter gender of the adjective being not the neuter of 'impersonality', but the neuter denoting the general idea of a thing (P. 1, § 354). The form of the subject-clause connected with such expressions is either that of an *Ut-clause* (if the numeral refers to the order of points 'to be discussed'), or that of a *Quod-clause* (if it refers to actual facts mentioned in order), or that of an *infinitive clause* (if it refers to assumptions or opinions enumerated); as: *Ergo hoc sit primum in preceptis meis ut demonstremus quem imitetur* (Let this be the first point to show etc.). Cic. Or. 2, 22.—*Proximum est ut*, doceam, deorum providentiâ mundum administrari. Ib. N. D. 2, 29.—*Extremum est ut* te orem, animo ut maximo sis. Ib. Fam. 4, 13, 7.—*Alterum est, quod* negatis, actionem ulius rei posse in eo esse qui etc. Ib. Ac. Pr. 2, 33.—*Primum est, esse aliquod visum falsum* (the first point is the assumption that something false has been seen); *secundum, id* percipi non posse; *tertium, fieri non posse ut* etc. Ib. Ac. Pr. 2, 26, 83.—*Proximum est, quam primum mori*. Ib. Tusc. 1, 48.\*

Sometimes other form-adjectives are used with similar constructions, as: *Vir bonus ut sim, meum est*; *it is in my power to be* a good man. Sen. Ep. 93. To such clauses the rules on Fact-clauses must be applied (R. 26, Obs. 5. See R. 29, Obs. 7.)

### 3. That-clauses, as Subjects of Impersonal Predicate-nouns.

Obs. 8. If the impersonal predicate of a subject-clause is a *PREDICATE-NOUN* with the copula, the form of the clause is determined by the previous rules (Obs. 2-6), if the predicate-noun with the copula is equivalent either to a verb construed with an object That-clause, or to an impersonal predicate-adjective construed with a subject That-clause.

1. *PREDICATE-NOUNS WITH SUBJECT INFINITIVE-CLAUSES*.—*Tertium exercitum tuendis parari* finibus *fama erat* (= fama nuntiabatur). Liv. 10, 32.—*Rem te valde bene gessisse, rumor erat*. Cic. Fam. 1, 8, 7.—*Nefas agunt esse consulem plebæjū fieri* (= scelus, turpe esse). Liv. 4, 3.—In Gallogræciâ sacer mons est, *quem ferro violari nefas habetur*. Just. 44, 3.—*Facinus est vinciri circum Romanum, scelus verberari, prope parricidium necari* (= it is criminal etc. if, see Obs. 3). Cic. Verr. 2, 5, 66.

2. *PREDICATE-NOUNS WITH QUOD-CLAUSES*.—If the predicate-noun may be replaced by a verb of praising, censuring, or accusing, the subject-clause generally takes the form of a *Quod-clause*, provided it contains an actual fact. If it contains a proposition, equivalent to a clause with *if*, or to a That-clause with an indefinite subject (Obs. 3), it always takes the form of an *infinitive clause*: *Summa laus tua et Bruti est quod exercitum priester spem existimantini comparasse*. Cic. Fam. 12, 4, 2.—*Dixi, cum ceteris tuis laudibus hanc esse vel maximam laudem, quod non solum quod opus esset diceret, sed etiam quod non opus esset, non diceret*. Ib. Or. 2, 73.—But: *Magna laus est et grata hominibus unum hominem elaborare* (= *if* one man is working) in eâ scientiâ quæ sit multis profutura. Ib. Mur. 9.—*Suevi maximam putant esse laudem, quam latissime a suis finibus vacare agros* (if the lands are waste). Cæs. B. G. 4, 3.—*Grave crimen est hoc, prælorem socios habuisse decumanos* (it is a serious charge that a prætor should have had etc.). Cic. Verr. 2, 3, 56. Hence, of coordinate That-clauses, one takes the form of an *infinitive clause*, if it contains an assumed proposition, while the other, referring to an actual fact, takes the form of a *Quod-clause*, as: *Non tantum mali est* (= so great an evil) *peccare principes* (if rulers do wrong), quantum illud quod permulti imitatores principes existunt (as that so many imitators exist). Cic. Leg. 3, 14.

3. *PREDICATE-NOUNS WITH UT-CLAUSES, AND NE-CLAUSES*.—*Vetus est lex* (= lege imperatur, constitutum est) *amicitiæ, ut idem amici semper velint*. Cic. Planc. 2, 5.—*Consensus fuit* (= consensu decretum est) *senatus, ut matre proficisceremur*. Ib. Fam. 3, 3, 1. *Primum est officium* (idea of duty, Obs. 5) *ut* (homo) *se conservet in naturæ statu*. Ib. Fin. 3, 6, 20.—*Ejus cultus hoc minus est* (idea of task, Obs. 5) *ut efficiat* etc. Ib. 4, 14, 38.—*Fuit hoc quoddam inter Scipionem et Lælium jus* (idea of right, or permission) *ut* Scipio Lælium observaret parentis loco. Ib. Rep. 1, 2.—*Mea ratio in dicendo hæc esse solet* (it is my usual rule, Obs. 5) *ut boni quod habeat, id amplectar, a malo autem recedam*. Ib. Or. 2, 72.—*Periculum est ne* (according to the analogy of *vereri*, = *verendum est*) *ne omnes copiae convenient*. Liv. 25, 38.—*Nullum est enim periculum, ne quid tu eloquere nisi ita prudenter ut* etc. Cic. Or. 1, 48.—*Haud sane periculum est ne non mortem optandam putet*. Ib. Tusc. 5, 40.—The construction of *periculum est* with an infinitive clause, is anteclassical. See Plaut. Aul. 2, 2, 58.

Obs. 9. If the predicate-noun and copula cannot be replaced by verbal or adjective predicates, the subject-clause is treated according to the rules of Fact-clauses (R. 26), as: *Causa mittendi fuit quod iter per Alpès patefieri volebat* (the fact mentioned was the cause of the mission). Cæs. B. G. 3, 1.—*Grave etiam argumentum tibi videbatur quod*

\* Such predicate-nouns of general import may be expressly added, as: *Altera est res, ut res geras magnas et utiles*. Cic. Off. 1, 20, 66.

opinio de die immortalibus omnium esset (the fact mentioned seemed an important argument for a thesis previously mentioned). Cic. N. D. 3, 4.—Ad haec omnia una consolatio est quod ea conditione nati sumus ut etc. Ib. Att. 15, 1, 1.—*Miserum in faciem fuit* (= mi-ama iacura fuit) quod praeterea inter ceteros est capitis. Liv. 25, 1.—Illa quanta benignitas (naturae) quod tam multa ad vescendum, tam varia, tamque jucunda ligna. Cic. N. D. 2, 53.—*Caput illud est ut Lysōnem recipias in necessitudinem tuam* (the main thing is, that you should etc.). See R. 26, Obs. 5. Ib. Fam. 12, 19.—*Caput esse arbitratur, uti eorum, qui audirent, sic afficerentur animi ut eos affici vellet orator* (the main thing is for the orator to see that etc.). Ib. Or. 1, 19.—*Est hoc commune ritum in magnis liberisque civitatibus ut invidia gloriae comes sit*. Nep. Chab. 3. (It is a vice, consequent to the greatness and liberty of a state, that etc.).

Obs. 10. There are several conventional usages in regard to subject-clauses connected with predicate-nouns:

1. *Fas est* (it is rightful, it is allowed by the gods, it is predestined by fate) is not construed with an Ut-clause, as should be expected, but with an infinitive clause, or with a subject-infinitive, as: *Populum Romanum servire fas non est*. Cic. Phil. 6, 7.—*Huic legi nec obrogari fas est, neque etc.* Ib. Rep. 3, 22.—*Si eos hoc nomine appellari fas est*. Ib. Mur. 37, 80.—*Non esse fas, Germanos superare* (it was not decreed by fate that the Germans should be victorious—an ambiguous sentence, since *Germanos* may also be taken for a transitive object). Caes. B. G. 1, 50.—*Quid non adeptus est quod homini fas esset optare?* Cic. Am. 3, 11.—*Fatum est* (it is ordained by fate) is construed either with a subject-infinitive, or with an Ut-clause, or with an infinitive clause, the predicate-infinitive being always in the present tense; as: *Daphite fatum fuit ex equo cadere* (it was ordained by fate that Daphite should fall). Cic. Fat. 3, 5.—*Fuit hoc sive meum sive reipublice fatum ut in me unum omnis illa inclinatio temporum incurreret*. Ib. Balb. 26, 58.—*Si fatum fuit, classis P. R. debet etc.*; *si fatum fuit exercitum P. R. ad lacum Trasumenum interire*. Ib. Div. 2, 8, 20.

2. The predicates denoting 'it is the habit' (*mos est, consuetudo est, moris est, consuetudinis est*) are generally construed with Ut-clauses, since what is done by habit, is conceived as the result and consequence of a rule, or as dictated by a silent law, as: *Est mos hominum ut nolint eundem pluribus excellere*. Cic. Brut. 21, 84.—*Est hoc Gallicae consuetudinis ut viatores consistere cogant*. Caes. B. G. 4, 5.—*Est consuetudo Graecorum ut nonnumquam eximant unum aliquem diem ex mense*. Cic. Verr. 2, 2, 52.—But if the predicate of the clause is a passive, '*mos est* etc.' may be construed with an infinitive clause: *Mos est Athenis laudari in contione eos qui sunt in probo interfecti*. Cic. Or. 43, 151.—These expressions may also be construed with a subject-infinitive, according to the construction of *solvere* and *consuere* with an object-infinitive, as: *Consuetudo Germanorum est resistere, neque deprecari*. Caes. B. G. 4, 7.—The expressions *mos est*, and *consuetudo est* may also be construed with an attributive gerundial according to p. 159, Obs. 1), in which instance however *mos* and *consuetudo* must be considered as subject-nominatives (the habit exists), as: *Rogo, quia mos est ita rogandi*. Cic. Fam. 12, 17.—*Mala et impia consuetudo est contra deos disputandi*; The habit of disputing against the existence of gods, is bad and impious. Ib. N. D. 2, 67.

3. The expression *tempus est* (it is time, high time, the proper time) is equivalent to *tempus adest*, so that a That-clause cannot, logically, be in the relation of a subject-nominative to this expression. According to this conception, *tempus est* is sometimes construed with an attributive gerundial genitive (see p. 159, Obs. 3). But, more frequently *tempus est* is construed with a subject-infinitive, or with an infinitive clause, as if it were an impersonal predicate = *expedit*, as: *Jam tempus est ad id quod institimus accedere*. Cic. Top. 1, 5.—*Sed tempus est, jam hinc abire me ut moriar, vos ut vitam agatis*. Ib. Tusc. 1, 41.—*Tempus est, nos de illa perpetua vita cogitare*. Ib. Att. 10, 8.—The construction of *tempus est* with an Ut-clause is anticlassical, as: *Dicas, tempus maximum esse ut eat domum*. Plant. Mil. 4, 3, 8.—*Videtur tempus esse ut eamus ad forum*. Ib. 1, 1, 72.

4. Peculiar is the use of *magis est*, in the meaning 'there are stronger reasons' (i. e. for one thing than for another), which originally was a technical phrase in legal discussions, being extremely frequent in the Pandects and in Ulpian. But it also occurs in ordinary classical prose. It is construed (as if = *plus causae est*, or *major causa est*) either with an Ut-clause, or with a Quod-clause (with subjunctive), if it refers to reasons for 'doing something', as: *Magis est ut (Caelius) ipse moleste ferat errasse se, quam ut istius amicitiae crimen reformidet*; There are more reasons for Caelius to feel (why he should feel) sorry for his error than etc. Cic. Cael. 6, 14.—*Magis est quod gratuler tibi quam quod terogem*. Ib. Att. 16, 5, 2.—If it refers to reasons for 'believing', or 'adopting' an opinion, the clause must be an infinitive clause. But this construction occurs only in the jurists.

Obs. 11. Impersonal predicates, consisting of impersonal genitives or impersonal datives are treated according to the same rules as predicate-nouns; as: *Est mihi magna*

*cure ut ita erudiat* etc. Cic. Fin. 3, 2, 8.—*Scient patribus curae fuisse ne qua injuria in eos oreretur*. Liv. 4, 7.—*Felicitatem* (suam) deorum judicio (tribui, laudationis est). Cic. Or. 2, 85.—*Gallis magno erat impedimento, quod pila ex scutis evellere non poterant*. Caes. B. G. 1, 25.

Obs. 12. Sometimes impersonal substantive predicates take *Quin*-clauses as subjects if the predicate is negative, and the noun denotes a negative action, as *Neque controversiam fore quin Italia imperium Campanis relinquatur*. Liv. 24, 6.—*Quin*-clauses connected with '*nulla causa est*' are not subject That-clauses, but interrogative attribute-clauses, dependent on *causa*, *quin* being '*qui non* (why not), as: *Quin ad diem d-e-dam nulla causa est?* There is no reason why I should not depart at the very day. Cic. Fam. 2, 17, 1.—*Nuptias hodie quin faciamus, num qua est causa?* Plant. Aul. 2, 2, 84.

#### 4. That-clauses as Subjects of Impersonal Verbs.

Rem. 28. The active (or deponent) IMPERSONAL verbs which are construed with That-clauses may be divided into four groups: 1) Those which represent the idea of a *verbum sentiendi* or *declarandi*: *Apparet* (*videtur*), *patet*, *constat*, *convenit*, *discrepat*, *in mentem venit*, *fallit*, *fugit*, *præterit*, *placet*, *jurat* (*libet*, *delectat*), *licet* (*cucul*), *pernitet*, *pudet* (*pungit*, *angit*, *sollicitat*). See Obs. 1.—2) Those which represent the idea of a *verbum faciendi*: *Fit*, *cadit*, *accidit*, *incidit*, *evenit*, *usu venit*, *contingit*, *obtingit*, *est*, *stat*, (Obs. 2).—3) Those which represent the idea of an ADJECTIVE PREDICATE, denoting a judgment of the author on the morality or merits of a proposition: *Decet*, *convenit*, *repugnat*, *oportet* (*necesse est*, *opus est*), *expedit*, *interest*, *refert*, *non attinet*, *prodest*, *ex usu est*, *obest*. See Obs. 3.—4) A few ORDINARY NEUTER VERBS which, by their frequent connection with subject That-clauses have assumed the character of impersonal verbs: *Accedit*, *sequitur*, *restat*, *pertinet*. Obs. 4.

The subject That-clauses connected with these four groups of impersonals take the form of an infinitive clause, or of a finite clause introduced by *ut*, *ne*, *quod*, *quominus*, *quin*, or the form of an asyndetic subjunctive clause, according to the rules of that class which they represent.

Subject FACT-CLAUSES (see R. 26) may be connected with any ordinary verbal predicate which admits of the idea of an action as subject (Obs. 5).

Obs. 1. IMPERSONAL VERBS implying a *verbum sentiendi* or *declarandi*:

1. *Apparet* (it is evident, it is clear, = *perspicui potest*; *perspicuum est*; 'It is very evident')—*Evidet* (*apparet*) is construed with an INFINITIVE CLAUSE: *Facile apparet, nos tres omnia consequi potuisse simul ac velle capissent*. Cic. Tusc. 4, 2, 5.—E quo *apparet*, sapientis esse aliquando offi-ium, aliquando accedere e vita. Ib. Fin. 3, 18, 60.—Very peculiar is the personal construction of *apparet* with a nominative with the infinitive, as if a passive, according to the analogy of *videri* (p. 106): *Membra nobis ita data sunt ut ad pas-sive, according to the analogy of *videri* (p. 106): *Membra nobis ita data sunt ut ad**

quandam vitæ rationem data esse appareant. Cic. Fin. 3, 7, 23.—*Patet* (it is clear) is sometimes, but rarely, used impersonally with the construction of *apparet*: *Patet, æternum id esse quod se ipsum moveat*. Cic. Tusc. 1, 23.—*Liquet* (it is clear) mostly occurs without subject, but also takes a subject-infinitive clause with dative of the person: *Numquam liquet nobis, ubi pacem esse, ubi Hannibal erit*. Liv. 37, 45. So Ter. Andr. 2, 3, 36.

2. *Videtur*, being grammatically the passive of the *verbum sentiendi* *videre*, is virtually an active (deponent) impersonal verb (= 'it seems'). It takes its logical subject in the dative (the same as *licet*, *placet* etc.), and is construed with an infinitive clause: *Non mihi videtur ad beatæ vivendum satis posse virtutem*. Cic. Tusc. 5, 5, 12. It frequently takes the personal construction of the nominative with the infinitive, in which instance it retains, by a very peculiar idiom, the dative of the logical subject, although it has a grammatical subject in the nominative expressed or understood: *Mihi videor, jam de omnibus rebus ejus gestis dixisse*. Cic. Verr. 2, 5, 10.—*Vere mihi hoc videor esse dicturus*. Ib. Or. 1, 2.—*Ita mihi est* is used in the meaning 'I resolved' (like *placuit*), and, in anticlassical style, is construed with an Ut-clause: *Videtur mihi ut ejus tantam præsumptum*. Ter. Phorm. 4, 3, 4. So CæL. in Cic. Fam. 8, 5, 2. In classical language *videtur* in this meaning takes an infinitive clause, as: *Endum in Ætoliæ Quinctio visum est*. Liv. 35, 33.

3. *Constat* (it is known, it is evident) takes an infinitive clause. Its logical subject is either expressed by *inter cetera omnia constat*, all know, or by a dative (*mihi constat* =

I know, or 'it is evident to me'): *Constāre inter omnis video, patēre auris tuas querēlis omnium*. Cic. Qu. Fr. 1.1.8.—*Eum ad Cn. Pompejum intermiseram placitum fuisse, constabat*. Ib. Pis. 12.38.—*Mihi constabat* (it became evident to me) *paucorum civium virtutem cuncta patravisse*. Sall. Cat. 53.4.—*Omnibus* (militibus) *constabat* (all the soldiers knew), *hiemari in Gallia oportere*. Caes. B. G. 4.29.—Sometimes *constat* (without a personal object) has the meaning 'it is certain', 'it is a settled fact': *Pompejum nobis amicissimum constat esse*. Cic. Att. 1.12.3.

4. *Convenit* means either 'it is proper', or 'it is agreed'. In the former meaning, it belongs to the third class. (See Obs. 3). In the latter meaning it is equivalent to 'consentio, consentiunt etc.', referring either to the truth of a proposition, or to an action to be performed (= *paciscor*). If it refers to the truth of a proposition, it takes an infinitive clause, the logical subject being expressed by 'inter', as: *Inter omnis convenire oportet* (All should agree on the fact that, all should acknowledge that) *commotiones animorum a recta ratione aversas, esse vitiosas*. Cic. T. 4.28.61.—*Convenit*, per consules reliqua belli perfecta (esse); 'There is agreement on the point that', or 'all the authorities agree' that the remainder of the war was carried to the end by the consuls. Liv. 9.16.—If 'convenit' refers to an action to be performed, it is either construed with an *Ut*-clause (or *ne*), or with an asyndetic clause with a predicate in the subjunctive, the logical subjects being expressed by the *dative*, referring to the one party, and by the preposition *cum*, referring to the other party, as: *Mihi cum Dejotaro convenit* ut ille in meis castris esset cum suis copiis omnibus (*I made an agreement with Dejotarus that he should be etc.*). Cic. Att. 6.1.14.—*Pacto convenit* ut Himeria finis regni Syracusani esset. Liv. 24.6.—Pro argento, si aurum dare mallerent, *darent convenit*; It was stipulated (in the treaty) that they should be entitled to pay in gold, instead of in silver, if they preferred it. Liv. 38.11. Comp. Cic. Tusc. 4.19.43. Plaut. Aul. 2.2.80.

5. *Discrepat*, 'they disagree' (being the contrary of *convenit*) is construed with an *interrogative* clause, the logical subjects being expressed by 'inter', as: *Quantum militum transportatum sit, inter auctores discrepat*. Liv. 29.25. But 'non discrepat' takes a *Quin*-clause (according to the analogy of 'non dubitare'), as: *Nec discrepat quin* (nor is there any difference of opinion as to the fact that etc.) *dictator eo anno A. Cornelius fuerit*. Liv. 8.40.—*Quum haud discreparet quin* quae regum fuissent, Romanorum essent; When they agreed that what had formerly been under royal dominion, should become Roman territory. Ib. 25.28.

6. *In mentem venit* (it occurs to me, the idea comes to me) takes an infinitive clause, if it is equivalent to *memini*, as: *Venit hoc mihi in mentem, te esse hominem divitem*. Plaut. Aul. 2.2.49. If it refers to an intention of the doer, it is either construed with a subject-infinitive, or (rarely) with an *Ut*-clause: *Neque mihi unquam venit in mentem, Crasso invidere*, I never thought of envying Crassus. Cic. Att. 2.4.2.—*Venit mihi in mentem* argentum ut petam. Plaut. Curc. 4.4.2.—Similarly the phrase 'ad auris alicujus pervenit' is used impersonally with a subject-infinitive clause: *Ad auris magistratum pervenit*, exiles in urbem devenisse. Nep. Pelop. 3\*.

7. *Fallit me* (I am mistaken = *opinio fallit me*, my opinion deceives me), *fugit me*, or *praeterit me* (it escapes me), take their logical subjects in the accusative, being construed with a subject-infinitive clause. *Non fallit me* is also construed with a *Quin*-clause (according to the analogy of *non dubito*); and *fugit me* sometimes takes a subject-infinitive: *Fallit eos*, dicendo homines ut dicant efficere solere; They are mistaken in their opinion that men will learn speaking (make that they speak, i. e. as orators) by speaking. Cic. Or. 1.33.—In (hac) lege nulla esse ejusmodi capita te non fallit. Ib. Att. 3.23.4.—*Nec vero* Caesarem *fallit quin* ab eis cohortibus victoria oriretur (nor was Caesar disappointed in his expectation that etc.). Caes. B. G. 3.91.—*Neque enim te fugit* omnium artium parentem philosophiam judicari. Cic. Or. 1.3.9.—*Me tamen* fugerat deorum immortalium has esse penas constitutas. Ib. Pis. 20.46. Comp. Caes. B. C. 1.71. Cic. Att. 7.18.3; Ib. Caes. 35. The phrase 'opinio me fallit' takes a *Quod*-clause, as: *Necesse est te opinio nem multum fallisse quod* existimaris me causam Cluentii lege defensurum. Ib. Clu. 52.

8. *Placet*, which takes its logical subject in the dative, is used with the following meanings and constructions: (a) *Placet mihi*, in the meaning 'I like', 'something pleases me' is construed personally with a substantive subject, or impersonally with a subject-infinitive, or (as *verbum affectus*) with a *Quod* clause, as: *Academic consuetudo mihi semper placet*. Cic. Tusc. 2.3.9.—*Ne mihi quidem ipsi tunc placerebat*, diutius abesse ab republicae custodia. Ib. Fam. 9.15.3.—*Ait* Quintus, tibi non placere quod ad multos de me asperius scripserit. Ib. Att. 11.13.2.—(b) In the meaning 'it is proper' it stands (without a dative) with a subject-infinitive, or an infinitive clause: *Placet ante definire quid sit officium*; It is proper (for me) to define first (or 'that I should define first') the idea of duty. Cic. Off. 1.2.7.—*Placet esse quidam* in republica praestans; It is proper

\* The verb *venire* is used impersonally in some other combinations, as: 'In disquisitionem venit', it is a subject of discussion. Liv. 26.31.

that (— I would like if) there should be something preëminent in the State. Ib. Rep. 1.45. Comp. Ib. 1.32.191. 1.36.56.—(c) Often 'mihi placet' means 'I am of opinion', 'I hold', when it is construed with an infinitive clause (= *censeo*), as: *Placet stivis omnia peccata esse paria*. Cic. Ac. Pr. 2.43.133.—*Epicuro placet, opinionem nulli agritudinem esse*. Ib. Tusc. 3.13.—(d) Frequently 'mihi p. acet' has the force of 'I resolve', with the perfect 'mihi placuit', or 'mihi placitum est'. In this instance the regular construction is that with an *Ut*-clause, or, if the predicate is a passive, with an infinitive clause, as: *Senatui placere ut* consules eis monumentum locandum curent. Cic. Phil. 14.14.38.—*Placitum est ut* in aprico loco considerent. Ib. Rep. 1.12.18.—*Postea mihi placuit ut* (I resolved to) Graecorum orationes explicarem. Ib. Or. 1.31.155.—Hunc locum subsidiariis repleri placuit. Liv. 5.38. Frequently, however, an infinitive clause is used even with active predicates, as: *Placuit Valerium* Horatiumque ire in Aventinum. Liv. 3.51. Sometimes active-infinitive clauses are used with the subject-accusative understood: *Placuit* Baëtos, Achaëos etc. *templare* (= se templare Baëtos, or 'Baëtos templare'). Liv. 35.47.

There are three impersonal synonyms of *placet*, namely: *Juvat*, *delectat*, and *libet*.—*Delectat* is rarely used impersonally, but sometimes occurs so with a subject-infinitive (*delectat me*, it delights me), as: *Sunt alii quos cum ipsa solitudine loqui delectat*. Cic. Tusc. 3.26.—*Juvat me* (with the same meaning) is frequently used, both with a subject-infinitive (sometimes in the perfect), and an infinitive clause, as: *Sin me astitum juvat fingere*. Cic. Fam. 3.10.—*Juvat me*, tibi tuas litteras profuisse. Ib. Fam. 5.21.3.—*Libet* or *libet mihi* (with the perfect *libitum est*, rarely *libuit*), is similar to the first meaning of *placet*, but implies the idea of an arbitrary action (*I choose*), and is used only of actions by the logical subject. It is either construed with a subject-infinitive, or with neuter form-adjectives: *Libet mihi facere* (to stay) in Arpinati. Cic. Att. 1.16.17.—*Libitum est mihi paullo plura dicere*. Ib. Or. 2.85.

9. *Licet mihi* (it is allowed to me) does not denote a positive permission (which must be expressed by 'conceditur'), but a *want of prohibition* (*licet mihi* = I have a right, I may, I can). Hence it cannot take a passive agent, like 'conceditur'; but the person, or thing which might prohibit an action, is expressed by 'per' with an accusative (*per me licet* = I have no objection; *per leges licet* = it is lawful, i. e. the laws do not prohibit).—*Licet* has three regular constructions: 1) with a mere subject-infinitive if the person that has a right is not mentioned, or, is represented as uncertain: *Stultitiam accusare quamvis copiose licet*; It is allowed to arraign folly (folly may be arraigned) etc. Cic. Tusc. 3.30.—*Quo utinam velis passis perveli liceat* (Would that we could proceed there etc.). Ib. 1.49. 2) If the person who has a right is mentioned, either a subject-infinitive is used along with the person as object (logical subject) in the *dative*, or with an asyndetic subjunctive clause, the person being made the grammatical subject of the clause, as: *Peccare nemini licet*, nobody is allowed (has a right) to commit crimes. Cic. Tusc. 5.9.55.—*Ita se gessit ut ea facere ei liceret*. Ib.—*Petis ut tibi per me liceat* quemdam de exilio reducere, that I should not object to your recalling some one from exile. Ib. Fin. 2.28.—*Dignadientur illi per me licet*; I have no objection to their fighting. Ib. Tusc. 4.21.47.—*Sequitur Hermagoram licet*; He will have a perfect right to follow Hermagoras. Ib. Inv. 1.51.—*Etiā fulmina fortunae contemnāmus licet* si etc.; We may even (we have a right to) disregard the blows of fortune if etc. Ib. Tusc. 2.27. The use of an *Ut*-clause in place of an asyndetic subjunctive clause is unusual (as in a passage literally rendered from the Greek 'Ut ad quietum me licet venias. Cic. Tusc. 5.32.90).—Less frequent is an infinitive clause with the logical subject of *licet* as subject-accusative of the clause, as: *Hæc præscripta servantem licet magnifice vivere*; A person observing these rules may live magnificently. Cic. Off. 1.26.—*Licet me id scire quid sit? May I know* what is the matter? Plaut. Pseud. 1.1.14. Comp. Cic. Tusc. 5.15.44. But the construction of *licet* with a passive infinitive clause very frequently occurs in place of a transitive subject-infinitive if the logical subject of *licet* is not mentioned, as: *Evocari ex insula Cyprios non licet* (= *evocare Cyprios non licet*). Cic. Att. 5.21.6.—*Cooptari sacerdotem licet* (= *cooptare sacerdotem*). Ib. Fam. 3.10.9.—*Rationem haberi per leges licet* (= *rationem habere*). Ib. Phil. 5.17.46.

A completing or accessory predicate of the subject-infinitive of *licet* is generally placed in the *dative* when the logical subject (in the *dative*) is mentioned, as: *Impetrabis a Cesare ut tibi abesse liceat et esse otioso*. Cic. Att. 9.2.—*Quare judicari mihi non esse licet*. Ib. Rab. Post. 7.—*Ut sibi triumphanti urbem invehi liceret*. Liv. 38.44. So Ib. 35.8.—*Cui securo vivere licebat*. Val. Max. 4.7. ext. 1. Comp. Cic. Tusc. 1.15; Ib. Rosc. Am. 49; Caes. B. G. 6.55; Liv. 21.44.—If the logical subject is not mentioned, the completing or accessory predicate is placed either in the *dative*, or in the accusative: *Hannibal precatur deos ut innotam eorum atque abire* (i. e. *sepe*) *liceat*. Liv. 26.41. Comp. Ib. 3.50; Hor. Sat. 1.1.19.—*Licet esse miseris* (i. e. *cas*). Cic. Lig. 6.18.—*Nam melius esse* (i. e. *nos*) *jam non licet*. Ib. Att. 10.8.4.—The completing (but not an accessory) predicate is sometimes placed

5. The ideas 'it is useful, expedient, or hurtful', are sometimes represented by the impersonal expressions *ex usu est*, or *ex re est* (it is expedient); *ab re est*, it is inexpedient; or by the neuter verbs *prodesse* and *obesse* in an impersonal form. *Prodest* with a subject-infinitive or an infinitive clause occurs in poetry and in the Latinity of the silver age: Plurimum *proderit* pueros statim salubriter *instilui*. Sen. Ira. 2, 21.—Quibusdam *inātis profuit* aspectus speculum: To some it has been useful to look into the glass when angry. Ib. 2, 36.—*Obest* sometimes occurs with an infinitive clause in good prose: Nam et illos nobis non *obest* *vidēri* nostrum testimonium non valuisse. Cic. Att. 1, 16, 11.—The expressions *ex usu est*, *ex re est* (it is advantageous, expedient, 'of interest') are construed with infinitive clauses, except when an Ut-clause is used in a negative sense, according to R. 26, Obs. 6, as: Matres familias sortibus declarabant utrum *praedium committere* *ex usu esset*, necne. Cæs. B. G. 1, 50.—Libido est opinio venturi boni, *quod sit ex usu* jam *praesens esse* atque *adesse* (of which it is thought expedient that it should be present, i. e. the present enjoyment of which is considered desirable). Cic. Tusc. 4, 7.—*Ex tua re non est ut ego emoriar*. Plaut. Pseud. 1, 3, 102.—Thus '*ex re publicae est*' means 'it is of public interest', 'it is in the interest of the republic': Ne magis *ex re publicae esset*, interregnum *intrā*, quam in eo statu *relinqui provinciam*. Liv. 35, 6.—'*Ab re est*' means 'it is inexpedient', with the same construction: Non *ab re esse* Quinctio visum est, sociorum aliquos *legatos interesse* ei consilio. Liv. 35, 22.

6. *Præstat* (it is better) takes the construction of *satis est* (p. 611, n. †). *Sufficit* (= *satis est*) is construed with a subject Ut-clause in the silver age, as: *Sufficit ut* simplex quiddam et uniforme doceamur. Tac. Dial. 32.

Obs. 4. The following impersonals do not belong to any of the above-mentioned classes:

1. *Accedit* (= add\* to this, that) requires an Ut-clause (a) if the clause expresses what should be done: *Accedit etiam illud ut statuis hoc iudicio, utrum posthac etc.*, to this must be added *that you must determine* in this trial whether etc. Cic. Balb. 23, 65.—Eo *accedebat ut* metu regnum ei *tutandum esset*. Liv. 1, 49.—(b) If *accedit* refers to an action represented as possible or contingent (*si accedit ut*): *Quid si accideret eodem ut tennis ante fueris?* Cic. R. A. 31, 86.—*Si vero illud quoque accideret ut* in ea verba prætor iudicium det etc. Ib. Verr. 2, 2, 12. In all other instances the use of *Quod*-clauses or Ut-clauses with *accedit* is optional, as: *Accedebat ut* hæc tu pro republica queri summā cum dignitate *existimare*. Cic. Or. 2, 48. Compare with: *Accedit illud quod* illa plebecula me a Pompejo unice diligere *putat*. Ib. Att. 1, 16, 11.—*Accessit ut* equitibus per oram dispositis aquari *prohiberentur*. Cæs. B. C. 3, 24. Comp. with: *Accedebat quod* suos ab se liberos abstractos obsidum nomine *dolēbant*. Ib. B. G. 3, 2.—For examples with *ut* see Cic. Sen. 6; Dej. 1, 2; Mur. 22, 45; Tusc. 1, 19, 43; Fam. 5, 12, 8; Att. 3, 8, 1; Ib. 14, 13, B. 3; Cæs. B. G. 3, 13; 5, 16; Liv. 1, 49. For examples with *quod* see Cic. Att. 13, 21, 7; Ib. 1, 19, 1; Fam. 6, 6, 8; R. A. 8, 23; Cæs. B. G. 4, 16; 5, 6; Liv. 1, 43; 2, 18; 35, 10. [Kühner says that *accedit* must be construed with *quod* if the fact is supposed as correct; and that *ut* must be used if the fact is conceived as 'developing itself'—which distinction is purely imaginary.—MEHING states that *quod* is used if an existing fact is mentioned; and that '*accedit ut*' has the sense 'Moreover it happens that'. Almost every example proves that this distinction is erroneous.—Zumpt considers *accedit quod* the regular construction, and *accedit ut* an occasional exception, which is refuted by the fact that both constructions are extremely frequent, the one occurring about as often as the other.]

2. *Restat* has the meaning and construction of *relinquitur* and *reliquum est* (R. 27, Obs. 1; Obs. 5), requiring an Ut-clause: *Restat ut*, qualis eorum natura sit, consideremus. Cic. N. D. 2, 17, 45.—*Restat ut* motus astrorum sit voluntarius. Ib. 2, 16, 44. Comp. Ib. L. M. 10, 27; Ib. Quinct. 12, 41.

3. *Pertinet*, with a subject-clause, has the general meanings 'it pertains, it refers†, it belongs', being always accompanied with the object to which the facts stated in the clause are said to belong. This object is expressed by *ad* with an accusative, or by its equivalents (*eo*, *eodem*, *huc*). The clause takes the form of a *Quod*-clause, instead of which, if the subject is an indefinite person, a subject-infinitive is used: *Eodem pertinet quod causam ejus probo*: It pertains to the same (end) that I approve his cause (= the fact that I approve will lead to the same end, will have the same effect). Cic. Att. 8, 9, 1.—(Cæsar dixit), *quod* victoria sua tam insolenter gloriarentur, *eodem pertinebat*: Cæsar said that the insolent boasting of their victory was of a piece with their other conduct (literally: 'belonged to the same thing'). Cæs. B. G. 1, 14.—An tu *ad domos nostras* non censes *pertinere scire* quid agatur domi? Or do you not think that knowing what is going on at home *pertains* to our homes? Cic. Rep. 1, 13, 19.—'*Ad rem pertinet*' is sometimes used in the meaning '*it is proper*', being construed with an infinitive clause according to R. 27, Obs. 5, as: *Ad rem pertinere* visum est, consules primo quoque tempore *crārī*. Liv. 35, 24.—*Pertinebat ad rem*, præceptores pueris placidos *dari*. Sen. Ira. 2, 22.—Rarely

\* Literally: *adde quod*. This expression occurs in the poets only.

† The English 'it refers to something' cannot be expressed impersonally by *refert*, since the verb *refert* is not used as an impersonal predicate.

*pertinet* is used as a synonym of *interest* if the clause refers to an action to be done. In this instance it takes an Ut-clause or a Ne-clause: *Ad rempublicam pertinet* (= *reipublicæ interest*) ne acta mea rescindendo alios in posterum *segniōres faciatis*. Liv. 26, 31.

4. *Sequitur* (*consequitur*), has the same construction as *efficitur* (R. 27, Obs. 1). Hence it is construed either with an Ut-clause, or (more rarely) with an infinitive clause. An Ut-clause is always necessary if the action is represented as 'to be done': *Sequitur ut* causa ponatur; It follows that the case be defined (i. e. the next point for an orator is to define the case). Cic. Or. 2, 81, 331.—Inde et illud *sequitur ut* minimis rebus non exacerbemur. (Hence it follows that we should not etc.) Sen. Ira. 2, 25.—Ex perpetuis gaudiis quum perspicuum sit vitam beatam existere, *sequitur ut* ea existat ex honestate. Cic. Tusc. 5, 23, 67.—*Sequitur vitam* beatam virtute *confici*. Ib. 5, 8, 21. Comp. Cic. Fat. 12, 28; Ib. 10, 22; Fin. 2, 8, 24. Tusc. 3, 16, 34; Ib. 5, 18, 53. Sometimes *consequens est* is used with the same force and construction as *sequitur*: Hoc probato, *consequens est*, beatam vitam virtute *esse contentam*. Cic. Tusc. 5, 7, 18.

### 5. Subject That-clauses with Ordinary Active Verbs.

Obs. 5. Any active or deponent verb may take a *Quod*-clause as subject in place of an ordinary substantive-subject if the subject contains the idea of a fact which is described by a complete sentence, as: Rem *distinebat quod* utrum armati an inermes emitterentur regii, parum *conveniebat*; The fact that there was no sufficient agreement on the question whether the royal troops should be sent out with or without their arms, delayed the affair. Liv. 37, 12.—Illud maxime nostrum *fundavit imperium quod* Romulus federe Sabino *dedit*, etiam hostibus recipiendis augeri hanc civitatem oportere. Cic. Balb. 13, 31.—Thus: *Augēbat molestiam quod* etc. Cic. Brut. 1, 2; *adjūcābat consilium quod* etc. Cæs. B. G. 2, 17; *vindictābat me quod* etc. Liv. 40, 9; *consolātur quod* etc. Cic. Clu. 1, 3; *consilio suffragabatur quod* etc. Cæs. B. C. 1, 61. See the Ex. p. 491, Obs. 14, 1.—Subject-clauses of this kind may be changed into object-clauses representing the passive agent in the same way as the nominatives of substantives may be turned into ablatives by giving to the predicate a passive form. In this instance the *Quod*-clause is attached to the ablative *eo* of the syndetic antecedent *id* (*Res distinebatur eo quod* etc.; *imperium nostrum fundatum est eo quod*; *molestia augebatur eo quod* etc.).

Obs. 6. Ut-clauses are rarely used as subjects of ordinary (personal) verbs. If they are used so, a noun of general import according to R. 26, Obs. 5 (rule, duty etc.) must be supplied, as: *Quod autem continet vitam fortunasque nostras, id est ut, quod honestum sit, id solum bonum iudicemus*, potest id quidem copiose augeri et ornari. Cic. Fin. 3, 7, 26 (= *Ut* honestum solum bonum iudicemus, *continet vitam*; The rule that we should consider the moral as the only good, holds our lives together). Subject Ut-clauses of this kind also occur in accordance with the principle explained R. 26, Obs. 6, representing the facts stated as unreal, unreasonable, or impossible, as: *Quam habet aequitatem ut* agrum multis annis ante possessum qui nullum habuit, habeat, qui autem habeat, amittat? Cic. Off. 2, 22 (= The principle that proletarians should gain the lands of others, and that property-holders should lose theirs, has no fairness, is unreasonable; see the remarks at the end of R. 27, Obs. 5).

Obs. 7. The use of subject-infinitives, except with the regular impersonals (R. 27, 28; § 491, R. 89) is extremely rare; see p. 108, R. 94, and the examples quoted there. To these the following may be added: *Bene dicere non habet deinde aliquam regionem*. Cic. Or. 2, 2, 3.—Tempus colloquio non *dare*, magnam pacis desperationem *afferēbat*. Cæs. B. C. 1, 11.—*Vidēri* prælium defugisse, magnum detrimentum *afferēbat*. Ib. 1, 82.

Obs. 8. Still more rarely are subject-infinitive clauses attached to ordinary verbal predicates, as: *Maneat ergo, quod turpe sit, id nunquam utile esse* (let the principle remain that etc.). Cic. Off. 3, 12, 49.—Inde rem *ad triarios redisse* proverbio *increbuit*; Hence the 'saying' that the fight has come up to the Triarii, has become widely known in the form of a proverb (turned into a proverb). Liv. 8, 8.

### C. ATTRIBUTIVE THAT-CLAUSES.

Rem. 29. The form of That-clauses dependent on SUBSTANTIVES (ATTRIBUTIVE THAT-CLAUSES) is determined either (a) by the nature of the governing substantive (Obs. 4); or (b) by the nature of the verb, which forms either an objective, or a predicative phrase with the governing substantive (Obs. 5); or (c) by the nature of the whole governing PHRASE thus formed (Obs. 6); or (d) by the nature of the CLAUSE ITSELF, which is determined by some leading idea understood (Obs. 7).

Cic. Fin. 2. 2. 8. So if '*causa est*' is used predicatively in this sense: *Magna causa abolitionis Fontēji est, ne qua insignis huic imperio ignominia suscipiatur*: The cause of Fontējus's acquittal is the purpose (the intention) of preventing a great disgrace from falling on this republic. Cic. Fontej. 12. *Causa* is also construed with *cur, quare*; and *nulla causa* often takes a Quin-clause (see p. 527, a; p. 547, B; p. 544, 3).

Obs. 8. The That-clauses attached to '*tantum abest*', '*nihil abest*', '*paulum abest*' etc. may be conceived as attributive That-clauses, dependent on '*ab eo*', i. e. '*ab eā re*', or as adverbial That-clauses, according to R. 26, Obs. 4 (*ab eo ut* etc.). The predicate '*abest*' is thus used with absolute quantitatives as subjects, to represent the facts stated in the clause as lacking reality, but with such qualifications as are implied in the subject. Such constructions must be recast in English, generally by making the logical subject of the clause, the grammatical subject of the whole period with the predicate '*is* (are) etc.) *far from*' followed by a participial noun, corresponding to the predicate of the clause. Such That-clauses with '*abest*' occur in the following conventional connections: (a) *Tantum abest* with an *Ut*-clause = '*something is so far from being* etc.' This construction generally occurs in combination with another *Ut*-clause (or its equivalent). See R. 32, Obs. 4, No. 3. But sometimes it is used without a second *Ut*-clause, as: *Tantum abfuit ut ex incommodo aliēno occasio peteretur*; *So far were they from taking advantage of the distress of others*. Liv. 4. 58.—*Parcebant adhuc etiam multis animalibus: tantum aberat ut homo hominem occideret*; *So far were men from killing each other*. Sen. Ep. 90. This construction is thus conceived: '*Tantum spatium aberat ab eā re ut* etc.'; *Such a distance was there from the point that* etc. The That-clause takes the form of an *Ut*-clause on account of the negative idea contained in the clause (R. 26, Obs. 6).—(b) In classical Latin this construction sometimes occurs with personal subjects, as: *Nae ille longe aberit ut argumentis credat philosophorum*; *He will be far from believing* etc. (i. e. '*longe aberit ab eo ut*'). Cic. Ac. Pr. 2. 36. 117.—(c) Very frequently *abest* is thus used with negative subjects, as *non multum abest, nihil abest, non longius abest, paulum abest*. The That-clauses dependent on these expressions are always Quin-clauses according to the principle explained R. 25, Obs. 5, as: *Prorsus nihil abest quin sim miserimus*; *I am next to being most wretched*. Cic. Att. 11. 15.—*Docet, non longius abesse quin proximā nocte Sabīnus clam ex castris exercitum educat*; *It would happen no later than the next night that Sabīnus would secretly evacuate the camp*. Cæs. B. G. 3. 18.—*Paulum abfuit quin Varum interficerent, neque multum abfuit quin etiam castris expellerentur*; *Varus was not far from being killed, nor were the troops far from being dislodged from the camp*. Cæs. B. C. 2. 35.—Sometimes the complete construction with *ab eo* occurs, as: *Neque multum abesse ab eo quin paucis diebus deduci possent*; *And that in a few days the ships would be ready to be launched*. Cæs. B. G. 5. 2\*.

#### D. PREDICATE THAT-CLAUSES.

Rem. 30. The nature of Predicate-clauses in general is explained p. 486-488. PREDICATE THAT CLAUSES always have the form of an *Ut*-clause, or of an asyndetic subjunctive clause, and are attached either to the impersonal predicate *est* (see p. 437, a and b), or to a verb of doing (*facere, fieri, agere, non committere, cavere*, and the impersonals denoting 'it happens'). The latter are used 1) as circumlocutions of affirmative or negative imperative sentences, mostly in the form of asyndetic subjunctive clauses, as: *Fac bellus revertāre*, *Return in fair health*. Cic. Fam. 16. 18. 1.—*Quem virum facite ut agnoscat*; *Acknowledge the merits of this man*. Ib. Rep. 2. 29. 52.—*Cave existimes me abieciſſe curam reipublicae*; *Do not think I have given up the care for the republic*. Ib. Fam. 9. 24. 4.—2) To make more emphatical either the predicate of a sentence, or some of its members, especially adverbial expressions (as *prope, invitus, libenter, praeter opinionem accidit*, etc.). See p. 488, Obs. 10. If such a circumlocution is applied to negative sentences, the verb *committere*, with a negative, is generally used as the abstract predicate, as: *Ego non committam ut, si delingerim, causam aliquam tibi recusandi dem*; *I will not give you a pretext for backing out by my retracting*. Cic. Or. 2. 57. 233. To negative imperative sentences, the double circumlocution with '*noli committere*' is sometimes applied, as: *Noli committere ut excusatione potius expleas officium scribendi quam assiduitate epistolārum*; *Do not by any means replace your duty of writing, by excuses rather than etc.* Cic. Fam. 16. 25.

\* Sometimes Quin-clauses are attached to sentences of different forms if a construction of the above-mentioned kind (*nihil abest, paulum abest* etc.) is virtually contained in them, as: *Perpauci ex hostium numero desiderabantur quin cuncti caperentur*; *The number of the captured enemy fell very little short of their whole strength* (= *Paulum abfuit quin cuncti caperentur*). Cæs. B. G. 7. 11.—From this construction of the verb *desiderare* must be distinguished its construction with *quominus*, implying the idea of *hindering* (see Obs. 7, B, 2).

#### E. INNER FORM OF THAT-CLAUSES.

Rem. 31. The inner construction of finite That-clauses refers to the use of the proper moods and tenses, which have been considered p. 414 foll., p. 388, and p. 588.—For infinitive clauses must be considered 1) the form of the subject-accusative (Obs. 1-3); 2) the tense of the predicate-infinitive (Obs. 4-9).

Obs. 1. EXPLANATION OF THE SUBJECT-ACCUSATIVE.—In explaining the question, why the subject of an infinitive clause must be in the accusative case, the views of the grammarians are widely apart. However, almost all agree that, whenever infinitive clauses are used as objects of a verbum sentiendi or declarandi, the subject-accusative must have been originally conceived as a transitive object of the governing verb, the infinitive being conceived as an object-infinitive. That this view is very probably the correct one, is proved by the fact that it is still a matter of doubt whether certain constructions must be considered as infinitive clauses, or as object-accusatives with object-infinitives (as the infinitives dependent on *putare, videre, scire, pati, arguere, insimulare*). The step from '*puta te hoc facere*' to '*puto te hoc fecisse*', and from there to '*dico te hoc fecisse*' is certainly a very short one.—But the difficulty is, how to explain this construction if the infinitive clause is a subject clause (*te hoc fecisse apparet*). Many theories have been proposed by the different grammarians to explain this difficulty, not one of which is universally accepted as a true solution. It should be expected that, whenever the verbum sentiendi or declarandi is a passive (or an impersonal, corresponding to it in the construction of the infinitive clause must be that of a nominative with the infinitive), which, indeed, is very frequently found. But we should not forget that, by the constant connection of such accusatives with such infinitives, the conception of a subject-accusative and a predicate-infinitive must have been formed in the minds of the people. When this conception was once established, the conception that this accusative with its infinitive formed a real sentence, i. e. a unit of thought, was established at the same time. Only one more step was now necessary to arrive at the use of infinitive clauses as subject-clauses, namely to apply to infinitive clauses the rule of changing transitive objects into passive subjects. This change could not have any influence on the form of the clause, since the clause was felt to be an indivisible unit. A change of the subject-accusative into a subject-nominative would merely alter the relation of members of the clause to each other, but not the relation of the whole clause, as a unit, to the principal predicate. This is best seen when we compare the construction of the nominative with the infinitive to that of an impersonal subject-infinitive clause. In the former, the infinitive is still an object of the principal predicate, while in the latter the infinitive is no longer in the frame work of the principal sentence, and hence stands in no relation to the principal predicate. It follows that, after the idea of an infinitive-clause with its subject-accusative had once been established as a linguistic fact, this clause, like every other completing clause, could be used not only in the relation of an object, but also in that of a subject without any change in its inner form, just as mere infinitives, or neuter substantives, keep the same grammatical form, whether they are used as objects or as subjects.

Obs. 2. OMISSION OF THE SUBJECT-ACCUSATIVE. There can be no subject-accusative if the predicate of the clause is impersonal without having any subject. The predicate, in this instance, is an impersonal predicate-infinitive, as: *Postquam non resisti videret* (when he saw that no resistance was made). Liv. 10. 29.—*Ad consulem referunt, excessum (i. e. esse) urbe*. Ib. 10. 34.—*Sineesse satis constabat lacte pluisse*. Ib. 27. 11.—If the predicate of the clause is an impersonal with a subject-infinitive, or a subject-clause, these forms of the subject are conceived as subject-accusatives, as: *Nolēbas sciri, debere tibi Roscium* (= *nolēbas, debitionem Roscii sciri*). Cic. R. C. 3.—*Non oportere sese a P. R. impedi*. Cæs. B. G. 1. 36. Here *sese* is a subject-accusative to *impedi*, and the whole clause '*sese...impedi*' is in the relation of a subject-accusative to the impersonal predicate-infinitive *oportere*. If *debere* were substituted for *oportere*, the pronoun *sese* would belong as subject-accusative to the personal predicate-infinitive *debere*, and *impedi* would be a passive object-infinitive to *debere*.

If the predicate-infinitive is personal, the subject-accusative is sometimes omitted if it is a personal pronoun, referring to the speaker, or to a noun mentioned before, as: *Legatus respondit, magis non posse (instead of se negare)*. Liv. 40. 36.—*Confidēre, huc eā spe venisse (instead of te...venisse)*. Cic. R. A. 22. 61.—*Fac audisse statim (instead of eum audisse)*. Ib. R. A. 21. 17.—*Arriovistus dixit, Caesar, quum vellet, congregetur: intellectionem quid invicti Germani possent (instead of eum intellectionem)*. Cæs. B. G. 1. 36. Madvig asserts that such omissions 'almost' never occur with passive predicate-infinitives in the perfect. On the contrary, they are frequent, as: *Audivit Dionī per magnam venisse hereditatem: statuas jussum esse in foro ponere* (i. e. *eum jussum esse*).

Cic. Verr. 2, 2, 8.—Dixērunt, venisse invitos, *ejectos domo* (i. e. *se venisse, se ejectos esse*). Cæs. B. G. 4, 7.—Sed eo *deceptum* quod etc. (i. e. *sed se eo deceptum esse quod etc.*). Ib. B. G. 1, 14.—This omission is very usual 1) if the immediate antecedent of the pronominal subject-accusative is a pronoun of the same form, as: *Pudet me dicere, non intelligere* (i. e. *pudet me dicere, me non intelligere*). Cic. N. D. 1, 20. *Dicendum te esse, audio* (questionem illius fuisse (i. e. *te questionem fuisse*)). Ib. Div. Cæs. 18.—2) If the predicate-infinitive is connected with an accessory predicate, where the pronominal subject-accusative is almost always merged in the accusative of the accessory predicate: *Iste paratum ad causam dicendam venire* hora non jubet (instead of *eum paratum... venire*). Cic. Verr. 2, 2, 37.—*Apparuit, suam vicem indignantem abisse* (i. e. *eum indignantem abisse*). Liv. 2, 31.

Obs. 3. Infinitive clauses are frequently placed in a passive construction, when the English idiom requires or prefers an active construction : 1) when the predicate of the clause denotes 'necessity', and a gerundial construction is to be used in Latin, as: *Cæsar ea quæ cognoverat dissimulanda sibi exstima vit* ; *Cæsar* (thought it *necessary* to conceal etc. *Cæs. B. G. 4. 5.*)—2) Subject-infinitives with transitive objects are very frequently converted into infinitive clauses with passive predicates, as: *Commodissimum esse statu it, omnis navis subduc i* (to draw all vessels ashore). *Cæs. B. G. 5. 11.*—*Mos est lau dâre eos* etc. : It is the custom to praise those etc. *Cic. Orat. 43.*—*Faciens est vinciri civem Românum* (to fetter a Roman citizen). *Ib. Verr. 2. 5. 66.*—*Erocâri Cyprios non licet* (to call out the Cyprians). *Ib. Att. 5. 21. 6.*—*Dictatorem creâri placuit* : It was resolved to elect a dictator. *Liv. 23. 22.*—3) If the predicate of an active infinitive clause has a transitive object which might be mistaken for the subject-accusative, the Latin language, since the position of the words forms no sufficient criterion, either gives a passive construction to the clause, or, if the predicate is a periphrastic future, makes use of the circumlocution by *fore ut*, as : *Si te a me amâri scis* (not ' *si me te amâre scis* '). *Cic. Att. 1. 20. 7.*—*Âis fore ut te Cæsar restituat* (more accurate than ' *ais Cæsarem te restituâturum* '). *Ib. Fam. 7. 27. 1.* This rule, however, cannot be always observed, and sometimes a subject-accusative occurs in connection with an object-accusative, when only the connection decides which of the two accusatives is meant to be the subject, as : *Quum consul minâs esset, eum sua manu se interfecitûrum*. *Liv. 23. 22.* Here *eum* is the object, and *se* the subject, which is made clear by the connection.—*Simulans ad regem eum se mittere velle* (where *eum* is the object, and *se* the subject). *Nep. Con. 5.* In both passages a change into a passive construction would neither have been grammatically possible, nor necessary. (The passage *Cic. Att. 3. 12*, is misquoted by Meiring § 755; as it stands in the text, it is no exception to the rule.)

Obs. 4. Predicate-infinitives may be in two tenses, the present or perfect. Both of these tenses may be 1) ordinary actives or passive (*amāre, amāri, amariſſe, amātum eſſe*); 2) periphrastic futures (*amātūrum eſſe, amaturū fuisse*); 3) periphrastic gerundials (*amandū eſſe, amandū fuisse*). The two periphrastic gerundials are used only if the predicate denotes necessity, or in passive-infinitive clauses, dependent on verbs of resolving, in place of Ut-clauses (p. 593, Obs. 9; p. 595, Obs. 5). The tenses of the ordinary active and passive infinitives are not distinguished according to their relation to the *speaker's* time, but according to their relation to the *principal predicate* (see P. I, § 390). If the predicate-infinitive denotes an action *past* at or *before* the time of the principal predicate, it is placed in the *perfect*. But the predicate-infinitive is placed in the *present* if its time is the *same* as that of the principal predicate. If it refers to a *later* time than that of the principal predicate, it is placed either in the ordinary present tense, or in the present of the periphrastic future, according to the distinctions in Obs. 6. To these rules there are the following exceptions: (a) the use of a *perfect passive-infinitive* instead of a present-infinitive in clauses dependent on *velle* (p. 592, No. 3, a); (b) the use of a *present-infinitive* instead of a perfect in clauses dependent on *meminiſſe* (Obs. 5); (c) the use of the infinitive of the periphrastic future in conditional and hypothetical infinitive clauses (Obs. 7-9).

Obs. 5. That-clauses dependent on the *first person* of the verb *meminisse*, generally have predicate-infinitives in the *present* (instead of in the perfect) if the speaker represents the act as witnessed by himself. The language conceives such acts, although actually past at the time of the principal predicate, as still existing 'in the memory' of the speaker, and hence as constructively *present* at the time of the principal predicate; as: *Memini* Catōnem, anno ante quān mortuus est, mecum *disserere* (not *disserruisse*): I remember that Cito *spoke* etc. Cic. Am. 3.—*Memini*, te mihi Pharracē cenān *narrare*. Ib. Fam. 9, 16, 8.—*Memini* eisdem fere verbis ad me te *scribere* (i. e. me legere scriptum tuum). Ib. Dej. 14, 38.—Comp. Ib. Fam. 3, 8, 3; 15, 4, 11; Verr. 2, 4, 14; Sen. 9. Ter. Andr. 2, 5, 17.—But *meminisse* takes a *perfect* infinitive (in regard to past-acts): 1) if the speaker was not a witness of the act mentioned; 2) if *meminisse* is in the *second* or *third person*; as: *Memineram*, C. Mariū, quū vim armōrum profugisset, scūle cor-

[illegible][illegible]

Obs. 7. There are several peculiarities in the form of conditional periods if they assume the form of infinitive clauses. These refer 1) to the conversion of ordinary conditional periods of the following forms: (a) *Gajus, si peccat (peccat), poenas dabit*; (b) *Gajus, si peccabit, poenas dabit*; (c) *Gajus, si peccaret, poenas daret*; (d) *Gajus, si peccasset, poenas dedisset*; 2) to the conversion of hypothetical periods (i. e. conditional periods against reality): (a) *Gajus, si peccaret (peccasset), poenas dedit*; (b) *Gajus, si peccaret (peccasset), poenas dedit*.

4. The predicate of the THESIS (i. e. the principal conditional sentence) in ordinary (i. e. non-hypothetical) conditional periods is converted into the *present-infinitive* of the (i. e. non-hypothetical) conditional periods, into the *perfect-infinitive* periphrastic future (p. 134, § 508); and in hypothetical periods, into the *perfect-infinitive* periphrastic future (p. 135, R. 151). The reason of this conversion is the *time* of the periphrastic future (p. 135, R. 151). The reason of this conversion is the *general principle*, that every predicate-infinitive corresponds to the modal signification of the *indicative* of its own tense. Since, according to p. 131, R. 143, the indicative perfect of the periphrastic future is used as an equivalent of the hypothetical pluperfect

\* The periphrastic future is thus used in the infinitive, even if the clause independently expressed, would have a *potential future* (p. 350) as predicate, especially if a conditional clause is attached to the infinitive clause. (See the examples in Obs. 7). Only if the potential future has an *imperative* force (p. 350, Obs. 1), a conversion into a periphrastic tense is not admissible.

using direct discourse, or by substituting a finite clause for the infinitive clause, for instance such as are introduced by 'non dubito quin', or 'haud scio an', as: Quorum licentiae nisi Carneades restitisset, haud scio an soli jam philosophi iudicarentur (just. of 'affirmaverim futurum fuisse ut iudicarentur nisi etc.'). Cic. Div. 2. 72.

Obs. 9. According to the principle that predicate-infinitives have the same modal force as the indicative of the same tense (Obs. 7. A), the infinitives of the perfects *potui*, (in the sense of *potuissem*), *debui*, *oportuit*, *aequum fuit* (= *aequum fuisset*), it would have been proper *optimum fuit*, *difficile fuit*, *necesse fuit*, *opus fuit*, etc., and of the perfect gerundives (see p. 379, d; p. 389, e; p. 145, § 311; p. 146, Ex. 14, 15, 16, 19, 20) are used with the *diabls* (see p. 379, d; p. 389, e; p. 145, § 311; p. 146, Ex. 14, 15, 16, 19, 20) are used with the same hypothetical force as the perfect-infinitives of the periphrastic future (Obs. 7. B), since these expressions have the same meaning in the indicative; as: Perspicuum est, eas utilitates nos nullo modo sine hominum manu capere *potuisse* (that we could not have gained these advantages etc.). Cic. Off. 2. 4, 14.—Non dicam, in hominem honestissimum tam graviter animadverti non *oportuisse* (that so heavy a punishment ought not to have been inflicted etc.). Ib. Verr. 2. 5, 8.—Menippus *optimum fuisse* ait, integris rebus *Philippi potuisse intervenire* Antiochum (that it would have been best if Antiochus could have intervened etc.). Liv. 35, 32.—Qui si alicujus injurie sibi con-clas *fuisset*, non *fuisse difficile cavere* (that it would not have been difficult to guard if he had been etc.). Cic. B. G. 1, 14.—Marcione Crasso putas *utile fuisse* scire, sibi trans Euphratim cum ignominia esse pereundum? Cic. Div. 2. 9, 22.—Fulvius dixit, si simultas Aemilii secum ignota hominibus *esset*, tamen non *fuisse ferendum*, absentem consulem d-orum immortalium honori obstare (that it would have been intolerable that a consul in his absence should hinder etc.). Liv. 39, 4.—Dicemus, si idem facere *voluisset*, ne hoc quidem ipso *opus fuisse* iudicio (that not even this trial would have been necessary if etc.). Cic. Inv. 2. 27, 81.—Sometimes *fuisse* has the same hypothetical sense in connection with ordinary descriptive adjectives, as: Sibi vitam filiae suae *cariorum fuisse*, si libere ac pudice vivere licitum *fuisset* (that the life of his daughter would have been dearer to him etc.). Liv. 3, 50.—*Potuisse*, *debere*, and *oportere*, which even in the present indicative have a *potential* sense (p. 349, d) are used in the present *infinitive* in a hypothetical sense, if a hypothetical Siclause is dependent on them, and the governing verb is a predicate: *Intelligam, si te habere, posse* me Brancium referre: I saw that I could be able to go to Brundisium if I had you. Cic. Att. 3. 2.

say 'Ventum si possem', or 'venturus sum si possem' (which would be faulty), we certainly cannot say 'venturum esse si possem', unless 'possem' is an ordinary tense of preterite consecution, which it certainly is not if it is used in the hypothetical sense.—3. To this must be added the serious objection that, if the hypothetical period is dependent on a tense requiring present consecution, we should either be under the necessity of changing the imperfect into a present (*poenas daturum esse si peccet*), which would efface every trace of the imperfect signification; or we would be compelled to use an imperfect subjunctive, of hypothetical signification; but this reading cannot be correct. Looking at the connection in the text, we find that the Eburones had come already some time before the speech of Titurius to invest his camp. Hence Titurius could not say 'they would not be coming if Caesar were present', but 'they would not have come to the camp', in the same way as he, in the previous clause, says 'The Carnates would not have resolved to kill Tasgetius'. Thus, to defend the reading 'venturos esse', we must assume that Caesar used an objectionable form in order to be enabled to express an idea which he did not mean to express. We do not hesitate to pronounce 'esse' an unquestionable gloss, since the 'fuisse' of the preceding clause would then also refer to *venturos*, the camp, since the 'fuisse' of the preceding clause would then also refer to *venturos*. The words 'si adesset' are left out by the better codices, and are an evident gloss. Leaving out since the preceding 'aliter' fully includes the meaning of 'si adesset'. Leaving out these words, it will appear probable that both glosses were added by the same hand.

Some grammarians have even fixed this erroneous theory by formulas of their own make. KÜHNER says: DIRECT DISCOURSE: Si hoc diceret, errares; OBLIQUE: 1) Censeo, si hoc diceret, te erraturum esse (which contains two mistakes); 2) Censebam, si hoc diceret, te erraturum esse (which contains one mistake, and does not correspond to 'si hoc diceret, errares'), but to 'si hoc dices, errabis'.—The author of the Publ. Sch. Gr. (p. 399) improves on Kühner by adding another worse heresy. He gives the following formulas: DIRECT: Si peccares, doleres; OBLIQUE: Ajo te, si peccares, doliturum esse or fore (?); 2) DIRECT: Si peccavisses, doleres; OBLIQUE: Ajo te, si peccavisses, doliturum fore (?). A periphrastic form in -iturum fore does not exist. The Publ. Sch. Gr. copied it from 'Arnold's Prose-composition.'

## II. MODAL THAT-CLAUSES.

§ 618. Modal That-clauses are those that describe the modal relations of the principal predicate, or the quality of a person or thing. They are either 1) PURE MODAL CLAUSES, referring to manner, intensity, coincident action, or subsequent action (consecutive clauses); see R. 32; or 2) FINAL CLAUSES, i. e. modal clauses describing the aim or purpose of the subject of the principal action (R. 33). Both classes of clauses are in the grammatical relation either of adverbial or of attributive clauses (p. 488, 490).

Obs. 1. All adverbial That-clauses may be grammatically considered as attributive. That-clauses attached to a substantive of general import understood, in the same way as every modal *ut*-verb may be conceived as an *adjective* attached to a noun of general import understood (*sapienter* = *sapienti modo*). Thus modal *ut*-clauses may be attached to the attributive phrases *hoc modo*, *et ratione*, *hoc consilio* etc., which have the force of the usual adverbial syndetic antecedents *ita* etc., as: Voluptatis parvis *hoc modo* deservit ut malevolentia sit voluptas ex malo alterius. Cic. Tusc. 4. 9, 20. Often the general nouns *modo* etc. are replaced by more particular nouns, including the idea of moral quality, but designating at the same time certain other properties of the clause, as: Ita *que hoc spe* decedebam ut mihi populum Romanum ultro omnia delaturum putarem (= *ita*, or *hoc modo* decedebam, ut mihi... *sperarem*). Cic. Planc. 36, 65. If a modal clause is thus attached to a substantive, it must take its syndetic antecedents in an *adjective* form (*hoc modo*; *tali spe*; *eo consilio*).

Obs. 2. In a similar way those modal (more accurately 'qualitative') That-clauses which describe a quality or intensity of a quality of a person or thing, must be considered as attributive clauses attached to the idea 'quality' or 'intensity'. Such clauses must, likewise, take *adjectives* as syndetic antecedents (*talis*, *ejusmodi*, *tantus*, *is*, *hic* etc.), which are generally used *predicatively* (*talis est*) having the force of 'ejus modi', but also *attributively*; as: Fortuna (ejus) *talibus* fuit ut nihil posset accedere. Cic. Am. 3.—Erant *ejusmodi* sitas oppidorum ut neque pedibus aditum haberent, neque navibus. Cic. B. G. 3, 12.—Ariovistus *tantam* sibi arrogantiam sumpserat ut ferendus non videretur. Ib. 1, 33. See the Ex. p. 437. Frequently such constructions may be replaced by ordinary modal clauses with *adverbial* antecedents, as: Ut *tales* exercitationibus ut ad cenam esuriens veniret (= *ita se exercebat*). Cic. Fin. 2, 20.—Pericla *divites* hos solent exitus habere ut damnati in integrum restituantur (= *ita interire solent*). Ib. Verr. 2, 5, 6.—Multitudinem *eo* metu (= *ita*) compresserunt ut silentes integram plebem in contionem sequerentur. Liv. 24, 24.

Rem. 32. In the pure modal That-clauses (§ 618, 1) the following points must be distinguished: 1) The form of the syndetic antecedents. For these see p. 435, Obs. 2; p. 493, 494; and Obs. 1 to this remark.—2) The mood and tense of the predicate. For these see p. 434 foll.—3) The form of the introducing conjunction, which, affirmatively, is always *ut*, and negatively *ut non* (see Obs. 2, 3).—4) The different idiomatic usages connected with these clauses (see Obs. 4).

Obs. 1. In pure modal *ut*-clauses (i. e. those of manner, intensity, coincident action, and the consecutive clauses), the syndetic antecedents cannot, generally, be omitted. Thus the qualitative clauses (with *talibus*, *is* etc.), and clauses of manner regularly retain their syndetic antecedents, as: Plancius *ita* vixit ut offenderet sciens neminem (not *Plancius vixit ut offenderet*). Cic. Planc. 16, 41. But if consecutive clauses describe the consequences of the principal action without describing the consequences of the manner of its performance, the syndetic antecedents (*ita* or *sic*) are either altogether omitted, or connected with the clause, so as to introduce it (*ita ut*), as: In virtute multi sunt *ut* in maxima gloria excellat qui virtute plurimum praestet. Cic. Planc. 25, 60. If in this sentence the syndetic antecedent *ita* were combined with the principal sentence (*ita ut in maxima gloria excellat*) the *ut*-clause would become a clause of intensity or manner, while it is simply consecutive, stating the consequences of the action itself.—Accessit quod Domitius Heracliam iter fecerat, ut ipsa fortuna illum obicere Pompejo videretur. Cic. B. C. 3, 79. Here the clause is represented as the consequence of the performance of the principal action, and not as a consequence of the manner of its per-

formance, which would be expressed by *ita ster fecerat ut* etc.—Neque multo post de proelio facto in Thessaliā *cognitum est, ut* ipsis Pompejanis fides fieret (not *ita cognitum est ut*). Ib. 3, 101. In English, such *Ut*-clauses must always be introduced by *so that*. But: *Ita* tum ab his patrōnis causa illa dicta est *ut* eloquentium juris peritissimus Crassus, juris peritorum eloquentissimus Scaevola putaretur. Cic. Brut. 39, 145. Here the clause is represented as a consequence of the manner of performing the principal action, and hence *ita* cannot be omitted.—Pompējus sic pro castris exercitum statuerat *ut* tertia acies vallum contingeret. Cæs. B. C. 3, 56. Here the *Ut*-clause describes the manner of the *statuere*; without *sic* it would be represented as a consequence of the *statuere* itself, without referring to the manner in which it was performed.

Obs. 2. If the pure modal *That*-clauses are negative, the clause is not introduced by *ne*, but by *ut* with an ordinary negation, which may be contained in adverbs, adjectives, or verbs (*ut non, ut numquam, ut nemo, ut nescirem*; not *ne, ne unquam, ne quisquam, ne scirem*), as: Ea vestra merita erga nos fuerunt *ut* nos cladum nostrarum non poeniteat (not *ne poeniteat*). Liv. 28, 39.—Adeo angusto mari confixit *ut* ejus multitudo navium explicari non potuerit (not *ne potuerit*). Nep. Them. 4.—M. Caelius talis tribunus plebis fuit *ut* nemo (not *ne quis*) a senatu steterit constantius. Cic. Brut. 79, 273.—Oratio ita libere fluēbat *ut* nusquam (not *ne usquam*) adheresceret. Ib. 79, 274.—Sometimes, however, negative modal clauses of this kind pregnantly imply the idea of an aim, duty, command, or prevention. In this instance they may take the form of a *Ne*-clause, as: *Ita* me gessi, *ne* tibi pudori, *ne* regno tuo, *ne* genti Macedonum essem; I have behaved (i. e. shaped my course) so as to reflect no disgrace on you etc. (= *me ita gessi ut operam darem ne* etc.) Liv. 40, 15.—Perfacile se Sicilia tuebatur, *ut* ne quod ex ipsa bellum posset existere; Sicily protected herself easily, so that etc. (i. e. and prevented thereby lest' etc.). Cic. Verr. 2, 5, 4.—Ita admissi sunt in urbem *ne* tamen eis senatus daretur (= *ea lege ne*, with the proviso that etc.) Liv. 22, 61.—Minucius sciebat ita a se rem augeri oportere *ut* ne quid de libertate perderet (the clause being represented as Minucius's duty). Cic. Verr. 2, 2, 30.—Danda opera est *ut* etiam singulis consulatur, sed ita *ut* ea res aut prosit aut certe *ne* obsit reipublice (the restriction '*ne obsit*' being represented as to be 'guarded against', = *ut caveatur ne res obsit*). Ib. Off. 2, 21.—But in all such instances, *ut* with an ordinary negative would likewise be admissible, as: Societatem ab Romanis ita (= *ea lege*) volebant peti *ut* nullum de ea re scitum populi fieret (or *ne ullum... fieret*). Liv. 45, 25\*.

Obs. 3. If the principal sentence of a negative clause of manner, subsequent, or coincident action, or intensity, is likewise negative, and the two negations have the force of making the whole statement virtually affirmative, the clause may be either introduced by *ut non*, or by *quin* (see p. 547, C, and p. 565, Ex. No. 27, 28). Such clauses are generally rendered by *without* with a participial; as: Non possunt unā in civitate multi rem ac fortunam amittere, *ut non* plures eorum in eandem trahant calamitatem (or *quin... trahant*). Cic. L. M. 7, 19.—Non ita fracti animi civitatis erant *ut non* sentirent etc. (or *quin sentirent*). Liv. 45, 25.—Nusquam oculi ejus flectentur, *ut non* quod indignentur inveniant (or *quin... inveniant*). Sen. Ira. 2, 7.—Numquam domum litteras mittam *quin* adjungam eas quas tibi reddi velim (or *ut non adjungam*). Cic. Fam. 3, 8, 10.—Ego numquam liberos meos aspicio *quin* (or *ut non*) hujus meritum in me recorder. Ib. Planc. 38, 69.—Hæc natura loci esse dicitur *ut* nullus unquam dies tam magnā tempestate fuerit *quin* (or *ut non*) aliquo tempore ejus diei solem homines viderint. Ib. Verr. 2, 5, 10.—Sometimes the writers of the silver age introduce clauses of this kind by *quominus* instead of by *quin*, as: Ubi nemo impudē stulte aliquid dicit, *quominus* judex reprobet. Tac. Dial. 34.

Obs. 4. Peculiar usages in pure modal *Ut*-clauses are:

1. The use of these clauses (without a syndetic antecedent) with the force of concessive clauses; as: Hæc res nihilo minus, *ut* ego absim, confici poterunt (although I am absent, notwithstanding my absence; literally: *so that I am absent*). Cic. Fam. 10, 2, 2.—Quotus enim quisque disertus est, *ut* eos numeres qui volunt esse ('even if you count', 'including those'; literally *so that you count*). Ib. Planc. 25, 62.—*Ut* quæras omnia, quomodo Græci 'ineptum' appellent, non reperies. Ib. Or. 2, 4.—Verum *ut* hoc non sit, tamen præclarum spectaculum mihi propono. Ib. Att. 2, 15.—*Ut* desint vires, tamen est laudanda voluntas. Ov. Pont. 3, 4, 79. Comp. Cic. Agr. 1, 8; Tusc. 1, 21; 1, 39; Phil. 12, 3; Liv. 36, 7.

2. Frequently modal *Ut*-clauses, with the syndetic antecedent *ita*, are used in an adversative or restrictive sense, corresponding to *but so that*. Such sentences occur in

\* Sometimes clauses with *quominus* occur which have the force of a negative consecutive clause, if the idea of 'hindering' is implied in them, as: Neque mihi quidquam oneris suscipi, *quominus* honeste hanc causam et libere possem defendere: I did not trammel myself so as to be debarred from honestly and freely defending this case. Cic. Clu. 51, 142.

the following forms: 1) either the clause corresponding to this English construction, is introduced by *ita tamen ut*, or *sed ita ut*; 2) or *ita* is incorporated in the principal sentence, the clause being added either with or without *tamen*; as: Totus hic locus est contemnendus, *ita tamen ut* mortuorum corpora nihil sentire sentiamus (but so that we know etc.). Cic. Tusc. 1, 45, 108.—*Ita* dissimiles erant inter sese, statuere *ut* tamen non posses utrius te malles esse similiorem (they were dissimilar, but so that you could not have decided etc.). Ib. Brut. 40, 148.—Pompējus omnia pollicetur et Cæsar, quibus ego *ita* credo *ut* nihil de meā comparatione diminuiam (whom I trust, but so that I do not diminish etc.). Ib. Qu. Fr. 1, 2, 5.—*Ita* quæstus te cupidum esse oportebat *ut* horum existimationem et legem Remmiam putares aliquid valere oportere; You might have been eager for lucre, but you ought to have paid some regard to the character of these men, and to the Remmian law. Ib. Rosc. Am. 19, 50.—Sometimes negative clauses of this kind are introduced by *ut ne*, to represent the restriction as a protest ('*ita ut ne*' being almost = *dimmodo ne*), as: Hoc est *ita* utile *ut* ne plane illudamur; This is useful, but so (with the understanding) that we must not be clearly trifled with. Cic. R. A. 10.

3. The frequent construction '*Tantum abest*' with two *Ut*-clauses, represents what is stated in the first *Ut*-clause as untrue in a degree that its very contrary, which is expressed in the second *Ut*-clause, is true. The first of the two *Ut*-clauses is an attributive *Fact*-clause, and belongs to the clauses mentioned R. 29, Obs. 8, being equivalent to '*tantum abest ab eo ut* etc.' The second *Ut*-clause is a clause of intensity with *tantum* as syndetic antecedent, *tantum ut* etc. meaning '*so far, that on the contrary*'. Sometimes (but very rarely) this construction is used in its complete form with '*abest ab eo ut*', as: *Tantum abest ab eo ut* malum mors sit, *ut* vereor ne homini nihil sit bonum aliud potius; (literally: There is so great a distance from the fact that death should be an evil, that on the contrary I think that there is no other good greater for man = *So far is death from being an evil, that on the contrary* etc.). Cic. Tusc. 1, 30, 76. Almost always these clauses are found without '*ab eo*'. They must be recast in the English version, as: *Tantum abest ut* scribi contra nos nollimus, *ut* id etiam maxime optemus; *So far am I from not wishing* criticisms to be written against me, *that I, on the contrary, greatly desire* them. Cic. Tusc. 2, 2.—*Tantum abest ut* hæc bestiarum causa parata sint, *ut* ipsas bestias hominum causa generatas videamus; *So far are these things from being provided* for the sake of beasts, *that we see* the very beasts created for man's sake. Ib. N. D. 2, 63, 158.—*Tantum abest ut* me hesternæ quietis poeniteat, *ut* servatum a me exercitum eo consilio credam. Liv. 44, 38.—*Tantum abest ut* (Pansa) periculosum reipublice M. Brutum putaret exercitum, *ut* in eo firmissimum reipublice presidium poneret. Cic. Phil. 10, 8, 17.—Often, instead of the second (modal) *Ut*-clause, an independent sentence is used: *Tantum abest ut* binos (libros) scriberent: vix singulos confecerunt; *Far from writing* two books apiece, they hardly finished one. Cic. Att. 13, 21, 5.—Sometimes, in place of the circumlocution with '*tantum abest ut*\*, a single negative sentence with *adeo non*, or *usque eo non* is used, to which the second (modal) *Ut*-clause is directly added without another intervening *Ut*-clause. This construction is rare in classical prose, but very frequent in the style of the silver age, as: *Usque eo* quid arguas non habes *ut* contra rerum naturam dicendum putes; *Far from* having a ground for accusation, you feel the necessity of proposing what is in conflict with the laws of nature. Cic. R. A. 15, 45.—Gloriam factorum *adeo non* abstulisti, *ut* aueris. Vell. 2, 66.—Hæc res *adeo non* sunt gaudia, *ut* sæpe initia future tristitiæ sint. Sen. Ep. 59.

Rem. 33. FINAL THAT-CLAUSES (see p. 404. R. 88, 1) are introduced by *ut* (sometimes *quo*), and negatively by *ne* (rarely by *quominus*), being rendered by English object infinitives (with or without '*in order*') if the subject of the action is at the same time a member of the principal predicate. If this is not the case, the English language uses clauses introduced by '*in order that*', '*for the purpose that*', or '*so that*', which must be distinguished from the '*so that*' used in the other modal clauses.—For mood and tense in final clauses see p. 440, Obs. 12. For the form of the syndetic antecedents see p. 435, Obs. 2. For the use of *quo* in final clauses see p. 558, Obs. 8.

Obs. 1. Final clauses must be distinguished from clauses denoting those aims of the subject which are contained and intimated in the governing verb (R. 25, Obs. 2). Clauses of this kind do not belong to the modal *Ut*-clauses, but complete the idea of the governing verb, while final modal clauses may be dependent on verbs containing complete ideas.

\* Logically, the attributive modal clause dependent on '*tantum abest*' is a predicate clause.

The same *ut*-clause, added to the same verb, gives a different sense according as it is intended to be a final clause or a completing clause. Thus *periclitari* may be used as a verb of *striving* (*R. 25, Obs. 2*), or as a verb with a complete idea. '*I agitated* *ut* *serretur*' may mean '*I fought* (had to make use of arms) *in order that* *you*—*life might be saved*' (final clause), or it may mean '*I struggled* *for saving your life*', *strive* to save your life (completing *ut*-clause). See the last three Ex. p. 600. It is *practically* important to distinguish both kinds of clauses, since completing clauses dependent on verbs of purpose may under certain circumstances take an object infinitive, or an infinitive clause, while *modal* clauses of purpose *must* have the form of *ut*-clauses (or their equivalents with *ne* and *quo*), or of *relative* clauses. In English, object-infinitives are generally employed if the subject of the clause is at the same time a member of the principal sentence, as: *Cæsar accelerat ut proelio intersit*, *Cæs. B. G. 7, 87*.—*Legum* iccirco omnes servi sumus *ut liberi esse possimus*, *Cic. Clu. 53, 146*.—*Intelligo*, tempus hoc vobis divinitus datum esse *ut odio, infamia, turpitudine totum ordinem liberetis*. *Ib. Verr. 1, 15*.—*Cæsar* singulis legionibus singulos legatos præfecit *ut* eos testes sue quisque virtutis haberet. *Cæs. B. G. 1, 52*.

**Obs. 2.** If the final clause is *negative*, it almost always takes *ne*, or *ut ne* (not *ut non*), being in English introduced by '*not to*', or '*lest*', as: *Cæsar, ne graviōri bello occurreret*, *maturius* quam consuevit ad exercitum proficiscitur. *Cæs. B. G. 4, 6*. Sometimes, however, if the negative refers to a particular member of the clause, which is opposed to an affirmative member in a coordinate clause, the clause may be introduced by *ut*, the negative taking the ordinary form (*non*), as: *Confer te ad Mantinum, ut a me iam opus ad alios, sed invitatus ad nos videaris*. *Cic. Cat. 1, 9*. Here '*ne a me opus*' would be inaccurate, since '*ut*' belongs also to the following affirmative clause, introduced by *sed*. But it would be perfectly proper (though less concise) to express this sentence thus: '*ne a me opus ad alios, sed ut invitatus etc.*' If the predicate of a negative final clause is conceived as '*to be hindered*', the clause may be introduced by *quominus* instead of by *ne*, as: *Hanc potestatem minuire, quominus de moribus nostris quanto quoque anno judicaretur, nemo conatus est*; Nobody has attempted to diminish this power, *in order to prevent* our morals from being examined every five years. *Cic. Pis. 5, 11*. Such clauses are very nearly related to those final *Quo*-clauses in which *minus* is a real comparative, as: *Non aliēnum esse arbitror, quo minus sæpe aut interpellaretur reprehenderet, explicare breviter etc.* *Cic. Prov. Cons. 17*. Here '*quo minus sæpe interpellaretur*' means '*in order to be less frequently interrupted*'; but *quo minus* may also be taken in the sense of *ne*; '*lest I may be frequently interrupted*'. This identity of meaning in final clauses is unquestionably the origin of the use of a *quominus* as a negative conjunction.

**Obs. 3.** Final *ut*-clauses are idiomatically used as brief parenthetical clauses, referring to the *predication* (not to the *predicate*) in the principal sentence, and explaining in a general way the subject of the discourse, or the views and purpose of the author in treating it. Negatively (by *ne*, *ut ne*, but also by *ut non*), they state what the author is *not* going to mention. In English such parenthetical clauses take the form of an object-infinitive (*ut ita dicam*, so to say; *ut præmittam alia*, to omit other points; *ut nihil dicam de*, not to mention etc.); as: *Ut in prælo conferam, testamento facto mulier moritur*; *To be brief*; having made her testament, the woman died. *Cic. Cæc. 6, 17*.—*Ecquid tibi videtur, ut ad fabulas veniāmus* (to come to the drama, to take examples from dramatic poetry), senex ille *Cæciliānus* minoris facere filium rusticum? *Ib. R. A. 16, 46*.—*Reliquum iudicium de iudiciis, et, vere ut dicam* (to tell the truth) de te futurum est. *Ib. Verr. 2, 5, 69*.—*Murēna* si nemini, *ut levissime dicam* (to say the least) odio fuit. *Ib. Mur. 40, 87*.—*Ut nihil* de illo tempore, nihil de calamitate reipublicæ querar, hoc tibi respondeo (not to complain of that time, and of that calamity of the republic). *Ib. Cæc. 23, 95*.—*Ut ne longius abeam*, declarat ista ascriptio, esse aliquid; *Not to follow this point further up*, that addition shows that there is something. *Ib.*—*Habētis eum, ut nihil dicam amplius* (to say nothing more), qui se homines cōgisse fatēatur. *Ib. 36*.—*Quod positum est in alterius voluntate, ne dicam* libidine (not to say, his fancy). *Ib. Fam. 9, 16, 3*.—Instead of '*ne multa dicam*', frequently '*ne multa*' is elliptically used, = '*in short*', '*in a word*'; *Ne multa*; invenitur ea serrula ad Stratōnem pervenisse. *Cic. Clu. 64*.

In place of '*ne dicam*' in this parenthetical sense, sometimes the compound particle *nedum* (not to mention, to say nothing of) is used; as: *Erat enim multo domicilium huius urbis aptius quam tota Peloponnēsus, nedum Patre*; The residence in this city would have been much more adapted than the whole Peloponnēsus, to say nothing of Patre. *Cic. Fam. 7, 28*.—Generally, however, *nedum* is used as an adverb in the meaning '*much less*' or '*much more*', mostly occurring in certain expressions with the force of a particle involving the idea of a conditional clause. See p. 525.

**Obs. 4.** Sometimes a final clause is connected with *satis* with the force of *ad* before a gerundial, as: *Satis esse magna incommoda accepta ut reliquos casus timerent*; That enough disasters had been met with to make them afraid of other accidents. *Cæs. B. C. 3, 10*.

## EXERCISES.

**I. THAT-CLAUSES DEPENDENT ON *verba sentiendi* (*R. 23*).—1. Themistocles was afraid lest<sup>1</sup> he might be attacked on two sides<sup>2</sup> if the barbarians with part of their ships should double<sup>3</sup> the island of Eubœa.—2. The Campanians, were afraid that Hannibal might not be able to come with his army in time to raise the siege of the city<sup>4</sup>.—3. Has any one ever doubted that you would not do<sup>5</sup> this?—4. I did not doubt but you would do what you [really] did.—5. Cæsar was greatly delighted that an occasion had presented itself to him for a good move<sup>6</sup>.—6. That, as you write<sup>7</sup>, Cæsar is consulting<sup>8</sup> you, gives me much pleasure<sup>9</sup>; but I rather wish he would consult for<sup>10</sup> you.—7. Men of inferior ability<sup>11</sup> should not feel sorry for being surpassed by their [contemporaries].—8. Cæsar said, he had been grieved that the gifts<sup>12</sup> of the Roman people should be extorted<sup>13</sup> from him.—9. We are angry<sup>14</sup> even with our dearest friends when<sup>15</sup> they perform<sup>16</sup> less than we expect.—10. I do not grudge<sup>17</sup> your<sup>18</sup> reaping<sup>19</sup> the fruits of your good actions<sup>20</sup>.—11. The public<sup>21</sup> was deeply chagrined<sup>22</sup> that these ornaments should have been carried<sup>23</sup> off by that robber<sup>24</sup>.—12. I do not wonder that my [friend] Furnius should be held in such esteem<sup>25</sup> by you.—13. Is anyone astonished<sup>26</sup> when<sup>27</sup> he feels cold<sup>28</sup> in winter?—14. Cæsar was greatly provoked<sup>29</sup> by Cicero's departing<sup>30</sup> to join the forces of Pompey.—15. Cicero wished to be relieved<sup>31</sup> from that embarrassment<sup>32</sup>.—16. These [men] rather wish to be deserted<sup>33</sup> by all, than to be defended by you.—17. I wish you would expressly tell me your orders<sup>34</sup>.—18. I wish you to write whatever comes into [your] mind.—19. I should wish the time had not come<sup>35</sup> when (*quo*) you are able to understand<sup>36</sup> how high<sup>37</sup> I held<sup>38</sup> Pompey, [and] how high [I am holding] Brutus.—20. Claudius wished<sup>39</sup> that the Roman people might have one [single] neck<sup>40</sup>, that he might unite<sup>41</sup> all his manifold<sup>42</sup> crimes<sup>43</sup> in<sup>44</sup> one [single] strike<sup>45</sup>.—21. Our forefathers willed that not even the Roman people should assemble<sup>46</sup>, unless some of<sup>47</sup> the magistrates had issued a call for a meeting<sup>48</sup>.—22. I expect to return in three days<sup>49</sup>.—23. We waited in vain for the ships of the enemy to come in sight<sup>50</sup>.—24. Epicūrus was of the opinion<sup>51</sup> that pleasure was the highest good.—25. The majority<sup>52</sup> held that the army should depart by night from the camp.—26. I propose<sup>53</sup> that ambassadors for<sup>54</sup> peace be directly sent to Rome.—27. I see you are ready for<sup>55</sup> departing.—28. See that nothing<sup>56</sup> is done against the laws.—29. You pretend to speak<sup>57</sup> on the subject<sup>58</sup> [in question], but you are speaking of yourself.**

**II. THAT-CLAUSES DEPENDENT ON *verba declarandi* (*R. 24*).—1. The dictator L. Papius sent word to his master of the horse not to engage in a battle<sup>59</sup> in his absence<sup>60</sup>.—2. Avianus prayed to the gods to punish<sup>61</sup> rather himself than his country if any wrong<sup>62</sup> had been done against religion.—3. I asked for the permission of sending<sup>63</sup> a colony to the public lands in Sicily<sup>64</sup>.—4. I insisted on<sup>65</sup> your son's speedy departure.—5. Valerius exhorted the soldiers to remember<sup>66</sup> the glory of their fathers.—6. At that time I advised you to be reconciled<sup>67</sup> with Cæsar.—7. The parties stipulated<sup>68</sup> that no harsh measures should be taken<sup>69</sup> against the Ætolians.—8. I resolved to keep<sup>70</sup> the soldiers in the camp (*Render by all admissible methods*).—9. He commanded (*Render both by imperare and jubere*) Valerius to send one legion to Crassus's<sup>71</sup> help.—10. He gave orders**

<sup>1</sup> See p. 479, Obs. 9.—<sup>2</sup> *Render*; Lest he might be pressed by a double (*anceps*) attack.—<sup>3</sup> *superare*. See p. 453, Obs. 2. a.—<sup>4</sup> *Render*; That H. could not lead (*adducere*) early (*matutine*) enough his army to freeing (*gerundial* after *ad*) the city from the siege.—<sup>5</sup> *committere*.—<sup>6</sup> *Render*; That an occasion had been offered to him of 'the thing to be carried well' (*rem bene gerere*).—<sup>7</sup> *Render*; That you write that Cæsar is etc.—<sup>8</sup> *consulere*.—<sup>9</sup> by *gaudere*.—<sup>10</sup> Dative of the interested person.—<sup>11</sup> *inferiores*.—<sup>12</sup> *beneficia*.—<sup>13</sup> *aliquid alicui extorquere*.—<sup>14</sup> *irasci alicui*.—<sup>15</sup> That-clause.—<sup>16</sup> *Render*; That they have given (*præstare*) to us smaller [things] than we have conceived [in] the mind.—<sup>17</sup> *molestere*.—<sup>18</sup> That-clause.—<sup>19</sup> *fructus ferre*.—<sup>20</sup> *good actions*, *virtus*.—<sup>21</sup> *homines*.—<sup>22</sup> *gravius* et *acerbe ferre*.—<sup>23</sup> *auferre*.—<sup>24</sup> *prædo*.—<sup>25</sup> *to hold somebody in such esteem*, *aliquem tantifacere*.—<sup>26</sup> *mirari*.—<sup>27</sup> That-clause.—<sup>28</sup> *to feel cold*, *algere*.—<sup>29</sup> *vehementer indignari*.—<sup>30</sup> *ad castra allicias proficisci*.—<sup>31</sup> *levare*.—<sup>32</sup> *solicitudo*.—<sup>33</sup> *Render this sentence in all admissible constructions*.—<sup>34</sup> *relinquere*.—<sup>35</sup> *Render*; I wish you would show me (*ostendere*) what you would that [it] should be done.—<sup>36</sup> *accidere*.—<sup>37</sup> *quantum*.—<sup>38</sup> *facere*.—<sup>39</sup> *opare*.—<sup>40</sup> *cervix*.—<sup>41</sup> *cogere*.—<sup>42</sup> *cujusvis generis*.—<sup>43</sup> *seclus*.—<sup>44</sup> *in* with accus.—<sup>45</sup> *ictus*.—<sup>46</sup> *coire*.—<sup>47</sup> *aliquis ex*.—<sup>48</sup> *to issue a call for a meeting*, *ad conventionem vocare*.—<sup>49</sup> *by triuam*.—<sup>50</sup> *in conspectum*.—<sup>51</sup> *censere*.—<sup>52</sup> *plurique*.—<sup>53</sup> *censere*.—<sup>54</sup> *de*.—<sup>55</sup> *ad*.—<sup>56</sup> *Ne-clause*.—<sup>57</sup> *dicere*.—<sup>58</sup> *res*.—<sup>59</sup> *pugnam committere*.—<sup>60</sup> *abl. abs.*.—<sup>61</sup> *placere*.—<sup>62</sup> *Render*; If anything had been sinned (*peccare*) against (*adversus*) religion.—<sup>63</sup> *adducere*.—<sup>64</sup> *in Siciliam*. Comp. p. 48, *R. 83*.—<sup>65</sup> *Render*; That your son shall depart *primo quaque tempore*.—<sup>66</sup> *memorem esse*.—<sup>67</sup> *in gratiam cum aliquo redire*.—<sup>68</sup> *Render impersonally*; 'It was stipulated (*pangere*)'.—<sup>69</sup> *To take harsh measures against*, *aliquid durius facere in*.—<sup>70</sup> *tenere*.—<sup>71</sup> by abstract dative.

to prepare everything for the departure [Render both by *imperare* and *potere*, and by all admissible methods].—11. I charged<sup>1</sup> Crassus with carefully<sup>2</sup> observing the movements<sup>3</sup> of the enemy.—12. I forbade<sup>4</sup> Valerius to leave<sup>5</sup> the city [Render by *interdicere* and *retinere*].—13. I did not permit your son to sail to Athens [Render by all methods admissible].—14. The Greeks did not suffer [their] women to be present<sup>6</sup> at banquets [Render both by *sistere* and *poti*, and with all admissible constructions].—15. Some States do not permit *(sistere)* the public sale<sup>7</sup> of wines.—16. I did not suffer the destruction<sup>8</sup> of these forests.—17. They bitterly<sup>9</sup> complained of<sup>10</sup> the daily attacks<sup>11</sup> by the enemy in spite<sup>12</sup> of the armistice.—18. I congratulate you upon<sup>13</sup> Sulpicius's expulsion<sup>14</sup> from the Senate.—19. I thank you for<sup>15</sup> your magnificent reception<sup>16</sup> of my brother.—20. He returned thanks for<sup>17</sup> the good opinion that Caesar had of him.—21. Gaius has charged you (by *debetur* and *argueret*) with<sup>18</sup> having forged<sup>19</sup> [your] books.—22. Do you find fault<sup>20</sup> with Rabirius for having joined<sup>21</sup> those whom he could not desert without<sup>22</sup> the utmost disgrace?

III. THAT-CLAUSES DEPENDENT ON *verba faciendi*. R. 25.—1. I have always taken great pains<sup>23</sup> in showing<sup>24</sup> myself such as<sup>25</sup> I would wish others *(alterum)* to be.—2. Let us endeavor<sup>26</sup> not to expose<sup>27</sup> ourselves to the chance of receiving an injury which we are unable to endure.—3. We struggled<sup>28</sup> with the greatest energy<sup>29</sup> for your election in our district.—4. You must strive with all [your] might<sup>30</sup> to obtain the proposed prize.—5. In his oration for Roscius of Ameria, Cicero tried<sup>31</sup> very hard *(summo opere)* not to offend the dictator L. Sulla.—6. The ambassadors made the king reconsider<sup>32</sup> the conditions.—7. The city was saved from a great calamity by the efforts of Heracleius.—8. The company obtained a land-grant<sup>33</sup> of over a million of acres *(agere)*.—9. Our deputy, by the influence he had in that body *(caput hunc ordinem)*, easily carried all his points.—10. Not even by these reasons could Sulpicius be induced *(movere)* to change his opinion *(de sententiâ decedere)*.—11. Scæurus said, he was at Ephesus prevented by main force *(vis)* from taking *(abducere)* his slave out of the temple of Diana.—12. The tribunes interposed their veto against the prorogation<sup>34</sup> of Cornelius's official term.—13. If those [men] can refute what I have said, I shall not object to being punished with the heaviest penalties.—14. The common people, with difficulty *(vix)*, restrained themselves from delivering the prisoners by force from the lictors.—15. I shall not delay by anything the immediate formation of an army.—16. He spared no efforts to inflame *(incendere)* the minds<sup>35</sup> of men against the Roman rule *(dominationem)*.

IV. FACT-CLAUSES. R. 26.—1. I shall not excuse the fact that Lucius tried *(conari)* to break *(irruere)* by main force and arms into Sempronius's premises *(fundus)*.—2. I omit *(mittere)* the fact that you have always been most ready to help the bad and thwart *(obstare)* the good.—3. This can easily be proved by the fact that nobody ever bore misfortune *(res adversa)* more bravely *(fortius animo)* than Plancius.—4. You have done me the greatest favor<sup>36</sup> by paying *(solvere)* the money which I was owing *(debere)* to Sempronius out of my note.—5. Caesar accepted this excuse the more readily *(facilis)*, because matters of great importance<sup>37</sup> called<sup>38</sup> him to Rome.—6. This is evident *(perspicere)* from the fact that Cælius dismissed his slaves at a *(bono)* time when *(opus)* he would have most *(maxime)* needed<sup>39</sup> their help.—7. Aside from the fact that we ought to wait for the fleet<sup>40</sup>, I do not think that a battle should be commenced<sup>41</sup> in the absence of<sup>42</sup> the com-

<sup>1</sup> *Negotium dare*.—<sup>2</sup> *di agenter*.—<sup>3</sup> *Render*: What was carried on *(agere)* by the enemies.—<sup>4</sup> *excedere*.—<sup>5</sup> *adesse*.—<sup>6</sup> *Render*: Wines to be sold *(vendere)* publicly.—<sup>7</sup> by the verb *delere*.—<sup>8</sup> *graviter*.—<sup>9</sup> That-clause.—<sup>10</sup> *incedere*.—<sup>11</sup> *per*.—<sup>12</sup> That-clause.—<sup>13</sup> *ejicere*.—<sup>14</sup> That-clause.—<sup>15</sup> by *recipere*.—<sup>16</sup> *Render*: That Caesar had a good opinion of him *(bene de aliquo sentire)*.—<sup>17</sup> That-clause.—<sup>18</sup> *corruptere*.—<sup>19</sup> *tabula*.—<sup>20</sup> *Render*: Do you call *(proferre)* this into crime *(crimen)* that Rabirius etc.—<sup>21</sup> *to join somebody*, *cum aliquo esse*.—<sup>22</sup> *Render by involution*: Whom if he had deserted *(deserturus)* he would have been most disgraceful *(stupidus)*.—<sup>23</sup> *summo opere laborare*.—<sup>24</sup> *se probere* (That-clause).—<sup>25</sup> by *qualis*.—<sup>26</sup> *operam dare*.—<sup>27</sup> *Render*: Not to receive an injury which we do not know how to bear.—<sup>28</sup> *pugnare*.—<sup>29</sup> *summo opere*.—<sup>30</sup> *Render*: That you should carry *(ferre)* the votes of our district *(tribus)*.—<sup>31</sup> *vis*.—<sup>32</sup> *præmium*.—<sup>33</sup> *eniti*.—<sup>34</sup> *Render*: Made that the king thought that he should again *(denuo)* deliberate on the conditions.—<sup>35</sup> *Render*: It was effected by the labor *(opera)* of H. that a great calamity did not befall *(irruere in)* the city.—<sup>36</sup> *Render*: The society obtained *(impetrare)* that over a million of acres from the public lands *(de agris publicis)* were granted *(sine pretio assignare)* to it.—<sup>37</sup> our deputy *(deputatus)*, which influence *(potestas)* he used *(utitur)* in that body (see p. 519). *Do* easily brought it about *(perspicere)* that all which he wished *(velles)* were conceded.—<sup>38</sup> Cornelio imperium prorogare.—<sup>39</sup> *gravissimus supplicii afflicti*.—<sup>40</sup> from snatching *(eripere)* the prisoners to the lictors.—<sup>41</sup> *illico exercitum scribere*.—<sup>42</sup> *gratissimum alicui facere*.—<sup>43</sup> *syngrapha*.—<sup>44</sup> *gravissimus*.—<sup>45</sup> *avocare*.—<sup>46</sup> *egere*.—<sup>47</sup> *classem expectare*.—<sup>48</sup> *to commence a battle*, *pugnare*.—<sup>49</sup> *abl. abs.*

mander-in-chief.—8. As to your staying in Athens, I wish you would depart [from there] as soon as possible.—9. Your brother deserves the greatest thanks<sup>1</sup> of our fellow-citizens.—10. Whatever the tyrant has taken from us<sup>2</sup>, he has left us the right<sup>3</sup> to transmit *(man dare)* his name infamous<sup>4</sup> to posterity.

V. SUBJECT THAT-CLAUSES WITH ADJECTIVE AND SUBSTANTIVE PREDICATES. R. 27.—1. What can be so clear<sup>5</sup> and evident<sup>6</sup> as that there is some divine being<sup>7</sup> by whom this world<sup>8</sup> is governed?—2. There is no doubt that of all Greek nations the Lacedæmonians were the bravest.—3. It is better that a guilty<sup>9</sup> [person] should escape without a trial<sup>10</sup>, than that an innocent [person] should be condemned.—4. It is disgraceful for a free-born<sup>11</sup> man to live<sup>12</sup> (= that a free-born man should live) at any place<sup>13</sup> where he has not the rights of a citizen<sup>14</sup>.—5. It was disgraceful [for him] to accuse (= that he accused) that consul whose quaestor he had been.—6. Nothing is more important *(majus)* than for a teacher *(præceptor)* to thoroughly examine<sup>15</sup> before all other things *(imprimis)* the talent<sup>16</sup> and nature of the student *(discens)*.—7. The Senate considered<sup>17</sup> it to be proper *(equus)* that Cornelius should obtain Gaul as [his] province, his command *(imperium)* being continued<sup>18</sup>.—8. It is not fair *(par)* that I should speak in the presence of Roscius *(abl. abs.)*. [Render the That-clause in all admissible forms].—9. It is not probable that Lucius should have committed a heinous crime without any cause. [Render in all admissible forms].—10. It is a settled matter<sup>19</sup> with me to leave the public service<sup>20</sup>.—11. Near that temple is a sacred tree which it is thought a sin *(nefas)* to violate.—12. It is a pious custom, to attribute *(tribuere)* one's happiness to the grace *(judicium)* of the gods.—13. Cato says in his 'Origins' that with our ancestors it had been the custom in banquets<sup>21</sup>, for the guests to sing in turn, with the accompaniment of the flute<sup>22</sup>, the praises and virtues of renowned men.—14. It is a crime *(scelus)* to harm a beast [Render in all ways admitted].—15. There was a danger that Hasdrubal, if he staid any longer in the city, would be surrendered to Scipio.—16. It is a great praise for an orator to know how in the very beginning to win<sup>23</sup> the favor of the audience.—17. It is a great praise [for him] that rather than break [his] promise *(ades)* he gave up *(deponere)* [his] life.—18. It was a law between Lucullus and Murena that the one should do nothing without the other.

VI. THAT-CLAUSES AS SUBJECTS OF IMPERSONAL VERBS. R. 28.—1. It was evident that there would be a sharp *(atrox)* fight with the plebs.—2. It was very evident that it would be necessary *(periphr. gerundial)* to fight with all the forces of the enemy.—3. It seems to me *(personal construction)* that I am perceiving *(perspicere)* his very soul.—4. It is known to all that Augustus often thought of<sup>24</sup> restoring freedom to the Roman people.—5. It was a settled fact with me *(constare)* that Labeo had committed the murder.—6. I agreed *(convenit)* with Hortensius that he should open the pleading<sup>25</sup> in this case.—7. There is no disagreement as to the fact that Sempronius fell in that battle.—8. It escaped me that Sulpicius had already left the assembly.—9. Cæsar did not like [the idea of spending *(consumere)* the rest<sup>26</sup> of the summer in the country *(finis)* of the Eburones].—10. Cæsar resolved *(placet)* that the Bellovaci should give one hundred hostages. [Render in all forms allowable].—11. It was not allowed now *(jam)* to be neutral<sup>28</sup> [to be rendered by all admissible methods].—12. It was allowed to the king to remain unharmed *(incolumis)* in his kingdom. [Render by all methods].—13. It was not allowed by the laws to apply<sup>29</sup> while one was absent for a magistracy.—14. Cæsar regretted *(penitet)* that he had pardoned Ligarius.—15. It often happens that the surest *(certissimus)* hope vanishes<sup>30</sup> in the shortest space of time.—16. It happened very opportunely that Sulpicius was not far with his army when our soldiers were thus pressed by the enemy.—17. It happened by chance that at the same hour Aristo was taking a pleasure-walk<sup>31</sup> in the grove of the Academy.—18. It fell to the lot of Antonius that he held, without any opposition<sup>32</sup>, the first rank as an orator<sup>33</sup> during more than twenty years.—19. In definitions it is proper that nothing should be, either wanting or superfluous<sup>34</sup>.—20. A sinner *(peccans)* ought *(oportet)* not to correct the sins<sup>35</sup> [of others].—21. The temple of Castor ought *(oportet)* to have been surrendered *(tradere)* to Habonius. [Render by all admissible methods].—22. If pain is greatest, it is necessary that it must be brief.—23. He who is temperate<sup>36</sup> must necessarily be firm<sup>37</sup>.—24. It is in the interest<sup>38</sup> of all, that each

<sup>1</sup> By *summas gratias agere* (passively).—<sup>2</sup> *eripere aliquid alicui*.—<sup>3</sup> *hoc nobis reliquit*.—<sup>4</sup> *infamis*.—<sup>5</sup> *apertus*.—<sup>6</sup> *perspicuus*.—<sup>7</sup> *divine being*, *numen*.—<sup>8</sup> = these [things].—<sup>9</sup> *nocens*.—<sup>10</sup> *causam non dicere*.—<sup>11</sup> *ingenuus*.—<sup>12</sup> *habitare*.—<sup>13</sup> *eo loco*.—<sup>14</sup> *not to have the rights of a citizen* = *servire* (by the periphrastic gerundial).—<sup>15</sup> = than that a teacher should thoroughly examine *(perspicere)*.—<sup>16</sup> *ingenium*.—<sup>17</sup> *considere*.—<sup>18</sup> *prorogare* (abl. with perfect).—<sup>19</sup> *certum est*.—<sup>20</sup> a republica *decedere*.—<sup>21</sup> *epulae* (GEN.).—<sup>22</sup> *Render*: That the guests *(qui accubarent)* sang in turn *(deinceps)* to the flute *(ad tibiam)*, etc.—<sup>23</sup> *conciliare*.—<sup>24</sup> *deponere* with That-clause.—<sup>25</sup> *to open the pleading* (if only two are speaking).—<sup>26</sup> *ex consilio decedere*.—<sup>27</sup> *quod reliquum esset*.—<sup>28</sup> *medius*.—<sup>29</sup> *petere*.—<sup>30</sup> *evanescere*.—<sup>31</sup> *animi causâ ambulare*.—<sup>32</sup> *controversia*.—<sup>33</sup> *primas* (i. e. par-tis) in *dicendo tenere*.—<sup>34</sup> *redundare*.—<sup>35</sup> *peccatum*.—<sup>36</sup> *frugi*.—<sup>37</sup> *constans*.—<sup>38</sup> *expedit*.

[illegible]

VII. ATTRIBUTIVE THAT-CLAUSES. *R.* 29.—1. I received<sup>30</sup> a message that Appian has resigned<sup>31</sup> [his]<sup>32</sup> deconvirship.—2. A rumor ( *rumor*) was circulated<sup>33</sup> among the soldiers that our army had suffered<sup>34</sup> a total defeat<sup>35</sup> in Spain.—3. The hope was held out<sup>36</sup> to Manilius that he would easily recover<sup>37</sup> what he had lost.—4. The dangerous opinion has gained ground<sup>38</sup> that under<sup>39</sup> these judges no rich<sup>40</sup> [man], however<sup>41</sup> guilty<sup>42</sup> he may be, can be condemned.—5. We hold the opinion<sup>43</sup> that no virtue can exist (*esse*) except<sup>44</sup> in rational beings<sup>45</sup>.—6. Servilius gave<sup>46</sup> [his] opinion that the Campanian lands (*ager*,—sing.) should be taken<sup>47</sup> from their owners<sup>48</sup>, and be distributed<sup>49</sup> among<sup>50</sup> the plebs.—7. Can you make it plausible<sup>51</sup> that, during so long a time, you did not even make an attempt<sup>52</sup> to recover<sup>53</sup> the possession of that estate<sup>54</sup>?—8. The fear had taken hold<sup>55</sup> of the soldiers that the wound of [their] commander might be a mortal<sup>56</sup> one.—9. With the greatest rejoicing (*delectata*) that the end of our labors was near<sup>57</sup>, the sad feeling<sup>58</sup> was mingled<sup>59</sup> that there was also an end of our companionship<sup>60</sup> and intercourse<sup>61</sup>.—10. I cannot approve of (*deplere*) the custom of the Gauls of<sup>62</sup> proceeding<sup>63</sup> in arms<sup>64</sup> to [their] councils.—11. The tribunals promulgated [the bill of] a law that the public lands should be divided in equal parts<sup>65</sup> among the plebs.—12. Servilius tried<sup>66</sup> to prove<sup>67</sup> that church-property<sup>68</sup> had no immunity from paying<sup>69</sup> taxes [to the State].—13. The gods are [my] witnesses that I am speaking the truth<sup>70</sup>.—14. [There] is that great advantage (*commodum*) in this law that our allies are better protected (*tutorum*) against<sup>71</sup> the avarice of our magistrates.—15. That absurdity<sup>72</sup> that living beings (*animans*) were once (*quondam*) called<sup>73</sup> into existence<sup>74</sup> by chance<sup>75</sup>, will not be acknowledged (*concedere*) by our countrymen.—16. That reproach<sup>76</sup> will be for ever<sup>77</sup> fastened (*hærrere*) on (*in*) the State of the Athenians that they put to death (*morte mulctare*) their best and wisest citizen.—17. There was now (*jam*) no motive (*causa*) for the citizens to<sup>78</sup> bribe<sup>79</sup> their legislators<sup>80</sup>.—18. You cannot remove (*tollere*) the causes, which I wrote to you, why<sup>81</sup> I cannot come into the Senate.—19. What other cause had you, except (*nisi*) that Minucius opposed (*repugnare*) your nefarious measures?—20. Verres came very near being lynched<sup>82</sup> by the multitude.

the multitude.

<sup>1</sup> Singuli (*plur.*). — <sup>2</sup> certiorē facere. — <sup>3</sup> Render by *inculcation*: Which, that your friends should know is either in our interest, or in theirs (by *ipse*). — <sup>4</sup> adesse. — <sup>5</sup> comitia. — <sup>6</sup> = that an orator etc. — <sup>7</sup> explicare. — <sup>8</sup> infinitive clause. — <sup>9</sup> claudere. — <sup>10</sup> *id* or *unde*? — <sup>11</sup> civitas. — <sup>12</sup> by *constat*. — <sup>13</sup> to form an *alibi*, conjuncture. — <sup>14</sup> munitus. — <sup>15</sup> alterre. — <sup>16</sup> Render: That it would not be [the case] that I would meet (*convenire*) you there. — <sup>17</sup> to act with *fr. int.*, dolomalo uti. — <sup>18</sup> exponere. — <sup>19</sup> remedium. — <sup>20</sup> succurrere (*gerund.*). — <sup>21</sup> incommodum. — <sup>22</sup> molestia (*sing.*). — <sup>23</sup> active construction. — <sup>24</sup> maxima pars. — <sup>25</sup> a — <sup>26</sup> *inter*, *recruit*, tiro. — <sup>27</sup> Render *imperatively*: It saved (*vindicta*) me from death that I suffered etc. — <sup>28</sup> A messenger was brought (*affertur*) to me. — <sup>29</sup> se abiliare ab. — <sup>30</sup> decem. — <sup>31</sup> viratus. — <sup>32</sup> tractare. — <sup>33</sup> accipere. — <sup>34</sup> eludes insigni. — <sup>35</sup> ostendere. — <sup>36</sup> recipere. — <sup>37</sup> inveterascere. — <sup>38</sup> abl. abs. (these being the judges: p. 181, Obs. 1; p. 185, Obs. 2). — <sup>39</sup> pecuniōsus. — <sup>40</sup> *quamvis* with subjunctive. — <sup>41</sup> nocens. — <sup>42</sup> hanc sententiam tuam. — <sup>43</sup> nisi. — <sup>44</sup> a rational being, is qui est ratione praeditus (*singular in Latin*). — <sup>45</sup> dicere. — <sup>46</sup> adimere. — <sup>47</sup> dominus. — <sup>48</sup> dividere. — <sup>49</sup> dative. — <sup>50</sup> idem facere. — <sup>51</sup> made an attempt. — <sup>52</sup> confari. — <sup>53</sup> recuperare. — <sup>54</sup> praedium. — <sup>55</sup> to take hold of. capere. — <sup>56</sup> mortifer. — <sup>57</sup> access. — <sup>58</sup> tristitia. — <sup>59</sup> Render: with the joy, etc., was connected (*conjungere*) the sadness that etc. — <sup>60</sup> societas. — <sup>61</sup> consensuendo. — <sup>62</sup> That-clause. — <sup>63</sup> ventre. — <sup>64</sup> armatus (access. pred.). — <sup>65</sup> virtum. — <sup>66</sup> velle. — <sup>67</sup> efficere. — <sup>68</sup> bona ecclesiastica (Latinity of the later jurists). — <sup>69</sup> Render: That taxes (*tributum*) be paid (*solvere*) from them. — <sup>70</sup> verum. — <sup>71</sup> ineptia. — <sup>72</sup> vocare. — <sup>73</sup> vita. — <sup>74</sup> canis. — <sup>75</sup> opprobrium. — <sup>76</sup> That-clause. — <sup>77</sup> pecuniā corrumpere. — <sup>78</sup> Render: Those with (*pene*) whom was the power (*potestas*) of making (*ferre*) the laws. — <sup>79</sup> Render by both a relative and a That-clause. — <sup>80</sup> lacerare.

VIII. INNER FORM OF THAT-CLAUSES. R. 31.—1. I believe that we must<sup>1</sup> strive with all our might<sup>2</sup> to reduce<sup>3</sup> the city before the first of next<sup>4</sup> [month].—2. It is absurd to place any confidence<sup>5</sup> in a person (is) by whom you have been once deceived.—3. We believe that Cæsar will defeat Pompey.—4. Servius said you had praised me, for which compliment (is) I most sincerely (*animus*) thank you<sup>6</sup>.—5. I remember that Cæsar said that same [thing] very often [to me].—6. I remember to<sup>7</sup> have read that Sulla, after his abdication<sup>8</sup>, lived in Greek attire<sup>9</sup> in Neapolis.—7. I recollect that two hundred years ago Campania was laid waste (*vastata*) by the servile<sup>10</sup> war.—8. Do you not remember that I returned you this money last<sup>11</sup> year?—9. Cæsar, when in captivity with the pirates<sup>12</sup>, threatened to nail<sup>13</sup> them to the cross<sup>14</sup> when (is) he would have been ransomed<sup>15</sup>.—10. It is certain<sup>16</sup> to all that Cæsar, if the patriotic party (*boni*) should be defeated, will not be more clement than Cinna was.—11. Curio confirmed that Cæsar would accept these conditions, when (is) Pompey would have disbanded<sup>17</sup> his legions.—12. Scipio said that Græchus, if he had incited the people to rebellion (*seditio*), had been killed (*cauter*) righteously (*iure*).—13. Do you believe that I would have allowed this thing<sup>18</sup> I [had] thought it to be wrong?—14. Tiberio said, he would not have taken this charge (*onus*) over himself<sup>19</sup>, if he had known<sup>20</sup> that Curio was desirous<sup>21</sup> of having it himself.—15. To these the answer was given (*respondere*) that if the Cretans (*Cretensis*) had cultivated rather the friendship of the Romans than [that] of Persus, the Senate would have given to them an answer (*responsum dare*), as (*damnam*) to friends and allies.—16. I think (*arbitrari*), said Hannibal, that, if I had defeated you at Zama, I would be the greatest of all captains (*imperator*), greater than Pyrrhus, greater than Alexander.—17. I am convinced<sup>22</sup> that Turpilius would oppose<sup>23</sup> this plan if he were present (*ad-esse*).—18. Sextus said that he would have done the same [thing] if the same had happened to him.—19. I think (*existere*) that it would have been proper (*equus*) if<sup>24</sup> you had waited for (*expectare*) the arrival of Pompey.—20. Manlius said that it would have behooved<sup>25</sup> the senate (*patres*) to grant a hearing<sup>26</sup> to the ambassadors.

IX. MODAL TABLE-CLAUSES. R. 32. 33.—1. Fabius was weak in regular infantry<sup>27</sup>, so that he placed (*collocare*), for appearance<sup>28</sup>, the train-soldiers<sup>29</sup> in the ranks<sup>30</sup>.—2. It had been noticed<sup>31</sup> that the army (*acies*) of Pompey had withdrawn farther<sup>32</sup> from the ramparts<sup>33</sup> than they were wont<sup>34</sup>, so that it seemed, a battle might (*posse*) be fought<sup>35</sup> on not unfavorable<sup>36</sup> ground<sup>37</sup>.—3. Caesar had performed<sup>38</sup> his march so that he never was<sup>39</sup> more than 5,000 paces from the rear<sup>40</sup> of the enemy.—4. The attention of the enemy was so absorbed<sup>41</sup> in the fight (*pugna*) that they did not perceive<sup>42</sup> the defeat of those who were fighting on the right flank<sup>43</sup>.—5. No calamity can befall<sup>44</sup> the Plebeians without being felt by the Patricians [*Render by all methods admissible*].—6. I admire Virgil, but so that I think Horace to have been the first (*principis*) of all the Roman poets [*Render by all methods admissible*].—7. I dissented from him, but so that we remained united (*conjunctus*) in the disunion (*disjunction*) of opinion.—8. I am so far from thinking (*videri*) that I have gained any favor<sup>45</sup>, that I know, I have made many an enemy<sup>46</sup>.—9. Sulpicius, far from being discouraged<sup>47</sup> by this failure<sup>48</sup>, devoted himself<sup>49</sup> with still (*multo*) greater zeal to the affairs of the State (*res publica*).—10. Philip, with a few horsemen, occupied (*capere*) a higher hill<sup>50</sup> in order to observe (*speculâre*) the issue of the battle<sup>51</sup> on [his] left<sup>52</sup>.—11. Caesar thought *certiorari* it of the greatest (*permagno*) importance (*interesse*) to take the cohorts over<sup>53</sup> to [his] camp, lest their minds might be changed<sup>54</sup> either by corruption<sup>55</sup>, or by false rumors<sup>56</sup>.—12. I myself, to tell the truth (*vere*), have frequently

1. Gerundial. — 2. *summo opere*. — 3. *potiri*. — 4. *proximus*. — 5. *fidem præbère alicui*. — 6. *gratias agere alicui*. — 7. infinitive clause. — 8. after *postquam* he abdicated himself from the dictatorship. — 9. *vestitus*. — 10. of the slaves. — 11. *proximus*. — 12. = having been captured by the pirates (*pirata*). — 13. *adigere*. — 14. *crux*. — 15. *redimere*. — 16. *exploratum est, with dat.* — 17. *dimittere*. — 18. *Render*: Unless (*nisi*) I thought (*putare*) that it was right (*rectus*). The Latin has no expression for the English adjective 'wrong', except by negative circumlocutions, or when wrong is equivalent to false. — 19. to take something over one's self, aliquid suscipere. — 20. by the imperfect. — 21. *Render*: that Curio had wished (*optare*) [it] to himself (*se*). — 22. *persuâsum mihi est*. — 23. *opponere*. — 24. That-clause. — 25. that the 'fathers' ought to have (*oportere*). — 26. *senatum dare*. — 27. *Render*: was less strong (*valere*) in the number (*multitudo*) of legion soldiers (*denarium milites*). — 28. *ad speciem*. — 29. *calones*. — 30. *ordo*. — 31. *animadvertere*. — 32. *longius progredi*. — 33. *vallum*, sing. — 34. *concesse*. — 35. to fight a battle, *danicare*. — 36. *iniquus*. — 37. *locus*. — 38. *facere*. — 39. *abesse*. — 40. *novissimum atheni*. — 41. *Render*: The minds of the enemies so intent into etc. — 42. *sentire*. — 43. *latere*. — 44. *accidere with dat.* — 45. *Render*: that I have acquired (*quære*) to me some good grace (*gratia*). — 46. *Render*: that I know (*intelligere*) that I have contracted (*suscipere*) many enmities (*simulaculæ*). — 47. *frangere*. — 48. *repulsa*. — 49. *se applicare ad*. — 50. *tumulus*. — 51. *Render*: to observe what was the fortune of his [soldiers] on etc. — 52. *levum cornu*. — 53. *traducere*. — 54. *Render*: lest any commutation of [their] sentiment (*voluntas*) might be done. — 55. *largitiones*. — 56. *nuntius*.

thought of the same reasons.—13. This can<sup>1</sup> easily be done if you are willing<sup>2</sup> to sell your villa, to say nothing of a mortgage<sup>3</sup>, which, I think<sup>4</sup>, you can negotiate on satisfactory terms.—14. The whole tribe<sup>5</sup> of the Greeks, not to put too fine a point on it<sup>6</sup>, is ignorant of<sup>7</sup> the meaning<sup>8</sup>, the importance<sup>9</sup>, [and] the weight<sup>10</sup> of an oath.

<sup>1</sup> Poterit.—<sup>2</sup> fut. perf.—<sup>3</sup> versura.—<sup>4</sup> Render by involution; which it will be allowed (*licere*) to thee to make on [by] enough fair (*aquus*) conditions.—<sup>5</sup> genus.—<sup>6</sup> Render; not to treat the thing too (*comparative*) finely (*subtilis*).—<sup>7</sup> ignorare aliquid.—<sup>8</sup> vis.—<sup>9</sup> auctoritas.—<sup>10</sup> pondus.

## CHAPTER FOURTH. TEMPORAL CLAUSES.

### I. QUUM-CLAUSES AND THEIR EQUIVALENTS.

§ 619. Quum-clauses are either PURE TEMPORAL CLAUSES, denoting the relations of TIME, connected with the principal predicate, or IMPROPER TEMPORAL CLAUSES, which, under the FORM of a temporal clause, express certain relations of the predicate *not* belonging to time (*affected Quum-clauses*). They are 1) MODAL QUUM-CLAUSES; 2) CAUSAL QUUM-CLAUSES; 3) ADVERSATIVE QUUM-CLAUSES; 4) COÖRDINATING QUUM-CLAUSES.

The pure temporal clauses are either DEFINITE, or INDEFINITE (R. 34), and, in regard to their grammatical relation, either ADVERBIAL, or ATTRIBUTIVE (see OBS. 2).

OBS. 1. The conjunction *quum* must be considered as an original ADVERB of time, having the same relation to the relative adjective *qui*, as the locative adverbs *ubi* and *unde*. As *ubi* is = *eo loco quo*, or = *quo loco*, so *quum* is = *eo tempore quo*, or = *quo tempore*. Hence frequently relative clauses introduced by *quo tempore*, are equivalent to Quum-clauses, and vice versa: *Quo tempore* (= *quum*) eam primum liberam esse audivit, sine iudicio reddidit Cejo. Cic. Clu. 59, 162. Thus, for instance, the appositive Quum-clauses (R. 34, OBS. 9) have the force of *coördinating* relative clauses. Therefore the mood of Quum-clauses frequently follows the rules on the mood of relative clauses, the indefinite and the coördinating relative Quum-clauses requiring the indicative, like the corresponding *Qui*-clauses, while causal and adversative Quum-clauses have their predicates in the subjunctive. Only the subjunctive, which must or may be used in some classes of the pure temporal Quum-clauses, must be considered as conventional, deviating more or less from the rules on the mood of relative clauses.

OBS. 2. Quum-clauses are either ADVERBIAL, or ATTRIBUTIVE. The former are those which are directly dependent on the governing predicate; the latter are those which are dependent on one of the general nouns denoting TIME (*tempus*, *dies*, *annus*, etc.). See R. 36. Sometimes temporal Quum-clauses are used as SUBJECT-CLAUSES, mostly referring to indefinite time, so as to have the nature of *Si*-clauses, as: *Definitio est, quum in scripto verbum aliquod est positum* ejus de vi quaeritur. Cic. Inv. 2, 15 (Compare: *Tertiusdecimus locus est, si cum injuria contumelia juncta demonstratur*, Ib. 1, 54). Urbana etiam dissimulatio est *quum alia dicuntur* ac sentias, = *alia dicere* (subject-infinitive) dissimulatio est. Ib. Or. 2, 67.—Quid est autem quod plus valet ad ponendum dolorem quam *quum est intellectum* nihil profici? (= *Si intelligitur*, or '*intelligi*', plurimum valet). Ib. Tusc. 3, 28.—The mood in subject Quum-clauses of this kind is the *indicative*. Later writers, however, use sometimes the *subjunctive*, as: *Non exigit defensorem quum fatear* quaedam eloquentiae eorum defuisse. Tac. Dial. 25.

### A. PURE TEMPORAL QUUM-CLAUSES.

#### 1. ADVERBIAL QUUM-CLAUSES.

Rem. 34. Adverbial Quum-clauses denoting pure time, refer either to an INDEFINITE, or to a DEFINITE time. The former have the nature of the indefinite relative clauses (p. 497, OBS. 7 foll.), denoting an *uncertain contingency* on which the reality of the principal predicate depends. In these the conjunction *quum* is either rendered by '*when*', or by '*if*', having either the force of '*whenever*', or denoting, like *si*, an assumption of the speaker. (See p. 329 foll.) The mood of indefinite Quum-clauses is generally the *indicative* (but see OBS. 2 and 5).

OBS. 1. If indefinite Quum-clauses refer to *non-preterite* principal predicates, their own predicates may be 1) in the perfect *indicative*, 2) in the present *indicative*, 3) in one of the two future tenses. Sometimes the perfect and present are placed in the subjunctive (OBS. 5), but neither of the two future tenses can, by conversion, become a subjunctive of the present or perfect (p. 447, foll.).

OBS. 2. If both the principal and the dependent predicates denote an indefinite present time (see p. 298, § 567, 2 and 3), the predicate of the Quum-clause is in the *INDICATIVE PRESENT*, as: *Quum permagna premia sunt, est causa peccandi*: When (wherever) there are great prizes (held out) there is a motive for sinning. Cic. Off. 3, 20. *Quum omnibus horis aliquid atrociter fieri videmus, sensum omnem humanitatis amittimus*. Ib. R. A. 53. *Quum penes unum est omnium summa rerum, regem illum unum vocamus*. Ib. Rep. 1, 26.—Verbo 'ARBITOR' nos etiam tunc utimur, *quum ea dicimus* jurati quae comperta habemus. Ib. Font. 13, 29.—Quod idem fit *quum* de triumpho refertur. Ib. Phil. 1, 5, 12.—Romae videtur esse *quum* tuas litteras lego. Ib. Att. 2, 15, 1.—Non ea est medicina *quum* sane parvi corporis sculpetur *adhibetur* (subject-clause). Ib. Sest. 65, 135.—Nam in ceteris rebus, *quum venit* calamitas, tum detrimentum accipitur. Ib. L. M. 6, 15.—See Cic. Verr. 2, 1, 18; 2, 5, 12; Rep. 1, 38, 59; Tull. 11, 28; Cæc. 1, 3; Or. 9, 32; Div. 2, 25, 54; Ib. 2, 68, 142; Planc. 6, 16; Ib. 14, 35.—If the two predicates denote HABIT or CU-TOM, the principal predicate may be in the imperfect: *Tum quum concursant* ceteri praetores, iste imperator castra faciebat; At the season when the other praetors are on the field of action, that great captain was wont to build his camp. Cic. Verr. 2, 5, 12.—In post-classical language the predicates of such Quum-clauses are often placed in the subjunctive. In classical language the indicative, in clauses of this kind, is even then necessary when the clause has the character of a *concessive* clause, as: *Qui incolunt* maritimas urbis *etiam quum manent* corpore, animo tamen excursant et vagantur. Cic. Rep. 2, 4.—The subjunctive can only be used when the clause is *suboblique*, or when the subjunctive is accounted for by the rules on subjunctives by *attraction* or *quasi-attraction* (p. 398 foll., p. 408 foll.); as: *Quum videam* navem cursum tenentem suum, cum tempestate pugnem potius quam illi obtemperem? Planc. 39, 94.—Ceterae Caesaris virtutes populares sunt...; hostem persequi tum *quum* etiam fere se latibulis tegant atque omnia bella jure gentium conquiescant. Rab. Post. 15, 42 (Subjunctive by quasi-attraction on account of the subject-infinitive *persequi*, according to p. 413, OBS. 2). Comp. Cic. Clu. 55, 153. Sometimes, in the same sentence, of several predicates of this kind some are in the *subjunctive*, as *suboblique*, and some in the *indicative* by the latitude allowed to the author according to the rules p. 402, OBS. 3, and p. 408, R. 90, as: *Ex sua vi (rem assumi) quum* res aut tota *quid sit* aut pars ejus; extrinsecus autem *quum* ea quae sunt foris colliguntur. Cic. Or. 2, 39, 163. In the following passage, however, a subjunctive stands which cannot be explained in this manner: *Quum* certi propter divitias aut genus rempublicam *temerata*, est factio. Ib. Rep. 2, 13. [Here most of the editions read *tenent*, but against the codices.]

OBS. 3. If the predicate of such a Quum-clause denotes an action which must be conceived as completed before the principal action, it is placed in the *perfect-indicative* (see p. 300, R. 43), being rendered either by an English *present*, or by an English *present-perfect*: *Quum ille discessit*, tris personas unus sustinet: When he has left, I alone must perform three parts. Cic. Or. 2, 24, 102.—Ardor animi non semper adest, isque *quum consistit* (when it has subsided, or when it subsides), omnis illi vis et quasi flamma oratoris *extinguitur*. Ib. Brut. 24, 93.—An ille adest, nisi *quum ridentur*, canere non solent? Ib. Div. 2, 26, 56.—*Quum* paulum firmitatis accessit, is addere, et animo utuntur, et sensibus. Ib. Fin. 5, 15, 42.—Gubernatores, *quum* delphinos *viderunt* se in portum conicientis, tempestatem significari putant (when the pilots see dolphins, etc.). Ib. Div. 2, 70, 145.—Dum lego,

cate 'delata est', strictly speaking, is *anterior* to the predicate 'sum percussus'. But the author represents both actions as coincident at the same time-point, to express the immediateness of the impression. — *Quum* in conspectu prima signa suorum circumsessis fuerunt. Romani quidem ab ultima desperatione receptus est animus. Liv. 42, 66. Senti equidem tum magnopere moveri iudices (— *moti sunt*), *quum* Caesari maestum senem. Cic. Or. 2, 47. — Quod tum maxime animadverti *quum* apud C. Cotta de dis immortalibus disputatum est. Ib. N. D. 1, 6, 15 (where the majority of the Codd. has the impossible *disputatum est*). — Hae *quum* facta sunt in concilio, magna spe et letitia omnium discessum est. Caes. B. C. 3, 87. Comp. Cic. Verr. 2, 5, 23; Brut. 23, 89; 89, 305; Div. 1, 43, 98; Top. 16, 61. — Sometimes, in this construction, the *Quum*-clause is in fact a *later* act than the principal predicate, as: Ab Anaximandro moniti Lacedaemonii sunt ut urbem et tecta linquerent quod terrae motus instaret, tum *quum* urbs tota corruit. Cic. Div. 1, 50, 112. — The regular force of *Quum* clauses with perfect indicatives dependent on principal predicates in the perfect indicative, is that of *identity* of action in *modal* *Quum*-clauses (see R. 37, Obs. 2). Hence the perfect indicatives in the above passages must be considered as exceptional, but as quite legitimate forms of expression, when the author means to represent the two actions as *virtually coincident at one time-point*. For the regular forms of *anterior* *Quum*-clauses referring to time-points see Obs. 14.

Obs. 5. If the predicates of temporal clauses and their principal predicates are represented as coinciding in the same *past period of time*, the language employs the following forms: 1) Temporal clauses with *dam*, *quod*, or *quand* (or *quando*... *quum*). For these see p. 320, Obs. 3; p. 321, Obs. 5; Obs. 7; p. 322-324. — 2) Temporal *Quum*-clauses with predicates in the *imperfect indicative* or *imperfect subjunctive*, the principal predicate being in the imperfect, but also in the pluperfect or perfect according to p. 320, R. 60. The conjunction *quum* in these clauses is either rendered by 'when', or by 'while'.

1. The predicate of the clause is in the *IMPERFECT INDICATIVE* if, in *argumentative* (or non-historical) style, the author refers to an action which happened before his time, or before the time spoken of in that stage of the discourse, as: Quod erat os tuum *quum* vidēbas eos homines in contione? Cic. Verr. 2, 3, 80. — Thermitani se parum fortunas et dignitatem recuperare arbitrabantur, *quum* illa maiorum monumenta in eorum oppidis locabantur. Ib. 2, 2, 35. — Regulus tum *quum* vigilando necebat erat in meliore causa quam si domi consularis mansisset. Ib. Off. 3, 27. — Erat hoc facilius semper tum *quum* illorum auxiliis uti solebamus. Ib. Verr. 2, 5, 24. — Ego, *quum* a nostro Catone laudabar, vel reprehendi me a ceteris facile patiebar. Ib. Orat. 13, 41. — *Quum* captivis redemptio negabatur, nos vulgo homines laudabant. Liv. 25, 6. Even if such *Quum*-clauses are suboblique, they often retain their imperfect indicative, as: Credo tum *quum* Sicilia florēbat, magna artificia fuisse in ea insula. Cic. Verr. 2, 4, 21; So Cic. L. M. 14; Div. 2, 9, 22, while in the suboblique *Quum* clauses, Cic. Brut. 12, 46; Ib. S. 294, *subjunctives* are used. — Comp. p. 322, Ex. 1-5, 10, 11, and Cic. L. M. 18; DeJ. 8, 23; Pis. 13, 31; Verr. 2, 3, 50; Or. 1, 30, 135; 2, 25, 106; Fin. 2, 19; Tusc. 2, 15; Fam. 12, 6; 9, 25; Planc. 18, 45; Sest. 48, 103.

2. The *imperfect subjunctive* may be used in *Quum*-clauses of this kind (a) if it has the meaning 'while', and the two predicates denote each a period of their own, one of which is represented as falling within the other, as: Casu, *quum* legerem tuas litteras, Hirfius erat apud me. Cic. Att. 15, 1, 12. — Equidem, *quum* peterem magistratum (during the time of my candidature), solēbam dimittere a me Scevolam *quum* ita ei dicerem etc. Ib. Or. 1, 24. — Si tibi tum *quum* peteres consulatum accidit. Ib. Mur. 3, 8. — Nec vero Phidias *quum* faceret Jovis formam aut Minervae, contempebatur aliquem a quo similitudinem duceret. Ib. Orat. 9\*. — (b) A subjunctive imperfect may also be used to intimate that the predicate of the *Quum*-clause, besides its function as temporal clause in regard to a coinciding time-period, contains a *reason* or *'adversative cause'* (although, as: Tum *quum* bello sociorum tota Italia ardebat, Q. Norbanus in summo otio fuit. Cic. Verr. 2, 2, 5 (= although the war was raging, he nevertheless was, etc.). Itaque *quum* ceteri consules irent, redirent (WHILE and ALTHOUGH), in sententia mansi. Ib. Phil. 2, 35. —

\* Hence, sometimes such *Quum*-clauses with a *subjunctive* are found in immediate connection with *indicative* *Quum*-clauses of the same category, as: Cur eum (Stajenum), *quum* in concilium intrat (while), Cluentius et Camutius abesse patiebantur? cur, *quum* in concilium (rem) mittebant (— when), Stajenum iudicem non requirēbant? Cic. Clu. 30, 83. — Tum *quum* habebat respublica Lascinos, Calatinos, Aciduos... et tum *quum* erant Catones, Phil. Latini, tamen huiusmodi res commissa nemini est. Ib. L. agr. 2, 21. The author of the Publ. Sch. Gr. (p. 389) says: 'Habere' is purely historical, *erant* appending to the "later" experience of the Roman people'. But neither *habere*, *erant* nor *habere* is 'historical' in the sense explained, Obs. 5 and 6, so as to justify a *subjunctive* in place of an *indicative*; or else the predicates are *both* historical. The passage simply shows that both moods are admissible, if the one action is represented to fall within the period of the other.

Dolēbam et vehementer angēbar *quum* vidērem (while, i. e. since I saw) virum talem non in eadem fortunā esse. Ib. Marc. 1, 2. — (c) if *quum* denotes 'as long as'; see p. 324, Obs. 2.

Obs. 6. If *Quum*-clauses coinciding in the time-period of the principal predicate (Obs. 5) are used in HISTORICAL DISCOURSE (i. e. so that their time is the same as that which is spoken of at that stage of the narrative), the imperfect subjunctive is far more frequently used than the imperfect indicative, as: *Quum* circa Tarentum, consules ambo in Samnio essent, jam famem Campani sentiēbant. Liv. 25, 13. — *Quum* tanta multitudo lapides ac tela conjicerent, in muro consistendi potestas erat nulli. Caes. B. G. 2, 6. — *Quum* se hostes identidem in silvas recipere, ac rursus ex silvis in nostros impetum facerent, interim legiones sex quae venerant, castra munire cepērunt. Ib. 2, 19. — But: *Quum* jam appropinquabant, Poris ad hortationem nautarum intentus erat. Liv. 40, 4. — In later Latinity, in clauses of this kind (both historical and non-historical), the subjunctive imperfect was exclusively used. Thus to the following passage of Ter. Andr. 2, 3, 13 'cum esse censes nunc me atque olim (eram) *quum* dabam', Donatus remarks 'Nos dicimus "quum darem"'. —

Obs. 7. If coincident *Quum*-clauses refer to a *time-point* (being represented as complete acts), while the principal predicate denotes an action extending over a *time-period*, the predicate of the clause is in the *perfect indicative*, both in historical and argumentative discourse, as: *Quum* Caesar in Galliam venit, alterius factionis principes erant Adui, alterius Sequani. Caes. B. G. 6, 12. [Here the *Quum*-clause denotes a time several years before the time spoken of at that stage of the narrative, and hence this part of the discourse is *not* historical in the above-mentioned sense, though occurring in an historian]. — Eo *quum* veni, praetor quiescebat, fratres inambulabant. Cic. Verr. 2, 4, 14. [This passage is *historical*, since the time of *veni* corresponds with the general time of the episodic narrative, although not used by an historian]. — Haec Crassi *quum* edita oratio est, quatuor et triginta tum habebat annos, totidemque annis mihi praestabat. Cic. Brut. 43, 161 (not historical). — Jus quod erat tum *quum* Asellus est mortuus (not historical). Ib. Verr. 2, 1, 41. — Tu, *quum* Quaestor es factus, etiam qui te numquam viderant, illum honorem nomini mandabant tuo. Ib. Pis. 1, 2 (Here the clause is strictly *anterior*, but is represented as *virtually coincident*, according to the principle mentioned Obs. 4). — Ambo regnabant *quum* de eis triumphatum est. Liv. 45, 39. — The writers of the silver age, most always, use the *subjunctive imperfect* in clauses of this kind, as: Effice ut idem status sit, *quum* exis, qui fuit *quum* promitterem. Sen. Ben. 5, 39 (where Cicero would say 'tum *quum* promisti'). —

Obs. 8. If coincident *Quum*-clauses refer to a *time-period*, while the principal predicate denotes a *time-point* falling within that period, the predicate of the *Quum*-clause is either in the *IMPERFECT INDICATIVE*, or in the *IMPERFECT SUBJUNCTIVE*, while the principal predicate is in the *perfect* (or in another preterite tense, according to the rules on the use of tenses), as: Isto in genere fuimus ipsi, *quum* ambitionis nostrae tempora postulabant. Cic. Planc. 18, 45. — Quod, *quum* res agebatur, nemo in me dixit, id tot annis post tu es inventus qui diceret? Ib. Phil. 2, 9, 22. — Bene apud maiores nostros tum *quum* florēbat imperium, decrevit ut de principum filiis sex singulis Etruriae populus in discipulum traderetur. Ib. Div. 1, 41, 22. — His libris adnumerandi sunt sex de republica quos tunc scripsimus *quum* gubernaculum reipublice tenuimus. Ib. Div. 2, 1. — But: Caesar tum *quum* maxime furor ardebat Antoni, dimissum exercitum comparavit. Ib. Phil. 3, 2. — Cratonidae quondam, *quum* florērent omnibus copiis, templum Junonis erregis picturis locupietate repleverant. Ib. Liv. 2, 1. — Sed aliquot ante annis, *quum* summa esset auctoritas in senatu, iusta ratio est ut consules magistratu se abdicarent. Ib. Rep. 2, 36. — *Quum* inambulabam in xysto et essem otiosus domi, M. ad me Brutus venerat. Ib. Brut. 3, 10. — Caesar *quum* inambularet illo die quo primum in sella aurea sedit, in extis cor non fuit. Ib. Div. 1, 52. — Non parasti mihi *quum* uterer, qua soleo, praesagione divina. Ib. 1, 54. Comp. Cic. Verr. 2, 3, 12; Brut. 45, 168; 68, 241; 72, 249; Div. 1, 35, 77; Off. 3, 20, 80. — In *historical* discourse (Obs. 6, 7), the imperfect subjunctive, in clauses of this kind, is the regular form of the predicate: *Quum* haec agerem, repente ad me venit Heraclius. Cic. Verr. 2, 4, 61. — *Quum* portae appropinquarent, editus ignis ab Hannibale est. Liv. 25, 9. — Caesar, *quum* ab hoste non amplius passuum XII millibus abesset, ad eum legati revertuntur. Caes. B. G. 4, 11. — So in epistolary style: *Quum* hanc jam epistolam compicarem, tabellarii a vobis venerunt. Cic. Qu. Fr. 3, 1, 17. Comp. Liv. 1, 50; 10, 30; 25, 11; 42, 57.

Obs. 9. The two constructions, mentioned Obs. 8, are used if the event which happened at a time-point of the period expressed by the principal predicate, is conceived as the *main fact*, while, when the *period* is conceived as the *main fact*, the principal sentence must become a *Quum*-clause with the construction mentioned Obs. 7. (Thus the passage Cic. Brut. 3, 10, quoted Obs. 8, would be thus changed: *Quum* M. Brutus ad me venit, ego inambulabam in xysto). But if *both* predicates are to be represented as *equally important*, the language uses the form of an *APPOSITIVE QUUM-CLAUSE* according to the rules mentioned p. 324, Obs. 1; Obs. 3. In this instance *both* predicates must be in the *indica-*

Ariovistum ad occupandum Vesontionem contendere. Cæs. B. G. 1, 38.—Eo *quum* ventisset, animadvertit ad alteram ripam magnas esse copias hostium. Ib. 5, 18.—Aeneas Martius, *quum* Latinos bello devicisset, ascivit eos in civitatem. Cic. Rep. 2, 18, 33.—Quorum memoria jucunda sane fuit *quum* in eam nuper in sermone quodam incidissemus. Ib. Brut. 2, 9.—The principal predicate is most frequently in the *perfect*, but it may be in any preterite tense (historical present, imperfect, and pluperfect), as: Dionysius *quum* faunum Proserpinæ Locris expilavisset, navigabat Syracusas. Cic. N. D. 3, 34.—Hostes, *quum* magnæ manus eo convenissent, multitudine navium deterriti, a litore discesserant. Cæs. B. G. 5, 9.—The use of a *PLUPERFECT INDICATIVE* in Quum-clauses of this kind is anteclassical and rare, as: *Quum intellexeras* id consilii capere, cur non dixti extemplo Pamphilo? Ter. Andr. 3, 2, 37. Sometimes however, in classical prose, the *pluperfect indicative* is used 1) to represent an action as *contemporaneous* with a period following the action of the clause, generally in connection with *tum* (= *at a time after*), as: Nam *tum quum* in Aelia res magnas permulti amiserant, scimus Romæ, solutione impedita, fidem concidisse. Cic. L. M. 7, 19.—*Quum* ea consecutus nondum eram (at a time when I had not yet achieved those results) quæ sunt hominum opinionibus amplissima, tamen ista vestra nomina nunquam sum admiratus. Ib. Fam. 3, 7, 5. But even in this instance the *pluperfect subjunctive* is more usual than the *indicative*, as: Atque hoc tantum lucri coguntur (historical present) dare *tum quum* (at a time after) aratores ex agris, spoliati decumandorum injuriis profugissent. Cic. Verr. 2, 3, 32.—2) Sometimes a *pluperfect indicative* is used for particular reasons in place of a *subjunctive imperfect*, if the predicate is represented as coinciding in time with an action past at the time spoken of, as: IV millia hominum erant, mixti ex omni colluvione exules, et *quum* in civitatibus suis sub legibus vixerant, et postquam eos fortuna conglobaverat, per latrocinia ac rapinam *tolerantes* vitam (= qui toleraverant vitam *quum* in civitatibus suis vixerent, et tolerabant vitam postquam eos fortuna conglobaverat). Liv. 26, 40. If here the *imperfect subjunctive* *vixerent* had been used, the action would be mistaken as still lasting at the time spoken of, since the principal predicate has the form of a participle which does not mark the time as *past*. A *pluperfect subjunctive* would represent the time of 'vixere' as *past* in regard to 'tolerantes'.—3) Quum-clauses regularly take the *pluperfect indicative* when they depend on an *imperfect or contingent action*, as: *Quum* vinere paulum processerant, igni aut lapidibus corrumpebantur. Sall. Jug. 92. See p. 3, 9, OBS. 1.

OBS. 15. Anterior Quum-clauses have their predicates in the *imperfect subjunctive* 1) if the action is represented as having commenced *before* the principal action, but as *continuing* together with it, as: *Quum* omnia consilia frangerent, insimulare cœperunt: When all the expedients were flagging, they began to dissemble (the 'frangerent' continuing after the adoption of the other plan). Cic. Verr. 2, 2, 4.—Epaminondas, *quum* gravi vulnere exanimari se videret, quæsit salvasne esset clipeus. Ib. Fin. 2, 30.—Equites, subsidio confisi, *quum* post se legiones viderent, præcipientes hostes egerunt. Cæs. B. G. 5, 17.—*Quum* in meâ salute custodiendâ tam multos viros bonos viderem, capibam non mediocre voluptatem. Cic. Planc. 1, 1. Compare with: *Quum* e Ciliciâ decedens Rhodum venissem, et eo mihi de Q. Hortensii morte esset allatum, opinione omnium majorem animo cepi dolorem (where the predicates *venissem* and *esset allatum* contain actions which had ceased when the principal action commenced). Cic. Brut. 1, 1, 2.—If both actions belong to the same transaction, the principal action being represented as an *immediate* or necessary consequence of the action of the clause, as: Non inurbane Stratonice, *quum* quidam Alabandum deum esse confirmaret, Herculem negaret, 'Ergo', inquit, 'mihi Alabandus, tibi Hercules sit iratus'. Cic. N. D. 3, 19, 50.—*Quum* ex captivis quæreret Cæsar, quamobrem Ariovistus non decertaret, hanc reperiebat causam. Cæs. B. G. 1, 50.—Catulus, *quum* ex vobis quæreret, ..., cepit magnam sue virtutis premium quum... dixistis etc.; When Catulus had asked you etc., he received the reward for his virtue by your answer etc. Cic. L. M. 20, 59.—3) If the action of a Quum-clause is represented both as *immediately preceding* the principal action in time, and as a *reason* or  *motive* for the principal action, as: Themistocles, *quum* in epulis recusaret lyram, habitus est indoctor. Cic. Tusc. 1, 2.—Demaratus, *quum* audiret, dominationem Cypseli confirmari, defugit patriam. Ib. Rep. 2, 19, 34. Compare with: *Quum* audissem Antiochum in gymnasio, constituimus ut ambulationem postmeridianam conficeremus; (immediately) after hearing a lecture of Antiochus, we resolved to take an afternoon walk. Ib. Fin. 5, 1. Such clauses pass over into 'affected' Quum-clauses, denoting cause without any regard to time. See R. 37.—For the use of the *perfect indicative* in Quum-clauses immediately prior in time to the principal predicate, see OBS. 4.—For the difference of 'ubi (ut, postquam) vidi' from 'quum viderem', and 'quum vidissem' see R. 43.

OBS. 16. The form of an *APPOSITIVE QUUM-CLAUSE* is applied to the anterior temporal relation in the same manner, and for the same reasons as to coinciding time (OBS. 9, 12). In this instance the proposition denoting *anterior time* takes the form of a principal sentence with a predicate in the *pluperfect*, while the Quum-clause, with its predicate in the

*indicative*, denotes *subsequent* time, being always placed *after* the principal sentence. The predicate of the Quum-clause, if referring to a *time-point* is placed in the *perfect*, and if referring to a *time-period* or to a *repeated action*, in the *imperfect*, as: Jam unis fortibus apertis capiti erant recipi, *quum* prætores intererant. Liv. 21, 32.—Ecce erat jam quadragesis, *quum* etiam naves ceteræ in uno loco morabantur. Cic. Verr. 2, 5, 34. Generally, in this construction, the two actions are represented as being in *immediate* succession, but this is not necessary, as: Bis consul fuerat P. Africanus et Carthaginem Numantiamque deleverat, *quum* accusavit L. Cottam (different from 'quum fuisset... accusavit'). Cic. Mur. 28, 58.—The same form is used if the principal sentence contains expressions denoting *time itself* as in the instance explained OBS. 12), as: Vix annus intercesserat *quum* iste accusavit C. Norbanum defendente me. Cic. Or. 2, 21, 89.—Some historical *indicatives* are used in appositive Quum-clauses to denote repeated action, as: Jamque dies consumptus erat, *quum* tamen barbari nihil remittere, atque acius instare. Sall. Jug. 98.

## 2. ATTRIBUTIVE QUUM-CLAUSES.

REM. 36. Attributive temporal Quum-clauses are those which are made dependent on one of the nouns denoting 'time' (*tempus, annus*, etc.). Their predicates are either in the *indicative*, or in the *subjunctive*, according to the rules on the mood of *RELATIVE CLAUSES* (p. 542 foll.).

OBS. 1. The expressions *tempus est, tempus fuit* (there is, or there was a time) generally require the *subjunctive* in their dependent Quum-clauses, according to the rules in regard to the analogous Qui-clauses (*sunt qui* etc., p. 551 foll.), as: Fuit *tempus quum* rura colerent homines, neque urbem haberent. Varr. R. R. 3, 1.—Fuit (i. e. *TEMPUS*) *quum* mihi quædam requiescendi fore justum arbiträrer. Cic. Or. 1, 1.—Quodsi fuit *tempus* quum extorquere arma posset e manibus fratrum civium boni civis auctoritas, etc. Ib. Brut. 2, 7.—Erit illud profecto *tempus* et *illuc* aliquando *dies quum* in amicissimi benevolentiam desideres. Cic. Mil. 26.—But the *indicative* may be used (according to p. 552, OBS. 6) unless the principal predicative phrase (*tempus est*) is expressed potentially or negatively, as: Fuit *quoddam tempus* analogus to 'Sunt *quidam*' (*quum* in agris homines passim bestiarum modo rapiebantur. Cic. Inv. 1, 2.—Fuit (i. e. *tempus*) *quum* hoc dici poterat. Liv. 7, 32. In anteclassical language (according to p. 551, OBS. 5), such Quum-clauses always take the *indicative*, like the corresponding Qui-clauses, as: Nunc est (i. e. *TEMPUS*) interiei *quum* perpetui me possunt. Ter. Eun. 3, 5, 3.

OBS. 2. Attributive Quum-clauses take the *subjunctive* if they have the force of *relative qualitative* clauses according to p. 553, OBS. 6, as: Accipit agrum *temporibus* eis *quum* jacere prætorum (= Tempus quo accipit agrum *id* erat quo jacere etc.; He took the land at a time when... Cic. R. C. 12.—In id *seculum* Romuli cecidit *quum* jam plena Græcia prætorum et musicorum esset (= Romuli seculum erat *id* quo Græcia prætorum plena esset). Ib. Rep. 2, 10.

OBS. 3. If an attributive Quum-clause implies a direct or adversative cause, its predicate (according to R. 21, OBS. 1, 3, 11) is generally in the *subjunctive*, as: Itaque hunc elegimus *diem quum* te scriberemus esse vacuum (the day on which, and because on it you were at leisure). Cic. Brut. 5, 20.—Nonnulli etiam illum *diem* memoriâ tenebant *quum* illa eadem Diâna, Segestam reecta, victoriam P. R. nuntiasset (that day on which, and because on it). Ib. Verr. 2, 4, 35.—Hispaniensis legatio consecuta est *turbulentissimo relictum tempore quum* adventu Sullæ in Italiam maximi exercitus civium dissiderent (according to p. 571, C. Ib. Font. 3, 6.—Tertius est *annus* decemviratus consecutus, *quum* eodem esset decemvir, nec alios subrogare voluissent although it was the third year, there were still the same decemvirs as before; p. 571, OBS. 11). Ib. Rep. 2, 27.—Idque eo indignus erat quod *tempore* hoc contigit *quum* is esset qui omnes superiores scientiâ facile viceret (that happened at that time when and although in that time, a man was living who etc.). Ib. Off. 2, 19; see p. 567, OBS. 2, and OBS. 4.

OBS. 4. Sometimes attributive Quum-clauses fall under the rule p. 554, R. 18, as: Utinam illum *diem* *videam quum* tibi agam gratias quod me vivere cœgit (the reality of the cause depending on the future reality of the principal sentence). Cic. Att. 3, 3.

OBS. 5. Attributive Quum-clauses which would not take a *subjunctive* if expressed in a relative form, must have their predicate in the *indicative*, as: Næ tu accusator esses radiculus illis *temporibus* natus esses *quum* ab aratro accessibatur qui consules fierent. Cic. R. A. 18, 50.—Quo non illius diei fama pervaserit *quum* universus P. R. sibi Cn. Pompejum imperatorem deposuisset? Ib. L. M. 15.—Secutum illud *tempus* est *quum* me ad Pompejum proficisci officium meum coegit. Ib. Fam. 11, 27.—Unus et alter *dies* intercesserat *quum* res parum certa videbatur (which is not an appositive Quum-clause, but an

attribute to *dies*). Ib. Clu. 26, 72. Comp. Cic. Or. 1, 11; Sest. 7, 15; Pis. 22, 52; Planc. 41, 99; ib. 42, 101; Rab. Post. 17, 47; Att. 12, 18, 1; Off. 1, 10, 31.—Sometimes the noun *tempus* as governing noun of a Quum-clause must be supplied, as: Renovabatur ista militia (= militia quae fuit eo tempore) quum iste a foro abduci solebat. Cic. Verr. 2, 5, 13. Sometimes (rarely) *quum* has the meaning of an ordinary relative placed in the ablative of means: Praecepta vestra legatio fuit quum Hannibalem deposcebātis (= legatio quā deposcebātis, referring to an embassy sent at a former time). Liv. 21, 18.

### B. AFFECTED QUUM-CLAUSES.

Rem. 37. Affected Quum-clauses (§ 619) are either *modal*, *causal*, *adversative*, or *coordinating*. MODAL Quum-clauses are used to represent the relation of *instrumentality* (Obs. 1, No. 1), and some of the looser relations of *coincident action* (Obs. 1, No. 2, and Obs. 2), under the form of a temporal clause of coincident time. Their predicates partly are placed in the *subjunctive*, and partly in the *indicative*.

Obs. 1. The *SUBJUNCTIVE* is used in modal Quum-clauses of the following relations: 1) If the clause has the force of an ablative of MEANS and INSTRUMENTALITY (p. 177), as: Me ipsum quondam ille decēpit, quum et civis bonus et optimi cuiusque firmus amicus videretur; He deceived me when he seemed to me a good citizen etc.; i. e. by making me believe that he was etc. Cic. Cael. 6, 14.—Solcham dimittere a me Scævolam quum ita ei dicerem, me velle esse ineptum; I dismissed him by telling him that I wished to make nonsense. Ib. Or. 1, 24.—Qui Cæsarem, mitem hominem et a cæde abhorrentem, sæpe increpuit, sæpe accusavit, quum affirmaret illum numquam, dum hæc 'natio' viveret, sine curâ futurum; Who instigated (upbraided) Cæsar by asserting that he never would be without care as long as this tribe was living. Ib. Sest. 63, 132.—Quibus quotidie meam potentiam invidiose criminabatur, quum diceret senatum non quod sentiret, sed quod ego vellem decernere; He insidiously incriminated my influence by saying etc. Ib. Mil. 5, 12.—Ita quum maximis eum rebus liberares, perparvam amicitiae culpam relinquēbas; by relieving him from the most important charges, you left a very trifling offence against friendship. Ib. Dej. 3, 10.—2) If the clause has the force of an ACCESSORY PREDICATE (p. 245, § 255), denoting the inner unity of different actions, quum with its predicate being generally rendered by a *participle*, as: Nobis quum cepisset Curio respondere, subito assedit, quum sibi veniens ereptam memoriam diceret (= dicens sibi ereptam esse); Curio suddenly took his seat, saying that he had lost his memory by witchcraft. Cic. Orat. 37, 129.—Iter in Ciliciam facere institui, quum hac opinione e Cappadocia discederem ut regem meus adventus insidiis liberaret; I began my journey etc., leaving Cappadocia with the conviction that etc. Ib. Fam. 15, 2, 8.—Igitur in Syria imperatore illo nihil aliud actum est nisi pactiones pecuniarum cum tyrannis... quum palam populi Romani imperator, instructo exercitu, non ad laudem milites hortaretur, sed omnia sibi emptâ esse clamaret. Ib. Prov. Cons. 3, 5.—Ab eodem homine vetus illa magistra pudoris, censura, sublata est, quum tu interim verbo numquam significaris sententiam tuam. Ib. Pis. 4, 9.—Here belong the Quum-clauses connected with *audire*, and sometimes with *videre* (*conspicere*) in place of a *participle* (p. 253, Obs. 2), as: L. Flaccum ego audivi quum diceret, Cæciliū exisse (= audivi Flaccum dicentem, I heard him say). Cic. Div. 1, 46.—Sæpe ex socero meo audiri quum is diceret (socerum meum dicentem), Lælium semper fere cum Scipione solitum rusticari. Ib. Or. 2, 6.—Is numquam est conspectus quum ventret (= veniens); He has never been seen coming. Ib. Sest. 59. Comp. Cic. Or. 2, 33; 2, 37; Fam. 3, 7; Fin. 5, 19.—The same construction is sometimes used after *meminisse*, but in this instance the *indicative* is used, as: Memini quum mihi desipere videbâre quod etc. Cic. Fam. 7, 28, 1. But here the Quum-clause may be considered as a temporal clause (= Memini temporis quum etc.).

Obs. 2. The *INDICATIVE* is used if the same action which is expressed by the Quum-clause is represented in the principal sentence according to its significance and import (see p. 339, R. 69). These clauses express that relation of 'coincident action' which may also be expressed by a *gerundial ablative* (as: Fratrem laudando suffragaris tibi. Cic. Leg. 1, 1), or by *in* with a *gerundial ablative* (p. 194, § 540, 3), being rendered either by principal constructions with '*in*' or '*by*', or by '*when*', '*in as much as*' etc., as: Nec plura Africânis in excidendâ Numantiâ reipublicæ profuit, quam eodem tempore P. Nasica quum Ti. Gracchum interemisset (= in interimendo Gracchum). Cic. Off. 1, 22. These clauses are distinguished from temporal Quum-clauses by the fact that in the latter two different actions are represented to coincide in time, while here the same action is represented in two different aspects. They are also distinguished from the Quum-clauses

mentioned Obs. 1, No. 2, in which the action is represented as the instrument for an intended purpose. Quum-clauses denoting identity of action, without the idea of instrumentality, have always their predicate in the indicative, which, moreover, has the same tense as the principal predicate, as: Concêdo tibi ut ea prætereas quæ, quum taces (by your silence), nulla esse concêdis. Cic. R. A. 19.—Nisi forte cessare nunc videor quum bella non gero. Ib. Sen. 6, 18.—Quum dico me, te, Brute, dico; When I mention myself, I mean you. O. Brutus. Ib. Orat. 31, 110.—Quod quum reprehendis, ostendis qualis tu fueris consul futurus. Ib. Pis. 7, 14.—Quod quum facit, iudicat, ejus sententiâ gratis esse Oppidæanum condemnatum. Ib. Clu. 47, 132.—Injuriam mihi fieri putabam quum rogabar. Ib. Fam. 3, 10, 2.—Romulus ad firmandam novam civitatem novum quoddam et subagreste consilium secutus est quum Sabinas virgines rapi jussit. Ib. Rep. 2, 7.—Nam certe neque tum peccavi quum Capuam decipere nolui. Ib. Att. 8, 12, 2. Comp. the Ex. p. 239, 240, and Cic. Off. 1, 19, 62; Verr. 2, 5, 20 and 23; ib. 2, 3, 57; ib. 2, 5, 72; Div. 1, 34, 74; Fam. 11, 29; L. M. 20, 59; ib. 1, 2.—The subjunctive, in clauses of this kind, is used only if the clause is suboblique, or in the case of attraction, as: Video quam periculosa questio temptetur ab accusatoribus quum hanc legem in P. R. transferre conentur. Cic. Clu. 57, 157.—Quum hæc diceret tu ipse gloriari videbâre. Ib. Fin. 2, 16.\*

Rem. 38. If *quum* denotes 'since', taken in a causal meaning, the clause takes the *SUBJUNCTIVE*, the same as *Qui*-clauses (p. 566, R. 21, Obs. 2).

Obs. 1. Quum-clauses denoting CAUSE may be at the same time temporal clauses, as: Quum fides totâ Italiâ esset angustior, neque creditæ pecuniæ solverentur, constituit Cæsar ut arbitri darentur. Cas. B. C. 3, 1.—Cæsar, quum constituisset hiemari in contumēti, neque multum aestatis superesset, obsides imperat etc. Ib. B. G. 5, 22. Here belong many of the passages quoted R. 35, Obs. 5, 2; Obs. 6; Obs. 15. Such clauses, if dependent on non-preterite predicates, sometimes take an *indicative* (like the causal *Qui*-clauses, p. 567, Obs. 5), as in several passages quoted R. 35, Obs. 3.

But often causal Quum-clauses are used without regard to time, in which instance they always take the *subjunctive*, as: Quum ista sis auctoritate, non debes, Marce, arripere maledictum ex trivio; Since you are of such a dignity, you should not pick up an abusive term from the street. Cic. Mur. 6, 13.—Quum vita sine amicis insidiarum et metus plena sit, ratio ipsa monet amicitias comparare. Ib. Fin. 1, 20.—Quum amicitia fuerint numquam, opinio injuriæ beneficio sit castigata... reipublicæ providebo. Ib. Prov. Cons. 20, 47.—Que quum ita sint, et quum omnis deorum potestas aut translata sit ad vos, aut communicata vobiscum, idem consul eum vestra fidei commendat qui etc. Ib. Mur. 1, 2.—Quod oppidum quum esset altissimo et munitissimo loco, ad existimationem imperii pertinere arbitratum sum, comprimere eorum audaciam. Ib. Fam. 15, 4, 10.—For the use of tenses in causal Quum-clauses, see p. 426.

Obs. 2. Frequently causal *quum* is combined with *præsertim* (*præsertim quum*, or *quum præsertim* = 'especially since', or 'the more so because'), or with *quippe* (*quippe quum*), and sometimes with *utpote*, the same as in *Qui*-clauses (p. 572). These expressions always require the *subjunctive*, as: Imperatorem a vobis certum deposcere, quum præsertim vos alium miseritis, non audent. Cic. L. M., 5, 12.—Miror tibi placere, me ad eam orationem rescribere, præsertim quum eam nemo lecturus sit si ego nihil rescripsero (the more so, because nobody is going to read it if I do not reply). Ib. Qu. Fr. 3, 1, 4.—Nihil est virtute amabilius quippe quum propter virtutem etiam eos quos numquam vidimus, quodammodo diligamus. Ib. Am. 8, 25.—Gravior cura patribus incessit, quippe quum causam prodi ab suis cernerent. Liv. 4, 57.—Me incommoda valetudo, qua jam emersem, utpote quum sine febri laborassem, tenebat Brundisii. Cic. Att. 5, 8, 1. Comp. Par. 1, 6; Leg. 1, 1, 5; Prov. Cons. 7, 16; Arch. 5.—The indicative with *quum* in a pure causal meaning is antedated and rare, as: Deos queso ut sit superstes, quum huic peritus est facere injuriam. Ter. And. 3, 2, 8.—Quippe quum occurs with an indicative in the suspected passage Cic. Att. 16, 11, 2.

\* KÜLLNER remarks that the *subjunctive* is used in Quum-clauses denoting identity of action, if the predicate denotes 'repeated action', referring to the passage Cic. Mil. 5, 12 quoted above in Obs. 1, No. 1). To this theory there is the important objection, that repeated temporal clauses requiring the *subjunctive*, take the *indicative* if they refer to ordinary temporal clauses requiring the *subjunctive*, take the *indicative* if they refer to repeated action. It would be extremely strange if this relation should be exactly reversed for Quum-clauses denoting identity of action. The above-mentioned passage belongs to a different class of Quum-clauses, in which the *subjunctive* is used on account of the idea of CAUSE (ablative of means) implied in clauses of that kind. In the passage Cic. Dej. 3, 10, quoted Obs. 1, No. 2, there is no repeated action, and yet the *subjunctive* is used. On the other hand, the following passage refers to repeated action, and the predicate of the Quum-clause is nevertheless in the *indicative*: Male etiam Curio (faciebat) quum causam Transpadanorum equam esse dicebat, semper autem addēbat 'Vincat utilitas'. Cic. Off. 3, 22.

*Rem. 39.* ADVERSATIVE (concessive) Quum-clauses (*i. e.* those expressing a reason for the contrary of what is stated in the principal sentence) require their predicates to be in the SUBJUNCTIVE, the same as the analogous Qui-clauses (p. 567, OBS. 4).

Obs. Most generally adversative Quum-clauses are *both* temporal *and* concessive, whereby they are distinguished from the concessive clauses introduced by *quamquam*, *etsi* etc., as: L. Brutus, *quum privatus esset*, totam rempublicam sustinuit; L. Brutus upheld the whole State *when* and *although* he was a private person. Cic. Rep. 2, 25, 47 (L. Brutus was a private person *at the time* spoken of; *this* was a reason that he should *not* have the ability to uphold the whole State; *nevertheless* he did so). Hence Quum-clauses of this kind comprise *three* relations: 1) a temporal; 2) a causal; 3) an adversative. Thus: Eos senatus non censuit redimendos, *quum* id parva pecunia fieri *posset*. Cic. Off. 3, 32.—Sacerdotium, *quum* non difficillime consequi *posset* (i. e. at a certain time in the mind of the author), non appetivi. Ib. Fam. 15, 4, 3.—Ipse Cicero, *quum* tenuissima valetudine *esset* (at the time spoken of, and although), ne nocturnum quidem sibi tempus ad quietem relinqueret. Cæs. B. G. 5, 40.—Itaque, *quum* me amici hortarentur ut causas agere desisterem, quodvis potius periculum mihi adeundum quam a sperata dicendi gloria discedendum putavi. Cic. Brut. 91, 314.—Patrem meum, *quum* proscriptus non *esset*, jugulastis. Ib. R. A. 11, 32. Comp. Cic. Brut. 31, 109; 95, 325.—Adversative Quum-clauses which are at the same time temporal, are not rarely found with their predicates in the *indicative*, the same as the corresponding Qui-clauses, as: O beatos illos, qui, *quum* adesse ipsis propter viri armorum non *licebat*, aderant tamen et in medullis populi Romani hauriebant! Cic. Phil. 1, 15, 36.

But frequently such Quim-clauses are used without any reference to a particular time, containing only two of the above-mentioned elements, namely, the causal and adversative relations. They are generally used to designate *qualities* of the subject, the co-existence of which with the principal predicate, is contrary to experience or to reason, as: Itaque, *quum* ei nec officium dresset, et *flagrâre* studio dicendi, perpaucæ ad eum causæ deferebantur. Cic. Brut. 61, 220.—Atticus, *quum* esset pecuniôsus, nemo illo minus fuit emax, minus ædificator. Nep. Att. 13.—Phocion fuit perpetuo pauper, *quum* divitiisimus esse *posset*. Id. Phoc. 1.—Tarquinius Superbus integrâ mente non erat, et, *quum* melueret ipse penam scelæris sui summam, metui se volêbat. Cic. Rep. 2. 25.—Druentia, Alpibus annis, *quum* aquæ vim *vehat* ingentem, non tamen navium patiens eet. Liv. 21, 31. Comp. Cic. Brut. 7, 26.—For the use of *tenses* in adversative Quim-clauses see p. 426.

Concessive Quam-clauses pass over into *coordinate* Quam-clauses, when the causal relation is more or less fading away till it entirely disappears, as : Timotheus Conōis filius *quam* belli laude non inferior *fuisse* quam pater, ad eam laudem doctrinae et ingenii gloriam *adject* (Timotheus, *while* he had not been inferior to his father, added to this quality distinction in etc.; or 'Timotheus was not inferior to his father in war, *but* he added etc'). Cic. Off. 1, 32. — Horum auctoritas maxime florēbat quod, *quam* honore longe antecellerent ceteris, voluptatibus erant *inferiores*, nec pecuniis ferme superiores, Ib. Rep. 2, 34. — Sum Cn. Pompēji virtutem admiratus quod, *quam* ipse ceteris omnibus esset antelatus, ampliorem honorem alteri *tribuēbat* quam ipse erat assecutus. Ib. Prov. Cons. 11, 27.

*Rem. 40. COÖRDINATE QUUM-CLAUSES* are either *adversative*, or *comparative*. The former require the *subjunctive*, while the latter (OBS. 2) have their predicates *either* in the indicative, *or* in the subjunctive.

Obs. 1. ADVERSATIVE COÖRDINATE Quum-clauses are equivalent to an adversative coördination by *autem* or *vero*, being distinguished from the *adversative subordinate* Quum-clauses (*R.* 39) by the lack of a causal relation. The Quum-clause generally *follows* (but may also precede) the principal sentence, being rendered by an English clause with '*whereas*' or '*while*'. The two propositions denote *opposite qualities or actions of different subjects*, the predicate of the Quum-clause being *always* in the subjunctive, as: *Socratis ingenium immortalitātī scriptis suis Plato tradidit, quum ipse litteram Socrates nullam reliquisset.* Cic. Or. 3, 16, 60.—*Eorum (Romanorum) erat V millia numerus, quum ipsi (Germani) non amplius octingentos equites haberent.* Cæs. B. G. 4, 11.—*Ante id tempus nemo aut miles aut eques a Cæsare ad Pompējum transierat, quum* *pene quotidie a Pompējo ad Cæsarem profugerent.* Ib. B. C. 3, 61.—*Solus homo ex tot animantium generibus atque natūris particeps est rationis et cogitātionis, quum* *cetera sint omnia expertia.* Cic. Leg. 1, 7. Comp. for preceding adversative Quum-clauses the passage Cic. Ac. Po. 1, 10, 38, 39.

**Obs. 2.** Sentences with **COMPARATIVE QUANTITY-CLAUSES** are used as one of the forms of **COORDINATION**, to represent two coordinate propositions referring to the same logical

subject, as having some similar or dissimilar features, this similarity or dissimilarity being intimated by a comparative form, as : Gajus quum ceteris virtutibus ornatus esset, tum eâ præcipue laude præstitit quod etc.; As Gaius was adorned with all virtues, so he was distinguished in that quality that etc'. Here both predicates represent the subject as the possessor of certain praiseworthy qualities, the principal sentence referring to a particular quality, not contained in the Quum-clause. The general form for comparative periods of this kind is the strictly comparative scheme by 'ut...sic (ita)', as : Carthaginienses, ut ad moenia urbis Romæ se pervenisse in gloriâ ponebant, ita sic Utinam illi incepto, Liv. 26. 37. But in certain instances the form of a comparative period with a Quum-clause is preferred to the form of an Ut-clause. Comparative periods with Quum-clauses always have the form of a protasis and apodosis (p. 478, On p. 5), the protasis being introduced by quum, and the apodosis by tum, as : Quum ipsam cognitionem juris augurii consequi cupio, tum, mehercule, tuis incredibiliter studius delector ; As I wish to obtain a knowledge of the augural law, so I am extremely delighted by your studies pertaining to that law. Cic. Fam. 3. 9. Rarely the tum of the apodosis is omitted, as : Post fuit Pericles qui, quum floreret omni genere virtutis, hac tamén laude (inst., ol' *tam huc laudem*) fuit clarissimus. Cic. Brut. 7. 28.—Quum multa sint in philosophiâ gravia et utilia, latissime patère videntur ea quæ de officiis tradita sunt. Ib. Off. 1. 2.

(c) Quum-clauses are used : 1) if the clause (protasis) contains a verb which instance the particles præ-

Obs. 3. Comparative Quum-clauses are used: 1) if the clause (protasis) contains a UNIVERSAL, the apodosis containing a PARTICULAR, in which instance the particles *prae-cipue*, *maxime*, *vero* are frequently added to the (*tum* of the apodosis; 2) if the protasis is in the relation of a POSITIVE, while the apodosis has the force of a COMPARATIVE or SUPPLEMENTATIVE, the action of the apodosis being represented as of *greater intensity*; 3) to represent the predicate of the apodosis as an ADDITIONAL FACT (= *praeterea*, besides, moreover), but as being of *greater importance* than the action of the protasis.

The mood of the Quum-clause is *either* the indicative or the subjunctive according to the general rules on the mood in temporal Quum-clauses. But since in clauses of this kind a distinction between time-periods and time-points cannot be made, the choice of mood is *optional*, except if the predicate of the Quum-clause is in the *pluperfect*, in which instance according to R. 35, Obs. 14, the subjunctive *must* be used. If the predicate of the clause is a *preterite* dependent on a principal predicate in a *preterite* tense, the subjunctive is far more usual than the indicative.

\* Our grammarians give very arbitrary and conflicting rules about the use of mood in these clauses. KÜNNER says: The subjunctive is used if the Quam-clause denotes *cause*, and if the apodosis is a consequence of the protasis.—But if comparative Quam-clauses denote *cause*, they fall under the rules of *causal* Quam-clauses, which is extremely seldom the case. Generally such Quam-clauses do not denote cause, and yet both moods are used in them indiscriminately. A comparative Quam-clause in which the apodosis is the *consequence* of the protasis, we have not yet succeeded in discovering.—MEIRING says that the subjunctive is used if *quam* denotes 'while'. It is true that by 'as'; but in frequently, introduce such comparative clauses by 'while' instead of by 'as'; but in a such cases the subjunctive occurs about as often as the indicative.—MADVIG says: 'The subjunctive in such Quam-clauses is used to express 'a kind of comparison' (according to Thacker's version: Madvig himself says 'a certain comparison') between the 'general' and the 'particular' case, between the earlier and the later etc.'—The learned author overlooks the fact that *all* these Quam-clauses denote 'comparison' between the two propositions. Moreover, we look in vain for a reason why a 'comparison' should require the subjunctive mood. Indeed, Madvig lays this down as a general principle, asserting that *all* Quam-clauses expressing 'a kind of comparison' take the subjunctive. He thinks he has proved this startling dogma by one solitary passage: Hoc ipso tempore *quam* omnia gymnasia philosophi teneant, tamen eorum audire discum audire *quam* philosophum malunt. Cic. Or. 2, 5. But the subjunctive in this attributive Quam-clause evidently follows the rule R. 36. OBS. 3. Nor can we, even with the help of a microscope, discover the slightest trace of a 'comparative' idea in this passage. In regard to the clauses of the form '*quam...tum*', he tries to prove this theory by the following passage: *Quam multa res in philosophia nequam satis autem explicata sunt, tum* periculum est questio de natura deorum. Cic. N. D. 1, 1: to which we oppose the following perfectly analogous passage with an *indicative*: In quo *quam multa sunt* indigna, *tum* nihil minus est forandum quam quod jam non periculum inferre conatur. Cic. Sest. 1, 2.—Some grammarians give the rule that the subjunctive 'must' be used, if the two propositions have the same predicate, referring to the following passage: Quam te a pueritia semper diligam, *tum* hoc tuo facto multo vehementius diligo. Cic. Fam. 15, 9, 3; which we meet with the following passage: *Quam* omnes de me apud te omnia quæ sunt optatissima loquantur, *tum* diu maxime clientelæ tuæ tecum de me loquantur. Cic. Fam. 15, 4, 15.

EXAMPLES.—1. RELATION OF A UNIVERSAL TO A PARTICULAR. (a) NON-PRÆTERITES: *Quum* semper tuū municipes meos *consuēri*, *tum* hic annus præcipue ad meam curam *perlinet*; As I am always wont to look after the interests of my townsmen, so belongs this year particularly to my care. Cic. Fam. 13, 11, 3.—*Quum* te *semper* maxime *dilexi*, *tum* fratrum tuorum singularis pietas nullum me *patitur* officii erga te munus prætermittere. Ib. 6, 14.—SUBJUNCTIVES: *Quum* in omnibus causis gravioribus initio dicendi commovēri *soleam* vehementius, *tum* in hac causā ita me multa perturbant ut etc. Ib. Dej. 1, 1. (Compare the passages with subjunctives in the foot-note p. 657.)—(b) PRÆTERITES: Sex. Roscius, *quum* omni tempore nobilitatis fautor *fuisse*, *tum* hoc tumultu proximo præter ceteros in eā vicinitate eam partem causæ *defendit*. Cic. R. A. 6.—Idque, *quum* per se dignus *putaretur*, *tum* auctoritate et gratiā Luculli ab Heracleis *impetravit*. Ib. Arch. 4.—*Quum* sepe antea fortunatos eos homines *iudicarem* qui... tranquillitatem vite secuti sunt, *tum* vero in his Murene periculis ita *sum* animo *affectus* ut etc. Ib. Mur. 27, 55.—Ex eo *quum* ab ineunte ætate bene *speravisset*, *tum* præclare existimare *capit* eximii iudicii, quæ de eo feceras, cognitis. Ib. Fam. 13, 16, 1.—*Quum* omnia iudicia ex improborum injuriā *nata sunt* (= are born; owe their origin; 'nata' having the force of a predicate-adjective with a present), *tum* hoc iudicium paucis hinc annis propter hominum nimiam licentiam constitutum est. Ib. Tull. 4, 8.—Dicimus, C. Verrem, *quum* multa in deos hominesque nefarie *fecerit*, *tum* præterea quadringenties sestertium ex Sicilia contra leges abstulisse. Ib. Verr. 1, 18, 56.

2. RELATION OF A POSITIVE TO A COMPARATIVE OR SUPERLATIVE: *Quum* omnibus me virtutibus affectum esse *cupio*, *tum* nihil est quod maius quam me et esse *gratum* et vidēri. Cic. Planc. 33, 80.—*Quum* omnium rerum simulatio est *vitiōsa*, *tum* amicitiæ repugnat *maxime*. Ib. Am. 25, 92.—*Quum* plurimas et maximas commoditates amicitiæ *conferat*, *tum* illa nimis *præstat* omnibus quod bonam spem prædicet in posterum. Ib. 7, 23.—*Quum* tota philosophia frugifera sit, *tum* nullus *feracior* in eā locus est quam de officiis. Ib. Off. 3, 2.—Itaque *quum* cum antea tui *similem* *viderim*, *tum* vero nunc a doctissimo viro instructum multo *vidēbam* *similiorem*. Ib. Brut. 71, 250.—*Quum* auctoritas et dignitas Pisois *valēbat* plurimum, *tum* illa erat causa *justissima* quod eum sibi Achai patrōum adoptarant. Ib. Div. Cæc. 20, 65. [The connection of this passage shows, that a subjunctive (*valeret*) could not have been used without making the meaning of the clause ambiguous].

3. THE APODOSIS DENOTING AN ADDITIONAL FACT OF GREATER IMPORTANCE: *Quum* tuū et meū maxime *interest* te valere, *tum* multis est cura. Cic. Fam. 16, 4, 4.—Quæ *quum* res tota *ficta sit* pueriliter, *tum* ne efficit quidam quod vult. Ib. Fin. 1, 6, 19.—Quæ *quum* *abhorrent* a litteris et ab humanitate, *tum* vero contraria sunt imperio et dignitati. Ib. Qu. Fr. 1, 1, 12.—*Quum* hos sibi questus *constituisset* ex his causis quas ipse insituerat cum cohorte suā cognoscere, *tum* infinitum genus invenerat innumerabilem pecuniam corripendam. Ib. Verr. 2, 2, 11.—Hæc *quum* merito ejus fieri *intelligēbat*, *tum* magni interesse arbitrabatur, ejus auctoritatem inter suos quam plurimum valere. Cæs. B. G. 5, 4.—Hæc urbs *quum* manu munitissima *esset*, *tum* loci natura terrā ac mari claudēbatur. Cic. Verr. 2, 2, 2.—Scævola *quum* prædictus *esset* ad excogitandum, *tum* verbis erat ad rem cum summā brevitate mirabiliter aptus. Ib. Brut. 39, 145.

Obs. 4. If both the protasis and the apodosis have the same predicate, this common predicate may be repeated in both propositions (as in the examples quoted in the foot-note to Obs. 3, and in the passage Cic. Brut. 71, 250, quoted Obs. 3, No. 2); but it is frequently once omitted, either in the protasis, or in the apodosis. In either case, the common predicate, if expressed only once, is in the *indicative*, as: *Quum* omnium sociorum provinciarumque rationem diligenter habere *debētis*, *tum* præcipue Siciliae. Cic. Verr. 2, 2, 1.—Nam *mibi*, *quum* multa eximie divitiæque *videntur* Athēnæ tuæ peperisse, *tum* nihil melius illis mysteriis quibus ex agresti vitā exultā ad humanitatem sumus. Ib. Leg. 2, 14.—Hoc ego *quum* reipublicæ causā *censui*, *tum* imprimis retinendæ dignitatis tue. Ib. Fam. 12, 22.—Te *quum* semper valere *cupio*, *tum* certe *quum* hic sumus. Ib. 7, 4.—Id fœdum consilium *quum* incepto *tum* etiam exitu *fuit* (both in its beginning and its end: or as well at the beginning, as at the end). Liv. 26, 38.—Agostilius *quum* a ceteris scriptoribus, *tum* a Xenophonte *collaudatus est*. Nep. Ag. 1.—Multum, *quum* in omnibus rebus, *tum* in re militari, *potest* fortuna. Cæs. B. G. 6, 30.

Obs. 5. Not every *Quum*-clause used as a protasis with a following *tum*, can be considered as a *comparative* *Quum*-clause. Sometimes this form is applied to pure temporal clauses, and also to concessive *Quum*-clauses, when the mood of the *Quum*-clause follows the rules about that class of *Quum*-clauses to which it belongs. In such instances the adverb *tum*, opening the apodosis, is always *redundant*, being used only to mark more distinctly the beginning of the apodosis. 'Tum' must then be considered as a mere syntetic antecedent with an *inversion*, similar to that of relative clauses (see p. 505, Obs. 2); as: 1) TEMPORAL CLAUSES: *Quum* mihi *proposui* (see R. 34, Obs. 3) regnantem Lentulum..., *tum* lamentationem matrum familias... perhorresco. Cic. Cat. 4, 6, 12.—Qui

*quum* illi breviter *respondissent*... (see R. 35, Obs. 14), *tum* ille subito, scelere demens, quanta conscientie vis *esset*, ostendit. Ib. 3, 5, 11.—*Quum* ego ei *gratulatus essem*, idque me gaudere *dixissem*..., *tum* a me discessit in oppidum Cybistra. Ib. Fam. 15, 2, 5.—*Quum* *gratulus* (R. 35, Obs. 3), *tum* vero quibus verbis tibi gratias agam, non reperio. Ib. 2, 9, 1.—2) CONCESSIVE CLAUSES: Hujus facultas, *quum* facile omnis *vincat* superiores, *tum* indicat tamen quantum absit a summo. Ib. Brut. 64, 228.—Itaque *quum* *esset constitutum* id solum esse bonum quod *esset* honestum, *tum* inter illa quæ nihil valerent ad beate vivendum, aliquid tamen quod differret esse voluerunt. Ib. Fin. 3, 15, 50.

Rem. 41. Sometimes *Quum*-clauses have the force of hypothetical *Si*-clauses, contrary to reality, in which instance they require their predicates in the *subjunctive* imperfect or pluperfect, as:

Quod *esset* iudicium, *quum* ex Verris turpissimo comitatu tres recuperatorum nomine *associassent*? What kind of trial would it be, if three persons from Verres's disgraceful band would have been sitting under the name of triers? Cic. Verr. 2, 3, 12.—Mors *quum* *constitisset* invidiam, res ejus gesta sempiterni nominis gloriam *intererat*: if death had appeared animosity etc. Ib. Balb. 6, 16. Quæ ex populo, *quum* Scævolam dicentem *audiret* in eā causā, quicquam politius aut elegantius *expectaret*? Ib. Brut. 55, 194.—In hac enim causā, *quum* *viderent* illos amplissimam pecuniam possidere, hunc in summā mendicitate esse, illud quidem non *quererent*, 'cui bono fuisset'. Ib. R. A. 31, 86.—Optior, *quum* hæc *fierent*, *tum* vos *audiretis*, *tum* causa agi vere *videretur*. Ib. Verr. 2, 1, 10. Comp. the interesting long passage Ib. § 28.—Sometimes *quum*, in this hypothetical meaning, takes its predicate in the *perfect indicative*, if the hypothetical *si* would likewise have taken the indicative (see CONDIT. CLAUSES), as: Tum *potuit* a Leonidæ nummorum aliquid *auferre* *quum* *denuntiavit* ut adesset; He *might have made* some money out of Leonidas, if he had ordered him to be present. Cic. Verr. 2, 5, 5.

## II. TEMPORAL CLAUSES WITH *postquam* AND ITS SYNONYMS.

§ 620. Temporal clauses introduced by *postquam* (*posteaquam*), *ubi*, *ut*, *simul* (*simulac*, *simulatque*), and *quando* have their predicates in the *INDICATIVE*.

Obs. 1. The above-mentioned temporal conjunctions have their predicates in the *indicative*, unless the subjunctive is required by the subtility of the clause, or by attraction, as: *Constānt* eos, *postquam* Tyrum *evissent*, *tum* lamentari *cepisse*. Cic. Tusc. 3, 27.—Nimī habēbam novi quod *post* *accidisset* *quum* *dissem* ad te Philodemum litteras. Ib. Att. 6, 3.—Varroni litteræ redduntur, *simulatque* sit *cognitum* de edicto Cæsaris, *consensisse* Gaditānos principes ut etc. Cæs. B. C. 2, 20.—With *postquam*, however, sometimes the subjunctive occurs, when it is used with the force of *quum* with the force of a condition, as will appear from the following passages, in all of which the readings of the codices are uniform, although the editors have everywhere changed the text by arbitrary conjectures: *Matridates, postquam* *maximas adificasset* *ornassetque* *causas*, *exercitusque* *permagis comparasset*, et se Bosphorūis bellum inferre *simularet*, usque in Hispaniam legatos ac litteras *misit*. Cic. L. M. 4 (the editors, against the uniform reading of the codices, giving *postea quum*).—*Postquam* illa aboucturam se filiam *monstravit*, maderi servum ad supplicium dedit (some editors giving *postea quum* against all the codices). Ib. Clu. 64, 181.—*Postquam* mihi nihil de adventu tuo *scriberetur*, verēbar ne ante quam tu in provinciam venisses, ego de provinciā decederem (most of the editors giving *postea quum* against the manuscripts). Ib. Fam. 2, 19, 1.—*Postquam* mihi litteræ a Balbo *missæ essent*, illum existimare etc., tamen nihilominus his verbis ad Cæsarem scripsi (the vulgar reading being *postea quum*, against all the codices). Ib. Att. 11, 12, 1.—*Postquam* sumptuosa fieri funera *cepissent*, Solonis lege sublata sunt (most editors having *postea quum* against the codices). Ib. Leg. 2, 25.—Quæ *postquam* *sunt audita*, et undique primores patrum priōris anni consules *increpant*, quod etc., tum T. Quinctius ait etc. (where 'increpant' is pronounced a blunder of Livy, by Madvig, while Alschefsky simply changes 'et undique' into 'quum undique'). Liv. 4, 13, 10.—Cæli, *postquam* suas terras sedem belli esse *viderent*, *vertērunt* ad Hannibalem ab Romanis *occi* (where Alschefsky changes 'viderent' into 'vidēre', although Livy never uses an historical infinitive after *postquam*). Liv. 22, 1.—Sane præbuerant Judæi *speciem* motus, orā *seditione* *postquam* C. Cæsari *hand obtemperatum esset*. Tac. Ann. 12, 54 (where the editors say that the very plain passage has been corrupted, without suggesting anything to get rid of the subjunctive after 'postquam').—These passages prove to evidence that *postquam* sometimes, though rarely, is construed with the *subjunctive*.

Obs. 2. The clauses dependent on *postquam* and *simulac* (*simulacque*), from a strictly grammatical standpoint, must be considered as *comparative clauses* (*post* and *postea* *quam* = later than; *simulac* or *atque* = at the same time as). Hence these conjunctions are sometimes separated into their elements by inserting one or more words (*postea vero quam*; *multis post annis quam* etc.; see the examples below).—The clauses introduced by the conjunctions enumerated above are only used as *adverbial clauses*, except those introduced by *postquam*, which sometimes occur as *attributive clauses*, dependent on nouns denoting time (p. 232, foll.). Such clauses have three forms: 1) with the governing noun in the ablative (rarely the accusative) of time, as: *Anno postquam vota erat ades Monetae*, dedicatur. Liv. 7, 28.—*Undecimo die postquam a te discesseram* hoc litterarum exaravi. Cic. Att. 12, 1.—*Profectus decimo post die quam exercitum acceperat*. Liv. 42, 2.—2) *Post* is connected as a preposition with the governing noun (always with ordinals): *Post diem XL et VI quam a vobis discesserant*. Cic. Fam. 16, 21, 1.—*Post diem tertium gesta res est quam dixerat*. Ib. Mil. 16.—3) *Post* may be elliptically omitted, if the governing noun is in the ablative, or is connected with the preposition *intra*: *Quadragesimo anno quam urbs Romana condita erat, quinto trecesimo quam a Gallis reciperata*, patricii consules ambo ex interregno magistratum iniere. Liv. 7, 18.—*Consul milites duarum legionum intra dies sexaginta quam in provinciam venit*, dimisit. Ib. 43, 9.—The tense in these attributive clauses is regularly the *pluperfect*; but sometimes the predicate is in the *perfect*, as in the last passage. Thus: *Centum et octo annis postquam* Lycurgus leges scribere instituit, prima posita est Olympias. Cic. Rep. 2, 10, 18.

Rem. 42. Clauses with *postquam* are generally dependent on *PRETERITE* predicates, in which instance *postquam* has 1) the meaning of the English conjunctions 'after' or 'when' (as soon as); 2) the meaning of the relative expression *ex quo* (tempore), = 'from' or 'since the time that', 'ever since'. More rarely, *postquam* is dependent on *NON-PRETERITE* predicates (Obs. 7-11).—The predicates of *Postquam*-clauses are either in the *PERFECT*, *PLUPERFECT*, *IMPERFECT*, or *PRESENT*, but neither in the future-present, nor in the future-perfect\*. For the use of *Postquam*-clauses referring to *indefinite* time see Obs. 10.

#### 1. POSTQUAM, in the meaning 'after' (when), dependent on Preterites.

Obs. 1. Clauses with *postquam*, in the above meaning, are used: 1) to represent the two predicates as being merely in a *succession of time* without any other connection of the two actions; 2) to represent the main action as a *consequence* of the anterior action; 3) to denote an incident by which the logical subject of the principal sentence was *induced* or *determined* to perform the main action; 4) to represent an action which, according to the intention of the doer, *was to be performed before* the main action.

In all these instances, *postquam* is a synonym of *quum* with the *pluperfect subjunctive*, or of *ubi* and *ut* with the *perfect indicative*; but *not* of *quum* with an *imperfect subjunctive*, nor of *quum*, *ubi*, and *ut* with a *pluperfect* or *imperfect indicative*. The *TENSES* after *postquam* essentially preserve their peculiar force which they have in independent sentences according to the general rules. Hence we find after *postquam* not only the *historical present* (see Obs. 6), but also (in silver Latin) the *historical infinitive*. But the tenses after *quum*, *ubi*, and *ut* (aside from the *perfect indicative*), have mostly *conventional* significations.

Obs. 2. When, according to these principles, either *postquam* or *quum* (*ubi* etc.) might be employed, the language nevertheless prefers the use of *postquam* 1) to preserve the original and idiomatic force of certain tenses. This mostly refers to the use of the *imperfect* (Obs. 5), but also to the *perfect* and *pluperfect*, as for inst.: *Postquam* Manlius dixit, pecuniae summa homines movit. Liv. 22, 61. Here the *perfect indicative* *dixit* has the idiomatic negative meaning mentioned p. 303, Obs. 3 ('after Manlius had ceased to speak'), which would be effaced by '*quum dixisset*', as in the following passage, where the speaker did *not* cease to speak: *Hae quum dixisset*, iuravit se nisi victorem in castra non reversurum. Cæs. B. C. 3, 87.—2) *Postquam* is used in preference both to *quum* and *ubi* (*ut*) if the action is *opposed* to other actions, belonging to a *previous time mentioned*

\* The English 'after' (when) with the future-perfect cannot be expressed by '*postquam*' with a Latin future-perfect. In this instance the English 'after' is generally expressed by *quum*, *ubi* or *simulac* with a future perfect (p. 254, Obs. 3). Sometimes, however, *postquam* is used in this sense with a *perfect*, as: *Postea vero quam profectus es* (not *eris*), velim recordere quae ego de te in senatu egerim (after you will have departed, I wish you would remember etc.). Cic. Fam. 5, 2, 4.

before. In this instance *postquam* has the meaning of '*sed postquam*', '*postquam vero*', (which forms are frequently employed), as: *Quamdiu* Caesaris consilia non maxime diligebatis, me quoque cum illo conjunctum videbatis; *posteaquam* (i. e. '*vero*') mentes vestras multastis, me comitem sententiae vestrae vidistis. Cic. Prov. Cons. 10.—*Postea vero quam equitatus noster in conspectum venit*, hostes terga verterunt. Cæs. B. G. 7, 37. Comp. Liv. 39, 12; 33, 18; 32, 22; 30, 18; 43, 18; 10, 21; 21, 33; 25, 25; Cæs. B. G. 7, 82; B. C. 3, 58; Cic. Fam. 3, 7, 5; ib. Rab. Post. 12, 23. and often.—3) If the English conjunction 'after' means 'later than', the clause must be introduced by *postquam*, and not by *ubi*, *ubi*, or *ut*. This is especially the case in answer to the question 'how much later?', as in the attributive clauses mentioned § 620, Obs. 2. In this construction *postquam* takes either a *pluperfect* or a *perfect*, as: *Legati Romam redeunt haud ita multo post quam consules in provinciam profecti erant*. Liv. 21, 20.—*Heri, non multo post quam tu a me discessisti*, subito quidam urbani ad me litteras attulerunt a C. Mario. Cic. Att. 12, 49.

Obs. 3. Aside from these points of difference, *Postquam*-clauses may be generally used in place of *Quum*-clauses with a *pluperfect subjunctive*, or in place of *Ubi*-clauses with a *perfect indicative*, and both forms are frequently found in very similar passages with exactly the same force, as: *Epaminondas quum gravi vulnere exanimari se videret*, quæsit salvasne esset clipeus. *Quum* salvum esse fientes sui respondissent, rogavit quæsitne fusi hostes. *Quumque* id quoque, ut cupiebat, audivisset, evelli jussit eam, qua erat transfixus, hastam. Cic. Fin. 2, 30, 97. Compare with: *Epaminondas tum denique sibi avelli jubet spiculum, posteaquam ei percontanti dictum est clipeum esse salvum*. Ib. Fam. 5, 12, 5; and: *Philopœmenem, accepto poculo, nihil aliud locutum ferunt quam quæsisse si incolumis Lycortas equitesque evasissent. Postquam dictum est incolumes esse, 'Bene habet', inquit, et poculo exhausto expiravit*. Liv. 39, 50.—*Eo postquam Cæsar pervenit*, obsides, arma poposcit. Cæs. B. G. 1, 27. Compare with: *Eo quum Cæsar venisset*, civitatibus milites imperat. Ib. 5, 1.—*Cæsar, ut Brundisium venit*, contionatus apud milites... II. Non. Jan. navis solvit. Ib. B. C. 3, 6.—*Hasdrubal, postquam perditas res ad Cissim accepit*, iter ad mare convertit. Liv. 21, 61.—*Quod ubi Hannibal accepit*, equitibus emissis in hostem eripit. Ib. 21, 59.—*Hannibal, quum recensuisset omnium gentium auxilia*, Gades profectus, Herculi vota exsolvit. Ib. 21, 21.—*Postquam illi iusta magnifice fecerant*, reguli in unum convenire. Sall. Jug. 11, 2. Frequently such equivalent temporal clauses are made dependent on each other, as: *Romana pubes, postquam serena lux rediit, ubi vacuum sedem vidit... moestum silentium obtinuit* (when, after the return of light, they saw his seat empty etc.). Liv. 1, 16.—In the following interesting passage, almost all forms of temporal clauses, including the participial and relative forms, are combined with each other: *Celtiberi, qui profecti erant a domo, dedicationis ignari, quum, tandem superatis, ubi primum imbres reniserunt, omnibus. Contentionem renissent, postquam castra nulla viderunt, aut in alteram partem translata rati, aut recessisse hostis, per negligentiam effusi, ad oppidum accesserunt*. Liv. 40, 33.

Obs. 4. In the four descriptions of *Postquam*-clauses, enumerated Obs. 1. the *perfect*, *pluperfect*, or *imperfect* may be used. The regular tense in the first three categories is the *perfect*, while in the clauses of the fourth category, either the *perfect* or the *pluperfect* is used. The *pluperfect* may, in the first category, be used in place of a *perfect*, in less the succession in time is to be represented as an immediate one. In the second and third categories the *pluperfect* is only used for particular reasons. (See No. C). The *IMPERFECT* has always an idiomatic meaning (Obs. 5).

A. MERE TEMPORAL SUCCESSION: 1) *PERFECTS*: *Postquam* tuas litteras legi, Postumia tua me convocat. Cic. Fam. 1, 2, 1.—*Postquam redire* in castra victores, omnes quidem laeti, ante alios Thebanum insolens letitia eminebat. Liv. 42, 60.—*Latinum postquam vocat*, instructam ei continuo tabernam dedit. Cic. Clu. 62, 178.—*Nam, ut ille Graechus auctor, posteaquam in istam provinciam venit* (or *venerat*), recordatus est, quid sibi in Campo Martio accidisset, sic tu mihi videtur etc. Ib. Qu. Fr. 2, 2, 1.—*Pleminius, quique in eadem causa erant, postquam Romam est ventum*, ex templo in carcerem conditi. Liv. 29, 22. 2) *PLUPERFECTS*: *Æqui, postquam fetiales venerant res repetitum, temptationem ajebant* esse, ut terrere incusso belli. Romanos se fieri paterentur etc. Liv. 9, 45.—*Tum, quum P. Africanus, posteaquam his consul et censor fuerat*, L. Cottam in iudicium vocabat. Cic. Div. Cæc. 21. See Sall. Jug. 11, 2. quoted Obs. 3.

B. TEMPORAL SUCCESSION WITH CONSEQUENCE; *PERFECTS*: *Postquam vineas agi turrisque excitari viderunt, victa pertinacia est*; After they saw that works etc. were erected by the erection of the works, in consequence of the erection etc. their obstinacy was broken. Liv. 43, 18.—*Postea vero quam et ei et ei quædam maxima imperia, parem vobis me speravi esse factum*; But after obtaining and holding the very highest offices, I hoped to have become your equal i. e. in consequence of my holding, by my holding. Cic. Fam. 3, 7, 5.—*Postea vero quam in Asia Cyrus, in Grecia Lacedæmonii capere urbis subigere* (after they began to conquer, i. e. in consequence of their conquering), tum demum

comperitum est, in bello plurimum ingenium posse. Sall. Cat. 2. 2.—Hispana, *postquam* lictiores in vestibulo, et consulum ipsum *conspexit*, prope *exanimata est*. Ib. 39, 12.—Macedones... moveri nequiverunt; *postquam* levo latere nudato *circumagere* hastas in venientem hostem *constiti sunt*, turbati extemplo... terga vertunt. Ib. 33, 18.—*Postquam* audita vox in foro est praecōis, velut nova res mirabundam plebem *convertit* quidnam incidisset. Ib. 3, 38.—Antiochus quum, *posteaquam* a L. Scipione devictus, Tauro t-nus regnare *jussus est*, omnem hanc Asiam amisisset; When Antiochus, after being directed by Scipio (*i. e.* in consequence of Scipio's order) to reign as far as Mount Taurus, had lost all this Asia. Cic. Dej. 13.—*Crete* negligentia, *postquam* neminem armatum in muris *viderunt*. Ib. 43, 9.—Dum longius aberant Galli, plus multitudine telorum profectibant; *posteaquam* propius successerunt, aut se stimulis *induebant*, aut etc. Cæs. B. G. 7. 82.

1) PERFECTS : *Postquam comperit transitum eā non esse, castra quam extensissimā post valle locat.* Liv. 21, 32.—*Marcellus, postquam id inceptum irritum fuit, signa ad Euryalum referri iussit.* Ib. 25, 25.—*Hasdrubal, postquam animadvertit, exiguum Romānum exercitum in castris esse, paciscitur cum Celeriborū principibus ut copias inde adducant.* Ib. 25, 33.—*Hanc phalangem Hippas et Leonnatus raptim adduxerant, postquam prospere pugnasse equitem acceperunt.* Ib. 42, 59 (see p. 346, Obs. 3).—*Hannibal, postquam cohortis stragem vidit, recipere signa capit.* Ib. 26, 6. Comp. Cæs. B. G. 7, 58; Liv. 10, 29; 21, 33; 32, 30; Cic. Clu. 63, 177; Rep. 2, 31.—2) PLUPERFECTS are sometimes used in clauses of this kind (a) if the predicate denotes an action indefinitely-repeated before the main action, as: *Qui, postquam alia frustra temptata erant, eam actionem suscepērunt quia etc.* Liv. 10, 6.—*Postquam nulla occasio pugnandi contigerat* (implying several attempts being made in vain), *castra movit.* Ib. 24, 36.—*Hanc virginem Appius pretio pellicere adortus, postquam omnia pudore septa animadverterat* (he had seen by repeated attempts etc.), *ad crudēlem vim animum convertit.* Ib. 3, 44.—This pluperfect of repeated action is generally chosen instead of an imperfect of repeated action (see Obs. 5), if the main action is conceived to be separated by a period of time from the anterior action. b) If the action of the clause had already been stated before, and is mentioned again as occasioning another action, as: *Metapontin. postquam (Fabius) ad constitutum non venerat diem, remissi ut cunctantem hortarentur.* Liv. 27, 26 (the fact that Fabius would not come having been stated before).—*Philippus quoque, primo vere, postquam legati ab Romā nihil pacātū retulerant* (which fact has been repeatedly mentioned before), *dilectum per omnia oppida habere instituit.* Liv. 33, 3.—*Paucos ante dies Perseus, postquam legati ab Romā regressi praeviderant spem pacis, consilium habuit.* Ib. 42, 50.—*Postquam pars maior exercitus emissā erat, jam ne eis quidem quae ultro dicta erant, stabatur.* Ib. 26, 17. Comp. Ib. 108. Sall. Jug. 97.

D. THE MAIN ACTION DEPENDING ON THE PREVIOUS PERFORMANCE OF THE ACTION IN THE CLAUSE; 1) PERFECTS: *Postquam* (as soon as) assuetudine quotidiana satis intrepide fieri *cisum est*, adversus instructos Campanorum equites processerunt. Liv. 26, 4.—*Posteaquam* (as soon as) satis calere res Rubrio *visa est*, 'Queso', inquit, 'Philodame etc.' Cic. Verr. 2, 1, 26.—Itaque Hannibal, *postquam* ipsi sententia *stetit* Italiam petere (as soon as his resolution of invading Italy was settled), advocata contigine varie militum verat animum. Liv. 21, 30.—2) PLUPERFECTS: *Postquam* omnium animos oculosque occupaverat certamen, tum arreptis scutis adversam adiunxit Romanam aciem. Liv. 22, 48.—*Posteaquam* tantam multitudinem *collegerat* emblematum ut ne unum quidem equum reliquisset, instituit officinam Syracusis in regia. Cic. Verr. 2, 4, 24.—Ceterum *postquam* jam ad signa *pervenerat* Hispanorum, tum undique in eum tragulae conjectae ('after he had already come'; *é. e.* 'not before he had reached the line', the enemy waiting with the hurling of the missiles till he had come up to the line). Liv. 26, 5.—In all these sentences, the two propositions do not merely denote a succession in time; nor is the principal action a mere *consequence* of the action in the clause; nor is the will of the principal subject determined by it. But in all the passages quoted, the doers are waiting for a certain issue, indicated by the predicate of the clause, to perform the main action. In such constructions both a perfect and a pluperfect may be used, and even an *imperfect*, if the other requirements of this tense are satisfied (Obs. 5, 3).

Obs. 5. The IMPERFECT is very rarely used in Postquam-clauses to denote a mere *succession of time*\*, but it frequently occurs in clauses belonging to the last three categories, mentioned Obs. 1. Hence such clauses are to the main action almost always in a relation resembling *cause*. The imperfect is used in Postquam-clauses if the action of the clause, *expressed as an independent sentence*, would require or admit the imperfect tense according to the different rules on the use of this tense (p. 305 foll.). Such imper-

\* An example of such a construction occurs in Liv. 10, 24: *Fuit contentio in senātu, et postquam ibi Fabius plus poterat, revocata res ad populum est* (= Fabius carried his point in the Senate, whereupon the matter was referred to the people).

fects mostly correspond to the imperfects of state, of continuing, or repeated action, but also to the different idiomatic imperfects, especially the imperfect of inner action (p. 236), and the imperfect of unsuccessful attempt (p. 309). Hence frequently perfects and imperfects (and sometimes also pluperfects) will be equally correct in the same sentence. Postquam-clauses with imperfects generally require a change of expression in English, and since they always express a relation resembling *cause*, the conjunction *postquam* must frequently be rendered by the causal conjunction 'since'. Very frequently the imperfect is used in Postquam-clauses if the action is negative, the negation implying that the action was not performed at any of the different time-points up to the beginning of the principal action, denoting a CONTINUED 'NON-ACTION'. Hence almost every Postquam-clause with a negative predicate *may* take its predicate in the *imperfect*.

EXAMPLES. 1. ACTIONS OF CATEGORY B: Minus tamen plebs gravabatur se templa deorum exedificare manibus suis, quam *postquam* et ad alia opera *traducebantur* (IMP. OF REPEATED ACTION); they were dissatisfied *after* being transferred to other works, i. e. *in consequence of* (by) their being transferred. Liv. 1, 56.—Omni undique frumento, *postquam* ager parum tutus erat, in urbis munias convecto; All grain having been conveyed to the fortified cities when the open country afforded too little protection (i. e. in consequence of the unsafe state of the country: IMP. OF STATE). Ib. 22, 40.—Sed in tumultus momento temporis, *postquam* liberata itinera fugi montanorum erant, sedantur; This disorder was quelled in a moment, *after* (i. e. in consequence of) the roads were free (*were set free, were in a state of freedom*; PERIPHRASTIC IMP. OF STATE) by the flight of the mountaineers). Ib. 21, 33.—(Jugurthæ legati) *postquam* Romam *adventabant* (when they were on the point of arriving, p. 309, Obs. 1, 2), senatus a Bestiâ consulens est, placeretne Jugurthæ legatos recipi. Sall. Jug. 28, 2.—Sed *postquam*, dilapsa tempore, comitiūm dies *adventabat* (when the day of the election approached), Albinus Romam dece-sit. Ib. 37, 4.—*Postquam* tres imperatores cum tribus justis exercitiis *ade-rant* (since three generals were present; IMPERF. OF STATE, p. 306, R. 50), apparēbat parum ad tuendum locum validos esse. Liv. 25, 33.—*Postquam* dies comitiūm *aderal* (when election day had come). Cn. Fulvius exulatum Tarquinios abiit. Ib. 26, 3 [Compare: *Ubi illa dies venit* etc. Cæs. B. G. 1, 8. *Quam* is dies *venisset* etc. Cic. Phil. 5, 7, 20].—*Quærebant* auctorem repentinæ lætitiæ. Qui *postquam* nullus *aderal* (since there was none), evanuit gaudium. Ib. 45, 1.

[illegible]

3. ACTIONS BELONGING TO CATEGORY D.—*Postquam* in potestate Argivorum civitas erat ('as soon as' the city was in the power etc., IMP. OF STATE), tyrannus legatos Elatium mittit, qui nuntiarent etc. Liv. 32. 39.—Himilco *postquam* (as soon as) ab Hippocrate occupata Syracusae erant (PERIPH. IMPERF. OF STATE), profectus Carthaginiem (Having

proceeded to Carthage as soon as Syracuse was occupied etc.), facile perpulerat etc. Ib. 24, 35.—*Postquam* portam *tenēbant*, cornicines canere jubent. Ib. 24, 46.—*Postquam* lux clarior erat, et Romani in arcem confugerant, conticiscere paulatim tumultus, tum Hannibal Tarentinos convocare jubet. Ib. 25, 10.—*Postquam* satis virum collectum ad omnis consatus videbat, tum ex suis unum sciscitatum Romam ad patrem mittit etc. Ib. 1, 54.—*Postquam* structi utrimque stabant, cum paucis procerum in medium duces procedunt. Ib. 1, 23.—Tum Jugurtha, *postquam* omnis Numidiae potiebatur (=possidēbat), in otio facinus suum cum animo reputans, timere populum Romanum. Sall. Jug. 13.

Obs. 6. Sometimes (mostly in Sallust) in *Postquam*-clauses a historical present is used with the force of a perfect, in the meanings mentioned above, as: Ei, *postquam* murum arietibus ferri vident, aurum atque argentum domum regiam comportant. Sall. Jug. 76.—*Postquam* fusas copias videt Catilina, in confertissimos hostis incurrit. Ib. Cat. 60. Comp. Ib. 40, 3; Ib. Jug. 86.—Abeo ab illis, *postquam* video me sic ludificari. Plaut. Capt. 3, 1, 27.—*Postquam* nihil fit, clamore hominem posco. Ib. Curc. 5, 3, 5.—*Postquam* video nescio quid suspicari, magis coepi instare ut dicat. Ter. Hec. 5, 3, 28.

## 2. *Postquam*, = *ex quo* (tempore).

Obs. 7. Sometimes *postquam* is used in the meaning *ex quo tempore*, according to the signification of this relative phrase, explained p. 326, d. and p. 319, Obs. 4. It is generally thus used when the principal predicate is *non-præterite*, but also (more rarely) when it is *præterite*. The predicate of such a clause denotes either the *initial point* of a period during which the principal action is said to continue, or the *period itself*, 'since the beginning of which' the principal action is represented to continue. In both instances the period must be such as to last up to the time spoken of.

1. If the *Postquam*-clause refers to a period lasting up to the time of the speaker, *postquam* is rendered by (*ever*) *since*, or, with a negation, by '*never since*'. The principal predicate is generally in the perfect, with the force of an English *present-perfect*, but also in the present. In the former instance the predicate of the clause is either in the perfect, or in the pluperfect: in the latter instance it is only in the perfect, as: *Postquam* de meo cursu reipublicæ sum voce revocatus, nunquam per M. Antonium quies fuit: Antonius has *never* given me any rest *since* I was recalled from my career by the voice of the republic *literally*: Since I have been recalled, I never have been quiet through Antonius. Cic. Fam. 10, 1, 1.—Fancem fuisse suspicor matrem mihi, nam *postquam* natus sum, satur nunquam fui. Plaut. Stich. 2, 1, 1.—*Postquam* scitatus vobis negotium dederat ut curarem ne quid reipublicæ detrimentum caperet, *postquam* majore in periculo civitas fuit. Cic. Fam. 16, 1, 3.—Qui *postquam* adulter non dat in tri flato uxorem suam, nunquam cuiquam nostrum verbum fecit. Ter. Andr. 1, 2, 6.—Quid *postquam* es designatus, multo salubius negligentius? Why do you salute much more negligently *ever since* you were elected referring to Cato's election as tribune? Cic. Mur. 36, 77.

2. If the *Postquam*-clause refers to a period anterior to the time of the speaker, the principal predicate is, of course, always in a *præterite* tense, the predicate of the clause being generally in the *perfect*, but sometimes in the *perfect*. *Postquam*, in this instance, is either rendered by '*ever since*', or by '*after*' or '*from the time that*', 'since the time that', as: Nec tamen ex clades *postquam* (Romani) ut pacis tanquam in otio apud Romanos fieret, neque ante consulis adventum, *postquam* is *redidit* *renewed* *que* memoriam acceptæ cladis (nor after his return; or 'from the time he returned and renewed etc.'). Liv. 22, 61.—L. Cincius Alimentus scribit, ex ipso audire, Hannibalem *postquam* Rhodanum transierit triginta VI. millia hominum amisisse (that Hannibal from the time he crossed the Rhodanus to his arrival in Italy lost 36,000 men). Ib. 21, 38.—Cunctatio Fabii *contempta* erat, utique *postquam* absente eo temeritate magistri prospero eventu *postquam* fuerat: After (since the time that) a battle was gained in his absence etc. Ib. 22, 23.—Hi homines, et quum in civitatibus suis vixerant, et *postquam* eos ex variis causis fortiter similis *postquam* erat, per introcunia *postquam* vitam. Ib. 26, 40.—Albius, *postquam* de rebus non erat provinciam, idemque multos stativis *postquam* habebat. Sall. Jug. 44.—Mercurius, Romanus *postquam* hoc assumis annis *postquam* pater patribusque, *postquam* *postquam* decesserit, ever since envy had abated, juxta carus. Ib. 88.

Obs. 8. If the predicate of *postquam* refers to a whole period, and not merely to its initial point, *postquam* is a synonym of *domi*, *quod* and *quandis*, being rendered by '*as long as*'. The principal predicate is generally a present, but may be a perfect with the force of an English *present-perfect*, the predicate of the clause being always a *present*, which is rendered by an English *present-perfect*, as: Plane relegatus mihi videor. *postquam* in Formiano sum (as long as I have been in my Formianum). Cic. Att. 2, 11, 1. Totum est aliud *postquam* sum a te disjunctus. Ib. 13, 11, 1.—Quod mihi nunc denique apparuit, *postquam* et ipsa (porticus) tota patet, et columnæ *postquam* sunt (periphr. present). Ib. Qu. Fr. 3, 1, 1.—Quian' tibi unquam quidquam, *postquam* tuus sum (as long as I have been your property), verborum dedi? Plaut. Most. 4, 2, 22.—Suspecta majoribus

nostris fuisse ingenia servorum, etiam quum in domibus eisdem nascerentur: *postquam* vero nationes in familiis habemus, colluviem istam non nisi metu coërcueris. Tac. 15, 44.

Obs. 9. In place of *Postquam*-clauses with the meaning '*ex quo tempore*' (*ever since*), frequently reversed participial phrases dependent on *post* are employed (s. p. 198, Obs. 1), as: Hoc crimen *post* iudicia de pecuniis repetundis constituta, gravissimum est (*ever since* trials were established etc.). Cic. Verr. 2, 3, 56.—Verres *post* imperium constitutum prius imperavit, ut is cum pecuniis tractaret quam ipse profecisset. Ib. 2, 5, 24.—Illa crux sola *post* emulatum Messiam illo in loco fixa est. Ib. 2, 5, 66.

## 3. Exceptional usages of *postquam*.

Obs. 10. Rarely *postquam*, not having the meaning '*ex quo tempore*', is made dependent on *non-præterite* predicates, or refers to *INDEFINITE* time. 1. Sometimes a *Postquam*-clause, dependent on a *non-præterite*, takes a predicate in the *perfect*, with the meaning of an English *present-perfect*, approaching the idea of *CAUSE*, or of *ADVERBATIVE* cause (concession), as: Cujus (Dejotari) quidem hoc præclarissimum est, quod *postquam* a Cæsare tetrarchiæ regno, pecuniâ mulctatus est, negat se tamen eorum auspiciis quæ sibi ad Pompæjum proficiscenti secunda evenerint, poenitere: after Dejotarus has been punished (i. e., in spite of his punishment), he yet says that he does not regret etc. Cic. Div. 1, 15.—*Postquam* poeta sensit scripturam suam ab infiquis observari, indicio de se ipse erit: The poet, after perceiving (i. e., since he has noticed) that his works are being commented upon etc., will bear testimony in his own behalf. Ter. Ad. Prol. 1.—2. Sometimes *postquam* in this sense is used with a predicate in the *present*, pregnantly including a *present-perfect*, as: *Postquam* nec ab Romanis vobis ulla spes est, nec vestra jam arma vos satis defendunt, pacem affero ad vos (= after it has become plain that you cannot place any hope on the Romans etc., i. e. *since* there is no more hope). Liv. 21, 13.—Peculiar is the use of an epistolary imperfect in this latter sense: *Postquam* et Pompæji commoratio diuturnior erat quam putaram, et mea quærenda tibi non ignota dubitatio aut impediri profectioem meam videbatur, aut certe imitatrix, dicendi copiam consecuta est, tum ingenio freta pervertere urbis... assuevit (= solet). Cic. Inv. 1, 2, 3.—Scio ego, piosque non isdem artibus imperium a vobis petere, et *postquam* adepti sunt, gerere. Sall. Jug. 85.—Sometimes both the principal and the dependent predicates correspond to English *present-perfects*: Atque ego scio qui, *postquam* consules facti sunt, acta majorum, et Græcorum militaria præcepta legere cœperint. Sall. Jug. 85, 12.

Obs. 11. Rarely *postquam* occurs with *present* predicates: 1) in the adversative meaning '*whereas*', '*while*': Equidem etiam curiam nostram—Hostilium dico, non hanc, que minor mihi esse videtur, *postquam* est major (while, whereas, although it actually is larger)—solēbam intuenti Scipionem cogitare etc. Cic. Fin. 5, 1, 2.—2) In the combination *nunc postquam* with the force of *nunc quum* (p. 647, Obs. 3): *Nunc postquam* multo majorem partem inieris emensam cernant, in ipsa portis hostium fatigatos subsistere (dixit). Liv. 22, 24.—Si qua mihi obigerit hereditas, *nunc postquam* scio, dulces atque amaram quid sit ex pecuniâ. Plaut. Truc. 2, 3, 24.

## 4. *Ubi*, *ut*, *simulac*, *quando*.

Rem. 43. The usual method of expressing the immediate temporal succession of two acts (in English designated by '*when*' or '*after*') is by clauses with *ubi* or *ut*, with predicates in the *perfect indicative*. The immediateness of succession is more strongly expressed by *quum primum*, *ubi primum*, *ut primum*, or by *simul* (*simulac*, *simulatque*, *simul ut*; sometimes *simul et*) with a *perfect indicative*.

Obs. 1. These clauses are used only if the action is conceived as not extending over a period, and as *complete* at the time of the principal action. They may frequently be rendered by an English participial construction after '*apud*', or by clauses with '*as*', as: Caesar, *ubi* ex captivis cognovit quo in loco hostes condisissent, de tercia vigilia ad hostis contendit. Cæs. B. G. 5, 9.—Qui *ut* peroravit, surrexit Clodius. Cic. Qu. Fr. 2, 3, 2. Consul, *ubi primum* ex hostium agro cœdit, exercitum dimisit. Liv. 39, 20.—*Simul* conspecta sunt Romana signa, exemplo a primo Samnitium agmine ad novissimum fremitus perterriti. Ib. 10, 35.—L. Clodius, *simulatque* introductus est, rem comiecit. Cic. Clu. 14.—*Simulac* procul conspexit amatos, recessit. Ib. Cæs. 16.—*Simul ut* accipi a Seleuco litteras suas, statim quæsi. Ib. Fam. 6, 19.—Sometimes these clauses take, like *Postquam*-clauses, a *HISTORICAL PRESENT*, as: *Ubi* neutri transeundi initium faciunt, Cæsar suos in castra reduxit. Cæs. B. G. 2, 9.

Obs. 2. When clauses introduced by *ubi*, *ut*, or *simulac* take their predicates in the imperfect or pluperfect, they generally refer to indefinite time, or to actions indefinitely repeated, as Post, *ubi* pericula virtute propulerant, sociis atque amicis auxilia portabant (*whenever* they had averted dangers, they would carry help to their allies). Sall. Cat. 6. See p. 329 foll. For this purpose *Postquam*-clauses cannot be used. Sometimes, (but rarely) the historians use *ubi* and *ut* with *imperfects* if they refer to definite time, according to the same distinctions as with *postquam*, as: Consul, *ubi* ne paucos quidem qui primâ luce obambulaverant, parte ullâ cernebat, inferri signa jussit. Liv. 27, 42.—*Ubi* nemo obvius erat, pleno gradu ad castra hostium tendunt. Ib. 9, 45.—*Ubi* ea dies adventi, et Amyndari in finibus erat, quatuor simul locis Macedonum præidia expulsa. Ib. 38, 1.—Fabiî oratio fuit qualis biennio ante; deinde, *ut vinceretur* consensu, versa ad P. Decium colligam poscendum. Ib. 10, 22.—Deinde, *ut* nullâ vi perculos sustinere poterat, 'Quid ultra moror', inquit etc. Ib. 10, 28.—Marcellus, *ut* tanta vis ingruerat mali, traduxerat in urbem suos. Ib. 25, 26.—Still more rarely these conjunctions are construed with *pluperfects*, so as to refer to definite time and single actions, as: *Ut* ad mare nostræ cohortes excubuerant, accessere subito primâ luce Pompejani. Cæs. B. C. 3, 63.—*Ubi* ad pecuniæ mentionem ventum erat, ibi hæsitabat. Liv. 44, 25.

Obs. 3. *Ubi, ut, simul, simul ut* etc. are also used if the principal predicate is *non-preterite*, which is rarely the case with *postquam*. The principal predicate is in the *PRESENT* only if they refer to *INDEFINITE* time, in which instance the predicate of the clause is either in the *present indicative*, or (according to p. 309, R. 43) in the *perfect indicative*, as: *Ado obcecat animos fortuna ubi vim suam ingentem infringi non vult.* Liv. 5, 37. — *Ubi salutato defluxit* (as soon as the calls *have ceased*), litteris me *involvo*. Cic. Fam. 9, 20, 3. — *Omne animal, simul ut ortum est*, et se ipsum, et omnis partis suas diligit. Ib. Fin. 2, 11. — *Simulatque increpuit suspicio tumultus, artes illico nostræ conticescunt.* Ib. Mur. 10. — If clauses of this kind designate a *definite* time, they always refer to the *future*, and, while their principal predicates are in the future, their own predicates (according to the rules p. 353 and 354) are either in the *future-present*, or *future-perfect*, as: *Simul et quid erit certi, scribam ad te.* Cic. Att. 2, 20, 2. — *Ego statim habebō quod scribam, simul ut* (others read *simul et*) *vid-ro* Curionem. Ib. 10, 4, 12. — If such clauses are subjunctive, the oblique governing clause (in the periphrastic infinitive of the future) being dependent on a preterite, their predicates, according to the general rule p. 453, are placed in the *pluperfect subjunctive* in place of a future-perfect, as: *Dixi, simulac timere desisses, similem te futurum tui.* Cic. Phil. 2, 24, 89.

Obs. 4. *Quando*, which originally is an interrogative, and also an indefinite temporal adverb, is sometimes (rarely) used as a temporal conjunction: 1) as a synonym with *quum* followed by a *perfect indicative*, as: Auctoritatem senatus existere sentio *tum quando* (= *tum quum*) Alexā mortuo legatos Tyrum *misimus*. Cic. Agr. 2, 16.—2) As a synonym of *postquam* with an *imperfect*: Consul trepidationem injiciendam ratus, *quando* vi pelli non poterant, equitibus immissis turbare prima signa hostium conatur, Liv. 7, 33.—3) with a *present, future-present, future-perfect, and imperfect*, as a synonym of *quum* (whenever), or of *ubi* (as soon as), as: *Quando esurio*, tum crepant intestina. Plaut. Men. 5, 5, 27.—At tu, *quando habebis*, tui dato. Ib. 3, 3, 23.—Opera reddetur, *quando* quid tibi erit subreptum. Ib. 4, 2, 106.—Qui non comparēbunt, *quando* quisque primum *inventus fuerit*, reddatur. Liv. 38, 11.—*Quando* pars major in eandem sententiam *ibat*, bellum erat consensus. Ib. 1, 22. Sometimes a perfect indicative is used after *quando* with the force of a future-perfect, as: Tu, *quando* Romanus salvus, ut spero, *venisti*, vidēbis omnia. Cic. Att. 6, 4, 2. For the use of *quando* as a causal conjunction see p. 687, Obs. 13.

### III. TEMPORAL CLAUSES WITH *antequam* AND *priusquam*.

§ 621. Clauses with *antequam* (*antēquā*) and *priusquam* take their predicates either in the *indicative* or in the *subjunctive*. Any tense may be used in them except the future-present and the pluperfect indicative. The imperfect indicative and the pluperfect subjunctive rarely occur.

Obs. 1. Clauses with *antequam* and *priusquam* are properly COMPARATIVE clauses, the same as Postquam-clauses, *antequam* and *priusquam* being = *ante* (prius)...*quam*, 'sooner', or 'earlier than', 'before the time that', 'before, as a conjunction'. Both *ante* and *prius* are frequently separated from *quam* by one or more words, and regularly so, if the principal sentence is *negative* (*non ante venit quam*; *neque prius destiterunt quam* etc.). Such a separation, however, neither affects the nature, nor the construction of the clause, although many grammarians take great pains to establish a difference between *antequam* and *ante quam*.

**OBS. 2.** Clauses with *antequam* (not those with *priusquam*) are (like Postquam-clauses) often used as ATTRIBUTE-CLAUSES, being dependent on ablatives of time. The principal predicate, in this instance, must be always in a preterite tense, the predicate of the clause being indiscriminately placed either in the perfect indicative or in the imperfect subjunctive, as: *Ducentis annis antequam Clusium oppugnarent, urbemque Romam caperent, in Italiam Galli transcendērunt.* Liv. 5. 33.—*Paucis ante diebus quam Syracusae caperetur, Otacilius in Africam transiit.* Ib. 25. 31.—*Vespaſianus natus est quinquentio antequam Augustus decederet.* Suet. Vesp. 2.—*Livius primus fabulam docuit anno ipso antequam natus est Ennius.* Cic. Brut. 18. 72.—*Mementi Catonem anno antequam est ipse antequam natus est Ennius,* Cic. Brut. 18. 72.—*Mementi Catonem anno antequam est ipse antequam natus est Ennius,* Cic. Brut. 18. 72.—*Mementi Catonem anno antequam est ipse antequam natus est Ennius,* Cic. Brut. 18. 72.—The pluperfect subjunctive occurs when the principal predicate is in the pluperfect; Stajenus biennio ante quam causam bonorum Sabinii recepiſset, sexcentis milibus nummum se judicii corruptum dixerat. Ib. Cln. 25. 68.—Mostly, however, clauses with *antequam*, and always those with *priusquam*, are ATTRIBUTIVE, i. e., immediately dependent on the principal predicate.

Obs. 3. Often in *Antequam*-clauses (which always include *Præquam*-clauses, unless the contrary is said) the choice of mood is *optional*, as it is frequently the case in clauses of any description which do not require a certain mood. In such instances the mood is often determined by particular aims of the author, connected with the general meaning of tense and mood, and often by a mere regard to rhetorical euphony. See below. There are, however, certain general principles by which the use of tense and mood in these clauses is determined, which mostly have been established by conventional usage. In all clauses falling under such conventional usage, deviations rarely occur. These rules are different according as the time of the clause is DEFINITE and CERTAIN, or INDEFINITE, and according as the principal sentence has a PRÆTERITE or a NON-PRÆTERITE predicate.

1. *Antequam*-clauses referring to Indefinite Time.

Obs. 4. The mood and tense of the predicate in Antequam-clauses referring to INDEFINITE time is either the *present subjunctive* or the *perfect indicative*, if the principal predicate is in the *present of indefinite time* \* (p. 298). Periods with Antequam-clauses are used in two meanings: 1) to state that the *principal sentence* is true *even if* the action of the clause has not taken place before (*antequam* having the force of a negative *postquam*); 2) to express that the action of the clause does *not* take place *unless* the principal action has taken place before. Thus the sentence 'We speak before learning grammar' may convey the meaning 'We are able to speak our language even before we have acquired (WITHOUT HAVING ACQUIRED) its grammar', falling under No. 1; or, 'We do not (at any day) study our grammar, UNLESS we have spoken before', falling under No. 2. If the clause is used in the former meaning it takes *either* the PERFECT INDICATIVE, or the PRESENT SUBJUNCTIVE. If it is used in the latter meaning, it takes the PRESENT SUBJUNCTIVE *only*. The perfect indicative has the nature of a *negative subjunctive* according to B. 43; the subjunctive present has the nature of a *negative subjunctive* according to the principle explained p. 543. Ex.: 1) BELONGING TO THE FIRST FORMULA WITH PERFECTS: Membris utimur priusquam didicimus cujus ea utilis causa habemus; we use our limbs *before we have learned* for what purpose we have them (= without knowing it might be '*priusquam sciamus*'). Cic. Fin. 3, 20, 66.—O inanes nostras contentiones, in medio spatio saepe franguntur, et ante obruuntur quam portum conspiciere potuerunt (not conspiciere possunt, nor conspiciunt). Ib. Or. 3, 2.—Itaque antea impicatur aliquo certo cursu vivendi quam potuit quod optimum esset judicare. Ib. Off. 1, 32, 117.—Ante occupatur animus ab iracundia quam providere ratio possit ne occuparetur. Ib. Qu. Fr. 1, 13.—Nec enim ille respirat antequam emersit, et catuli aequae caeci (sunt) priusquam discesserunt, ac si ita futuri semper essent. Ib. Fin. 4, 24, 65.—Providentia est per quam futurum aliquid videtur antequam factum est. Ib. Inv. 2, 53, 160. [The reading as it is given in our texts against the authority of the codices is '*factum sit*'. It is evident that the reading of the codices '*factum est*' must be restored.]—Si ante mors adventet quam Chaldaeorum promissa consecuti sumus. Ib. Tusc. 1, 40.—Rorarii dicti a rore; qui bellum committebant ante; quod ante rorat quam pluit (where *pluit* must be taken as a *perfect*, not as a *present*). Varr. L. L. 6, 3 (p. 92. Bip.).—2) FIRST FORMULA WITH SUBJUNCTIVE PRESENTS: Priusquam populus suffragium daret (which might be *init*), in incertum comitiorum eventum patres auctores sunt. Liv. 1, 17.—Maritimus hostis ante

\* *Antequam*-clauses referring to indefinite time are very rarely used if the principal predicate is a preterite.\* When they occur, they denote habitual or repeated action, the predicates being either in the imperfect subjunctive or in the pluperfect subjunctive, as : *Domitius* (subject infinitive with a preterite predicate) *priusquam* somni cupido *esset*, Sall. Cat. 13 — *Ita* *sepe* magna *adoles* *virtus*, *priusquam* reipublicæ prodesse *potuisset*, *extincta* *fuit*. Cic. Phil. 5, 17, 47.

adesse potest quam quisquam venturum esse queat (which might be *potuit*, which is not used for the sake of euphony on account of the preceding *potest*). Cic. Rep. 2, 3, 5.—*Ante videmus fulgurationem quam sonum audiamus* (which might be *audirunt*). Sen. Qu. N. 2, 12.—Qui servavit (de celo), non habitis comitiis, sed *priusquam habeantur* (or *habita sunt*) debet nuntiare. Cic. Phil. 2, 32.—3) SECOND FORMULA: Tragedians every day gradually raise their voices before they speak loudly (i. e. they do not speak loudly unless they have gradually raised their voices). Cic. Or. 1, 59, 251.—Medico diligenti *priusquam conetur* (not *conatus est*) ægro adhibere medicinam, consuetudo valentis cognoscenda est (i. e. Physicians ought not to give medicine, unless they know the constitution of the patient when in a healthy state). Ib. Or. 2, 44, 186.—Tempestat *minatur antequam surgat*, crepant ædificia *antequam corruant* (not *corruerunt*). Sen. Ep. 103.—In omnibus negotiis *priusquam aggrediare*, adhibenda est præparatio diligens (not *aggessus es*, from a double reason). Cic. Off. 1, 21.

## 2. ANTEQUAM referring to definite time, dependent on Non-preterites.

Obs. 5. The temporal relation of every clause is a double one, 1) in regard to the time of the principal predicate; 2) in regard to the time of the speaker. *Antequam*-clauses have the peculiarity that they *always* are FUTURE in regard to the principal predicate, but in regard to the speaker's time, they may be either future, or present, or past. If they are present or past, the two temporal relations of the clause are in conflict with each other, which accounts for the peculiar treatment of these clauses in regard to tense and mood. If the principal predicate is a NON-PRETERITE, the mood and tense of the predicate of the *Antequam*-clause is treated according to the following rules.

1. If the principal predicate is in the PRESENT, the predicate of the clause is either in the present subjunctive, or in the present indicative, as: Hic, *priusquam* peteret consilium, (insanvit); nunc quoque, consul, *priusquam* castra videat (before seeing the camp) aut hostem, *insanit*. Liv. 22, 39.—Omnia fecerit oportet, *priusquam* aliquid postulet. Cic. Phil. 7, 9, 26.—Mihi certum est, *antequam* ad meam defensionem venio, illius uti confessione. Ib. Cæs. 9, 24.—Placet enim Chrysippo quum interrogetur TRIA PAUCA SINT, ANNE MULTA aliquanto *prius quam* ad multa perveniat, quiescere (where the subjunctive may be taken as quasi-subjunctive). Ib. Ac. Pr. 2, 29, 93.

2. If the principal predicate is an actual (or virtual) FUTURE-PRESENT (including imperatives), the predicate of the clause is either in the PRESENT-INDICATIVE, or in the PRESENT-SUBJUNCTIVE, or in the FUTURE-PERFECT, but *not* in the FUTURE-PRESENT\*. The present indicative is generally used in clauses of this kind if the action of the clause is represented as *immediately* imminent, or as dependent on the will of the speaker; but sometimes, in this instance, the present *subjunctive* occurs, which is always used if the action of the clause is represented either as uncertain, or as an act prohibited by the will of the speaker unless the principal action takes place. The future-perfect is used: (a) If it is stated that the principal action is not to happen, unless the action of the clause has happened before. In this instance the principal sentence is always actually or virtually *negative*. (b) If the doer is represented as *not* to finish the action of the clause before the principal action will happen. In this instance the principal action is affirmative.

Ex.: DE. *Prius respondes quam rogo*. CH. *Prius tu emis quam vendo*. pater. Plaut. Merc. 2, 3, 118.—*Antequam* ad sententiam redeo, de me pauca dicam. Cic. Cat. 4, 10, 20.—*Antequam* pro L. Muræna dicere instituo, pro me ipso pauca dicam. Ib. Mur. 1.—Cui *priusquam* de ceteris rebus respondeo, de amicitia... pauca dicam. Ib. Phil. 2, 1, 3.—*Antequam* de incommodis Siciliæ dico, pauca mihi videntur esse de provincie dignitate dicenda (virtual future). Ib. Verr. 2, 1, 1.—Si quemquam nactus eris qui perferat, litteras *des* (virtual future) *antequam* discedimus. Ib. Att. 10, 15.—*Antequam* opprimat lux, majoraque

\* If the predicate occurs in the first person subjunctive of the third and fourth conjugations, its form is the same as that of the future-present. Such predicates must not be mistaken for futures. There is no passage extant, in classical language, with a future-present in those forms which are different from the present subjunctive.—In ante-classical and postclassical style, however, future-presents occasionally occur, referring both to definite and indefinite time: *Priusquam* istam pugnam pugnabo, dabo aliam pugnam. Plaut. Pseud. 1, 5, 110.—Boves *priusquam* in viam ages, pice liquidâ cornua infima unguito. Cato R. R. 72.—*Priusquam* messim facies, porcam præcidaneam fieri oportet. Ib. 134.—*Priusquam* porcum feminam immolabis, Jano struem commoveto. Ib.—Quia criminum invidia pro reo est, *priusquam* probabitur. Quint. 4, 3, 6.

† If the principal predicate is an epistolary perfect or imperfect, having the force of a present, the predicate of the clause is always in the imperfect subjunctive: *Priusquam* id scirem, nihil ausus sum sumere. Cic. Att. 11, 11, 2.

hostium agmina obsepiunt iter, per hos... *erumpamus* (virtual fut.). Liv. 22, 50.—*Sine, priusquam* compexum accipias, sciam (virt. fut.) ad hostem, an ad filium venerim. Ib. 2, 40.—Multa sunt que mihi, *antequam* de causâ dico, de communibus periculis dicenda esse videantur. Cic. Cat. 3, 8.—Dabo operam ut istuc *veniam* (virt. fut.) *antequam* plane ex animo tuo effluo. Ib. Fam. 7, 14, 1.—*Namquam* eris dives *antequam* tibi ex tuis possessionibus tantum reficiatur ut eo tuâri sex legiones possis. Ib. Par. 6, 1.—Is videlicet, *antequam* veniat in Pontum, litteras ad Pompëjum mittet. Ib. Agr. 2, 20.—*Antequam* de præceptis oratoris dicamus, videtur dicendum esse de genere ipsius artis. Ib. Inv. 1, 4.—*Priusquam* hoc circulo exēdas, redde responsum. Liv. 45, 12.—Ego enim *priusquam* ad finem veniam, equos sustinebo. Ib. Ac. Pr. 2, 29.—*Priusquam* aggrediar ad causam Corneli, quiddam de communi conditione omnium nostram commemorandum videtur. Ib. Balb. 7, 18.—*Antequam* de republicâ dicam, exponam vobis breviter consilium protectionis amæ. Ib. Phil. 1, 1.—Addicam qui hunc tollant, *priusquam* turbarum quid faciat amplexus. Plaut. Men. 5, 2, 93.—*Videamus, priusquam* aggrediamur ad leges singulas, vim naturamque legis. Ib. Leg. 2, 4.—*Ante* provinciam sibi decretam *audiet quam* potuerit tempus ei rei datum suspicari. Ib. Phil. 11, 10, 24.—De Carthagine vereri non ante desinam quam illam excelsam esse cognovero. Ib. Sen. 6, 18.—*Nihil* enim *disputabo priusquam* dixerit. Ib. Flacc. 21, 51.—*Antequam* aliquo loco consero, neque longas a me, neque semper meam litteras *respondas*. Ib. Att. 5, 14.—If the *Antequam*-clause is subjunctive (or requires a subjunctive by attraction), the future-perfect is either changed into a perfect or pluperfect subjunctive (according to the law of consecution), or it remains unchanged, as: *Ante* vero quam sita res abita, letitia mihi satis est (= *satis est* *si non* *ante* *ad* *vestitum*). Cic. Phil. 14, 1.—Ne quis *prius* intercederet legi quam privatis suadendi missis denique legem potestas facta esset. Liv. 45, 21.—Quin jam, *priusquam* sin vestrum imperatorem incusare quam finitum bellum *videro*. Liv. 23, 12.—Sometimes (but perhaps only in ante-classical language) a perfect subjunctive is used in *Priusquam*-clauses, in place of a future perfect, even if the clause is not subjunctive, as: Nullo pacto potest *prius* recipi quam hanc amiserim. Plaut. Mil. Gl. 4, 3, 3. If a subjunctive *Antequam*-clause would, in an independent form, have the present indicative it takes either the imperfect subjunctive, or the present subjunctive according to the law of consecution, as: Quum Cæsar ostendisset, *re, priusquam* proficisceretur, Dolabellam consulem esse *jussurum* (INDEF.: *Priusquam* *proficiscor*, Dolabellam jubebō). Cic. Phil. 2, 32.

3. If the principal predicate is a FUTURE-PERFECT, the predicate of the clause is *always* in the future-perfect; as: Si quid mihi *prius* acciderit quam hoc tantum malum *videro*. Cic. Mil. 36, 99.—Non *dejadigabor antequam* illorum ancipites vias rationesque *percepero*. Ib. Or. 3, 36.—Nec *ante* nos hic *moverimus quam* C. Flaminium patres *asciverint*. Liv. 23, 3.

## 3. Antequam referring to definite time, dependent on Preterites.

Obs. 6. If in clauses of this kind an indicative is used (Obs. 7), it is almost always a PERFECT indicative. An IMPERFECT indicative sometimes, but rarely, occurs if the principal sentence is negative and the predicate of the clause denotes a continuing action or a state, as: *Ante* *ante* *videtur* agrum Campanum quam jam alta in secretibus herie pabulum præbere poterant. Liv. 23, 48.—*Nec antequam* vires ad standum in muris terendaque arma *deerant, expugnati sunt*. Ib. 23, 30\*.—A pluperfect indicative never occurs, because this tense would neither express the relation to the speaker's time (which requires a perfect indicative), nor the relation to the principal predicate (which requires a subjunctive). Hence such English expressions as 'I went before he had arrived' cannot be rendered by 'Abiit in totum antequam', but either by 'advenit', or by 'advenit'. Sometimes, in ante-classical language, *priusquam* stands with a present indicative, even if the clause depends on a preterite, as: Pater meus, *priusquam* moritur, mihi dedit etc. Plaut. Curc. 5, 2, 38.

If the SUBJUNCTIVE is used, the predicate of the clause is regularly placed in the IMPERFECT subjunctive, according to the law of consecution. The use of a PLUPERFECT SUBJUNCTIVE is extremely rare, and still more rarely a perfect subjunctive occurs (see Obs. 8, 9, 10).

Obs. 7. The subjunctive is almost always used: 1) If the action of the clause failed to take place in consequence of the principal action, the subjunctive having the nature of a subjunctive of non-reality. In this instance, *priusquam*, not *antequam*, must be used; as: Plerique *interfecti sunt priusquam* occultum hostem *viderent*. Liv. 35, 29.—*Fusis* hostibus, *priusquam* manus *consererent*. Ib. 5, 31.—Ignotum hostem *prius* pæne quam *viderent, fugerunt*. Ib. 5, 38.—Fabio auspiciant, *priusquam* egrediretur ab Tarento, aves non *addixerant* (which prevented his leaving Tarentum). Ib. 27, 16.—*Priusquam* alter *conser-*

\* Most grammarians assert that an imperfect indicative never occurs in *Antequam*-clauses, which is erroneous as shown by the above-mentioned passages.

that of the Dum-clause, are represented as occupying *the same time-period*, so that their *endpoints* are the same i. e. the actions are represented not only as contemporaneous, but also as being of equal duration. In the meaning '*both*', the two actions are represented as contemporaneous in regard to *one* point only, so that the endpoint of the one action (the principal one) is represented as the initial point of the other. In this meaning, *dum* is a synonym of *priusquam* and *antequam*, but so that with *priusquam* 'the anterior action need not (but may) come up to the initial point of the other action'. Hence often *priusquam* and *dum* (*dumc*) may be employed indiscriminately (*Non desistit fugere priusquam advenit, or donec (dum) pervenit*). See OBS. 26, p. 681 foll.—Dum-clauses very rarely are used as SUBJECT-CLAUSES. This form is used for instance, to express the idea '*It takes a certain time to perform an action*', as: *Nosti mores mulierum: Dum moliuntur, dum comuntur annus est*. Ter. Heaut. 2, 2, 10.

1. **DUM** as a Synonym of **QUUM** (*while*).

Obs. 2. If the principal predicate is a PRESENT or FUTURE, the conjunction 'while' is not expressed by *quam*, but by *dum*. The tense of the clause is almost always a *present-infinitive*, even if the action of the clause refers to the future, and even if the cause is suboblique, as: Nunc, rem ipsum *dum* breviter vobis *demonstro, attendite*. Cic. Tull. 6, 13.—Hæc artis si, *cum* est tener, *contulerit*, ad majora veniet pariter. Id. Fin. 3, 2, 9.—6, 13.—Hæc artis si, *cum* est tener, *contulerit*, ad majora veniet pariter. Id. Fin. 3, 2, 9.—6, 13.—*Dum* coquitur, interim, *potissimum*. Plaut. Men. 1, 3, 51.—Peram a vobis ut me, *dum* de his singulis *disputo* (not *disputem*) *judicis, attente auditis*. Cic. Cato, 52, 89.—Rarely, in such clauses, the *future* is used, and never the future-perfect, nor the perfect; as: De quo *dum* certa et pauca et magna *dicam*, breviter *attendite*. Cic. Verr. 2, 3, 70.—More frequently such futures occur in anteclassical style, as: Quod oleæ salsæ non acceperint, *dum* oleam *legent*, in modios singulos æstertii semisses dabuntur. Cato R. R. 145.

OBS. 3. If the principal predicate is a PRETERITE, the *Dum*-clause may frequently be replaced by a *Quam*-clause with an imperfect subjunctive or indicative (see p. 321, and p. 648, OBS. 5), but not, if the two actions of the sentence denote a *succession* of facts. If a *Dum*-clause is used, the predicate of the clause regularly is in the *present indicative*. In this construction, is mostly a *perfect* with the meaning of an English *present perfect*, or an *imperfect*, or *pluperfect*. EX.: *Dum* in his locis Caesar navium parandarum causâ meritorie *erant*, Caesar *stetit* in this locality for the sake etc., *ex magna porte* Marnonorum ad eum leviâ *erant* (Cass. B. G. 1. 4. 12. — *Nemo, cum custodiam agros, concursu oppidanorum facto, repulsi sunt*, Liv. 32. 13. — *Hae dum nostrae circum draconibus, rex ipse e manibus effugit*, Cic. L. M. 9. 22. — *Dum arma et obsides conquiruntur et confuturur, millia VI ejus pagi qui Verbiogenus appellatur, primâ nocte e castris egressi* etc. (Cass. B. G. 1. 27. — *Venio nunc ad teas litteras quas pluribus epistolis accepi, dum sum in Arpinati* (when I have received etc., *while sleeping* in my villa near Arpin. Cic. Qu. Fr. 3. 1. 3. — *Filiam suscepit jam mirum dum tu dormis* (while you were sleeping? Ter. Phorm. 5. 9. 18. — *Dum ea Romani parantur*, Jam Sacuntum summâ vi *peragunt* etc., Liv. 21. 7. 1. — *Dum haec aguntur, interea Cleomenes jam ad Peloniatus pervenit*, Cic. Verr. 2. 5. 35. — Sometimes the present indicative is retained, even if the clause is *subjunctive*, as: — *Dum tribuni ad se qui que trahant, nihil reliquum esse viam dixit*, Liv. 2. 57. So Cic. *Fin. 5. 19. 50*; Tac. Ann. 15. 59; Just. 9. 2. 10. But generally, in this instance, an *imperfect subjunctive* is used according to the law of consecution, as: (Rex deinde cedere eos jussit, ne id consiliu caperent cuius, *dum in finem mearum cauti et providi essent, exemplo perirent* (not *providi fuerant essent*), Liv. 36. 9. — *ut periresceret ne consul Catillus ferebat, dum tu accusationem comparares*, Cic. Mur. 24. 49.

Obs. 4. There are the following exceptions to the preceding rule: 1) If in non-historical style the predicate of the *Dum* clause is expressly opposed to a time coincident with that of the *speaker*, the *perfect indicative* is used, as: *Ac um igitur parclare voluiscum, fortissimi dum ciuiles, uenit ueniam sanctissimi, mites quod etc.* Cic. Phil. 14, 12, 33.—2) Sometimes, but rarely, *dum* (whenever, in the historians occurs with an *imperfect indicative* instead of with a *present indicative*. See the passages quoted p. 321. Obs. 2, to which may be added: *Dum* his intentus imperator erat, alteratio orla est. Liv. 10, 40.—*Dum* haec opera pugnabant legionibus, interim pars aciei ante opus instructa sub hoste stabat. Hart. B. Afr. 5 r.—3) More rarely still the *pluperfect* is used with

\* Hence a *Dam*-clause with a present indicative, as will appear by comparing this passage with the preceding one, is frequently ambiguous, and can only be correctly rendered by looking at the connection.

† Peculiar is the use of *dum* with an imperfect in Cic. Sen. 22, 79: Apud Xenophontem moriens Cyrus hæc dicit: 'Nolite arbitrari me, quum discessero, nusquam aut nullum fore; neque enim, *dum eram vobiscum*, animum meum *videbātis*'; For you *did not see* my soul *while I was with you*'. In this passage, rendered from the Greek, Cicero para-

Dum-clauses, to give to them the force of certain Postquam-clauses with the pluperfect (*R.* 42, Obs. 4, *D*): *Dum* in unam partem oculos animosque hostium certamen *averterat*, pluribus locis scalis capitur murus. Liv. 32, 24. Probably this is the only passage, occurring in good prose, in which *dum* is thus used with a pluperfect. Perhaps Livy wrote '*averteret*' according to the usage mentioned No. 4. Sometimes, in the writers of the silver age, *dum* is used in the same meaning with a present indicative, as: Quod accidit mihi *dum* corruptum dicendi genus revocare ad severiora iudicia *contendo* ('in consequence of my efforts to recall'); the connection showing that '*dum...contendo*' is meant to have this force, and not the meaning 'while'. Quint. 10, 1, 125.—4) The historians, not rarely, use *dum* in the meaning 'while' with the SUBJUNCTIVE IMPERFECT in a pregnant sense, so as to represent by the *Dum*-clause the MOTIVE of the main action, or 'THE RIGHT TIME' for performing the principal action. To express such pregnant meanings in English, the passage must be generally recast, as: *Dum* intentus in eum se rex totus *averteret*, alter datam scdtrm in caput *deiecit*; While the king's mind was wholly engaged with him, the other '*made use of this opportunity*' to strike his head with the axe. Liv. 1, 40.—Hostes, *dum*, praeda magis quam pugnae memores, *tererent* tempus, triarii Romani conglobati ad praetorium *redeunt* (The triarii made use of the enemy's negligence to return etc.). Ib. 2, 47.—Pelopidas vallum incendit, *dumque* ignibus *submoverentur* (where the vulgate reading, according to a bad conjecture, has '*submoventur*') hostes, ipse fluvium *superavit* (Pelop. made use of the time while the enemy was kept back by the fire, to cross the river). Front. Strat. 1, 5, 2.—*Dum* ea in Samnio *gererentur*, Romani in Etruria interim bellum ingens *concitit* (The Etrurians made use of the time while the Romans were engaged in the Samnite war, to raise an enormous war against them). Liv. 10, 18.—Rex, quatuor millia armatorum, *dum* recens terror *esset*, Sotusam *misit* (he made use of the time while the fright was yet fresh in their memory, to send a party for the capture of Sotusa). Ib. 36, 9.—So, when the *Dum*-clause denotes the motive or aim of the main action (*dum* = *ut* *interea*): Perseus, *dum* *firmaret* res, legatos Romam ad amicitiam paternam reservandam *misit* (= *ut* *interea* *firmare* *posset*). Liv. 40, 58.—5) Later writers, and poets for the sake of the metrum, frequently use *dum* (while) with the subjunctive without any particular point, when in good prose, either *quum* with an imperfect subjunctive, or *dum* with a present indicative would be used, as: Pyrrhus in Graeciam regressus, *dum* Argos oppugnaret, ictu tegulae prostratus est. Aur. Vict. 35, 10\*.

Obs. 5. Frequently *dum* is used as a synonym of *quum* (while) to express relations not purely temporal:

1. To denote an action which in the principal sentence is represented according to its significance and import, *dum* being rendered by *while*, *when*, *in as much as*, *by* with a participial, the same as *quum* if used in this relation (*R. 37, Obs. 2*). Such *Dum*-clauses have their predicates in the indicative, the tense being either the same as that of the principal predicate, or in the present indicative, as in strictly temporal clauses, as: *Dum* Aristot. et Pyrrho in virtute sic omnia esse voluerunt ut eam rerum selectione expoliarent, virtutem ipsam sustulerunt; *while* (when) Aristot. and Pyrrho held the opinion (or 'Aristot. etc., by holding the opinion'), or 'in as much as they held the opinion'), they destroyed the very idea of virtue. Cic. Fin. 2, 13.—*Dum* illa tractabam, quasi forebam dolores meos. Ib. Att. 12, 18, 1.—Neminem æqualem reperit quam me, cui, *dum* se civibus impiis commendat, inimicus quam amicus esse maluit. Ib. Phil. 5, 1, 3.—*Vanior erat* hostium acies *dum*, abundante multitudine freti, subsidia mittunt ad castra oppugnanda. Liv. 2, 47.—If such *Dum*-clauses are suboblique, they have their predicates in the subjunctive with tenses according to the general rules, as: *Diristi, dum* Plancii in me meritum extollerem, me arcem facere e cloacâ. Cic. Planc. 40, 95.—*Putes, dum* tibi roganti voluerim obsequi, me imprudentiam suscepisse (see. p. 418, No. 3). Ib. Orat. 71, 238.

2. Frequently the action of the principal sentence is represented as a CONSEQUENCE of an action of the same doer, designated by the Dum-clause, in which instance the predicate of the Dum-clause is an equivalent of an ablative gerundial, and may be rendered by a participial after 'by'. The predicates of such clauses are either in the PRESENT INDICATIVE, or in the PERFECT INDICATIVE, as: Hoc loco nimum opere *consumitur* &

phrases the adverb *vō* by '*dum eram vobiscum*', giving to *eram* the force of a *present*, the principal predicate *videbātis* (in Greek ἐπαύριε) likewise referring to a time present to the speaker. '*Dum sum vobiscum*' would represent the imperfect *videbātis* as a real preterite.

\* Peculiar is the (very rare) use of a *pluperfect subjunctive* after *dum*, in place of *quum* with a pluperfect subjunctive, as: *Dum* (the reading '*quum*' is a mere conjecture) sic aliquot spectātis paribus affectos *dimississet*, concione inde advocatā, ita apud eos locutus fertur. Liv. 21, 43. This use of *dum* seems to have been *colloquial*, and to have crept inadvertently into the passage. So in Hirt. B. Afr. 61; ib. 88; B. Hisp. 23.

times occurs in place of a future-present, as: *Dum tu illi, quod edat et quod potet præbeas, numquam edepol fugiet.* Plaut. Men. 1, 1, 14.

Obs. 10. If the principal predicate is a PRETERITE, clauses with *tamdiu...quandiu* require the predicates of both propositions to be in the perfect indicative (see p. 322, R. 61, Obs. 2), clauses with *dum* and *quoad* (in the meaning 'as long as') generally have their predicates in the INDICATIVE (see Obs. 12), the tense being either the PERFECT, or the IMPERFECT. If the principal predicate is in the IMPERFECT, the clause (in good prose\*) takes the same tense; but if the principal predicate is in the PERFECT (or pluperfect), the predicate of the clause is either in the perfect or in the imperfect, according to the special rules p. 322, foll., Obs. 3-5: p. 323, R. 62; p. 324, Obs. 1-3. To the passages quoted there, the following may be added: *Doluit, quoad vixit*, se nocuisse reipublice. Cic. Leg. 3, 16.—*Fasces laureatos tenui quoad tenendos putâri.* Ib. Lig. 3, 7.—*Massilien-es, quoad licebat... circumvenire nostros contendebant.* Cæs. B. C. 1, 58.—*Quoad mecum rex fuit*, perbôno loco res erat. Cic. Att. 6, 1, 3.—*Dionysius dum imperium perpetuum studuit munire*, nullius pepercit vitæ quem ejus insidiatorem putâret. Nep. Reg. 2.—*Dum vestris viribus resistitis*, pacis nunquam apud vos mentionem feci. Liv. 21, 13.—*Dum necesse erat*, resque ipsa cogebat, unus omnia poterat. Cic. R. A. 48.—*Stimulâbat occasio in se munus vertendæ gloriæ dum ager collēga erat.* Liv. 21, 53.—*Macedones usque dum ordines et velut stipata phalanx constabat*, moveri nequiverunt. Ib. 33, 18.—*Nequidius quam dum recens erat*, questio viguit. Ib. 9, 26.—*Dionysio, dum ex-timâbam vagos nos fore*, nolui molestus esse. Cic. Att. 7, 26. The principal predicate may be a PARTICIPLE, as: *Susceptum bellum est quiescente me*, depulsum ex Italiâ, manente me quoad potui. Ib. Fam. 6, 6, 6†.—If the clause-are SUBOBLIQUE, they may either retain their indicative tenses, or may be in the subjunctive with tenses according to the rules on consecution, as: *An censes, dum illa viguerunt*, non eodem gradus oratorum vulgi iudicio et doctorum fuisse? Cic. Brut. 50, 186.—*Prudentissima civitas Atheniensium, dum ea rerum potita est*, fuisse traditur. Ib. R. A. 25.—*Fateatur se privatum prædonum duces vivos d mi suæ usque dum per me licuerit*, retinuisse (IND.: *retinuit dum licuit*, acc. to p. 418, No. 3). Ib. Verr. 2, 1, 5.—*Priesertim quum sim conscius me, quoad licuerit*, dignitati reipublice consuluisse. Ib. Fam. 6, 21, 1. (IND.: *consului quoad licuit*, p. 418). Cp. Cæs. B. C. 2, 20; Liv. 26, 51.

Obs. 11. Rarely the present indicative is used in the clause if *dum* denotes 'as long as' (never with *quoad* or *quandiu*). Such present indicatives must be considered as historical presents, and hence mostly occur when the principal predicate is an historical present, as: *Dum*, aviditate certaminis proveci, extra munitiones pugnant (as long as they were fighting), hand paullo superior est Românis miles, (sed) postquam etc. Liv. 32, 12. But they also occur when the principal predicate is a PRETERITE, as: *Dum ego in Siciliâ sum* (as long as I was in Sicily), nulla statua dejecta est, postquam discessi etc. Cic. Verr. 2, 2, 65.—*Tantum ibi moratus, dum milites ad prædam discurrunt.* Liv. 27, 42. See the examples p. 323, Obs. 4.

Obs. 12. In clauses with *dum* (in the meaning 'as long as') the SUBJUNCTIVE IMPERFECT is used 1) as subjunctive of non-reality, as: *Secundum fuerat* (it would have been next best) *dum liceret*, abire. Liv. 42, 46.—2) If the principal action, according to the intention of the writer, is to last up to the end of the space expressed by the predicate of the clause, the time of this endpoint being as yet uncertain at the time of the principal predicate. Such clauses may always be changed into clauses introduced by *till* if the imperfect is turned into an English pluperfect or into a verb denoting the endpoint of the action (Comp. Gell. N. A. 6, 21), as: *Dum* is ibi bellum *gereret*, Cornelio prorogatur imperium (The command of Cornelius was continued as long as the war would last, or 'till the war would be ended'). Liv. 41, 21.—*Hi tantum temporis retenti dum exponeret quantæ regiæ copię fuissent* (as long as they were explaining, or 'till they had explained'). Ib. 45, 2.—*Oroandes tantum moratus dum pecunia deferretur* (as long as it took to deliver the money). Ib. 45, 6.—*Obsidio deinde per paucos dies magis quam oppugnatio fuit dum vulnus ducis curaretur* (as long as the wound of the commander would be healing, or 'till the wound had healed'). Ib. 21, 8.—*Die insequenti quievêre dum præfectus juvenitatem Apolloniatum inspiceret* (as long as the inspection would last, or 'till the troops had been inspected'). Ib. 24, 40.

Obs. 13. From the potential meaning of Dum-clauses with a subjunctive (Obs. 9) has arisen the restrictive use of *dum* in the meaning 'if but', 'provided that only'. The

\* Rarely, in anteclassical language, the Dum-clause has a perfect when the principal sentence has an imperfect, as in Ter. Heaut. 5, 2, 34.

† In the following passage all the three conjunctions *dum*, *quoad*, and *donec* occur in the meaning 'as long as', the same idea being also expressed by an ablative absolute: *Egregium vita famaue Tiberii quoad privatus vel in imperiis sub Augusto fuit*; occultum ac subdolum *donec* Germanicus ac Drusus *superfuere*; idem inter bona malique mixtus, *incolumi matre*; intestabilis sævitia *dum* Sejânus *dilexit timuitve.* Tac. A. 6, 51.

predicate of such a clause is represented as a fact which, according to the idea of the speaker or doer, must coincide with the principal action in order to remove his objections against the latter. It implies the idea 'As long as the action of the clause coexists with the principal action, I have no objection against the transpiring or performing of the latter'. The principal predicate of such Dum-clauses is almost always non-preterite, being mostly in the (potential) subjunctive present, or imperative, but also in the indicative present, or in the (potential) future. The predicate of the clause is placed in the subjunctive present, unless it is suboblique, in which instance the tense follows the law of consecution, as: *Nollem idem alio loco dixisset 'Oderint dum metuant'* (let them hate, as long as they fear, or 'if they only fear'). Cic. Sen. 48, 103. Thus Ib. Phil. 1, 14, 34.—*Dum mihi solem lunamque intueri liceat*, dum animum in sublimi semper habeam, quantum refert quid calcem? As long as I am allowed (if I am but allowed) to look at the sun etc., what matters it on what my feet will tread? Sen. Cons. Helv. 9.—*Sint vel plures, dum talem ducem habeant*; Let their number even be greater, 'as long as they have' (if they but have) such a leader. Liv. 29, 34.—In oratione firmesimum quodque sit primum, dum illud tamen in utrôque teneatur. Cic. Or. 2, 77.—*Qui quidvis perpeliatur, dum quod velit consequatur.* Ib. Off. 1, 30.—*Dum res maneant*, verba fugant arbitrâtu suo. Ib. Fin. 5, 29. *Peccetur in vos, dum digni sitis* quibus ita satisfiat. Liv. 6, 26. Comp. Ter. And. 4, 1, 54. Cic. R. A. 41, 119; Ib. Fam. 10, 23, 1; Ib. Leg. 2, 2, 5.—Negative Dum-clauses of this kind take *ne*, which often is written in one word with *dum* (*dumne*), and sometimes take the syndetic antecedent *ita*: *Si cui adhuc videor segnior fuisse, dumne tibi videar, non labôro.* Cic. Att. 8, 11 b 3.—*Consul equitibus prædam circumjecti agri concessit, dum ne amplius duabus noctibus abessent.* Liv. 44, 45.—*Imitamini turbam incon-sultam, dum ego ne imiter tribunos.* Ib. 3, 21.—*Cautum est, ita id sacrum faceret, dum ne plus quinque sacrificio interessent.* Ib. 39, 18. Comp. Ib. 25, 40; 28, 40; 26, 1; Plaut. Curc. 1, 1, 36, Ter. Andr. 5, 3, 31. *Dum non* occurs in the poets and in the writers of the silver age, as: *Lege Pompēja permisum Bithynicis civitatibus ascribere sibi quos velent cives, dum civitatis non sint aliënæ.* Plin. Ep. 10, 115. Comp. Ib. Pan. 27, 2. Sen. Ep. 54; Ib. 56; Ulp. Dig. 48, 18, 1, 8. Ov. Met. 13, 151.—Frequently *dum*, in this meaning, is combined with *modo* (sometimes with *quidem*), which imparts to the clause the additional meaning that nothing else but the fact stated in the clause is necessary for the doer to perform or to suffer the principal action, as: *Quamobrem, sive in Tusculânô, sive in Cumânô ad te placêbit, sive Romæ, dummodo simul simus, perficiam profecto ut etc.* Cic. Fam. 9, 1, 2.—*Dummodo morâta recte veniat, dotâta est satis.* Plaut. Aul. 2, 2, 61.—*Dumquidem ne quid percontaris quod non lubet proloqui.* Ib. 2, 2, 34.—*Gallia omnis æquo animo belli patitur injurias, dummodo repellat periculum servitutis.* Cic. Phil. 12, 4, 9.—*Magno me metu liberâbis, dummodo inter me et te murus intersit.* Ib. Cat. 1, 5. Comp. Ib. Off. 3, 21; Or. 3, 48; Cat. 1, 9, 22; Att. 12, 45, 1; Fam. 10, 25, 3; Brut. 82, 285; Qu. Fr. 1, 1, 7; Leg. 2, 15, 38.—Rarely *dum* (in the restrictive meaning), and *dummodo* are dependent on preterite predicates, as: *Qui id nunquam, dummodo otiosi essent, recusarunt.* Cic. Att. 7, 7.—*Itaque dum locus comminus pugnandi darêtur, æquo animo singulas binis navis objicêbant* (= They did not hesitate to oppose one ship to their two if but the opportunity of a hand-to-hand fight was given). Cæs. B. C. 1, 58.—So in Sall. Cat. 14, 6; Cic. Fil. in Cic. Fam. 16, 21, 11. Comp. Ov. Her. 3, 123. More frequently preterite predicates occur in this construction if the clause is suboblique, as: *Decrêtum est ut Antonius exercitum citra flumen Rubicônem educeret, dumne propius urbem Romam ducenta millia admoveret.* Cic. Phil. 6, 3, 5. Comp. Liv. 33, 24, 9; Ib. 1, 34, 5. Thus if the Dum-clause is made dependent on a hypothetical preterite subjunctive of non-reality: *Qui et ipse in cruciatum dari cuperet dum de patris morte quæreretur* (if only an investigation would be had on his father's death). Cic. R. A. 41, 119. Comp. Sall. Cat. 40, 4.

Obs. 14. The restrictive relation of *dum* and *dummodo* may also be expressed in the following forms: 1) By an INDEPENDENT POTENTIAL SUBJUNCTIVE in connection with the particle *modo* (negatively *modo ne*), as: *Quos, valetudo modo bona sit* (if only the health is good) tenuitas ipsa delectat. Cic. Brut. 16, 64.—*Putant enim, qui horride incultèque dicat, modo id eleganter faciat, eum solum Attice dicere.* Ib. Orat. 9, 28. Comp. Ib. Sen. 7, 22; N. D. 3, 8, 20; Off. 3, 6, 31.—*Quæ de Sicinio audi-ti, ea mihi probantur: modo ne illa exceptio in aliquem incurrat bene de nobis meritum.* Ib. Att. 5, 4.—*Si quis est paullo ad voluptates propensior, modo ne sit ex pecudum genere.* Ib. Off. 1, 30. Comp. Ib. Or. 3, 49; Am. 17, 61; Off. 2, 20, 71; Fam. 16, 22, 4; Liv. 32, 21. Since propositions of this kind are grammatically independent, being a species of adversative coordinate propositions, the tense of the predicate is not subject to the law of consecution. Sometimes, such constructions have a general restrictive force, without the peculiar meaning of *dum* or *dummodo*, as: *Quæ placet Peripateticis et recte placet: modo ne laudarent iracundiam, et dic-erent utiliter a naturâ datam.* Cic. Off. 1, 25, 89. Here the subjunctives *laudarent* and *dic-erent* have the force of the potential subjunctives mentioned p. 379, Obs. 4, the sentence introduced by *modo ne* having the force of an adversative coordination by *sed*, or that of a concessive period, = 'but (only) they ought not to praise etc.'—2) The

same relation is sometimes expressed by *modo* with an *ablative absolute*, or with *adjectives* which have the force of accessory predicates, as: *Itaque veniam quo voces, modo adiutore te (= modo adiutor sis)*. Cic. Att. 16, 13.—*Tum quam plurimis, modo dignis, se utilem præbeat (= modo digni sint)*. Ib. Off. 1, 26, 92.—*Utinam posset aliquā ratione hoc crimen, quamvis falsā, modo humanā atque usitatā, defendere (= modo ea humanā atque usitatā sit)*. Ib. Verr. 2, 3, 97. Thus *modo* may be connected with adverbial adjuncts of the sentence, in which instance the predicate must be supplied according to the connection, as: *Decerne, modo recte (= modo recte decernas, or modo id recte facias)*. Cic. Rosc. A. 48.—*Bonis viris approbantibus faciendum est, modo pro facultatibus, nos ipsi ut fecimus (= modo id pro facultatibus faciant)*. Ib. Off. 2, 17. Comp. Ib. 1, 35, 127, 1, 44, 156.—3) Rarely *modo* is used in this meaning with an *Ut*-clause, as: *Modo ut hæc nobis loca tenere liceat, bellissime in nostris prædiis esse poteritis* (if it is only allowed to us etc.). Cic. Fam. 14, 14, 1.—4) Rarely a *Ne*-clause without *modo* is used in the meaning *dummodo ne*, as: *Sint misericordes in furibus ærarii, ne illi sanguinem nostrum largiantur*. Sall. Cat. 52, 12.—*Permissum ut auxilia ab sociis, ne supra quinque millium numerum, accipiat*. Liv. 36, 1.—5) Frequently *si modo* with the *indicative* is used to express the English 'if only', 'provided that'. But such clauses lack the peculiarity of the *Dum*-clauses, mentioned Obs. 13, having merely a conditional force, the particle *modo* being used to represent the non-fulfilment of the condition as improbable, or its fulfilment as easy, as: *Sine alios qui possunt, si modo volunt, sustinere*. Cic. Fam. 14, 2, 3.—*Reliqua singulorum dierum scribemus ad te, si modo tabellarios tu præbēbis*. Ib. Qu. Fr. 2, 12.

### 3. *Dum* and its synonyms, in the meaning 'TILL'.

Obs. 15. If *dum*, *quoad*, and *donec* are used in the meaning 'till', the principal action is always represented as continuing during some space of time, but as ceasing at the moment when the action of the clause occurred, or will occur. For the *tense* of the principal predicate see p. 323, Obs. 6.—These three conjunctions sometimes take the *syndetic antecedents usque, usque eo (usque ad eum finem)*, and *tandiu*, which denote 'so long', but generally are not separately rendered. The moods and tenses of *Till*-clauses are different for each of the three conjunctions mentioned.

Obs. 16. *Dum* (till), if it refers to time *INDEFINITE* and *GENERAL* (i. e. if the action refers to *all* times), takes the *SUBJUNCTIVE PRESENT*; as: *Itatis subtrahendi sunt ei in quos impetum facere conantur, dum se ipsi colligant* (till they collect themselves). Cic. Tusc. 4, 36, 78.—*Different in tempus aliud, dum deferrescat ira*. Ib.—*Quid dicam, quantus amor bestiarum sit in educandis eis que procreaverunt usque ad eum finem dum possint se ipsa defendere?* Ib. N. D. 2, 51.—*Ut ne expectemus quidem dum rogemur*. Ib. Am. 13, 44.

Obs. 17. When *dum* (till) refers to *PARTICULAR* time, it generally takes the *SUBJUNCTIVE PRESENT* if the principal predicate is *non-præterite* (present or future), as: *Expecta dum Atticum conveniam*; *Wait till I see (till I have seen) Atticus*. Cic. Att. 7, 1, 4.—*Nunc Scævola paulum requiescat dum se calor frangat*; *till the heat subside (has subsided)*. Ib. Or. 1, 62.—*Num expectas dum te stimulis fodiam?* Ib. Phil. 2, 34.—*Quam ea satis firma sit, teneor tamen dum a Dolabellæ procuratoribus exigam primam pensionem*. Ib. Fam. 6, 18, 5.—*Opto ne se illa gens moveat dum ad te legiones perducantur*. Ib. Fam. 12, 19, 2.—*Expecta dum consul aut dictator fiat*. Liv. 3, 11, 13.—*At tu apud nos mane dum redeat ipsa*. Ter. Eun. 3, 3, 28. Comp. Cic. Fam. 11, 23, 2; Ib. 11, 24, 2. Thus *dum*, in the meaning 'till', with the *PRESENT SUBJUNCTIVE* is expressly opposed to *dum*, 'while', with the *PRESENT INDICATIVE*: *Tibi latendum tantisper ibidem dum effervescit* (= *tandiu quamdiu effervesceat*), et simul *dum audiāmus* ('till we have heard', 'until we shall hear') quemadmodum negotium confectum sit. Cic. Fam. 9, 2, 4.—Sometimes (if the principal predicate is in the future) the *Dum*-clause takes a *future-perfect*, as: *Mihi quidem usque curæ erit quid agas, dum quid egeris sciero*. Ib. Fam. 12, 19, 3.—In ante-classical language, and rarely in the epistolary style of Cicero, the *PRESENT INDICATIVE* is used in place of a present subjunctive, as: *Expectādo dum venit*. Ter. Eun. 1, 2, 126.—*Me maneat triduum hoc, dum id quod est promissum ab amicis argentum aufero*. Ib. Phorm. 3, 2, 27. Comp. Ib. Andr. 2, 1; Phorm. 5, 7, 89, and *LENTULUS* in Cic. Fam. 12, 14, 4. Cicero uses the present indicative in Att. 10, 3: *Ego in Arcano opporior dum ista cognosco*. In the following passages which are generally quoted as a proof for this construction, *dum* has not the meaning 'till', but 'while': *Atque interea, dum hæc que dispersa sunt colliguntur, vel passim licet colligentem undique repleri in-ia juris civis scientiā*. Cic. Or. 1, 42.—*Perpaucos dies commorabor dum pecunia accipitur* (= while the delivery of the funds due to me is going on). Ib. Fam. 3, 5, 4.—A *future-present*

\* Most of the older editions read '*dum deferrescat*' (= till the congratulating excitement has subsided), which might be correct if it were confirmed by manuscript authority. The *Codex Medicæus* (the only manuscript authority for the letters ad Fam.) gives the reading mentioned above.

in *Dum*-clauses of this kind occurs only in the poets: *Quæ maneant dum me fata perire volent*. Prop. 1, 14.

Hence in quasi-oblique *Dum*-clauses of this kind, the predicate will be in the *imperfect subjunctive* if the principal predicate of the oblique construction is a *preterite*, as: *Legi scriptum esse, avem quamdam... usque eo premere earum (avium) capita mordicus dum illæ captum (piscem) amitterent*. Cic. N. D. 2, 49.—*Ut spatium intercedere posset dum milites convenirent, legātis respondit etc.* Cæs. B. G. 1, 7. Comp. Nep. Paus. 3.

Obs. 18. If *dum* (till), referring to particular time, is dependent on a *preterite* principal predicate, the predicate of the clause is regularly the *SUBJUNCTIVE IMPERFECT*, as: *Dum hic veniret, locum relinquere noluit*. Cic. Mil. 20, 54.—*Comitia dilata ex senatus consulto dum lex de tacito iudicio ferretur*. Ib. Att. 4, 16.—*Valuit tandiu dum huc prodiret*. Ib. Flacc. 17, 41.—*Delectu perfecto, consules paucos morati dies dum socii ab nomine Latino venirent*. Liv. 22, 38.—This tense and mood is required even then when we should expect a *pluperfect* according to English usage: *Virginus dum colligam consuleret moratur* (staid till he had consulted). Liv. 4, 21.—*Timoleon ne aspiceret quidem fratrem sanguinem voluit; nam dum res conficeretur, in præsidio fuit* (till all had been done). Nep. Tim. 1, 4 (where the interpreters, variously trying to explain the subjunctive, render *dum* by 'while'). The same tense, of course, is required if the clause is *suboblique*, or quasi-suboblique, as: *Quippe qui moram temporis quærerent dum Hannibal in Africam trajiceret*. Liv. 30, 16.

The *PERFECT INDICATIVE* in *Dum*-clauses of this kind is extremely rare. In Cicero it occurs only in Verr. 1, 6, 16: *Ea mansit in conditione usque ad eum finem dum iudices rejecti sunt*. In this passage, not the use of the *indicative* is unusual (a subjunctive would have been faulty), but the use of *dum* in place of *quoad* or *donec* (see Obs. 26). The *indicative perfect* is also found in Gell. 10, 3, and, poetically, in Prop. 1, 3, 43. The *pluperfect* and *imperfect indicative* never occur in *Dum*-clauses of this kind, nor does a *pluperfect subjunctive* occur if the clause is oblique, as it should be expected from the *future-perfect* being admissible according to Obs. 17.

Obs. 19. *Quoad* in the meaning 'till' is rarely used if the time of the clause is *indefinite* and *general*. It thus occurs in direct discourse with the predicate of the clause in the *PERFECT SUBJUNCTIVE*: *Quoad enim perventum sit eo quo sumpta navis est, non domini navis est, sed navigantium*. Cic. Off. 3, 23, 89.—In *preterite* consecution, and if the clause is *suboblique*, the predicate is placed in the *PLUPERFECT SUBJUNCTIVE*: *Patres interregni ineundi rationem excogitaverunt, ut, quoad certus rex declaratus esset, nec sine rege civitas, nec diuturno rege esset*. Ib. Rep. 2, 12.—If *quoad* refers to a *PARTICULAR* time, and the principal predicate is *NON-PRÆTERITE*, the predicate is placed in the *PRESENT SUBJUNCTIVE*, as: *Ego hic cogito commorari quoad me resciam*. Cic. Fam. 7, 26, 2.—*Ea vero continēbis quoad ipse te videam*. Ib. Att. 13, 21, 4. If the construction is oblique, the predicate of the clause is either in the present subjunctive, or in the *imperfect subjunctive*, according as the tense of the governing predicate is *non-præterite* or *preterite*: *Ego me Asturæ diutius arbitror commoraturum quoad ille veniat*. Cic. Fam. 6, 19, 2.—*Ubi esse statueram quoad aliquid ad me de eo scriberes quod etc.* Ib. Att. 3, 13, 1. But it is peculiar that in these oblique (or quasi-oblique) constructions sometimes, instead of a *present subjunctive*, a *PERFECT subjunctive* is used, and instead of an *imperfect* a *PLUPERFECT subjunctive*, as: *Censeo... senatui placere ut... interea provinciæ ab eis obtineantur quoad cuique ex senatus consulto successum sit*. Cic. Phil. 11, 12. Comp. Ib. 10, 11, 22.—*Ipsæ interea, quoad legiones collocatas, munitione hiberna cognovisset*, in Gallia morari constituit. Cæs. B. G. 5, 24. So Cæs. B. C. 1, 10. These tenses can only be explained as converted *future perfects* (see p. 453; *INDEPENDENT CONSTRUCTION: Provinciæ obtinebuntur quoad successum erit; morabor quoad cognovero*), although vouchers for such constructions in direct discourse are found only with *dum* and *donec*, but not with *quoad* (as far as we know).

Obs. 20. If clauses with *quoad* (till) are made dependent on *PRÆTERITE* predicates, the predicate of the clause (in classical prose) is in the *PERFECT INDICATIVE*: *Usque eo se tenuit quoad a Pompejo ad eum legati litteræque venirent*. Cic. Dej. 4, 11.—*Milo, quam in senatu fuisset eo die quoad senatus est dimissus, domum venit*. Ib. Mil. 10, 28.—*Equites finem sequendi non fecerunt quoad præcipites hostes egerunt*. Cæs. B. G. 5, 17.—*Epa-minondas ferrum usque eo in corpore retinuit quoad renuntiatum est vicisse Bæotios*. Nep. Ep. 9. Comp. Liv. 26, 46.—Rarely *quoad* is used, in place of *dum* in those constructions of this kind which require the *subjunctive*, as: *An Brutus non potuit domum redire, triumphare, primus in hoc ordine, quoad magistratum iniret, sententiam dicere?* Cic. Phil. 6, 3, 8. Here *iniret* is a *subjunctive* of non-reality, being represented as an action which would have happened if Brutus had returned. Hence the clause should have been introduced by *dum*, which probably would have been done but for the ambiguity arising from *dum* (*dum iniret* = while he was entering).—The writers of the silver age construe *quoad* either with a *perfect indicative*, or with an *imperfect subjunctive*,

as: Tamdiu certamen anceps fuit quoad Darius fugeret (where in classical prose 'fugit' would have been used). Just. 11, 9.

Obs. 21. *Donec* (till), which has an anteclassical collateral form *donicum*, does not occur in classical prose if dependent on non-preterite predicates (unless the principal sentence is oblique, and the governing verb of the principal sentence is preterite, or the clause is virtually suboblique. (See below.) But in anteclassical and post-classical style, and also in the poets, *donec* is frequently used if it depends on presents, futures, and imperatives. If it refers to indefinite time, it has its predicate in the present subjunctive (more rarely in the future present, or future-perfect), as: Inter eadem pecora degunt, donec aetas separet ingenuos. Tac. Germ. 20. Comp. Ib. H. 2, 1; 4, 65; Colum. 12, 25; 12, 26.—Coquito usque donec ea commutabit bene. Cato R. R. 156.—Id aliquoties facito, usque adeo donec sal desiderit tabescere biduum. Ib. 88. So Ib. 146, 149.—If *donec* refers to particular time (dependent on non-preterites), it has its predicate, in anteclassical language, regularly in the FUTURE-PERFECT, as: Haud desinam donec perfecero hoc. Ter. Phorm. 2, 3, 72.—Ne quoquam exurgatis donec a me erit signum datum. Plaut. Bacch. 4, 4, 106. Comp. Ter. Ad. 4, 6, 5. In post-classical language the present subjunctive is used: Sed est vallum murique et trahendi artes, donec e proximis provinciis auxilia concurrant. Tac. H. 4, 65. Comp. Ib. 4, 58. The poets also use the FUTURE-PRESENT: Hic jam ter centum totos regnabit annos, donec regina sacerdos... geminam dabit illa prolem. Virg. Aen. 1, 272.—Livy thus uses *donec* in oblique discourse, the predicate of the clause being in the present subjunctive if the governing verb of the oblique period is a non-preterite, as: Eo usque me vivere vultis donec alterius vestrum superstes haud ambigum regem alterum mea morte faciam. Liv. 40, 8, 18.—Pererratum se omne Latium, donec ad eos perveniat qui etc. Ib. 1, 53. In preterite consecution, the suboblique predicate of the *Donec*-clause is either in the imperfect subjunctive, or pluperfect subjunctive: Sicinius Macedoniam obtinere, donec successor veniret, jussus est. Ib. 42, 27.—Patres censuere eosdem Macedoniam obtinere donec res composuissent. Ib. 45, 16. So Liv. 4, 13; 1, 39; 26, 9; 33, 31. Such pluperfects can only be explained if taken as converted tenses with the force of future-perfects (Macedoniam obtinebunt donec res composuerint), although Livy does not use this tense in direct discourse.—Sometimes *donec* is thus used with a subjunctive if the clause is virtually suboblique, the predicate referring to a future event which at the time spoken of is expected, as: A cetera praedia Fabius militem abstinuit donec collegae venirent. Liv. 4, 59. This construction presupposes an independent construction with a present: 'Praedia abstinete donec collegae veniant'.

Obs. 22. *Donec* occurs in all periods of the language when the principal predicate is preterite, the predicate of the clause being in the PERFECT INDICATIVE (the same as with *quoad*). For exceptions see Obs. 23. *Donec* is thus used: 1) in anteclassical style: Numquam destitit orare usque ad eo donec perpulit. Ter. And. 4, 1, 36. Comp. Plaut. Truc. 1, 1, 17.—2) In classical language; very frequently in Livy, but not in Caesar or Sallust; in Cicero only in a few passages: Usque eo timui ne quis de mea fide dubitaret, donec ad rejiciendos iudices venimus. Verr. 1, 6, 17. Fundum se habere usque eo non moleste tulit donec vicinum nactus est qui etc. Ib. Tull. 6, 14.—Neque finis fēbat, donec populus senatum coegit ut etc. Ib. Verr. 2, 4, 40. De comitiis donec rediit Marcellus silentium fuit. Liv. 23, 31, 9.—Potitii antistites fuerunt donec genus omne Potitiorum interit. Ib. 1, 7, 14. Comp. Ib. Praef. 9; 1, 23; 1, 31; 1, 34; 3, 48; 4, 57; 5, 32; 44, 5; 45, 6, and often. Livy sometimes uses an historical present in the *Donec*-clause, as: Nec minor caedes in urbe fuit, donec abjectis armis dictatori deduntur. Ib. 4, 34. So Ib. 1, 54, 10.—3) Frequently *donec* has this construction in the silver Latinity, as: Cuncta ejus dicta scire malēbat, donec Junius quidam indicium detulit. Tac. A. 2, 28. Comp. Ib. 4, 72; 6, 51; 13, 44; Ib. Agr. 26, 36; Suet. Jul. 82.

Obs. 23. *Donec* (till) with an IMPERFECT OR PLUPERFECT SUBJUNCTIVE first occurs in Livy, who uses this construction 1) if the principal sentence is negative: Principio anni tribuni nihil moverunt donec Camillus in Faliscos proficisceretur. Liv. 5, 26.—Progredi praeturbia occurrentium non poterat, donec a consulibus lictores missi essent qui etc. Ib. 45, 7.—2) If the predicates of both propositions denote repeated and contingent action (according to p. 331, No. c), as: Trepidationis aliquantum edebant (elephanti) donec quietem ipse timor fecisset (i. e. every time when a raft with elephants was conveyed across the river). Liv. 21, 28.—3) If the action of the clause is in the relation of non-reality: Quiescerem et paterer, donec in regiam meam armatus venisset? Liv. 42, 41.—The authors of the silver age use *donec* far more frequently with the IMPERFECT SUBJUNCTIVE than with a perfect indicative, and very rarely employ *dum* in the meaning 'till'; as: Tamdiu se in sedili suo tenuit donec cervicem circumactu rotae frangeret. Sen. Ep. 70.—Tum locupletissimus quisque miles labore fatigatus, donec vacationem emeret. Tac. H. 1, 46. Comp. Tac. A. 2, 82; Ib. H. 2, 8; 1, 13; 2, 49; Plin. Ep. 9, 33, 6. In still later Latinity, the subjunctive became the only mood in *Donec*-clauses (Charis. 2, p. 202).

Obs. 24. Livy, the poets, and more frequently the writers of the silver age, use *donec*

in the meaning 'as long as'. Livy, in direct discourse, uses *donec* in this meaning, mostly with reference to preterite principal predicates, placing the predicate of the clause in the IMPERFECT OR PERFECT INDICATIVE, as: Donec armati confertique abibant, pedum labor in persequendo fuit; postquam etc. Liv. 6, 13. Comp. Ib. 2, 49, 9; 1, 7, 13. But the subjunctive imperfect is found as a subjunctive of repeated and contingent action (p. 331, No. c): Nihil sane trepidabant elephantum donec continenti velut ponte agerentur. Liv. 21, 28 (where some grammarians, for inst. the author of the Publ. Sch. Gr., strangely consider agerentur as 'suboblique', the elephants being regarded as the conceivers of the clause). If the principal predicate is in the subjunctive, the predicate of the *Donec*-clause assumes both the tense and the mood of the former: Ut... Romulus tenuerit regnum, donec in terris fuerit. Liv. 1, 40.—The writers of the silver age use either the perfect indicative, or the imperfect subjunctive in this construction: Vulgus trucidatum est, donec ira et dies permittisset. Tac. A. 1, 68.—Hostes, donec agmen per saltus porrigeretur, immoti erant. Ib. 1, 32. Comp. Ib. 4, 47; 6, 51; 13, 33.—More rarely Livy, the poets, and writers of the silver age use *donec* in the meaning 'as long as' with reference to future actions, both predicates being placed in the future-present, as: Ne quem vestrum, donec quicquam in re mea supererit, iudicium addictumque duci patiar. Liv. 6, 14.—Donec eris felix, multos numerabis amicos. Ov. Trist. 1, 9, 5.—Vestrum quoque nomen in incerto erit, donec dubitabitur imperatorem in castris, an hostem habeatis. Tac. H. 1, 37. Peculiar is the use of a perfect indicative after *donec* (as long as), referring to a present used in the sense of an English present-perfect: Per multos jam annos potentissimi sunt civitatis, ac, donec libuit, principes fori. Tac. Dial. 8, 6. In oblique discourse both Livy and the writers of the silver age, often use *Donec*-clauses (= 'as long as'), referring to actions future to the time of some speaker introduced in the discourse. In this instance the predicate of the clause is placed in the subjunctive imperfect or present, which must be explained as converted future-presents, according to p. 448, R. 87, since a present indicative never occurs with *donec* in direct discourse; as: Edixit, ne quis militis, donec in castris esset, bona possideret (INDEF.: Ne quis possideto bona militis, donec in castris erit). Liv. 2, 24.—Nec unquam, donec sanguinis Barcini quisquam supersit, quietura Romanae foedera (INDEF.: Numquam quiescent foedera, donec quisquam supersit). Ib. 21, 10. Comp. Ib. 4, 24; 4, 60; 25, 11; 34, 23; Tac. A. 15, 64.

Obs. 25. Peculiar to the writers of the silver age, is the use of *donec* to introduce LOCATIVE CLAUSES, in the meaning 'usque ad eum locum quo' (up to the place where). In this sense, it generally takes the present subjunctive, or imperfect subjunctive according to the tense of the principal predicate, as: Rhenuis servat nomen donec Oceano miscetur. Tac. A. 2, 6.—Caput usque eo dimisit, donec radiis insereret. Sen. Ep. 70. Comp. Tac. Germ. 1; Ib. 35.

Obs. 26. *Dum*, *quoad*, and *donec* (in the meaning 'till') are thus distinguished in classical prose: 1) *Dum* (not *quoad* or *donec*) is used if the clause refers to time indefinite and general. In the passage Off. 3, 21, 89 (Obs. 19) *quoad*, as has been shown, is used for particular reasons. *Donec* with reference to indefinite time, does not occur in classical prose (Obs. 21). The mood of *Dum*-clauses, in this relation, is always the present subjunctive.—2) *Dum* (not *quoad* or *donec*) is used if the clause is dependent on *expectare* (to wait 'till'), the mood being always the subjunctive (Comp. the examples Obs. 17), as: Expectare dum hostium copiae acciperentur, summae mentis esse iudicabat. Cic. B. G. 4, 13.—Expectas fortasse dum dicat etc. Cic. Tusc. 2, 7. Comp. Cic. B. G. 1, 11. *Oppetiri* (in epistolary style) occurs also with *dum* and a present indicative (see Obs. 17). The emperor Trajanus construed *expectare* with *donec*: Si expectasses donec me consuleres. Plin. Ep. 10, 122. See p. 593, Obs. 8.—3) If the principal predicate is non-preterite, and refers to particular time, *dum* and *quoad* (both almost always with the subjunctive) are used optionally. *Donec* is not used in this connection. See Obs. 17 and 19.—4) If the principal predicate is preterite, *dum*, *quoad*, and *donec* are used. But only *dum* (not *quoad*, nor *donec*) is used if the principal action is represented as intentionally continued by the doer till the action of the clause 'will happen'; almost always with a subjunctive imperfect. See Obs. 18.—5) If no such intention is implied, the principal action being simply represented as continuing till another action occurred, *quoad* or *donec* are used) without any difference, both requiring the perfect indicative in classical prose. In postclassical prose there are the following differences from the classical usage: (a) that *donec* and *quoad* are employed when in classical prose *dum* only is considered as correct (No. 4); (b) that the subjunctive mood is used, promiscuously with the indicative, where in classical prose only the indicative is considered as correct (No. 5).

Sometimes *dum* and its equivalents are synonyms of *antequam* or *priusquam* (the same as in English 'till' and 'before' may often be used as synonyms). Both, *dum* and *antequam* represent the principal action as happening before the action of the clause. But while in clauses with *dum*, *donec*, and *quoad*, the principal action is always represented as continuing to the moment of the dependent action, this is generally not the

case in clauses with *antequam*, except when the principal sentence is negative, in which instance both the *Antequam*-clauses, and the *Dum*-clauses refer to principal actions, the *not-happening* of which continues up to the moment of the dependent action. Hence in such sentences as 'Dum hic vñret, locum relinquere noluit' (Cic. Mil. 20), a *Prisquam*-clause may be substituted for the *Dum*-clause (*non prius locum relinquere voluit quam hic veniret*). Thus 'Numquam destitit orare usque eo donec perpulit' (Ter. And. 4, 1, 36) = *Non prius destitit orare quam etc.*

## CHAPTER FIFTH.

### CAUSAL CLAUSES.

#### I. DIRECT CAUSE.

§ 623. Causal clauses are introduced by the conjunctions *quia* or *quod* (because), and, for particular causal relations, by *quum* or *quoniam* (since); sometimes by *quando*, *quandoquidem*, or *siquidem*. Causal *Quum*-clauses have their predicates in the SUBJUNCTIVE (p. 655). The other conjunctions take the INDICATIVE, with the exceptions mentioned OBS. 17.

OBS. 1. *Quod* (generally not *quia*) is used: 1) if the clause has the force of a completing *That*-clause, being governed either by one of the *verba affectuum* (p. 590 foll.), or by those verbs the objects of which denote at the same time their causes (p. 598). The use of *quia* after such verbs is extremely rare, when *quia* may generally be paraphrased by 'for no other reason than that', as: *Reprehendis me quia defendam et irascaris*. Cic. Sull. 18, 50.—Id *quia* non est a me factum, *agis gratias*? Ter. Ad. 4, 3, 5.—2) *Quod* (very rarely *quia*) is used if the clause is represented as the MEANS and INSTRUMENT of the main action, so that the syndetic antecedent *eo* is either used or may be supplied, as: *Vitiosi principes non solum obsunt quod (= eo quod) ipsi corrumpuntur, sed etiam quod (= eo quod) corrumpunt, plusque exemplo quam peccato nocent*. Cic. Leg. 3, 14, 32.—*Auctaque invidia ad plebem quod (= eo quod) tributum etiam in stipendium militum collatum est*. Liv. 10, 46.—Id *ferum, etiamsi hæsisset in scuto, pavorem faciebat, quod (= eo quod) arma omitti cogebat*. Ib. 21, 8. See p. 606, OBS. 4. *Quia* is very rarely used in clauses denoting instrumentality; but it sometimes occurs, even in place of *That*-clauses (*Fact*-clauses) for the sake of emphasis, as: *Id futurum fuisse ex eo quia factum est, intelligi debet* (from the very fact that etc.) Cic. Fat. 9, 18.

OBS. 2. On the other hand, *quia* (not *quod*, nor *quum*, *quoniam* etc.) must be used in answer to a QUESTION asking for the reason or cause of an action, as: *Cur dixisti testimonium in alios? Quia coactus (sum)*. *Cur damnati sunt? Quia creditum est*. Cic. Sull. 17, 48.—*Quæ tandem ista causa est? Quia hæc est mea germana patria*. Ib. Leg. 2, 1. Comp. Ib. 2, 3, 7; Part. Or. 4; Liv. 6, 18; Ter. Andr. 4, 3, 13; Ib. 5, 2, 51; Eun. 1, 2, 9; Heaut. 4, 5, 53. In anteclassical language *quia*, in such answers, is frequently strengthened by *enim*, which, according to the English conception is redundant. Comp. Ter. Hec. 3, 1, 31; Heaut. 4, 5, 52.

OBS. 3. Aside from these differences, *quod* and *quia* are used without distinction\*, 1) to express a MOTIVE (see the examples under A), 2) to represent the principal action as the consequence and effect of the causal predicate (*causa efficiens*), in which instance

\* Several grammarians have unsuccessfully tried to establish various differences between *quod* and *quia*. RAMSHORN says: *Quod* denotes a CAUSE (URSACHE), i. e. that which immediately precedes an action, and effects it; *quia* denotes the 'ground', i. e. the remoter cause, by which the action becomes possible. That this distinction (which is almost correct in regard to *quia* and *quum*) is utterly gratuitous, is evident from the passages given under A and B in the text.—MERRING says: *Quod* always retains the meaning 'that', so that it may be paraphrased 'on account of the fact that'. But this is no peculiarity of *quod*, being just as true in regard to *quia*.—REISIG almost reverses RAMSHORN's difference, by stating that *quia* represents an immediate and necessary cause, *quod* meaning 'in respect to'.

a consecutive *Ut*-clause may often be used in place of the principal sentence, the causal clause taking the place of the latter (see the examples under B).—It is peculiar that Caesar never uses *quia*, but always expresses both of these relations by *Quod*-clauses only. On the other hand Livy uses *quia* very much oftener than *quod* (about in the relation of three to one), and especially to express a motive, which, by this writer, is rarely expressed by *quod*. Cicero and Sallust use these two conjunctions without giving any preference to either, except for the sake of euphony. The syndetic antecedents of *quod* are *propterea*, *iccirco*, *eo* (*eā re*, *ob eam causam*, *inde*, *ideo*). *Quia*, more usually, takes *iccirco*, but also *propterea*; the other antecedents rarely occur with *quia*.

EXAMPLES: A. *Quod* and *quia* denoting MOTIVE: Kal. Sext. veni Syracusas *quod* ab eā urbe transmissio in Græciam laudabatur (= my motive in going to Syracuse was, that the passage to Greece from that city was said to be good). Cic. Phil. 1, 3, 7.—*Quem locum Marius, quod ibi regis thesauri erant, summā vi capere intendit*. Sall. Jug. 92.—*Itaque et multitudine freti, et quod metu cessasse credēbant hostem, in annum ruunt*. Liv. 21, 5.—*Huic simulas cum Curione intercedēbat, quod tribunus plebis legem promulgaverat qua etc.* Cæs. B. C. 2, 25.—*Exoravit tyrannum ut abire liceret quod jam be-mulguerat qua etc.* Cic. Tusc. 5, 21. Comp. Cic. Rep. 2, 31, 55; Sall. Jug. 5; 7; 61; Cic. Fin. 1, 16, 53; Liv. 21, 25.—*Postea vero quam certissimis auctoribus sum certior factus, vel quod tanta res erat, vel quod nondum audieramus Bibulum venisse, vel quia administratio hujus belli mihi cum Bibulo pæne est communis, quæ ad me delata essent, scribenda ad vos putavi*. Cic. Fam. 15, 1, 1.—*Ita fit ut adsint propterea quod officium sequuntur, et vos putavi*. Cic. Fam. 15, 1, 1.—*Dionysius utrumque inter-taceant autem iccirco quia periculum metuunt*. Ib. R. A. 1, 1.—*Dionysius utrumque inter-fici jussit, alterum quia viam demonstravisset interimendi sui, alterum quia dictum id risu approbavisset*. Ib. Tusc. 5, 30.—C. Flaminius Lælium, *quia cooptatus in angurum collegium non erat, non admodum diligēbat*. Ib. Brut. 26, 101.—*Epicydes protectus in Leontinos est, quia satis eos adversus populum Romanum concitatos cernēbat*. Liv. 24, 29.—*Classis data ad tuendam maritimam oram, quia qua parte belli vicerant, eā tum quoque rem gesturos Romanos credi poterat*. Ib. 21, 22.—*Exercitum in agrum Vestinum, quia regio ea infecta ab Samnitibus erat, hibernatum duxit*. Ib. 10, 46.—Comp. Ib. 10, 47; 21, 11; 21, 17; 4, 59; 1, 4; Cic. Att. 6, 3, 5; Par. 5, 1, 34.

B. *Quod* and *quia* = CAUSA EFFICIENS.—*Ego deorum vitam propterea sempiternam esse arbitror quod voluptates eorum propriæ sunt (= Voluptates efficiunt ut deorum vita sempiterna sit)*. Ter. And. 5, 5, 3.—*Helvetii reliquos Gallos virtute præcedunt, quod fere quotidianis præliis cum Germanis contendunt (= Helvetii contendunt, ita ut præcedant)*. Cæs. B. G. 1, 4.—*Quæ eo facilius retinebant quod procul ab imperio regis atatem agebant*. Sall. Jug. 78.—Comp. Cæs. B. G. 1, 2; Ib. 6; Cic. Att. 6, 1, 3; Liv. 6, 1; Ib. 1, 51.—*Galli, et quia in erposita nocte a contentione pugne remiserant animos, et quod nec in acie ancipiti usquam certaverant prælio, sine ira ingressi urbem in forum perveniunt*. Liv. 5, 41.—*Quod non tam facile in nostris oratoribus possumus dicere, quia scripta non multa reliqua sunt*. Cic. Or. 2, 22, 92.—*See arx vi capi poterat, quia pro spatio loci satis multa reliqua sunt*. Cic. Or. 2, 22, 92.—*Satis presidii habebat ita ut vi capere non posset*. Liv. 4, 61.—*Mul-tum profici, sed quantum non plane, quia longe absum, scio*. Cic. Att. 6, 2, 7.—Comp. Ib. Fin. 1, 16, 53; Liv. 6, 32; Ib. 32, 18.

OBS. 4. *Quum* (since) denotes, like *quod* and *quia*, either the motive or the causa efficiens (but never the means and instrument) of the principal predicate, but with the difference that *Quum*-clauses represent the principal action as arrived at by way of REASONING or logical CONCLUSION, whereas *quod* and *quia* represent the principal action as an immediate sequence of the causal predicate\*. Hence causal *Quum*-clauses are used 1) as a form of the major and minor premise in SYLLOGISMS, as: *Quum omnia quæ ratio-1) nem habent præstent eis quæ sint rationis expertia, nefasque sit dicere, ullam rem præ-nem habent præstent eis quæ sint rationis expertia, nefasque sit dicere, ullam rem præ-1) stare naturæ omnium rerum, rationem inesse in eā confitendum est*. Cic. Leg. 2, 7, 16 (= 1) Omnia quæ rationem habent, præstant etc.: 2. atqui nefas est dicere etc.: 3. ergo confi-1) tendum est etc.).—*Etenim quum in suo quemque opere artificem nihil aliud cogitare videtur, nisi quo sit in illo genere melior; ego, quum mihi sit unum hoc opus a majori-bus relictum, procuratio reipublicæ, non me inertiores esse confitear quam opificem*

\* This distinction is often strangely misunderstood by grammarians. Thus the author of the Publ. Sch. Gr. compares *quum* causal with the French *puisque*, and *quia* with *parceque*, whereas *puisque* is the equivalent of *quoniam*, and not of *quum*. The same author states that *quia* denotes an 'alleged cause', while *quum* denotes 'conceived cause'. Since from which fact he, strangely, derives the use of the subjunctive after *quum*. Since every cause must be both alleged and conceived by some one, it is difficult to say what meaning this author may have connected with the word 'conceived'. If he takes the meaning in the meaning 'nearly conceived, and void of reality', his definition is evidently wrong, since in many of the passages quoted above, the predicates of the *Quum*-clauses denote actual facts. If he takes the expression 'conceived' in the common acceptation of the word, his definition is destitute of sense.

quemquam, si minus in maximā arte quam illi in minimis operæ consumpserim? Ib. Rep. 1. 22 (= 1. Opifices progredi in suā arte student; 2. atqui mea ars est respublica; 3. ergo reipublicā studere me oportet).—Lucullus respondit, duos se habere vicinos, equitem Romanum et libertinum, quorum *quum essent* magnificae villae, concedi sibi oportere quod eis qui inferioris ordinis essent, liceret. Ib. Leg. 3. 13, 30 (= 1. Quod inferioribus licet, mihi concedi oportet; 2. atqui vicini mei magnificas villas habent; 3. ergo mihi licet villam habere magnificam).—2) *Quum*-clauses are especially used if one or more intermediate links, denoting the immediate cause of the principal predicate, must be supplied, as: *Quum* mentionem ejus rei in vetustioribus annalibus nullam inveniam, magis ut belli Gallici causā dictatorem creatum arbitrer, inclinatur animus. Liv. 7. 9 (supply: because if T. Quinctius had been appointed dictator for the purpose mentioned before, it would have been recorded in the annals).—Qui (i. e. deorum metus) *quum* descendere ad animos sine aliquo commento miraculi non posset, simulat sibi cum deā Egeriā congressus nocturnos esse. Liv. 1. 19 (= Numa pretended to meet Egeria, because he wished to make the Romans accept his reforms in religion, since etc.).—*Quum* propter longitudinem agminis minus facile omnia per se obire, et quid quoque loco faciendum esset providere possent, jusserunt pronuntiare ut impedimenta relinquerent, atque in orbem consistent. Cæs. B. G. 5. 33 (They gave the order to relinquish the baggage, because this was necessary to form a compact line of battle, since the column was too long to impart to them the necessary commands). Comp. Liv. 1. 13; Cæs. B. G. 2. 25, and the passages quoted p. 655, Obs. 1.

Obs. 5. This line of distinction between *quia* (*quod*) and *quum* (the same as in English between 'because' and 'since') cannot be drawn with absolute definiteness, since the supplying of connecting links will often appear more or less unnecessary, according to the conception of the author, and because the term 'immediate', if applied to thought, is not capable of being absolutely determined. Hence *quum* or *quia* (*quod*) may sometimes be optionally used, and, not rarely, in very similar sentences, the one is found with a *Quum*-clause, while in the other *quia* or *quod* is employed, as: Nam *quum* solitudo et vita sine amicis insidiarum et metus plena sit, ratio ipsa monet amicitias comparare. Cic. Fin. 1. 20, 66. Compare with: *Quia* nullo modo sine amicitia firmam et perpetuam jucunditatem vitae tenere possumus, ideo amicitia cum voluptate connectitur. Ib. 1. 20, 67.—Itaque, *quum* longinquā a domo instet militia, incertumque sit quando domos vestras visuri sitis, committam do. Liv. 21. 21. Compare with: Hannibal, *quia* fessum militum praeliis operibusque habebat, paucorum his dierum quietem dedit. Ib. 21. 11.—Dionysius, *quum* in communibus suggestis consistere non auderet, contionari ex turri altā solebat. Cic. Tusc. 5. 20. Compare with: Aricius *quia* palam interfici non poterat, oblato falso crimine insontem oppressit. Liv. 1. 51. It is evident that, in all these passages, *quum* might have been substituted for *quia*, and *quia* for *quum*. Thus clauses with *praesertim quum* (see the passages p. 655, Obs. 2) are often entirely equivalent to clauses introduced by *maxime quod*, *eo magis quod* (*quia*), *eo minus quod*, as: Quanto erat in dies gravior oppugnatio, et maxime *quod*, magnā parte militum confecta, res ad paucitatem defensorum pervenerat, tanto crebriores littere ad Caesarem mittebantur. Cæs. B. G. 5. 45 (= *praesertim quum* res ad paucitatem pervenerat).—*Eo magis quod* pridie Germani retineri non poterant (= *quum praesertim retineri non potuissent*). Ib. 1. 47.—Neque Hispaniam negligendam ratus, *eo minus quod* haud ignarus erat (= *quum praesertim* haud ignarus esset) circumitam ab Romanis eam legatis. Liv. 21. 22.—Causal *quum* can never be connected with any syndetic antecedent.

Obs. 6. *Quoniam* (probably derived from *quum* and *jam*) is used if the action of the clause is represented as known to the person addressed, especially if referring to the addressed person's own acts, or as generally known, whereas with *quia* and *quod* the author means to inform the reader or the person spoken to, of a new fact, not presumed to be known to them. In English this relation is expressed by 'since'. *Quoniam* closely resembles the French *puisque*.<sup>\*</sup> Mostly *quoniam* is used conventionally in particular relations (Obs. 7), but it, also, frequently occurs with the force of both *quia* (*quod*) and *quum*, being distinguished from these conjunctions by the mere fact that the statement in the clause is assumed as known, as:

A. *Quoniam* WITH THE FORCE OF *quia*: *Quoniam* me verbo premis, posthac non dicam 'MISEROS ESSE', sed tantum 'MISEROS'; Since you fight me for a word (improperly used), I will hereafter not say 'miseros esse', but only 'miseros'. Cic. Tusc. 1. 7.—Sed visne, *quoniam* satis jam ambulatum est, locum mutemus, et sermōni reliquo operam demus sedentes? Ib. Leg. 2. 1.—Alit, ut celeriter percurrant censeat, *quoniam* tam propinqua sint castra. Cæs. B. G. 6. 40. Comp. Cæs. B. C. 1. 72; Sall. Jug. 35; 10. 4; Cic. Leg. 3. 2; Ib. Part. Or. 25, 89; O. G. O. 2. 4; Cat. 3. 12, 29; Sen. 23, 84; Plaut. Mil. 4. 2. 54. Often

<sup>\*</sup> Very rarely (and only in anteclassical language and late Latinity) *quoniam* occurs when a fact not known to the person addressed, or new to the reader, is stated as a cause: Quid istuc, inquam, ornati est? *Quoniam*, miser, quod habui peridi. Ter. Eun. 2. 2, 6.

*quoniam* and *quia* occur in the same period, both expressing the same relation, and being both used of known facts. Comp. Cic. Or. 1. 50, 217; Ib. N. D. 1. 39, 109; Ib. Cæs. 1. 2; Ib. Fam. 1. 1.—*Quoniam*, in good prose, does not take the syndetic antecedents of *quia*. However Colum. 12, praef. says: *Quoniam* hunc sexum diligentiae assignaverat natura, ideo timidiorem reddit.

B. *Quoniam* WITH THE FORCE OF *quum*: Est igitur, *quoniam* nihil est ratione melius et in homine et in deo, prima homini cum deo rationis societas. Cic. Leg. 1. 7. 23.—Ex quo intelligitur, *quoniam* Graecorum oratorum praestantissimi sint ei qui fuerunt Athenis, eorum autem principes facile Demosthenes, hunc si qui imitetur, eum et Attice dictum et optime. Ib. O. G. O. 4. 13.—*Quoniam* tantum natura a natura distat, quid mirum est, has dissimilitudines ex differentibus causis esse factas? Ib. Fat. 4.—Et *quoniam* dei facientes adiuvant, prius invocabo eos. Varro R. R. 1.—Adventus Romanorum Latinos ex prope certā fiducia mox capiendae arcis, *quoniam* oppido potirentur (quasi-suboblique), in exiguum de se ipsis spem verterat. Liv. 6. 33. Comp. Ib. 6. 37; 8. 6; Sall. Jug. 3. 1; Cic. Leg. 2. 11, 27; Ib. 3. 13, 30; 3. 16; Part. Or. 9. 33; 21, 72; Fin. 1. 11, 37; Sen. Cons. Helv. 14.—Sometimes *quoniam* and *quum* are coördinate in the same sentence, as: *Quoniamque* expectatione rerum bonarum erigitur animus, recte etiam Spes a Calatino consecrata est...; *quumque* Vesta quasi focum urbis complexa sit, ei colendae virgines praesint. Cic. Leg. 2. 11, 28, 29.—Primum, *quum* orbis terrae divisus sit in duas partis ab Eratosthene, et sine dubio *quoniam* salubrior pars septentrionalis est quam meridiana, dicendum (est) magis eam fuisse opportunitatem ad colendum quam Asiam. Varr. R. R. 2.

Obs. 7. The conventional usages of *quoniam* must be derived from the original temporal meaning of this conjunction (= *quum jam*). In anteclassical language *quoniam* occurs both with the meaning of *quum* (*dum*) temporal, and of *postquam*, as: Is *quoniam* moritur—ita avido ingenio fuit—, numquam indicare id filio voluit suo; When he was dying, he did not wish etc. Plaut. Aul. prol. 9.—*Quoniam* profectus hinc est Charmides; While Ch. was on the point of departure. Ib. Trin. 1. 2, 12.—Ego, *quoniam* in-spexi mulieris sententiam, cepi tabellas, consignavi clanculum, dedi mercatori etc.; After understanding the woman's meaning, I took my tablets etc. Ib. Mil. Gl. 2. 1, 51. So Ib. Merc. 4. 1, 1; Bacch. 2. 3, 56. In classical language there are only traces of this temporal use, without referring also to cause, as: Nunc *quoniam* hominem generavit et ornavit deus, perspicuum sit illud ipsum, per se naturam longius progredi; Let this be understood, that after God created and endowed man, Nature by herself is continuing [his work] Cic. Leg. 1. 9, 27. Indeed, *postquam*, in its second and third meanings, mentioned p. 660, Obs. 1, combines a temporal and causal signification, and *quoniam* is frequently used with similar force, as: Marius anxius trahere cum animo suo ommittere inceptum, *quoniam* frustra erat, an fortunam opperiretur. Sall. Jug. 93. But in this and all similar passages, the fact of the clause (*quoniam* inceptum frustra erat) is represented as known to the reader, having been narrated before, and although *postquam* might have been used in its place, such a substitution of *quoniam* is not admissible in those *Postquam*-clauses, in which the action is mentioned for the first time. It is probable that the anteclassical temporal use of *quoniam* was based on colloquial practice, and that this usage was continued in the following periods of the language. For we find in Festus (s. v. *quoniam*), and Donatus (ad Ter. Ad. prol. 1) the express remark that *quoniam* had the meaning of both *quia* and *postquam*.

Obs. 8. From the original temporal meaning of *quoniam* must, in the first place, be derived its use as denoting a reason, not for the principal action as such, but for its present performance, or for its performance at the time spoken of. Generally, in this instance, the clause contains an action just accomplished, the performance of the principal action being made possible or desirable thereby. *Quoniam*, if thus used, is rendered either by 'after' or by 'since', or by a participial construction, as: Nunc *quoniam* illis, quantum mores mei posebant, respondi, pauca de republica loquar (the 'respondere' being not a cause for the principal act as such, but the accomplishing of the *respondere* making it possible for the speaker to add his other remarks). Sall. Jug. 85, 44.—Sed *quoniam* nos tanti viri res admonuit, idoneum visum est, de natura ejus paucis dicere. Ib. 95.—*Quoniam* respondi postremae tuae paginae primā meā, nunc ad primam revertar tuam. Cic. Att. 6. 2. 3.—*Quoniam* fidem magistri cognovisti, cognoscite nunc discipuli aequitatem. Ib. R. A. 21.—*Quoniam* de communi totius Asiae crimine dictum est, aggrediar jam ad singula. Ib. Flacc. 15.—*Quoniam* nacti te sumus aliquando otiosum, certe audiam quid sit quod Epicurum non probes. Ib. Fin. 1. 5, 14.—Ariovistus legatos mittit: Quod antea de colloquio postulasset, id per se fieri licere, *quoniam* propius accessisset. Cæs. B. G. 1. 42.—Quibus *quoniam* pro pietate satisfecerit, habere nunc se rationem officii. Ib. 5. 27.—*Quoniam* tuta ea pacataque ab tergo relinquebantur, omnibus jam cogitationibus in Philippum conversis. Liv. 33. 2.—Quem Caesar remittit cum mandatis: *Quoniam* ad id tempus facultas colloquendi non fuerit, atque ipse Brundisium sit venturus, interesse reipublicae se cum Pompejo colloqui (i. e.: *Quoniam* facultas adhuc non

spem *resisterent*, creviscent animi, Pœnus, *quia non vicisset* pro victo esset (i. e. with the Saguntians, as the logical subject by whom the predicate '*non vicisset*' is assigned as the reason), clamorem repente oppidani tollunt. Liv. 21, 9 [Here the subjunctives, *resisterent* and *vicisset*, may be taken as subjunctives by attraction, or as conceived by the logical subjects].—Nonnulli principes ex ea civitate venerunt et de suis privatum rebus ab eo petere cœperunt, *quoniam* civitatem consilium non *passent*. Cæs. B. G. 3, 3. Comp. Liv. 6, 36; Cic. Fin. 1, 10, 42; Plaut. Mil. Glor. 3, 2, 46; Liv. 7, 16.—Sometimes causal clauses are placed in the *potential* subjunctive, for instance, if the clause is at the same time the governing proposition of a hypothetical clause (contrary to reality), or if such a hypothetical clause is *understood*, as: Eiusmodi erant situs oppidorum ut neque pedibus aditum haberent, quum ex alto se aestas inciderisset, neque navibus, *quod*, natus minime æstu, naves in vadis *afflaturæ*. Cæs. B. G. 3, 13.—because the ships would be damaged *if* they were in the shallows when the tide would diminish. So '*quoniam* non *fallerent*' in Liv. 7, 36.

B. If the principal sentence is negative, and the negation affects the causal clause, so as to make it *virtually negative* although it has an *affirmative* form (or vice versa), the predicate of the clause is placed in the subjunctive of non-reality, the same as in relative clauses (p. 543), as: Nec vero ille urbem reliquit, *quod* cum iudici non *posset* (= he could defend the city), nec Italianam, *quod* eam *poteretur* (= he was not driven out of Italy) sed etc. Cic. Att. 8, 11, 2. Comp. Cic. R. A. 18, 51.—If the fact stated in such clauses is *real*, the negation referring merely to the reason inferred from it, the predicate is in the *indicative*, as: Nec ideo beneficium novum reficere debet, *quod* nondum prius *reddidit*. Sen. Ben. 4, 40.—From the same reason a subjunctive of non-reality must be used if a causal clause is dependent on the comparative conjunction *quāvis*, so as to become *virtually negative*, as: Substituerunt, *nevis* quia locus luge decet, *quāvis* *quod* animi satis *esset* ad pugnam (= non satis animi erat ad pugnam). Liv. 32, 12.—Libertatis originem inde *magis* quia annum imperium factum est, *quāvis* *quod* *denuntiatur* quicquam *se* ex regia potestate, *numerus*. Liv. 2, 1. Comp. Ib. 40, 22; 3, 13; 5, 29; Sall. Cat. 14; Tac. H. 4, 5.—Sometimes, in clauses of this kind, *quod* is used in place of *quod* analogous to the rules under C. FORMULA 3, as: Benevolentia magis adductus, *quāvis* *quod* res ita *postularet*, Iul. Iugur. Cic. Fam. 6, 3, 1.

C. For periods with causal subjunctives of non-reality, usage has introduced *peculiar conditional forms*, which are represented by the following formulas, all being rendered in the same way by English clauses with '*not that*...*but because*'.

1. Hoc scribo, *non quod* *quid* *credam*, sed *quod* \* (*quāvis* ita dicitur; I write this, *not that because*, I believe it, but because it is said so).
  2. Hoc scribo, *non ut* *credam*, sed *quod* ita dicitur *crederet*.
  3. Hoc scribo, *non quo* *credam*, sed *quod* *quāvis* ita dicitur.
  4. Hoc scribo, *non quia* *travely* *quid*, *quod*, *credam* *sed* *travely* *veram*, *autem* ita dicitur.
- If the predicate of the first clause is negative, the formulas are:
5. Hoc scribo *non quod* (*quod*, *quāvis* *non* *credam*, sed etc. (I write this, *not that I do not believe it*, but etc.).
  6. Hoc scribo *non quāvis* *credam*, sed etc.

EXAMPLES: (a) FORMULA 1. with *non quod*: Pugiles in iactandis castibus ingemiscunt, *non quod* *dolent*, sed *quia* profundam voce omne corpus intenditur. Cic. Tusc. 2, 23. Comp. Ib. Fam. 9, 1; Orat. 39, 134; Or. 2, 75; Leg. Ag. 2, 11; N. D. 3, 56 87; Cæs. 35, 101; Ac. Po. 1, 11, 42; Liv. 28, 32; Quintil. 5, 10, 119.—(b) FORMULA 1. with *non quia*: Fœdus se renovare dixit, *non quia* *probatet*, sed *quia* in nova possessione regni patienda omnia essent. Liv. 42, 25.—This formula is not used by Cicero (except with two negations, see FORM 5), but it often occurs in Livy, and the writers of the silver age. Comp. Liv. 35, 40; 4, 57; Quint. 10, 7, 31; Tac. An. 14, 43; Sen. Cons. Helv. 17; Flor. 2, 15; Hor. Ep. 1, 8, 4 (where the form '*hanc quia*...*sed quia*' is used).—(c) FORMULA 2. This formula generally has the meaning of a final Ut-clause (see p. 476, D, 1), but also occurs in the sense of a causal clause (non ut = non quod), the same as in English '*not that* etc.', as: Eā-sentence, nor (as Madvig says) because the reason assigned is not the real one; but because the clause is represented as conceived by the *subject*. The same mood would have been used, if the principal sentence had been made *affirmative*.

\* Instead of a causal clause, a final clause with *ut* or *ne* may follow *sed* (p. 476, No. D, 1).

† MADVIG (ad Cic. Fin. 2, 13, 43), and HAND. (Tursch. IV, p. 279 foll.) dispute the use of '*non ut*' in the meaning '*non quod*'. They explain the passage Att. 14, 17, quoted in the text, by '*non eo modo ut deliberarem*'. It is strange that they did not see how little this interpretation can remove the causal meaning from this Ut-clause. On the contrary, it is the very way in which every Ut-clause with causal signification must be explained; only that we may change the *general* modal expression *modo*, into the *special* modal expression *causa*. '*Non ut deliberarem*' evidently has the force '*Non ea causa ut deliberarem*', where the form of an Ut-clause of non-reality is in conformity with the

rum exempla tibi misi, *non ut* *deliberarem* reddendæne essent, *sed quod* non dubito etc. Cic. Att. 14, 17, 4 (*not that I deliberate* whether they should be returned; = *non quod deliberarem*).—Hæc ad te scribo, *non ut* *queas* tu demere solitudinem, sed etc. Ib. 11, 15, 3 (*not that you are able to remove my sorrow, but etc.*; = *non quod*). Thus the clauses occur in reversed order: Quorsum hæc præterita? *Quia* sequitur illud etc., *non ut* eas res causam afferrent amoris. Ib. Fato 15, 35 [= Hæc dicta sunt *non ut* (= *quod*) causam afferrent amoris, *sed quia* sequitur etc.]. This formula with '*ut* causal' rarely occurs, on account of its ambiguity, and because it was supplanted by the third formula '*non quo*'.—(d) FORMULA 3. This is the most frequently used among the formulas mentioned (ZUMPT's assertion to the contrary notwithstanding), and is best explained by taking *quo* as equivalent to *ut* *eo*, so that it would be substantially the same as the second formula. Ne id quidem accipi, *non quo* alienum meā dignitate *arbitraret*, sed *quod* tantum rei publicæ sceleris impendere a consiliis non suspicabar. Cic. Prov. Cons. 17, 42. Comp. Cic. Phil. 1, 1, 7, 16; Sest. 40, 87; Cæs. 20, 58; Phil. 1, 4, 9; Verr. 2, 4, 28; Planc. 23, 56; Att. 7, 15; Fam. 5, 19, 2; Liv. 28, 27; 28, 27; 32, 33.—(e) FORMULA 4: Sed me non movet res publica, *non quo* sit mihi quicquam carius, *sed desperatis etiam Hippocrates* *stat* *adhibere* *medicinam*. Cic. Att. 16, 15.—Comp. Ib. Att. 4, 15; Fam. 3, 17, 3; Ib. 10, 12, 3; Or. 3, 24, 93; Brut. 21, 83; Tusc. 1, 1; Liv. 21, 31.—(f) FORMULA 5: Hujus constitutionis Hermagoras inventor esse existimatur, *non quo* non *us* *sint* ea veteres oratores, sed *quia* non animadvertunt artis scriptores eam superiores. Cic. Inv. 1, 11, 16.—Majores nostri in dominum de servo queri noluerunt, *non quia* non *posset* verum inveniri, sed *quia* videbatur indignum. Ib. Mil. 22, 59. Comp. Ib. Verr. 2, 2, 35; Quint. 8, 3, 42; Ib. 2, 2, 2.—(g) FORMULA 6†: Ego me ducem in civili bello negavi esse, *non quin* rectum *esset*, sed *quia*, quod multo rectior fuit, id mihi fraudem tulit. Cic. Att. 7, 26.—Præ me tuli, me nihil male quam pacem, *non quin* eadem timērem quæ illi, *sed ea* bello civili *potiora* *ducebam*. Ib. 8, 11 D, 1.—Comp. Cic. Fam. 4, 7, 1; 16, 24, 1; Or. 2, 72, 295; Orat. 68, 227; Liv. 2, 15, 2; Ib. 32, 32†.

D. *Non quod*, and *non quia* (but not *non quod non*, *non quia non*, nor *non quo* and *non quin*) take the *INDICATIVE* if the predicate of the clause is represented as a *real fact*, which is denied to be a cause for the principal statement (in English: '*not because*'); as: Ælius Sextus 'egregie cordatus' et 'catus' ab Ennio dictus est, *non quod* ea *quæ* *rebat* *quæ* numquam inveniret, sed *quod* ea respondēbat quæ eos, qui quæsisent, et curā et negotio solverent (Ælius Sextus, 'the Sceptic' really sought what he never found, namely the objective truth of things; but this was not the reason why he was called 'catus' etc.). Cic. Rep. 1, 18.—Ego sum exercitus, *non quia* multis *debeo*, sed *quia* sæpe *concurrit*...ut in omni verar ne vix possim gratias vidēri (Cicero really was owing obligations to many; but that was not the reason of his embarrassment). Ib. Planc. 32, 78.—Nec vero hoc, *quia* *sum* *ipse* *augur*, ita sentio, sed *quia* sic existimari nos est necesse. Ib. Leg. 2, 12.—*Non quia* *ades* *presens*, dico hoc. Ter. Ad. 3, 3, 29.—Nam et ille, *non quia* *emit*, leno est, sed, *quia* leno erat, *emit*; nec hic *quia* sic erat locutus occidit, sed *quia* erat occidit, sic locutus est. Quint. 5, 10, 47.—Comp. Cic. P. O. 14, 48; Quint. 5, 10, 56; Ib. 5, 10, 82. The poets, however, sometimes use the indicative with *non quia* (*non*), even if the fact is *non real*, as: Rancidum aprum antiqui laudabant, *non quia* nasus illis nullus erat, sed *quod* etc. Hor. Serm. 2, 2, 89. Also Livy, in a number of passages, uses

principle often mentioned (p. 612, foot-note; p. 608, Obs. 6). In fact, this is the only way in which we can explain our English *That*-clause, used in this connection (= not for the reason that).

\* Most grammarians explain *non quo* by an 'attraction', stating that '*non quod*' is changed into '*non quo*' to agree with the ablative *eo* which may be understood (*non eo quod*). If this were so, we may properly ask why, in the frequent *Quod*-clauses dependent on *eo* without a negation, the same attraction *never* occurs? Moreover this attraction would be entirely without analogy, since in *Latin* relative clauses the case of the relative is *never* (and certainly not in good prose) attracted by its antecedent. The correctness of our explanation is almost made indubitable by the fact that clauses with *non quo* never occur with the *indicative*, as the clauses with *non quod*, and *non quia* (see No. D).

† The *quin* in these clauses may be either explained as the regular conjunction in negative *That*-clauses with negative principal predicates (deriving them from formula 2), or by the original interrogative negative meaning of *quin* (= *not why I should not*).

‡ The use of *quoniam* in these formulas seems to be excluded, because a predicate cannot be at the same time an acknowledged fact, and against reality. Nevertheless we read in Cic. Verr. 2, 1, 9: Ut oratione perpetua, *non quoniam* hoc sit necesse, verum ut experiar utrum ille etc. Madvig has emended this passage (against the codices): '*non quo jam* hoc sit necesse'. But we may explain '*non quoniam*' by saying that Cicero used *quoniam* with the same peculiar force (Obs. 9), as he would have without a negation. But this question can hardly be decided without another passage in which *non quoniam* occurs in this meaning. Such a passage, however, is not extant.

the indicative with reference to *facts non-real*, where Cicero would use the subjunctive, as: Id a Quinctio facile impetratum, *non quia* (Boetios) satis dignos esse credebatur, sed quia, Antiocho rege jam suspecto, favor conciliandus nomini Romano apud civitates erat. Liv. 33, 27. Comp. Ib. 10, 41 (*non quia plus animi rectus est*), and Ib. 40, 33 (*non quia cunctati sunt*). So Colum. 8, ult. Frequently such indicatives are found in the writers of the silver age, as: Virtus magnifica est, *non quia* per se beatum est malo caruisse, sed quia animum laxat. Sen. N. Q. Praef.—Suadente Fusco, *non quia* industriam Flavianum egēbat, sed ut etc. Tac. H. 3, 4. Comp. Gell. 7, 2, 11.—In later Latinity even *non quoniam* is found with the indicative in regard to facts non-real, as: *Non quoniam* nescientes unam derivationem esse hoc fecerunt (inst. of '*non quod hoc facerent*') hoc Cæsar dixit, sed ut etc. Pomp. Comm. Art. Don. p. 108 Lind.—*Non quo*, and *non quin* are never used if the predicate of the clause is represented as a real fact, since neither *quin*, nor *quo* can be construed with the indicative\*.—If the predicate of these causal clauses is a hypothetical preterite, it takes the form mentioned p. 443, No. 3, as: Utinam Kal. Sex. adesse potuissem! *Non quo* profici potuerit aliquid, sed etc. Cic. Phil. 1, 6, 14.—In the writers of the silver age, *non quod* and *non quia* are often found without a finite verb, so that the copula must be supplied, as: Aequalibus animis recepti sunt qui ad Antonium venerant, *non quia* modestior miles (i.e. esset), sed duci plus auctoritatis. Tac. H. 3, 80.

## II. ADVERSATIVE CAUSE. (CONCESSIVE CLAUSES.)

§ 624. CONCESSIVE CLAUSES are either INDEFINITE, or DEFINITE. *Indefinite* concessive clauses are those which contain an action merely assumed by the author (= *even if, however much*). They are introduced by *etiamsi* (with the indicative or subjunctive), *quamvis* with the subjunctive, or *ut* with the subjunctive. *Definite* concessive clauses refer to a certain fact (= *although*), and are introduced by *quamquam* or *etsi* (*tametsi*) with the indicative (rarely by *quamvis*), or by *quum* with the subjunctive (p. 656). The impersonal verb *licet*, if used with the force of a conjunction, belongs to both, definite and indefinite concessive clauses.

Obs. 1. Concessive clauses denote ADVERSATIVE CAUSE, i. e. a cause which, according to general experience, should result in a consequence either *contrary* to, or *different* from that expressed by the principal sentence. Hence they contain both, an *adversative* and a *concessive* element; *adversative*, because the result expresses a *contrast* to the cause; *concessive*, because the author *concedes*, as it were, that there is a fact forming an apparent objection to the principal statement. Therefore, concessive periods are after paraphrased by means of propositions expressly containing the predicate 'to concede' or by ordinary *adversative coordinate* propositions with *tamen* (but, still); as: Fateor (I concede) inestam esse nobis corporis nostri caritatem, *non nego* indulgendum illi: *serviendum nego* (but I deny that we should be its slaves); = Corpori, *etsi* ejus in-ita est caritas, *serviendum tamen* non est. Sen. Ep. 14.—Divitiacum dixit, *scire se illa esse vera*; sese *tamen* amore fraterno commoveri. Cæs. B. G. 1, 20.—Expellitur ex oppido Gergoviā; *non destitit tamen* (= *etsi* ex oppido expulsus est, *tamen* non destitit). Ib. 7, 4.—Indefinite concessive clauses have either the nature of *conditional clauses* (being introduced by *etiamsi*), or of *indefinite relative clauses* (being introduced by *quamvis*). See p. 498 foll.—The *syndetic antecedents* of concessive clauses are *tamen*, *attamen*, *certe*, *nilominus*, which, however, are generally used only in the *apodosis* (as 'post-cedents'), so that the concessive clauses form the *protasis*. If the principal sentence precedes the concessive clause, no syndetic antecedents are used, although sometimes, in anteclassical style, even in this instance *tamen* is used, as: *Tamen* fiet, *etsi* tu fidem servaveris. Plaut. Rud. 5, 2, 63.

Obs. 2. Clauses introduced by *etiamsi* (even if), are a species of *conditional clauses*, and follow in every respect their construction, forming the connecting link between the

\* About the indicative after *non quod* the grammarians disagree. KÜHNER says: 'By the indicative, the cause is represented as REALLY NOT holding good', which is utterly erroneous. MEIRING says: 'Livy and later writers strangely use *non quod* and *non quia* with the indicative' (ignoring the regular use of the indicative).—MADVIG remarks that there are a few exceptions to the use of the subjunctive after *non quod*, quoting the above-cited passage of Horace. The author of the Publ. Sch. Gr. says: 'If the cause denied really exists, but is not the true motive, or if it is one which cannot be supposed to exist, *NON QUOD*, *NON QUIA* take the indicative'. The second part of this rule is evidently made up to suit the one passage of Horace. But neither part of his rule will explain the indicatives used by Livy, Seneca, and Tacitus, in the above-quoted passages.

concessive and conditional clauses. In both, the *Etiamsi*-clauses and *conditional clauses*, the predicate of the clause is represented as an uncertain contingency; but in *conditional clauses* this uncertainty effects the reality of the principal predicate, while in *Etiamsi*-clauses the principal predicate is represented as real or as non-real notwithstanding the uncertainty of the dependent predicate. *Etiamsi*-clauses have this in common with definite concessive clauses, that they become identical with them when the uncertainty of the predicate is removed. Thus the conditional-concessive clause 'Omnia brevia tolerabilia esse debent, *etiamsi* magna sunt' (Cic. Am. 27, 104) becomes a *definite* concessive clause if a definite subject is substituted in the sentence: 'Hic dolor, *etsi* magnus est, tolerabilis esse debet'.—Sometimes, however, *etiamsi* (the same as 'even if' in English) is used in the meaning of *etsi* (although), just as *si* may virtually be equal to *quia*. If so used, *etiamsi* requires the *indicative* (while, if vice versa *etsi* is used in the meaning of *etiamsi*, it very frequently has the *subjunctive*, see Obs. 13); as: *Etiamsi* (although) dudum fuerat ambiguum hoc mihi, nunc non est. Ter. Hec. 4, 4, 26.—Nam ista veritas, *etiamsi* (although) jucunda non est, mihi tamen grata est. Cic. Att. 3, 24.

Obs. 3. *Etiamsi* takes the indicative or subjunctive according as an ordinary conditional clause, if substituted for it, would take an indicative or a subjunctive. See Chapter VI.; as: *Etiamsi* quid scribas non habebis, scribito tamen. Cic. Fam. 16, 26.—*Etiamsi* alterum tantum perdendum est, perdam potius quam sinam etc. Plaut. Ep. 3, 4, 85.—*Etiamsi* caritate a fratre majore vincor, misericordiam certe vinci non debeo. Liv. 40, 15.—*Etiamsi* ruere vellem (contrary to reality), boni viri me ut id non facerem rogarent. Cic. Planc. 38.—Quis, honesta in familia institutus, non ipsa turpitudine, *etiamsi* eum lædura non sit (virtually suboblique), offenditur? Ib. Fin. 3, 11. Comp. Ib. Off. 1, 4, 14; Div. Cæc. 6, 21; N. D. 1, 39, 110; Mil. 8, 21; Fam. 1, 9, 47; Tac. Hist. 1, 9, 47.—Thus Livy, according to the principle explained p. 331, No. C. uses the subjunctive if the principal predicate is an imperfect of contingent action, as: Id maxime, *etiamsi* hæsisset in scuto, nec penetrasset in corpus, pavorem faciebat. Liv. 21, 8.—Cæsar, who does not use *etiamsi*, instead of it employs *si* followed by *etiam*: Ut, si qui *etiam* in presentia se occultassent, tamen his rerum omnium inopia pereundum videretur. Cæs. B. G. 6, 43. Comp. Ib. 7, 9.

Obs. 4. *Quamvis* is a compound of the relative quantitative adverb *quam* (as much) with the 2nd sing. pres. ind. of the verb *velle* (= as much as you wish). But in this composition, *quamvis* conventionally has the force of an *indefinite* relative adverb (= *quancunque*, which does not exist, see p. 501, No. 9), the verb *vis* being in the *indicative*, since indefinite relative clauses require this mood (p. 503, Obs. 12). *Quamvis* occurs both as a relative adverb, and as a concessive conjunction, with the following different functions:

A. It is used as a *CONCESSIVE QUANTITATIVE ADVERB* to qualify adjectives or other adverbs, = 'however' (much, little, rich etc.); 'ever so' (many, few etc.). In this instance, of course, it has nothing to do with the mood of the predicate of its proposition, the 'concessive' idea existing merely in regard to the adjective or adverb thus qualified, as: *Quamvis insignis*, poterat persecutere illam esse etc.; *However stupid*, he might have perceived etc. Plaut. Merc. 4, 1, 21.—Itaque ad quemvis numerum ephippiarum equitum *quamvis pauci* adire audent; Hence *ever so few* (however few, or 'even the smallest number') of them dare to attack any number of horsemen on saddled horses. Cæs. B. G. 4, 2.—Quasi vero mihi difficile sit, *quamvis multos* nominatim proferre. Cic. R. A. 16.—Externus timor *quamvis suspectos invidiososque* inter se jungēbat. Liv. 2, 39.—(Nobiles) quasi pollui consiliū credēbant si eum *quamvis egregius* homo adeptus foret. Sall. Cat. 23, 6.—Tiberius quæstā interdum comitāte *quamvis manifestam* defectionem tegēbat. Tac. Ann. 6, 50.—Stultitiam accusare *quamvis copiose* licet. Cic. Tusc. 3, 30. Comp. Cic. Fam. 2, 16, 2; 7, 3, 6; Phil. 2, 45, 116; Verr. 2, 2, 54; 2, 3, 97; Tac. Hist. 1, 26. Sometimes *quamvis*, in anteclassical and postclassical language, and in the poets, has the meaning of an adverb of intensity without any concessive idea (= *admodum*), as: *Quamvis ridiculus* est, ubi uxor non adest. Plaut. Men. 2, 2, 43.—The poets sometimes use *quantulibet* in the meaning of *quamvis*: *Quantulibet infirmæ* manus. Ov. Am. 1, 7, 66.—Instead of the second person singular *vis*, also the third person singular, or the first, second, and third persons plural, are thus joined with *quam* in the meaning of *quamvis*, as: Expectate facinus *quam vultis improbum*. Cic. Verr. 2, 5, 5. See No. B.

B. *Quamvis*, as a concessive adverb, frequently is used in imperative sentences with predicates in the potential subjunctive (p. 382 foll.) qualifying both predicate-adjectives and verbal predicates. With the latter it has the meaning 'ever so much' (or *however much*), the adverb *quantumvis* being used as its synonym, in silver Latinity\*. Sentences of this kind may either be rendered, according to their original conception, as imperative sentences, or as *concessive clauses*, with 'however' as introducing conjunction, as:

\* *Quantumvis* occurs once in epistolary style = 'very much' (Cic. Att. 7, 3, 12). In Cic. Am. 20, 73, the reading '*quantumvis licet excellas*' is less supported than *quamvis*. Livy uses *quantumlibet* = *quamvis*: Oro vos, *quantumlibet intersit* inter Romanos et Achæos, modo ne in æquo hostes vestri apud vos sint, ac nos socii, jure. Liv. 39, 37.

*Quamvis* hoc turpe sit, tamen, quoniam expedit, faciam; = either: 'May (let) this be ever so disgraceful', or (disgraceful as it may be), I shall yet do it since it is expedient; (or: 'However disgraceful this may be etc.'). Cic. Off. 3, 13.—Quod turpe est, id, *quamvis* occultetur, tamen honestum fieri nullo modo potest; = either: 'May (let) what is disgraceful be ever so much concealed, it cannot by any means become honest; or: 'What is disgraceful, cannot become honest, however much it may be concealed'. Cic. Off. 3, 19. Instead of a mere subjunctive, the periphrasis with *licet* and a subjunctive (p. 382, Obs. 1, p. 617, 9) is frequently used in connection with *quamvis* (also in the construction mentioned No. A); as: *Quamvis licet insectemur* Stoicos, metuo ne philosophi sint ('May we ever so much attack the Stoics', or 'However much we attack the Stoics etc.'). Cic. Tusc. 4, 24.—Præter eos *quamvis* enumeres multos *licet*, nonnullos reperio perniciosos tribunos. Ib. Leg. 3, 10.—*Quamvis licet* Menti delubra consecremus, tamen etc. Ib. N. D. 3, 36.—Non possis, *quamvis licet* excellas, omnis tuos ad amplissimos honores perducere. Ib. Am. 20, 53. Comp. Lucr. 6, 601.—Thus with *quamlibet*, instead of *quamvis*; Nam certe, *quamlibet* parvum sit quod contulerit ætas prior, majora tamen aliqua disceat puer etc. Quint. 1, 1, 18.—So with *quam vultis*, *quam volet* etc.; *Quam volet* illi cedant, tamen ever so much (however much he feels). Cic. N. D. 2, 17.—*Quam volent* illi cedant, tamen revocabuntur; Let them yield as they may (however much they yield). Ib. Phil. 2, 44.—*Quam volumus licet* ipsi nos amemus, tamen, etc. (however much we may love ourselves etc.). Ib. Har. Resp. 9, 19.—*Quamvis* non means 'however little', as: Senectus, *quamvis* non sit gravis, tamen aufert eam viriditatem, in qua etiam nunc erat Scipio (however little burdensome old age may be). Cic. Am. 3, 11.

C. From the constant use of this construction, the adverbial expression *quamvis*, in the conception of the people, became tantamount to a conjunction, and was felt as such. Hence it was used to introduce all kinds of clauses referring to an 'indefinite concessive' and 'quantitative' meaning, if their predicates were in any kind of potential subjunctives, so that we may rather say that *QUAMVIS* is governed by a subjunctive, than that *QUAMVIS* governs a subjunctive. Both the 'indefinite concessive' and 'the quantitative' meanings, at least in the Ciceronian age, are almost always contained in *Quamvis*-clauses. Hence to apply them to a definite concessive relation, and to certain facts, a peculiar circumlocution is used: *Quamvis* ille felix sit, sicut est, tamen etc. May he be ever so happy, as he really is = most happy as he is. Cic. R. A. 8, 22.—*Illam quamvis ridicula essent*, sicut erant, mihi tamen risum non movērunt; Ridiculous as this was, it did not make me laugh. Ib. Fam. 7, 32.—*Quamvis prudens* ad cogitandum sis, sicut es, tamen nunquam ea res tibi tam belle in mentem venire potuit. Ib. Att. 12, 37, 2.—*Quamvis* igitur fuerit acutus, ut fuit, tamen etc. Ib. Ac. Pr. 2, 22, 69.—So Ib. Phil. 2, 28, 68; Ib. 4, 4, 9; Off. 3, 33, 117; Att. 8, 9, 3; Tusc. 1, 18, 41, and often. For ordinary *Quamvis*-clauses compare: Cic. Tusc. 2, 25, 61; Verr. 2, 1, 9; Rep. 1, 33, 37; Off. 2, 7, 24; Or. 1, 53, 230; Ib. 54, 231; Auct. Her. 4, 46; Sen. Cons. Pol. 36; Ib. Ep. 9.

D. Often the intensive force of *quamvis* refers neither to the predicate nor to an adjective or adverb, but to a substantive adjunct of the predicate. In this connection *quamvis* often seems equivalent to *quamquam* (although), but its intensive force will appear at closer examination, as: *Quamvis* enim Themistocles jure laudatur, et sit nomen ejus quam Solonis illustrius, non minus præclarum hoc quam illud judicandum est; However rightfully Themistocles may be praised, and 'however more' illustrious his name may be, — However deserved Themistocles's praise may be, and however much his name may surpass that of Solon etc. Cic. Off. 1, 22.—Nam in qua republica est unus aliquis perpetua potestate, *quamvis* in ea sit sceleratus, tamen illud excelsus regnum nomen; However much of a Sceleratus there may be in a republic etc. Ib. Rep. 2, 23.—*Quamvis* non fueris sanctorum et impiorum perfectionis mea, approbator certe fuisti; However little you may have been the adviser and urger of my departure, you certainly were its approver. Ib. Att. 16, 7, 2. Comp. Tac. Ann. 2, 38; Sen. Cons. Helv. 9. Sometimes, however, the intensive meaning of *quamvis* is so weak that it approaches the meaning of *etiamsi*, while the predicate still retains a potential force, as: Et si munus flagitare, *quamvis* quis ostenderit, ne populus quidem solet nisi concitatus, tamen ego etc.; Although not even the people is wont to insist on a public spectacle 'however much' somebody may have held it out to them, = 'even if somebody has held it out'. Cic. Fam. 9, 8, 1.

Obs. 5. The use of an indicative in *Quamvis*-clauses is extremely rare. It occurs: 1) once in Livy, where *quamvis* retains the meaning 'however much', but without the accessory idea of indefiniteness: Non tibi, *quamvis infesto* animo et minaci perveneras, ingrediendi finis ira cecidit? Did not your anger etc. subside, hostile and threatening as your mind was? Liv. 2, 40 in place of the Ciceronian circumlocution 'quamvis infesto animo perveneras, sicut per te erat'. 2) Once in Cicero, where *quamvis* has the force of *quamquam* (although), being the only authenticated instance of this use in classical language: Hoc ille natus, *quamvis patrem suum nunquam videret*, tamen in paternæ culpæ similitudinem deductus est. Cic. Rab. Post. 9, 4.—3) Once in Nepos with the mean-

ing 'although', where it is doubtful whether '*quamvis*' was used by Nepos himself, or comes from his postclassical epitomist\*: Erat inter eos dignitate regia, *quamvis* carēbat nomine. Nep. Milt. 2.—4) The prose-writers of the silver age frequently use *quamvis* in the meaning of *quamquam*, and sometimes, in this meaning, construe it with the indicative, as: *Quamvis ab omnibus recesserunt*. Sen. Br. Vit. 11.—*Quamvis major XXV annis eam interposuit*. Ulp. Dig. 2, 15, 9. But Seneca, Tacitus, Quintilian etc., generally use the subjunctive after *quamvis*, and *always*, when *quamvis* means 'however much'. Celsus, however, *always* uses the indicative after *quamvis*. That this was not 'the regular construction' in later Latinity, as most grammarians assert, but was always considered as faulty, also appears from the fact that the ancient grammarians (Dion. p. 387; Charis. p. 202) expressly require the subjunctive after *quamvis*, and even declare *quamvis* with the indicative a solecism, even when used by the poets (Charis. 4, p. 240).—5) The poets use *quamvis*, when the metrum forbids a subjunctive, with an indicative, both in its proper meaning, and in the meaning of *etiamsi* and *quamquam*. Comp. Hor. Sat. 1, 3, 29; Ib. Carm. 1, 28, 11; Prop. 1, 18, 13; 2, 4, 29; Virg. Æn. 5, 542.

Obs. 6. The writers of the silver age construe *quamvis* with ablative absolutes, and participles, often with the meaning of *quamquam*, as: *Quamvis flagrante* adhuc Persarum bello. Tac. Ann. 2, 59.—Quæ fato maerent, *quamvis significata* (= *quamvis* sint significata), non vitantur. Ib. Hist. 1, 18. Comp. Ib. 2, 30; Suet. Aug. 72; Cæs. 48. See for this construction Obs. 11.

Obs. 7. The conjunction *licet* (meaning both 'even if', and 'although') is nothing but the impersonal verb *licet*, as construed with an asyndetic subject That-clause, with its predicate in the subjunctive (p. 617, 9). As used in the classical period, and in the better prose-writers of the silver age, *Licet*-clauses may almost always be understood in this way. The constructions with *licet* in the present tense, as an ordinary impersonal verb, contain a 'concessive' element (*licet* = *conceditur*), but without adversative force, being most generally convertible into *Si*-clauses, as: Hic pugnes *licet*, non repugnabo (Here you may fight; I shall not oppose you, = if you fight, I shall not etc.). Cic. Ac. Pr. 2, 18, 37. Comp. Tac. Or. 9. But often it adds an adversative element, and in this instance the sentence is convertible into a clause with *etiamsi* or *quamquam*; as: Sed omnia *licet* concurrant; Idus Martiæ consulantur (= *etiamsi* omnia concurrant). Cic. Att. 14, 4.—Fremant omnes *licet* (= *etiamsi* omnes fremant), dicam quod sentio. Ib. Or. 1, 44.—Si cui sua non videntur amplissima, *licet* totius mundi dominus sit, tamen miser est (= *etiamsi* sit). Sen. Ep. 9. Comp. Cic. Par. 1, 1; R. A. 11, 31; Ac. Pr. 2, 32, 102; Sen. Cons. Helv. 10; Ib. 11; Ib. Cons. Pol. 35; Cons. Marc. 12.—*Licet* tibi, ut scribis significavi, ut ad me venires, tamen intelligo etc. (= *Quamquam* tibi significavi). Cic. Att. 3, 12. Comp. Ib. Fam. 13, 27, 1; Quint. 1, 22; Plin. Ep. 2, 16, 3.—Sometimes *licet*, in these meanings, is placed in the future-present (*licēbit*), but never in a preterite tense, or in any subjunctive, as: *Licēbit* (= *etiamsi*) eum solus ames, me æmulum non habēbis. Cic. Att. 6, 3, 7.—*Licet* cannot be used in the meaning 'although' (or 'even if') if the predicate of the principal sentence is a preterite, since it would in this instance require a tense of preterite consecution, which would be incompatible with the non-preterite form of *licet*. Nevertheless later writers of the silver age sometimes (but very rarely) use *licet* with an imperfect subjunctive, making it dependent on a preterite predicate, as: Nam *licet* tyrannicis vitis semper abundaret, tamen simulatio hæc vitiorum, non natūra erat. Just. 21, 3.—*Licet*, in the jurists, and the later writers (Appulejus, Ammianus, Macrobius etc.), also in the poets, sometimes occurs with an indicative. But this was considered a faulty construction, the ancient grammarians (Dion. p. 387) expressly assigning the subjunctive to *licet*.

Obs. 8. *Ut* (even if) properly means 'granted that' (supply 'faciam' or 'ponam ut', I will grant for argument's sake that etc.; or the clause may be taken as a kind of final clause; see p. 636, Obs. 4). *Ut*-clauses of this kind represent the truth of the concessive statement as 'not acknowledged' but as assumed for the time being: Sed *ut* hæc concedantur, reliqua qui tandem intelligi possunt? Cic. N. D. 3, 16.—*Ut* tibi *concedam* hoc indignum esse, tu mihi concedas necesse est, multo esse indignius discēdi a legibus. Ib. Clu. 53, 146.—*Ut* enim ingeniosi et tardi ita nascantur, non sequitur tamen ut etc. Ib. Fat. 5, 9. Comp. the Ex. quoted p. 636 foll., Obs. 4, 1.—Sometimes *ut* is a mere equivalent of *etiamsi*, as: Ambulatiuncula, *ut* tantum faciūmus quantum in Tusculano fecimus, prope dimidio minoris constabit isto loco. Cic. Att. 13, 39, 2.—*Ut*-clauses of this kind are rarely made dependent on preterite predicates, mostly if suboblique, or virtually so, implying a 'concession' of the subject; as: Ac jam, *ut* omnia contra opinionem acciderent, tamen se plurimum navibus posse perspiciebant. Cæs. B. G. 3, 9. But sometimes *Ut*-clauses of this kind are dependent on preterites, even if not suboblique, as:

\* The grammarians, in this passage, and in Cic. Rab. 2, find fault with the indicative. They should have found fault rather with the meaning in which *quamvis* is used.

*Ut enim neminem alium nisi T. Patinam rogasset, scire potuit illo ipso die a Milone prodi flaminem* (even if he should have asked nobody but T. Patina, he could have known etc.). Cic. Mil. 17. 46.—If concessive *ut*-clauses are NEGATIVE, *ne* is used (not *ut non*), as: *Ne sit summum malum dolor, malum certe est* ('even if', or 'granted that' pain is not the greatest evil, it certainly is an evil). Ib. Tusc. 2. 5.

Obs. 9. *Quamquam*, if merely its etymology is considered, is in the same relation to *etsi*, as *quamvis* is to *etiamsi*. Indeed, in most of the passages where it occurs in ante-classical Latin, it may be taken as an equivalent of *quamvis*, for instance, Plaut. Merc. 2. 2. 16; Ib. 4. 4. 60; but in classical language, and in the silver and later Latin, it is almost never used with reference to the intensity of the predicate, although its derivation from *quam* should seem to imply this meaning.—*Quamquam* corresponds to the English 'although' referring to actions real and definite which, as in an apparent conflict with the principal predicate, are conceded by the speaker. It is peculiar that Caesar never uses *quamquam*, but always (and very frequently) employs *etsi* to express the idea of 'although'. Cicero uses both *etsi* and *quamquam* without any difference, except that *quamquam* is far more frequently used than *etsi* to express the restrictive meaning 'however' (Obs. 12). It has been remarked that Cicero likes to begin his letters with *etsi* (not with *quamquam*), which should seem strange, considering the original meaning of *et*. There are more than 36 Ciceronian letters extant which begin with *etsi*.—In Livy the use of *quamquam* prevails over that of *etsi*. The writers of the silver age use *etsi* more with non-historic, and *quamquam* with historic predicates. Seneca, Tacitus (except once in the *Dialogus*), and Suetonius (except in Tib. 61, where he makes an individual remark) do not use *etsi* at all as a subordinating conjunction, but express the idea 'although' by *quamquam*, or *quamvis*. However, they sometimes use *etsi* as a coördinating conjunction, in which sense *quamquam* does not occur in these writers.

*Quamquam* is regularly construed with the indicative, the *Quamquam*-clause occurring either as a protasis, or as an inserted clause, or following after the principal sentence, as: *Quamquam non venit ad finem tam audax inceptum, tamen haud omnino vanum fuit*. Liv. 10. 32.—*Quamquam jam motus imbecillitatis censerat, tamen Nolam petiit*. Vell. 2. 123.—*Quamquam prope duplicatus legionum numerus erat* Valenti, studia tamen militum in Caeciliam inclinabant. Tac. Hist. 2. 30.—*Romani, quamquam itinere et praetio fessi erant, tamen Metello instructi obviam procedunt*. Sall. Jug. 53.—*Cujus non admodum probata ratio, quamquam floruit quum acumine ingenii, tum admirabili quodam lepore dicendi, proxime a Lacyde solo retenta est*. Cic. Ac. Pr. 2. 6. 16.—Nam Strabo, *quamquam fuit acri ingenio, tamen ab ea disciplina omnino semovendus est*. Ib. Ac. Po. 1. 9. 34.—*Nos autem non possumus quin alii a nobis dissentiant recensere, quamquam nostra quidem causa facilius est, qui verum invenire sine ulla contentione volumus*. Ib. Ac. Pr. 2. 3. 7.

Obs. 10. Sometimes the SUBJUNCTIVE is used in *Quamquam*-clauses. In this respect, the different periods of the language must be distinguished\*. 1) In ANTECLASSICAL language *quamquam* always stands with the INDICATIVE. Comp. Ennius in Cic. Div. 1. 20; Plaut. Merc. 2. 2. 16; Ib. 4. 4. 60; Ib. Pers. 3. 1. 8. Ter. Ad. 2. 1. 5; Ib. Heaut. 1. 1. 1.—2) Cicero, aside from the potential subjunctive in coördinating *Quamquam*-clauses (see Obs. 12), and aside from the suboblique subjunctives, and those passages in which the reading is doubtful†, uses the subjunctive after *quamquam* only in three authenticated

\* The statements of the grammarians about the use of the subjunctive in *Quamquam*-clauses are vague. MADVIG says: 'Sometimes "later writers" use the subjunctive'.—KÜHNER says: 'The writers of the silver age generally use *quamquam* with the subjunctive; but the classical writers do this only when the concession refers to an assertion of "others"'. [This statement is false in every particular.]—MEIRING says: 'In the poets and later prose-writers *quamquam* and *quamvis* are used without any difference with both moods'.—REISIG says: '*Quamquam* and *etsi* are construed with the indicative or subjunctive, according as the statement is represented as actual or as possible', [which, with respect to *quamquam*, is certainly wrong in regard to the classical usage, and as to *etsi*, in regard to the usage of the silver historians. Reisig corrects every passage which will not fit his rule].—ZUMPT strangely says: 'In later writers *quamquam* and *quamvis* have exchanged their meanings [a very palpable error], and *quamquam* is construed with the subjunctive, *quamvis* with the indicative' [which is in glaring contradiction to the facts, and to the rules of the ancient grammarians]. The author of the PUBLIC SCH. GR. (always inclined to enrich the language) has invented a new concessive conjunction, namely *utut*, and says: 'A concessive clause with *quamquam* and *utut* will be indicative, but if suboblique or GNOMIC [this grammarian uses the expression 'gnomic' very frequently, without ever saying what he means by it], the subjunctive. By writers of the silver age, *quamquam* is freely used with the subjunctive'.

† In the following passages: Cic. Off. 1. 2. 6; Ib. 1. 5. 15; Ib. 1. 9. 30; Ib. 1. 17. 56; Ib. Fin. 3. 15. 48; Orat. 51. 172; Planc. 3. 8, the readings are doubtful, the subjunctives rest-

passages: *Nec enim licet eis qui laudem cum dolore petendam esse dicunt, negare eos esse beatos qui eam adepti sunt. Quamquam enim sint* (= For even if they should be) in quibusdam malis, tamen hoc nomen beati longe et late patet. Cic. Tusc. 5. 30. [In this passage, *quamquam* is evidently used with the force of *etiamsi*, the subjunctive being used according to the rules of *Etiamsi*-clauses, Obs. 3].—Atque haec, *quamquam* praesente L. Lucullo loquar, tamen... publicis litteris testata sunt omnia. Ib. Mur. 9. 20.—*Quamquam* autem in amicitia alii dicant, aequae carum esse sapienti rationem amici ac suam, alii autem sibi cuique cariorum suam, tamen hi quoque posteriores fatentur etc. Ib. Fin. 3. 21. [It is evidently impossible to reduce the use of the subjunctive in the last two passages to any rule.]—3) In Nepos, *quamquam* is once construed with a subjunctive: *Nec praeteribo, quamquam nonnullis leve visum iri putem*. Nep. Att. 13, where the subjunctive seems to have the force of a subjunctive of guarded statement (p. 378).—4) In Livy the subjunctive after *quamquam* occurs in two passages without assignable reason: Quinctius, *quamquam moveretur* his vocibus, manu tamen abnuvit, quicquam in se opis esse. Liv. 36. 34.—Ceterum, *quamquam* tales viri mitterentur, quorum de consilio sperari posset imperatores nihil indigne decreturos esse, tamen in senatu agitata est summa consiliorum. Ib. 45. 18.—5) In the writers of the silver age, especially the historians, the construction of *quamquam* with the subjunctive became far more frequent. While Velleius still construes *quamquam* with the indicative only, Tacitus uses the indicative about as often as the subjunctive (without any assignable difference), *quamquam* occurring about 15 times with the subjunctive. Suetonius, however, never uses the indicative after *quamquam*, construing it either according to Obs. 11, without a finite verb, or with the subjunctive (Comp. Tac. Hist. 3. 59; Ib. Ann. 2. 2; 2. 26; 2. 34; 2. 40; 4. 74; 6. 51; Suet. Cae. 3; Ib. 54; Tib. 16; Ner. 22; Galb. 14). Hence there is no inner distinction between the use of the indicative and subjunctive in *Quamquam*-clauses. Originally the indicative was the only mood used, and, in the classical period, was still far more usual than the subjunctive, till in the silver age both moods became equally frequent.

Obs. 11. In the writers of the silver age (but not in classical language) *Quamquam*-clauses very frequently have the form of PARTICIPIAL CLAUSES, being treated like an ordinary participial clause (p. 174. 175) except that they are introduced by *quamquam*. If the subject of the clause does not occur in the principal sentence, or may be eliminated out of the clause by means of a passive construction, the *Quamquam*-clause takes the form of ABLATIVES ABSOLUTE, as: At Germanicus, *quamquam contracto exercitu*, praemittit litteras ad Caeciliam (= *quamquam exercitum contraxerat*). Tac. A. 1. 48.—Posteriore quoque existimo, *quamquam jam discretis professionibus*, nihilo minus instituisse quaedam genera institutionum ad eloquentiam comparandam. Suet. Gram. 5.—But if the subject of the clause is also contained in the principal sentence, it is expressed only in the principal sentence, the participial predicate of the clause agreeing with it, as: Ne Aquitania quidem, *quamquam a Julio Cordo in verba Othonis obstricta*, diu mansit (= *quamquam obstricta erat*). Tac. Hist. 1. 76.—Agrippinam, *quamquam bene convenientem*, dimittere coactus est (= *quamquam ea bene conveniebat*). Suet. Tib. 7.—If the predicate of the clause consists of the copula with a completing predicate, the copula is omitted, as in ordinary participial construction, as: Moris tum erat (*principem*), *quamquam praesentem*, scriptis adire (= *quamquam praesens erat, or esset*). Tac. Ann. 4. 39.—(Erat Tito) praecipuum robur, *quamquam neque proceram staturam, et ventre paullo projectiore* (i. e. erat). Suet. Tit. 3. Comp. Tac. H. 1. 60; 1. 83; 2. 41; 3. 15; 3. 18; 3. 82; 3. 84; 4. 18; 4. 74; Ib. Ann. 1. 37; 1. 55; 1. 65; 2. 57; 2. 75; 3. 30 etc.; Suet. Tib. 3; Ib. 11; Ib. Galb. 14; Ib. Gram. 23; Quint. 9. 3. 52, and often.—This participial form must be considered as the regular construction of *Quamquam*-clauses in the writers of the silver age. It occurs in Tacitus about in the proportion of five to one, as compared with the finite *Quamquam*-clauses. Of the same nature is the participial construction with *quamvis* (mentioned Obs. 6), which, however, is far less frequent than the same construction with *quamquam*.—We must not confound with this construction the omission of the subjunctive in inferior authority, except in one or two passages where the manuscript authority is about equal on both sides. None of these passages can be considered as a proof that Cicero used the subjunctive after *quamquam*. In other passages produced by the grammarians, the subjunctives are either suboblique (as Ac. Po. 1. 8, and Or. 3. 7. 27), or subjunctives by attraction (as Leg. 3. 8. 18, and Fam. 9. 10. 2). In the passage Sall. Jug. 3 (*quamquam delicta corrigas*), the indicative would be faulty, since the second person has the meaning of an indefinite person (p. 413. Obs. 4). Very strangely KÜHNER refers to the following passage, as an example for the use of the subjunctive: Quae, *quamquam ex multis pro tua claritate audiam*, tamen libentissime ex tuis litteris cognoscam. Cic. Fam. 13. 68. 1. He explains *audiam* by '*Quamquam tibi concedo quum dicis me haec audire*', although the addressed person never said, nor could have said anything of the kind. The fact is, that *audiam* is no subjunctive at all, but a future.

of the copula in *Quamquam*-clauses, if the clause has its own subject in the nominative, as: *Quamquam* Tiberio nulla vetus in Aruntem ira (i. e. erat). Tac. Ann. 1. 13. Very rarely *quamquam* connects two PHRASES within a sentence, as: Camillus cum Tiburtibus maxime valido exercitu majore moe, *quamquam* de prospero eventu pugnaret. Liv. 8. 13.—Parthenides et Xenophanes, minus bonis *quamquam* versibus, sed tamen illis versibus, increpant eorum arrogantiam. Cic. Ac. 2. 23.

Obs. 12. Peculiar is the use of *quamquam* for PERIODICAL COÖRDINATION, which is especially frequent in Cicero and Seneca, where it, perhaps, occurs oftener than in all the other writers taken together. In such sentences, *quamquam*, which generally opens a new period, has no 'concessive' meaning, but merely the 'adversative' force of its syndetic antecedent *tamen*, being rendered by 'however', 'but', 'still'. *Quamquam*, if thus used, has the nature of a 'coördinating relative' (see p. 520, R. 9), having the same relation to *tamen*, as a coördinating relative to a coördinating demonstrative (see p. 473, Obs. 2, 4, and p. 520), or as *quum* in an appositive *Quum*-clause (p. 619 foll.) to the demonstrative adverb *tum*. Such propositions, introduced by the coördinating conjunction (or rather 'adverb') *quamquam* are generally used to restrict a previous statement containing a remark made by the speaker in his own name. Frequently a connecting link must be supplied, as: Nam ut sint illa vendibiliora, hæc uberiora certe sunt. *Quamquam* id quidem licēbit eis existimare qui legerint. Cic. Fin. 1. 4, 12 (= However, those may decide it, who etc., i. e. 'However I will not decide this; may those do it who etc.'). Instead of *quamquam*, a proposition with *tamen* might have been used 'Hoc tamen licēbit eis existimare etc.', or 'quod tamen licēbit' according to the relative form mentioned p. 573, No. 5.—Video summi ingenii causam esse... ne omnes potius me arbitrentur cause, quam vos religioni vestre defuisse. *Quamquam* ego (= ego tamen) mihi sic persuadeo, non vos propter juris dubiam rationem moram anquisisse. Ib. Cic. 2. 6. [Here the sentence preceding *quamquam* has the force of a *Quamquam*-clause, while *quamquam* has the force of *tamen*, = 'although the case is difficult, still I believe etc.'].—*Quamquam* quid ego te invitem, a quo jam scio esse præmissos qui tibi ad Forum Aurelium præstolarentur? Ib. Cat. 1. 9, 23 (= However I am wrong in inviting you, since etc.).—Comp. Ib. Ac. Pr. 2. 17, 53; Ac. Po. 1. 4.—In propositions of this kind the *potential subjunctive* may be used, in the same way as in other independent sentences, as: Quare 'BELLE' et 'FESTIVE' nimium saepe dicatur. nolo. *Quamquam* illa ipsa exclamatio 'NON POTEST MELIUS' sit relinere crebra. Cic. Or. 3. 26, 101 (relin, as subjunctive of modest assertion).—At nonnullas tribus punctis prae tunc totidem tulerunt. *Quamquam* ne id quidem jam facti prope superioribus comitiis, declarataque venissent. *Quamquam* ne id quidem suspicionem coitionis habuerit, = But even without this fact there would have been no ground for suspicion (a virtually hypothetical subjunctive). Ib. Planc. 22. 54.—Nollem accidisset tempus in quo perspicere posset quanti Brutum facerem; *quamquam* in consuetudine quotidiana perspexisses, sicut perspicies; = however (but still) you would have seen this from our daily intercourse (virtually hypothetical). Ib. Fam. 3. 10, 2.

Obs. 13. *Etsi* (sometimes *tametsi*), in classical language, has the meaning and construction of *quamquam*, being regularly construed with the *indicative*, as: *Etsi* causa hesterno sermone labefacta est, mihi tamen videtur esse verissima. Cic. Ac. Pr. 2. 4, 10.—Illi, *etsi* ab hoste ea dicebantur, non tamen negligenda existimabant. Cæs. B. G. 5. 28.—*Tametsi* ab duce et a fortibus deserebantur, tamen omnem spem salutis in virtute ponebant. Ib. 5. 34.—Sometimes *etsi* is used instead of *etiamsi*, as: Hoc omnium iudicio intelligi potest qui permulta ob eam causam unam faciunt quia rectum est, *etsi* (even if) nullum consecuturum emolumentum vident. Cic. Fin. 2. 14.—Numquam edepol fugiet, *tametsi* (even if) capital fecerit (fut. perf.). Plant. Men. 1. 1. 6. If *etsi* is used in the meaning of *etiamsi*, it may take the *subjunctive* for the same reasons as *etiamsi* (Obs. 3), as: Sed tandem, *tametsi* podagrosus pedibus esset. Entymus (even if he were etc.), jam rediisse a portu potuit. Plant. Merc. 3. 4. 8.—*Quamquam*, *etsi* priore foedere staretur, satis cantum erat Saguntinis; (= However, even if the former treaty should be considered as valid, the interest of the Saguntians was sufficiently provided for). Liv. 21. 19.—Sed me vera pro gratis loqui, *etsi* meum ingenium non moneret, necessitas cogit (= et cogeret *etiamsi* non moneret). Ib. 3. 68.—*Etsi* nihil aliud Sullæ nisi consilium abstulisset, tamen eo vos contentos esse oportebat. Cic. Sull. 32. 90.—Fabula etiam nonnumquam, *etsi* sit incredibilis, tamen homines commovet. Ib. P. O. 11. 40. Sometimes *etsi* (= *etiamsi*) is thus used with a *logical tense* (see p. 428, Obs. 3): Ubi, *etsi* (= *etiamsi*) adjectum aliquid numero sit, magna certe caedes fuit (= certum est, magnam caedem fuisse). Liv. 3. 8, 10.—Aside from these instances, and from those of subobliquity and attraction, *etsi* is always construed with an *indicative*, nor is *etsi*, like *quamquam*, construed with a *subjunctive* in silver Latinity. There are some passages which are pointed out by grammarians as exceptions to this rule. But they either are quoted with false readings (as for inst. Cic. Fam. 6. 4, 1, where Reisig reads '*etsi* videatur', which is a bad conjecture, instead of *videtur*, or *videtur*, exhibited by the codices), or are misinter-

preted (as Cic. Att. 7. 3, where the subjunctive *expetitur sit* is evidently suboblique, dependent on *negus*).

Obs. 14. The use of *etsi* to introduce PARTICIPIAL clauses (like *quamquam*, and *quamvis*, see Obs. 6 and 11) is extremely rare; but it occurs already in Cæsar: Quare omni ratione esse interdictum peremptum; *etsi* aliquo accepto detrimento, tamen, summā exercitus salvā, locum quem petant capi posse. Cæs. B. C. 1. 67.—*Agis, etsi* a multitudine victus, gloriā tamen omnia vicit. Just. 12, 1.

Obs. 15. *Etsi*, as a coördinating conjunction is used in three different relations: 1) For PERIODICAL COÖRDINATION, in the sense of *quamquam* (Obs. 12), occurring however much more rarely than *quamquam*, as: Mihi etiam qui optime dicunt, tamen, nisi timide ad dicendum accedunt, prae impudentes videntur. *Tametsi* id accidere non potest (= This, however, cannot occur). Cic. Or. 1. 26.—*Etsi* persapienter et quodammodo tacite dat ipsa lex potestatem defendendi. Ib. Mil. 4.—Do, do pœnas temeritatis meae. *Etsi* quæ fuit illa temeritas? Ib. Att. 9. 10.—2) To introduce parenthetical remarks, restricting the universality of a previous statement, as: Qui, quum esset bonis parentibus, crederet eorum nemini (= which, however, is variously stated by the different authorities). Cic. Tus. 5. 20. In the same way, *quamquam* is used: Quod quale sit, non tam definitur intelligi potest (*quamquam* aliquantum potest), quam communis omnium patet. Cic. Fin. 2. 11.—3) In the coördination of phrases, especially of attributive adjectives dependent on the same governing noun. This use is extremely rare in Cicero, but often occurs in Livy, and the writers of the silver age, as: Ei, *etsi* nequāquam parum ingenio, at pro nostro tamen studio merita gratiam debitamque referamus. Cic. Or. 3. 4, 14.—De nobis, *etsi* non iniquum, certe tristis senatusconsultum factum est. Liv. 25. 6.—*Etsi* iniqua bello, prolio tamen, justo, acie aperta, collitis signis omicandum erat. Ib. 38. 11.—*Etsi* non de profecto, at certe de cogitata patricio professam. Suet. Cal. 12. Coördinations of this kind may always be replaced by ordinary adversative coördinations with *sed*, which must be applied to the other phrase or adjective (*non iniquum, sed triste senatusconsultum* etc.). Such coördinations do not occur with *quamvis*. When *quamquam* is used to connect phrases, it introduces the *last*, while *etsi* introduces the *first* phrase (see Obs. 11).

Obs. 16. There are a number of forms in which the idea of a concessive period may be clothed, aside from those by concessive conjunctions; namely 1) in the form of a

\* Some grammarians (for inst. the author of the P. Sch. Gr.) quote: Si mihi obtemperatum esset, *etsi* non optimum, at aliquam remedium haberemus. Cic. Off. 1. 11. But this reading rests on inferior authority. All the better codices read '*si non optimum* etc.'

† The grammarians confound this last construction with the participial constructions mentioned Obs. 6, Obs. 11, and Obs. 14; and with the adverbial construction of *quamvis* mentioned Obs. 4, 1. These constructions are entirely different, and have nothing in common. Since they, also, belong to different periods of the language, the greatest confusion prevails on this point in our grammars. Thus the author of the Publ. Sch. Gr., comprising all these constructions under the expression '*Adverbial use of the concessives to quality words without affecting mood*', states that *etsi* and *quamvis*, but rarely *quamquam*, is so used. But, if we throw all these constructions together, *quamquam* is by far the most frequent in the relation of ten to one; then follows *quamvis*; *etsi* being the rarest. The difference between these constructions will be easily noticed: 1) In the participial construction *quamquam* and *quamvis* and the rare *etsi* are *real* subordinating conjunctions, the predicate, having the form of a participle expressed or understood or it is the copula. They always may be resolved into ordinary concessive clauses, by simply turning the participle into a finite verb.—2) In the adverbial construction of *quamvis* (Obs. 4, 1) there is no participle at all, but the adverb *quamvis* may be resolved into its elements *quam* and *vis*, and thus we may form an adverbial clause, introduced by an *indefinite relative adverb*. Thus the participial construction of *quamvis* in the silver age, and the adverbial construction of *quamvis* in the classical period had a totally different meaning. When Cicero says '*quamvis* expiās' he means by it '*quam expiās vis*, as fully as you wish (= however fully). But when Suetonius says '*quamvis* nullo querente', he does not mean '*quam querente vis*', nor '*quam nullo vis*', but '*quamquam nemo quereret*' (or as he himself would say '*quamvis* nemo quereret').—3) Still more different is *etsi* when it coördinates adjectives. Here the two adjectives have the same relation to each other as the two propositions of a concessive period. There is no participle to be resolved, and no copula to be supplied, *etsi* having not the force of an adverb, but the same force as the coördinating conjunction *sed*, only in a contrary sense. We may analyze these coördinate phrases in the usual way by repeating the principal predicate with each coördinate member. Thus the passage in Liv. 25. 6 may be resolved: *Etsi* non iniquum senatusconsultum factum est, at certe triste senatusconsultum factum est.

Quum-clause (see p. 656); 2) in the form of a concessive Qui-clause (see p. 567, Obs. 4); 3) in the form of a si-clause, either with or without *tamen* in the apodosis, as: Decem vocasset *si* ad cenam summos viros, nimium obsonavit (he would have had too many dishes, *even if* he had invited ten of the most prominent men). Plant. Merc. 4, 2, 3.—Hic noster orator, *si* minus erit doctus (= *etiamsi* minus erit doctus), attamen ipsa exercitatione istos quidem verberabit, neque se ab eis contemni sinet. Cic. Or. 3, 21, 79.—Comp. Ib. Mur. 4, 8; Ib. Sen. 11, 38; Ib. Rep. 1, 27. Sall. Jug. 85, 48; Ter. Eunn. 1, 1.—4) By ABLATIVES ABSOLUTE or ordinary participles without any conjunction, generally with *tamen* or *nihilominus* in the principal sentence, as: Sullam, nudatā omnibus rebus tribuniciā potestate (= *quamquam* nudasset potestatem) *tamen* intercessionem liberam reliquisse. Cæs. B. C. 1, 7.—Ut Varinus dicere solēbat, quum *datis* testibus, alii *tamen* citarentur (= quum, *quamquam* dedisset testis). Cic. Fin. 2, 19.—Hac spe lapsus Indutiomarus, *nihilominus* copias cogere cepit (= *etsi* lapsus erat). Cæs. B. G. 5, 55.—5) By an ordinary co-ordination, with *tamen* in the second proposition: Et æquum postulāre videtur Hadrubal, *et* ego *tamen* non censeo quod petit tribuendum (= *etsi* æquum postulāre videtur, *tamen* ego etc.). Liv. 21, 3. Comp. Cic. Fin. 1, 3, 7.—6) By a co-ordination with *quidem* and *tamen*: Hæ clades Romam quum essent nuntiatae, ingens *quidem* lucus civitatem cepit, *sed tamen*, quia consules etc., minus eis cladibus movebantur (= *quamquam*, his cladibus nuntiatis, ingens luctus civitatem cepit, minus *tamen* etc.). Liv. 25, 22.—7) Often the negative causal clauses mentioned p. 690 may be used in place of a concessive clause. Thus the sentence 'Pugiles in iactandis castibus ingemiscunt, non quia doleant etc.' (Cic. Tusc. 2, 23) may be expressed 'Pugiles ingemiscunt *etsi* non dolent'.—8) By an imperative sentence followed asyndetically by the main sentence, as: Quare *sit* nobis orator in hoc interpretandi genere mirabilis: in augendo, in ornando etc. magis existimātor metuendus, quam admirandus orator (= *Quamvis* mirabilis sit, *tamen* in augendo etc.). Cic. Brut. 39, 146.—Emerserit ex peculatus etiam iudicio: medietur de ducibus hostium quos accepta pecunia liberavit (= *etiamsi* emergerit, medietur *tamen* etc.). Ib. Verr. 2, 1, 5. Here belongs the circumlocution with *finge* in the meaning 'supposing', 'granted for argument's sake': Interfecti aliqui sunt, *finge* a nobis: quid? vos senatores Campanos secūri non percussistis? = Supposing we had killed them, or 'even if we had killed them', did you not behead the Campanian senators? Liv. 39, 37.—9) By the circumlocutions mentioned Obs. 1.

## CHAPTER SIXTH. CONDITIONAL CLAUSES.

§ 625. Conditional periods represent the reality of the principal sentence (THESIS)\* as contingent on the reality of another action, contained in a clause (CONDITIONAL CLAUSE). Conditional clauses are divided into four classes: 1) Clauses of DOUBTFUL REALITY, generally with an *indicative*, but sometimes with a *subjunctive*; 2) Clauses of DOUBTLESS REALITY, always requiring the *indicative*; 3) Clauses of NON-REALITY, with a *subjunctive* in both the thesis and the clause; 4) IMPROPER CONDITIONAL CLAUSES, with moods depending on particular rules. Affirmative conditional clauses are introduced by *si* (sometimes by *sin*, or *sive*); negative conditional clauses, by *nisi*, *si non*, or *ni*.

Obs. 1. While grammatically a conditional clause is dependent on the principal sentence or thesis, logically the thesis is dependent on the condition, since (in proper conditional clauses) the former cannot exist without the latter. From this peculiarity chiefly arises the great variety in treating the mood of the two propositions in conditional periods, since the mood of the clause is partly determined by the nature of the thesis, and partly the mood of the thesis by the nature of the clause. The mood of the

\* For the expressions 'PROTASIS' and 'APODOSIS' see p. 478, Obs. 7. Many grammarians apply these terms improperly to conditional periods only. A Si-clause cannot be a 'protasis' (i. e. preceding proposition) if it follows the thesis, nor can any period begin with an 'apodosis' (= subsequent proposition).

thesis is often a subjunctive *only because* the Si-clause is in this mood, so that we often must supply a Si-clause to account for the subjunctive in the thesis (R. 48, Obs. 4 and 8). Often, on the contrary, the subjunctive of the Si-clause is derived solely from the potential character of the thesis, even if the thesis is *not* in the subjunctive (R. 44, Obs. 16, B); and often the subjunctive in the Si-clause has its own force without being affected by the thesis.—Several kinds of conditional periods have the peculiarity that the reality of the principal sentence (against the definition in § 625) does *not* logically depend on the reality of the Si-clause. In such instances the conditional construction is either a mere grammatical form, belonging to the improper conditional periods (for instance, when *si* has the force of *etiamsi*), or the real thesis must be understood, so that the principal sentence is *not* at the same time the thesis of the conditional period (See R. 48, Obs. 1).

Obs. 2. In conditional clauses of DOUBTFUL REALITY, the reality of the action is represented as questionable and undecided. The thesis denotes either the consequence of the decision (or of 'fulfilling the condition', as: 'If you promise, I will give you etc.'), or contains an action whose present or past existence is made doubtless by the decision, as: 'If Clodius is in the city, we are in danger'. (Here the danger does not begin in consequence of the decision, but exists even before the decision, or does not exist at all).—Conditional clauses of DOUBTLESS REALITY represent the action of the clause as certain, but the reasoning by which the consequence is reached, as liable to doubt (If Brennus defeated the Romans, you may do the same).—In conditional periods of NON-REALITY, the actions of both propositions are represented as *not* happening while they have an affirmative form, or as *really happening* while they are negative, the condition containing a mere fiction of the speaker, and the thesis expressing what would be the consequence of such an action, as: I would prove it, if you denied it (but I do not prove, because you do not deny).—The criterion of these three classes of clauses is the 'decision'. In clauses of doubtful reality, both propositions depend on the decision. But there is no decision in the two other classes, the action of the clause being unconditionally true in clauses of doubtless reality, and unconditionally untrue in clauses of non-reality.—The main difficulties in Latin conditional periods are 1) the choice of mood in either of the two propositional clauses; 2) the choice of tense in periods of non-reality; 3) the form of negative conditional clauses (*si non*, *nisi*, or *ni*)\*.

Obs. 3. A conditional period may contain more than one conditional clause, which may be coordinated to each other, or not. For the different forms of co-ordination see R. 49, Obs. 1, foll. If they are *not* co-ordinate, they must either belong to different classes, or to different divisions of the same class; or one conditional clause may be dependent on another, as: Si quis vestrum forte miratur, me nunc ad accusandum descendere, is, si mei consilii causam cognoverit, id quod facio probabit. Cic. Div. Cæc. 1, 1. The second Si-clause is an improper (temporal) conditional clause (*si*... cognoverit = quum cognoverit, AFTER learning the reason), while the first Si-clause is a clause of doubtful reality.—Si ita Fabia pecunia legata est a viro, si ei viro uxor materfamilias esset, si ea in manum non conveniret, nihil deberetur: If a legacy is left to Fabia, her husband being the heir, on the condition that she be the 'house-wife' of her husband, no legacy is due to her if she did not marry her husband in the form of 'in manum conventio'. Cic. Top. 14. Here the first conditional clause belongs to the conditions denoting exemplification (R. 44, Obs. 17), while the second and third clauses are clauses of doubtful reality (the second referring to the future, and the third to the past), not belonging to the same thesis, since the first conditional clause is at the same time the thesis of the second.

### I. CONDITIONAL CLAUSES OF DOUBTFUL REALITY

Rem. 44. A conditional clause of doubtful reality regularly has its predicate in the INDICATIVE. But the SUBJUNCTIVE may or must be used in the instances mentioned p. 709 foll. The predicate of the THESIS is generally in the indicative *even if the clause has a subjunctive*. But it may be (a) in an independent potential subjunctive, or (b) its subjunctive may be determined by that of the clause (Obs. 11, 13).—The TENSE of the clause,

\* It is customary among grammarians to illustrate the different conditional constructions by certain formulas 'Si dicis, erras'; 'Si dicas errabis' etc. This method is worse than useless, since but a very few of the existing combinations (of which there are more than fifty) can be given, and because periods of very different forms may have the same meaning, while periods of the same forms may refer to conditions altogether different in their nature. We have used the conditional formulas merely to show their changes in oblique discourse, where not the meaning, but the form alone is essential (p. 632).

if in the indicative, is determined either by the general rules, or by the particular rules mentioned below.

#### A. TENSES OF THE INDICATIVE IN CLAUSES OF DOUBTFUL REALITY.

Obs. 1. The mood of a conditional clause of doubtful reality is regularly the INDICATIVE, whatever mood may be used in English. The mood of the THESIS, if the Si-clause has an indicative, may be a *potential subjunctive* (p. 373, R. 79; p. 382, § 594; p. 381, § 593). The TENSE of the CLAUSE, if referring to the time of the speaker, is a PRESENT. In regard to the tense of the THESIS the following distinctions must be made:

A. If the action of the thesis cannot take place except after the fulfilment of the condition, i. e. after or in consequence of the decision of the doubt as to its reality, the tense of the thesis is the FUTURE PRESENT or an equivalent potential form (imperative, potential subjunctive, periphrastics in *das* and *trius*, or one of the potential verbs *posse*, *debere* etc.), as: *Id si est, in hac fortasse manebitur*. Cic. Att. 8.3.7.—*Si hortum in bibliotheca habes, dedit nihil d. e.* 'when I shall come'. Ib. Fam. 9.4.—*Si pace frui volumus, bellum gerendum est*; si bellum arduum, pace nunquam fruamur. Ib. Phil. 7.6.19.—*Frangite igitur sortis, si potestis*, ne molesti sint. Ib. Ac. 2.29.—*Si me saluum esse vis, impame istam vim etc.* Ib. Verr. 2.2.60.—*Si quid forte novi habes, scribas ad me*. Ib. Att. 4.14.2.—*Si et utile est, et fieri potest, fiat*. Ib. P. O. 24.55.—*Formam igitur mihi totius reipublice, si jam es Romae, relinquitis*. Ib. Att. 6.3.4.

B. But if the action of the thesis is represented as coincident with the time of the speaker, and as happening, if happening at all, before the question of its reality is decided, so that the decision is merely suspended at the time being, the predicate of the thesis is placed in the PRESENT, as: *Satis prosum, si perficio ut noluit obesse qui possunt*. Ib. Att. 2.1.8.—*Si erroris (vos) penitet, satis superque peccatum habeo*. Liv. 28.28.—*Si tibi cordi est facere, licet*. Plaut. Most. 1.4.10.—*Mihi gratior illi videtur, si quis est sensus in morte, aenea statua futura quam in aëra*. Cic. Phil. 9.6.13.—*Favet injuriam, si majorem spem emptiois tue in hujus exitio pones quam etc.* Ib. R. A. 59.146.—*Si necis, tui ignosco*. Ib. Fam. 10.26.3.—*Spes est omnibus in vobis: qui si iccirco abestis ut sitis in tuto, ne in vobis quidem (spes est)*. Ib. Fam. 12.2.3.—*Quod si ita putas, totam ignoras viam glorie*. Ib. Phil. 1.14.33.—*Si id agitur ut rursus in potestate omnes unius sint, ei me profiteor esse inimicum*. Ib. Fam. 10.31.3.—*Si tu ea tenes quae putamus, magnis subediis, falsa res publica est* (periphrastic present). Ib. 5.12.2.

C. The predicate of the thesis is placed in a PRETERITE TENSE when a perfect is idiomatically used with the force of a future or present according to p. 303, Obs. 2, as: *Oecidi, si tu vera memoras* (I am a dead man if you speak the truth). Plaut. Most. 2.1.23; 2) to denote the *view of the speaker* concerning a past action in the event that another action (expressed in the conditional clause) should be true, as: *Si homines rationem a dis datam in fraudem convertunt, non dari illam quam dari humano generi melius fuit* (then I am of the opinion that it would have been better not to give reason to mankind than to give it). Cic. N. D. 3.31, 78.—*Antonius, si ita se habet ut configi cum eo sine periculo non possit, non ille mihi fugisse Mutinā videtur, sed locum belli gerendi mutasse*. Ib. Fam. 11.2.2.

Obs. 2. If the action of the Si-clause refers to a time FUTURE to the speaker, the following distinctions are made:

A. Generally both the thesis and the Si-clause have their predicates in the FUTURE PRESENT, or in the periphrastic future, while the predicate of the Si-clause, according to the rule p. 353, Obs. 1; p. 354, Obs. 2, 3, may have its predicate in the FUTURE PERFECT, as: *Scribentur fortasse pueri si vita suppet*. Cic. Fin. 1.4.11.—*Si perscrutaberis, tempus a vobis petemus quo hanc legationem domum referamus*. Liv. 45.24.—*Si mihi probabis ea quae dices, libenter assentiar*. Cic. Fin. 1.8.28.—*Quem tandem titulum nostra calamitas habitura est, si pertūri sumus?* Liv. 45.22.—*Si sciam quid tu constitueris, meum consilium accommodabo potissimum ad tuum*. Cic. Fam. 9.7.2.—*Quem librum ad te mihi tam si descripserint* librarii. Ib. Att. 12.14.3.—*Tu vero bene etiam meritis de tuis civibus, si eos non modo copia rerum avaris, sed etiam verbis, am*. Ib. Ac. 1.7.26.—The future tenses are even then used when the English language employs a potential mood with 'should', as: *Si quid a me pretermisum erit, commissum facinus et admissum dedecus confitebor* (if I should neglect anything, I will confess etc.). Cic. Fam. 3.19.2.—*Cajetam, si quando abomināre capere, ardebo*; *If I should ever be in good circumstances, I will (would) improve the Capetia villa*. Ib. Att. 1.1.3.

B. If the time refers to the *time of the future*, both predicates carry only that of the clause are frequent & placed in the PRESENT, as: *Si diem pretermisum, periculum est* (the omnes copia convenient). Liv. 25.38.—*Sed assequor omnia si propterea*; *si paucior, amilla*. Cic. Att. 10.8.5.—*Castra nunc vobis hostium praedae dno, si mihi: potius enim vos fortiter in acie operum navaturos*. Liv. 7.16.—*Si defenditis, vestri*; *si deseritis, Samnitium erimus*. Ib. 7.29.—*Ante portas est bellum; si inde non pellitur, jam intra moenia erit*. Ib. 3.

68.—This form occurs even if the future is possibly remote, as: *Quod si assequor* (at any future time), *supero* Crassum divitiis, atque omnium vicos et prata contemno. Cic. Att. 1.4.3.—*Si mihi filius genitur, isque prius moritur, tum mihi ille sit heres*. Ib. Or. 2.32, 141.

C. The thesis may be in the PERFECT with the same meaning as when the clause refers to present time, according to Obs. 1, C: *Brutus si conservatus erit, vicimus*. Cic. Fam. 12.6.2. (Comp. the examples p. 303, Obs. 2).—*Tum, hercule, illo die quo ego consul sum creatus, male res gesta publica est, si legem hanc tuleritis* (If you carry that law, then indeed I shall think that it was an evil day for the republic when I was elected consul). Liv. 3.19.

D. If the thesis contains an action holding good at all times, the predicate being placed in the potential future, according to the rules p. 350 foll., R. 75, Obs. 5-7, the predicate of the clause is regularly placed in the future. Such a future in the clause is not a future by virtue of the conditional clause and its own temporal relation, but a dependent future, according to the rule p. 353, R. 76, as: *Adversariorum descriptio infirmabitur, si falsa demonstrabitur*; The statement of the adversaries will be refuted if it is proved false. Cic. Inv. 2.17.54.—*Quo breviter laudato, aut, si erit infame, praetermisso, deinceps, si res patitur, de fortibus erit et facultatibus dicendum*. Ib. P. O. 22.74.—*Defensor primum, si poterit, debet vitam ejus, qui insimulabitur, quam honestissimam demonstrare*. Ib. Inv. 2.11.35.

Obs. 3. The action whose reality is represented as doubtful, may be PAST at the speaker's time. In this instance the predicate of the clause is regularly in the indicative of one of the three past tenses\*, according to the general rules on tenses.

A. The principal predicate is in the FUTURE, or an equivalent potential form (imperative, subjunctive present, gerundial etc.), if the doubt about the reality of the past action must be removed before the action of the thesis can begin, as: *Non utar ea consuetudine, si quid factum est clementer, ut dissolite factum criminer*. Cic. Verr. 2.5.8.—*Si triumphum non cupiebas, cujus tandem te rei cupiditate arsisse defendes?* Ib. Pis. 24.56.—*Nisi jam aliquid factum est per Flaccum, fiet a me*. Ib. Fam. 3.11.9.—*Sapiens nonnumquam magna scelera levius quam minora compescet, si illa lapsu, non crudelitate commissa sunt*. Sen. Ira. 1.16.—*Sinas nutrem percontari quid hoc rei sit, ut, si falso pater dictus sum, aequiore hinc animo discedam*. Liv. 3.48.—*Si qui se vitiorum illecebris dederunt, miseros faciant honores*. Cic. Sen. 66.138.—*Si quem libido in illum gurgitem abripuit, illorum cum cum quibus conjuravit, non suum judicet esse*. Liv. 39.16.—*Si illi metu coacti statum dederunt, confiteare necesse est, te pecunias per vim coegisse*. Cic. Verr. 2.2.61.

B. The predicate of the thesis is in the indicative of one of the PAST TENSES, if the action is represented as coincident with the action of the clause, presupposing the reality of the latter; or it is placed in the PRESENT indicative if represented as existing at the speaker's time, provided the action of the clause was a reality at the time spoken of, as: *Quo in bello si fuit error, communis ei fuit cum senatu*. Cic. Phil. 11.13.34.—*Quodsi nos ad aliquam spem fortuna reservavit, minus est erratum a nobis*. Ib. Fam. 14.4.1.—*Si vi defecti Claudium, dolo malo defecti*. Ib. Tull. 12.29.—*Si non deum irā, nec fūto, sed culpā perimus ad Cannas, cujus tandem ea culpa fuit?* Liv. 25.6.—*Si, quo die ista caedes Romae facta est, ego Athenis eo die fui, in caede interesse non potui*. Cic. Inv. 1.36.—*Si id actum est, et iccirco arma sumpta sunt ut homines postrēmi alienis pecuniis locupletarentur, tum vero in isto bello subactus oppressusque populus Romanus est*. Ib. R. A. 47.—*Si Roma condita est secundo anno Olympiadis septimae, in id saeculum Romuli cecidit aetas, quum jam plena Graecia poetarum esset*. Ib. Rep. 2.10.—*Si tibi illa probabantur, cur non propriis verbis illa tenēbas?* Ib. Fin. 4.22.—*Si magno emerat (decumas), quare putas emptori lucrum addi oportere?* Ib. Verr. 2.3.30.—*Quodsi nullum ante consilium de morte ejus inieras, ad te minime pertinebat*. Ib. R. A. 34.—*Si illi honoris causā statum dederunt, inimici non sunt*. Ib. Verr. 2.2.61.—*Nisi hinc hodie emigravit aut heri, certo reio hic habitare*. Plaut. Most. 4.3.14.—*Si omnes volumus quod arguimur, non distinguimus voluntatem a facto; omnes plectamur*. Liv. 45.24.

C. The principal predicate may be in a HYPOTHETICAL SUBJUNCTIVE of the imperfect or pluperfect. In this instance the principal sentence is not the thesis of the indicative Si-clause, but the real thesis (conceived as a general assertion of the speaker) must be supplied, as: *Si fatum fuit, classis populi Romani interire, etiamsi tripudium solistimum fecissent, classes tamen interissent* (= If this was the decree of fate, it is certain that the fleets would have perished, even if etc.). Cic. Div. 2.8.20.—In such constructions it may be necessary to supply both, the hypothetical Si-clause belonging to the hypothetical thesis, and the thesis proper of the indicative Si-clause, as: *At id neque, si fatum fuerat, effugisset, nec, si non fuerat, in eum casum incidisset* [= If this was (had been)

\* Some grammarians (for instance ARNOLD, PROSE COMPOS. § 441) assert that *si* with the imperfect and pluperfect always takes the subjunctive. This erroneous opinion is refuted by the examples mentioned in the text, and by the regular use of *si* with an imperfect or pluperfect indicative in clauses of repeated action (p. 329, Obs. 1).

clause is introduced by *nisi*, not by *si non* (hence always '*nisi forte*', never '*si non forte*'). as: Cītatō singulos iurejurando adigam, *nisi* cui morbus causa erit. Liv. 24, 16. Quare, *nisi* quid vobis aliud placet, ad illa pergamus. Cic. Orat. 65, 220.—Ego b-illum fœdissimum fore puto, *nisi* qui Parthicus casus ex-riterit. Ib. Art. 7, 26, 3.—Ibitur igitur, et ita quidem ut censes, *nisi* cuius graviōris p-sonae suscipiendæ spes erit ante oblata. Ib. 10, 15, 3.—*Nisi* hinc hodie emigrāvit aut heri, certo scio hic habitāre. Plant. Most. 4, 3, 14.—*Nisi* omnes di me atque homines deserunt, exossābo ego illum. Ib. Pseud. 1, 3, 171.

C. If a negative conditional clause is used to designate an action as one which *must* be done, or *must* hold good in order to avoid certain disadvantages, penalties, or threats expressed in the thesis, the clause is almost always introduced by *nisi*, very rarely by *si non*. In this instance, the *Nisi*-clause has the force of a categorical, affirmative *imperative* if it refers to the action of *another*, and that of a solemn *promise* or *asseveration* if it refers to an act of the *speaker*, as : Quod *nisi* facis, in vincula te duci jubebo. Liv. 6, 15 (= *You must do this else I commit you to jail.*—*Nisi* id confestim facis, ego te ad magistralui. Nep. Ep. 4, 2.—*Moriere* videtur, *nisi* mihi signum tradideris. Cic. Ver. 2, 4, 39. Comp. Liv. 9, 34 ; Ib. 3, 13 ; Ib. 4, 19 ; Cass. B. G. 1, 44 ; Cic. Mil. 27, 75 ; Ib. Ver. 2, 1, 48 ; Ib. Clu. 2, 6 ; Ib. R. A. 5, 12 ; Plant. Pseud. 1, 2, 46.—So, in regard to the speaker's own actions, the clause being equivalent to a pledge : Nulla supplicia recedso, *nisi* paucis diebus hos populos agros nostrorum fufos fugatosque castris exuero. Liv. 3, 68 (= *I p'edge myself to drive them from their camp ; else I submit to every torture.*)—Hæc *nisi* omnia perpexeritis in causâ, temere a nobis illam appellari putatote. Cic. Clu. 6, 18.—*Nisi* intellexeritis (= unless I convince you), *judices*, nullum esse officium tam sanctum, quod non Capitoni scelus violarit, virum optimum esse eum judicatote. Ib. R. A. 38, 109.—Audeat deinde talia atius, *nisi* in hunc insigne jam documentum mortalibus dederò. Liv. 1, 28.—So when the clause is equivalent to a strong asseveration : Occidor, *nisi* ego intro huc propere propero currere. Plant. Aul. 2, 8, 23.—*Nisi* me suspendo, occidi! Ib. Rud. 5, 3, 59.—*Moriar*, *nisi* facite! Cic. Att. 16, 11, 1.—*Peream*, *nisi* sollicitus sum! Cass. in Cic. Fam. 15, 19, 4. So Plant. Most. 1, 3, 35 ; Ib. Trin. 2, 4, 114.

Sometimes (but rarely) conditional clauses referring to a penalty for non-performance, are introduced by *si non*, as: *Si mihi non jam culleis hoc oleum deportabitur, te ipsam culleo ego cras faciam ut deportare in periculum*. Plant. Pseud. 1. 2, 83. This is *always* the case if the sufferer of the penalty, and the doer of the punishable action are different persons, as for instance, when a bondsman or a hostage is to suffer a punishment for another, as: *Damōnem et Phintiam ferunt hoc animo inter se fuisse ut vas factus sit alter ejus sistendi, ut, si ille non revertisset, moriendum esset ipsi*. Cic. Off. 3, 10, 45.—*Obsides etiam sexcenti equites imperatū qui capite luereut si pacto non starētur*. Liv. 9, 5.—*Ariovistum in obsides omnia exempla cruciatuque edere, si qua res non ad nutum ejus facta sit*. Caes. B. G. 1, 31.\*—For the use of *ni*, instead of *nisi*, in clauses referring to penalty for non-performance see Obs. 9, D.—For the use of *nisi* in certain idiomatic phrases see R. 50, Obs. 1-9. For *nisi* in clauses of non-reality see R. 46, Obs. 3.

Obs. 7. In many instances the sense is not essentially affected, whether the thesis is considered as the consequence of a 'not-doing', or as excluded by a 'doing'. In such instances the conditional clause may *either* be introduced by *si non*, or by *nisi*, as: Ego, *si* me navigatio *non* morabitur, quæ incurrēbat in ipsos Etesias, propediem te, ut spero, vidēbo. Cic. Fam. 15. 11. 2. Compare with: Ego, *nisi* quid me Etesia morabuntur, celeriter, ut spero, vos vidēbo. Ib. 2. 15. 7.—Tu autem, *nisi* molestum est, paulisper ex-urge. Ib. Clu. 60. But: Quid actūrus sis, *si* tibi *non* est molestum, rescribas mihi velim. Ib. Fam. 5. 12. 31.—Constitui virtus nullo modo potest, *nisi* ea quæ sunt prima naturæ tenēbit. Ib. Fin. 4. 15. Compare with: Æquitas tollitur omni *si* habere suum culque *non* licet. Ib. Off. 2. 22. 78.—Ante portas est bellum; *si* inde *non* pellitur, jam intra mœnia erit. Liv. 3. 68. But: Ab eis, *nisi* prospiciat, brevi tempore deseremini. Cic. Agr. 1. 9, 26.—For the use of *si non*, and *nisi* in coordinate conditional periods, see Z. 49. Obs. 1.

20.—For the use of *si non*, and *nisi* in coordinate conditional periods, see *R.* 47, Obs. 1. Obs. 8. *Ni* (unless, if not) had a different meaning in the preliterary (archaic), anteclassical, and classical periods of the language. In the archaic period, as far as we can judge from the few monuments extant, and from the later development of the use of *ni*, *ni* was used with the force of *si non* (Obs. 9, A). Of this usage there are still several relics in special connections, both in anteclassical and classical style (Obs. 9, B and C). But in the classical period *ni* was extensively used as an equivalent of *nisi* in most of its meanings, except in those connections where *nisi* has the force of a *coordinating* conjunction (see *R.* 50 Obs. 1-9). Only traces of this use occur in the anteclassical authors. But it became more frequent in Cicero and Sallust, and reached its greatest extent in Livy and Tacitus, who, in clauses of *non-reality*, use *ni* more frequently than both *nisi* and *si non* taken together.—Caesar never uses the conjunction *ni*.

\* If a penalty attached to a non-performance, refers to *indefinite* doers in GENERAL RULES or LAWS, the conditional clause is introduced by *si non*, not by *nisi*, as: *Si quis in jus vocatus non ierit* (not '*nisi...ierit*'), a judge multa damnabitur. Paul. Dig. 2, 5, 2.—*Si non accipit*, quod te debere dicis, accusēs. Cic. Verr. 2, 2, 12.

Obs. 9. The different relations in which *ni* occurs are the following:

[illegible]

B. *Ni*, as an unquestionable relic of archaic style, is used in the sponsio, a judicial act by which a person arrested for debt or crime, was compelled to enter into a covenant with the complainant about the future payment of the debt or mulct in the case of his condemnation. The actor would use the words: 'If you do *not* owe me such a sum' (or 'if you have not committed such a crime'), then I forfeit such a sum' (= *Ni debes* etc., *solvam*). The defendant would say 'If I owe you such a sum' (or 'if I did commit such a crime') 'I shall pay such a sum' (*si debeo* etc., *solvam*). So in criminal suits for certain kinds of slander (*libellus famosus*), the sponsio of the complainant was '*Ni vir bonus sum* etc.', and that of the defendant '*Si vir bonus es* etc.' These sponsions remained, to a certain extent, through the classical period, and if the classical writers refer to a sponsio, they designate its object merely by the *Ni*-clause used in the sponsio of the complainant (rarely by a clause with *si non*, but never by *nisi*). Such clauses cannot be literally rendered; as: Sponsio est '*Ni te Apronius socium in decumis esse dicat*,' Cic. Verr. 2. 3. 59; The sponsio is 'that Apronius acknowledges you (the prætor) as his partner in the collection of the tithes (which was a crime for both the prætor and the collector Apronius) — *Cogere cum erant sponsionem duorum millium nummum facere* '*Ni furtis quæstum faceret*' (that he derive I profit from thefts). Ib. Verr. 2. 5. 54. — *Quum ego cum Pisōnem Caelmontanū introisse dixissem* (which Piso as a triumphator confessed a slander), *sponsione me, ni Esquilinū introisset, accessit*; He compelled me to enter into a sponsion that he had entered by the Esquiline gate. Ib. Pis. 23. — *Quum sponsione nite esset, ni vir bonus esset*. Ib. Off. 3. 19. 77. But: *Jubet Quinctium sponsionem facere, si hont sua ex edicto prætoris dies XXX possessa non essent*. Ib. Quinct. 8. — The same phrasology was applied

[illegible]

D. Both in anteclassical and classical language, *nī* is used in place of *nisi*, if the thesis denotes penalties, disadvantages, or threats in the case that certain future actions are not performed by individuals mentioned (OBS. 6, C): Vapulābis, *nī* hinc abis, ignobile Plaut. Amph. 1.1.284. Ego te in inervum hinc rapiam, *nī* argentum refers : I shall take you to the rack up if you do not return my money or : unless you return !). Ib. Men. 5, 2.96 = (change onto a militibus, *nī* signum detur, sine ducibus itūros. Liv. 22, 42.—*nī* copiam erant, *nī* copia pugnare fiat. Ib. 4. 18.—Quippe quum, Minus ardem se oppugnaturos fremunt, *nī* decernamus, paratam rogationem habes (= You threaten an appeal to the people, unless we immediately decree the province to you). Ib. 28, 45.—*Nī* reddantur, bellum indicere iussos (they were ordered to denounce

war, unless satisfaction was given). Ib. 1, 22\*.—Timēbat iram senātī, *nī* paruiisset legātis. Sall. Jug. 25, 7.—*Nī* tua custōdis avidus, jam haec auferet heres. Hor. Sat. 2, 3, 151.—*Nī* posces ante diem librum cum lumine..., invidiā vel amōre vigil torquebere. Ib. Ep. 1, 2, 34.—Servitum tibi me abducito, *nī* fecero. Plaut. Pseud. 1, 5, 105.

*E.* In the same way the asseverations mentioned Obs. 6, *C.* may be strengthened by *Nī*-clauses, instead of by *Nisi*-clauses, as: *Moriar, nī* puto te malle a Cæsare consuli quam inaurāri. Cic. Fam. 7, 23, 1.—*Peream, nī* piscem putāvi esse. Varro, R. R. 3, 3, 10.—*Perii*, hercle, hodie, *nī* hunc a te abigo. Plaut. Truc. 2, 7, 69.—Di me, pater, omnes oderint, *nī* magis te quam oculos nunc amo meos. Ter. Ad. 4, 5, 66.—Similarly *mīrum*, with the principal predicate *est* understood (= *mīrum est*, or *mīrum esset*; almost of the same force as *moriar, perii* etc.), occurs with a *Nī*-clause in anteclassical style, as: *Mīrum nī* domi est (= I am sure, he is home; literally: A miracle if he is not home). Ter. And. 3, 4, 19.—*Mīrum nī* hic me quasi murenā exorsāre cogitat. Plaut. Amph. 1, 1, 168.—In the same meaning, '*mīra sunt*' is used: *Mīra sunt, nī* Pseudolus est. Plaut. Pseud. 4, 7, 117. See Ib. Bacch. 3, 3, 46; Capt. 4, 2, 25.—In classical style *Nī*-clauses occur with *mīrum*, when the copula is expressed, as: *Mīrumque esse nī* jam exteriorē parte castra hostium oppugnentur. Liv. 3, 28.—Sometimes *nisi* is used, in place of *nī*, after *mīrum*, as: Plaut. Amph. 1, 1, 127; Ib. 1, 1, 275. Similar is the use of *nisi mīrum est* as a parenthetical clause, as: Tu, *nisi mīrum est*, plane perdidisti mulierem (= *mīrum nī* perdidisti). Plaut. Pseud. 4, 7, 114f.

*F.* *Nī* is used with the force of *nisi* in the instance mentioned Obs. 6, *A.*, to represent an action as the only means of excluding the action of the thesis, both with an affirmative, and a negative thesis, as: (Decemviri existimābant) temptatiōnem eam fore abolendi sibi magistrātus, *nī* consensu resisterent. Liv. 3, 38.—Jam prope esse ratus ut, *nī* violentiā eōrum resisteretur, victum imperium esset. Ib. 3, 41.—Galli quum viderent, nequicquam Romānos tot cladibus terros, *nec* flexūros ad deditiōnem animos *nī* vis adhiberetur. Ib. 5, 43.—Ea enim se dictūrum quae, *nī* flant, *nulla* sit pacis conditio. Ib. 22, 33.—Marcellus jussit pugnā *abstinere* (virtually negative) *nī* ab se signum acceperint. Ib. 23, 44.—*Nī* illum recipit, *nihil* est quo me recipiam (except he receives him, I have no refuge). Plaut. Capt. 1, 2, 18.—Qui rempublicam sistere *negat* posse, *nī* ad equestrem ordinem iudicia referantur. Cic. Verr. 2, 3, 96 [HAND, according to his erroneous theory, corrects *nī* in this passage, into *nisi*. But this would require the same correction in almost all the passages quoted above, and in a great many more].

*G.* Quite frequently *nī* is employed in those clauses where, according to Obs. 7, both *nisi* and *si non* might be used, as: Servus indicāvit, quinque nobiles juvenes Campanōrum id incendium fecisse, vulgoque factūros alia, *nī* comprehendantur. Liv. 26, 27.—Ego, *nī* restituitur pugna, fortūnam cum omnibus, infamiam solus sentiam. Ib. 6, 24.—Eam contumeliā, *nī* sibi ab his qui fecerint, dematur, ipsos omni vi depulsūros esse. Ib. 8, 23.—Qui nuntiārent, senātum, *nī* Cornelius consul ad magistrātus subrogandos Roman veniret, potius quam Q. Minucium a bello avocaret, interregnum infri passūrum. Ib. 35, 6.

*H.* Extremely rare is the use of *nī*, instead of *nisi*, if the clause is to the thesis in the relation of an exception to a rule (according to Obs. 6, *B.*), and instead of *si non*, when a *Nisi*-clause would be improper (Obs. 5, *A.*), as: Meus hic est homo, *nī* (= *nisi*) meo omnes di atque homines deserunt. Plaut. Pseud. 2, 2, 6.—Plus auctoritatis Achaei habuē-

\* HAND tries to prove that *nī* has only the force of *si non*, and not of *nisi*, by quoting the above-mentioned passage, and comparing it with the following passage: 'Legātus, *si non* deduntur, quos exposcit, bellum ita indedit. Liv. 1, 32. But in this passage *si non* is correctly used, according to foot-note to Obs. 6, *C.*, and according to our remarks under No. *C* of the present Obs.; since Livy recites the substance of the law concerning the declarations of war, and does not refer to any individual or particular threat.

† From this use of *Nī*-clauses as peculiar forms of asseveration, must probably be derived the origin of the particles *nimīrum*, *quidnī*, and *quippe* (instead of *quidpennī*). *Nimīrum* (of course) stands either instead of the parenthetical '*nī mīrum est*', as in the above-quoted passage of Plautus, or instead of '*nī ita est, mīrum est*'. [There is no analogy whatever, by which the usual derivation of *nimīrum* from *ne mīrum* could be proved.]—*Quidnī* (why not) is = *Quid sit nī* (what would be the matter if not; it would be wonderful if not, = *mīrum nī*). This is best seen from the passages in which *quid* is separated from *nī*, as: *Quid ego nī fleam?* Plaut. Pseud. 1, 1, 94. *Quid ego nī teneam?* Ib. 2, 2, 57.—*Quid illum nī abducit?* Ter. Ad. 4, 5, 28.—*Quippennī* (or *quippinnī*) occurs, separated by one or more words, exactly in the sense of *quidnī*, as: Ps. Nimis tandem ego abs te contemnō. Sr. *Quippe* ego te *nī* contemnā, stratioticus homo qui cluar. Plaut. Pseud. 4, 1, 12. Hence *quippinnī*, written as one word, has the sense of *nimīrum*, as: Ps. Scelestē! Ba. Dicis vera. Ps. Verbero! Ba. *Quippinnī?* Ib. 1, 3, 142. Comp. Ib. Men. 5, 9, 50.—It seems that *quippe*, as it occurs in classical usage, is nothing but *quippinnī* with its *nī* dropped, the usual derivation of *quippe* from *quāpe* being objectionable in several respects. But perhaps *quippe* may have arisen from the mere interrogative *quid* with the suffix *pe*, with a force similar to '*quid? quod?*'

runt, deprecantes, quia, *nī* (= *si non*) impetrassent pacem Boeōtis, bellum simul gerere decreverant. Liv. 33, 29.

*I.* For the use of *nī* in clauses of non-reality see R. 46, Obs. 3.

### C. TENSES OF THE SUBJUNCTIVE IN CLAUSES OF DOUBTFUL REALITY.

Obs. 10. In clauses of doubtful reality the following classes of subjunctives must be distinguished: 1) The subjunctive of IMPROBABILITY (Obs. 11); 2) the subjunctive of ACTIONS DEPENDENT ON THE WILL OF THE PERSON ADDRESSED (Obs. 12); 3) the subjunctive of VIRTUAL NON-REALITY (Obs. 13, 14); 4) the subjunctive in INDEFINITE CONDITIONAL PERIODS (Obs. 15, 16); 5) the subjunctive of EXEMPLIFICATION (Obs. 17); 6) the HISTORICAL subjunctive. The subjunctives enumerated No. 1-4, occur only when the principal predicate is *non-præterite*, and hence their tenses are either the present or the perfect. The historical subjunctive (No. 5) occurs when the principal predicate is *præterite*, and hence its tense is the imperfect or pluperfect\*.

#### 1. Subjunctive of Improbability.

Obs. 11. The subjunctive of improbability represents the condition as not likely to occur, as: Omnes, *si* in Italiā consistat Pompējus, unā erimus; sin cedet, consilii res est. Cic. Att. 7, 10. Here the eventuality of Pompey's staying in Italy is represented as less probable than the other alternative, by placing the former in the subjunctive, and the latter in the future.—Non tantum, *si* proelio viceris, gloriæ adjeceris quantum ademeris *si* quid adversi eveniat. Liv. 30, 30. Here Hannibal represents Scipio's losing the impending battle of Zama as less probable than his winning it, and hence uses the subjunctive '*eveniat*', but the future '*viceris*'.—Istuc quidem, ait Romānus, par omnibus periculum est qui cum hoste ad colloquium congregiuntur, *si* nulla fides sit. Non tamen, inquit rex, T. Quincti, par perfidiæ præmium est, *si* fraude agatur. Philippus et Phæneas. Liv. 32, 32.—So in *Nisi*-clauses if the non-existence of the action is represented as improbable: Quodsi vos, judices, legatis ostendepere debetis, et id facere non potestis, *nisi* id quod scriptum est in lege sequamini, quid causæ est etc.? Cic. Inv. 1, 39, 70.—Frequently the predicate of the thesis is likewise placed in the subjunctive to represent its improbability as equal to that of the condition. In this instance the subjunctive of the thesis derives its force from the subjunctive of the *Si*-clause, according to the peculiarity of conditional clauses mentioned § 625, Obs. 1. This imparts to the conditional period the appearance of a period of *non-reality* (in which *always* the subjunctive of the thesis is logically determined by that of the *Si*-clause), a strong improbability being treated as if it were a non-reality; as: Tum vero nos similes istōrum *simus si* diutius hic morēmur. Liv. 7, 34.—*Si* in tantā scriptōrum turbā mea fama in obscūro sit, nobilitāe ac magnitudine eōrum me, qui nomini officient meo, *consolier*. Liv. Præf. 3 (Here Livy intimates his strong hope that his fame will not remain obscure, and that he will not be in the situation of using the consolation mentioned).—*Sin* eos, qui naturā cives sunt, voluntate hostes, salvos velis, quid tandem intersit inter te et illos? Cic. Phil. 8, 4, 13. Compare with: Qui *si* ea quæ dicit ita sentiret, quid inter eum et Aristonem interesset? Ib. Fin. 4, 22, 60. In both these passages the author means that the persons spoken to and spoken of do *not* think what is stated, but in the first passage it is only represented as very improbable, a stronger form being not chosen, because the course of his reasoning makes it necessary to consider this alternative for a moment as a doubtful possibility. But in the last passage the non-reality of the fact is distinctly stated, and hence hypothetical tenses are used according to R. 46, Obs. 1 foll.).—The same analogy between these

\* The theories of the grammarians on the use of the subjunctive in non-hypothetical conditional clauses are widely apart, and either too vague, or altogether erroneous. Thus KÜNNER requires the subjunctive if the condition is expressed as *uncertain, undecided*, as a *mere supposition*, or *assumption*, or *concession*. If this theory were true, then every conditional clause of doubtful reality would require the subjunctive. Madvig requires the present subjunctive "when a condition that is still possible is assumed and *subjected to reasoning by way of trial*, so as to occur now or at some future time, while it is intimated that it will not actually occur", which hardly intelligible statement is amended by his translator by omitting the italicized words. By this omission, however, almost every distinction between the conditional present subjunctive and the hypothetical imperfect-subjunctive is effaced, not mentioning the fact that the great majority of the present-subjunctives will not accommodate to this rule. What the author means by it, will become clear by our remarks, in Obs. 11, on the passage Cic. Fin. 4, 22, 60.—Some American grammarians have invented a subjunctive of '*lesser vividness and probability*', illustrating it by the following example: '*Hæc si æcum patria loquatur, nonne impetrare debeat?*' Cic. Cat. 1, 8.—Another grammarian (ARNOLD Prose-composition, p. 154) makes the use of the subjunctive dependent on the '*prospect of decision*', saying: Uncertainty with prospect of decision = present subjunctive; uncertainty without prospect = imperfect subjunctive. This utterly unfounded theory is borrowed from the Greek grammarians.

two kinds of conditional periods may be noticed when the assumption refers to the judgment of the author on the correctness of some opinion, as: *Si ex illis quae a Carthaginiensibus passi sumus, aut a vestro presidio nunc patimur, aestimandum Romanum ac Punicum imperium sit, nemo non illos sibi quam vos dominos praefert.* Liv. 29, 17. — If the qualities of Roman and Punic rule were to be decided by what we have been suffering etc., every one would prefer the Carthaginians as rulers. Here the speaker represents the assumption as *contrary to his opinion*, but *still as doubtful*, and as an open question. Hence the period is one of *doubtful reality*, with subjunctives of improbability. Had the author meant to decide positively the question, it would be a period of *non-reality*, requiring hypothetical moods (imperfect subjunctive). — Sometimes subjunctives are used in both propositions when the subjunctive of the thesis is an independent potential subjunctive, as: *Si quis intercedat tertius, perdat fame!* Plaut. Most. 5, 1, 57.

## 2. Subjunctives of actions dependent on the will of the person addressed.

Obs. 12. Subjunctives of this kind refer to actions which the speaker requests from the person spoken to, in the form of a conditional clause. They are used if the compliance by the person addressed is considered as very doubtful, or to impart politeness to the request. The predicate of the thesis may be in the present or future, or likewise in the subjunctive, which derives its force from the subjunctive of the clause, as in the instance mentioned Obs. 11; as: *Pacis aliqua spes est, si eam, quemadmodum, ut victor, fert Hannibal, auditis* (if you will hear it), *et quicquid reliquitur pro munere habituri estis.* Liv. 21, 13. — *Deditis deinde et istos sacrosanctos, sed, si me auditis, hic in comitio estis.* Liv. 9, 9. — *Commodius, si in terram egritatis, ex propinquo aliamus, in vicem audiamusque.* Ib. 32, 32. — *Jubeas, si sapias, haec intro hinc auferri.* Plaut. Merc. 4, 1, 61. — *Si huc item properas, ut istuc properas, jubeas rectius.* Ib. 5, 2, 33.

## 3. Subjunctive of virtual non-reality.

Obs. 13. A conditional clause of VIRTUAL NON-REALITY is a clause in which a DEFINITE (particular) occurrence assumed by the speaker, is assigned to TIME INDEFINITE, so as to refer to the present as well as to the future and past, the thesis expressing the consequence if such a particular fact should ever occur or should have occurred. Periods of this kind regularly have a *present-subjunctive* in both propositions, the same as the corresponding periods of *actual non-reality* (R. 16, Obs. 11), as: *Egabescant profecto milites nostri, si quis eis haec objiciat*: Our soldiers would blush indeed, if any one should reproach them with such a thing. Liv. 3, 6. Here the occurrence itself, assumed by the speaker (*si quis objiciat*), is a particular one, but it is connected with no definable time in the mind of the speaker. Both the condition and the consequence *egabescant* may hold good for the past as well as for the moment of speaking, or for any future time, and hence appear as *mere fictions* assumed by the speaker, which is the reason that they take the same mood and tense as the closely related periods of *non-reality*, mentioned R. 16, Obs. 11. EXAMPLES: *Si quis vos interpellat, milites, ad quam rem in Italia deportati sitis, quid aliud respondetis quam vos triumphantes videri velis?* Liv. 45, 38. — *Si quis apud me te reum velle facere, clamet te lege pecuniarum repetundarum non teneri!* neque huc tuum reusatio confessio *et capta pecunia.* Cic. C. A. 53, 148. — *Si qui se fontes maximos aperuisse dicat, et haec sitiens quum maxime loquatur, neque habet qui sitim sedat, potius ridetur?* Auct. Her. 4, 6. — *Si quis forte velit puerum tibi vendere natum Tibure, et tecum sic agat, des nanctus.* Hor. Ep. 2, 2, 1. — *Si vicinus tuis eorum praeforem habet quam tuus est, tumne equum malis an illius?* Cic. Inv. 1, 31. — *Quid sperem si plus in me videant inimici?* Liv. 6, 18. — *Neque novum, neque inopinatum mihi sit, si audiam Claudie genti nihil antiquius in republica patrum maiestate fuisse.* Ib. 6, 40. — *Si ipse in nos mitis Hannibal esse velit, nihil tamen nobis vita opus esse censeamus quum indigni ut redimeremur a vobis visi simus.* Ib. 22, 59. — *Egabescamus, gloria si par illis viris L. Paulus, injuria mur a vobis visi simus.* Ib. 22, 59. — Sometimes, in clauses of this kind, the principal predicate retroactively refers to a past action, and is then placed in the PERFECT SUBJUNCTIVE (corresponding to an English pluperfect), as: *Tum vero nequicquam hac dextra Capitolium servaverim, si civem meum in servitatem abduci viderem* (I would have saved the Capitol to no purpose etc.). Liv. 6, 14.

\* In ordinary conditional periods of doubtful reality, the speaker always connects the condition with some *particular* (although not *actual*) time at which it may happen or not, while in clauses of virtual non-reality the speaker has no time in his mind to which the fact is assigned. Clauses of this kind being only so far to clauses of doubtful reality, as the question may arise whether the fact assumed *could* or *could not* happen or not, but not because the speaker doubts whether it *will* happen or not at any given time. Hence, in ordinary *Si*-clauses, a clause with *si non*, denoting the opposite eventuality, is always tacitly implied, which is *never* the case in clauses of non-reality, nor in clauses of *virtual non-reality*.

Obs. 14. Sometimes, in conditional periods of this kind, the predicate of the thesis is placed in the *future-present*, or in the indicative of the *periphrastic future*, according to the analogy of those *hypothetical* periods in which the predicate of the thesis is placed in the indicative of a preterite tense (R. 46, Obs. 23), as: *Jam si suffragium detur, hunc, qui vobis manum minatur, eis qui fortunas stabilire volunt, praefertis?* = If you should have to choose between them by your votes, will you (would you) prefer him etc.? Liv. 4, 49. — *Quid, si hostis ad urbem veniat, facilius estis (= facitis)?* quid, si plebs armata veniat? Ib. 3, 52. — *Si fraude, si casu Vejis incendium ortum sit, et flamma magnam partem urbis abstulit, Fidenas inde aut Gabios quaesitari sumus (= quaeramus)?* Ib. 5, 54. — Such constructions, however, are extremely rare, and wherever the predicate of the thesis has one of those forms which are the same both for the future and for the present subjunctive, they should always be considered as *subjunctives*, and not as futures, as: *Si jam vocer ad exitum vitae, non ab ea republica avellar qua carendum esse doleam.* Cic. Fam. 6, 4, 4. — If the author, in conditional clauses referring to time indefinite, means to intimate that the eventually assumed will never happen, the period is one of *non-reality proper*, and takes *hypothetical* tenses (see R. 46, Obs. 4).

## 4. Subjunctive in indefinite conditional periods.

Obs. 15. INDEFINITE CONDITIONAL PERIODS are those in which statements concerning general truths, rules, definitions, general habits and customs, *pertaining to all times* are qualified by conditions, likewise pertaining to all times. The predicates of such periods are generally in the PRESENT INDICATIVE, as: *Aequitas tollitur omnis, si habere snum cuique non licet.* Cic. Off. 2, 22. — In corpore *si* quid ejusmodi est quod reliquo corpori noceat, id uri secarique palimur, ut membrum aliquod potius quam totum corpus intreat. Ib. Phil. 8, 5, 15. — *Offendimur si* quis sermonem nostrum imitatur, *si* quis incessum, *si* quis vitium aliquod corporis aut linguae exprimit. Sen. Const. 17. — The predicate of the clause may be in the PERFECT INDICATIVE, according to p. 300, R. 43, and p. 330, Obs. 5, as: *Nos, si pes condoluit, si dens, si tactum (est) dolore corpus, ferre non possumus.* Cic. Tusc. 2, 22. — *Histrio, si* paulum se movit extra numerum, aut *si* versus pronuntiat est syllaba una brevior aut longior, *exsibilatur et exploditur.* Ib. Par. 3, 2, 26. — *Comp. Ib. Quinct. 15, 49. Ctes. B. G. 6, 13.* If the period contains a general rule, in didactic style, the predicates of both propositions may be in the FUTURE according to p. 351 foll. B. and p. 354, Obs. 2, or one of the two predicates may be in the present indicative, while the other is in the future, as: *Eadem est utilitas uniuscujusque et universorum, quam si* ad se quisque *rapit, dissolvitur* omnis humana consortio. Cic. Off. 3, 6. — *Quod assequimur si caveamus* ne in perturbationes incidamus. Ib. 1, 36. — *Enumeratio vitiosa intelligitur si* aut praeteritum quoddam *dicimus* quod velimus concedere, aut etc. Ib. Inv. 1, 4. — Periods of this kind have this in common with the clauses of virtual non-reality (Obs. 13) that both refer to *undefined time*; but there is this difference that periods of virtual non-reality refer to *particular occurrences*, while the indefinite conditional periods refer to a *whole class of occurrences*, in which the actors and things acted upon are not represented as individuals, but as *kinds*. — For the relation of indefinite conditional periods to the temporal *Si*-clauses (*si* = whenever), see R. 47, Obs. 4.

Obs. 16. Indefinite conditional periods take the SUBJUNCTIVE (present or perfect) in the following instances:

A. If the predicate of the clause is represented as *improbable*, or as a *rare and exceptional occurrence*, the same as in clauses referring to *defined time*, Obs. 11), as: *Turpis excusatio est si quis contra rempublicam se amici causa peccasse fateatur.* Cic. Am. 12, 40. — *Si quis furioso praecepta dei quomodo loqui debeat, erit ipso, quum monēbit, insanius.* Sen. Ep. 94. — *Si aliquando oculi peccent* (rare and exceptional), tamen inest in eis vis videndi. Cic. Div. 2, 52. — *Etiam si tyrannus non sit molestus, tamen est miserrimum, posse si velit.* Ib. Phil. 8, 6. — *Contemnitur via inter errores, etiam si dies noctesque laboramus.* Sen. V. B. 1. — *Suos enim quisque inter principes Galiae opprimi et circumveniri non patitur, neque, ante si facit, ullam inter suos habet auctoritatem.* Cic. B. G. 6, 11. — *Non enim in se parum tinctus habet copia dicendi, si recta intelligentia gubernatur* (which the author considered as a *rare case*). Auct. Her. 1, 1. — If, in this instance, the condition must be conceived as anterior to the consequence, the predicate of the clause is placed in the *perfect subjunctive*, as: *Facile patimur esse quam plurimos accusatores quod innocens, si accusatus sit, absolvi potest.* Cic. R. A. 20, 56. — *Significant canes et canes si qui nocta in Capitolium veniant* (rare and exceptional occurrence). Cic. Ib. — *Si quando non deportati ex provinciâ milites ad triumphum sint, fremunt.* Liv. 45, 38. — Very frequently in such periods the thesis likewise takes a subjunctive, according to Obs. 11, as: *Si grammaticum se professus quisquam barbare loquatur, aut si absurde canat* (is qui se haberi velit musicum, hoc turpius sit quod in eo peccet ejus profectus sententiam). Cic. Tusc. 2, 4. — *Virtus, etiam si laude caret, tamen si se ipsa contenta.* Ib. Phil. 5, 13. — *Non igitur ridiculus sit si quis in lite domesticis testimoniis pugnet?* Auct.

14. Here '*diceres*' if taken in the meaning '*would you say*' would be *real*; but it means 'what *would be your opinion*', which makes the predicate non-real.—The predicates in a period of non-reality must be either both in *hypothetical* moods (subjunctive imperfect or pluperfect), or both in *non-hypothetical* moods (subjunctive present or perfect). Exceptions are extremely rare (see OBS. 10. 14).

fact.) Exceptions are extremely rare (see Obs. 10. 14.).

Obs. 2. The English language does not distinguish between hypothetical and non-hypothetical clauses of non-reality, but indiscriminately uses in both kinds the same forms of the predicates, namely the subjunctive of the preterite ('if I were', 'if I had', 'had I', 'were I'), or the pluperfect ('had I seen it', 'if I had seen it'), or the potential mood of the preterite or pluperfect (would, could, should, would have etc.). These forms are even used in periods of virtual non-reality (R. 44, Obs. 13), whereas the Latin language regularly distinguishes hypothetical periods from other periods of non-reality by the grammatical form of the predicates, except in a few instances where usage admits a choice between these forms (see p. 721 foll.). Periods strictly hypothetical with an affirmative form are either directly used in place of negative sentences (and vice versa), or for certain rhetorical purposes without exactly corresponding to negative sentences, but always implying the speaker's intention to deny the reality of the action, as: Ego, si somnum capere possem, te tam longis epistolis non obtunderem. Cic. Att. 8. 1. 4. Here both propositions may be directly changed into negative, respectively affirmative, sentences (=I annoy you with so long letters, because I cannot sleep).—Qui si ea quae dicat, ita sentiret, quid (=nihil) inter eum et Pyrrhōnem interesset? Ib. Fin. 4. 22. Here, only the Si-clause can be directly changed into a negative sentence, the the- is merely implying the author's sentiment that the statement is contrary to fact: 'He does not mean what he says; else there would be no difference etc.—But: Si quis patricium diceret 'AUT OMNIA ACCIPITE, AUT NIHIL FERŌ', qui (=nemo) vestrum ferret? If any Patrician would say, 'Either accept everything, or I give nothing', which (=none) of you would bear it? Liv. 6. 40. Here the propositions cannot be directly changed into negative and respectively affirmative sentences. But the speaker means to imply that no Patrician ever had said so, nor would say so, and hence both propositions take a hypothetical form. Had present subjunctives been employed (*dicat*, *ferret*), the period would become one of doubtful reality (virtual non-reality, according to R. 44, Obs. 13). If, on the contrary, the author does not mean to represent a non-real fact as contrary to reality, the predicates are not generally placed in hypothetical moods, however impossible the assumed fact may be, as: Hae si patria legatione, nomine imperatoris debeat? Cic. Cat. 1. 8. Here the assumption is *non fact*, because the country cannot make an address, but it is *not hypothetical*, since the author does not mean to deny this inability of the country, but uses the assumption as a mere rhetorical form to inculcate a certain duty. The impossibility of fulfilling the condition, now or in the future, by many grammarians, is erroneously taken as a criterion for the use of hypothetical moods. Very frequently impossible conditions admit of non-hypothetical moods, as in the quoted passage Cic. Cat. 1. 8; and often possible conditions take hypothetical moods, as in the above-quoted example of Liv. 6. 40. So: Paras scribere m. si ipse possem, sed patres bene. Cic. Att. 8. 15. 3.—Adnuere te video; proferrem libros si negares. Ib. 8. D. 1. 40. Here hypotheticals are used, because the speaker implies that he is not going to produce books, although he might directly fulfil this condition.—Frequently the thesis in hypothetical periods takes the form of an interrogative subjunctive, according to p. 381, equivalent to a negative. Such theses must be analyzed as if they were expressed negatively, and hence always are virtually affirmative, as: Quid me prohiberet Epicurēum esse, si probārem quae ille diceret? Cic. Fin. 1. 8; = Nothing would prevent me (but in reality very much prevents me) from being an Epicurean, did I approve etc. Similar is the relation of an ironical affirmation which means negation. If such a thesis is in a hypothetical mood, it becomes affirmative in sense, thus corresponding in meaning to its grammatical form: Scilicet, si ista Jupiter significaret, tam multa frustra fumina mitteret! Cic. Div. 2. 19; = Jupiter would not send (but he does send) so many lightnings in vain, if he meant to intimidate this.

Obs. 3. NEGATIVE CLAUSES OF NON-REALITY are introduced by *nisi*, *si non*, or *ni* (variously rendered by 'if not', 'had it not been for', 'were it not for the fact that', 'but for the fact that'; while '*unless*' can hardly ever be used with propriety in clauses of non-reality). There is no distinction between *nisi* and *si non* in clauses of this kind, except that '*si non*' must be used if the negation belongs to particular terms of the clause to which another term is opposed by co-ordination, as: '*Si non magis sequebatur, sed pedita audiretis*, tamen appareret, ut esset instigator.' (Cic. Mil. 20, 53. — *Si non Heronquius ad Hannibalem defecisset, sed populus Syracusanus de sena n.*, quid aliter quam quod fecerit facere hostiliter Marcellum potuisse? Liv. 25, 30\* — *Ni* is used in all the instances in

\* HAND (Turs. IV, 225) states that there is the same distinction between *nisi* and *si non* in clauses of non-reality, as in ordinary conditional clauses, *nisi* denoting an exclu-

which *nisi* would be correct, and is quite often thus used by Cicero, as: *Dicerem quæ antea iudra dixissem, nî verer̃er ne ex eventis fingere viderer.* Cic. Fam. 6. 6. 6.—*Quod nî ita putarem.* Ipse scriberem. Ib. 12, 23. 2.—*Statim Arpinum irem, nî te in Formiano expectari viderem.* Ib. Att. 2, 14, 2.—In Livy *nî* occurs in this sense in nearly a hundred passages, being more frequently used than both *si non* and *nisi* together. Livy generally uses *nisi* (not *nî*) after a conjunction, as: *Quin, nisi ista mora interirent, castra eodem die caperetur.* Liv. 24, 42. Compare with: *Cepissent castra, nî se tanta vis aquæ deieisset, ut vix in castra se receperint victores.* Ib. 28, 15.—*Uî nisi Cretensium quidam agmen hostium procul conspexissent, opprimi poterit.* Ib. Comp.: *Oppressique forent Romani, nî clamor ab eis qui erant extra arcem subleatus, omnia vana fecisset.* Ib. 29, 6\*.

Obs. 4. All periods of non-reality are either *definite* (particular) or *indefinite*, in the same sense, as these expressions are taken in periods of doubtful and doubtless reality (R. 44, Obs. 15). Indefinite conditional periods are considered as *hypothetical* if they are assumed contrary to *truth*, i. e. contrary to a fact holding good in *all* times, as: *Si semper optima tenēre possemus, haud sane consilio multum egeremus*. Cic. P. O. 25, 89. It is not necessary that the general facts contained in such periods should be represented as absolutely impossible; it is enough if the author represents the assumption as contrary to *general* experience, as: *Quodsi in secundis rebus bonam quoque mentem darent dei, non ea solum quae evenissent, sed etiam ea quae evenire possent reputaremus*. Liv. 30, 30.—A hypothetical period may be *indefinite* in the hypothesis, and *definite* (particular) in the thesis, as: *Quodsi in bello dari vicarii solerent, libenter me pro D. Bruto inclid paterer*. Cic. Phil. 12, 2, 4. The rules about the use of hypothetical or non-hypothetical moods in indefinite periods of non-reality are the same as those for *particular* conditional periods of non-reality. Only when indefinite periods of this kind are used in certain forms of syllogisms, a freer treatment of mood and tense is admitted. See Obs. 15.

Obs. 5. The use of mood and tense in periods of non-reality is regulated by the following rule: If the predicate of either, or of both, of the two propositions refers to a time *present* or *future* in regard to the moment of speaking, it takes the IMPERFECT SUBJUNCTIVE, corresponding to the indicative, subjunctive, or potential mood of the preterite tense in English; but if the predicate, as above, refers to a *past* time, it takes the PLUPERFECT SUBJUNCTIVE, corresponding to the indicative and potential moods of the same tense in English. To these rules there are several exceptions, referring 1) to the use of the NON-HYPOTHETICAL MOODS, 2) to the use of an IMPERFECT in place of a PLUPERFECT; and 3) to the use of the INDICATIVE of the three preterite tenses, and also sometimes of the present and future. These exceptions differ according to the relation of the two predicates to the TIME OF THE SPEAKER. Hence the following instances must be distinguished: 1) Both predicates referring to present or future time; 2) both predicates referring to the past; 3) one of the two predicates referring to the present or future, and the other to the past.—Sometimes in the thesis of a hypothetical clause the finite

sion of the contrary of the thesis, and *si non* a consequence of a negative assumption". But, in clauses of non-reality *both* of these alternatives coincide and include each other, which is the reason that the Latin uses *nisi* and *si non* without distinction in these clauses, as: *Cederem te, nisi irascerer*. Sen. Ira. 1, 15; = 'My being angry *excludes* my striking you'; but also = 'my not being angry (as assumed) would have the *consequence* that I would strike you'. HAND tries to establish his theory by the following example: '*Quae cogitatio si non incidisset, non laborarem*'; Had this consideration not arisen in me, I would not be in distress'. Cic. Att. 13. 32. HAND says, "It would have been 'ABSURD' to use in this sentence the conjunction *nisi*", which is a very palpable mistake, according to HAND's own theory, since the sentence evidently means: 'The *not happening* of this consideration would have *excluded* my distress'. Thus *nisi* is used in the following similar passage: *Non sustinuisse Romanis* (in the same relation as '*non laborarem*' in the Ciceronian passage) *nisi tantum ad Romanos incidisset* (as: *si non incidisset*) in the Ciceroian passage. Liv. 29, 6. So: *Qui nisi in hac republica natus esset, rempublicam sceleris Antonii non iam haberet*. Cic. Phil. 3, 2, 5. Comp. Liv. 28, 36.

\* The following enumeration of *part* of the passages in which *nī* is used with the force of *nīsi* in periods of non-reality, will refute the statement of the grammarians that *nī* is obsolete, and rare, being used only in some few conventional phrases: Cic. Att. 3, 14, 1; 16, 15, 3; Fam. 2, 6, 5; 3, 10, 7; 4, 1, 1; 6, 6, 6; 9, 21, 4; 12, 23, 2; Tusc. 5, 11, 33; 5, 39, 115; Sen. 11, 35; 14, 67; 23, 82; Plin. 3, 20, 66; N. D. 1, 37; 1, 44, 121; Div. 2, 21, 53; Off. 2, 19, 67; 3, 29, 108; Inv. 2, 32, 99; Ver. 2, 3, 61; Pis. 29, 71; Phil. 11, 1, 26; 11, 12, 27; 13, 6, 13, 14, 1; 2, 10, 34 (twice); 15, 50, 51, 57, 61, 65; 16, 43, 70; 19, 49; v. 36, 36; vi. 3, 21; vii. 7, 14; ix, 14 (twice); 32, 40, 41, 42; x, 11, 15, 36, 37, 41, 45; xxii, 22; xxiii, 1, 14; xxv, 37; xxvi, 26; xxvii, 42; xxviii, 15, 22, 30; xxix, 2, 6, 10; xxx, 18 (three times); xxxi, 43; xxxiii, 5, 17, 25; xxxiv, 28, 29, 62; xxxv, 1; xlii, 43.—Tacitus uses *nī* in the same way as Livy.—For the anteclassical use of *nī* in clauses of non-reality, comp. Plaut. Cist. 2, 3, 81; Pseud. 5, 2, 38; Trin. 1, 1, 3; Merc. 3, 4, 4; Aul. 3, 5, 49; 4, 6, 3; 4, 10, 12; Ter. Hec. 2, 1, 23.

*dicere ausim*. Liv. Præf. 1.—Sometimes (rarely) a negative thesis is in the imperfect subjunctive, with a present subjunctive of the hypothesis, when the negation of the thesis is combined with the hypothesis in the form '*ne si... quidem*' (see R. 47, Obs. 3, 2), as: *Ne si navigare quidem velim, uti gubernarem ut somnarem*. Cic. Div. 2, 59, 122 (I would not steer my ship according to a dream, even if I really intended to sail).

Obs. 15. If a hypothetical period is employed as a link in a syllogism, to prove by the 'argumentum ex contrario' the truth or falsity of the fact assumed in the clause, the predicates of the two propositions are generally placed in the IMPERFECT subjunctive, as: *Si cadere in sapientem aggruādo, cadere etiam incauēdo*. Quia quoniam vacat, aggritudine etiam vacabit. Cic. Tusc. 3. 9. [Here the 'contrary' of '*si... cadere*' etc. is the thema probandum, and the proof is given by assuming the contrary to be true, per argumentum ex contrario. Hence both the condition and the conclusion are hypothetical.]—*Si bonum esset ira, perfectissimum quemque sequeretur*. Sen. Ira. 1. 13.—*Quod si ita se haberet, nec iustitia ullus esset, nec bonitatis locus*. Cic. Fin. 3. 20.—*Divitias nego bonum esse, nam si essent, bonos facerent*. Sen. Vit. B. 24.—But often periods of this kind take the present subjunctive: *Quod si ita se habuit, non possit beatam vitam preestare sapientia*. Cic. Fin. 5. 5. 12.—*Nam si hoc non oblectaret, id solum bonum esse quod honestum sit, nullo modo probari possit, beatam vitam virtute effici*. Ib. 3. 3. 11.—*Nam si eurent di hominibus, bene bonis sit, male malis, quod nunc abest*. Ib. N. D. 3. 32. 79 (poet.).—Still more frequent is the use of the PRESENT INDICATIVE in hypothetical periods of this kind, as: *Si talis disjunctio falsa esse potest, nulla vera est* (= Such a disjunction cannot be false; else none would be true, which to assume would be absurd). Cic. Ac. Pr. 2. 30.—*Nam si id quod raro fit, id portentum putandum est, sapientem esse portentum est*. Ib. Div. 2. 28. 61.—*Iustitia per se est expetenda; quod si ita est, omnino iustitia nulla est*. Ib. Leg. 1. 18.—*Mundi divina in homines moderatio profecto nulla est, si in ea discernimen nullum est bonorum et malorum*. Ib. N. D. 3. 35.—*Achilles si deus est, et Orpheus et Rhesus di sunt*, Musæ matre nati. Si hi di non sunt, portum qd. dicitur Rhesus, Orpheus, quia nusquam coluntur, quomodo illi sunt? Ib. 3. 18. 45.—Often the predicate of the thesis is in the future-present: *Si bono viro ob mala factiora miseri cesserunt, et ob secundas res malorum hominum invidere cœperunt*. Sen. Ira. 1. 16.—The predicate of the thesis may also be in the perfect indicative (with the force of a hypothetical pluperfect subjunctive), as: *Si solum illud est Atricum, ne Pericles quidem dicitur*. *Atque si esset Atricum, ne Pericles quidem diceretur*, i. e. then it would be certain that not even Pericles had an Atric style. Cic. Orat. 9. 29.—*Quod si ita est, qua, malum, stultitiā fuit Roscius?* Were this so (but it is not), of what stultitiā would Roscius have been? Cic. R. Com. 18. 56.—Sometimes the Si-clause is placed in the future indicative, while the thesis is in the subjunctive imperfect or present, as: *Cur, quod in sinu vestro est, excuti jubetis potius quam novatis, nisi aliqua fraus subest?* Liv. 6. 15.

2. *Moods in periods of non-reality, both propositions referring to the Past.*

Obs. 16. If a hypothetical period refers to a time anterior to that of the speaker, both propositions generally take the PLUPERFECT SUBJUNCTIVE, as: *Plancus, si senātum dilexisset, numquam curiam incendisset.* Cic. Phil. 13, 12.—*Hoc bellum, si prima satis prospera fuissent, haud dubie ad Romanos pervenisset.* Liv. 8, 3.—*Philippus, si diutius vixisset, id bellum gessisset.* Ib. 33, 23.—*Qui consul esset factus, nisi in Mariānos consul-gatus incidisset.* Cic. Brut. 47, 175.—*Quod in fecisset Caesar, unum in locum omnes adversariōrum copiae convenissent.* Ib. Div. 2, 24.—*Me, si vis non fuisset, nulla res labefaciēre potuisset.* Ib. Sest. 60, 127.—To this rule there are the following EXCEPTIONS, in which IMPERFECT subjunctives are used with the force of English PLUPERFECTS: 1) If the period, referring to past actions, might have taken PRESENT subjunctives if transferred to present time (Obs. 17).—2) If the thesis contains an INTERROGATIVE subjunctive (Obs. 18).—3) If both propositions refer to past time, and the clause is either represented as COINCIDENT with, or PRECEDING in time, the predicate of the thesis (Obs. 19, 20).

Obs. 17. If a past hypothetical period is such that the predicates would or might have taken PRESENT SUBJUNCTIVES, according to Obs. 11-15, if referred to present time, both predicates are generally placed in the IMPERFECT SUBJUNCTIVE with the force of an English PLUPERFECT, the same as in the analogous instances of clauses of *virtual non-reality* (p. 710). Hence this construction occurs: 1) if the fact assumed in the hypothesis is a fiction referring to SUPERNATURAL ACTS (Obs. 11), for inst., to mythological fictions, as: *Si Prometheus, quum mortalibus ignem dividere vellet, ipse a vicinis carbunculos corrogâret, non ridiculus videretur?* If Prometheus, when he was going to carry fire to the mortals, *had himself been begging* lighted coals from his neighbors, *would he not have seemed* ridiculous? Auct. Her. 4. 6.—At (si) *dares* hanc vim M. Crasso ut digitòrum percussione posset heres scriptus esse qui *verè* non esset heres, in foro, mihi crede, *sallàret*\*; But *had you given* to M. Crassus (who was dead at the time of speak-

\* This passage is preceded by a similar passage, referring to the present, with PRES.

ing) the power to smuggle, by a snap of his fingers, the name of a person not being an heir, as an heir into a will, he *would have danced* in the forum. Cic. Off. 3, 19, 75.—2) If the predicate of the clause contains the SPEAKER'S OWN ACT which, at the time spoken of, he might have performed, but *did not* perform on account of the statement in the thesis (Obs. 13), as: Ac tum *si* dicerem, non audirer; Had I spoken then, I *would not have been heard*. Cic. Clu. 29 (referred to the present: Si hoc dicam, non audiar; ergo non dicam).—Superbe me *fastid*er facere (= lateor me factūm fuisse) *si*, priusquam in Africam trajecissem, te *tuā* voluntate cedentem Italiā *asp*ernārer; I *would have acted arrogantly, had I rejected* your offers etc. Liv. 30, 31 (referring to the present: *Superbe facium si asperner*).—3) If the hypothetical clause is CONCESSIVE (Obs. 14), being either introduced by *etiamsi*, or *si* with the force of *etiamsi*, as: Atque ille, *etiamsi* aliā quāpiam vi *expeller*etur (would have been expelled) eis temporibus ex hac urbe, facile *pater*etur. Cic. Sest. 29.—Roscius, *si* nihil *dicer*et (even if he had said nothing), tacito ipso officio et studio quod habēbat erga propinquum suum, quemvis *commor*eret. Ib. Quinct. 25.—Etiam si tum *ven*iret, me tamen socium suūrum consiliōrum vidēre *posset*. Ib. Sest. 29, 63.—Eque vox umquam est audita consilium? Quamquam quis *aud*iret, *si* *maxim*e queri *vel*lent? Ib. 30, 64.—*Si* *fac*eres (in edicto) potestatem oratōri non modo *re*jiendi, sed etiam *su*mmi recuperatōres, tamen hoc novum genus injuriæ ferre nemo *posset*. Ib. Verr. 2, 3, 13. Comp. Fin. 2, 20, 60.—4) If a hypothetical clause is used as an assumption for the 'argumentum ex contrario' (Obs. 15): Numquam *perp*eterērent homines injuriæ tuæ remedium morte quererent, *nisi* ea res ad quæstum et ad prædam tuam *p*ertinēret; You *would never have suffered* that people should seek a remedy for your outrages in death, *had this not been* a matter of profit and plunder for you. Cic. Verr. 2, 3, 66.

Obs. 18. If the thesis of a hypothetical clause consists of an INTERROGATIVE SUBJUNCTIVE in the imperfect, referring to the past, according to p. 381, the hypothesis generally takes likewise an *imperfect subjunctive* with the force of a *pluperfect*, as: *Si Alfenus tibi tum satis daret, et iudicium accipere vellet, revocares eum quem in Galliam miserat?* *Had Alfenus given you security etc., would you have recalled etc.?* Cic. Quinct. 26.—*Num igitur Opimium, si tum esset (had you lived at that time), nefarium civem pulares?* Ib. Phil. 8, 4, 14.—*Si auctores ad liberandam patriam desiderarentur illis actoribus, Brutus ego impellerem quorum uterque etc.?* Ib. 2, 11, 26.

Obs. 19. If a past hypothetical clause is conceived as COINCIDENT with the action of the thesis, the predicate of the clause may be in the IMPERFECT SUBJUNCTIVE according to the general rules explained p. 414 foll. (§ 603. Obs.), while the principal predicate retains the regular pluperfect subjunctive, as: *Sì nihil præter fugam quæreretur, fuisset* libentissime; *Had* nothing but flight *been in question. I should have fled* most willingly. Cic. Att. 9. 10. 2.—*Hujus si vita, si mos, si vultus non omnem commendationem ingenii prætereret, majus nomen in patrōnis fuisset*; *Had* not his life etc. *destroyed* all the effect of his genius, his name among barristers *would have been* greater. Ib. Brut. 67.—*Non tantā curā coluissent* ceremonias sepulcrorum, *nisi hæret* in eorum mentibus, mortem non interitum esse, sed quasi migrationem. Ib. Tusc. 1, 12.—*Quod certe non fecisset, si suum numerum naves haberent*. Ib. Verr. 2, 5, 51.—Comp. Ib. Quinct. 16, 53; Verr. 2, 2, 1; Am. 4; Fam. 5, 20, 2; Phil. 2, 2, 3; Orat. 17, 55; Brut. 10, 40; Liv. 10, 41; Ib. 39, 42; Ib. 9, 18.—But in all these passages a *pluperfect* subjunctive would have been as correctly used as an imperfect, as: *Qui tu vir et quantus fuisses si illius diçi mentem servare potuisses*. Cic. Phil. 2, 36 —*Is processisset* honoribus longius, *nisi semper infirmā, atque etiam aegrā, valetudine fuisset*. Ib. Brut. 48.

Obs. 20. If in a past hypothetical period the hypothesis is represented as *preceding* the thesis in time, pluperfect subjunctives are generally used in *both* propositions. But sometimes, in this instance, the predicate of the **THESIS** is placed in the *imperfect subjunctive*, while the hypothesis retains its pluperfect subjunctive, as: *Si hic falsus archipirāta esset mortuus, aut profugisset, non esset difficile* (it would not have been difficult) *alium in suppositi locum supponere*. Cic. Verr. 2, 5, 30.—*Si Terentius Varro Carthaginiensium ductor fuisset, nihil recusandum supplicii foret*. Liv. 22, 61.—*Ergo is tibi civis* (P. Naſſica), *si temporibus illis fuisset, non probaretur?* Cic. Phil. 8, 4, 14.—*Si esset pugilula Pompejanorum causa, numquam exurgeret* (it would never have risen again). Ib. 13, 8, 17.—Comp. Liv. 9, 19; Ib. 42, 43; Caes. B. C. 3, 111; Cic. Verr. 2, 1, 31, 80; Ib. Tus. 3, 22, 54; Ib. Sen. 6.—This form is oft-n used to represent the action of the clause as *lasting to the moment of speaking*, if the condition had been fulfilled, as: *Si Antonius* **EST SUBJUNCTIVES** (*Si vir bonus habeat hanc vim ut, si digitis concrepuerit, possit in locupletium testamenta nomen ejus irrepere, hac vi non utatur*). Hence the above passage in *imperfects* cannot be likewise referred to the present, by rendering it 'But if you would give this power to a M. Crassus'. The author of the Publ. Sch. Gr. (p. 393) explains the imperfect by stating 'THAT THE FLOATING PERIOD OF CRASSUS'S public life is contemplated', which certainly is a novel way of explaining the use of an imperfect in place of a pluperfect.

opprimere urbem *potuisset*, statim; *si* Galliam tenere, paullo post, optimo cuique *perendum*, reliquis *esset* serviendum (=the others *would have been* compelled to be slaves, and *would be so now*). Cic. Phil. 3, 13, 34.—*Esset* enim ipsi (Antonio) statim *serviendum*, *si* Caesar ab eo regni insignia accipere *voluisset*. Ib. 3, 5, 12.

### 3. One of the propositions referring to the Present, the other to the Past.

Obs. 21. If the *thesis* refers to the PRESENT, while the *hypothesis* refers to PAST TIME, the former, in classical prose, always takes the IMPERFECT subjunctive, while the predicate of the latter takes the PLUPERFECT subjunctive, as: Quo quidem tempore *si* meum consilium *valuisset*, tu hodie *egēres*, nos liberi *essēmus*. Cic. Phil. 2, 15, 37.—Hac tu, Erūci, tot et tanta *si* nactus *esses*, tempus te citius quam oratio *deficeret*. Ib. R. A. 32.—Qui *si* me *audissent*, honeste *viverent*. Ib. Fam. 7, 3, 6.—*Uterer* domesticis exemplis, *nisi* ea *legisses*. Ib. Orat. 38.—*Nisi* ante Romā *profectus* *esses*, nunc eam certe *relinqueres*. Ib. Fam. 7, 11, 1.—The anteclassical writers, in analogy to the usage stated Obs. 10, sometimes use the *present* subjunctive in the *thesis*, and the *perfect* subjunctive in the *hypothesis*, as: Negat? Tu. Etiam rogitas? *Dicam si confessus sit*. Plaut. Most. 3, 1, 22.—In tenebris *conspicūsus si sis* me, *abstineas* manum. Ib. Pseud. 4, 2, 24.

Obs. 22. Rarely the *thesis* of a hypothetical period has its predicate in the pluperfect, when the *hypothesis* with a predicate in the imperfect subjunctive refers to a present time (the *thesis* generally denoting the *consequence* of the *hypothesis*). This connection occurs in two instances: 1) If the *hypothesis* denotes a STATE (or custom) *beginning before* the time of the *thesis* and continuing to the moment of speaking, as: Qui *si* omnes *viverent* (=vixissent tum, et nunc viverent) bellum omnino hoc non *fuisset*. Cic. Phil. 13, 13.—Non *fecissem* hominis mentionem *nisi* *iudicārem* (=tum *iudicāssem*, et nunc *iudicārem*) qui criminosius diceret me audivisse neminem. Ib. Brut. 33.—Ego *si* foris *caenitārem* (=si solitus *essem* etc.), Cn. Octavio non *defuissem*, Ib. Fam. 7, 16, 2.—*Nusquam* hoc est in fœdere Gaditāno, ac *sicubi* *esset* (et tum *fuisset*), lex id Gellia *constitisset*. Ib. Balb. 14.—2) If the fact mentioned in the *hypothesis* is to be refuted by 'argumentum ex contrario', the *thesis* containing an argument taken from the past, as: Non is est Antonius, nam *si* *esset*, non *commisisset* ut ei *senātus*, tanquam Hannibali, denunciāret ne oppugnāret Saguntum. Cic. Phil. 6, 3.—Quod *nisi* *esset*, certe ut a crudelissimo hoste *fugisset*. Ib. Clu. 66.

### 4. Preterite Indicatives in hypothetical Periods.

Obs. 23. In the following instances the predicate of the *thesis* in hypothetical periods may be placed in the INDICATIVE OF ONE OF THE THREE PRETERITE TENSES: 1) If the predicate consists of the potential verbs and verbal expressions denoting POSSIBILITY, NECESSITY, DESIRABILITY, and PROPRIETY (Obs. 24-26). 2) In those instances in which a preterite tense of the periphrastic future is used with hypothetical meaning (Obs. 27). 3) In some instances when the predicate consists of ordinary verbal predicates (Obs. 28).—This use of the indicative does *not* refer to the predicate of the *hypothesis*, which, even if dependent on hypothetical indicatives, retains its regular hypothetical subjunctive. But exceptionally, though very rarely, preterite indicatives are found in hypothetical *Si*-clauses, namely: 1) In epistolary style if the clause is introduced by *nisi*: Ipsam tibi epistolam *misisses*, *nisi* tam subito fratris puer *profectiscebatur* (=profectus *esset*). Cic. Att. 8, 1, 1.—2) Sometimes in analogy to the hypothetical *present* indicative, when the *Si*-clause assumes a *past* fact to be refuted by 'argumentum ex contrario' (Obs. 15): Quodsi Caesaris causā in provinciam *veniebātis*, ad eum profecto, exelsi provinciam, *venissetis*. Cic. Lig. 8 (=You *did not come* in Caesar's behalf to the province; for *if so*, you would, after your expulsion, have gone to Caesar).—*Si te interfecitūrus eram* (had I intended to kill you), non temperassem vino? Liv. 40, 14. So, especially, if the *thesis* likewise has a hypothetical indicative (Obs. 24): Hunc *si oderat*, non enim quam diutissime vivere velle *debēbat*? *Haut* he hated him, must he not have wished him the longest possible life? Cic. Clu. 61. (Compare: In quo *potui*, *si te odissem*, minus quod tibi obesset facere? Ib. Fam. 3, 10, 6).—*Debēbant* di omnes bonos facere, *si quidem* numāno generi *consultārent*; *Haut* the gods *consulted* for the human race, they ought to have made all men good. Ib. N. D. 3, 32, 79 (Comp. with Ib. Div. 2, 61, 127). In such passages as Cic. Div. 2, 8 (neque *si* fatum *fuērat*, *effugisset*), the predicate *fuērat* of the *Si*-clause has no hypothetical force, as it has been shown p. 704 Obs. 3, C.—Very harsh is the indicative perfect with hypothetical meaning in the following passage: Ignoscite Cethēgi adolescentie, *nisi* iterum patrie bellum *fecit*. Sall. Cat. 52, 33. Here the *Nisi*-clause is evidently hypothetical, since the author means to assert that Cethegus *was* a rebel for the second time. Moreover, the hypothetical *thesis* has the unexampled form of an *imperative*, the whole passage having the meaning 'Censērem a vobis Cethēgo ignoscendum esse, *nisi*... *fecisset*'.—Not less harsh is the *present indicative* in a *Nisi*-clause, with the force of a hypothetical imperfect subjunctive, in the following passage: Plura de Jugurthā scribere *dehortātur* me fortuna mea, ... *nisi* tamen

*intelligo*, illum supra quam ego sum petere (=nihil amplius *scriberem* de Jugurthā, *nisi* *intelligerem* illum supra petere, i. e. that he has a higher aim than me). Sall. Jug. 24. It is evident that the clause '*nisi intelligo*' is contrary to reality, since the writer of the letter means to say that he indeed knows the fact mentioned. Hence a hypothetical mood should have been used.

Obs. 24. The POTENTIAL VERBS and verbal forms which, as theses of hypothetical clauses may be in the indicative of a preterite tense are: *posse*, *debēre*, *decēre*, *oportet*, *aequum est*, *aptum est*, *melius est*, *optabile est*, *interest*, *satis est*, *causa non est cur*, *non est quod*, and the periphrastic gerundials. The preterites of these verbs are used in two different relations to the verbal actions to which they give a potential character. In the first place, they may represent the main action as *really performed*, in which instance they have the same nature as any other modal auxiliary (*solere*, *velle* etc.), and can generally not be rendered by the English potential mood, as: Pugnatum ab hostibus ita acriter est ut a viris fortibus pugnari *debuisset*. Cæs. B. G. 2, 33 (=the enemy *really fought* as *it was their duty* to fight).—Tanta est contentione actum quantā agi *debuisset*. Ib. B. C. 3, 111.—Neque enim ipse Caesar, ut multis rebus intelligere *potuit*, est alienus a nobis (as I *have been able* to infer from many facts). Cic. Fam. 6, 10, 2.—*Potuit* aliqui ab initio non sedisse, et tamen Oppianicum gratis condemnasse (*it was possible* etc.). Ib. Clu. 41.—But frequently these potentials represent the action as *not really performed*, denoting that the performance was *merely possible*, or that it *should have taken place* from moral reasons, or for the sake of expediency, as: Volumnia *debuisset* in te officiosior esse quam fuit, et id ipsum quod fecit, *potuit* facere diligentius et cautius; Volumnia *ought to have acted* more dutifully to you (*but she did not*), and *might have done*, what she did, more carefully etc. (*which she did not*). Cic. Fam. 14, 16. In this instance the potentials mentioned above *pregnantly* imply the idea of *non-reality* as if a hypothetical clause had been added. Thus '*hoc prohibere debuisti*' (you *ought to have hindered* this) has a force similar to '*If you had done your duty, you would have hindered this*'. If thus used the potentials mentioned are regularly in the INDICATIVE OF A PRETERITE TENSE (see the examples Obs. 25-26). Hence predicates of this kind retain their indicative tense, even if a hypothetical clause is expressly added, as: Delēri totus exercitus *potuit*, *si* fugientis *persecuti* victores *essent*. Liv. 32, 12. But in this instance also *hypothetical subjunctives* may be used, as: *Nisi* totius dīci labōre milites *essent defessi*, omnes hostium copiae delēri *potuissent*. Cæs. B. G. 7, 88.—Quid facere *potuissent*, *nisi* tum consul *fuissent*? Cic. Rep. 1, 6. So if the hypothetical clause is understood, or contained in some member of the sentence by implication (p. 734, 736, Obs. 3, 4, 8), as: Urbes *sine hominum cœtu* (i. e. *nisi hominum cœtus fuissent*) non *potuissent* nec edificari nec frequentari. Cic. Off. 1, 4.—Illa amphibolia quæ Cræsum decēpit, vel Chrysippum *potuisset* decipere. Ib. Div. 2, 56, 116.—Noune multo *melius fuisset*, otiosam ætatem et quietam traducere? Ib. Sen. 23, 82.—The *Si*-clauses added to hypothetical potentials in the indicative are *not always* hypothetical, as: Hoc *si* qui pati non *potuit*, mori *debuisset*; If any one *was unable* (clause of doubtful reality) to bear this, he *ought to have died* (by his own hand). Cic. Fam. 9, 17, 1.—*Sive* hanc turbam effugere *voluisti*, *sive* etc., de Cæsare tamen *potuisti* dicere. Ib. Brut. 72.—Lysimachia *tenenda erat si pacem petitori erātis*; Lysimachia *ought to have been held*, if you *were to sue* for peace. Liv. 37, 36.

Obs. 25. The hypothetical PERFECT indicative of the potentials mentioned Obs. 24, has the force of a PLUPERFECT which represents the assumed fact as COMPLETE at the time spoken of (pp. 302 and 305): Num id vitari *potuit si* Flaminius auspiciis *paruisset*? Certe non *potuit*. Cic. Div. 2, 8.—Consul esse qui *potui*, *nisi* eum vitæ cursum tenuissem? Ib. Rep. 1, 6.—Tetigisti fores? Tr. Quomodo pulsare *potui si* non tangerem (how could I have knocked, had I not touched the door)? Plaut. Most. 2, 2, 31.—Non *potuit*, inquires, fieri sapiens (Epicūrus), *nisi* natus *esset*. Cic. Fin. 2, 31.—Qui nos, quos favendo in communi causā retinere *potuerunt*, invidendo abalienarunt. Ib. Fam. 1, 7, 7.—*Si* omnibus copiis congressus rex *fuisset*, forsitan inter tumultum exui castris *potuerit* rex (the hypothetical indicative *potuit* being changed into the subjunctive of its own tense on account of *forsitan* which required this mood, in analogy to the instance mentioned p. 443, Obs. 3, 3). Liv. 31, 38.—*Debuisti* mihi ignoscere *si* Sextii voluntati parere *voluisses*. Cic. Vat. 1, 2.—Quia, quod per vim hostium *esset* actum, ratum esse non *debuisset*. Ib. Off. 3, 28.—Catōnis a me corpus crematum est, quod contra *decuit* ab illo meum. Ib. Sen. 23, 84.—Ne domi quidem vos, *si* sui juris finibus matronas *continēret* pudor, hoc curare *decuit*. Liv. 31, 2.—Aut non suscipi bellum *oportuit*, aut geri pro dignitate P. R. *oportet*. Ib. 5, 4.—Ilos conservari *melius fuit* (it would have been better), quam penas Varium pendere. Cic. N. D. 3, 33.—*Si* upium diem *morati essetis*, moriendum omnibus *fuit*. Liv. 2, 38.—Quæ *si* hoc tempore non diem *obisset*, paucis post annis tamen ei *moriendum fuit*. Cic. Fam. 4, 5, 4.—Illud potius *præcipiendum fuit* ut diligentiam adhiberemus in amicitia comparandis. Ib. Am. 17.—*Si* ita *putasset*, certe *optabilis* Milōni *fuit*, dare jugulum P. Clodio quam jugulāri a vobis. Ib. Mil. 11.—Sometimes the copula is placed

in a hypothetical perfect indicative, if the thesis is *virtually* potential, as: *Ipsam enim Caesarem expectare magnum fuit!* For it would have been too great a loss (and hence impossible) to wait for Caesar's return. Cic. Phil. 2, 40. So in connection with impersonal predicate-genitives: *Sapientis autem civis fuit, hanc causam pernicioso civi non relinquere*; It would have been acting the part of a wise citizen etc. (=causa relinqui non debuit). Cic. Leg. 3, 11.—Very rarely the potentials mentioned are in the PLUPERFECT INDICATIVE, taken in a hypothetical sense; but never if a hypothetical Si-clause is expressly added, as: *Non potueras hoc a principio dicere?* Cic. Div. 2, 64.—Quanto melius fuerat promissum patris non esse servatum! Ib. Off. 3, 25.—Catilina eripit e senatu triumphans gaudio, quem omnino vivum illinc exire non oportuerat. Ib. Mur. 25.

Obs. 26. Sometimes the IMPERFECT INDICATIVE of the above-mentioned potentials is hypothetically used, partly with the force of a hypothetical *pluperfect*, partly with the force of an *imperfect* subjunctive\*.

1. It is used with the force of a hypothetical PLUPERFECT if the action as an independent past predicate would have required or admitted the use of an *imperfect indicative* (p. 305), which almost always is dependent on the author's conception, since the potential element of the action may always be considered as an *inner action* (p. 337), as: *Hostes sustineri non poterant, nisi extraordinariae cohortes se objecissent.* Liv. 7, 7.—*Si sordidam vestem habuissent Rhodii, lugentium Persei casum praeberere speciem poterant.* Ib. 45, 20.—*Quid, quum jussisset praetor, tum mittere nonne poterat?* Cic. Quinct. 26.—*Huius (Oppianici) igitur vitae Avitus invidēbat?* Hunc si acerbe et penitus oderat (see Obs. 23), non eum diutissime vivere velle debēbat (ought he not to have wished; referring to the time when Oppianicus was living, who was dead at the time). Ib. Clu. 61.—*Sestius Massiliam profectus est ut socerum (L. Scipionem) consolari posset, in alienis terris jacentem, quem in majorem suorum vestigiis stare oportebat.* (L. Scipio being dead at the time). Ib. Sest. 3, 7.—*Archipirata Syracusis, quoniam in Syracusano captus erat, custodiri oportebat* (long before the time of speaking). Ib. Verr. 2, 5, 27.—*In una civitate his improbus fuisti, quum et remisisti quod non oportebat et accepisti quod non licebat.* Ib. Verr. 2, 5, 23. Comp. Ib. 2, 1, 61.—*Si talis nos natura genuisset ut eam ipsam intueri et perspicere possemus, haud erat sane (there would have been no reason) quod quisquam rationem ac doctrinam requireret.* Ib. Tusc. 3, 1, 2. So if the predicate is *virtually* potential, consisting of the copula with impersonal predicate-genitives: *Si vestem misericordiam mutavissent, tamen id his non licere per interdicta potestatis tuae, crudelitatis erat non ferendae* (would have been an intolerable act of cruelty). Cic. Pis. 8, 18.—*Quod, nisi di mentem regi admissent, et ipsum lugentis difficultatis erat.* Liv. 44, 6. So in epistolary style, where the imperfect is used of present actions which are represented as past in regard to the future reading of the letter, the same imperfect indicative is used hypothetically, as past in regard to the future reading: *Nisi magnam spem habere Caesar nos causam probatissimos, non erat causa cur a te aliquid contenderem* ('there would have been no reason'), viewed from the time of reading the letter). Cic. Fam. 13, 7, 3.

2. With the force of both a PLUPERFECT and IMPERFECT subjunctive, referring to an action which is represented as given up or as not existing at a former time, but so that the non-reality is continuing at the time of the speaker; or referring to indefinite time including the past as well as the future; as: *Horum obirectionibus nos scito de vetere illa nostra sententia jam esse depulsos, non nos quidem ut dignitatis simul oblit, sed ut habemus rationem salutis. Poterat utrumque praecare si esset fides in hominibus consularibus; Both (our dignity and welfare) might have been preserved (and might be now preserved) if there had been (and if there were now) any faith in our former consuls.* Cic. Fam. 1, 7, 7.—*Sepulcri similitudinem non tam propter poenam legis studeo, quam ut maxime assequar ἀποδείξω; quod poteram si in ipsa villa facerem* (fanum Tulliae). Ib. Att. 12, 36, 1. Here 'quod poteram' (= 'which I might have achieved'), and 'which I might still achieve' refers both to the past and to the present (future), since the speaker had already before writing this letter abandoned the plan of building the monument on

\* The uniform assertion of all grammarians that the hypothetical imperfect indicative is always used with the force of an *imperfect subjunctive* referring to present time, is utterly erroneous, as sufficiently appears from the passages quoted in Obs. 26. In many passages imperfect indicatives of potentials, although accompanied by Si-clauses with subjunctive imperfects, are not hypothetical, as: *Si haec consuetudo manare coeperit, de posteris et de illa immortalitate sollicitor, quae poterat esse perpetua si patriis viveretur institutis et moribus.* Cic. Rep. 3, 29. Here the connection shows that the speaker (at the time of the Gracchi) did not mean to deny the 'patriis vivi institutis', but represented the contrary as a possible eventuality. Nor did he intend to deny the reality of the thesis 'quae poterat esse perpetua', but meant to say: 'The republic had (before the time of the Gracchi) the power or germ of immortality, provided the people were to live according to the institutions of their forefathers'. Hence the passage belongs to the conditional periods with historical subjunctives mentioned p. 714, B.

his villa site.—*Perturbationes animorum poteram ego morbos appellare: sed non conveniret ad omnia; I might have (before, and might now) called the disturbances of the mind diseases.* Ib. Fin. 3, 10.—*Contumeliā eum onerasti quem patris loco, si ulla in te pietas esset, colere debēbas*; You loaded with disgrace him whom you ought to have revered (at the time of the 'onerare', and ought to revere now) like a father if you had had (and had now) any piety in you. Ib. Phil. 2, 38.—*Vos certe victores conspici velle debēbatis*; At all events you ought to have wished to be seen as conquerors (at the time you left the province, and now). Liv. 45, 38.—*Panætius, quum ad Q. Tiberonem de dolore patiendo scriberet, quod esse caput debēbat, si probari posset, nusquam posuit* (Panætius, when he wrote on 'beating grief', altogether omitted what ought to have been (and ought to be now) the main point if it could be proved. Ib. Fin. 4, 9, 23.—*Intelligi a nobis di velle debēbant quae nostra causa nos monerent*; The gods ought to have wished (and ought to wish now) that what they imparted to us should be understood by us. Ib. Div. 2, 64.—*Chaldaei, quum notent sidera natalicia, quaecunque Luna juncta videantur, oculorum fallacissimo sensu judicant ea quae ratione atque animo vidēre debēbant.* Docet enim ratio mathematicorum, quam istis notam esse oportebat, quam humilitate Luna feratur; The astrologers judge by the sense of sight what they ought to have seen (and ought now to see) by their reason; for the mathematical rules, which ought to have been (and ought now to be) known to them, teach etc. Ib. Div. 2, 43 (Here 'debēbat' and 'oportebat' refer to present, and future, and to the whole past time during which the astrologers practised their profession).—*Etsi enim illud erat aptius, æquum (est) cuique concedere*; For, though the former plan would have been more convenient (and would be so now), it is fair to yield to every one's desire. Ib. Fin. 4, 1.—*Si verum respondere velles, Cato, hæc erant dicenda* (referring to an answer which Cato, before, had declined to give: 'You would have had to say then, and may say so now'). Ib. Fin. 4, 23. (Compare 'æquum erat id voluntate fieri', in the corrupted passage Cic. Off. 1, 9, 28). So, when a predicate with the copula is *virtually* potential: *Erat rhetorice res prorsus facilis ac parva, si uno et brevi præscripto contineretur.* Quint. 2, 13, 2.

3. If the Si-clause has the force of a hypothetical concessive clause, the thesis (since in this instance the predicate of the thesis is not in conflict with reality) is sometimes placed in the *imperfect indicative* with the force of an *imperfect subjunctive*, referring to present time, as: *Quod si tibi, tamen non arbitras.* Cic. Fam. 7, 27, 1.—*Quibus si qua calamitas sanvis vestigialibus nostris accidisset, animadvertere tamen in eos vos oportebat* (you ought to punish him). Ib. Verr. 2, 3, 55.—*Si victoria, praeda, laus, dubia essent, tamen omnis bonos reipublice subvenire debēbat.* Sall. Jug. 85, 45.—*Si Romae Cn. Pompejus privatus esset, tamen ad tantum bellum is erat deligendus.* Cic. L. M. 17.—*Si mihi nec stipendia omnia emerita essent, necdum aetas vacationem daret, tamen æquum erat me dimitti.* Liv. 42, 34.—*Si ad hoc bellum nihil pertinere, ad disciplinam certe militie plurimum intererat, insenscere militem nostrum etc.* Ib. 5, 6.—*Quantus imperator L. Aemilius fuerit, si ex alia re nulla existimari possit, vel hoc satis erat quod etc.* Ib. 45, 37.—In this instance, however, imperfect subjunctives are far more frequently used than imperfect indicatives, as: *Si nemo responsurus esset, tamen ipsam causam demonstrare non posset.* Cic. Div. Cæc. 13, 43.—*Si ita esset, tamen vos sociorum querimonias audire oportere.* Ib. Verr. 2, 2, 6. Comp. Ib. 2, 1, 27. If the hypothetical clause is not concessive, a potential thesis, exclusively referring to present time must always be in the imperfect subjunctive, as: *Mihi ignoscere non deberetis (not debēbatis) si tacērem.* Cic. Clu. 6, 18.—*Peculiaris is the use of 'debēbatis' referring to a hypothetical future action: Ubi, si vos decedens, confecta provincia, relinquerem (=reluctantur essem), deum hominumque fidem implorare debēbatis etc.* (where 'deberetis' would refer to present time). Liv. 28, 28.—Poets use the imperfect indicative in place of a hypothetical imperfect subjunctive without any restriction, as: *Nam nos decēbat (=decēret) . . . lugere, ubi esset aliquis in lucem editus.* Translation from Eurip. in Cic. Tusc. 1, 48.

Obs. 27. Frequently the indicative of the three preterite tenses of the PERIPHRASTIC FUTURE is used in place of ordinary hypothetical pluperfect subjunctives, with the distinction explained p. 131 foll., R. 144, 146, as: *Remissum est id quod erepturi erant* (i. e. nisi remissum esset); What they were going to take by main force (and what they would have taken, had it not been for the concession), was conceded. Liv. 6, 17.—*Antonius coram mihi negare non vult quod ego non rogatus eram* (i. e. si adfuisset), nec, si impetrassem, crediturus. Cic. Att. 10, 13, 2.—*Quod singuli facturi fuimus (=fecissemus) si ades nostrae deflagrassent.* Liv. 5, 53. Comp. the passages quoted p. 133.—Sometimes the imperf. ind. of a periphrastic future, with the predicate of the hypothesis in the imperf. subjunctive, refers to a past indefinite time, so that, if referring to a time altogether indefinite, it would be a period of virtual non-reality with present subjunctives (p. 710), as: *Quid? Si ego morerer, necum exspiratura respublica erat? Had I died, would the republic have expired with me?* Liv. 28, 28 [With time altogether indefinite: *Si ego moriar, mecum exspiratura sit respublica?*]. Comp.: *Si jam vocer ad exitum vitae etc.* Cic. Fam. 6, 4, 4.

Obs. 28. In the following instances the indicative of the three preterite tenses of ORDINARY VERBS is used in the thesis of hypothetical periods:

1. The IMPERFECT, and sometimes the PLUPERFECT indicative (the PERFECT only in certain connections), are used to represent past actions as *very near to actual performance*, the hypothetical clause (mostly introduced by *nisi*, often by *ni*, less often by *si*) denoting a fact that *hindered the accomplishment* (=had it not been for the fact that), as: *Si per Metellum licitum esset* (=nisi Metellus prohibuisset), matres illorum ventibant; Had it been permitted by Metellus (had not M. prevented them), their mothers would have come to Rome (=their mothers were on the point of starting, and they would have come etc. Cic. Verr. 2, 5, 49\*.—*Labbar longius* (I would have swerved farther from the point), nisi me retinuissem. Ib. Leg. 1, 19, 52.—*Cui ego nisi restituissem*, ex hac decuria vestra, quos iste adnuerat, in suum consilium subsortiebatur (he was on the point of drawing by lot etc., and would have done so, had I not resisted). Ib. Verr. 2, 1, 61.—*Jan haud procul justo proelio res erant, ni celeriter diremptum certamen per centuriones esset*. Liv. 7, 14.—*Antiochus erat, si pauca mutarisset*, germanissimus Stoicus. Cic. Ac. 2, 43.—*Anceps pedesire certamen erat* (the infantry-fight would have been a drawn battle), nisi equites supervenissent. Liv. 28, 33.—*Vincebatque auxilii loco paucitas, ni Vejens in verticem collis evasisset*. Ib. 2, 50.—*Idatur in cedes, nisi Afranius et Annæus Seneca obviamissent*. Tac. An. 13, 2.—PLUPERFECTS: *Hoc ipsum fortuna eripuerat* (would have taken away), nisi unius amici opes subvenissent. Cic. Rab. Po. 17.—*Nisi Latini sua sponte arma sumpsissent, capti et delati eramus*. Liv. 3, 19.—*Præclare vice-ramus, nisi Lepidus recepisset Antonium*. Cic. Fam. 12, 10, 3 (Comp. at Brut. 1, 15, 2).—*Perierat imperium si Fabius tantum ausus esset*, quantum ira suadebat. Sen. Ir. 1, 11.—*Si Cn. Pompejum Neapoli valetudo abstulisset*, indubitatus P. R. princeps excesserat. Ib. Cons. Marc. 20.—Sometimes the particle 'pene', or 'prope', is added to the thesis, in which instance the predicate is placed in the PERFECT INDICATIVE: *Pons sublicius iter pene hostibus dedit, ni unus vir fuisset*. Liv. 2, 10.—*Sic prope oneratum est sinistram Romanis cornu, ni referentibus jam gradum consul ignaviam excussisset*. Ib. 2, 65.—In the following passage the perfect indicative 'inquit' stands in the *hypothesis*, because there is no form 'inquisset', and 'inquit' is only used with respect to repeated action: *Penas rebellionis dedissent, ni Vettius Messius clara voce, 'Hic prebituri, inquit' etc.* Liv. 4, 28.

2. Sometimes (very frequently in Tacitus) a hypothetical Si-clause is added to an ordinary preterite predicate in the imperfect indicative, when the proper hypothetical thesis, denoting the execution of the principal predicate, must be supplied as an intermediate link between the principal sentence and the hypothesis. Such hypothetical clauses are almost always negative, being regularly introduced by *ni*, as: *Magna hominum pars eo ut legatio supplex Romam mitteretur, inclinabat* (supply 'id quod factum esset'), *ni auctores defectionis areris-ent colonias a consiliis pacis*. Liv. 6, 21.—*Campus Martius restabat* (supply 'et dirisus esset'), *nisi prius cum fratre suo Antonius fugisset*. Cic. Phil. 6, 5.—*Romam ferri protinus Siccium placibat* (supply 'id quod factum esset') *ni decem-viri funus militare publicâ impensâ facere maturassent*. Liv. 3, 43.—*Admonbat me res ut hoc quoque loco interitum eloquentiæ deplorârem* (supply 'id quod fecissem' or 'facerem'), *ni vereretur ne de me ipso videretur queri*. Cic. Off. 2, 19.—*Rec. perâre Armeniam arcebat* (supply 'et recepisset'), *ni a Marso prohibitus foret*. Tac. An. 4, 71.—*Sperabatur pugna* (supply 'et pugnatum esset'), *ni Maroboduus castra in colles subduxisset*. Ib. 2, 46.

3. Rarely the thesis of concessive Si-clauses takes a hypothetical imperfect or pluperfect indicative, without being potential (Obs. 26, 3): *Si gladium in Asia non strinxissem, si hostes non vidissem*, tamen proconsul triumphum in Thracia duobus proeliis merueram. Liv. 38, 49.—*At etiamsi desertum vadimonium esset*, tamen in istâ postulatione improbissimus reperiebatur. Cic. Quinct. 18.—Ante-classically sometimes the perfect indicative is used in this connection with hypothetical force, as: *Decem vocasset si* (=etiamsi vocasset) *ad cenam viros, nimium obsonavit*. Plaut. Merc. 4, 2, 3.

4. Sometimes hypothetical Si-clauses are made dependent on INTERROGATIVE SENTENCES with a predicate in the indicative, which pregnantly contain a hypothetical subjunctive by implication, as: *Nam ni ita esset, cur tu Apronium matrem quam Minucium decimas sumere* (=ni ita esset, causa nulla fuisset cur tu etc.)? Cic. Verr. 2, 3, 64.—*Nisi id faceret, cur Plato Ægyptum peragravit?* (=causa non fuisset, cur etc.) Ib. Fin. 5, 29.—*Nam si verborum disceptationis res esset, quid* (=cur) *fadus Ha-drubalis cum Lutatii priore federe comparandum erat?* (=causa non fuisset cur compararetur). Liv. 21, 19.

\* Most grammarians render this sentence (and all similar sentences) 'The mothers were coming', supposing that, when this construction is used, the action is always represented as having already commenced, being interrupted by the action of the Si-clause. But in none of the passages extant, it is even so much as intimated, that the principal action had already commenced; while in several passages the contrary is evident. The imperfect indicative simply denotes that the action was directly impending (see p. 309, R. 53). The hypothetical thesis proper may always be supplied (see R. 48, Obs. 8).

## IV. IMPROPER CONDITIONAL PERIODS.

Rem. 47. Improper conditional clauses are those clauses introduced by conditional conjunctions, which are equivalent to other classes of clauses or sentences. They chiefly occur as equivalents of 1) ADVERSATIVE propositions and CONCESSIVE clauses (Obs. 1-3); 2) TEMPORAL clauses (Obs. 4, 5); 3) That-Clauses and RELATIVE clauses (Obs. 6).

Obs. 1. ADVERSATIVE conditional periods are those in which the thesis is represented as *not subject* to the uncertainty or non-reality implied in the Si-clause, thus forming an ADVERSATIVE opposition to it (=The action of the clause may be doubtful or non-real, but the action of the thesis is doubtless or real). In such periods the Si-clause generally has the force of an *Etiamsi-clause* (si=even if), as: *Si ego ab illâ deserar, tamen in mea pristina sententiâ permanebo*; *Even if I shall (should) be deserted by that body, I shall yet persist in my former views*. Cic. Att. 1, 20, 3. Here the thesis is represented as *not subject* to the uncertainty implied in the clause, and as true, whether the condition is fulfilled or not. At the same time, the thesis implies an *adversative* coördination, and the clause has *concessive* signification. But in clauses of this kind, the concessive meaning may be so weak, that the clause cannot be properly rendered by 'even if', as: *Si barbarorum est, in diem vivere, nostra consilia sempiternum tempus spectare debent* (=The barbarians may live for the moment, but our plans etc.). Cic. Or. 2, 40.—The Si-clause in adversative (concessive) periods may be, like an ordinary Si-clause, a clause of doubtful reality, or of doubtless reality, or of non-reality. The mood and tense of the Si-clause are treated according to the rules of the corresponding class of proper conditional clauses. The thesis, although it is *not* contingent on the fulfilment of the condition, takes likewise the same mood and tense, as if it were an ordinary conditional thesis (for exceptions see R. 46, Obs. 26, 3; Obs. 28, 3). Concessive Si-clauses of doubtless reality correspond to *Etsi-clauses*, which, from this reason, always take an indicative. Concessive Si-clauses of doubtful reality, and of non-reality correspond to *Etiamsi-clauses*. Hence *etiamsi* always takes a subjunctive, if an ordinary Si-clause would require a subjunctive of doubtful reality or of non-reality.—EXAMPLES: 1. DOUBTFUL REALITY: *Quod si de Antonio non laboratis, mihi certe, patres conscripti, consulere debetis*. Cic. Phil. 12, 8, 19.—*Si aliquando oculi peccent, tamen inest in eis vis videndi*. Ib. Div. 2, 52.—2. DOUBTLESS REALITY (si=etsi): *Si tibi fortuna non dedit, ut patre certo nascere, at natra certe dedit ut non parum humanitatis haberes*. Ib. R. A. 16, 46.—*Si Massilienses per delectos summâ justitiâ reguntur, inest tamen in eâ conditione similitudo quædam servitutis*. Ib. Rep. 1, 27.—3. NON-REALITY (si=etiamsi): *Si mihi numquam amicus C. Cæsar fuisset, si aspernaretur amicitiam meam, tamen ei non amicus esse non possem*. Ib. Pis. 33. (The thesis 'I would be still his friend' is real, but is placed in the same hypothetical mood as if it were non-real).

Obs. 2. In concessive conditional periods, the Si-clause is almost always a *protasis*, and the thesis an *apodosis*. Generally the apodosis (as in proper concessive clauses) is introduced by an adversative coördinating conjunction (*tamen* or *at*), or by a restricting particle (*certe*, *saltem*, *at certe*). *At, certe*, and *saltem* are generally used if the clause is negative, or virtually so; as: (Rogabat Cæsar ab Ariovisto), *si nullam partem Germanorum domum remittere posset, at ne quos amplius Rhenum transire pateretur*. Cæsar. B. G. 1, 43.—*Si pecunias æquare non placet, si ingenia omnia paria esse non possunt, jura certe paria debent esse eorum inter se, qui sunt cives in eadem civitate*. Cic. Rep. 1, 32. Negative conditional clauses with concessive force are almost always introduced by *si* with a negation [*si non*, *si minus* (=si non), *si nullus* etc.]. But in the following passage *nisi* has the force of *etiamsi non*, the apodosis being introduced by 'et ipsum', where *ipse* (=even) imparts concessive force to *nisi*, having at the same time the meaning of an adversative particle: *Quod, nisi di mentem regi ademissent, et ipsum ingentis difficultatis erat*. Liv. 44, 6.—Frequently concessive clauses introduced by *si non* or *si minus*, have the same predicate as the thesis, in which instance the common predicate is expressed only once, the same as in *Etsi-clauses*, as: *Eorum desiderium si non æquo animo, at forti ferax*. Cic. Fam. 6, 22, 2.—*Ad eum filium ejus adduxit, ut ille si non omnem, at aliquam partem mæroris sui deponeret*. Ib. Sest. 3, 7.—*Eadem ratio fuit Sestii, si minus in accusando, at certe in necessitate defendendæ salutis suæ*. Ib. 42.

Obs. 3. Concessive Si-clauses often take idiomatic forms:

1. *Si* is often combined with *vel* (vel si=etiamsi), or with *maxime* (si maxime) having a meaning similar to *quamvis* (=if ever so much), in classical prose always with the subjunctive, as: *Ego vero, vel si pereundum fuisset, semel perire tamen maluissem quam his vincere*. Cic. Sest. 19.—*Qui autem, si maxime hoc placeat, moderatius tamen id volunt fieri* (who wish this to be done rather moderately, even if they like it ever so much). Ib. Fin. 1, 1, 2. Comp. Ib. Verr. 2, 2, 68; 2, 4, 42; 2, 5, 8; Cat. 1, 12; Sest. 30, 64.

2. If the thesis is *negative*, the negation is frequently transferred to the Si-clause in the form '*ne si...quidem*' = 'not even if'. In this construction the thesis either *retains* its negation\*, generally if it *precedes* the clause, or it *drops* the negation if it *follows* the Si-clause, as: Omnino irasci amicis non temere soleo, *ne si merentur quidem*; I do not generally grumble with my friends *even if they deserve it* (equivalent to, but stronger than '*etiamsi merentur*'). Cic. Phil. 8, 5.—*Ne periculis quidem compulsus ad eorum causam me adjungerem, ne si summa quidem eorum in me merita constarent*. Ib. Fam. 1, 9, 11.—*Si praedonibus pactum pro capite pretium non attuleris, nulla frans est, ne si juratus quidem id non feceris*. Ib. Off. 3, 29, 107. Comp. Ib. Inv. 1, 39, 70; Off. 3, 10, 43.—But: *Itaque ne si jucundissimis quidem nos somniis usuros putemus*. Eudymionis somnum nobis velimus dari. Cic. Fin. 5, 20.—*Quod illud, ne si ita quidem venissent, ferre potuissent*. Ib. Phil. 5, 9.—An, *ne si sit quidem Numae similis*, ad gubernacula reipublicae accedere eum patiemur? Liv. 4, 3. Comp. Cic. Phil. 12, 7, 15; Div. 2, 59, 122; Fam. 9, 5, 2; Att. 13, 10; Liv. 4, 4; Ib. 42, 41.—Sometimes (rarely) the negation is repeated even if the Si-clause precedes the thesis, as: Cui generi esse ego iratus, *ne si cupiam quidem, non possum*. Cic. Pis. 28.—*Qui pati, ne si fiat quidem, non potest*. Sen. Const. 4, 3.—Sometimes *nec* with a Si-clause is used with the force of *ne...quidem*, as: Sapiens non timeat? *Nec si patria deleatur? Non doleat? Nec si delēta sit?* Cic. Ac. 2, 44.

Obs. 4. TEMPORAL clauses, in the following instances, may take the form of CONDITIONAL clauses: 1) Rarely if a premise, represented as doubtless, refers to a *definite future* time, in which instance a Quum-clause cannot generally be replaced by a Si-clause, as: *Si damnatus eris*, atque adeo (or rather) *quum damnatus eris*—NAM DUBITATIO CONDEMNATIONIS QUAE POTERAT ESSE?—*virgis te ad necem credi necesse erit*. Cic. Verr. 2, 3, 29. This rule, however, is not always observed. Thus the English 'after' with a future-perfect may be expressed both by *quum* or *si* (but not by *postquam*), as: Nunc proficiscemur ad reliqua, *si* pauca ante fuerimus a vobis, iudices, deprecāti. Cic. Verr. 2, 3, 5.—2) If *no definite* time is assigned to an action, so that the consequence will be true 'if it happens at any time', or 'whenever it happens', it is often optional to use a Si-clause or a Quum-clause (or Ubi-clause). This is the case when the idea of the time and that of the condition are *identical* ('if' being the same as 'when'), i. e. when, by *merely assuming the time of the action as definite, the condition must be considered as fulfilled*, as: Nulla magna civitas quiescere potest; *si* foris hostem non habet, domi invenit. Liv. 30, 44. Regarding the time of the 'non habere hostem' as come, the condition is at once fulfilled. So: Cochleae suo sibi succo vivunt, *ros si* non cadit. Plaut. Capt. 1, 1, 13. Hence in both passages Quum-clauses may be substituted for the Si-clauses (*quum* foris hostem non habet; *quum* ros non cadit). Thus all of the indefinite Quum-clauses quoted p. 645, Obs. 2, may be changed into Si-clauses, and many of the indefinite Si-clauses quoted p. 711, Obs. 15 fol., may be turned into Quum-clauses, as: Significant names *si* qui noctu in Capitolium venerint (= *quum* qui...venērunt). Cic. R. A. 20.—*Id fit si factis verbis frequenter utamur* (= *quum*...utimur). Comp.: Quod fit *quum* id quod factum est, pluribus de causis ratum vidēri potest. Ib. Inv. 2, 4.—*Quis audeat de homine paullo majoribus opibus praedito iudicare, quum* (= *si*) *videat*, sibi de eo quod consenserit causam esse dicendam? Ib. Clu. 55.—But when the (indefinite) time of an action is *not* conceived as identical with its reality, the Si-clause *cannot* be replaced by a Quum-clause, as: *Si paterfamilias intestato moritur*, familia pecuniaque ejus agnatum esto. Cic. Inv. 2, 50, and Auct. Her. 1, 13. When the indefinite time of the clause '*Si paterfamilias moritur*' becomes definite, the condition, whether he has left a will or not (*si intestato moritur*) remains still doubtful. Hence the clause must be introduced by *si*, not by *quum*.—*Qui summum bonum sic instituit ut nihil habeat cum virtute conjunctum, hic, si sibi ipse consentiat, neque amicitiam colere possit, nec justitiam*. Cic. Off. 1, 2. If this period be referred to time definite, it does not imply the fulfilment of the condition '*si sibi ipse consentiat*', which still remains doubtful; hence a Quum-clause would not be admissible. From the same principle, Quum-clauses are sometimes used instead of hypothetical Si-clauses (see p. 659, R. 41), and of Etiam-si-clauses, '*etiam quum*' (*etiam tum quum*) being used with the force of *etiamsi*, as: Qui incolunt maritimas urbes, *etiam quum* corpore manent, animo tamen excursant. Cic. Rep. 2, 4.—An *etiam tum* quiescerētis, cunctaremini, timerētis, *quum* rempublicam a facinorosisimis sicariis esse oppressam viderētis? Ib. Sest. 35.—3) Similarly both Quum-clauses and Si-clauses may be used if the clause contains a *definition* by means of an *example* by which a general assertion in the principal sentence will be satisfied, as:

\* This repetition of the negation in concessive Si-clauses is on the same principle as the repetition of the negation when *ne quidem* refers to members of the same sentence, or when single members of a negative sentence are coordinated by *neque...neque*, instead of by *et...et*, or *aut...aut*, as: Non enim praetereundum est *ne id quidem* pugna iracunde fecerunt. Cic. Verr. 1, 60.—*Nihil ne in ipsa quidem pugna iracunde fecerunt*. Ib. Tusc. 4, 22.—*Quibus nihil nec tetrus, nec foedius excogitari potest*. Ib. Off. 3, 8.

Simplex conclusio reprehenditur, *si* (or *quum*) hoc quod sequitur non videatur necessario cum eo quod antecessit coherere. Cic. Inv. 1, 46. Compare with: Legitima est constitutio *quum* (or *si*) in scripto aliquid controversiae nascitur. Auct. Her. 1, 11.—*Mala definitio est, quum* (or *si*) aut communia describit hoc modo etc., aut falsum quiddam dicit. Cic. Inv. 1, 43.—4) Clauses of repeated and contingent action (in English introduced by '*whenever*'), whether referring to time altogether indefinite, or to a definite time-period when the time of each single action is indefinite, may be introduced by *si* (*si quando*, 'if at any time'), or by the temporal conjunctions *quum* and *ubi* (p. 329, Obs. 1).

Obs. 5. Si-clauses sometimes occur in place of Fact-clauses introduced by *quod* (p. 605 foll.), and with the same syndetic antecedents as these (*in eo si*, literally '*in the fact if*', i. e. 'in the fact that perhaps'), to designate the fact as a doubtful futurity, as: *Dixerunt, in eo verti puellae salutem, si postero die vindex injuriae ad tempus praesto esset*. Liv. 3, 46.—*Adjecerunt, Scipionem in eo positam habuisse spem pacis, si Hannibal et Mago ex Italia non revocarentur*. Ib. 30, 23.—*In eo enim spem victoriae verti, si et loca opportuna et socii praecoccupantur*. Ib. 35, 18.—*Summa et perfecta gloria constat ex tribus his, si diligit multitudo, si fidem habet, si cum admiratione quadam honore dignos putat*. Cic. Off. 2, 9.—Similar is the use of Si-clauses in place of relative clauses, being generally employed to imply a doubt whether such persons or things as those to which the relative refers, really exist or not. These Si-clauses take the same *adjective* syndetic antecedents as Qui-clauses would take in their place, as: Mortem proposuit, non eis solum qui illam rem gesserunt, sed *eis etiam si qui* non moleste tulērunt (=but even to those who were not dissatisfied with it, *if there were any*). Cic. Phil. 13, 18. *Praclarum nobiscum actum erit si P. R. non istum majus in sese scelus concepissem statuerit quam eos si qui* istum sententiā suā liberārint (=than those who may absolve him by their votes, *if there will be any*). Ib. Verr. 2, 1, 4.—*Dixit errare* (supply *eos*) *si qui* in bello omnis secundos rerum proventus expectent. Cæs. B. G. 7, 29.—*Errat si quis existimat* facilem rem esse, donare. Sen. V. B. 24.—*Si quis* habet causam celebritatis a patre acceptam, *in hunc oculi omnium conjiciuntur*. Cic. Off. 2, 13.—*Dimissisque* (i. e. *eis*) *si qui* parum idonei essent. Liv. 42, 31.—Sometimes Si-clauses (like English If-clauses) are used as INTERROGATIVE clauses, *si* having the meaning '*whether*', as: Caninius enim, *si* quid ego scirem interrogārat, quod tu nescires. Cic. Fam. 9, 6, 6. See p. 397, Obs. 10.

#### V. EQUIVALENTS AND ELLIPSIS OF SI-CLAUSES.

Rem. 48. As equivalents of Si-clauses are used 1) The QUUM-CLAUSES mentioned R. 47, Obs. 4.—2) The clauses introduced by *dum*, *dummodo*, and *modo* (p. 676 foll., Obs. 13 foll.)—3) RELATIVE clauses (Obs. 1).—4) PARTICIPIAL constructions (Obs. 2).—5) SUBJECT-INFINITIVES (Obs. 3).—6) Certain PARTICLES or other members of the sentence (Obs. 4, 5).—7) INDEPENDENT SENTENCES, asyndetically followed by the thesis (Obs. 7). Sometimes HYPOTHETICAL Si-clauses are entirely omitted and merely implied by the hypothetical mood of the principal predicate (Obs. 8).

Obs. 1. Relative clauses (especially those introduced by indefinite relatives) sometimes have the force and the *moods* of conditional clauses, as: *Quae qui* sine comparatione illorum spectaret, satis magna diceret (= *si quis spectaret, diceret*). Cic. Brut. 47.—*In quacunque* enim (aliquis) plane clauderet, orator esse non posset (= *si quis clauderet* etc.). Ib. 59.—*Miraretur qui tum cerneret* (eos) tam feræ genti objectos. Liv. 34, 9.

Obs. 2. The participial constructions used with the force of conditional clauses are either ordinary participles agreeing with their logical subject in the thesis, or ablatives absolute, as: *Quae venientia* metuuntur eadem, afficiunt ægritudine *instantia* (= *quæ metuuntur si veniunt*, eadem ægritudine afficiunt (homines) *si instant*). Cic. Tusc. 4, 6.—*Cui concedendum est gementi* (= *si gemit*). Ib. 2, 7.—*Quæ crescentia* vitiosa sunt, eadem sunt vitiosa nascentia. Ib. 4, 18.—*Hac de causâ* constituerat, signa *inferentibus* resistere, prior praelio non lacessere (=resistere *hostibus si* signa *inferrent*). Cæs. B. C. 1, 82.—*Quoniam* ille modo distractus esset, tanto *scelere* non modo *perfecto*, sed *etiam cogitato*? (= *si tantum scelus non modo perfectum sed etiam cogitatum esset*). Cic. Dej. 5, 15.—An ego in hac urbe esse *possum* his *pulsis* qui me hujus urbis compotem fecerunt? (= *si hi pulsati sunt* qui). Ib. Sest. 69.

Obs. 3. Subject-infinitives have the force of hypothetical clauses when the principal predicate is one of the potential impersonals mentioned R. 46, Obs. 24, as: Si homines rationem a deo datam in fraudem convertunt, *non dari* illam quam *dari* humano generi *melius fuit* (= *melius fuisset si ratio non data esset*). Cic. N. D. 3, 31, 78. Comp. the examples quoted R. 46, Obs. 24 foll.

Obs. 4. Particles, adverbial expressions, and other members of the sentence frequently

Liv. 4, 8.—The *subjunctive* occurs in these clauses for the same reasons as in the disjunctive coördination of whole periods (Obs. 4), as: *Quanto esse satius, dixerunt, Romam mittere legatos, seu disceptare, seu rogare senatum mallent.* Liv. 35, 33.—*P. Sempronius facundissimus habebatur, seu causa oranda, seu in senatu, ad populum, suadendi ac dissuadendi locus esset.* Ib. 39, 1 (subjunctive of contingent action, according to p. 331; compare: Cato, *si causa oranda esset, eloquentissimus erat.* Ib. 39, 40).—Here belongs the idiomatic expression '*velit nolit*' (may he wish it or not), where *sive* is omitted, instead of '*sive velit, sive nolit*', being subjunctives according to p. 712, Obs. 16, C; as: *Hunc ita fundatum necesse est, velit nolit, sequatur hilaritas continua.* Sen. V. B. 4.

Obs. 6. Very frequently *sive...sive* disjunctively coördinates That-clauses, causal and other clauses, or participial constructions (as abbreviated clauses), or single members of a sentence. *Sive...sive*, in this connection, pass over into disjunctive coördinating conjunctions. *Sive*, in the constructions mentioned Obs. 4 and 5, has the force of *vel* before *si*, *si* being still a subordinating conjunction, the coördination being made by the suffix *re*; but in the coördination of other clauses, or of mere phrases and words, *sive...sive* has grammatically the nature of *vel...vel*, although *sive* and *vel* are still distinguished according to the rule P. I., p. 280 foll. *Sive...sive*, in this connection, is generally rendered '*either...or*'. EXAMPLES. 1. CLAUSES COÖRDINATED: Magnitudo se abdicavit, *sed quia* vitio creatus erat, *sed quia* plebs scivit ut etc. Liv. 6, 38. — Omnibus tamen Africa cura erat, *sed quia* ibi summam rerum bellique verti credebant, *sed et* Scipioni gratificarentur. Ib. 30, 3. — 2. PARTICLES COÖRDINATED: Hi, *sed ipsi* per se suspensissimi, *sed indicata re*, nihil usquam spei nisi in fuga ponebant. Liv. 35, 38. — Fugienti regi disceptationem, *sed jam* asperam cum maxime prosperam, *sed a* maiore recenti congressu, Minnio persuasit ut arcescerentur locati. Ib. 35, 15. — Hominum milia sex, *sive fūso*, Minnio persuasit ut arcescerentur locati. Ib. 35, 15. — 3. SINGLE MEMBERS COÖRDINATED: Quantaecunque petisti, obtinuisti *sed vi*, *sed fortunā* vestrā. Liv. 6, 18. — Quinque omnino fuerunt qui Oppianicum, *sive imprudentiā*, *sive misericordiā*, *sive ambitione* adducti, absoluerunt. Cic. Clu. 28. — Saxum ingens, *sive imbricis*, *sed modis* terrae labefactum, in vicum Juguram ex Capitolio prociuit. Liv. 35, 21. — Pelos pro velis erant, *sive propter huiusmodi*, *sive ex* quod tantas tempestates sustinere velis non satis commodum posse arbi rabantur. Cic. B. G. 3, 13. Often attributes, belonging to the same governing noun (either genitives or adjectives) are thus coördinated by *sive...sive*. Such attributes frequently are *virtual predicates*, so that a copula may be supplied. In this instance *sive...sive* has the same relation as in the construction mentioned Obs. 5, being likewise rendered by '*whether...or*', or '*be it that...or that*', as: (que sententia) testis erit, *nunc an* legumini as vestris pepercerim, quum me *sed turpi*, *sed necessaria* sponsione obstrinxerim (sponsione, *sive ad turpis erat*, *sive necessaria*: be it, that it was disgraceful or necessary). Liv. 9, 8. — Ac si volumus hujus rei quae vocatur eloquentia, *sive artis*, *sive studii*, *sive eruditionis* ejusdam, *sive facultatis* ab naturā profecta, considerare principum, reperiemus etc. Cic. Inv. 1, 1.

etc. Cic. Inv. 1, 1.

Obs. 7. Anteclassical is the use of *sive*=*vel si*, so that *vel* does not coördinate the *Si*-clause, but the *thesis* on which the *Si*-clause is dependent, as: Postulo, *sive* equum est, oro. (=Postulo, *vel* oro, *si* equum est). Ter. And. 1, 2, 16. In classical language, this connection is always expressed by *vel si*, as: Pero igitur a te, *vel si* pateris, oro. Cic. Fam. 9, 13, 3.—Peculiar is the use of *nive* = *vel nō*, by which coördinated members of a 'sponson' (*R.* 44, Obs. 9, *B*) are introduced, as: Cedo quicum habeam iudicem 'nō dolo malo inistiputū sis, *nive* claudum siem quinque et viginti patus annos'. Plaut. Rud. 5, 3, 24. *Nive*, also, seems to have been colloquially used in opposition to *sive* (*sive nive* = *velis nolis*), as: Illud quod dicitur '*sive nive*' irridet. Cic. Cic. 23 (according to a very probable conjecture, the manuscripts having the senseless '*nibe*').

## VII. PARTICULAR USAGE OF CONDITIONAL CONJUNCTIONS AND CLAUSES.

*Rem. 50.* There are several idiomatic usages of the conditional conjunctions *nisi* and *si*, and conventional usages in regard to certain forms of conditional clauses, which more or less deviate from the English idiom.

Obs. 1. *Nisi* (never *ni*) is often used with coordinating force, to RESTRICT a preceding or subsequent (especially negative) statement, representing the proposition, phrase, or word, which it introduces, as an *exception*. *Nisi* thus connects 1) independent sentences (Obs. 2); 2) relative, and other clauses (Obs. 3); 3) participial constructions, as abbreviated clauses (Obs. 4); 4) single members of a sentence (Obs. 5-8).

Obs. 2. The sentences introduced by *nisi* have sometimes the value of independent sentences, being neither to the preceding, nor to the subsequent sentence in the logical

relation of a condition to its thesis. In this instance *nisi* has an ADVERSATIVE and restricting force, similar to the coördinating *quamquam* (p. 698, OBS. 12), by which it may be often replaced, being generally rendered by 'however', or 'but'. If so used, it is generally connected with *tamen*, the preceding sentence which is restricted by it (and which sometimes is *understood*) being *negative*. The proposition thus introduced by *nisi* or *nisi tamen*, since it is an independent sentence, has its predicate always in the indicative, as : Quid est quod Capitōnem primum scire voluerit? *Nescio. nisi hoc video*, Capitōnem in his bonis esse socium; I do not know; *but (however) this I see* that Capito is his partner in this property. Cíc. R. A. 35.—De re *nihil* possum iudicare; *nisi* illud mihi certe *persuadeo*, te, talem virum, nihil temere fecisse. Ib. Fam. 13, 73, 2.—*Nihil* mihi gratius facere potes, *nisi tamen* id erit gratissimum, si, quæ tibi mandavi, confeceris. Ib. Fam. 5, 14.—Equidem nec cur ille tantopere contendat video, nec cur tu repugnes, *nisi tamen* multo minus tibi concedi *potest* quam illi, laborare sine causâ (=*nisi tamen* hoc video, multo minus tibi concedi *posse* etc.). But so much I see that it can be much less conceded to you than to him, to labor without a cause). Ib. Fam. 13, 1, 4.—Marii pudore magis quam malo exercitum coercēbat, quod multi per ambitionem fieri ajebant, pare, quod a pueritiâ consuevit duritiam voluptatī habuisset; *nisi tamen* res publica pariter ac sævissimum imperio bene atque decore *gesta*; *However* the administration of the army was good and respectable, the same as it would have been under the severest command. Sall. Jug. 100. [Here we may supply as a connecting link '*nescio quo jure hæc dicantur. nisi hoc tamen scio rempublicam* etc.': *nisi*=be this as it may].

Obs. 3. Frequently *nisi*, without a predicate of its own, connects a relative, temporal or any other clause with a previous negative sentence, so that it merely restricts the negation (=not except, nothing but), *non...nisi* being frequently equivalent to 'only'. In such constructions *nisi* belongs to a principal sentence *understood*, on which the clause is made dependent. EXAMPLES. 1. RELATIVE CLAUSES: Dicere bene nemo potest *nisi qui* prudenter intelligit: *Nobody can speak well but (except) he who intelligently understands (what he says).* Cic. Brut. 6, 23 (= *nisi hic dicere potest qui* etc.).—Adversus quod ego *nihil* dicturus sum, *nisi* (i. e. *id dicturus sum*) quod a vobis didici. Liv. 21. 18.—*Nemo* irascendo fit fortior, *nisi qui* fortis sine ira non esset. Sen. Ira. 1, 13.—*Quis* mortaliū, *nisi cui* nullum superest hominis vestigium, per diem loctemque titillari velit? Ib. Brev. V. 5.—2. INFINITIVE CLAUSES: De prætorē *nihil* dicam aliud, *nisi eadem* cum *timuisse* quam ceteros. Cic. Planc. 41.—3. UT-CLAUSES OF ALL DESCRIPTIONS: *Nihil* aliud laboro, *nisi ut* salvus sim. Cic. Fam. 16, 4, 8.—Reperio *nihil* aliud actum, *nisi ut* decem reges constituerentur. Ib. Agr. 2, 6.—*Ne* quod optem *quidem* jam habeo, *nisi ut* aliqui inimici misericordiā liberēmur. Ib. Att. 9, 12, 4. For various kinds of Ut-clauses thus connected by *nisi*, comp. Cic. Qu. Fr. 1, 3, 6; Ib. Fam. 16, 6, 3; 12, 2, 2; Fin. 5, 19, 53; Ac. 2, 3, 7; Orat. 51, 170; Quinct. 30, 91; Lig. 4, 10; Cæl. 13, 32; Liv. 21, 29; 39, 52; Suet. Cal. 23. In anticlassical and postclassical Latinity, *nisi ut* frequently has the force of *nisi ita ut* ('except so that', 'but that') with the same meaning as *nisi si* (see below, No. 6), as: Quis hic homo est? Non edepol scio, *nisi ut* observēmus quo eat, aut quam rem gerat (= *nisi si observēmus*). Plaut. Pseud. 4, 6, 39.—Irasci non potes, *nisi ut* omnia tremant. Sen. Clem. 1, 8.—Nec quisquam perspicere tot reconditas res potest, *nisi ut* facultati vis eloquentiæ accedat. Tac. Dial. 33, 5.—For *nisi* in connection with Fact-clauses introduced by *quod*, see p. 607.—4. TEMPORAL QUUM-CLAUSES AND DUM-CLAUSES: An ille aves, *nisi quum* vicērunt, canere non solent? Cic. Div. 2, 26.—Atque ille eis semper utebatur; nos, *nisi dum* a populo auspicia accepta habēmus, quam multum eis utimur? (= *non utimur nisi dum*, 'except while'). Ib. 2, 36.—Nec unquam tacentem, *nisi dum* vellit alas. Sen. Ep. 56.—5. For QUIA-CLAUSES with *nisi* see Liv. 3, 4; Plaut. Truc. 4, 3, 11; Rud. 4, 3, 85; Pers. 4, 3, 84; Pseud. 1, 1, 105.—6. Often *nisi si* is placed before other Si-clauses, the *si* of the Si-clause being apparently redundant (*nisi si* = 'except if' = 'except'). If *si* is thus omitted, the clause becomes an ordinary *Nisi-clause*. The two constructions, however, are *grammatically* different, as: Nunc, *nisi si* quid ex præeunte viatorē exceptum est, scire nihil possumus. Cic. Att. 2, 11, 1.—Noli putāre me ad quemquam longiores epistolas scribere, *nisi si* quis ad me plura scripsit cui etc. Ib. Fam. 14, 2, 1. Comp. Ib. Att. 2, 3, 2; Nep. Att. 12, 2.—Often *nisi si* is used when the principal sentence is *not negative*, especially in an ironical sense, as: Dixisset etiam collēga meus, patruus tuus; *nisi si* tu es solus Antonius (but perhaps you are the Antonius). Cic. Phil. 2, 28.—Jam sum assecutus ut vos omnes factam esse aperte conjurationē viderētis; *nisi vero si* quis est qui Catilinæ similis cum Catilinā sentire non putet. Ib. Cat. 2, 4, 6.—*Nisi si* quid in Cæsare sit auxilii, omnibus Gallis idem esse faciendum quod Helvetii fecerint. Cæs. B. G. 1, 31. Comp. Cic. Inv. 2, 57, 171; Liv. 6, 26; 26, 3; 28, 31; Sen. Ot. 30.—Sometimes, instead of *nisi si*, the comparative forms *extra quam si*, and *præterquam si* are found, mostly occurring in quotations of ancient legal formulas and treaties, but also (rarely) in ordinary style, as: Si quis ascribat ad legem hanc exceptionem '*extra quam si* quis reipublice causā exercitum non tradiderit'. Cic. Inv. 1, 83.—Datum consulibus negotium est, ut omnia Bacchanalia diruerent, *extra quam si* qua ibi vetusta ara aut signum

clause may be represented as real, or as merely assumed by the speaker. Clauses of the latter kind are called **HYPOTHETICAL COMPARATIVE CLAUSES**. They have the same syndetic antecedents as the ordinary comparative clauses, but the conjunctions by which they are introduced are regularly combined with the conditional conjunction *si* (for the qualitative comparison: *quasi, ut si, velut si, ac si*; for the quantitative comparison, *quam si*; the former corresponding to 'as if', the latter to both 'than if' and 'as if'). The predicates of hypothetical comparative clauses must always be in the **SUBJUNCTIVE**, since these clauses always imply a hypothetical thesis understood, as: *Hoc idem est ac si nihil faceres (facias), = ac esset si faceres*; *melius fecisti quam si lacuisses, = quam fecisses si lacuisses*. See p. 748, OBS. 5.

### I. QUALITATIVE COMPARISON.

**Rem. 51.** Comparative clauses representing compared qualities as *like*, take as syndetic antecedents the **ADJECTIVES** *idem, par, similis, or talis*, the clause being introduced by the relative adjective *qui* (with *idem*), or by *qualis* (with *talis*), or by the conjunctions *ac* and *atque*. In the comparison of *like manner*, the syndetic antecedents are 1) the adverbs *sic* and *ita*, taking the conjunctions *ut (sicuti, uti), tamquam*, or the adverbs *quemadmodum* and *quomodo*; 2) the adverbs *aeque, pariter, similiter*, or the negative adverb *non secus*, taking the conjunctions *atque* and *ac* (rarely *quam*).—For the comparison of **UNLIKE QUALITIES**, the **ADJECTIVE** antecedent *alius* is used, with the conjunctions *atque* and *ac* (sometimes *quam*), and for **UNLIKE MANNER**, the adverbs *aliter* and *contra*, with the conjunctions *atque* and *ac* (sometimes *quam*). For hypothetical comparison (§ 626, OBS. 3) the conjunctions *quasi, tamquam si, velut si, ut si, ac si, or tamquam* and *velut*, without *si*, are employed. The mood of the clause, for hypothetical comparison, is always the **subjunctive**, and for ordinary comparison, always the **indicative**, unless the general rules (p. 385 foll.) require the subjunctive.

**OBS. 1.** Comparative clauses dependent on the syndetic antecedent *idem* generally take the form of a **RELATIVE CLAUSE**, introduced by *qui* (p. 496), while in English a strictly comparative form (by the conjunction 'as') is used; as: *Eundem fere quae ex nuntiis cognoverat (the same things as he had learned from the messengers), coram perspicit*. Cæs. B. G. 5, 10.—*Nemo nostrum idem est in senectute qui fuit in juventute*. Sen. Ep. 58. If both propositions of the comparison have the same predicate, the *Qui*-clause regularly is without a predicate of its own: *Non licet mihi idem quod eis, quibus omnia P. R. beneficia dormientibus deferuntur*. Cic. Ver. 2, 5, 70.—*Vult in eodem quo ceteri, jure versari*. Ib. L. Ag. 2, 23.—*Non eadem mihi, qua superioribus consulibus, lege et conditione utendum esse decrevi*. Ib. 2, 3.—*Eandem copias, quas ante, presidio navibus reliquit*. Cæs. B. G. 5, 11. Very frequently a coördination by *et, atque, ac, or que* is used, in place of a relative construction, if the predicates are the same, and in the same tense and mood, as: *Nisi eundem et adversarium et testem habuerit Roscius, nolo vincat*; I do not wish Roscius to defeat his adversary, unless he has the same man as an adversary and as a witness (=unless his adversary be at the same time his witness). Cic. R. A. 3, 9.—*Imperii aetate, quae ejus finis idem fuit: the end of his reign and of his life was the same (=the end of his reign was the same as the end of his life)*. Sall. Jug. 5.—*Querebatur eundem accusatorem capitis sui ac judicem esse*. Liv. 8, 32.—*Est ejusdem et eripere et contra rempublicam largiri pecunias*. Cic. Or. 2, 49.—*Ut eadem sit utilitas uniuscujusque et universorum*. Ib. Off. 3, 6.—*Virtus eadem in homine ac deo est*. Ib. Leg. 1, 25.—From this construction arose the use of *ac* and *atque* with the force of a comparative conjunction, corresponding to the English 'as', as: *Animus erga te idem (est) ac fuit (is the same as it was before)*. Ter. Heaut. 2, 3, 24.—*Hoc ipsum unum et idem videtur esse atque id quod de me ipso nominatim tulisti (this very thing was the same as that which, etc.)* Cic. Dom. 20, 51.—Thus *idem* is followed by *ut*: *Disputationem habitam idem fere verbis exponimus ut actum disputatumque est*. Cic. Tusc. 2, 3.—If *idem* is the syndetic antecedent of a **hypothetical comparative clause** (§ 626, OBS. 3), the clause is sometimes introduced by the relative *qui* combined with *si*, as: *Acta per eundem quo si Carthaginiensium nomine sic ageretur (=quo actum esset si, etc.)* Liv. 22, 22. Generally, however, clauses of this kind are introduced by the conjunction *ac* or *ut*, in connection with *si* (=as if), as: *Neque vero idem profici longo itineris spatio ac si coram de omnibus conditionibus disceptetur (=ac proficiatur, si disceptetur)*. Cæs. B. C. 1, 24.—*Qui alius*

nocent ut in alios liberales sint, in eadem sunt injustitia ut si in suam rem aliena convertant. Cic. Off. 1, 14.

**OBS. 2.** *Par* and *similis*, which are generally construed with a dative or genitive, often take comparative clauses introduced by *ac* or *ut*, according to the analogy of *idem*, as: *Hostes inter se jactabant, similem Romae pavorem fore, ac bello Gallico fuerit*; That there would be a consternation like the one (similar to the one) in the Gallic war (=pavorem, similem ei pavori qui fuerit). Liv. 6, 28.—*Date operam ne similis utamur fortunae atque uti sumus*. Ter. Phorm. prol. 32.—*Si parum sapientiam hic habet ac formam*. Praut. M. 4, 6, 36.—*Ita similis erit ei finis boni atque antea fuerat*. Cic. Fin. 5, 14.—*Ibi ortus humanus similis ut in mundo*. Varro L. L. 6, 2.—*Non mihi par cum Lucilio ratio est ac tecum fuit*. Cic. N. D. 3, 1.—*Si par in nobis hujus artis atque in Zeuxi picturae scientia fuisset*. Ib. Inv. 2, 2.—*Cassius pari, atque antea, ratione egit*. Cæs. B. C. 101.—Whether *quam* was used after *par*, is doubtful [In the only passage where it occurs, 'cum pari numero equitum quam in continenti relinquebat', Cæs. B. G. 5, 8, it is uncertain whether *quam* or *quem* must be read]. Frequently, hypothetical comparative clauses with *ac si*, etc., are used after *similis* and *par*, as: *Similes sunt ut si qui gubernatorem in navigando nihil agere dicant (=they act as if)*. Cic. Sen. 6, 17.—*Simile est quasi dicas in operto (me fuisse)*. Ib. Att. 1, 16, 10.—*Similes sunt di tamquam si Poeni aut Hispani in senatu nostro loquerentur sine interprete*. Ib. Div. 2, 64.—*In quo offensae minimum, gratia par ac si prope adessimus*. Sall. Jug. 102, 7.—*Sepius audita vox principis, parum vim rerum habentem a procuratoribus suis iudicatum ac si ipse statisset*. Tac. Ann. 12, 60.

*Talis* almost always takes a comparative clause with *quasi* (=as), as: *Moveor talis amico orbatus qualis nemo umquam erit*. Cic. Am. 3, 10.—*Qualia quiesque habet, talis est*; Every one is such, as he has qualities (=as his qualities are). Sen. Ep. 87. Rarely *talis* is followed by *ac*, as: *Honos talis paucis est delatus ac mihi*. Cic. Vatin. 4, 10.

**OBS. 3.** **ADVERBIAL** syndetic antecedents of such clauses, the adverbs (or adverbial ablatives with *modo*) of the above-mentioned adjectives may be used (*eodem modo, pariter, similiter*), also *idem, aeque*, and (rarely) *juxta* (=equally, or 'next to'), *perinde* (in the same manner, 'the same') or *proinde*, and the negative combination *haud* (non) *secus*, the latter two more frequently occurring in **hypothetical comparative clauses**; being followed by the conjunctions mentioned OBS. 2, as: *Quum animi inaniter moveantur eodem modo rebus his quae nullae sint ut iis quae sint*. Cic. Ac. 2, 15.—*Neque vero illum similiter, atque ipse eram, commotum esse vidi*. Ib. Phil. 1, 4.—*Pariter nunc operam adjuves ac dudum re opitulata es*. Ter. Phorm. 5, 3, 3.—*Is reliquit filium pariter moratum ut pater ejus fuit*. Plaut. Aul. Prol. 21.—*Fecisti item ut praedones solent*. Cic. Verr. 2, 4, 9.—*Quae beneficia aeque magna non sunt habenda atque ea quae considerate delata sunt*. Ib. Off. 1, 15.—*Nisi haberes qui illi aeque ac tu ipse gauderes*. Ib. Am. 6.—*Curius me colit aeque ac patronum suum*. Ib. Fam. 13, 69, 1.—*Vestrum nomen juxta ac deos immortales intuetur*. Liv. 37, 54.—*Non dixi secus ac sentiebam*. Ib. Or. 2, 6.—*So with quam*: *Juxta eam rem aeque passi sunt, quam quum consultum vulgari viderent*. Liv. 10, 6.—*Ne quid fiat secus quam volumus, quamque oportet*. Cic. Att. 6, 2, 2.—With **HYPOTHETICAL comparative clauses**: *Si eodem modo putant, exercitu in fore collocato, dici pro Milone decuisse, ut si de re privata ad unum judicem diceremus, vim eloquentiae sua facultate metiuntur*. Cic. O. G. O. 4, 10.—*Juxta ac si hostes adessent, castra vallo atque fossa munire*. Sall. Jug. 45.—*Similiter facis ac si me roges cur te duobus contuear oculis*. Cic. N. D. 3, 3.—*Navales socii juxta effusi ac si inanis cultorum egentibus praedarentur*. Liv. 22, 31.—*Egnatii absentis rem ut tueri, aeque a te peto ac si mea negotia essent*. Cic. Fam. 13, 15, 2. *Pariter, proinde ac si omnes candidati essent, cuncta experientes*. Liv. 5, 14.—*Cetero, perinde ac si tribunitium annum in imperio faciat, praetermissa nomina consulum suorum esse*. Ib. 4, 7.—*Perinde ac si in hac formula omnia iudicia legitima comprehensa sint, perinde dicemus*. Cic. Rose. C. 5.—*Atque haec perinde loquor quasi in eo si iniquitas ejus reprehendenda*. Ib. Verr. 2, 3, 19.—*Namquam secus habui illam ac si ex me esset nata ('never otherwise than I would if', =always the same as if)*. Ter. Hec. 2, 3, 5.—*Tecum agam non secus ac si meus esses frater*. Cic. Mur. 4\*.

*Perinde (proinde) ut* or *perinde ac* means 'according as', the same as *prout* (OBS. 4, II), often adding *ita* or *sic* in the principal sentence as an apodosis; as: *Habes a patre munus, mea quidem sententia magnum, sed perinde erit ut acceperis*. Cic. Off. 3, 33.—*Philosophia non proinde ac de hominum vita merita est, laudatur*. Ib. Tusc. 5, 2.—*Perinde ut opinio est de cujusque moribus, ita quid ab eo factum et non factum sit, existimari potest*. Ib. Clu. 25.—In expectatione civitas erat, *perinde ut evenisset res, ita communicatos honores pro bene aut secus consulto habitura*. Liv. 7, 6.

**OBS. 4.** The usual syndetic antecedents of comparative *Ut*-clauses (sometimes of clauses of the force of *tam...quam*, as: *Ridiculus aeque nullus est quam hic quando esurit*. Plaut. Stich. 1, 3, 64.—*Nullum opinor esse agrum aeque feracem quam hic est (=tam feracem, or feraciorum)*. Ib. Ep. 2, 3, 2.

Auri argentique usum, *velut omnium scelerum materiam*, sustulit Lycurgus. Just. 3. 2. H. *Prout* (instead of *pro eo ut*) means 'according as': *Prout* tempus ac res sineret; *According as* time and circumstances would permit. Liv. 8. 5.—Alii militares viri, *prout* a quoque navata opera erat, donati (=according to their merits). Ib. 30. 15.—Sthenius comparat suppellectilem elegantiorē, *prout* Thermitani hominis facultates ferebant. Cic. Verr. 2. 34. 82.—*Prout* locus infans equisve his aut illis, *prout* animus pugnantium est, *prout* numerus, varia pugnae fortuna est. Liv. 38. 40.—*Pro eo ut* temporis difficultas aratorumque penuria tulit (quoted from a letter). Cic. Verr. 2. 3, 54.

Obs. 5. HYPOTHETICAL QUALITATIVE COMPARISONS (i. e. those which compare facts merely assumed, and non-real) are introduced by *tamquam si*, *ut si*, *velut si*, *ac si*, *quasi*. These conjunctions may take the same syndetic antecedents as ordinary comparative conjunctions (mostly *ita*, and *sic*; see the examples in Obs. 1. 2. 3); but more generally they are used without any syndetic antecedent. The predicate of these clauses is *always* in the subjunctive, which (deviating from the rules in hypothetical Si-clauses) usually follows the law of consecution, as: *Tamquam si emeris me argento, liber servo tibi* (as if you had bought me with money) Plaut. Men. 5. 9. 42.—*Sic aggrediar ad hanc disputationem, quasi nihil umquam audierim de diis immortalibus* (as if I had never heard anything). Cic. N. D. 3. 7.—*Quoniam taciturnitas imitatur confessionem, pro eo ac si concessum sit* (as if it had been confessed) concludere oportebit argumentationem. Ib. Inv. 1. 32.—*Vos quoque velim, milites, non lamentis tamquam extinctos sequi, sed, velut si adhortantes signumque dantes videatis illos* (as if you were seeing them), ita praelia infre. Liv. 25. 38.—*Quid ego his testibus utor, quasi res dubia aut obscura sit?* Cic. Div. Caec. 4.—*Antonius Plancum sic contemnit, tamquam si illi aqua et igni interdictum sit*. Ib. Phil. 6. 4.—*Rufio tuus ita desiderabatur ut si esset unus e nobis*. Ib. Fam. 7. 20. 1.—*Scipio, quasi praesens, perpaucis ante mortem diebus, discessit de republica*. Ib. Am. 4.—*Velut si urbem ingressus feres* Scipio, ita *condemnationem* ad arma est. Liv. 29. 28.—*Nunc talis vir amissus est, dum causa ita de hoc exitu praeterea ut si in Platoni civitate res ageretur*. Cic. Or. 1. 53.—*Sequani absentis Ariovisti crudelitatem velut si coram adesset, horrebant*. Caes. B. G. 1. 32.—But HYPOTHETICAL MOODS (in the imperfect and pluperfect) are quite frequently used, even if the principal predicate is a non-preterite, in accordance with the rules on hypothetical Si-clauses, as: *Ejus negotium sic velim suscipias ut si esset res mea*. Cic. Fam. 2. 14.—*Ita se gerant in istis Asiaticis itineribus ut si iter Appia via faceres*. Ib. Qu. Fr. 1. 1, c. 6. Comp. the passages Cic. O. G. O. 4. 10; Fam. 13. 43. 2; Mur. 4 (quoted Obs. 3); and Cic. Div. 2. 64. and Sall. Jug. 102. 7 (quoted Obs. 2).—Sometimes *tamquam* and *velut* are used, without the addition of *si*, in the meaning of 'as if', as: *M. Atilium captum in Africa memorat, tamquam M. Atilius primo accessu ad Africam effugeret*. Liv. 28. 13.—*Capiti inde ludi, velut ea res non ad rem gerendam pertineret*. Ib. 2. 36.—*Me quoque juvat, velut in parte laboris ac periculi fuerim, ad finem belli Punici pervenisse*. Ib. 8. 3.—Not rarely *tamquam*, *velut*, and *quasi*, in the meaning of 'as if', are used with PARTICIPIAL constructions: *Antiochus secutus admodum de bello Romano erat, tamquam non transiit in Asiam Romanis* (as if the Romans were not going to cross over to Asia). Liv. 35. 41.—*Id responsum Latinos, velut nihil iam non concedentibus Romanis, ferociores fecit*. Ib. 8. 2.—*Nec vero velim, quasi decurso spatio, a calce ad carceres vocari*. Cic. Tusc. 1. 4. For the use of *quam si* in clauses of quantitative comparison, see p. 762, F.

Obs. 6. Often *quasi* (mostly in connection with *vero*) is used for PERIODICAL COORDINATION, like *nisi* (p. 738, Obs. 2), and *quamquam* (p. 698, Obs. 12), to designate as untrue a fact which would be true if some assertion of another person, contained in the preceding sentence, were correct. The predicate of sentences thus introduced by *quasi*, is in the SUBJUNCTIVE either of the hypothetical or of the non-hypothetical tenses, according as the predicate of the preceding sentence is a preterite or a non-preterite; as: *Quasi vero aut nos ei in finibus additum fundum esse, aut tum quisquam fuerit qui dubitavit quin emeretur Casennia?* Cic. Caec. 6. 16.—*Quasi id aliter fieri oportuit?* Ib. 6. 17.—*Quasi ego autem aliquam istorum hominum?* Ib. Div. 2. 20.—*Quasi non potuerit id evenire casu?* Ib. 2. 21.—*Quasi vero referat quod fieri potest, quam id saepe fiat?* Ib. 2. 29.—*Non tu homo ridiculus es, qui ex me queras quid de istis municipiis futurum putem?* *Quasi aut ego quidquam sciam quod iste nesciat, aut, etc.* Ib. Fam. 9. 17. 1.—*Multa verba fecisti, te quum res videres, causam non querere*. *Quasi ego aut fieri concederem aut esset philosophi, causam non querere*. Ib. Div. 2. 20. 46.—*Exponit vasa Samia: Quasi vero esset Diogenes Cynicus mortuus, et non divini hominis Africani mors honestaretur*. Ib. Mur. 36.

Obs. 7. Very frequently *quasi* (sometimes *velut* and *tamquam*) is used to designate some single word, being in any grammatical relation (either a subject, attribute, object, predicate, or any part of speech), as a FIGURATIVE EXPRESSION (= 'as if were'), as: *Sunt enim homines quasi spectatores rerum coelestium* (a trope taken from the 'ludi'). Cic. N. D. 2. 56.—*Quo plures det tibi tamquam ansas ad reprehendendum*. Ib. Am. 16. 59.—

*Anres duros et quasi corneolos* (a diminutive formed by Cicero himself = 'hornish') habent introitus. Ib. N. D. 2. 57.—*Haec est gravium hominum, illa (autem) quasi assentatorum populi, multitudinis levitatem voluptate quasi titillantium*. Ib. Off. 2. 18.—*Sed est alius quoque aditus ad multitudinem, ut in universorum animos tamquam influere possimus*. Ib. Off. 2. 9.—*Sunt homines qui quasi de industria* (almost on purpose; the Latin expression being figurative) in odium P. R. irruere videantur. Ib. Verr. 1. 12.—*Haec nequequam velut calcinatus Romanus*. Liv. 35. 23.—If the word thus designated as figurative, is a noun which, in English, would take an indefinite article, the indefinite adjective *quidam* or *aliquis* is generally added, as: *Ei qui quasi magnam quandam insulam incolunt, quam nos orbem terrae vocamus*. Cic. N. D. 2. 66.—*Mors est quaedam quasi migratio commutatioque vitae*. Ib. Tusc. 1. 12.—*Odyssaea Homeri est tamquam opus aliquod Daedali*. Ib. Brut. 18.

Obs. 8. *Ceu* is used as a comparative conjunction, both in the classical poets, and in the prose-writers of the silver age: 1) with the meaning of *ut* in a SIMILE, as: *Squamam incendebat fulgor, ceu nubibus arcus mille trahit varios adverso sole colores*. Virg. Aen. 5. 86.—*So ceu si* with the subjunctive = *ut si*: *Ceu lapidem si percussit lapis*. Lucr. 6. 160.—2) With the meaning of *tamquam* (as if): *Ut gloriosissimas victorias, ceu damnosas reipublicae, increparet*. Suet. Tib. 52.—3) With the force of *ut* parenthetical: *Reducto coma capite, ceu noxii solent*. Suet. Vitell. 17.—4) With the meaning of *quasi vero*, need coördinatively for denial (Obs. 6): *Ceu vero non hoc etiam indignatione sacrae parentis exprimi possit*. Plin. H. N. praef. 1.

Obs. 9. Clauses denoting a comparison of DIFFERENT QUALITY OR MANNER take the SYNDETIC ADJECTIVE ANTECEDENT *alius*, and the ADVERBIAL antecedents *aliter* and *contra*. The clause is introduced:

1) By *ac* or *atque*, which correspond to 'than' after 'other', to 'from' after 'different', and to 'to' after 'contrary', as: *Potest aliud mihi ac tibi videri* (I may have another view than you have; or 'a view different from yours'). Cic. Orat. 71.—*Si essent omnia mihi soluti-sima, tamen in republica non alius essem atque nunc sum*. Ib. Fam. 1. 9. 21.—*Longe alia ac in scripseras narratur*. Ib. Att. 11. 10. 2.—*Morini longe alia ratione ac reliqui Galli bellum gerere insisterunt*. Caes. B. G. 3. 28.—*Ne sim salvus si aliter scribo ac sentio*. Cic. Att. 16. 13 a. 1.—*Qui nuntiarent aliter causam agi atque illi existimarent*. Ib. R. A. 22.—*Ea res longe aliter ac ratus erat evenit*. Sall. Jug. 7.—*Illi negabant, sibi iudicium sumptuos contra atque omnis Italia populusque Romanus iudicavisset*. Caes. B. C. 3. 12.—*Vides omnia fere contra ac dicta sint ab haruspibus evenisse*. Cic. Div. 2. 24.—Sometimes *ut*-clauses are used after *aliter*: *Sed si aliter ut dixi, accidisser*. Cic. Rep. 1. 3.

2) By *quam* (rarely by *ac*) when the syndetic antecedent is connected with a NEGATION, as: *Virtus nihil aliud est quam in se perfecta natura*. Cic. Leg. 1. 8.—*Ne aliter Hortensius quam ego velim, meum laudet ingenium*. Ib. Verr. 1. 9. 24.—*Nec quicquam aliud opus est quam abrogari*. Ib. Att. 3. 15. 5.—*Lysander nihil aliud molitus est quam ut omni civitates in sua teneret potestate*. Nep. Lys. 1.—*Valerius et Horatius negabant se aliter iudicatos quam si decemviri deponerent insignia magistratus*. Liv. 3. 51.—Thus 'non aliter quam' may be followed by a hypothetical Si-clause: *In senatu nihil actum aliter quam si plebis ibi esset consilium* (= *quam ageretur si*, etc.) Liv. 23. 4.—*Contra* may be followed by *quam*, even if not connected with a negative: *De vestro jure contra quam proponebam, iudicabo*. Cic. Dom. 46.—*Quum contra fecerint quam polliciti sint*. Ib. Leg. 2. 5.—Generally, however, if *alius* is connected with a negative, *nisi* is used in place of *quam*. See p. 740, Obs. 7.

Obs. 10. Peculiar is the use of '*nihil aliud quam*' or '*quid aliud quam*', with the meaning of the particle 'only', when '*aliud*' has entirely lost the quality of an absolute adjective, as: *Per aspera primo, nihil aliud quam via impediri, iere*; They marched, being hindered only by the road. Liv. 27. 18.—*Hostes nihil aliud quam perfusis vano timore Romanis, citato agmine abeunt; i. e.*, 'when the Romans had been merely seized with an unnecessary fear. Ib. 2. 63.—*Quid aliud quam admonendi essetis?* Nothing would be necessary but to admonish you (= it would be only necessary to etc.). Ib. 22. 60.

Obs. 11. Frequently *alius* (like *idem*) takes propositions coördinated by *et*, *ac*, or *que*, instead of comparative clauses, as: *Alia causa est ejus qui calamitate premitur, et ejus qui res meliores querit*. Cic. Off. 2. 18 (The cause of one who is in distress is different from the cause of one who is looking for better things).—*Pompaeus solet aliud sentire et loqui*. Ib. Fam. 8. 1. 3. Frequently *alius*, in place of taking a comparative clause, is repeated in a coördinate asyndetic proposition, as: *Aliud est enim laborare, aliud dolere*; Worrying one's self is different from grieving (= *laborare est aliud ac dolere*). Cic. Tusc. 2. 15.—*Aliud est maledicere, aliud accusare*. Ib. Cael. 3.—*Aliter loqueris, aliter vivis*. Sen. Vit. B. 18.—*Scitis esse notissimum ridiculi genus, quum aliud expectamus, aliud dicatur*. Cic. Or. 2. 63.—*Dixi enim rationem aliam esse joci, aliam severitatis*. Ib. 2. 65.—*Dolus malus est quum aliud agitur, aliud simulatur*. Ib. Top. 9.—*Alia legatio dicta erat, alia data est*. Ib. Att. 2. 7, 3.—*Turpe est aliud loqui, aliud sentire*. Sen. Ep. 24.

## II. QUANTITATIVE COMPARISON.

## 1. Comparison of Like Quantity.

*Rem. 52.* In the comparison of LIKE QUANTITIES in regard to NUMBERS, *tot* and *totidem* are used as SYNDETIC ADJECTIVE ANTECEDENTS, and *toties* as ADVERBIAL ANTECEDENT. In a comparison of like INTENSITY, the adjective antecedents are *tantus* and *tantusdem*, and the adverbial antecedents, *tam* and *tantopere*. A NUMERAL COMPARATIVE CLAUSE is introduced by the relative adjective *quot* or the relative adverb *quoties*. A comparative clause of INTENSITY is introduced by the relative adjective *quantus*, and the relative adverbs *quantopere* and *quam*.

*Obs. 1.* In the numeral comparison of equal quantity, the comparative clause is introduced by the relative adjective *quot* (=as) for both adjective antecedents (or 'postcedents') *tot* and *totidem*, as: *Tot* appellationes dei possunt esse, *quot* munera (as many appellations as functions). Sen. Ben. 4, 7.—*Quot* homines, *tot* cententiae. Ter. Phorm. 2, 4, 14.—*Quot* officia oratoris, *tot* sunt genera dicendi. Cic. Orat. 21.—Video, non modo ceteros, sed te ipsum *totidem* verbis edixisse, *quot* verbis edicti Romae solet. Ib. Verr. 2, 1, 46.—Vocis mutationes *totidem* sunt *quot* animorum. Ib. Orat. 17.—In later Latinity *atque* occurs after *totidem*: Cum *totidem* navibus *atque* erat profectus. Nep. Milt. 7. In place of *quot* the indefinite relative *quotcumque* may be used to represent an indefinite number as dependent on the will of the subject, as: *Quotcumque* senatus creverit, populusve jussit, *tot* sunt. Cic. Leg. 3, 3.—The adverb *toties* regularly takes a clause with *quoties*, as: *Quoties* dicimus, *toties* de nobis iudicatur. Cic. Or. 1, 27.—Miror, non me *toties* accipere tuas litteras *quoties* a Quinto mihi fratre afferantur. Ib. Fam. 7, 7, 1.—Sometimes a comparative clause with *quoties* refers to the adjective antecedent *tot*, as: Si *tot* consulibus meruisset *quoties* ipse consul fuit; If he had served as a soldier under as many consuls, 'as many times' he was consul himself (i. e. 'If the number of the consuls under whom he served, equalled the [number of] times he was consul himself'). Cic. Barb. 20, 47. Such constructions are analogous to the relative constructions mentioned p. 506, *Obs. 3*, *quoties* being equivalent to '*quot vicibus*' (which phrase cannot be used). Similarly a comparative clause introduced by *quot*, sometimes refers to the adverbial antecedent *toties*, as: Moverat eum subeunda dimicatio *toties* *quot* conjerati superessent (that he should have to struggle as many times, as there were conspirators left). Liv. 2, 13.

*Obs. 2.* In the comparison of LIKE INTENSITIES, the adjective connectives '*tantus* (*tantusdem*)... *quantus*' are analogous to the numeral combinations *tot* (*totidem*)... *quot*, as: *Tantū* est contentione actum *quantū* agi debuit. Cæs. B. C. 3, 111.—*Tantum* eorum multitudinem nostri interfecerunt, *quantum* fuit diei spatium. Ib. B. G. 2, 11.—*Tanto* ille superiores vicerat gloria, *quanto* tu omnibus praestitisti; (*By*) so much was he superior in renown to the former generals, as (by as much) you have outdone all. Cic. Dej. 4, 12.—Fiscus *tanti* est, *quantum* habet. Sen. Ep. 87.—Malo beneficiere *tantusdem* est, *quantum* bono malefacere. Plaut. Pæn. 3, 3, 20.—Often the neuter *tantum* with a partitive genitive plural is used with the meaning of the numeral *tot*, in which instance the clause is introduced by *quantum*, as: In sua quisque nave dicit se *tantum* habuisse *naviarum* *quantum* oportuerit. Cic. Verr. 2, 5, 39.

*Obs. 3.* The adverbial comparison of LIKE INTENSITIES is made by the adverbs *tam*... *quam*, or *tantopere*... *quantopere*. *Tam* refers both to adjectives (adverbs) and verbs; *tantopere* (far more rarely used than *tam*) refers only to verbs; as: Nulla ingenia *tam* prona ad invidiam sunt *quam* eorum qui genus ac fortunam suam animis non aequant. Liv. 45, 22.—Neque eos *tam* istius hominis perdit subita letitia, *quam* hominis amplissimi nova gratulatio commovebat. Cic. Verr. 1, 8.—Qua nulla in re *tam* utor *quam* in hac civili et publica. Ib. Att. 2, 17, 2.—Neque enim *tantopere* hanc a Crasso disputationem desiderabam, *quantopere* ejus oratione in causa delector. Ib. Or. 1, 35. Rarely *quam* is used after *tantopere*, as: Quid est in vita *tantopere* querendum *quam* quum omnia in philosophia, tum id quod in his libris queritur? Ib. Fin. 1, 4.—The NEUTER ACCUSATIVES '*tantum*... *quantum*,' as accusatives of intensity (Comp. p. 263, *Obs. 1*), are not rarely used with the force of the adverbs *tam*... *quam*, if referring to verbs, as: Si me *amas tantum*, *quantum* profecto *amas*. Cic. Att. 2, 23, 3.—In prima acie ante signa elephantos collocat, haud *tantum* eis fidens *quantum* ab hoste timere eos credebatur. Liv. 27, 4.—The neuter accusatives *tantum*... *quantum*, if used as adverbial accusatives of distance, have both the nature of an adjective, and of an adverbial comparison, as: Ira *tantum* adest a magnitudine animi, *quantum* a fortitudine audacia. Sen. Ira. 1, 16. Frequently, when both *tam* and *quam* refer to the same or similar adjectives or adverbs, the adjectives or adverbs are repeated after *quam* in the comparative clause, according to the rule for relative clauses (p. 506 foll., *Obs. 3*), as: *Tam* liquidus est, *quam* liquida tempe-

tas esse solet. Plaut. Most. 3, 2, 64.—Quis umquam obeundi negotii studio *tam brevi tempore* tot loca adire potuit, *quam* celeriter Cn. Pompejo duce tanti belli impetus navigavit? Cic. L. M. 12, 34. Hence a comparative clause belonging to the compound antecedent *tandiu* is more frequently introduced by *quandiu* than by *quam* (p. 674, *Obs. 6*, foll.).—If a numeral comparison of like quantity is to be made by absolute adjectives, '*tot*... *quot*' are not used, but *tam*... *multi* (*multa*) followed by *quam* or '*quam*... *multi* (*multa*)', are substituted, as: Nemo orator *tam multa*, ne in Greco quidem otio scripsit, *quam multa* sunt nostra. Cic. Or. 30, 168.—Virtute ipsa non *tam multi* praediti esse *quam* videri volunt. Ib. Am. 26, 98.

*Obs. 4.* Frequently comparisons of equal quantities or intensities are made by *aeque*... *atque* (*ac*) in connection with an adjective, to denote a perfect equality of two quantitative ideas, as: Quae beneficia *aeque magna* non sunt habenda *atque* ea, quae considerate delata sunt. Cic. Off. 1, 15.—Me certe habebis, cui et *carus aequè* sis et *jucundus ac* fuisti patri. Ib. Brut. 71.

*Obs. 5.* If two quantities or the intensity of two qualities or actions are so compared with each other that they are represented as INCREASING OR DECREASING IN LIKE PROPORTION, the English language introduces each proposition by '*the*' before a comparative, while the Latin language uses the following forms: 1) The construction by ABLATIVES OF DIFFERENCE (P. I., p. 218), the principal sentence being introduced by the ablative neuter singular of an absolute demonstrative (*eo* or *hoc*), or by *tanto*, followed by a comparative denoting the intensity of one of the two compared actions or qualities; the clause being introduced by the corresponding relative (*eo*... *quo*; *tanto*... *quanto*), followed by a comparative referring to the other action, as: *Quo* delictum majus est, *eo* poena est tardior; The greater an offence is, the slower is the punishment. Cic. Cæc. 3, 7.—*Quo* carior acceptiorque omnibus erat, *eo* mors ejus suspectior fuit. Liv. 35, 15.—*Quo* plus recipit animus, *hoc* se magis laxat. Sen. Ep. 108.—*Quanto* diutius considero, *tanto* mihi res videtur obscurior. Cic. N. D. 1, 22.—If such periods are dependent on another sentence by means of a relative connection, the relative comparative clause is elegantly involved in the governing relative (p. 531 foll.), as: Itaque benignitas benignitate colitur, *qua* *quo* in plures usus sis, *eo* minus in multas uti possis (for, the greater the number of those who have partaken in it, the fewer are those to whom it may still be applied). Cic. Off. 2, 15.—2) The construction by means of a COMPARATIVE UT-CLAUSE with *quisque* and a SUPERLATIVE, the principal sentence being introduced by *ita* or *sic* likewise followed by a superlative. This form is used if the subject is indefinite, belonging to a plurality of indefinite or definite persons or things, as: *Ut quisque* est vir optimus, *ita* difficillime esse alios improbos suspicatur. Cic. Qu. Fr. 1, 1, c. 4 (the better a man is, the more unwillingly will he suspect others to be wicked).—*Ut* quaque res est turpissima, *sic* maxime et maturissime vindicanda est. Ib. Cæc. 2, 7 (the more disgraceful an action etc.).—*Ut* quisque in fuga postratus, *ita* in periculo princeps (virtual superlative) erat. Ib. Verr. 2, 5, 34 (The more backward any one was in the flight, the more was he exposed to danger, =every one that was last in flight, was the first in danger).—3) The first form with ablatives of difference and comparatives, is sometimes applied to indefinite persons, with *quisque* or with the indefinite *quis*, immediately after the relative *quo* or *quanto* (see p. 532), as: *Quo* quisque asperius adversus Romanos locutus erat, *eo* spes gratiae major fuit; The more severely a person had spoken etc., the greater was his chance of favor. Liv. 35, 17.—*Quo* quis versutior et callidior, *hoc* invisor et suspectior, detracta opinione probitatis. Cic. Off. 2, 9. Comp. Ib. Rosc. Com. 11 (quoted p. 532).—4) Rarer forms are the following: (a) In place of the ablatives of difference, sometimes ordinary relatives referring to the logical subjects of the compared actions, are used: *A quo* expeditior et celerior remuneratio fore videtur, *in eum* fere est voluntas nostra propensior (=quo expeditior ab aliquo remuneratio est, *eo* propensior in eum est voluntas). Cic. Off. 2, 20.—(b) The relative clause is sometimes introduced by an ACCUSATIVE OF INTENSITY, the principal sentence taking the comparatives *magis* *magisque*: *Quantum* in altitudinem progrediebantur, *magis* *magisque* invia loca excipiebant (=quanto altius progrediebantur, *eo* *magis* invia loca excipiebant). Liv. 40, 22.—(c) In silver Latinity the demonstratives *eo* and *tanto* are sometimes omitted, when the relative clauses precede, as: Quidam, *quo* plus debent, *magis* oderunt. Sen. Ep. 19.—(d) Sometimes both propositions are comprised in a single sentence with *quisque* and two superlatives: Ego enim *ignavissimo* cuique *maxime* fidem habeo (= *Ut* *quisque* *ignavissimus* est, *ita* ego ei *maxime* fidem habeo). Cic. Fam. 7, 18, 1. (e) In anteclassical language, this comparison is frequently made with *tam*... *quam* and either a comparative, or a superlative in both propositions, as: *Quam* *magis* ærumna urget, *tam* *magis* ad male faciendum viget. Enn. Med. frgm. 9.—*Quam* *magis* te in altum capessis, *tam* æstus te in portum refert. Plaut. As. 1, 3, 6.—*Quam* *magis* id reputo, *tam* *magis* uror, quæ meus filius turbavit. Ib. Bach. 5, 1, 5.—*Quam* *citissime* conficies, *tam* *maxime* expediet. Cato R. R. 64.—*Quam* *acerbissimā* olea oleum facies, *tam* oleum optimum erit. Ib. 65.—*Quam* *maxime* huic vana hæc suspicio erit, *tam* *facillime* patris pacem in leges conficiet suas. Ter. Hæaut. 5, 2, 44. Comp. Ib. Ad. 3, 4, 56.

## 2. Comparison of Unlike Quantity.

**Rem. 53.** A comparison of **UNLIKE QUANTITIES** may be expressed by a comparison of like quantities made *negative* (*non tam . . . quam* etc.); but generally it is expressed by an adjective or adverb in the **COMPARATIVE DEGREE**, as syndetic antecedent of the comparative clause, which is either introduced by *quam*, or takes the form of a comparative ablative (Obs. 14). In the comparison of unlike **NUMERAL QUANTITIES** the plural adjectives *plures* and *pauciores* are used as syndetic antecedents, instead of which frequently the singular neuter adjectives *plus*, *amplius*, and *minus* are used with *partitive genitives in the plural* (Obs. 1). A comparison of **UNLIKE INTENSITY** is regularly made by the adverbs *magis* and *minus* as syndetic antecedents, the former of which is frequently merged in the **COMPARATIVE DEGREE** of a **DESCRIPTIVE ADJECTIVE** or **ADVERB** (Obs. 7. 10). In place of *magis* the singular neuter adjective *plus* is used in certain instances as adverbial accusative of intensity (Obs. 7. C). The **MOOD** of the comparative clause is regularly the **INDICATIVE**, except when the clause implies a *denial* under an affirmative form (Obs. 12).

**Obs. 1.** A comparison of **UNLIKE NUMERICAL QUANTITIES** is made by the plural adjectives *plures* (more) and *pauciores* (fewer), as: Verres *plures sociorum urbes, quam* Mummus hostium spoliasset videtur. Cic. Verr. 2, 3, 4.—Sic habetote, *plures* esse a Syracusanis istius adventu *deos* (i. e. statuas deorum), *quam* victoriâ Marcelli homines desideratos. Ib. 2, 4, 58.—*Elephantum plures* ab ipsis rectoribus *quam* ab hoste interfecti. Liv. 27, 49.—Hæc ad te *pluribus verbis* scripsi *quam* soleo. Cic. Fam. 7, 1, 6.—Cautum est in Scipionis legibus, ne *plures* essent in senatu ex colonorum numero, *quam* ex vetere Agrigentinarum. Ib. Verr. 2, 2, 50.—*Plura* dixi *quam* volui. Ib. 2, 5, 30.—*Plura* (=more books) brevi tempore, eversa, *quam* multis annis, stante republicâ, scripsimus. Ib. Off. 3, 1.—*Plura* etiam dicta *quam* scripta sunt. Ib. Brut. 44, 164.—Quo quum aliquanto *pauciores* *quam* umquam ante venissent. Liv. 36, 15.—Multo *pauciores oratores* *quam* poete boni reperiuntur. Cic. Off. 1, 3.—In place of *pauciores* frequently the negative expression '*minus multi*' (literally '*less many*') is used: Cum Spartaco *minus multi* (i. e. quam cum Scapito) primo fuerunt. Cic. Att. 6, 2, 8.—In place of both *plures* and *pauciores*, the singular neuter adjectives *plus* and *minus* with plural partitive genitives are frequently used if the phrase is in the *nominative* or *accusative* (P. I, p. 267, § 371), as: Quum *plus cladum* intulisset *quam* accepisset. Liv. 5, 22.—*Samnitiū plus, quam* vellent, intra mœnia esse rebantur. Ib. 8, 25.

**Obs. 2.** An **ADVERBIAL** numeral comparison of unlike quantities is used if one of the compared quantities is represented as a *multiple* of the other ('so many times more', or 'so much more' than, 'twice etc. as much as'). For this kind of comparison the following forms occur: 1) **ABLATIVES OF DIFFERENCE** with the noun *partibus* and an indefinite or definite numeral with a comparative adjective (as *major, amplior* etc.), as: Sol *multis partibus* major atque amplior est *quam* terra universa; The sun is many times greater than the whole earth. Cic. N. D. 2, 36.—Quid, si doceo te *duobus partibus amplius* frumenti abstulisse *quam* populo Romano misisse (twice as much grain as etc.) Ib. Verr. 2, 3, 19.—Mathematici, solem *amplius duodeviginti partibus* confirmant *maiores* esse *quam* terram. Ib. Ac. 2, 26.—2) The adverbial accusative *tantum* or the ablative of difference *tanto* with a *cardinal adverb* and a comparative, as: Ter *tanto* pejor ipsa est, *quam* illam tu esse vis. Plaut. Pers. 1, 3, 73.—Ut ea mancipia *decies tanto* pluris, *quam* quanti essent, aestimarentur. Liv. 39, 44. Comp. the examples p. 264. **Obs. 4.**—'One half as much more' or 'less' is expressed by '*dimidio plus quam*', or '*dimidio minus quam*', and 'as many more than', by '*tanto plures quam*', as: Socii *dimidio minus, quam* civibus datum. Liv. 41, 13.—*Tanto plures* ablati erant *quam* relictis. Cic. Verr. 2, 5, 28.—3) In anteclassical language the plural neuter of *tantus* is sometimes used as ablative of difference, with the force of a noun (*tribus, quatuor, tantis quam*=by three etc. multiples of), as: (Ager ille) *tribus tantis minus* redit *quam* obseveris. Plaut. Trin. 2, 4, 129.

**Obs. 3.** Both *plus* and *amplius* are used to represent a numerical quantity as **INDEFINITE** in regard to its **EXCESS** over a given **DEFINITE** number, according to the idiom explained § 312 (P. I, p. 219). For this relation the following formulas are used: 1) *Plus (amplius) quam decem milites*.—2) *Plus (amplius) decem milites*.—3) *Plus (amplius) decem militibus*. The same formulas are used with *minus*, in place of *plus*, to represent *less* than a given quantity. The comparatives *plus, amplius, minus* always remain unchanged. In the first

and second formulas the definite numeral with its noun (represented by '*decem milites*') takes any case required by the construction, or even a case introduced by a preposition (*plus quam cum decem militibus*; *amplius decem militum subsidio*). The third formula can be used only when the numeral quantity is required to be in the *nominative* or *accusative*, the ablative (*decem militibus*) being the ordinary comparative ablative according to Obs. 14. Of these three formulas the second one is most frequently used.—**EXAMPLES.** **FIRST FORMULA:** Fieri non poterat ut *plus quam decem medimna* ex jugero exararent. Cic. Verr. 2, 3, 47.—Neque enim *plus quam tres* aut *quatuor* reliqui sunt. Ib. Phil. 2, 38. Rarely, in this formula, the plural *plures* is used in place of *plus* or *amplius*, as: Non *plures quam decem nares* actuarias, nulla quarum *plus quam triginta remis* agitur, habeto. Liv. 38, 38.—**SECOND FORMULA:** Nec enim *plus decem millia* erant. Liv. 42, 8.—*Amplius sunt sex menses*. Cic. R. Com. 3.—*Amplius centum civis* Romanos habebat ex conventu Syracusano. Ib. Verr. 2, 5, 59.—*Duas amplius horas* certamen sustinere. Liv. 36, 38.—Num hoc est non *plus annum* obtinere provinciam? Cic. Att. 6, 6, 3.—Qui ager non *amplius hominum quinque millia* potest sustinere. Ib. 2, 16, 1.—*Minus quindecim annorum* morem solverimus? Liv. 8, 4.—*Minus quatuor millium* (passuum) inde in proxima Eubœe est mari trajectus (the crossing is less than 4000 paces broad; according to p. 115, R. 102, No. 4). Ib. 35, 41.—*Tribunum plebis plus viginti vulceribus* accipis jacentem moribundumque vidisti. Cic. Sest. 39.—Nisi matre Lætilius cum litteris venisset, *minus triginta diebus* Metellus totam prædium tuam rescidisset. Ib. Verr. 2, 3, 57. This formula is used when the numeral is an *adverb*, as: *Plus milites* jam auxilii. Ter. Eun. 3, 1, 32.—**THIRD FORMULA:** *Plus uno* verum esse non potest. Cic. Or. 2, 7.—*Cæcilium initio non amplius duobus militibus* militum habuit. Sall. Cat. 60.—Roscius Romanum multis annis non venit, neque unquam *plus triduo* fuit. Cic. R. A. 27.—Ostendam *minus triduo* mecum in iugum neminem dedisse decumæ. Ib. Verr. 2, 3, 48.—In place of these three formulas the preposition *super* with an accusative may be used: *Super quinque milia* capta, *plus* quatuor milia; *super* five thousand. Liv. 36, 19.—The second formula is sometimes applied to temporal adjectives: Hoc desiderium nostrum ne *plus sit annum* (=ne duret plus quam unum annum). Cic. Att. 5, 1, 1.—The third formula (with a comparative ablative) must not be confounded with constructions in which an *ablative of difference* is used, both constructions having the same form, and being only distinguished by the connection, as: *Unde plures* tribus legem antiquarunt: The tribes repeated the law by a majority of one; literally: The majority (plures) of the tribes, by a difference of one tribe, repeated the law. Liv. 5, 30.—*Ut uno minus testis* haberet: That he might have one witness less (against himself). Cic. Verr. 2, 1, 57.—Velim, hercle, ut *uno nummo plus* petas; Indeed, I wish you would demand only *one sesterce more* (i. e. than you are entitled to). Plaut. Most. 3, 1, 119.

**Obs. 4.** The same formulas are used when the existence of an excess, or of a lesser number is *denied*, as: Cæduntur Hispani, *ne plus quam* quatuor millia hominum effugerint. Liv. 39, 31.—Zenxis et Polygnôtus non sunt *usque plus quam quatuor coloribus*. Cic. Brut. 18.—Nonnulli variationem in *non plus quam in tribus partibus* posse distribui putaverunt. Ib. Liv. 1, 34.—Uterque *non plus quam semel* eloquatur. Ib. Off. 3, 5.—*Ne enim plus decem milia* hominum erant. Liv. 42, 8.—Spatium est *non amplius pedum sexcentorum*. Cæs. B. G. 1, 38.—Inter eos satis constabat *non minus ducentos* Carthaginiensium equites fuisse. Liv. 29, 34.—Inter novissimum hostium agmen et nostrum primum *non amplius quinque* aut *sexis millibus* passuum intererat. Cæs. B. G. 1, 15.—Frequently the expressions '*non amplius*', '*non minus*' are parenthetically inserted in the sentence, leaving the numeral quantity in the same construction as it would be without these additions, as: Duo, *haud amplius, millia* peditum cum Magone effugerunt. Liv. 28, 21.—Quum consul per saltus iret. *Tantum decem, haud amplius, milia* ad ipsas angustias viam circumsederunt. Ib. 28, 40.—Quum *centum et quinquaginta, non minus*, adessent, id votum susceptum est. Ib. 42, 28.—Quum in senatu *centum, non minus*, essent. Ib. 39, 18.—If the clause in which it is combination is used, it is **IMPERATIVE**. '*ne minus*', '*ne plus*' is thus inserted, as: Decrevit, senatores *triginta, ne minus*, adessent (the readings '*triginta, non minus*', '*ne minus triginta*', and '*ne triginta minus*' are partly unnecessary or faulty conjectures, partly resting on inferior authority). Cic. Verr. 2, 2, 67. Compare: Locum constituit, quo duo, *ne plus*, necessarij capivæ cum auro ventrent. Liv. 38, 24.

**Obs. 5.** The second formula (*plus* or *minus* without *quam*; but not '*amplius*') is sometimes used to express indefinite excesses over quantities (intensities) not numeral, as: Accede ad ignem hunc; jam calesces *plus satis* (you will be more than sufficiently warm). Ter. Eun. 1, 2, 5.—Frequently the first formula (with an indeclinable *plus* and *quam*) is added to *adjectives* or *nouns* expressing **QUALITIES**, to represent them as being of greater intensity than the one contained in the term used, as: Opibus, quæ *plus quam modica* erant (resources more than ordinary). Liv. 21, 2.—Perfidia *plus quam Punica* (a faithlessness worse than Punic) Ib. 21, 4.—Id haud magnum quidem oppidum est, sed *plus quam mediterraneum*, celebre, et frequens emporium. Ib. 38, 18.—Etiam Pontidius mul-

tas privatas causas activavit, nec hebes (fuit) in causis, vel dicam *plus* etiam *quam non hebes*. Cic. Brut. 70. Dixit, prima proelia Gallorum *plus quam virorum*, postrema *minus quam feminarum* esse (battles of beings more than men, less than women). Liv. 10, 28. —Conferor eos, nisi liberatores populi Romani conservatoresque reipublice sint, *plus quam sicarios, plus quam homicidas, plus etiam quam parricidas* esse (worse than assassins etc.) Cic. Phil. 2, 13.

Obs. 6. In the comparison of UNLIKE INTENSITY, *plus* and *minus* (also *amplius* in certain connections), with *quam*, are used as ABSOLUTE ADJECTIVES, either without any adjunct, if referring to the general idea of intensity (*plus* = a greater amount), or with *partitive genitives in the singular*, expressing the English attributive 'more' or 'less' in connection with a noun denoting a material or a quality (more silver, more courage etc.), as: *Plus quam* erat ei concessum legibus imperavit; he commanded more (i. e. he made larger requisitions) than was allowed by the laws. Cic. Verr. 2, 3, 97. —Ego habeo cui *plus quam* tibi debeam, neminem. Ib. Fam. 6, 1, 7. —*Plus quam* acceperas reddidi-ti. Ib. 3, 13, 1. —*Plus* tibi virtus tua dedit *quam* fortuna abstulit. Ib. 5, 18, 1. —Si mihi tecum *minus* esset *quam* est cum tuis omnibus. Ib. 15, 10, 2. —*Plus* acquisi-ti dignitatis *quam* amisisti rei familiaris. Ib. 6, 11, 2. —Caecina in hac re *plus* mihi animi *quam* consilii videtur habuisse. Ib. Cae. 8, 22. —Si est enim aliquid, *plus* est boni *quam* putaram. Ib. Att. 2, 7, 4. —Nec *minus* operis laborisque ex oppugnatione *quam* Heracleae habuit. Liv. 36, 50. —So with comparative ablatives in place of a *quam*-clause (Obs. 14): Non verendum est ne *plus aequo* in amicitiam congeratur. Cic. Am. 16. —'More money', 'less money' are expressed by *major* (*minor*), *pecunia* (not by *plus* or *minus* *pecuniae*): *Majore pecunia*, quatuor columnas dealbandas *quam* ille omnis aedificandas locavit. Cic. Verr. 2, 1, 59. —Accipite aliam in *minore pecunia* non minus impudentem calumniam (a calumny referring to a smaller sum of money). Ib. 2, 2, 9. —*Plus* and *minus*, in this construction, can be only used in the *nominative*, *accusative*, and in the *genitive* of price and value (according to p. 266 foll.): *Plus* vendidi decumas *quam* ceteri. Cic. Verr. 2, 3, 16. —Una nostra congressio *pluris* erit (will be worth more) *quam* non modo hostes, sed etiam fratres nostri, Adui. Ib. Fam. 7, 10, 4. —Sometimes, instead of *plus*, the diminutive form *pusculum* occurs: Amori nostro *pusculum* (a trifle more) *quam* concedit veritas, largiāre. Cic. Fam. 5, 12, 3. —*Amplius*, as an absolute adjective, if used as an equivalent of 'more', implies the idea of 'addition': Ego, hoc onere suscepto, et recepta causa Siciliensi, amplexus animo sum aliquanto *amplius* (i. e. *quam* in hac causa continetur; 'a great deal in addition'); suscepi enim causam totius ordinis, suscepī causam reipublicae. Cic. Verr. 2, 2, 1. —Treviri, si Caesar *amplius* obsidum (i. e. *quam* antea dederant; in addition to those given before) velit, dare pollicentur. Cae. B. G. 6, 9. —Frequently *amplius* is thus used with a negation or in interrogative propositions, in which instance it often corresponds to the English 'else', (which word is to be rendered by 'alius' only if it means 'difference'); as: *Butirus non sum amplius* (i. e. *quam* dedi); Iam not going to give anything more (else). Cic. Verr. 2, 2, 29. —*Nihil amplius* opus est (i. e. *quam* facium est); nothing else is necessary. Ib. Qu. Fr. 1, 3, 7. —Quid tibi mea ars efficere hoc posset *amplius*? Ter. And. 2, 1, 4. —Quid vultis *amplius*? Cic. Mil. 13. —*Nihil* dico *amplius*. Ib. Arch. 4. —Frequently *amplius* is thus used adverbially as a *participle*, with the force of *praeterea* (= in addition), as: Caesar (postulabat), ne quos *amplius* Rhenum transire pateretur; that he should not suffer any more bodies of Germans (= in addition to those already in Gaul) to cross the Rhine. Cae. B. G. 1, 43.

Obs. 7. If 'more' and 'less' denote the adverbial idea of intensity (more = 'in a greater degree'), they are expressed by the comparative form-adverb *magis*, or by the neuter adjectives *plus* and *minus*, as adverbial accusatives of intensity (p. 263, Obs. 1). The adverb 'less' is always expressed by 'minus'. The adverb 'more' is generally expressed by 'magis' (unless it is merged in the inflectional comparative of descriptive adjectives), *plus* being only used in certain instances (No. C). The adverbial idea of 'greater intensity' occurs in the following relations:

A. In connection with a DESCRIPTIVE ADJECTIVE. If 'more' qualifies a descriptive adjective or adverb which forms no inflectional degrees (P. I, p. 204, § 292 foll.), or if, from any reason (p. 759, Obs. 10) an inflectional comparative is not used, 'more' must be expressed by *magis*, never by *plus*, as: Nactus sum *magis* idoneum tempus *quam* umquam antea. Cic. Fam. 1, 2, 3. —Intelligo, nullum fuisse tempus quod *magis* debuerit multum esse a litteris (i. e. *quam* hoc). Ib. Att. 8, 14, 1. —Nullum officium referendā gratiā *magis* necessarium est. Ib. Off. 1, 15. —Facie *magis* *quam* faciliis ridiculus. Ib. Fam. 1, 13, 2. —Tempora haec non animum meum *magis* sollicitum habent *quam* tuum. Ib. 2, 16, 1. —Possumus rem *magis* iudicare? (i. e. *quam* hoc deesse non ad rem, *magis* rem condempnatum (i. e. *quam* hunc) in iudicium inducere? Ib. Verr. 2, 2, 71. —Thus *magis* must always be used if a higher degree is ascribed to prepositional expressions which have the force of a descriptive adjective or adverb, as: Multo *magis* est secundum naturam (= naturae conveniens) excelsitas animi *quam* voluptas. Cic. Off. 3, 5. —Quod ita te

peto ut *magis* ex animo (as if = 'magis optanter') petere non possim. Ib. Fam. 11, 22, 2. —Hominem hominis incommodo suum commodum augere, *magis* est contra naturam (= naturae contrarium) *quam* mors. Ib. Off. 3, 5. —Thus sometimes substantives inclose the idea of intensity to which a higher degree is attributed. Such substantives, as if they were adjectives, are connected with *magis*, not with *plus*; Nihil virtuti addi potest quo *magis* virtus sit (i. e. *quam* est); nothing by which virtue may be 'more virtuous' (different from 'plus *quam* virtus' according to Obs. 5). Cic. Par. 3, 1. —Nisi forte *magis* sit parricida qui consularem patrem *quam* si quis humilem necaverit (unless he is more of a murderer who etc.). Ib. Mil. 7. —*Magis* aedilis fieri non potuisset (he could not have become 'more' of an aedile than he became). Ib. Planc. 24. —In the following passage a clause of manner takes the place of a descriptive adverb, being qualified by *magis*: Ad Ciceronem ita scripsisti ut neque severius, neque temperantius scribi potuerit, nec *magis* *quemadmodum* ego maxime vellem; (= nec *magis* ex animo meo). Cic. Att. 13, 1, 1. [The Cod. Med. and the other Codd., being copies of it, have 'magis *quam* *quemadmodum*,' which stands in all the recent editions. But 'quam' is evidently faulty. The clause 'quemadmodum...vellem' stands in exactly the same relation as the preceding adverbs 'severius neque temperantius,' and does no more admit a 'quam' before it, than 'severius' and 'temperantius' would do, if *magis* were chosen instead of inflectional comparatives. *Quam* is evidently a gloss added by a copyist who did not understand the construction].

B. If the adverbial idea of intensity refers to a verb, so that two different degrees in the intensity of the action expressed by the verb are compared, *magis* is regularly used. Verbs of this kind are *vereri*, *optare*, *desiderare*, *admirari*, *reprehendere*, *offendere*, *laudare*, *letari*, *queri*, *solicitare*, *excruciare*, *incidere*, *indigere*, *arcere*, *delectare*, *vigere*, *florere*, *excellere*, *enitere*, *confirmare*, *minuere*, *pueri*, *libet*, *placet*, and every verb expressing an action which admits of 'increase'; as: *Magis* *vigebat* Antonio; he was more vigorous than Antonius. Cic. Brut. 64. —Adolescens *magis* floruit dicendo *quam* senior Hortensius. Ib. 95. —*Magis* offendit nimium *quam* parum. Ib. Orat. 22, 73. —Alius in alia parte excellit *magis*; (Cassius *magis* excellit oratio (i. e. *quam* Antonii). Ib. Brut. 99. —*Magis* tuum officium *desidero* *quam* a te requiri putavi meum. Ib. Fam. 7, 26, 1. —Hoc affirmo, mortem nemini *magis* optandum fuisse (i. e. *quam* mihi). Ib. Att. 3, 7, 2. —Eum multo *magis* (i. e. *quam* statuae) figura et lineamenta hospitis delectabant. Ib. Verr. 2, 2, 36. —*Magis* libet vendere *quam* perdere. Plant. Pers. 4, 4, 108. —Quae vis est quae *magis* arceat homines ab improbitate omni *quam* si senserint etc. Cic. Par. 3, 2. —Id quod multo *magis* est admirandum (i. e. *quam* res ipsa). Ib. Cat. 1, 3. —Quos multo *magis* veror *quam* eorum hominum, qui vivunt, rumusclos. Ib. Att. 2, 5, 1. —Nihil est quod *magis* nobis timendum putem *quam* ne etc. Ib. 2, 14, 1. —De Felicis testamento tum multo *magis* querere, si scias. Ib. Qu. Fr. 2, 9, 8. —Nec me mea miseria *magis* excruciant *quam* tuae. Ib. Fam. 14, 3, 1. —Nos *magis* *quam*, quum florebamus, re familiari comminuti sumus. Ib. Att. 4, 4, 6. —Mihi, ut est, *magis* placebat. Ib. Qu. Fr. 3, 1, 1. —Nihil me *magis* sollicitabat *quam* in his molestiis non me ridere tecum. Ib. Fam. 2, 12, 1. —Credas mihi velim, *magis* me iudicio hoc, *quam* morte inimici letatum. —Ib. 7, 2, 2. —*Magis* indiget vita qui vivit, *quam* qui natus non est. Sen. Ben. 3, 35. —In quo *magis* reprehendendus sum quod 'Pirraea' scripserim, *quam* quod 'in' addiderim. Cic. Att. 7, 3, 10. —Nisi forte ipse eloquentiae *magis* *quam* quod me audiret, invideres. Ib. Fam. 7, 33, 1. —Unde quum diu abfuisi, *magis* a me abesse videbare, *quam* si domo esses. Ib. Att. 6, 5. —Nunc iudicium meum multo *magis* confirmo testimonio tuo (i. e. *quam* antea). Ib. Brut. 42. —*Magis* esset prudendum si in sententiā permaneres. Ib. Tusc. 2, 5, 14. —Nihil *magis* cavendum est senectuti *quam* ne languori se dedit. Ib. Off. 1, 34.

C. A higher adverbial degree in the instance mentioned No. B. is in the following instances expressed by *plus*, as adverbial accusative of intensity: 1) If the governing verb belongs to those neuter verbs which may be construed with the accusative of indefinite form-adjectives, as *posse*, *valere*, *pollere*, *prodesse*, *nocere*, *sapere*. The Latin says 'nihil', or 'aliquid' *posse* (= to be powerless, to be powerful); *nihil* *valere*, to be of no value; *nihil* (*aliquid*) *prodesse*, to be of no (some) advantage; *nihil* (*aliquid*) *nocere*, to be harmless, to do no injury; *nihil* *sapere*, to be an 'ignoramus'; none of these verbs admitting a transitive accusative expressed by substantives. The intensity of such verbs, in the positive, is designated by accusatives of 'intensity' (*multum*, *tantum*), and hardly ever by adverbs of intensity (*adeo*, *tam*, *valde*, *admodum* etc.). The same verbs require *plus* to designate a higher degree of their intensity, and cannot be construed with *magis*; as: Intelligi potest, majores nostros non modo armis *plus* *quam* ceteras nationes, verum etiam consilio sapientiaque *potuisse*. Cic. R. A. 25. —Qui privatum *plus* possent *quam* ipsi magistratus. Cae. B. G. 1, 17. —So *plus* *posse* occurs Cic. Att. 6, 1, 3; Fam. 5, 21, 2, and often (never *magis* *posse*). —Fortuna *plus* consiliis humanis *pollet*. Liv. 44, 40. —*Plus* apud me vera ratio *valeret* *quam* vulgi opinio. Cic. Par. 1, 1. —*Plus* in amicitia valet similitudo morum *quam* affinitas. Nep. Att. 5. —Utilitas *plus* *valuit* (had a greater weight) *quam* ho-

elephanti desiderābam. Ib. Sen. 19, 27.—Hæ res non sunt iræ, non magis quam tristitia est quæ ad conspectum mimici naufragii contrahit frontem. Sen. Ira, 2, 2.—Non nascitur ex malo bonum, non magis quam fœcus ex oleâ. Ib. Ep. 87.

B. When the comparative clause contains a fact represented as holding good, the two propositions being represented as being equally true, 'non magis' has the force of 'as much', but the construction is not equivalent to 'tam...quam', 'tantum...quam', 'æque...ac', representing rather the fact of the clause after 'quam' as being 'no less' true than that of the principal sentence, and sometimes implying that the fact in the comparative clause may hold good in a higher degree than that of the principal sentence. Hence this construction is equivalent to 'non minus quam', if the relations of the clause and of the principal sentence are reversed ('non magis ego quam tu' being the same as 'non minus tu quam ego'). This reversal is always preferable in rendering such sentences into English; else the meaning of the author will not be adequately expressed. In this construction 'non plus quam' (or the adjective construction 'non plures quam') is only used if plus would be admissible without a negation (Obs. 7, C).—Si non plus ingenio valēbas quam ego, certe timēbas minus: If (although) I was not less strong in mind than you, you certainly feared less (literally: If you were not more strong in mind than I, etc.). Cic. Att. 3, 15, 7. But: Jus bonumque apud eos (i. e. præcos Romānos) non legibus magis quam naturā valēbat; Right was maintained no less by its own nature than by the laws. Sall. Cat. 9. Here, according to Obs. 7, E, the use of plus is excluded.—Nec me magis meæ miseriæ excruciant quam tuæ; Your distress torments me no less than my own (as much as my own). Cic. Fam. 14, 3, 1.—Quid enim in meis superioribus litteris fuit præter querēlam temporum? quæ non meum animū magis sollicitum habent quam tuum; which engage your mind no less than mine (as much as mine). Ib. 2, 16, 1.—Non magis te, quam de te iudicium meum reprehendo; I censure my judgment on you no less than I censure you. Ib. 10, 26, 2.—Neque enim ipsorum conviviorum delectationem voluptatibus corporis magis quam cœtu amicorum et sermonibus metiēbar. Ib. Sen. 13, 45. This construction occurs also with reference to numerical relations (non plures quam), as: Itaque non aquā, non igni pluribus locis utimur quam amicitia; We do not use friendship less often (on fewer occasions) than water and fire. Cic. Am. 6, 22.—Compare for such constructions with non magis quam: Cic. Verr. 2, 4, 3; Liv. 1, 23, 9, 22; 2, 5; 22, 27; 39, 52; 45, 10.\* This construction is also applied to predicates consisting of a predicate-adjective with the copula, in which instance the comparative magis generally coalesces with the adjective in the form of the inflectional comparative degree, as: Cincinnātus non in plebe coercenda quam senātu castigandō vehementior fuit; he was not less vehement in reproaching the senate, than in coercing the plebs. Liv. 3, 19.—Sometimes the comparative clause is neither asserted as holding good, nor as holding not good, as: Hæc quidem ratio non magis contra Regulī quam contra omne iusjurandum valet; This reason prevails no more against Regulus's oath, than against any other oath. Cic. Off. 3, 29 (i. e.: If it holds good against Regulus's oath, it holds good against every other oath; if not, not).

Obs. 9. 'Potius quam' corresponds to 'rather than', and is used to correct the fact expressed in the clause, representing it as not holding good, and hence a comparison by 'potius quam' is similar to a negative coordination by 'non...sed', as: Hoc re potius declarābo quam oratione; I will declare this rather by facts than by words (almost the same as: 'hoc non oratione, sed re declarābo'). Cic. Fam. 6, 13, 4. But the comparative form by 'potius quam' represents the two actions as optional alternatives (I might declare it by words, but I do not), and hence is especially applied to correct false anticipations or views which the reader, or hearer, or the person spoken of, might entertain about the reality of some action; as: Auxit potius timōrem quam minuit. Liv. 45, 10.—Miseriæ nostræ potius velim quam inconstantie tribuas quod a Vibōne subito discessimus. Cic. Att. 3, 4.—Velim hanc inānem meam diligentiam miserabilem potius quam ineptam putes. Ib. 3, 23, 1.—Potius vitā quam patriā carēbo. Ib. 3, 26.—Ne causā potius apud te valuisse videar quam gratiā. Ib. Fam. 13, 5, 4.—Optemur potius ut eat in exilium quam querāmur. Ib. Cat. 2, 7.—Nocti se potius ac solitudini quam ulli aut urbi aut hospiti committēbat. Ib. Clu. 68.—Memini quum mihi desipere videbāre quod cum istis potius viveres quam nobiscum. Ib. Fam. 7, 23, 1.—Magis quam (as in most of the passages quoted Obs. 7, D and E) is often used with a force similar to 'potius quam';

\*) By not reversing the two comparative clauses in constructions of this kind, passages have often been misinterpreted. So the much-discussed passage Cic. Tusc. 1, 17, 41, where we must evidently read 'non nomināta magis quam intellecta' (as some of the Codd. have it) in place of the vulgata 'quam non intellecta'. The vulgata will not make the sense required by the connection, whether we reverse the terms, or whether we read them in the Latin order. But by reading 'quam intellecta', if we understand the passage negatively according to No. A, the sense will be clear at once (=The fifth element, which is as little comprehended as it has a name).

but a clause dependent on magis, if used in this sense, denotes rather a small degree than an absolute denial, although a degree exceedingly small is virtually a denial. Thus it sometimes occurs in the same period with potius, merely to change the expression, as: Ne id quod petat, exigere magis quam rogāre, et in mercēdis potius quam beneficii loco numerāre videatur. Cic. Fam. 2, 6, 1. Similarly: Primum enim iudicio malo (=magis volo) quam gladio (letāri), deinde gloriā potius (letāri volo) quam calamitatē. Ib. 7, 2, 2.—Potius, in connection with a disjunctive conjunction, serves to correct a single expression of the sentence; generally vel potius being thus used, but also seu potius, or aut potius; as: quotidie, vel potius in dies singulos, breviores litteras ad te mitto. Cic. Att. 5, 7, 1.—Scripsissem, te frustra in senātum, sive potius in conventum senātorum, esse ventūrum, ni etc. Ib. Fam. 4, 1, 1.—Conspexit, aut potius complexum mihi tuum, defuisse. Ib. Att. 4, 1, 2. Sometimes the adverbial comparative citius or prius is used with the force of potius, as: Vitam sibi eripi citius quam gloriam rerum gestarum posse vociterabatur; He exclaimed that his life could be rather (literally 'more quickly') taken from him than the glory of his deeds. Liv. 8, 32.—Ægyptii quamvis carnificinam prius subierint quam ibi aut aspidem violent. Cic. Tusc. 5, 27.—Magnētes in corpora sua citius sævitāros quam ut Romanam amicitiam violarent. Liv. 35, 31.

Obs. 10. If a comparison refers to the intensity of a descriptive adjective or adverb, the comparative adverb 'magis' is generally merged in the inflectional comparative degree of the adjective or adverb. Hence every inflectional comparative of a descriptive adjective or adverb contains the syndetic antecedent magis of the Quam-clause by implication, as: Luna est major quam dimidia pars terræ. Cic. N. D. 2, 40.—Exercitus multo modestiā post victoriam, quam ipsā victoriā, laudabilior. Liv. 36, 21.—Quædam abscinduntur facilius animo quam temperantur. Sen. Ep. 108.—Majus accēpit beneficium quam dedit. Ib. Ben. 3, 25.

If the degrees in the intensity of two different descriptive adjectives (predicative or attributive) or adverbs are compared with each other, the Latin language places either both adjectives (or adverbs) in the comparative degree, or both in the positive degree. In the latter instance the comparison is made by the adverb magis (sometimes by potius, or melius). The former method is more usual in Livy and the historians, as: Longior quam latior acies erat; LITERALLY: The battle-line was longer than deeper (i. e. The length of the battle line exceeded its width; or 'The battle-line was long, but it had little depth) Liv. 27, 48.—Triumphus ob eam rem clarior quam gratior fuit; The triumph, therefore, was rather (more) brilliant than popular. Ib. 5, 23.—Asia diutius quam fortiores exercitus faciēbat; Asia made our armies rather rich than brave. Ib. 39, 1. Sometimes magis or potius is redundantly added to such comparisons: Celeriora quam tutiora consilia magis placere ducibus. Ib. 9, 32.—The second method is more usual in Cicero. Mihi autem impudens magis quam stultus videtur. Cic. Att. 5, 21, 12.—Sed exstitit tempus optatum mihi magis quam speratum. Ib. Fam. 5, 8, 2.—Artem juris civilis habebitis, magis magnam atque uberem, quam difficilem et obscuram. Ib. Or. 1, 42.—Octavius ad dicendum veniebat magis audaciter quam parate. Ib. Brut. 68.—Vir ingenii magni magis quam boni. Sen. Ira, 1, 16.—Quid valet igitur illa L. Crassi composita magis quam sapiens oratio? Cic. Par. 5, 3.—Est non gloriōsa magis quam dives victoria vestra. Liv. 37, 54.—Consul respondit, magis sæpe quam vere nunquam Ætōlos pacem petere. Ib. 38, 8.—Quod subtiliter magis quam dilucide dicitur. Cic. Tusc. 1, 17. So with melius: Quam causam Pompējus, animatus melius quam paratus suscepit. Cic. Fam. 6, 6, 10. Cicero, however, sometimes made use of the method by two comparatives: Non timeo, ne libentius hæc in Clodium evomere videar quam verius. Cic. Mil. 29.—In the writers of the silver Latinity sometimes an inflectional comparative is used in the first part of the comparison with a positive in the Quam-clause; and sometimes two positives are connected by quam without magis; Ingenium Agricolæ speciem magnæ gloriæ vehementius quam caule appetēbat. Tac. Agr. 1.—Fine anni excessit Asinius Agrippa, claris majoribus quam vetustis. Ib. Ann. 4, 61.

Obs. 11. The 'compared members' in a comparative period may be single members of the two propositions, as in most of the passages quoted above, or whole clauses.

A. RELATIVE CLAUSES. A comparison of relative clauses occurs in the following instances: 1. If two relative clauses are compared with each other, as: Scito multo plures esse qui de tributo rescent, quam qui exigi velint. Cic. Fam. 3, 7, 3.—2. The syndetic antecedent of a relative clause may be compared with its grammatical antecedent in the principal sentence. In this instance the syndetic antecedent is omitted, the relative clause being immediately preceded by quam, as: Navis facit humiliōres quam quibus in nostro mari uti consuevimus. Cæs. B. G. 5, 1 (= quam ex fuerunt quibus etc.).—Exercitū haud minore quam quem prius habuerat, ire ad hostis pergit (= quam is fuit quem prius habuerat; with an army not smaller than that which he had etc.) Liv. 30, 11.—3. In a comparative period with the adjectives plures, plus, minus, or a descriptive adjective in the comparative degree, the second term of the comparison often takes the

form of a *relative clause* introduced by a *quantitative* or a *numeral* relative adjective (*quantus, quot*) after the conjunction *quam*, if the *Quam*-clause has a *predicate different* from that of the principal sentence, and if the compared quantitative or numeral ideas occur in each of the two (completed) propositions as *ATTRIBUTIVE, ABSOLUTE, or PREDICATIVE ADJECTIVES*, as: *Quod eis plus frumenti imperabatur, quam quantum exarant;* Because they were charged with *more corn than they had harvested*. Cic. Verr. 2, 3, 29. In this sentence the predicates of the propositions are different, the comparative clause being completed in the following form, 'They had harvested less corn'. Here the compared quantitative ideas occur in both propositions as *absolute* and respectively *attributive* adjectives; hence *quantum* (i. e. *frumenti*) is added after *quam*, agreeing with *frumenti* in gender and number, according to the rules for relative clauses, but taking the case required by the construction of the clause. In English such relatives cannot be expressed.—Hannibal *plures* et duces et milites Romanorum occidit, *quam quot* supersunt. Liv. 35, 13 (= *Pauciores duces supersunt*; hence the *numeral* adjective *quot* takes the place of *pauciores*).—Dux *plures*, *quam quot satis erant* in usum, ignes accendit. Liv. 36, 10 (= *pauciores ignes satis erant*).—So when *tantum* with a multiple is the syntetic antecedent: *Intelligitur, sexies tantum* (i. e. *frumenti*) *quam quantum* satum sit, ablatum esse ab aratoribus. Cic. Verr. 2, 3, 43.—De pecuniâ finitur, *ne major* (equivalent to the unusual '*plus pecuniæ*') *causâ ludorum consumeretur, quam quanta* Fulvio Nobiliori decreta esset. Liv. 40, 44.—Implebat homines *certioris spei, quam quantum* fides promissi humani exhibere solet. Liv. 26, 19 (= *fides minus spei* subicere solet).—Cn. Lentulus multo *majorem opinionem* dicendi actione faciebat, *quam quanta* in eo facultas erat. Cic. Brut. 66, 234 (= *opinionem dicendi majorem fecit; facultas dicendi minor fuit*; the quantitative adjective being attributive, *quantus*, taking its place, must agree with the governing noun *facultas*). These quantitative relatives, however, may be left out if the relative is in the nominative or accusative, or in the same case as the comparative in the principal sentence, as: *Patiemini, iudices, ab aratoribus plus* aliquanto (*frumenti*) *ablatum esse, quam natum sit?* (or *quam quantum natum sit*). Cic. Verr. 2, 3, 43.—Quo *majore*, etiam apud vos odio esse debet, *quoniam* (inst. of *quam quanto*) est apud populum Romanum. Ib. 1, 14. Thus in the following passage both forms are used along with each other: *Quantum* Apronius edidisset deberi, *tantum* (frumenti) ex edicto dandum erat. Etiamne si *plus* edidisset *quam quantum* natum erat? Etiam: Quid, si *minus* dedisset, *quam* poposcisset Apronius? Ib. Verr. 2, 3, 29.—So in most of the passages with different predicates, quoted in Obs. 1 and 6, the relatives are omitted. But such an admission is inadmissible if the construction requires the adjective to be placed in the genitive, dative, or ablative, as: *Cogis eos plus lucri addere, quam quanti* venierant (decumie). Cic. Verr. 2, 3, 39. [= *Decumie venierant minoris pretii*, the common terms in the two propositions being the idea of the very amount the intensities of which are compared. Since this idea, in the clause, requires to be in the genitive of price, the relative, by which it is represented, cannot be omitted].—*Majorem* sumptum fecerunt, *quam quanti* Catonis lis aestimata est. Ib. Verr. 2, 4, 10.—*Majore* inde animo pacis opera inchoata, *quam quantum* mole gesserat bella. Liv. 1, 38.—4. Sometimes the same form of a relative quantitative clause after *quam*, is used to denote a 'CONCESSIVE IDEA', so that the degree is represented as greater or less than it should be inferred from the fact stated in the clause (= more, greater than 'according to'), as: *Prædam inde majorem* revexit, *quam quanta* belli fama erat; a booty greater than, according to the reports on the war, it should have been expected. Liv. 1, 35. Generally, however, this relation is more briefly expressed by *quam pro* with an ablative; and this form is applied to all the quantitative comparisons, in which the degree is represented as being *not in a direct proportion* to the fact contained in the clause; as: *Achæi multo majorem, quam pro numero copiarum*, hostibus terrorem intulerunt. Liv. 37, 20.—*Quidquid dixerò, minus, quam pro atrocitate* et magnitudine rei, dictum scitote esse. Ib. 39, 15.—*Pluribus* ignibus, *quam pro numero manentium*, in speciem lactis. Ib. 21, 32.—*Omnium non tanta pro Aetoliæ curi erat, ferocioribus quam pro ingenio Græcorum gentis*. Ib. 27, 30.—*Castra metatus est latius quam pro copiis*. Ib. 36, 10.

B. INFINITIVE CLAUSES.—If the compared member of a *Quam*-clause is a *That*-clause, its form must be determined according to the manner in which the *Quam* clause is to be completed, as: *Ut mori mallet* (= *magis vellet*) *quam de his rebus Sullam doceri*. Cic. R. A. 9, 26 (= *minus veluit, Sullam de his rebus doceri*, which shows that the *That*-clause is an *Object*-clause dependent on *velle*, and hence to be expressed in the form of an *Infinitive*-clause according to p. 562, 3, A).—*Neque salus ulla reipublice, major hoc tempore* reperiri potest, *quam populum Romanum intelligere, neque tanta perniciës ulla potest accidere, quam rationem veritatis ab hoc ordine abjudicari*. Ib. Verr. 2, 1, 2. The completed *Quam*-clauses are: *Major salus est populum Romanum intelligere; and Major perniciës est rationem abjudicari*. Hence a *Subject infinitive*-clause is required (p. 613, Obs. 8; p. 609, Obs. 3). So, when the clause takes the form of a *subject-infinitive*: *Quæ causa fuit honestior, quam a provinciâ defensorem constitui* (= *me defensorem constitui*)? Cic. Verr. 2, 1, 5.

C. UT-CLAUSES.—*That*-clauses take the form of *Ut*-clauses of any description if the completed comparative clause will require this form according to the general rules, as: *Nihil jam majus precatus deos quam ut incolumi abire liceat*. Liv. 26, 41.—*Constitui, nihil mihi optatius cadere quam ut tu me quam primum consequare*. Cic. Att. 3, 1, 1. (= *opto ut etc.*).—*Magis vereor, ne parum gloriæ, quam ne nimium belli sit*. Liv. 38, 17.—Idiomatical is the use of a *FINAL UT-CLAUSE* to represent the consequence of a *degree less* than that of the principal action, denoting at the same time that the *higher degree*, as stated in the principal sentence, does *not* produce this consequence. In English we use, instead of the Latin comparative, a *positive* with '*too*', and instead of the Latin *Ut*-clause of purpose, an *object-infinitive* with '*to*', as: *Clarius res erat quam ut tegi ac dissimulari posset*; 'The matter was *too clear to be covered up* and dissembled (literally 'The matter was *clearer than that it could be covered up*). Liv. 26, 51. Here the second term of the comparison must be completed by '*quam ea res esse debuit ut tegi posset*', = 'The matter was *clearer than it ought to have been in order to be covered up*.'—So: *Quod præceptum, quia majus erat quam ut ab homine videretur, iccirco assignatum est deo*; This precept, because it was *too sublime* to come from man, was assigned to a god. Cic. Fin. 5, 16.—*Quis non intelligit, Canachi signa rigidiora esse, quam ut imitentur veritatem?* Ib. Brut. 18.—*Potentius jam id malum apparuit quam ut minores per magistratus sedaretur*. Liv. 25, 1.—*Pater de se magis timebit quam ut filii necem ulciscatur*. Ib. 40, 11.—Frequently (but not in Cicero) final *Ut*-clauses of this kind (the same as ordinary final clauses, according to p. 557, Obs. 5, foll.) take the form of relative clauses, the relative agreeing with its antecedent which, in constructions of this kind, is almost always contained in the principal sentence, as: *Visa legato major acies quam quæ ab suo presidio sustineri possit*; The legate considered the army *too strong to be resisted* by his force. Liv. 10, 4.—*Famæ et fidei damna majora esse quam quæ aestimari possent*. Ib. 3, 72.—*Magis auribus quam animis id acceptum erat, ut majus lætiusque quam quod mente capere aut satis credere possent* (*too glad for them to comprehend*). Ib. 27, 50.—*Ajunt, nos loqui majora quam quæ natura humana sustineat*. Sen. Ep. 104.—Sometimes *Quam*-clauses dependent on *potius* and its equivalents (Obs. 9) take the form of an *Ut*-clause to express more strongly the negative force of the clause (p. 608, Obs. 6), as: *Magis nates in corpora sua citius sævituros, quam ut Romanam amicitiam violarent*. Liv. 35, 31. Clauses of this kind must be completed by means of a *verbum faciendi* (= *quam committerent ut violarent*). Generally, however, in constructions of this kind, the *Quam*-clause takes a *subjunctive without ut*. See Obs. 12.

D. TEMPORAL CLAUSES may be connected with *Quam*-clauses, to compare the time of the principal action with the time of another action mentioned in the clause, in which instance the principal sentence generally contains a temporal adverb to which the time of the temporal clause is opposed; as: *Vos nunc graviore catenâ victi estis quam quum* (= *quam tum quum*) presidium Macedonum in arce habuistis. Liv. 35, 38.—*Erregie Aristoteles ait, nunquam nos reverendiores esse debere, quam quum de deis agitur*. Sen. Q. N. 7, 30. Generally such *Quam*-clauses have their predicates in the *indicative*; but sometimes the *subjunctive* occurs. The same form is also used in comparisons of equality, as: *Iuxta eam rem ægre passi sunt patres quam quum consulatum vulgari viderent*. Liv. 10, 6.—Temporal clauses are also used after *quum* when referring to *indefinite* time, having always their predicate in the *indicative*, as: *Omnium societatum nulla prestantior est, quam quum viri boni, moribus similes, sunt familiaritate conjuncti*. Cic. Off. 1, 17.

E. CAUSAL CLAUSES after *quam* represent a fact either as being in a less degree or not at all the cause of some action, the real cause being stated in the principal sentence, which is generally connected with *magis*; as: *Impetrata pax magis ut fessa tam diutino bello acquiesceret civitas, quam quod digni peterent*. Liv. 5, 23. Hence this form is an equivalent of the construction with '*non quod, sed*', explained p. 690 foll. From the reasons stated there, the mood of the clause must always be the *SUBJUNCTIVE*. Ex.: *Sed ex aliis rebus magis quam quod cuiquam id compertum foret, hæc fama valēbat*. Sall. Cat. 14.—*Magis ut consuetudinem servem, quam quod vos non vestrâ sponte hoc faciatis, petam a vobis, ut me attente audiatis*. Cic. Clu. 32.—*Antiochus Ephesum est profectus, magis quia terrestribus copiis exercitum Romanum videbat sustineri non posse, quam quod res novæ ipsa per se temptata sibi nunquam feliciter esset*. Liv. 37, 26.—*E seditionis causam videri jubet, magis usurpandi juris, quam quod unus culpa foret*. Tac. H. 4, 25.—*Idcirco de cond. bonibus nequequam de Tarquiniiis in regnum restituendis, magis quia id negare Porsenna nequivit Tarquiniiis, quam quod negatum iis sibi ab Romanis ignoraret*. Liv. 2, 13.—Very frequently, in place of *quod* or *quia* in such clauses, *quo* is used, the same as in the construction '*non quo, sed*' (p. 690, C). as: *Benevolentia magis adductus, quam quo res ira postularet, fui longior*. Cic. Fam. 6, 3, 1.—*Mercatoribus est additus magis eo ut que bello ceperint quibus vendant habeant, quam quo ullam rem ad se importari desiderent*. Cæs. B. G. 4, 2.—*Hæc amore magis impulsus, scribenda ad te putavi, quam quo te arbiträrer monitis et præceptis egere*. Cic. Fam. 10, 3, 4.—*Etsi more*

*magis* hoc scribo, *quam* *quo* te admonendum putem. Ib. 12, 29, 3.—The indicative *must* be used when the comparison is made by *non magis*, according to Obs. 8, No. B, because in this instance the fact of the clause is represented as *real*, as: Decimus cum magno assensu auditus est, *non magis* eo quod multitudinis noxam elevabat, *quam* quod in auctores verteret. Liv. 45, 10. In this instance, *quo* can *not* be substituted for *quod*.

**F.** *SI*-CLAUSES are frequently combined with *quam*, when the *Quam*-clause must be so completed as to contain the *conditional thesis*, the predicate being always supplied from the principal sentence. The combination *quam si* (*than if*) has the same office in the clauses of *quantitative* comparison as the conjunction *quasi* (*as if*), and the equivalent combinations *ac si*, *ut si* etc. have in clauses of *qualitative* comparison; but with the distinction that the latter *always* require the *subjunctive*, being always *non-real*, while *quam si* may be conceived *either* as doubtful, or as *non-real*, according to the nature of the thesis which must be supplied, and hence *may* be followed by an *indicative*; as: *Nihil te mihi gratius facere posse, quam si omnibus tuis opibus Laniam in petitione juveris* (future-perfect). *Cic. Fam.* 11, 17, 2. Here the *Quam*-clause must be completed by '*quam feceris*, *si*' etc.—*Nisi forte magis erit parricida, qui consularem patrem, quam (i. e. erit) si quis humilem necaverit*. *Ib. Mil.* 7.—Generally, however, this form is used when the thesis by which the *Quam*-clause must be completed is *hypothetical*, and, in this instance the moods are generally *hypothetical* (*i. e.* imperfect or pluperfect subjunctive), while the mood with *quasi*, *ac si* etc. generally follows the law of consequence; as: *Peto a te diligentius quam (i. e. peterem) si mea res esset*. *Cic. Fam.* 13, 14, 2.—*Regulus, quum vigilando necabatur erat in meliorem causam quam (i. e. fuisset) si domi consularis remansisset*. *Ib. Off.* 3, 27.—*Plus en oratio momenti ad incitandos ad bellum habuit, quam (i. e. habuisset) si aperte suadendo cupiditatem res gerendi ostendisset*. *Liv.* 35, 25.—*Peloponnesum quoque adire jussi, unde prior legatio discesserat incertiore statu quam (i. e. discessissent) si non venissent*. *Ib.* 39, 33.—*Hunc anulum si habeat sapiens, nihil plus sibi licere putet peccare quam (i. e. liceret) si non habere*. *Cic. Off.* 3, 9.—This form is also applied to the comparison of *EQUAL* quantities, as: *Vide ne religio nobis tam adhibenda sit quam (i. e. adhibenda esset) si testimonium diceremus*. *Ib. Brut.* 85.—*Qui autem non defendit si potest, tam est in vitio quam (i. e. sit) si parentes, aut amicos, aut patriam deserat*. *Ib. Off.* 1, 7.

Obs. 12. When the two propositions of a comparative period have different predicates, and the comparative clause denotes not only the lesser degree, but a *denial* of the fact stated in it, the mood of the clause is regularly the *SUBJUNCTIVE*. Such clauses are compared by means of the syndetic antecedent *potius*, or its equivalents *citius* and *prius* (see Obs. 9), as: Errābo *potius quam perducet* quispiam (= *Rather than take a guide, I will go astray*). Plant. Most. 3, 2, 162.—*Potius quam venias* in periculum, dividiūm face (*Rather than come into danger, divide*). Ter. A. D. 2, 2, 32.—*Potius quam id non fiat*, ego dabo (*Rather than allow this to happen, I will give*). Plant. Pseud. 1, 5, 141.—*Prius quam te inimicum habeam*, faciam ut iusseris (*Rather than have you an enemy, I will do as you will order*). Ter. Eunn. 1, 2, 94.—Inopem optāvit *potius eum relinquare quam eum thesaurum commonstrāret*. Plant. Aul. prol. 11.—Illicitatōrem *potius ponam quam illud minoris veniet*. Cic. Fam. 7, 2, 1.—Cur quod in sinu vestro est excuti jubētis *potius quam ponātis*? (Why do you bid us search for what you have in the bosom of your cloaks, instead of laying it down?) Liv. 6, 15.—*Ægypti* quamvis carnificem *potius* subierint, *quam* ibi aut aspidem violent. Cic. Tusc. 5, 27.—Zeno perperus est omnia *potius, quam* consocios delendæ tyrannidis indicaret. Ib. 2, 22.—Depugna *potius quam servius*. Ib. Att. 7, 7, 7.—If *magis* is used in the principal sentence, the mood of the clause is the *indicative*: *Magis verba legatorum benigne sunt audita quam momentum ad mutandos animos habuerunt*. Liv. 42, 46.—Sometimes the writers of the silver age use subjunctives in comparative *Quam*-clauses as loosely as they use the subjunctive in *relative* clauses, as: Cato (Uticensis) *majorē spatio proavum vicerat quam a Crasso vinceretur* (instead of the proper '*victus est*'). Sen. V. B. 21.

Obs. 13. The Latin likes to give to those words in the comparative clause which are homologous to words of the principal sentence the same grammatical form as the latter have in the principal sentence. This attraction, which applies to all the classes of comparative periods, sometimes produces incongruities both in regard to grammatical and logical laws, which chiefly appear in the following constructions:

A. If the principal sentence in a comparative period, both terms of which have predicates of their own, has the form of an oblique infinitive clause, the predicate of the comparative clause should be, as suboblique, in the *subjunctive*, or as non-oblique, in the *indicative*. But, contrary to this rule, the predicate of such a comparative clause is more generally (although not always) placed in the *infinitive* with its subject in the *accusative*, being treated as if it were *coordinate* with its principal sentence, as: *Tibi affirmavi, quidvis me potius perperurum, quam ex Italiâ ad bellum civile me exiturum*. Cic. Fam. 2, 16, 3 (instead of '*quam ex Italiâ exeum*').—*Quid si doceo, te duâbus partibus am-*

plus frumenti abstulisse quam populo Romano misisse (instead of *quam miseris*). Ib. Verr. 2, 3, 19.—Even in *Antequam*-clauses such an attraction is sometimes used, as : Censens ante corānum herbis exstulisse, *quam conceptum esse* semen ? Ib. Div. 2, 32.—This attraction, however, is not used : 1) If the *tenses* of the predicates are *different*, as : *Tam temere* istum re commissurum, *quam* verbis minitabatur, nemo putavit. Cic. Cæc. 7, 21. —Erit mox qui arguat, *graviores* Asiæ, *quam* Antiochus fuerit, Eumænem esse. Liv. 42, 42.—2) If the predicates of both propositions are the same, but are expressed in each proposition, the *Quam*-clause consisting merely of this common predicate : Multo *plura dixisse, quam dixisset*, putarētur. Cic. R. A. 1.—3) If the predicate is made by *potius* or its equivalents, and the fact of the clause is conceived as non-real, the predicate, by attraction, as : Sed vel hæc patienda censeo *potius quam* trucidari corpora vestra *suavis*. Liv. 21, 13. Itaque per interrogem comitia habenda esse *potius quam* congl alter a bello *arocari*tur. Ib. 22, 33.—Hamilear peritūrum se *potius* dixit, *quam* cum tanto flagitio domum *rediret*. Nep. Ham. 1.—Moritūros se *cilius* dicebant *quam* quicquam eārum rerum *rogare*tur. Liv. 5, 24.

1. *B.* If the principal sentence of a comparative clause is in the accusative with the infinitive, and both propositions have a common predicate which is only expressed as predicate-infinitive in the principal sentence, the subject of the clause is regularly in the accusative, being attracted by the subject-accusative of the principal sentence, as: *Intelliges, multo me vigilare acrius ad saltem, quam te ad perniciem reipublicæ.* Cic. Cat. 1. 4.—*Multis ex rebus intelligi potest, majores nostros non modo armis plus quam celeras nationes, verum etiam sapientia potuisse.* Ib. R. A. 25.—*Non enim facile quem dixerim plus studii quam illum adhibuisse.* Ib. Brut. 41.—*Dicit, me acrius videre quam multos pisces fortasse.* Ib. Ac. 2. 25.—*Ajēbat, se tantum estimare quanti Sacerdotem.* Ib. Verr. 2. 3. 92.—*Quem tantā letitia perfundi arbitramur, quantā aut superiorem Africānum Hannibale victo, aut posteriorem, Karthagine eversā?* Ib. Fin. 5. 24.—This attraction also occurs in the qualitative comparison, as: *Ajēbant te non fato, ut celeros ex vestra familiā, sed opera tuā, consulem factum.* Ib. Verr. 1. 10.—*Quum effūse omnes fugerent, se quoque turbā ablātum, ut Varrōnem, Cannensi pugnā, ut multos alios imperatores.* Liv. 26. 3. So in comparative relative clauses after *idem*: *Cumānos ejusdem juris conditionisque cujus Cupram esse placuit.* Liv. 8. 14. Sometimes, however, the subjects of such clauses are placed in the nominative, as: *Vult se in eodem, quo ceteri, jure versari.* Cic. L. Ag. 2. 23.

C. A comparative clause, which does not refer to the whole principal sentence, but merely to an *attributive phrase* with a *comparative* as an attributive adjective, generally takes the copula *esse* as a predicate, as: *Hæc legatio etiam insolentioris (legationis) quam illa fuit*, satis magnum piaculum esset. Liv. 45, 23.—*Tibi, multo majori, quam Africanus fuit*. Cic. Fam. 5, 7, 3.—Sometimes, the copula of such clauses is omitted, and the subject of the clause is *attracted by the case of the comparative*, as: *Proposui tibi claros viros (ad imitandum), quod facere solent qui hortantur? Neminem habeo clariorem, quam te ipsum (= quam tu ipse es)*. Cic. Fam. 9, 14, 6.—*Me, non multo minorum ego iracundiores quam te (= quam tu es) novi neminem*. Plant. Merc. 1, 2, 30.—Certe equidem *puerum praeiorem quam te (= quam tu es) novi neminem*. Ib. Pers. 2, 27.—*Ego hominem callidiores vidi neminem, quam Phormionem (= quam Phormio est)*. Ter. Phorm. 4, 2, 1.—So Plaut. Most. 3, 1, 72.—Very rarely this attraction occurs, when the case of the comparative is *not in the accusative*, as: *Thermopylae locus appellatur, nobilis Lacedæmoniorum adversus Persas morte, magis memorabili quam pugna (= quam pugna fuit)*. Liv. 36, 15. If *pugna* is taken as a nominative, the omission of the copula would be as harsh as the attraction by the ablatives *morte magis memorabili*.

Obs. 14. Several words, containing a comparative by implication, are construed with *Quam*-clauses, the same as with *magis* expressed. 1) The verbs *mallo* (sometimes *velle* = *potius velle*) and *præstat*; *Sua quisque ab aliis benefacta laudari quam ipse aliorum narrare malebat*. Sall. Cat. 8.—*Quod si a multis eligere homines commodissimum quodque, quam sese uni alicui certo vellent addicere*. Cic. Inv. 2. 2.—*Accipere quam facere præstat* injuriam. Cic. Tusc. 5. 19.—2) The adverb *ultra* in the meaning 'farther', 'beyond', denoting an exceeding of the limits stated in the *Quam*-clause. '*Ultra quam*' mostly occurs with negations, but also affirmatively; (a) in regard to PLACE (literally or figuratively), = *ulterius quam*, *longius quam*; *Tricipitinus non ultra quam* (no farther than) in *Hernicos præcedit*. Liv. 3. 8.—*Longum exordium est quod ultra quam satis est producit* (farther than it is sufficient). Cic. Inv. 1. 18. Comp. Ib. Tusc. 2. 2; Ib. 1. 9.—(b) OF TIME: *Legati non ultra quam* (no longer than) *quinque dies Rhodi morati*. Liv. 45. 10.—*Triennium et sex mensis ultra quam licet lege Æmilia, censuram gerat*. Ib. 9. 34. Comp. Tac. Ann. 6. 44.—(c) OF THE INTENSITY of actions, designating the intensity as 'beyond measure': *Nil ultra* (= intolerabilis) *malgrum est, quam quod passi sumus*. Liv. 28. 39.—(d) Generally it is thus used with *Ut*-clauses, dependent on a verbum faciendi (by Livy, not by Cicero), as a mere synonym of *amplius* (Obs. 6):

Nihil ultra quam ut poeniteret frustra, restabat; There remained nothing else (nothing further, nothing better) than vain repentance. Liv. 8. 27.—Nihil ultra valuerunt quam in officio cessaremus (= nihil amplius effecerunt). Ib. 45. 25.—Quid ultra facere possit in officio cessaremus (= nihil amplius effecerunt). Ib. 45. 25.—3) Sometimes the adverbium quam ut deos precor, etc. Ib. 42. 13. So Ib. 40. 30.—4) Sometimes the adverbium supra and super are similarly used with Quam-clauses: (a) supra = superius, as: Paullo supra quam ad linguam stomachus annectitur. Cic. N. D. 2. 54.—(b) = ultra (beyond): Corpus patiens inedia, vigiliæ, algoris supra quam cuiquam credibile est. Sall. Cat. 5.—Poenas dedit usque superque quam satis est. Hor. Seren. 1. 2. 65.—(c) Super quam (with a Fact-clause) = præterquam quod (in addition to): Primoribus, super quam quod addisserant a consilio, terribis etiam duplici prodigio. Liv. 22. 3.—Marcellus etiam addisserant a consilio, terribis etiam duplici prodigio. Liv. 22. 3.—Significantly a verso rumore esse, super quam quod primo male pugnauerat. Ib. 27. 20. Significantly a subjunctive of non-reality is used after 'supra quam': Siepe etiam orator supra rem ferret quam fieri possit; an orator will often present a fact in terms beyond what could happen. Cic. Orat. 40.—4) In anteclassical and post-classical style, the adverb præ is construed with Quam-clauses, expressing the general idea of COMPARISON. præquam being often written as one conjunction (= compared with): Nihil hoc quidem est trīginta minæ, præquam alios sumptus facit; This is nothing, compared with what he trīginta minæ, præquam alios sumptus facit; This is nothing, compared with what he otherwise spends. Plant. Most. 4. 4. 43.—Jam minoris omnia facio, præquam quibus me modis indidicatus est; compared with the other tricks he played on me. Ib. 5. 2. 25.—Nec pol profecto sine grandi malo, præquam res patitur, studuit elegantie; without serious evils, compared with the advantages gained. Ib. Merc. Prol. 22.—Sed hoc etiam pulcrum est, præquam sumptus ubi petunt; but this is even excellent, compared with the time when they are demanding their money. Ib. Aul. 3. 5. 33.—Catonis sententia laxioribus paullo longioribusque verbis comprehensa est, præquam illud Græcum (Cato's wording is rather loose and lengthy, compared with the Greek sentence). Gell. N. A. 16. 1. Co up. Plant. Aul. 3. 5. 33.—Similarly præ is used with ut instead of with quam, and ante (= prius), forming temporal conjunctions in connection with quam (see p. 659, and p. 666 foll.). As with ante, and prius, Quam-clauses are used with pridie, as: Si hic pridie natus foret quam hic est. Plant. Mit. 4. 2. 91.—Sed hæc (epistola) est pridie data quam illa. Cic. Att. 3. 8. 2.—Hæc pridie scribēbam quam comitia fore putabatur. Ib. 4. 15. 8.—Pridie quam ego Athēnas veni. Ib. 5. 11. 6.—Pridie quam excessit e vitā. Ib. Am. 3. 12.—In Livy, and in silver Latinity, pridie quam is sometimes construed with a SUBJUNCTIVE, like præterquam: Pridie quam venisset, Liv. 26. 21.—Cic. Mil. 1. pridie quam perisset, somn. avit, considere se in caelo juxta solium Jovis. Suet. Cal. 8. 10. Here belong præterquam, and extra quam (si) (p. 739, OBS. 3, fn.).

Obs. 15. If a comparative clause dependent on an adjective or adverb in the comparative degree has no predicate of its own, and consists only of a SUBSTANTIVE noun, pronoun, or absolute adjective with or without attributes, the compared substantive, in lieu of a comparison by the co-junction *quam*, is sometimes placed in the ABATIVE (COMPARATIVE ABATIVE), which originally had the signification of an *ablativus* of *more* &c. It represents the degree, expressed by the comparative as, *MAJOR* BY the compared thing or person, *i. e.* as being not 'absolutely' 'more', but only 'relatively'; or 'in relation' to the compared noun, the Greek *comparative gradative* having a similar, though not exactly the same sense. This construction may take the place of the regular comparison by *quam*, in the following instances:

by *quam*, in the following instances :—  
1. If the comparative is a GRADUATE ADJECTIVE with the copula *esse*, also *ferre*, *videri*, *existere*, the compared substantive being the *subject* of the comparative clause, completed by means of the same copula, as: Libertas *servatior potior est quam servitus*, *est*, where *quam* includes the lesser degree of *potior*, as a *prole* the *superior*, Liv. 35. 17. Quae barbaria *inditior cavior* aut *aprior* *est*, Cic. Tusc. 5. 27.—Tullius Hostilius *ferocior Romulo fuit*, Liv. 1. 22.—Homo *me inferior* nullus *est*, more opinor. Plant. Merc. 2. 3. 1. *Romulo fuit*.—Nullus *est* (doens), ad statum quidem, *Rostri clarior*, Cic. DeJ. 12.—Nulla omnino *erit hinc praestantior disciplina*.—Nulla discipulorum *hinc discipulorum* praestantior *erit*, Ib. Fam. 1. 7. 11.—In sentences of this kind the principal subject is a *nomen*, the ordinary construction with a complete or an abbreviated *quam*-clause is as frequently found as the construction by a comparative ablative, as: *Cicilius est enim*, vel potius *ardentior* *enim*, *non quam est* *Teodorus*, Cic. Tusc. 1. 18.—*Memorabilia* in prima pars vita *quam postea* *enim*, Liv. 38. 53. The choice between the two constructions chiefly depends on the arrangement of the words required. If it is desirable to open the sentence with the comparative, as closely referring to the preceding thought, a comparative ablative is hardly ever used, the regular place of which is immediately before the comparative. If the comparative adjective is qualified by an ablative of difference, or any other adverbial ablative, a *quam*-clause generally is preferred to the comparative ablative, to avoid a consecutive or two ablatives of different meanings, as: Bithynicus, *idcirco* *quam* nos *charius* *enim* *benignior* *nobis* *enim* *maior*, Cic. Brut. 68.—M. Messala, *maior* *habeo* *quam* nos (not *habes*), Ib. 70.—Ennius *fuit maior natu quam* *Plautus* (quot *Plautus*, Ib. Tusc. 1. 1.—*Nihil* *enim*

erat ipse Cyclops *quam aries ille prudentior*. Ib. 5, 39.—On the other hand, a comparative ablative is preferred if the subject is a *negative absolute adjective*, or an *interrogative adjective*, virtually negative, as: *Quis uberior* in dicendo *Platonē?* *Quis Aristotele nervosior, Theophrasto dulcior?* Cic. Brut. 31.—*Quis enim hoc adollescente castior?* *Quis autem illo, qui maledicti, impurior?* Ib. Phil. 3, 6.—In publicis *nihil est lege gravior*. Ib. 2, 42.—*Nihil est detestabilius dedecore, nihil fastidiosius servilitate*. Ib. 3, 14.—*Nihil est animo velocius*. Ib. Tusc. 1, 19.—*Nihil enim est, profecto, homini prudentiā dulcius*. Ib. 1, 39.—Si nihil esset aliud, *nihil esset hominē deformius*. Ib. Tusc. 2, 21.—*Nihil est virtutē amabilius*. Ib. Brut. 78.—*Quid est melius aut quid præstantius et beneficentius bonitate?* Ib. N. D. 1, 43.—*Nihil est in historiā, purā et illustri brevitate dulcius*. Ib. Brut. 75. According to a remarkable Latin idiom, the form '*quid (nihil) est*', etc., in this construction is used with reference to **PERSONS**, generally referring to their actions or qualities; as *Nihil erat Crasso copiosius* (=Nobody had a greater command of the language than Crassus); or: No orations show a greater command of the language than those of Crassus). Cic. Brut. 89.—*Quid enim beatus illis, quo tu expulsus a te predicas?* Nothing is holier than the *condition* of those whom etc. Ib. Phil. 2, 13.—*Tarquinio vero quid impudentius, qui etc.?* What is more impudent than the *act* of Tarquin who etc.? Ib. Tusc. 3, 12.—*Quid est autem nequius aut turpius effeminato viro?* What is so wicked or disgraceful as *effeminacy* in a man? Ib. 3, 17.—*Nec mihi est te jucundius quicquam nec carius*. Ib. Fam. 2, 10, 1.—Accessit etiam illa opinio, quod homini *hominē pulchrius nihil* videātur. Ib. N. D. 1, 27.—Comparative ablatives are also used when the comparative adjective has the force of a *participle*, so as to be equivalent to a relative clause: *Est bos cervi figurā, cuius a mediā fronte inter aurīs unum cornū exsistit, excelcius* (=quod est *excelsius*) *magisque directum his, quæ nobis nota sunt, cornibus*. Cæs. B. G. 6, 26.

*B.* If the comparative is in the relation of a COMPLETING PREDICATE IN THE ACCUSATIVE, dependent on a FACTITIVE verb (p. 101, *R.* 74), especially verbs of *considering* (p. 102, No. *C*), the compared noun being conceived as the *subject* of the same factitive verb understood, the construction of the comparative ablative is frequently used, as: *Sapientia omnia inferiora virtute ducit.* (Completed: *Sapientia virtutem superiorem ducit; = Virtue is superior, as wisdom considers it.* Cic. Tusc. 4, 26.—*Est boni consulis, suam salutem posteriorem salute communi ducere.* Ib. Rab. Perd. 1. 3.—*Profecto Epicūrus nihil cessatione melius existimat.* Ib. N. D. 1, 6.—*Herodotum cur r-aciōrem ducam Ennio?* Ib. Div. 2, 56.—*Qui nihil habet* (considers) *in vitā jucundius vitā,* is cum virtūte vitam non potest colere. Auct. Her. 4, 14.—*Hoc mihi grāvis facere nihil potes.* Cic. Fam. 13, 44.—But the construction with *quam*, in this connection, occurs as often as that with comparative ablatives, as: *Ut nihil pulchrius quam hominem putāret.* Cic. N. D. 1, 27.—*Non minus preciarum hoc quam illud iudicandum est.* Ib. Off. 1, 22.

C. A comparative ablative is often used when the principal sentence with a *predicate-adjective* in the *comparative degree* is in the *ACCUSATIVE* with the *INFINITIVE*, the compared noun having the relation of a *subject-accusative* in a *Quam-clause*, as: *Crasso nihil statuo fieri potuisse perfectius* (INDEPENDENTLY: *Crasso nihil perfectius est, or fieri potest*). Cic. Brut. 38.—*Dixerunt, omni presenti statu spem cuiusque novandi res suas blandiorem esse* (INDEP.: *Spes cuiusque blandior est quam omnis praesens status*). Liv. 35, 17.—*Quid ego causam civitatum ago, quam ipsis agentibus et nos et regem cognoscere æquius est* (= *Æquius est nos causam cognoscere; minus æquum est ipsos agentes causam cognoscere*). Liv. 35, 16. The construction in this passage is extremely harsh, since the comparative ablative is not the subject of the copula, but of a predicate-infinitive, dependent on it.—But the ordinary construction with *quam* and an attracted subject-accusative (according to Obs. 12, No. B), is about as frequently used as a comparative ablative, as: *Sentio, Latuam linguam locupletiorem esse quam Græcam*. Cic. Fin. 1, 3.—*Neminem digniorem esse ex sociis vestris quam me, dicere aulam*. Liv. 37, 53. Compare the following two similar sentences with different comparative constructions: *Illud cognoscere profecto, mihi te (= quam te) neque cariorem, neque jucundiorem esse quempquam*. Cic. Fam. 2, 3, 2.—*Neminem cuiquam neque cariorem neque jucundiorem unquam fuisse quam te mihi*. Ib. 1, 9, 24: where the construction with *quam* is used, because the comparative clause consists of an *object (mihi)*, besides the *subject-accusative te*.

D. If the comparative is in the relation of an ATTRIBUTE-ADJECTIVE, the comparative noun in the construction of a comparative ablative may be used if the comparative ablative is *equivalent* to a Quam-clause with a *predicate-adjective* and the *copula*, provided the governing comparative adjective is in the nominative or accusative, as: *Hōc mihi majus (=major res quam hēc est) ab dis immortalibus nihil dari potest.* Cic. Phil. 2, 46. —*Causam suscepisti antiquiōrem memoriā tuā (=quam memoria tua est).* Ib. Rab. Perd. 9. —*Quem auctiōrem locupletērem Platōne laudāre possumus (=locupletērem quam Plato est)?* Ib. Rep. 1, 10. —*Non tulit ullos hēc civitas aut gloriā clariōres, aut auctoritatē graviōres, aut humanitatē poliōres,* P. Africāno, C. Lelio, L. Furio. Ib. Or. 2, 37. —*Nullum eō telum ad vincendum homini ab dis immortalibus acrius datum est (=nullum telum acrius*

## INDEX TO PART II.

☛ The first numbers of the references refer to the pages of the Second Part; the numbers and letters adjoined to these, after a comma, refer either to the §, or to the *Rem.*, or to the *Obs.*, or to mere numerical divisions of a paragraph. If on the page referred to, are several numbers of the same kind, their different designations (*R.*, *Obs.*, or §) are always added. Numbers, or references after *n.* refer to the foot-notes. Numbers separated by a semicolon always contain a new reference.

We beg to notice the following abbreviations:

|         |                |         |             |          |             |

**exigere**, w. participial gerundive 148, 174.

**exiguus** (= too small for) w. gerundial dat. 165, 2.

**existimare** w. Inf. cl. 588, 23; in the pass. generally takes nom. w. inf. 106, 87; except in perf and plup. 88. As factitive verb, w. double acc. 102, C; as verb of esteeming w. gen. of value 272, 1.—*Existimabat* and *existimavit* 337, 2.

**to expect** w. That-cl., not by *expectare*, but *sperare* 593, 8.

**expedit**, w. Inf. cl. and dat. of the interested pers. 621, 4.  
**expensum ferre** (accessory pred.) expl. 254, 4.  
**expers** w. gen. 118, 109.  
**explere** *aliquid volens aliquid* 99, 185.  
**exploratus** w. dat. 119, 112. *Exploratus* w. subj. Inf. cl. 612, n. 1.  
**expugnare**, w. That-cl., see *rincere*.  
**existere** w. pred. nom. 74, 462.  
**expectare**, as verb of striving, w. Ut-cl. 599, 2; w. *dum* or *si* 593, 8; 681, 26; w. interrogative cl. not admitting periphrastic fut. 449, 4.  
**exultare** w. abl. or *de* 93, 479, n. 8.  
**extemplo**, adv. of time, expl. 225, 11.  
**extra** (without), prep. w. acc. 24, 428 foll. Diff. from *sine* 36, 63. Constr. w. comp. Quam-cl. (*extra quam si*) 764, 14, no. 5; 739, 3, no. 6.  
**extremum est**, w. Ut-cl. 113, 11.  
**exuere**, either w. acc. of thing and dat. of pers., or acc. of pers. and abl. of thing 97, 68; 98, 483.  
**F.**, symbol of the uncia 116, 105. FS., symbol of the septunx 116, 105. FZ., symbol of the triens 116, 105.  
**to face**, referring to the points of the compass, how expr. 221, 8.  
**facere**, as factitive verb w. double acc. 101, A. W. pred. gen. inst. of pred. acc. 102, 76; w. pred. adj. in masc. acc. pl. 102, 76, 2. *Facere* (*fieri* etc.) w. gerundial dat. 163, 209. As verb of esteeming w. gen. of value 272, 1.—W. pred. Ut-cl., as circumlocution 488, 10; 628, 30.—Synopsis of the different significations and constructions of *facere* 600, n. 42; w. *quominus*, *ne*, *ut non* 601, n. \*.—*Facere non possum quid* etc. = I cannot help doing something 605, 7.—*Fac*, 'suppose that,' w. Inf. cl. 601, n. \*. *Fac ut*, as circumlocution of the affirmative imperative 488, 10.  
**facilis** w. dat. 118, 112; w. gerundial dative 165, 2; w. gerundial after *ad* 192, 2; w. II. sup. 121, 121. *Facile est* w. subj. cl. 609, n. 1.  
**facinus est** w. subj. Inf. cl. 613, 1.  
**Fact-clauses**, definition, nature, and gram. forms 491, 14 foll.; 605, 26. Introduced by *quod* or *ut*; diff. between them 605, 1. In place of transitive objects 605, 2; in place of abl. of means (*eo quod*) 606, 1; of prepositional obj. (*ex quo*) 607, 5. Two Fact-cl. w. force of compound obj. *causa* and *id quod* etc. 608, 7. Attr. Fact-cl. 677, 4.  
**Factitive verbs**, consist of 3 classes 101 foll. Constr. w. double acc. or nom. 101, 487; w. pred. gen. 102, 76.  
**facultas** w. attr. Ut-cl. 625, D.  
**fallit me** w. Inf. cl. 616, 5.—*Opinio me fallit* w. Quod-cl. Ib.—*Non fallit* w. subj. Quin cl. 616, 7.  
**falsum est** w. enbj. Inf. cl. or Ut-cl. 612, 6.  
**fama est** w. subj. Inf. cl. 613, 1.  
**familiaris** w. gen. or dat. 119, 114.

**famulari**, w. dat. 89.  
**fas est**, w. II. sup. 121, 121; w. subj. Inf., or subj. Inf. cl. 614, 1.  
**fatum est**, w. subj. Inf. cl., Ut-cl., or subj. Inf. 614, 1.  
**favere** w. dat. 89; w. *plus*, not *magis* 756, C.  
**favor**, 'to do somebody a favor,' how expr. in Lat. 283, n. 12.  
**secundus** w. gen. 118, 109; w. abl. 119, 116.  
**felix** w. gerundial dat. 165, 2.  
**ferox**, w. gerundial after *ad* 192, 5.  
**ferre** (*molestie, ægre, graviter* etc.), more frequently w. Inf. cl. than w. *quod* 590. *Ferre* as verbum imperandi 596, n. \*.—In the meaning 'to report' takes nom. w. Inf. in pass., except in perf. and plup. 106, 87 and 88.  
**fides**, w. Attr. That-cl. 624, A, 3.—*Fidem habere* w. dat. 88.  
**fidere**, w. dat. 88; w. abl. 88, n. 3; 93, 479. Diff. from *confidere* 88, n. 3.  
**fieri**, see *facere*. Constr. w. pred. nom. 73, 432. *Fieri non potest quid* 605, 7; 618, A.  
**Fil**, it happens w. subj. Ut-cl. Different uses of, 618, A, 1.  
**Final That-clauses**. Syndetic ant. (*eo, eo consilio* etc.) 433, 2. Introduced by *ut, ne, quo*, rarely *quominus* 537, 33. Diff. from completing That-cl. 637, 1. Parenthetical final Ut-cl. 638, 3. Always require pret. consecution if dep. on pret. preds. 429, 1.  
**figere**, as factitive verb, w. double acc. 101, A. *Finge* = suppose, w. Inf. cl. 700, 16.  
**finis**, w. gerundial gen. 159, 3.—*Ad finem*, inst. of synd. ant. of final clauses, 283, 566; 283, 1.  
**Finite clauses** 480, 610.  
**firmus**, w. gerundial dat. 165, 2.  
**first**. Cautions in rendering this numeral into Latin 290, X.  
**flagitare** w. double acc. 100, 186; how constr. in pass. voice 101, 73. W. imperative cl. 595, 3.  
**flagitiosum est**, w. subj. Inf. cl. 609, 2.  
**flagrans**, w. abl. 118, 108.  
**floci est**, 272, 3.  
**florere** w. abl. 93, 479.  
**fodas** w. II. sup. 121, 121.  
**for**, Engl. prep., rendered by Lat. prep. *ad, in, de, propter, ab* 35, 60; 41, 71; by dat. 90, 47. How rendered if used of time (for ever, in perpetuum; for the present, in praesens, etc.) 42, 452. 'Distinguished for' by abl. 120, 116. Referring to price and value by abl. or gen. 268, 34; 270. 'For' with comp. meaning *wise for an* (Eticham by comp. Ut-cl. 717, F. 'For'—on account of, by *causa* or *gratia* w. gen. (see *causa* and *gratia*); by abl. abs. 180, 225 (for a consideration, *pecuniā acceptā*, 180, obs.). 'To have regard for,' by gen. 144, n. 43. 'For' w. participials by gerundial gen. 159, 1; by participial gerundive 148, 179; after 'thanking, praising, being sorry for' etc. by Quod-cl. 388, b; 388, 2; by a rel. cl. of purpose (for the purpose of 557, 5.—For, as Engl. conj., by *nam, enim* etc.

(see P. I.); by *siquidem* 688, 14; by *quippe* 689, B.  
**for-as and foris**. Diff. between them 219, n. 1.  
**fore, forem** etc. Use of 130, 140; 135, 150. With perf. part. 137, 156. Circumlocution by *fore ut* 137, 154; 487, b. *Forem* w. perf. part. = perf. fut. subj. of the pass. 137, 152; *forem*, as auxiliary in place of *essem* 130, 140; in place of periphrastic fut. 451, 2.  
**Form-adjectives** (see P. I). Demonstrative form-adj. as synd. ant. of different classes of clauses, see *Syndetic antecedents*. As synd. ant. of attr. modal Ut-cl. 493, 4. What form-ads. may be used as accessory preds. 250 foll.; as pred. abl. 185, 2.  
**fortitan**, w. subjunc. 378, 1.  
**forte**, 242, obs.  
**fortuna** w. gerundial gen. 159, 3.  
**Fractions**, how expr. 116, 105. Symbols of fractions Ib.  
**free speech** (to demand) how expr. in Lat. 154, 7.  
**freeing**, Verbs of, constr. w. *ab* 29, 48.

**from**, Engl. prep., rendered by *ab, de, ex* 25 foll.; before names of cities 48, 82; after verbs of taking away by dat. 97, 68. Denoting time (from the time that), *inde ab* (see *ind-*), *ex quo* (see *ex*), *postquam* 669, 42; 664, 2 and 7; denoting cause, by *ob* and *de*; 20, 31; 279, 565; by participles (*ductus* etc.) 119, 115; by abl. 279, 565. 'From the fact that,' *ex eo quod* 607, 2. 'Different from' = *alius atque* 749, 9.—*From* w. participials (desist from fighting, etc.) by obj. inf. 604, 3; by *quominus* 604, 1; by *quin* 604, 4; 604, 6.  
**frui** (*perfrui*), w. abl. 93, 479 and n. 9. Treated as transitive verb in reversed gerundive phrases 152, 188.  
**frustra**, 242, obs.  
**fugiens**, w. gen. 117, 108.  
**funditus**. Diff. from *radicitus* 242, obs.  
**fungi** (*perfungi*) w. abl. 93, 479 and n. 9. Treated as transitive in reversed gerundive phrases 152, 188.  
**furari**, w. acc. of thing and dat. of pers. (= from) 97, 68.  
**Future-perfect**. When used as ordinary future tense (see *Future tenses*) 349 foll.; w. force of Engl. fut. perf. 349, 1; w. force of Engl. fut. pres. 349, 2.—As potential fut. 350, 75 foll.; as imperative 350, 1.—As dependent future 353 foll.; rendered by Engl. pres. or perf. 354, 3. Form of the pred. of its princ. sent. 355, 5. CONVERSION of fut. perf. into an ordinary perf. or plup. when the clause must be in subjunc. 452, 98 foll. (not by circumlocution w. '*futurum sit ut*' 453, n. \*). Cannot be converted if in pass. 453, 1. Plup. subjunc. inst. of perf. subjunc. as converted fut. perf. 454, 3.—Fut. perf. in Antequam-cl. 668, 2; 669, 3; in periods of contingent action 330, 5; in Quam-clauses 646, 4; 647, 3.—When dependent fut. perf. takes the auxiliary *fuero*, 350, 3.  
**Future-present** (see *Future tenses*); when used

as ordinary fut. tense 347, 73 foll. Its relation to the Engl. forms with 'will' and 'shall' 348, 1 foll. Potential fut. pres. 350, 75, 1; as imperative 350, 1; denoting conclusions 350, 2; of potential verbs (*posse* etc.) and gerundials 351, 3; to express syllogisms 351, 4, A; for deductio ad absurdum, in interrog. form 351, B; for rules 352, B; for opinions advanced 352, 6; in polite statements 352, 7.—CONVERSION of fut. pres. into ordinary pres. or imp. if the cl. must be in subjunc. 448 foll.; into periphrastic fut. 449 foll. Different methods of converting futures of the pass. 451, 3.—Future-pres. not used in Antequam-clauses in good prose 668, n. \*.—Exceptionally used after *dum* = while 672, 2.—In clauses of contingent action 330, 5.—In Si-clauses of doubtful reality 702, 2; 711, 15; 710, 14; 713, 18.—In Quam-clauses 646, 4; 647, 3.—Not used in Si-clauses of doubtless reality 715, 45.  
**Future Tenses**. Gram. division: Fut. pres. and fut. perf. 347, 587 and obs.; Logical division: Ordinary fut., potential fut., dependent fut. 347, 588. For periphrastic fut. see that article. Rules on the choice between fut. pres. and fut. perf. in indep. sent., and cl. dep. on them 351, 1; 354, 2. Ordinary fut. 347 foll.; potential fut. 350 foll.; dep. fut. 353 foll. Four combinations, according to which either fut. pres. or fut. perf. must be used as dep. fut. 353, 1. Dep. fut. in cond. cl. of doubtful reality 703 D.—If the clause requires subjunc., the dependent fut. cannot be converted into periphrastic subjunc. 450, C.—Epistolary tenses in place of fut. tenses 358, 5.  
**futurus**, verb. adj. of *esse* 125, 128.—*Futurum esse*, use of 135, 150; as circumlocution, with *ut* 134, 4; 137, 154. *Futurum est ut*, use as finite pred. 135, n. 1; cannot be used as circumlocution of fut. perf. 453, 1. *Futurum fuisse ut*, use of, 137, 155.  
**Gaudere**, w. abl., or *de* 93, 479, n. 8.—W. reversed participial phrase in abl. 173, 1; w. Inf. cl. or w. Quod-cl. 590. For mood of the Quod-cl. see *laudare*.  
**Genitive case**. PRED. GEN. 77 foll. Gen. of the possessor 77, 466 (diff. from dat. of the possessor 79, 24); impers. pred. gen. 77, 466, 2 (inst. of neuter pred. adj. 79, 25); qualitative gen. 78, 31 (diff. from qualitative abl. 80, 27); after factitive verbs 102, 76; gen. denoting the age of men 236, 5.—GEN. AS COMPLETING OBJ. OF VERBS 92 foll.; along w. a transitive obj. 99, 484.—Dep. on ADJECTIVES and participles 117, 499.—GEN. OF GERUNDIALS 157 foll.; of reversed participial phrases 162, 527.—GEN. OF PLACE (names of cities 47). GEN. OF DISTANCE 220, 4; of DIMENSION after nouns 115, 102; after adjs. 115, 498; dep. on comparatives denoting numerical excess 116, 103.—Attr. gen. referring to the length of TIME-PERIODS 237, 7.—ACCESSORY PREDICATE-GEN.

256, 3; 256, 26 and obs. 1.—Gen. of PRICE and VALUE after *esse*, to be worth, 267, 2; 268, 3.—What abs. quantitatives must be placed in gen. of price and value 270, 35. Explanation of this form 271, 1. Gen. or abl. of value dep. on *estimare* 271, 2. Gen. of internal value 272, 1.—Gen. pl. of nouns of second declension, denoting denominations of money, formed in *um* 117, n. 2; 260, 5.—Ellipsis of the governing noun of an attr. gen. *Clariss. Senatoris, l. c. templum* 316, n. 6. For attributive gen. see P. I. *gentium (terrarum)*, as attr. of locative adverbs 301, n. 32.

*genus*, w. gerundial gen. 159, 3. *generis*, w. gen. 117, 108.

Gerund and Gerundive, analysis 141, n. 1; 151, n. 1. Denote the different gram. forms which verbal adjs. in *dus* may assume in the framework of the sentence. They occur (a) in Nom., in connection w. the copula (predicate-gerundials, or periphrastic gerundials), *da* as participles (accessory predicates), the participle of the copula being understood (participial gerundials), (c) as attributes and objects in the form of reversed phrases (gerundials, in the narrower sense). For Periphrastic and Participial Gerundials, see the articles under this heading. For Gerundials in the narrower sense, see the article below.

Gerundials (in reversed phrases) Analysis 150 foll. Are either GERUNDS (expl. 151, 518; 151, 187) or GERUNDIVES (258, 522). Gerunds are impers. pass., having active meaning, as every other impers. pass.; their exceptional use in the meaning of personal passives 151, 187. Are used either without objects (gerunds absolute, *ars parva loqui*), or take intransitive objects 152, 188. The gram. anomaly of transitive objs. dep. on gerunds, made a regular construction in certain connections 152, 519. Gerunds with objs. in an attracted case 152, 520.—The different gram. relations in which gerundials may or may not be used 154, 76, 191. Traces of the use of gerundials as subjs. and transitive objs. 156, 198 foll.

GERUNDIAL GENITIVE, 157, 526 foll. Its form 157, 526. W. attracted case, how expl. 158, 204 and 205. What relations are expr. by gerund. gen. 159, 205. E.g. *perpetratoris*, etc. as equivalents 159, 1.—Dep. as attr. on nouns 159, 1-3; as obj. of adjs. 161, 207. Cannot be used as completing obj. of verbs 161, 207. As pred. genitive w. copula 161, 208.

GERUNDIAL DATIVE, 163 foll. Its form is retained in three passages only (164). Different objective relations in which it occurs 167, 202. As completing obj. 163, 203 foll.—Gerundial dat. of persons 167, 203 foll. Diff. from gerundial acc. 167, 12. Diff. from gerundial pred. gen. 168, 2.

GERUNDIAL ABLATIVE, 169 foll. Its general force 169, 529; as passive agent 169, 213; as accessory pred. 170, 214; w. the force of abl. abs. or of a clause 170, 1; as comparat. abl. 170, 2; as completing obj. 170, 3. Negatively as adverbial obj. of manner, = 'without' w. participial 1-8, 1, C.

GERUNDIAL AFTER PREPOSITIONS. Cannot take the form of a gerund w. transitive obj. 188, 237.—*Ad* w. gerundials 189, 528. As completing obj. of verbs denoting aim 190, 239, 1. As equivalent of Final Ut-cl. 190, 239, 2. Dep. on adjs. 192, 240. As attr. 191, obs. Diff. from gerundial dat. 189, 237; from participial gerundive 190, 238.—*In* w. gerundial acc. 193, 539. Force of this construction 193, 241 foll. Diff. from gerundial after *ad* 193, 242.—Gerundial Abl. after *in* 194 foll.; after *ab* 195, 541; *de* 196, 542; *ex* and *pro* 197, 544.—Gerundial acc. after *ob* 196, 543; after *inter* 197, 544.

*gloriari*, w. abl. or *de* 93, 429; w. reversed participial phrase in abl. 173, 1; w. Quod-cl. or Inf. cl. 598, 9; 598, n. 2. *gloriosum est* w. subj. Ut-cl. 610, 4. *gnarus* w. gen. 118, 109; w. gerundial gen. 161, 207.

to go. 'Which goes to show,' how rendered 455, 2.—'Going to' rendered by periphrastic future 129, 307. granted (granting) *that*, rendered by subjunc. of the main pred. 584, 7; by Ut-cl. 609, 8. 'Granted for argument's sake,' by *si* 700, 16.

*gratia* in abl., to denote purpose 283, 566; 283, 1. W. gen., as synonym of *propter* 24, 45.—*Gratias agere, gratulam referre*, constr. w. Quod-cl. 598, 9; rarely w. Inf. cl. 599, n. 1.—*Gratias referre* *esse*, expl. 168, 1. *gratificari*, w. dat. 89. *gratias (gratias)* 242, obs. *gratulari*, w. dat. 89; w. Quod-cl. 598, 9 (not w. Quam-cl. 598, n. 2). *gratus*, w. dat. 118, 112. *Gratum est* w. Quod-cl. 610, 4; w. Ut-cl. 612, 6.

*Habere*, as facilitative verb w. double acc. 102, C.; more frequently in pass. w. double nom. 102, obs. Constr. w. *pro*, or in numero 102, 75. As verb of esteeming, w. obj. of inner value 272, 1. W. perf. part. as accessory pred., being the origin of the auxiliary 'to have' in modern languages 254, 3. Constr. w. a rel. cl. in subjunc. *Iubeo quod dicam*, w. obj. Inf. w. gerundial, and w. interrogative cl. 557, 2. *habilis* and *inhabilis*, w. dat. 118, 112; w. gerundial after *ad* 192, 1.

*habitare*, may take an obj. of price 267, 32, 2. *Habitare*, may take an obj. 343, 71. *Habitual actions*, how expr. 343, 71. *hac*, fourth locative case 216. *Hactenus* compound adv. of 4th loc. case 217, 8; 220, 9. *hac* *hactenus* 529, n. 12. *had it not been for*, how rendered 718, 3. *half*, how expr. 116, 105. *One half as much*, *et* *hac*, how expr. 732, 9.

it happens that, expr. by different impersonals 613, 4; diff. between these 619, 9. *hand (non) secus*, synd. ant. of compar. cl. of quality 745, 3. What conjcs. are used after it. Ib.

he who, how rendered 509, 2; 514, 1.

help. 'I cannot help' w. participial = *facere non possum quin*; or *non possum quin*; or *non possum non* 605, 7.

hic, demonstr. adj. (see P. I.); as synd. ant. of rel. and modal cl. of quality 435, 2. *Hic*, adv. in first locative case 217, 4; as temporal adv. = *tum* 223, 3.

hiding, verbs of, w. acc. after *in* 38, 67.

hinc, demonstr. adv. in second locative case 217, 4; as temporal adv. = *deinde* 222, 9.

Historical present, see Present. HISTORICAL INFINITIVE, see Infinitive. HISTORICAL IMPERFECT, see Imperfect. HISTOR. SUBJUNCTIVE, see Subjunctive in conditional cl.

*honestus*, w. gerundial after *ad* 192, 5; w. II. Sup. 121, 121. *Honestum est*, w. Subj. Inf. cl. 610, 3.

hora (hour), how calculated, and divided by the Latins 226, 1.

homo, temp. adv. = *hoc anno* 225, 11.

horsum, compound locative adv. 217, 8.

hortari, w. acc. after *ad* or *in* 41, n. 2. W.

imperative cl. 595, 4; rarely w. obj. inf. Ib.

how, different ways of rendering 240, 2.

however, rendered by *quamquam* 698, 12; by *nisi* or *nisi tamen* 739, 2. (By *autem*, etc.; see P. I.).—However much, by *quamvis* (not *quamvisque*) 500, 5; 501, 9; 693, 4 foll. However w. an adj., by *quamvis* 693, 4; however little = *quamvis non* 694, B.

huc, adv. of place in 3d locative case 317, obs. 4. *Hucusque*, compound locative adv. 217, 8; postclassically as temporal adv. 222, 9.

humus, as locative object, takes locative cases, like names of cities 47, 81.

hundred-weight, how expr. 275, 1.

Hypothetical comparison, in regard to comp. cl. introduced by *quasi*, *ac si*, *quam si*, etc. 743, 3 foll. Subjunc. in the cl., subject to law of consecution 748, 5.

Ibi, adv. of place, in 1st locative case 216; as temporal adv. 222, n. 4.

iccirco, causal adv. 280, 40. Syndet. ant. of Quod and Quia-cl. 683, 3; of final cl. 435, 2; of causal Si-cl. 716, 3 foll. Use of *iccirco* if not synd. ant. of clauses 282, 8.

id quod, introducing parenthetical rel. cl., rendered by 'which' after a noun in apposition 517, 4.

idem, determinative form-adj. (see P. I.), as synd. ant. of comp. cl. of quality, followed by *quod*, *ac*, *atque*, *ut*, etc. 744, 1. Used as access. pred. in the meaning 'likewise' 251, 9. Diff. from *et ipse*. Ib.

identidem, temp. adv. 222, 9.

ideo, therefore, causal adv. 280, 5 and 7. Diff. from the causal conjcs. *ergo*, *igitur*, *itaque* 281, 6. Adv. of purpose 283, 566;

284, 3. Synd. ant. of Quod-cl. 683, 3. Meaning of *ideo* if used without a causal cl. 282, 8.

idoneus, w. dat. 118, 112; w. gerundial after *ad*; w. a rel. cl. in subjunc. 557, 3.

Idus, meaning and gram. use 227, 1.

if, regular Engl. equivalent of *si* 488, B; rendered by *quum* 645, 34. If not = *nisi*, *ni*, or *si non* (see these conjcs.). 'If I am not mistaken' = *nisi me fallit, nisi fallor* (not *nisi erro*, nor *si non fallor*, etc.) 742, 2.

'If you please' = *si placet, si videtur, sis, sodes* (anteccl. and poet) 742, 11.—'If but, if indeed' = *si quidem* 688, 14. 'If but = if only, provided that,' by *dum* or *dummodo* w. subjunc., *si modo*, etc. 676, 13; 677, 14.

ignarus, w. gen. 118, 109. W. gerundial gen. 161, 207. *Te ignaro*, without your knowledge 184, 1.

ignorare (non) w. Quin-cl. 589, 4.

ignoscere, w. dat. 88; different constructions 88, n. 5. W. Quod-cl. 598, 9; w. Si-cl. 598, n. 2.

ille, demonstr. form-adj. (see P. I.) Synd. ant. of clauses of quality 435, 2.—*Ille ego qui* 515, 4.

illico, adv. of time, expl. 225, 11. In a negative thesis of conditional periods, emphatically used inst. of *iccirco* 717, 3.

illudere, w. dat. or acc. 91, 475.

immemor, w. gen. 118, 109.

imminens, w. dat. 118, 108.

immolare, w. abl. or acc. of the victim 95, 62.

immunem esse, w. ab or mere abl. 29, 48.

impedimentum, w. attr. Quominus-cl. 625, D.

Impedimento est, w. subj. Quod-cl. 615, 11.

impedire, constr. w. trans. acc. along w. obj. inf. 104, 83; 603, n. 1; w. trans. acc. along w. neuter form-adj. 85, 39, 2. As verb of negative doing w. Quominus-cl. 602, 5.

Non impedire w. quin, an anomalous construction 603, n. 1. W. ne 603, n. 1. W.

gerundial after *ad*. Ib.

impellere, w. gerundial after *ad* 190, 239, 1; w. That-cl., see *movere*.

imperare, w. dat. 88. Other constructions 88, n. 1. *Imperare alicui aliquid*, of military requisitions 98, 69. Personal construction of the pass. *imperator* w. obj. inf. 105, 85. Constr. w. imperative clauses 596, 6; their different forms, and connections w. the dat. of the personal obj. Ib.

*Sibi non imperare* (not to restrain one's self) constr. w. Quin-cl. 603, 5.

Imperative clauses, a main division of dependent sentences 480, 610. Gram. form 389, 83. Dep. on ordinary verbs of saying 389, 2. Different classes of imperative clauses according to the nature of the leading imperative idea 595, 2. Form of imperative cl. dep. on verbs of negative command 597, 7; on verbs of permission 597, 8. Governing verb of command understood 390, 3. Imperative cl. in form of Inf. cl. w. gerundial pred. 594, 1.

Imperative mood (see P. I.). The II. Imperative, denoting laws and rules 351, A. Its

256, 3; 256, 26 and obs. 1.—Gen. of PRICE and VALUE after *esse*, to be worth, 267, 2; 268, 3.—What abs. quantitatives must be placed in gen. of price and value 270, 35. Explanation of this form 271, 1. Gen. or abl. of value dep. on *existere* 271, 3. Gen. of internal value 272. Verbs taking a gen. of internal value 273, 1.—Gen. pl. of nouns of second declension, denoting denominations of money, formed in *um* 117, n. 2; 269, 5.—Ellipsis of the governing noun of an attr. gen. (*Joris Statōris, i. e. templum*) 216, n. 6. For attributive gen. see P. I.

**gentium (terrarum)**, as attr. of locative adverbs 504, n. 22.

**genus**, w. gerundial gen. 159, 3.

**gerens**, w. gen. 117, 108.

**Gerund and Gerundive**, analysis 141, n. 1; 151, n. 1. Denote the different gram. forms which verbal adjs. in *us* may assume in the framework of the sentence. They occur (a) in Nom., in connection w. the copula (predicate-gerundials, or periphrastic gerundials), (b) as PARTICIPLES (accessory predicates), the participle of the copula being understood (participial gerundials), (c) as attributes and objects in the form of reversed phrases (gerundials, in the narrower sense). For Periphrastic and Participial Gerundials, see the articles under this heading. For Gerundials in the narrower sense, see the article below.

**Gerundials** (in reversed phrases) Analysis 150 foll. Are either GERUNDS (expl. 151, 518; 151, 187) or GERUNDIVES (253, 522). Gerunds are IMPERS. PASS. having active meaning, as every other impers. pass.; their exceptional use in the meaning of personal passives 151, 187. Are used either without objects (gerunds absolute, *ars navigandi*), or take intransitive objects 152, 188. The gram. anomaly of transitive objs. dep. on gerunds, made a regular construction in certain connections 152, 519. Gerunds with objs. in an attracted case 152, 520.—The different gram. relations in which gerundials may or may not be used 154, 17, 194. Traces of the use of gerundials as subjs. and transitive objs. 156, 198 foll.

**GERUNDIAL GENITIVE**, 157, 526 foll. Its form 157, 526. W. attracted case, how expl. 158, 204 and 205. What relations are expr. by gerund. gen. 159, 206. Engl. preps. etc. as equivalents 159, 1.—Dep., as attr. on nouns 159, 1-3; as obj. of adjs. 161, 207. Cannot be used as completing obj. of verbs 161, 207. As pred. genitive w. copula 161, 208.

**GERUNDIAL DATIVE**, 163 foll. Extremely seldom (in three passages only) takes the form of gerund w. transitive obj. 164. Different objective relations in which it occurs 163, 528. As completing obj. 163, 209 foll.—Gerundial dat. of purpose 165, 211 foll. Diff. from gerundial after *ad* 189, 237.—Gerundial pred. dat. 168, 212. Diff. from gerundial pred. gen. 168, 2.

**GERUNDIAL ABLATIVE**, 169 foll. Its general force 169, 529; as passive agent 169, 213; as accessory pred. 170, 214; w. the force of abl. abs. or of a clause 170, 1; as comparat. abl. 170, 2; as completing obj. 170, 3. Negatively as adverbial obj. of manner, = 'without' w. participial 188, 1, C.

**GERUNDIAL AFTER PREPOSITIONS**. Cannot take the form of a gerund w. transitive obj. 188, 237.—*Ad* w. gerundials 189, 538. As completing obj. of verbs denoting aim 190, 239, 1. As equivalent of Final Ut-cl. 190, 239, 2. Dep. on adjs. 192, 240. As attr. 191, obs. Diff. from gerundial dat. 189, 237; from participial gerundive 190, 238.—*In* w. gerundial acc. 193, 539. Force of this construction 193, 241 foll. Diff. from gerundial after *ad* 193, 242.—Gerundial ABL. after *in* 194 foll.; after *ab* 195, 541; *de* 196, 542; *ex* and *pro* 197, 544.—Gerundial acc. after *ob* 196, 543; after *inter* 197, 544.

**gloriarī**, w. abl. or *de* 93, 429; w. reversed participial phrase in abl. 173, 1; w. Quod-cl. or Inf. cl. 598, 9; 598, n. 3.

**gloriosum est** w. subj. Ut-cl. 610, 4.

**gnarus** w. gen. 118, 109; w. gerundial gen. 161, 207.

**to go**. 'Which goes to show,' how rendered 435, 2.—'Going to' rendered by periphrastic future 129, 507.

**granted (granting) that**, rendered by subjunc. of the main pred. 384, 7; by Ut-cl. 695, 8. 'Granted for argument's sake,' by *finis* 700, 16.

**gratia** in abl., to denote purpose 283, 566; 283, 1. W. gen., as synonym of *propter* 24, 43.—*Gratias agere, gratiam referre*, constr. w. Quod-cl. 598, 9; rarely w. Inf. cl. 599, n.—*Gratias referendū esse*, expl. 168, 1.

**gratificari**, w. dat. 89.

**gratis (gratius)** 242, obs.

**gratulari**, w. dat. 89; w. Quod-cl. 598, 9 (not w. Quam-cl. 598, n. 1).

**gratus**, w. dat. 118, 112. *Gratum est* w. Quod-cl. 610, 4; w. Ut-cl. 612, 6.

**Habere**, as factitive verb w. double acc. 102, C.; more frequently in pass. w. double nom. 102, obs. Constr. w. *pro*, or *in numero* 102, 75. As verb of esteeming, w. obj. of inner value 272, 1. W. perf. part. as accessory pred., being the origin of the auxiliary 'to have' in modern languages 254, 3. Constr. w. a rel. cl. in subjunc. (*habeo quod dicam*), w. obj. inf. w. gerundial, and w. interrogative cl. 557, 2.

**habilis and inhabilis**, w. dat. 118, 112; w. gerundial after *ad* 192, 1.

**habitare**, may take an obj. of price 267, 32, 2.

**Habitual actions**, how expr. 343, 71.

**hac**, fourth locative case 216.

**Hactenus**, compound adv. of 4th loc. case 217, 8; 222, 9. *Hac hactenus*, 520, n. 13.

**had it not been for**, how rendered 718, 3.

**half**, how expr. 116, 105. *One half as much*, or *less*, how expr. 752, 2.

**it happens that**, expr. by different impersonal 613, A; diff. between these 619, 9.

**hand (non) secus**, synd. ant. of compar. cl. of quality 745, 3. What conjs. are used after it. Ib.

**he who**, how rendered 509, 2; 514, 1.

**help**. 'I cannot help' w. participial = *facere non possum quin*; or *non possum quin*; or *non possum non* 605, 7.

**hic**, demonstr. adj. (see P. I.); as synd. ant. of rel. and modal cl. of quality 435, 2.

**Hic**, adv. in first locative case 217, 4; as temporal adv. = *tum* 223, 3.

**hiding**, verbs of, w. acc. after *in* 38, 67.

**hinc**, demonstr. adv. in second locative case 217, 4; as temporal adv. = *deinde* 222, 9.

**Historical present**, see *Present*. HISTORICAL INFINITIVE, see *Infinitive*. HISTORICAL IMPERFECT, see *Imperfect*. HISTOR. SUBJUNCTIVE, see *Subjunctive in conditional cl.*

**honestus**, w. gerundial after *ad* 192, 5; w. II. Sup. 121, 121. *Honestum est*, w. Subj. Inf. cl. 610, 3.

**hora** (hour), how calculated, and divided by the Latins 226, 1.

**homo**, temp. adv. = *hoc anno* 225, 11.

**hormum**, compound locative adv. 217, 8.

**hortari**, w. acc. after *ad* or *in* 41, n. 2. W. imperative cl. 595, 4; rarely w. obj. inf. Ib.

**how**, different ways of rendering 240, 2.

**however**, rendered by *quamquam* 693, 12; by *nisi* or *nisi tamen* 739, 2. (By *autem*, etc.; see P. I.).—*However much*, by *quamvis* (not *quomacunque*) 500, 5; 501, 9; 693, A foll.

**however little** = *quamvis non* 694, B.

**huc**, adv. of place in 3d locative case 317, obs. 4.

**Hucusque**, compound locative adv. 217, 8; postclassically as temporal adv. 222, 9.

**humus**, as locative object, takes locative cases, like names of cities 47, 81.

**hundred-weight**, how expr. 275, 1.

**Hypothetical comparison**, in regard to comp. cl. introduced by *quasi*, *ac si*, *quam si*, etc. 743, 3 foll. Subjunc. in the cl., subject to law of consecution 743, 5.

**Ibi**, adv. of place, in 1st locative case 216; as temporal adv. 222, n. 1.

**iccirco**, causal adv. 280, 40. Syndet. ant. of Quod and Quia-cl. 683, 3; of final cl. 435, 2; of causal Si-cl. 716, 3 foll. Use of *iccirco* if not synd. ant. of clauses 282, 8.

**id quod**, introducing parenthetical rel. cl., rendered by 'which' after a noun in apposition 517, 4.

**idem**, determinative form-adj. (see P. I.), as synd. ant. of comp. cl. of quality, followed by *quā*, *ac*, *atque*, *ut*, etc. 744, 1.

Used as access. pred. in the meaning 'likewise' 251, 9. Diff. from *et ipse*. Ib.

**identidem**, temp. adv. 222, 9.

**ideo**, therefore, causal adv. 280, 5 and 7. Diff. from the causal conjs. *ergo*, *igitur*, *itaque* 281, 6. Adv. of purpose 283, 566;

284, 3. Synd. ant. of Quod-cl. 683, 3. Meaning of *ideo* if used without a causal cl. 282, 8.

**idoneus**, w. dat. 118, 112; w. gerundial after *ad*; w. a rel. cl. in subjunc. 557, 3.

**Idus**, meaning and gram. use 227, 1.

**if**, regular Engl. equivalent of *si* 488, B; rendered by *quum* 645, 34. *If not* = *nisi*, *ni*, or *si non* (see these conjs.). 'If I am not mistaken' = *nisi me fallit, nisi fallor* (not *nisi erro*, nor *si non fallor*, etc.) 742, 2.

'If you please' = *si placet, si videtur, sis, sodes* (antecl. and poet) 742, 11.—'If but, if indeed' = *si quidem* 688, 14. 'If but = if only, provided that,' by *dum* or *dummodo* w. subjunc., *si modo*, etc. 676, 13; 677, 14.

**ignarus**, w. gen. 118, 109. W. gerundial gen. 161, 207. *Te ignaro*, without your knowledge 184, 1.

**ignorare (non)** w. Quin-cl. 589, 4.

**ignoscere**, w. dat. 88; different constructions 88, n. 5. W. Quod-cl. 598, 9; w. Si-cl. 598, n. 1.

**ille**, demonstr. form-adj. (see P. I.) Synd. ant. of clauses of quality 435, 2.—*Ille ego qui* 515, 4.

**illico**, adv. of time, expl. 225, 11. In a negative thesis of conditional periods, emphatically used inst. of *iccirco* 717, 3.

**illudere**, w. dat. or acc. 91, 475.

**immemor**, w. gen. 118, 109.

**imminens**, w. dat. 118, 108.

**immolare**, w. abl. or acc. of the victim 95, 62.

**immunem esse**, w. *ad* or mere abl. 29, 48.

**impedimentum**, w. attr. Quominus-cl. 625, D.

**Impedimento est**, w. subj. Quod-cl. 615, 11.

**impedire**, constr. w. trans. acc. along w. obj. inf. 104, 83; 603, n. 1; w. trans. acc. along w. neuter form-adj. 85, 39, 2. As verb of negative doing w. Quominus-cl. 602, 5.

**Non impedire** w. *quin*, an anomalous construction 603, n. 1. W. *ne* 603, n. 1. W. gerundial after *ad*. Ib.

**impellere**, w. gerundial after *ad* 190, 239, 1; w. That-cl., see *movēre*.

**imperare**, w. dat. 88. Other constructions 88, n. 1. *Imperare alicui aliquid*, of military requisitions 98, 69. Personal construction of the pass. *imperator* w. obj. inf. 105, 85. Constr. w. imperative clauses 596, 6; their different forms, and connections w. the dat. of the personal obj. Ib.

**Sibi non imperare** (not to restrain one's self) constr. w. Quin-cl. 603, 5.

**Imperative clauses**, a main division of dependent sentences 480, 610. Gram. form 389, 83. Dep. on ordinary verbs of saying 389, 2. Different classes of imperative clauses according to the nature of the leading imperative idea 595, 2. Form of imperative cl. dep. on verbs of negative command 597, 7; on verbs of permission 597, 8. Governing verb of command understood 390, 3. Imperative cl. in form of Inf. cl. w. gerundial pred. 594, 1.

**Imperative mood** (see P. I.). The II. Imperative, denoting laws and rules 351, A. Its

equivalents. *Ib.* Used for didactic rules 351. B.

**Imperative mood** (Engl.) expr. by Latin fut. tenses 350, 1; by Lat. subjunc. 382 foll.

**Imperative (independent) sentences** (see P. I). When their pred. is placed in subjunc. 381 foll. Used w. force of Si-cl. 355, 6; 736, 7. With concessive force 384, 7. Form of imperative sent. in obl. discourse, see *Oblique discourse*.

**Imperfect Indicative**, 305 foll. Two general requirements, (a) INCOMPLETENESS of action 305, 312; (b) peculiar conception in regard to TIME of action 313 foll.—According to the various relations of 'incompleteness' the imp. is either imperfect of STATE (306, 50), imp. of CONTINUED (progressive) ACTION (307, 51), or of REPEATED ACTION (311, 3); also imp. of UNSUCCESSFUL ATTEMPT, and of directly IMPENDING ACTION (309, 53). Incompleteness of act, pregnantly implied (*quare proficiscébatur?* = *quid erat causa cur proficisceretur?*) 308, 52.—Necessity of determining the standpoint of TIME in the use of imp. 313, 576, obs. The time of the action either conceived as time-point (315, 377), or as period of time (316 foll.), both of which may be designated by adverbs of time (313, 55), or by temporal clauses (320, 60), or by implication (314, 56). Use of perf. or imp. according to the different combinations and relations of these elements (313, 577, obs.; 314, 1 and 2; 317, 3 and 4; 318, 58; 320, 60; 322, 61; 323, 62; 325, obs. 2).—Particular classes of Imperfects, which must be considered as typical forms: Imperfect of CONTINGENT ACTION 328 foll.; DESCRIBING IMPERFECT 332 foll.; HISTORICAL IMPERFECT 333 foll.; imperf. of INNER ACTION 336 foll., which is subdivided into imp. of REFERENCE 539 foll., imp. of DEBATES 340, or HABIT 342.—Imp. w. *antea*, inst. of plup. 316, n. 11. Imp. w. force of Engl. plup. when an action was still lasting at the time spoken of 319, 59.—Imp. in princ. sent. determining the time of another action, 325, obs.—Idiomatic use of the imp. of *audire* (325, 1), and *dicere* (341, 3).—Perf. or imp. of *solvere* 343, 72; w. *sape* 326, 3, 4; w. *semper* 326, 3; w. *quotidie* 326, 5; w. *etiamtum* 316, 1.—Lat. imp. rendered into Engl. 1) by progressive form of preterite 307, obs.; 311, 3; 2) by common form of pret. 307, 1; 329 foll.; 337 foll.; 340 foll.; 344, 72; 3) by 'used to,' 'was wont to' 344, 72 foll.; 4) by pluperf. 319, 59; 346, 4; 5) by present-perf. 319, 5; 357, f.; 6) by present or future in epistolary imp. 357 foll.; 358, 5; 7) by 'about to,' 'going to' 357, h.

**IMPERF. OF PERIPHRASTIC FUTURE**, see *Periphr. fut.*—Imp. of periphrastic GERUNDIALS 145, 514.—Imp. as EPISTOLARY tense, w. force of pres. or fut. 357 foll.; 358, 5.—Imp. in TEMPORAL Quum-cl. 320, 60; in Quum-cl. denoting IDENTITY of ac-

tion 339, 69; in Postquam-clauses 662, 5 foll.; in Antequam-cl. 669, 6; after *dum*, while (exceptionally) 672, 4; 673, 5, 1; after *donec*, as long as, 681, 24; in Si-cl. of doubtful reality 703, A foll.—Imp. ind. of POTENTIAL verbs (*poteram, oportebat* etc.) in a hypothetical sense w. force of plup. subjunc. 728, 26; w. force of imp. subjunc. 728, n. \*. Imp. ind. of ordinary verbs in hypothetical sense 730.

**Imperfect Subjunctive** in declarative indep. sentences, not belonging to hypothetical periods 379, 4; in interrogative sentences and w. force of potential future 381, 2; in optative sentences 383, 6. For imp. subj. in thesis and hypothesis of conditional periods of non-reality, see *Subjunctive in conditional (hypothetical) periods*.—Imp. subjunct. in dependent clauses, as regular tense of preterite consecution for contemporaneous action 414, 603. Used as logical tense, dep. on non-preterite pred. 445, 6; 446, 7.—In cond. clauses of doubtful reality 1) according to law of consecution 713, 19; 2) as historical cond. subjunc. 713, 20 foll.; 714, 20, A; 3) in cond. cl. of virtual non-reality 715, C.—Imp. subj. in periods of contingent action 330, 6. In Quum-cl. with force of Engl. plup. 319, 2 (for imp. subjunc. in other Quum-cl., see these). In Antequam and Priusquam-cl. 669, 6 and 7; 670, 8. In Donec-cl. (since Livy) 680, 23. In Dum-cl., and Quoad-cl. (a) *dum* = while, denoting the motive of the doer 673, 4; (b) *dum*, and *quoad*, = as long as 676, 12; (c) *dum* and *dummodo* = provided that 677, 13.—In Modal Ut-cl. 435, 3; 436, 5.

Qualifying imperative preds. 693, B. *Quavis licet* Ib. *Quavis non*, however little 694, B.—2) *Quavis* as concessive conj. (= however much), requires the subjunc. Analysis of this construction 694, C. In class. language always as *indef.* concessive Ib. Is made def. by '*sicut est*' Ib. *Quavis* w. ind. 694, 5. In silver Lat. = *quamquam* (although) 695, 5. W. participles and abl. abs. 695, 6; 173, 2. Different conception of *quavis* in classical and postclass. use 699, n. \*

**quando**, 1) interrog. temporal adv. 222, R. 9; 222 n. 1, and obs. 1.—2.) As temporal conj. 666, 4; requires ind. 659, 620, 1.—3) As causal conj.; diff. from *quod*, *quia*, etc. 687, 13. Not used in Caesar. Ib.

**quandocunque**, indef. rel. temporal adv. 222, 9; 498, n.; 501, 7.

**quandoque**, w. force of *quando* causal 687, n. 1.

**quandoquidem** = *quando* causal 687, 13.

**Quantitative Form-adjectives** (see P. I.), used in acc. neuter (*tantum* etc.) to express indef. distance 221, 2.

**quantopere**, interrog. and rel. adv. of intens. 261, 29; 496, 4. Introducing adv. comp. cl. of equal intens., w. *tantopere* as synd. ant. 750, 3.

**quantulas**, in the meaning 'how little' 264, 5; 496, 4. *Quantuluscunque* 500, 5.

**quantumlibet**, w. force of the adv. *quavis* 693, n. \*

**quantumvis**, adv. of intens. 263, 31. In silver Lat. as synonym of the adv. *quavis* 693, B.

**quantus**, interrog. and rel. adj. of the quantitative class 496, 4 (see P. I.); as logical relative in parenthetical clauses 518, d; 519, D (*quantum intelligo*, as far as I see, 265, 6). Introducing comp. cl. of like intensity 750, 2. *Quantum* (acc. neuter), used as interrog. and rel. adv. of intens. 263, 31. Diff. from *quam* 263, 2. Introducing adverbial comp. cl. of intensity after *tantum* 750, 3. When *quanto* is used in place of *quantum* 264, 3. *Quanto... tanto*, corresponding to 'the... the' 751, 5; w. imp. 330, b.

**quantuscunque**, and **quantusquantus**, indef. rel. adjs. of the quantitative class; use of 496, 4; 500, 5.

**quapropter**, compound causal adv. 217, 8; 281, 5. As connective of periods = *itaque* 281, 6.

**quaque and quacunque**, indef. rel. advs. of the 4th locative case 216; 496, 4.

**quare**, causal rel. adv. 280, 2. Diff. from *cur*, *quid* and *quamobrem* 280, 4. Use of 527, a. b. c.

**quasi** (as if), compar. compound conj., introducing hypothetical comp. clauses 743, 3; 745, 2. W. subjunc. according to law of consecution 748, 5. Used before participles and abl. abs. 748, 5; 173, 2. *Quasi* (*quasi vero*) used to introduce exclamatory sent. for periodical coordination 481, obs.; 748, 6. Qualifying single words 748, 7. *Quasi qui*, w. subjunc. 572, 2.—*Quasi quidam*, *quasi* (*aliquis*) 719, 7.

**Quasi-oblique**, and **quasi-suboblique** clauses. Analysis 404, obs.; their use 404, 88 foll. Take subjunc. 404, 600.

**quatenus**, interrog. and rel. adv. 222, 9; 496, 1. Poetically and anteclaus. inst. of *quoniam*, as causal conj. 688, 15.

**quemadmodum**, as interrog. and rel. adv. of manner 240, 2; as compar. adv. = *ut*, w. synd. ant. *sic* and *ita* 746, A; in similes 746, B; in parenthetical clauses 747, E.

**queri**, w. acc. 86, 473; w. *de* 32, 54; w. Quod-cl. or Inf. cl. 598, 9.

**Questions, dependent**, see *Interrogative clauses*.

**'It is the question why'** how rendered 391, 3.

**qui**, rel. adj. 496, 4 (for interrog. *quis*, and *qui* as disjunct and abs. relative, see P. I.).

How rendered 496, 1. Inflected after two declensions 240, n. 1; archaic forms (*quojus* etc.) 497, 6. Use of the abl. form *qui* 240, n. 1; 497, 6.—*Qui* = 'as', when introducing comp. cl. after *idem* 744, 1. Omission of its predicate Ib. *Qui si*, introducing hypothetical comparisons Ib. *Qui tamen* 573, 5.—*Quo in numero* = *quorum in numero* 524, 1. *Quo pacto* = *quomodo* 240, 2. See *Relative clauses*.

**qui**, interrog. form-adv. of manner 239, 15; use 240, 2; derivation 240, n. 1. *Qui* = 'why' 280, 3.

**quia**, diff. from *quod* causal. 682, 1-3. Not used in Caesar 683, 3. Its synd. ant. Ib. Diff. from *quum* causal 683, 4. W. subjunc. of indirect statement without a governing verb of saying etc. 689, A; w. subjunc. of non-reality 690, B. *Non quia* (not that) w. subjunc. 690, C foll.; 690, B; w. ind. 691, D; 692, n. \*. *Non quia* (*non quod*) replaced by *Si*-clauses or *Et si*-cl. 717, 3.

**quicunque**, indef. rel. adj. (see *Indef. relatives*) 496, 4. Its relation to *quisquis* 499, 2. Lacks the gen. plur. Ib. Separated by tmesis Ib. Used as ordinary indef. adj. (= *quisque*) Ib. See *quisquis*.

**quid** (neuter of *quis*, see P. I.). *Quid* in the meaning 'how' 240, 2. *Quid* = why 280, 3. *'Quid? quod'* = nay even 607, 3.

**quidni**, why not, derivation 703, n. 1. Its use, and diff. from *quin* and *cur non* 280, 4. *quidquid*, see *quisquis*.

**quin**, and **Quin-clauses**. Different uses and meanings of *quin* 546, 11 foll.

1) *Quin*, as INTERROGATIVE negative adv. (why not) 546, A. Diff. from *cur non* and *quidni* 280, 4. *Quin* (*quin etiam*) = nay even 546, A. With imperative Ib.

2) *Quin* (why not) as RELATIVE negative adverb (*nulla causa est quin* etc.) 547, B; 615, 12.

3) *Quin*, as CONJUNCTION, (a) = that, in COMPLETING THAT-CLAUSES 547, C. Dep. on *non dubitare* and *non cunctari* 589, 2 and 3. Dep. on other *verba sentiendi* w. negations 589, 4. Original meaning of *quin* in these clauses (= why not) 589, n. \*. Introducing subj. cl. (*dubium non est quin non discrepat. non fallit*) 609, 2; 616, 5 and 7. Introd. attributive That-cl. 625, B, 1.—Dep. on verbs of negative doing w. another negation 602, 5. Its relation to *quominus* 603, 5. Dep. on verbs expressing the ideas 'not restraining,' 'not omitting' 605, 7. *Facere non possum quin; fieri non potest quin* Ib. *Non stat per aliquem quin* 620, obs. 2. After *nihil abest, paulum abest* etc. 628, 8.—(b) *Quin*, introducing MODAL THAT-CLAUSES after a negation (= *ut non*, rendered by 'without' w. participial) 189,

3; 547, *D* (*nemo est quin* etc.) Not to be considered as a contraction of the nom. *qui* with *non* 547, n. 1. How far it may be replaced by *qui non* etc. 547, *D*; 548. Replaced by *ut non* 636, 3.—(c) As a CAUSAL CONJUNCTION (*non quin = non quia non*) 690, *C*; 691, n. 1.—Consecution of tenses in *Quin*-clauses 433 foll.

**quinarius** (coin), value of 268, 5.

**quincunx**, = five twelfth 116, 105.

**quippe**, derivation 708, n. 1. Different uses of 688, 16. *W.* participial construction 689, *A*. As a coord. conj. = *nam* 689, *B*. Not to be considered as subordinating conj. 689, n. 1. *W.* Inf. cl. *Ib*. Not used in Caesar 689, *B*. *Quippe qui* 572, 1. *Quippe quum* 655, 2. *Quippini* 708, n. 1.

**quisque**, use of as indef. adj. see *P. I*. Is placed in the nom. as adjunct of gerundial abl. and abl. abs. 170, 2; 176, 1.

**quisquis** and **quidquid**, indef. rel. adj. 496, 4. Its relation to *quicunque* 499, 1 foll. What cases of *quisquis* are in use, and in what relations they occur 499, 2 foll.—*Quidquid*, as adverbial acc. (= how far so ever) 501, 7.—*Quidquid* and *quodcumque* w. partitive gen. = *quodcumque* and *quodcumque* 500, 4.

**quo**, 1) as ordinary abl. of the abs. neuter rel. adj. *quod*; *quo* (= *quā re*) *factum est* *ut* 474, 6. As abl. of diff. before comparatives, *quo*... *eo* 330, *b*; 751, 5.—2) As interrogative and rel. adv. of the 3d locative case 216; 496, 4. Its use in locative clauses 575, 616 foll.—3) Inst. of *ut eo*, (*a*) to introduce final clauses 283, 566; 284, 3; 558, 8 (see *Relative clauses*); (*b*) w. modal force after *non* (*non quo = non ut eo*, or *non quod*) 690, *B*; 690, *C* foll.; 691, n. 1; after *magis quam* 761, *E*.

**quoad**, 1) as interrogative and rel. adv. (how far, up to what time, as far as, etc.); derivation and analysis 217, 8; 222, 9; 674, 7 (*quoad ejus fieri potest*, *Ib.*). 2) as temporal conj., (*a*) = as long as 671, 622; synd. ant. 674, 6; tense and mood of its pred. 674, 8 foll.; 676, 10; 323, 62; (*b*) = till 679, 19 and 20. Diff. from *dum* and *donec* 681, 26.

**quocirca**, derivation 217, 8; use of 280, 1 foll.; as causal relative adv. 281, 5; as periodical connective 281, 6.

**quod**, relative neuter adj. (for its general use, see *P. I*, *qui*, and *Relative cl.*); w. partitive gen. like *quodcumque* and *quidquid* 499, 1. *Quod attinet ad* 518, *B*; *quod reliquum est*, *quod superest* = as to the rest 518, *C*; *quod commoto tuo fieri possit* 518, *b*; *quod fiat pace tua* 560, 2; *quod sciam*, *quod cognoverim* etc. 518, *b*; 560, 2; *quod ajunt* 518, *a*; *quod in te est* 560, 2; *quod exstet* *Ib*. *Quod = quod attinet ad* 607, 3.—*Quod* (accus. neuter), as general connective of periods (*quod si* or *quodsi*, *quod ubi* etc.) 521, 4; 522, 5.

**quod**, conjunction = that, 1) introducing completing *That*-clauses after verbs of emotion 590, 5. Gram. nature of such *Quod*-cl. 388, n. 1; 590, n. 1; their mood 388,

2. Exclamatory *Quod*-cl. 591, 6.—2) dep. on verbs denoting the manifestation of emotions, and on verbs of accusing, praising, etc. 594, 24; 598, 1, 9; 598, n. 1; their mood 388, 2.—3) *Quod*-cl. dep. on verbs of saying and thinking in late Latinity 387, 2.—4) *Quod*, introducing *Fact*-cl. (see this article) (*a*) in the relation of transitive objs. (*mitto quod* etc.) 605, 2; (*b*) in the relation of an abl. of instrument (*eo quod*) 606, 4; (*c*) of prepositional objs. (*ex eo quod*, etc.) 607, 2; (*d*) *Quod*-cl. denoting identity of action (*bene facis quod*, etc.) 606, 1; (*e*) elliptical *Quod*-cl. (*quid? quod?*) 607, 3; 339, 3.—5) *Quod* introducing *Subj.* clauses 609, 2 foll.; 613, 2; 615, 28 foll.; 623, 5.—*Quod* introducing attributive *That*-cl. 626, 5; 627, 6.

**quod**, causal conj. = *because*. Diff. from *quia* 682, 1-3; from *quum* causal 683, 4; synd. ant. 633, 3. Causal *Quod*-cl. with subjunc. of indirect statement without governing verb of saying, etc. 689, *A*; w. subjunc. of non-reality 690, *B*. *Non quod* (*non quo*) w. subjunc. 690, *C* foll.; w. ind. 690, *B*; 691, *D*; 692, n. 1.

**quominus**, conj. Dep. on verbs of doing w. negative aim (*prohibere* etc.) 602, 5. When *quin* or *ne* may, or may not be used inst. of *quominus* 603, 5. *Quominus* imparts to any governing verb the idea of hindering 604, 6; to introduce *Subj.* cl. 619, 4; 619, *B* foll.; attr. cl. 625, *D*; 626, *A*; 627, 6; introducing consecutive clauses 636, n. 1; 636, 3; introd. final *That*-cl. w. force of *ne* 638, 2.

**quomodo**, its use as interrog. and rel. adv. 240, 2; 496, 4. *Quomodocumque* and *quomodo* as indef. rel. adv. 496, 4. *Quomodo = ut*, to introduce comp. cl. of quality w. synd. ant. *sic* or *ita* 746, *A*; in *Similes* 746, *B*; to introduce parenthetical clauses 747, *E*.

studiosus, w. gen. 118, 109; w. gerundial gen. 161, 207.

to study, how to render 89, n. 10.

suadere, w. imperative cl.; postclass. w. obj. inf. 595, 4.

suavis, w. II. Sup. 121, 121.

sub, prep. w. acc. or abl., use of 45; 46.

*Sub jus dictionemque redigere* 193, n. 26.—Verbs compounded w. *sub* take dat. 90, 45.

subducere, constr. w. acc. of thing and dat. of pers. (= from) 97, 68.

Subject, its gram. form, see P. I.

Subject-absolute, 171, 530; see abl. abs.

Subject-accusative, explanation of this form 629, 1. Omitted 1) always if pred. inf. is impers. without subj. 629, 2; 2) sometimes as a pers. pronoun lb.; 3) almost always if an accessory pred. is made dep. on a pers. pron. conceived as subj. acc. 630, 2.

Subject-clauses, different classes and relations of 480, 610; 482, A foll.; 484 foll. Must have impersonal pred. 483, 2. Relation to obj. clauses 483, 3. Subject interrogative clauses 391, obs. 3. Subj. That-clauses 608, 27: 1) as subjs. of pass. verbs (Inf. cl., Ut-cl., Quod-cl., etc.) 608, 1-4; 2) Form of Subj. That-cl. w. impers. pred. adjs. 609, 2 foll.; 3) w. impers. pred. nouns 613, 8 foll.; 4) w. impers. verbs 615, 28 foll.; 5) w. ordinary active verbs 623, 5 foll.—Subj. cl. conceived as subj. acc. 485, 6 and 7.

Subject-Infinitive, its gram. relation, see P. I. As subj. of impers. predicates 107, 89; 609 foll. Tense and voice of subj. inf. 107, 494. Change into passive subj. Inf. cl. 610, n. 4. Exceptional use of subj. inf. w. ordinary active verbs 108, 94; 623, 7. Used as exclamatory elliptical sent. without a pred. 481, obs. As subject-acc. in Inf. clauses 108, 93. W. force of hypothetical clauses 733, 3.—Completing pred. of subj. inf. in

acc. masculine sing. 107, 91; 75, 1. When it requires its completing pred. in dat. 75, 19. Form of accessory preds. dep. on subj. inf. 255, 2.

Subjunctive in independent sentences (potential subjunc.) 378 foll. Is either declarative (378, 1 and 2; 379, 3 and 4), interrogative (381, 593 foll.), or imperative (optative) 382 foll. For imperat. subj. see P. I., 303 foll.

Subjunctive in dependent sentences in general 385, 1 and 2; 1) Subjunc. of INDIRECT STATEMENT (oblique clauses) 385 foll.; 386, 597; (a) in Quod-cl. after *gaudere* etc. 388, b.; after *laudare* etc. 388, 2; Ind. in such Quod-clauses 389, 3. (b) in imperative cl. 389, 83; in asyndetic clauses after *velle* etc. 592, a; (c) in interrogative clauses 390, 85 foll. (see *Interrogative clauses*); (d) in sub-oblique cl. 398 foll. (see the-e); (e) in Quasi-oblique clauses 404, 600 foll.—2) Subjunc. by ATTRACTION and quasi-attraction 408 foll. In cl. dep. on subj. inf. and subj. Inf. cl. 412 foll. R. 91. Tenses of the subjunc., see *Consecution of Tenses*.

Subjunctive in particular clauses, 1) In all That-clauses introduced by *ut*, *ne*, *quin*, *quominus*, and in asyndetic That-cl. 588, 617.—2) In temporal and causal Quam-clauses, see *Mood in Quam-clauses*.—3) In clauses of contingent and repeated action (*whenever* etc.) 331, obs. 6—4) Subjunc. after *postquam* 659, 1.—5) After *antequam*, *priusquam*, and *prie* 667 foll.; 764, 13.—6) After *dum* and *quoad* = as long as 675, 9; 676, 12; after *dum* and *dummodo* = if but 676, 13; 677, 13.—7) After *quia* and *quod* causal 689 foll., 17; w. suboblique subjunc. 404 foll.; w. *quippe* 572, 12.—8) After *etsi* 698, 13; *quamvis* 694, C; *licet* 695, 7; *ut* (= even if) 695, 8; *vel si* (= *etiamsi*); *si maxime* (= *quamvis*) 731, 3.—9) In comparative clauses 748, 5; 762, F; 762, 12; 764, 14, n. 3; after *quasi*, *velut*, *tamquam* etc. in hypothetical comparison (see this article).—10) In conditional clauses; see *Subjunctive in cond. cl.*—11) In relative cl., see *Subjunc. in rel. cl.*—12) Subjunc. of a verb of saying denoting a causal relation of an Inf. cl. dep. on the verbum dicendi 405, obs. 3.

Subjunctive in conditional clauses, 1) in cond. clauses of doubtful reality: (a) Subjunc. of improbability 709, 11; (b) of actions dep. on the person spoken to 710, 12; (c) of virtual non-reality 710, 13 and 14; 715, C; (d) in indef. cond. periods 711, 15 and 16; 712; (e) of exemplification 712, 17 foll.; (f) historical subjunc. 713, 20 foll.—2) In cond. clauses of non-reality, see this article.

Subjunctive in relative clauses, is either a subjunc. of non-reality, or gnomic 512, 614. 1) SUBJUNC. OF NON-REALITY 513, 16 foll. (a) after *non est qui*, *nulla causa est* etc. 541, 2 and 3; after *quis est qui* 544, 4. When ind. must be used in relative cl. dept. on negative pred. 544, 5-8; 546, 9 and

10.—(b) After indefinites implying a negation (*pauci*, *quotusquisque*, *solus* etc.) 550, 1-3.—(c) After *sunt qui*, *inventus est qui* etc. 551 foll.—(d) If princ. pred. is potential or doubtful 554, 18; after *aliquis* 555, 3.—(e) Rel. subjunc. of adaptedness and purpose 556, 19 foll. Nature of subjunc. of purpose expl. 559, n.\*—2) GNOMIC SUBJUNCTIVE 559 foll.; is either restricting (560, 1 and 2), or modal (qualitative, *is est qui* etc. 560, 20 foll.; of intensity 564, 9 and 10), or causal 566, foll.—Subjunc. in rel. cl. referring to preceding descriptive adjs.; its different nature 570, 10 foll.—Subjunc. of loose logical relation 571, 11 foll.—Subjunc. by attraction in rel. cl. 410, 3, 2.—TENSES of subjunc. in rel. cl.; (a) logical tenses in restricting relative clauses 423, 2; in modal rel. cl. 433 foll.; 439, 9; 440, 10. Periphrastic tenses of the subjunc. in rel. suboblique clauses referring to the future 449, B.

sublimis fertur, expl. 249, 3.

Suboblique clauses, definition 387, 597. Subjunc. in suboblique clauses 398 foll. When they take ind. 399, 1 foll. Subjunc. in cl. virtually suboblique (quasi-suboblique) 404, 600 foll. Ind. in such cl. 405, obs. 2. Subobl. cl. when a governing oblique clause is implied in princ. sent. 406, foll., obs. 1. Elliptical omission of the governing clause 407, 3.—Suboblique Dum-clauses retaining their ind. present or perf. 672, 3; 675, 8; 676, 10. Periphrastic tenses in sub-oblique clauses 449, B.

Subordination of sentences, definition 472, 608; 472, 2 foll. Sentences coordinate w. each other, and subordinate to a third 474, 7. Sent. dep. on subordinate sent. 477, 10. Their collocation 477, 1; 478, 8; 479, 4. See *Clauses*.

subornare, constr., see *movēre*.

Substantive Clauses = Fact-cl., see these.

Substantive Si-clauses inst. of a Fact-cl. introduced by *quod*, 733, 5.

Substantives, (Engl.) expr. by Latin interrogative clauses (commands = *que fieri velit*; size = *quanta sit* etc.) 395, 3, b.

subvenire, w. dat. 87, 474.

succedere, w. dat. 89; w. *sub* and acc. 89, n. 11.

not to succeed, *rem male gerere* 223, n. 7.

succensere, w. dat. 89.

succurrere, w. dat. 87, 474.

sufficere, w. gerundial dat. 163, 209; w. gerundial after *ad* 190, 239, 1. *Sufficit*, impers., w. Subj. Ut-cl. 622, 6.

suffragari, w. dat. 87, 474.

sui, sibi, se, and suos, their use in oratio obliqua 763, 3; 769, 5. *Sui protestātem facere*, 36, n. 1. For their general use, see P. I.; see also *se*.

sultis (= *si vultis*), anteclass. 742, 11.

sum (Engl. noun), how expr. in Lat. 268, 33, 2.

sumere, w. participial gerundive 148, 178.

summe and summum, as adv. of intens. 265, 7.

**summopere**, 261, 29.  
**sunt qui** etc. w. subjunc. 551, 4; w. ind. 552, 5 and 6. The construction expl. 551, 4; 510, 2; 486, 9, 1.  
**super**, prep. w. acc. and abl., its use 68, suppl. *Super* w. comp. *Quam*-cl. 764, 14, no. 3. Verbs compounded w. *super* take dat. 90, 45.  
**superbum est**, w. subj. Inf. cl. 609, 3.  
**superesse**, w. dat. 89; w. gerundial dat. 163, 209.  
**supersedere**, w. abl. 94, 479; w. obj. inf. 103, 77.  
**superstes**, w. gen. or dat. 119, 112.  
**Supine**, first, see P.I.; second Sup. 121, 503. Verbs forming a second sup. 121, 121. When II. sup. is used as impersonal pred. 122, 124. Used expletively 1b.  
**suppetere**, w. gerundial after *ad* 190, 239, 1.  
**supposing that**, how rendered 384, 7.  
**supra**, prep. w. acc. 24, 438; used to denote numeral excess 753, 3; w. comp. *Quam*-cl. 764, 14, no. 3.  
**surripere**, w. acc. of thing, and dat. of pers. (=from) 97, 68.  
**suscipere**, w. participial gerundive 148, 178.  
**suspicio**, w. attr. *Quin*-cl. 625, B, 1.  
**Syllogism**, w. pred. in fut. pres. 351, 4, A. Hypothetical subjunc. or ind. in syllogisms by argumentum ex contrario 724, 15.  
**Syndetic antecedents of clauses**, definition and use 492, 15; of relative cl. 496, 4; of locative cl. 575, 1; of modal Ut-cl. 635, 32, 1; their omission 1b.; of concessive cl. 692, 1; of comp. cl., see these. For other clauses 492 foll.  
**Syndetic combination of sentences** 472, 609; 473, 1.  
**Tabulae**, account-books, idioms connected w. them expl. 254, 4.  
**tædet**, impers., w. logical subj. in acc. 107, 90; constr. w. acc. along w. gen. 99, 484.  
**taking away**, verbs of, constr. w. dat. of pers. from whom something is taken 97, 68; also w. *ad*, *de*, *ex* 29, 48.  
**talentum**, talent, as weight 275, 1; as designation of money 269, 5.  
**talis**, def. form-adj. of the qualitative class, see P. I. Syndet. ant. of modal Ut-clauses 435, 2; of qualitative rel. cl. 496, 4. *Talis qui*, always w. subjunc. 562, C; 564, 7. Diff. from *talis qualis* 562, n. \*. Synd. ant. of comp. qualitative cl. 745, 2.  
**taliter** (postclass.) synd. ant. of *qualiter* 496, 4.  
**tam**, so, adv. of intens.; diff. from *tantum*, *tantopere*, *adeo*, *sic*, and *ita* 262, 4; 750, 3. Synd. ant. of Ut-cl. of intens. 435, 2; of comp. *Quam*-cl. of like quantity 750, 52. When *tam multi* must be used inst. of *of tot* 751, 3.  
**tamdiu**, temp. adv. 222, 9; 225, 11. Synd. ant. of *dum*, *quoad*, and *quandiu* 493, 3; 674, 6. *Tamdiu...quandiu* w. perf. ind. 322, 2.  
**tamen**, as adverbial conj. and particle see

P. I. As synd. ant. (postcedent) of concessive clauses w. *et* and *quamquam* 692, 1; of concessive Si-clauses 731, 2.  
**tametsi**, although, = *etsi* 698, 13.  
**tamquam**, comp. conj. introducing hypothetical comp. clauses 743, 3. W. subjunc., subject to law of consecution 748, 5; introducing ordinary comp. cl. of quality 744, 51; introducing a simile (=ut) 746, B; introd. an accessory pred. 747, G; before participles and abl. abs. 748, 5; 173, 2; qualifying single words 748, 7. *Tamquam qui* w. subjunc. 572, 2. *Tamquam w. quidam* or *aliquis* 749, 7.  
**tandem**, use of, and diff. from *denique* and *postremo* 223, 5.  
**tantus**, def. form-adj. of the quantitative class, see P. I. As synd. ant. of Ut-cl. of intens. 635, 2. *Tantus ut* = only so much as to 440, 12. Synd. ant. of quantitative rel. or comp. clauses (*tantus quantus*) 496, 4; 750, 52. *Tantus qui* 564, 9; diff. from *tantus quantus* 565, n. \*. *Tantum* w. participial gen. in the meaning of *tot* 750, 2. *Tantum* as adv. of intens. 263, 31; its use 263, 1; diff. from *tam* and *tantopere* 263, 2. When *tanto* must be used inst. of it 264, 3. *Tanto* (rarely *tantum*) to express multiples 264, 4; 752, 2. *Tantum quod* w. plur. 347, 6. *Tantum* as synd. ant. of *quantum*, inst. of *tam...quam* 750, 3; as synd. ant. of *dum*, *quoad*, and *quandiu* (only so long) 674, 6. *Tantum abest* w. attr. Ut-cl. (=tantum abest ab eo ut) 628, 8; idiomatically w. two Ut-clauses (attr. and modal) 637, 3. *Tanto...quanto* followed by two comparatives = 'the...the' 751, 5. *Tanti*, not *tanto*, as obj. of value and price 270, 35, 2 foll. *Tanti est*, idiomatic use of 752, 2.—*Tantum*, as particle = only, see P. I.  
**tantisper**, temp. adv. 225, 11; as synd. ant. of *dum*, *quoad*, and *quandiu* 674, 6.  
**tantopere**, adv. of intens. 261, 29. Diff. from *tam* etc. 262, 4. Synd. ant. of adverbial comp. cl. introduced by *quantopere* 750, 3; 496, 4. *Quam* after *tantopere* 750, 3.  
**tantulus**, = so little 264, 5.  
**tantusdem**, as synd. ant. of quantitative rel. (comp.) cl. 496, 4; 750, 52. *Tantumdem*, used as adv. of intens. 263, 31.  
**tardus**, constr. w. gerundial after *ad* or *in* (w. abl.) 194, 540.  
**temperare**, w. gerundial dat. 163, 209. *Sibi temperare*, as verb of restraining, w. That-cl.; see *reprimere*.  
**temperi**, temporal adv. in locative case 225, 11.  
**Temporal adverbs and particles**; different classes and use of 222 foll.  
**Temporal clauses** 644 foll. Introduced by *quum* 615 foll.; by *postquam*, *ubi*, *ut*, *simulac*, *quando* 659, 620 foll.; by *antequam* and *priusquam* 666 foll.; by *dum*, *donec*, *quoad*, *quandiu* 671 foll. Temporal relative clauses 526, B. Temporal Si-clauses 732, 4. Collocation of temporal clauses 478, 7.

**tempus**, w. gerundial gen. 159, 3. *Tempus est*, w. gerundial gen., w. subj. inf., or subj. Inf. cl. 614, 3.  
**tendere**, as verb of striving w. *ut* 600, 2; 600, n. 1.  
**tenere**, = *obtinere*, as verb of doing, w. *ut*, see *impetrare*. As verb of hindering (=detinere) w. *quominus*, and as verb of restraining accompanied by a negation, w. *quin* 602, 5; 603, n. 3.  
**Tenses**, their use in the ind. 298 foll.; see the single tenses. Tenses in letters, see *Epistolary tenses*. Different conception of past tenses in Latin and in Engl. 302, 568, 1. For tenses of ind. used in the different clauses, see the articles on the particular conjunctions and clauses.—Tenses of the SUBJUNCTIVE, see *Consecution of tenses*.—LOGICAL TENSES of the subjunc. Definition 422, 605. Diff. from 'tenses by consecution' and conflict w. them 422, obs.; 422, 606 foll. Logical tenses chiefly used when not the time spoken of, but the time of the speaker is taken as the standard of time w. respect to past actions 423, 1. Instances in which this occurs 423, 2 foll.; 424, 94. (a) In restricting rel. cl. 423, 2; (b) w. potential subjunc. in certain connections 423, 3; (c) for the sake of perspicuity, or to avoid a conflict w. other gram. rules 425, 1 foll.; (d) when the governing pret. pred. contains a present pred. by implication 426, 2; (e) in comp. *Quum*-cl. 431, 10; (f) in modal Ut-cl. and their equivalents 434 foll. (views of the grammarians examined 434, n. \*); (g) in hypothetical clauses made dep. on non-pret. pred. 442 foll.; (h) the imp. subjunc. as logical tense when the princ. non-preterite pred. contains a past tense by implication, and for particular reasons 745, 6 and 7.—When logical tenses cannot be used 429, 1-3; 440, 12.—Conversion of tenses in the subjunc., see *Consecution of tenses*. Conv. of tenses in cl. dep. on verbs of fearing 448, 2; on verbs of doubting 449, 3; in dep. questions 449, 4; after *erspectare*, 1b.; in final clauses 449, 5; in sub-oblique clauses 449, B, 1. Convers. of dep. fut., if the pred. must be in subjunc. 450, C.  
**tentare**, as verb of striving, w. *ut* or *ne* 599, 2.  
**tenui Minerva**, 184, obs. 1.  
**tenuis**, semi-preposition w. abl. 9, 6; 12; 36, 449. Adverbs in 4th locative case compounded w. *tenuis* 217, 8. Its derivation, and construction w. gen. 36, obs.  
**terra**, meaning in the pl. 165, n. 1. *Terrarum* (*gentium*) as attr. of locative adverbs 504, n. 22.  
**terribilis**, w. II. Sup. 121, 121.  
**terrencii est**, 272, 3.  
**testis**, constr. w. gerundial gen. 159, 2.  
**testato** and **intestato**, as impers. pred. abls. 186, 234.  
**than**, rendered *quam* (see this conj.). 'Than' after 'other' by *ac*, *atque*, or *quam* 749, 9.

**That-clauses** 588 foll. Different gram. forms in Latin 588, 617. 1) OBJECT THAT-CLAUSES, being either (a) Inf. cl., or (b) clauses introduced by *ut*, *ne*, *quin*, *quominus*; or (c) Quod-clauses, 588, 22.
